

1

00:00:00,000 --> 00:00:07,500

An enormous flying creature born of a raging inferno,

2

00:00:07,600 --> 00:00:13,500

a vicious three-headed dog guarding the gates of hell,

3

00:00:13,600 --> 00:00:19,880

and mysterious sea serpents terrorizing mankind.

4

00:00:19,980 --> 00:00:24,620

But are such monsters just mythical creatures of fantasy,

5

00:00:24,720 --> 00:00:28,420

or did they actually exist in the ancient past?

6

00:00:28,420 --> 00:00:31,380

There was some kind of experimentation going on.

7

00:00:31,480 --> 00:00:34,880

Let's take this animal and give him two heads.

8

00:00:34,980 --> 00:00:38,520

Let's take this dragon and give him wings.

9

00:00:38,620 --> 00:00:42,860

These creatures are direct products

10

00:00:42,960 --> 00:00:48,900

of extraterrestrial genetic experimentations in our past.

11

00:00:49,000 --> 00:00:51,400

Millions of people around the world

12

00:00:51,500 --> 00:00:53,840

believe we have been visited in the past

13

00:00:53,940 --> 00:00:56,480

by extraterrestrial beings.

14

00:00:56,540 --> 00:00:59,200

What if it were true?

15

00:00:59,300 --> 00:01:03,680

Did ancient aliens really help to shape our history?

16

00:01:03,780 --> 00:01:08,340

And if so, might the beasts and monsters of ancient legends

17

00:01:08,440 --> 00:01:12,580

really have been the product of an advanced extraterrestrial

18

00:01:12,680 --> 00:01:13,580

intelligence?

19

00:01:13,580 --> 00:01:28,780

dime energy unleashed by intelligence?

20

00:01:43,580 --> 00:01:59,580

On July 13, 2008, a 26-year-old woman and three of her friends

21

00:01:59,580 --> 00:02:02,580

discovered the carcass of a strange-looking creature

22

00:02:02,580 --> 00:02:04,580

that had washed onto the shore.

23

00:02:04,580 --> 00:02:16,580

It actually looked like a hybrid creature that had the claws of a raccoon

24

00:02:16,580 --> 00:02:20,580

and possibly the beak of a bird and the body, perhaps of a dog,

25

00:02:20,580 --> 00:02:26,580

a very unusual creature, a photograph was taken and circulated.

26

00:02:26,580 --> 00:02:30,580

It started popping up all over the internet. It went viral.

27

00:02:31,580 --> 00:02:36,580

The people couldn't identify the animal because it didn't look like anything.

28

00:02:36,580 --> 00:02:39,580

It looked like a mixture of different animals.

29

00:02:42,580 --> 00:02:46,580

And because it looked so strange, you know, it provoked a lot of fear.

30

00:02:46,580 --> 00:02:48,580

Is it just an unknown animal?

31

00:02:50,580 --> 00:02:52,580

Could it be some sort of hybrid-type creature,

32

00:02:52,580 --> 00:02:55,580

something, you know, that had been genetically tinkered within a lab?

33

00:03:01,580 --> 00:03:04,580

Some believe the mysterious creature is a hybrid beast,

34

00:03:04,580 --> 00:03:08,580

perhaps created at a nearby government testing facility,

35

00:03:08,580 --> 00:03:11,580

the Plum Island Animal Disease Center.

36

00:03:12,580 --> 00:03:18,580

Cryptozoologist Lauren Coleman labels the creature the Montog Monster.

37

00:03:18,580 --> 00:03:22,580

This is a replica of the Montog Monster.

38

00:03:22,580 --> 00:03:27,580

One of the things that we noticed about this creature was these strange features around its mouth.

39

00:03:27,580 --> 00:03:32,580

It looked like a beak. It actually looked like we didn't know what was going on here.

40

00:03:32,580 --> 00:03:35,580

Was it a griffin? Was it a creature? Was it a giant turtle?

41

00:03:35,580 --> 00:03:41,580

But indeed, that was decaying flesh that had come away from the skull.

42

00:03:41,580 --> 00:03:44,580

Other features were the strange-looking feet,

43

00:03:44,580 --> 00:03:50,580

and the body, indeed, because the picture had no scale in it, we thought, looked enormous.

44

00:03:50,580 --> 00:03:56,580

But on the body, these white objects here really define the size of flies

45

00:03:56,580 --> 00:04:01,580

and on the creature, which then determined the scale of this creature, was very small.

46

00:04:01,580 --> 00:04:06,580

Unfortunately, someone grabbed the carcass and supposedly took it to his front yard

47

00:04:06,580 --> 00:04:08,580

and then it ultimately vanished.

48

00:04:08,580 --> 00:04:12,580

So the only evidence we have of this creature is the photo.

49

00:04:17,580 --> 00:04:22,580

But while some researchers theorized that the so-called Montog Monster

50

00:04:22,580 --> 00:04:25,580

was the product of modern science,

51

00:04:26,580 --> 00:04:30,580

ancient astronaut theorists believe the animal could be part

52

00:04:30,580 --> 00:04:36,580

of a long line of genetically modified creatures that have appeared throughout human history.

