

1

00:00:00,000 --> 00:00:04,000

It will cover the sun for years.

2

00:00:04,000 --> 00:00:07,000

Devastating earthquakes and tsunamis.

3

00:00:07,000 --> 00:00:12,000

It's possible the extraterrestrials themselves are influencing some of the isobats.

4

00:00:12,000 --> 00:00:19,000

And asteroids smashing the Earth, causing massive extinctions.

5

00:00:19,000 --> 00:00:23,000

What you're seeing is that this is done on purpose.

6

00:00:23,000 --> 00:00:29,000

Have the world's worst global disasters been the result of nature's fury?

7

00:00:29,000 --> 00:00:34,000

Or have they been triggered by more supernatural forces?

8

00:00:34,000 --> 00:00:40,000

I don't think we can rule out the idea that this is the work of highly advanced technological aliens

9

00:00:40,000 --> 00:00:44,000

seeking to obliterate the human race.

10

00:00:44,000 --> 00:00:50,000

Millions of people around the world are now in the hands of the world.

11

00:00:50,000 --> 00:00:58,000

Millions of people around the world believe we have been visited in the past by extraterrestrial beings.

12

00:00:58,000 --> 00:01:01,000

What if it were true?

13

00:01:01,000 --> 00:01:06,000

Did ancient aliens really help to shape our history?

14

00:01:06,000 --> 00:01:13,000

And could there be an extraterrestrial connection to some of the world's mega disasters?

15

00:01:20,000 --> 00:01:31,000

Australia

16

00:01:31,000 --> 00:01:35,220

Yukis30's

17

00:01:49,640 --> 00:01:52,320

Japan on Friday.

18

00:01:57,360 --> 00:01:59,660

And

19

00:02:01,000 --> 00:02:14,040

the sea floor, 200 miles away, in Tokyo, building shake violently.

20

00:02:14,040 --> 00:02:19,320

Within half an hour of the earthquake, a powerful 30-foot tsunami strikes the northern coast

21

00:02:19,320 --> 00:02:30,520

of Japan and sweeps across the landscape, reaching six miles inland, destroying everything

22

00:02:30,520 --> 00:02:37,560

in its path.

23

00:02:37,560 --> 00:02:49,520

Local officials estimate that over 19,000 lives were lost in the rapidly rising tide.

24

00:02:49,520 --> 00:02:54,200

Tsunamis are basically the name for a giant sea wave that's fairly coherent, has a lot

25

00:02:54,200 --> 00:02:56,920

of energy and will travel over a large distance.

26

00:02:57,920 --> 00:03:00,200

It's really a matter of scale more than anything else.

27

00:03:00,200 --> 00:03:04,400

It's huge enough to cause huge amounts of damage when it hits the shore.

28

00:03:04,400 --> 00:03:09,440

These have to be generated by a large pulse of energy being put into the ocean, and the

29

00:03:09,440 --> 00:03:16,600

most common source of that is a massive earthquake under the ocean floor.

30

00:03:16,600 --> 00:03:20,920

They're used to earthquakes in this part of the world, but the fact that they had such

31

00:03:20,920 --> 00:03:25,160

little time, they just couldn't get away from it.

32

00:03:25,160 --> 00:03:30,640

So you can be a very sophisticated, first world developed country.

33

00:03:30,640 --> 00:03:40,200

You can be a superpower and still have these kind of mega disasters come your way.

34

00:03:40,200 --> 00:03:46,920

According to Japan's Kyoto news agency, in the days following the devastation, thousands

35

00:03:46,920 --> 00:03:51,080

of UFOs were sighted over Japan.

36

00:03:52,000 --> 00:03:56,520

If true, what might this mean?

37

00:03:56,520 --> 00:04:03,720

It's interesting to note that when the tsunami occurred, there was suddenly an increase of

38

00:04:03,720 --> 00:04:07,720

UFO sightings in that area of Japan.