53

00:04:36,580 --> 00:04:41,580

If the Montog Monster is, in fact, a reality,

54

00:04:41,580 --> 00:04:49,580

then that could mean that if we are able today to create some very bizarre creatures

55

00:04:49,580 --> 00:04:53,580

behind closed doors and labs all around the world,

56

00:04:53,580 --> 00:04:59,580

it is possible that our ancestors, especially the extraterrestrial ancestors,

57

00:04:59,580 --> 00:05:08,580

had the same capability, because in ancient texts we have numerous references

58

00:05:08,580 --> 00:05:15,580

to monsters, bizarre beings that have been described in great detail.

59

00:05:16,580 --> 00:05:25,580

Ancient Greek artifacts depict terrifying beasts, such as the gorgon,

60

00:05:25,580 --> 00:05:31,580

the hydra,

61

00:05:31,580 --> 00:05:36,580

and the ferocious Cerberus.

62

00:05:36,580 --> 00:05:40,580

And in Homer's epic poem, The Iliad,

63

00:05:40,580 --> 00:05:45,580

the Greek author describes a battle in which the hero, Balerafun,

64

00:05:45,580 --> 00:05:50,580

slays a monster called the Chimera.

65

00:05:50,580 --> 00:05:55,580

The Chimera was a dreaded beast that wreaked havoc and terrorized the people of Asia Minor.

66

00:05:55,580 --> 00:05:59,580

Homer described the Chimera as an immortal beast with a lion-like head,

67

00:05:59,580 --> 00:06:04,580

a snake tail, and a third goat head in the middle that snorted bright fire.

68

00:06:04,580 --> 00:06:09,580

The notion of Chimeras and hybrids is one that has been part of the human psyche for millennium.

69

00:06:09,580 --> 00:06:15,580

I mean, when you think about things such as the Minotaur, Pegasus, Anubis,

70

00:06:15,580 --> 00:06:21,580

this is something that either we have imagined or have been created at one time.

71

00:06:21,580 --> 00:06:27,580

These beings, these monsters, serve more of a kind of an ethical purpose in mythology

72

00:06:27,580 --> 00:06:30,580

than they are catalogues of something literal,

73

00:06:30,580 --> 00:06:34,580

because storytelling and fiction are just a part of what we are as human beings.

74

00:06:35,580 --> 00:06:44,580

But did mythic monsters merely spring from the imagination of our ancestors?

75

00:06:44,580 --> 00:06:47,580

Or might they have actually existed?

76

00:06:50,580 --> 00:06:53,580

Ancient alien theorists believe in their existence,

77

00:06:53,580 --> 00:06:57,580

and that evidence can be found in the relics of the past.

78

00:06:57,580 --> 00:07:05,580

To suggest that all of these creatures were nothing else but fantasy, in my opinion,

79

00:07:05,580 --> 00:07:10,580

doesn't really hold water, because our ancestors weren't stupid.

80

00:07:10,580 --> 00:07:13,580

They depicted what they saw.

81

00:07:16,580 --> 00:07:21,580

We find these mixed hybrid beings all throughout Egypt,

82

00:07:21,580 --> 00:07:30,580

as sphinxes, as griffins, as bizarre creatures that according to the ancient Egyptian texts,

83

00:07:30,580 --> 00:07:33,580

they did exist.

84

00:07:33,580 --> 00:07:38,580

They were not a fantasy of our ancestors' imagination.

85

00:07:39,580 --> 00:07:46,580

Just imagine there is a modern spaceship travelling in the universe for centuries and centuries.

86

00:07:47,580 --> 00:07:54,580

Then they find a solar system with the planet, with the possibility of life, like the Earth.

87

00:07:54,580 --> 00:08:02,580

And they observe on the Nile a crocodile, a living creature which obviously is resistant to the heat.

88

00:08:02,580 --> 00:08:09,580

They observe a lion with his power, his muscles, and now they start to think,

89

00:08:09,580 --> 00:08:14,580

we could use a mixture of this creature on another planet.

90

00:08:14,580 --> 00:08:21,580

And no, by genetic design, they start to create mixed creatures,

91

00:08:21,580 --> 00:08:26,580

where some of these mixed creatures did exist in the past.

92

00:08:27,580 --> 00:08:33,580

The griffin was a mythological creature that had the body of a lion with the head and wings of an eagle.

93

00:08:34,580 --> 00:08:42,580

Now the lion is the king of beasts, the eagle is the king of birds, so the griffin was the king of all creatures.

94

00:08:42,580 --> 00:08:51,580

The creature is somehow two creatures put together in a way that defies normal sense, defies normal explanation.

95

00:08:51,580 --> 00:08:54,580

So the question is, how does that happen?

96

00:08:54,580 --> 00:09:04,580

By the mid-19th century, scientists began to look at fossil records around the planet to study how organisms changed over time.

97

00:09:06,580 --> 00:09:17,580

Naturalist Charles Darwin theorized that all life forms share a common origin and have evolved over

the centuries through a process called natural selection.

98

00:09:18,580 --> 00:09:26,580

Might the hybrid monsters of ancient religion and myth really have been the result of evolution?

99

00:09:28,580 --> 00:09:35,580

Darwin's theory of evolution by natural selection is a mechanism by which life forms can change from one into another.

100

00:09:35,580 --> 00:09:42,580

It relies on the principle that organisms that have certain traits, which are mutations,

101

00:09:43,580 --> 00:09:48,580

may be advantageous in the struggle for existence and the struggle for reproduction.

102

00:09:49,580 --> 00:09:54,580

And those traits are the ones that will be perpetuated over time, over many, many generations.

103

00:09:55,580 --> 00:10:06,580

Certain different species can breed if they are genetically close, like the donkey and the horse, like the wolf and the dog.

104

00:10:07,580 --> 00:10:17,580

However, cats and dogs will not mate because, first of all, they don't have the biochemical signatures to mate with each other.

105

00:10:17,580 --> 00:10:25,580

And plus their genes are so different that the chromosomes just won't line up properly to reproduce. It's impossible.

106

00:10:26,580 --> 00:10:41,580

But if Darwin's theories on evolution and natural selection cannot explain the origins of ancient beasts and monsters, then where might they have come from?

107

00:10:41,580 --> 00:10:50,580

Perhaps the answer cannot be found on Earth, but in a place much farther away.

108

00:10:56,580 --> 00:11:05,580

Southern Pakistan. In the middle of the Indus River Valley lie the ruins of Mohenjo-Daro.

109

00:11:07,580 --> 00:11:17,580

This ancient city, whose name means Mound of the Dead, was one of the largest urban settlements in the world in 2600 BC.

110

00:11:17,580 --> 00:11:27,580

The ancient city of Mohenjo-Daro had what appeared to be streets that were made up parallel and perpendicular to each other, like a modern city.

111

00:11:28,580 --> 00:11:37,580

The homes actually had their own toilets and they had a very sophisticated sewer system, so it looks like a very advanced city.

112

00:11:38,580 --> 00:11:49,580

Ancient astronaut theorists have long thought this site was also the epicenter of a nuclear explosion that occurred more than 4000 years ago.

113

00:11:52,580 --> 00:11:57,580

Skeletons were found in dead positions as though there was an instantaneous death.

114

00:11:57,580 --> 00:12:04,580

And some of those skeletons, as measured by Soviet scientists, had 50 times the normal radioactivity.

115

00:12:05,580 --> 00:12:18,580

They found pottery that had been fused. Then walls were heated to such an extent they became

vitrified or glass-like, suggesting some sort of ancient nuclear weapon involved.

116

00:12:20,580 --> 00:12:31,580

According to the Mahabharata, the ancient holy texts of the Hindus, white-hot smoke rose in infinite brilliance and reduced the city to ashes.

117

00:12:32,580 --> 00:12:38,580

Horses were burned by the thousands and corpses were vaporized by intense heat.

118

00:12:39,580 --> 00:12:50,580

And afterwards, a big silence came over the entire land and people started to have boils on their skin. Their hair started to fall out and their nails.

119

00:12:51,580 --> 00:12:59,580

There's only one thing that causes this and that is radiation poisoning. It's radiation fallout.

120

00:13:02,580 --> 00:13:12,580

So the question then becomes when events happen in a place where there is extreme radiation? What impact does that have on human life or on other life present there?

121

00:13:13,580 --> 00:13:20,580

Could this explain, for example, why creatures were born with more than one arm or more than one leg, which then somehow became deified?

122

00:13:20,580 --> 00:13:30,580

Because even to this day, we know that in civilizations where anomalous human beings are born, somehow the touch of God is seen to be part of this creation.

123

00:13:32,580 --> 00:13:44,580

According to the ancient Hindu texts, after the carnage at Ohendjodaro, a fearsome flying monster appeared in the sky. It was called Garuda.

124

00:13:45,580 --> 00:13:54,580

In the Mahabharata, the Garuda is a massive bird-like creature, a red face, red wings, talon. It's so huge it would block out the sun.

125

00:13:54,580 --> 00:13:59,580

There are stories that it would let a certain God Vishnu ride on him on occasion.

126

00:14:01,580 --> 00:14:16,580

Each and every time he would show up descending from the sky, he would create hurricane winds and upon his descent, the earth would shake, dust would flap in the air, and every wind of his sanity would be absolutely terrified.

127

00:14:17,580 --> 00:14:30,580

Now, here we have a carving of Garuda, and if we look at the top, yes, they look like feathers, but at the same time, they could be interpreted as big, gigantic flames.

128

00:14:31,580 --> 00:14:43,580

According to Hindu mythology, Garuda is born out of this cosmic event, this war and destruction that happens at the end of every age.

129

00:14:44,580 --> 00:14:52,580

Could this have been somehow connected to exposure to radiation being born within a zone of high radiation?

130

00:14:52,580 --> 00:15:02,580

We cannot know the answer, but we do know that within India and within Pakistan, there are known zones of higher radiation than there are normal.

131

00:15:02,580 --> 00:15:09,580

The logic dictates that somehow genetic abominations will have been born within those places.

132

00:15:10,580 --> 00:15:26,580

If Mohenjo Dara was in fact the site of an ancient nuclear attack, could it be possible that Garuda was a mutant beast created as a byproduct of intense radioactivity?

133

00:15:27,580 --> 00:15:41,580

We tend to have a science fiction view of what mutation is. We think of mutations being caused by radiation and they cause outlandish features and gigantic sized insects and so forth, but in fact, mutations happen all the time.

134

00:15:42,580 --> 00:15:54,580

There's no recorded evidence of any radiation causing a mutation which changes some species into a different species. Most of the radiation mutations are lethal.

135

00:15:56,580 --> 00:16:07,580

But if, as modern scientists believe, Garuda was not likely the result of genetic mutation, then what could explain its existence?

136

00:16:08,580 --> 00:16:24,580

The Mahabharata states that Garuda was born from this raging inferno. And what's really intriguing is the fact that in some text passages, we can read that the exterior of Garuda did not consist of feathers, but of metal.

137

00:16:24,580 --> 00:16:32,580

Now what kind of a bird is that? No bird is made of metal unless it's a type of machine.

138

00:16:33,580 --> 00:16:43,580

Garuda was a flying vehicle and Garuda was able to travel to the moon and around the earth with

very, very high speed.

139

00:16:43,580 --> 00:16:49,580

Garuda even was able to shock mankind with lightning which fell from heaven.

140

00:16:50,580 --> 00:16:59,580

Garuda was considered to be a snake killer. In fact, Garuda needed to eat snakes in order to survive.

141

00:17:00,580 --> 00:17:08,580

Now compare an airplane at the airport today hooked up to a fuel line. Isn't that airplane eating a snake?

142

00:17:08,580 --> 00:17:36,580

If you see modern fighter jets take off in the middle of the night, there is smoke and fire coming out of the exhaust. It looks like a dragon. It looks like some type of a mythical creature, especially if you don't know what you're witnessing is nuts and bolts technology.

143

00:17:36,580 --> 00:17:52,580

So of course you're going to liken it to a living creature. Those ancient aliens knew that our ancestors would worship them as gods because they knew that our ancestors, they didn't know it was technology.

144

00:17:52,580 --> 00:17:58,580

They thought it was magic, spirituality, divine intervention, which it never was.

145

00:17:59,580 --> 00:18:14,580

To the east of India, near the village of Wushang, in the Seshwan province of China, similar tales of flying beasts have also been found in ancient texts.

146

00:18:15,580 --> 00:18:27,580

In the fourth century, historian Zhongku reported the discovery of what were then called dragon bones.

147

00:18:27,580 --> 00:18:34,580

A question occurs as to whether dragons might actually have been actual dinosaurs that had wings.

148

00:18:35,580 --> 00:18:44,580

I should point out that the wings would have been lost to the fossil record. We're just recently talking about dinosaurs having feathers and having evolved into birds.

149

00:18:44,580 --> 00:18:50,580

Well, it's possible that some dinosaurs actually did have wings and could be described as dragons.

150

00:18:51,580 --> 00:19:07,580

But while most mainstream scientists believe the remains found were most likely dinosaur fossils, like those of the flying pterosaur, ancient astronaut theorists have another, more provocative explanation.

151

00:19:08,580 --> 00:19:15,580

Now, a creature which somehow is able to spit fire obviously is not any place in the animal kingdom of today.

152

00:19:15,580 --> 00:19:23,580

So what we have here is either an invention which did indeed spit fire, in which case we're not confronting a creature here, but somehow a creation.

153

00:19:23,580 --> 00:19:28,580

Something which was either engineered by mankind or which was engineered by extraterrestrials.

154

00:19:29,580 --> 00:19:42,580

Machines that fly through the air and spit fire, causing mass destruction, thousands of casualties, and radioactive fallout.

155

00:19:42,580 --> 00:19:52,580

Could the Garuda and other so-called flying dragons really have been ancient versions of today's high-tech bomber planes?

156

00:19:52,580 --> 00:20:00,580

Or perhaps something else? Something even more out of this world?

157

00:20:04,580 --> 00:20:19,580

In March 2010, a panel of 41 international experts concluded that the impact of an asteroid that smashed into Earth at Mexico's Yucatan Peninsula 65 million years ago

158

00:20:19,580 --> 00:20:27,580

probably triggered the global climate change that resulted in the mass extinction of the Earth's dinosaurs.

159

00:20:27,580 --> 00:20:37,580

But is there also evidence that some dinosaur species survived, and if so, might they also have evolved?

160

00:20:37,580 --> 00:20:44,580

The paleontologists tell us that these things have been extinct for 65 million years, yet they still crop up.

161

00:20:44,580 --> 00:20:52,580

And they appear to be prehistoric animals, dinosaurs, literally, that have survived right down to today.

162

00:20:52,580 --> 00:21:01,580

Much like the sea lachan and alligators and sharks and turtles also have survived from those same prehistoric times.

163

00:21:01,580 --> 00:21:12,580

I believe that ancient prehistoric monsters are still living in remote areas of the world, either in oceans and lakes or jungle areas, to today.

164

00:21:17,580 --> 00:21:25,580

In the highlands of Scotland, the legend of the Loch Ness Monster has long been part of Celtic and Norse folklore.

165

00:21:25,580 --> 00:21:39,580

Recorded accounts of Cytics can be traced to the year 565 to the Irish Monk St. Colomba, a powerful leader who founded monasteries in both Ireland and Scotland.

166

00:21:39,580 --> 00:21:48,580

In his journals, Colomba wrote of an encounter with people bearing a man near the shores of the now fabled Loch Ness.

167

00:21:49,580 --> 00:21:57,580

They explained to Father Colomba that the man who had died had been swimming in the lake and was attacked by the water beast.

168

00:21:57,580 --> 00:22:01,580

Upon hearing this, Father Colomba sent his own follower into the lake.

169

00:22:01,580 --> 00:22:07,580

When the beast came after this man, Father Colomba made the sign of a cross and commanded the beast not to harm the man.

170

00:22:07,580 --> 00:22:11,580

The beast fled and was never seen harming another man again.

171

00:22:12,580 --> 00:22:24,580

A lot of people don't realise how big Loch Ness is. It's 23 miles long, a mile wide, and at its deepest point, it's about 800 feet.

172

00:22:24,580 --> 00:22:33,580

And the water is very, very dark and dense. And so it is the prime location where conceivably they didn't need to surface that often.

173

00:22:33,580 --> 00:22:36,580

They would sort of bypass detection.

174

00:22:37,580 --> 00:22:45,580

When we're confronted with the Loch Ness Monster or any kind of anomalous creature, the question really is where does it come from?

175

00:22:45,580 --> 00:22:52,580

Is it a remnant of the dinosaur age or is it something which is out of this world?

176

00:22:52,580 --> 00:23:04,580

We know that, for example, St Colomba definitely felt that the lake was sacred and that there was something present there which had a religious connotation, which is why he went to that place to begin with.

177

00:23:05,580 --> 00:23:20,580

The intriguing thing is that there actually have been a significant number of UFO sightings over the Loch itself of strange, brightly lit objects hovering over the water late at night which clearly aren't helicopters or aircraft or meteorites or anything like that at all.

178

00:23:20,580 --> 00:23:24,580

So in other words, Loch Ness is a weird and spooky place.

179

00:23:25,580 --> 00:23:35,580

Could the so-called sea monsters of Loch Ness possibly be descendants of ancient dinosaurs?

180

00:23:35,580 --> 00:23:50,580

Or might it be of another, perhaps, extraterrestrial origin? And if so, what might this say about other mythical sea beasts like the seven-headed Sumerian sea monster, the Leviathan?

181

00:23:50,580 --> 00:24:00,580

The Leviathan is sometimes described as a serpent or a crocodile or a dragon, but it lurks. It is the gatekeeper to a portal to hell.

182

00:24:00,580 --> 00:24:06,580

And this gateway to hell is apparently deep in the ocean and the Leviathan is there forever lurking.

183

00:24:07,580 --> 00:24:20,580

In Greek myths, the Hydra was described as an ancient sea serpent with many heads. It was said to be a descendant of the Earth Goddess, Gaia.

184

00:24:21,580 --> 00:24:30,580

Hercules was sent to kill the Hydra, but it was terribly difficult. He would slice off the head and two heads would form.

185

00:24:30,580 --> 00:24:39,580

He had to ask help from his nephew. And his nephew had a brilliant idea. Bring a torch. Fire might keep the heads from forming.

186

00:24:39,580 --> 00:24:45,580

So Hercules would bash off one of the heads and his nephew would essentially cauterize the next so that another one wouldn't form.

187

00:24:45,580 --> 00:24:49,580

And in this way, the Hydra was finally defeated.

188

00:24:49,580 --> 00:24:58,580

In the case of a Hydra, we have something which has several heads, which is once again a category of a creature which you would expect not to see.

189

00:24:58,580 --> 00:25:09,580

So we're either confronted here with something which was genetically engineered or which genetically went wrong, but clearly it was of such importance that it was adhered to in mythology,

190

00:25:09,580 --> 00:25:16,580

where it attained a status over the years, over the centuries, up until this moment in time.

191

00:25:20,580 --> 00:25:32,580

According to Scandinavian legend, the Kraken are legendary sea monsters of gargantuan size and are said to have roamed the seas off the coasts of Norway and Iceland.

192

00:25:32,580 --> 00:25:38,580

This fearsome beast was infamous for its attacks on sailing ships.

193

00:25:38,580 --> 00:25:48,580

The danger was not only being attacked by the Kraken. They would come up to the surface and were enormous, the size of small islands, so you could have a collision with a Kraken.

194

00:25:48,580 --> 00:25:57,580

It wasn't even out to attack you. Another great danger was that if it submerged suddenly, it formed such a great whirlpool that it could pull a ship under.

195

00:25:58,580 --> 00:26:11,580

Could such legendary sea monsters have actually existed? Might they have escaped extinction in the safety of cold, deep waters?

196

00:26:11,580 --> 00:26:21,580

According to ancient astronaut theorists, there is evidence of the origin of giant sea creatures in the sacred texts of the Hebrew Bible.

197

00:26:21,580 --> 00:26:28,580

A very early account of an encounter with some kind of monstrous sea creature is found in the Bible.

198

00:26:28,580 --> 00:26:37,580

The story of Jonah, here at Jonah was not fulfilling his destiny and his punishment was to be thrown off a boat into the ocean.

199

00:26:37,580 --> 00:26:48,580

Jonah is swallowed by this giant fish sent by God. He spends three days and three nights inside of this giant fish and then is spewed out.

200

00:26:49,580 --> 00:27:04,580

If Jonah, a human being, had been swallowed, he first of all would have been ripped up by the creature's teeth, then been crushed as it was swallowed and perhaps stomach acids would have destroyed his skin and internal organs.

201

00:27:04,580 --> 00:27:11,580

So I propose there's no way he could have survived being swallowed by whatever this entity was, if it was a fish or whale.

202

00:27:12,580 --> 00:27:20,580

So the question I have is this truly a description of Jonah being swallowed up by a biological animal?

203

00:27:20,580 --> 00:27:30,580

Because in some references we can read that the ribs of that whale were made out of gleaming bronze.

204

00:27:30,580 --> 00:27:39,580

Now that to me is a description of some type of a technological device that was made of metal.

205

00:27:39,580 --> 00:27:50,580

Jonah was in fact not swallowed by a whale but by a USO, an unidentified submersible object.

206

00:27:50,580 --> 00:28:05,580

Jonah disappeared into an object which was clearly of a man-made or extraterrestrial origin and which was of such a specific interest that he not only related the story but that thousands of years after it occurred we're still talking about it today.

207

00:28:05,580 --> 00:28:21,580

I think we need to look at stories like this at a deeper level, not to rill them out just as mythology but to determine if the people reporting these things actually did have real experiences but they were just trying to incorporate it into the way they understood the world at that time.

208

00:28:21,580 --> 00:28:28,580

Could alien beings really have lurked beneath the seas in submersible machines?

209

00:28:28,580 --> 00:28:32,580

If so, why were they there?

210

00:28:32,580 --> 00:28:36,580

Might they have come to share advanced technology with humans?

211

00:28:36,580 --> 00:28:42,580

Or did they come for another perhaps more sinister reason?

212

00:28:43,580 --> 00:28:51,580

Fulgograd, State Medical University, Russia, 1954.

213

00:28:51,580 --> 00:29:03,580

Soviet scientist and organ transplant pioneer, Vladimir Demikov, surgically produces a fully functioning two-headed dog.

214

00:29:04,580 --> 00:29:19,580

What he did was he took the upper torso of a dog and grafted it onto the neck of another dog and surprisingly this creature lived for a few weeks.

215

00:29:19,580 --> 00:29:34,580

Demikov brought it to medical shows as evidence that he could do this, that these sort of hybrids, that these sort of things could be done.

216

00:29:35,580 --> 00:29:47,580

Although highly controversial, the transplant pioneer's audacious experiments paved the way for the first human heart transplant in 1967.

217

00:29:47,580 --> 00:30:01,580

But while the image of Demikov's dog is disturbing, ancient astronaut theorists believe our early ancestors also left behind evidence of equally bizarre creatures.

218

00:30:02,580 --> 00:30:12,580

The great thing about the ancient alien theory is the fact that we can compare modern achievements with stories from our ancient past.

219

00:30:12,580 --> 00:30:25,580

And so if today we're able to create a two-headed dog with six legs, is it possible that a similar creature existed thousands of years ago?

220

00:30:25,580 --> 00:30:27,580

And I say yes.

221

00:30:28,580 --> 00:30:39,580

In the Greek epic poems of Homer's *Odyssey* and the *Iliad*, a vicious three-headed dog named Cerberus guards the gates of Hades.

222

00:30:43,580 --> 00:30:50,580

According to the myths, Cerberus was descendant from the Greek gods Typhon and Lcydna.

223

00:30:51,580 --> 00:31:05,580

But might the so-called gods that created the strange beast really have been early earth visitors, misinterpreted as gods, as ancient alien theorists believe?

224

00:31:05,580 --> 00:31:10,580

The humans and gods were kind of still living among one another.

225

00:31:10,580 --> 00:31:16,580

All of this interbreeding, this fertility like produces all of these monsters.

226

00:31:16,580 --> 00:31:21,580

And you do not want to meet these monsters. These are not the kind of things you want to encounter.

227

00:31:21,580 --> 00:31:29,580

And if one guard dog is ferocious and terrifying, you can imagine three of them, but all on one body.

228

00:31:29,580 --> 00:31:40,580

Cerberus is a factual creature. Then really what we're talking about here is somebody with knowledge and the technology to create a multi-headed animal.

229

00:31:40,580 --> 00:31:43,580

And so we are dealing with extraterrestrial technology.

230

00:31:44,580 --> 00:32:01,580

Is it possible that Cerberus and other hybrids like the Gryphon, the Egyptian Ammit, or the Greek Chimera were in fact created through advanced alien transplant procedures we have yet to discover?

231

00:32:02,580 --> 00:32:12,580

Any civilization which has contacted us in the past or which is contacting us today, roughly needs to be at our level of technological advancement.

232

00:32:13,580 --> 00:32:22,580

It's probably going to be a bit beyond that. And that also means that it's not just the science of space travel, but all sciences which are going to be somewhat more advanced.

233

00:32:22,580 --> 00:32:29,580

So we know that the extraterrestrial who comes to earth from a distant place will have this medical knowledge.

234

00:32:29,580 --> 00:32:32,580

There was some kind of experimentation going on.

235

00:32:32,580 --> 00:32:41,580

Novelty. A zoo. Let's see what we can do. We'll play with these creatures. Let's take this animal and give him two heads.

236

00:32:41,580 --> 00:32:51,580

Let's take this dragon and give him wings. Let's let him breathe fire. Let's have some fun. Maybe that's what they did.

237

00:32:52,580 --> 00:33:01,580

Depictions of monsters that are half beast, half human, can be found dating as far back as 5000 BC.

238

00:33:02,580 --> 00:33:13,580

The centaur. The minotaur. And Medusa are all hybrid creatures described as being created by gods.

239

00:33:18,580 --> 00:33:25,580

Researchers point to the origin stories of these creatures as further evidence of alien contact.

240

00:33:26,580 --> 00:33:34,580

In Greek mythology, the centaur was half human, half horse. The torso of a human would be joined to a horse at the shoulders.

241

00:33:34,580 --> 00:33:44,580

And this would leave them in perpetual tension between the raw animal instinct of the horse and the more civilized morality of human consciousness.

242

00:33:44,580 --> 00:33:51,580

And interestingly enough, when we start looking towards mythology, we actually find specifically in the case of the minotaur,

243

00:33:51,580 --> 00:33:55,580

this is said to have been done specifically by the gods.

244

00:33:58,580 --> 00:34:08,580

In India, the epic text the Mahabharata details the ancient account of the Nagar, a half human, half snake deity.

245

00:34:08,580 --> 00:34:15,580

The Nagar was a serpent god in both Hindu and Buddhist mythology. It was known to have human and serpent like traits.

246

00:34:15,580 --> 00:34:20,580

It was also known to be persecutors of all creatures, very poisonous and with great strength.

247

00:34:22,580 --> 00:34:27,580

A question arises as to why ETs might create these various hybrids.

248

00:34:27,580 --> 00:34:33,580

Well, of course, first of all, I'd point out scientific curiosity. Once you develop a technology, you want to see where you can take it.

249

00:34:33,580 --> 00:34:36,580

We humans would do that, I think any intelligent beings would.

250

00:34:36,580 --> 00:34:43,580

But they might have created these various hybrid creatures to actually intimidate the existing human populace,

251

00:34:43,580 --> 00:34:50,580

so that they would give them no trouble or perhaps to create these creatures so they would be thought of as gods and be worshiped.

252

00:34:50,580 --> 00:34:54,580

Even though they are advanced aliens, they might crave attention from humans.

253

00:34:54,580 --> 00:35:01,580

Perhaps they wanted some type of slave labor that would not just be a dumb animal.

254

00:35:01,580 --> 00:35:10,580

By adding human intelligence to, let's say, a bowl, they could create a creature that would be able to move quite a bit of weight

255

00:35:10,580 --> 00:35:16,580

and work without exhaustion but still have the intelligence to follow rules.

256

00:35:19,580 --> 00:35:32,580

In 1970, scientists from Case Western Reserve University School of Medicine, led by Dr. Robert J. White, performed a highly controversial operation,

257

00:35:33,580 --> 00:35:38,580

transplanting the head of one monkey onto the body of another.

258

00:35:40,580 --> 00:35:52,580

He was an excellent surgeon, superior technician, and had come to Cleveland from the Mayo Clinic where I think he'd learned a really excellent neurosurgical care in the operating room.

259

00:35:54,580 --> 00:35:59,580

Within this room, there's a large amount of items from my dad's original laboratory.

260

00:36:00,580 --> 00:36:11,580

This is a halo, a brain transplant halo device. It would clamp the brain in here as such, and then they could actually put the patient in and complete the transplant with the body here.

261

00:36:11,580 --> 00:36:20,580

This would hold the brain, the monkey's brain, and then the transplant could occur here with a spinal connection and the connection to the neck, right here.

262

00:36:21,580 --> 00:36:27,580

They transferred the head. It was essentially a brain transplant by taking the whole head.

263

00:36:28,580 --> 00:36:36,580

He was able to restore consciousness to the head of the monkey who had been transplanted and kept it alive for approximately three days.

264

00:36:36,580 --> 00:36:45,580

The monkey was able to open his eyes, he was able to hear, see, and smell, and he was able to hear, smell, and hear.

265

00:36:45,580 --> 00:36:54,580

The monkey was able to open his eyes, he was able to hear, see, and smell, and as a result, they could show that this procedure could be done, it could work.

266

00:36:55,580 --> 00:37:01,580

Even at our stage on Earth, we have the ability to transplant one head onto another creature.

267

00:37:01,580 --> 00:37:17,580

Now, that certainly argues for the possibility that various entities, like the Minotaur, the Hydra, and even the Griffin, could be created by advanced transplantology.

268

00:37:18,580 --> 00:37:34,580

If extraterrestrials visited Earth in ancient times, might the tales and depictions of weird hybrid monsters actually provide evidence of alien contact?

269

00:37:34,580 --> 00:37:43,580

Or do they provide clues to our own future, a future that may be closer than we think?

270

00:37:48,580 --> 00:38:04,580

In 2003, Chinese scientist Huishen Chang at the Shanghai Second Medical University successfully fused human cells with rabbit eggs.

271

00:38:04,580 --> 00:38:11,580

The embryos were the first human-animal hybrids created through genetic engineering.

272

00:38:12,580 --> 00:38:22,580

She took rabbit egg cells and removed all of the nuclear material from them, all of the instruction set that tells them to develop into a rabbit embryo.

273

00:38:23,580 --> 00:38:28,580

She replaced it with a similar instruction set, but from a human cell.

274

00:38:28,580 --> 00:38:34,580

So essentially, the embryo was human with small elements of rabbit.

275

00:38:35,580 --> 00:38:42,580

Why would researchers want to combine rabbit DNA and human DNA?

276

00:38:42,580 --> 00:38:50,580

The first reason is for medical research purposes, perhaps for organ transplantation.

277

00:38:50,580 --> 00:39:02,580

The second reason is to create an enhanced human, that is, give the human some sort of quality they might not have unless spliced with a rabbit gene.

278

00:39:03,580 --> 00:39:07,580

Although it's hard for me to imagine what that would be.

279

00:39:10,580 --> 00:39:20,580

A year later, in 2004, researchers at Minnesota's Mayo Clinic created pigs with human blood flowing through their bodies.

280

00:39:20,580 --> 00:39:27,580

One of the animals that's actually quite close to us, surprisingly enough, in terms of genetics, is

the pig.

281

00:39:27,580 --> 00:39:37,580

And one of the ideas that's been put forward is the idea of literally having almost like pig factories to grow hearts for people who need heart transplants.

282

00:39:37,580 --> 00:39:47,580

And literally, you know, you'd have a pig's heart inserted into your body, and you know, with certain drugs to prevent the organs being rejected, you could live a fallen viable life.

283

00:39:47,580 --> 00:40:03,580

At this moment in time, medical technology is able to create weird situations, genetic things which shouldn't really happen and which do not happen unless you start to make genetic modifications.

284

00:40:03,580 --> 00:40:08,580

This is evidence of manipulation of the genetically available material.

285

00:40:08,580 --> 00:40:12,580

We are creating hybrid monsters as we speak.

286

00:40:13,580 --> 00:40:34,580

If modern science today would be able to create a hybrid being, a mixed being, then that would in essence corroborate the ancient alien theory because we're merely saying that what today is being discovered is a rediscovery of what already took place thousands of years ago.

287

00:40:36,580 --> 00:40:39,580

Meaning, genetic experimentation.

288

00:40:43,580 --> 00:40:49,580

But is there any actual evidence of DNA splicing in the ancient past?

289

00:40:49,580 --> 00:41:06,580

In 1849, in what is now Iraq, British archaeologist Austin Henry Layard uncovered numerous Sumerian clay tablets inscribed with cuneiform script dating to 4000 BC.

290

00:41:06,580 --> 00:41:21,580

Based on interpretations of the tablets, ancient astronaut theorists believe an advanced race of intelligent beings arrived on Earth 450,000 years ago during the age of Neanderthals.

291

00:41:22,580 --> 00:41:31,580

And through genetic engineering, they created Homo sapiens, what is commonly referred to as modern-day human beings.

292

00:41:32,580 --> 00:41:39,580

The Sumerians talk about a civilization that came here from above on another planet called Nibiru.

293

00:41:40,580 --> 00:41:47,580

And they call these creatures the Anunnaki, high-level people who came here to mine for gold.

294

00:41:48,580 --> 00:41:56,580

And in order to do it, they needed to genetically alter the species that happened to be on the planet at the time.

295

00:41:56,580 --> 00:42:00,580

They created man according to the Sumerian text.

296

00:42:01,580 --> 00:42:09,580

It's not impossible that we exist as the result of gene manipulation experiments.

297

00:42:10,580 --> 00:42:25,580

There are so many stars and galaxies out there in space that it's impossible for a scientist such as myself to say that there are not alien species out there who could have visited the Earth at some point in the distant past.

298

00:42:25,580 --> 00:42:33,580

So it is entirely possible that someone or something could have come along and manipulated those organisms.

299

00:42:34,580 --> 00:42:44,580

So this inherently means that if extraterrestrials tampered with our own DNA, they could have also tampered with animal DNA.

300

00:42:45,580 --> 00:42:50,580

They could have used all sorts of DNA from every single animal on planet Earth.

301

00:42:50,580 --> 00:43:00,580

The creation of a chimera monster is certainly something that will probably be possible within the next 20 or 30 years.

302

00:43:01,580 --> 00:43:10,580

We have the technology now to create these kinds of chimeras and something that might be perceived as a monster.

303

00:43:11,580 --> 00:43:17,580

But what we don't have right now is the technology to bring such a creature to term.

304

00:43:17,580 --> 00:43:20,580

But that's only a matter of time.

305

00:43:21,580 --> 00:43:27,580

If the mythical monsters of the ancient past really did exist, what were they?

306

00:43:28,580 --> 00:43:30,580

Messengers from alien gods?

307

00:43:31,580 --> 00:43:33,580

Products of genetic experimentation?

308

00:43:34,580 --> 00:43:36,580

Biomechanical weapons?

309

00:43:37,580 --> 00:43:41,580

And if they did exist, where is the physical evidence?

310

00:43:42,580 --> 00:43:45,580

Still buried miles beneath our feet?

311

00:43:45,580 --> 00:43:49,580

Or are they, in fact, still out there?

312

00:43:50,580 --> 00:43:53,580

Somewhere, waiting to return.