39

00:04:07,720 --> 00:04:14,520

So you have to think, well, are the extraterrestrials particularly interested in what happens to

40

00:04:14,520 --> 00:04:23,480

us in certain catastrophes and life-changing events that are occurring on this planet?

41

00:04:23,480 --> 00:04:30,440

And it's possible the extraterrestrials themselves are influencing some of these events.

42

00:04:30,440 --> 00:04:37,080

But is it really possible, as ancient astronaut theorists believe, that otherworldly forces

43

00:04:37,080 --> 00:04:41,520

could provoke such deadly disasters?

44

00:04:42,520 --> 00:04:52,520

Crete, located in the middle of the Mediterranean Sea, it is the largest of the Greek islands.

45

00:04:52,520 --> 00:05:01,360

Here, in 365 AD, this once quiet province of the Byzantine Empire was destroyed by a

46

00:05:01,360 --> 00:05:06,520

devastating underwater earthquake and subsequent tsunami.

47

00:05:11,520 --> 00:05:18,600

According to Roman historians, the tsunami also hit Alexandria, Egypt and other cities

48

00:05:18,600 --> 00:05:23,520

along the Mediterranean coast, causing great destruction.

49

00:05:23,520 --> 00:05:30,640

The Crete earthquake of 365 was one of the great natural disasters of the Mediterranean

50

00:05:30,640 --> 00:05:31,640

world.

51

00:05:31,640 --> 00:05:36,360

So this was an earthquake that was probably an eight on the Richter scale.

52

00:05:36,360 --> 00:05:38,520

So it was very large.

53

00:05:38,520 --> 00:05:44,520

It produced a tsunami and it raised the isle of Crete by nine meters.

54

00:05:44,520 --> 00:05:51,520

So it was an extraordinary event.

55

00:05:51,520 --> 00:05:58,520

The ancient Greeks attributed earthquakes to the god of the sea, Poseidon.

56

00:05:58,520 --> 00:06:04,520

According to Greek myths, Poseidon was known as the earth shaker because of his power to

57

00:06:04,520 --> 00:06:12,520

block earthquakes, sea storms and tidal waves.

58

00:06:12,520 --> 00:06:19,520

Ancient peoples would have ascribed natural disasters to the gods as a really logical

59

00:06:19,520 --> 00:06:22,520

answer, because first these events are deadly.

60

00:06:22,520 --> 00:06:33,520

So their lives depend upon trying to appease or please gods who control those things.

61

00:06:33,520 --> 00:06:36,520

Crete was said to be the home of the gods.

62

00:06:36,520 --> 00:06:42,520

There are caves today in Crete which we can visit, which are identified as being the place

63

00:06:42,520 --> 00:06:46,520

where Zeus was raised from a baby to an infant.

64

00:06:46,520 --> 00:06:51,520

So when you find that something is happening in Crete in early Christian times, you really

65

00:06:51,520 --> 00:06:59,520

have to ask whether this is somehow going to change the future of mankind.

66

00:06:59,520 --> 00:07:06,520

It may be the wrath of Poseidon because what was happening at that time was the early Christians

67

00:07:06,520 --> 00:07:14,520

were struggling against a resurgence of paganism.

68

00:07:14,520 --> 00:07:25,520

And that tsunami came to destroy finally all the pagan religion in the area.

69

00:07:25,520 --> 00:07:32,520

Modern Christianity became dominant.

70

00:07:32,520 --> 00:07:37,520

But was the god Poseidon merely a figure of myth and legend?

71

00:07:37,520 --> 00:07:44,520

Or might this supernatural being have had a more otherworldly origin as ancient

72

00:07:44,520 --> 00:07:48,520

astronaut theorists believe?

73

00:07:48,520 --> 00:07:57,520

Poseidon was always depicted as holding this weapon or instrument, his trident.

74

00:07:57,520 --> 00:08:02,520

And this trident could cause earthquakes and tsunamis.

75

00:08:02,520 --> 00:08:06,520

He could control the oceans with his trident.

76

00:08:06,520 --> 00:08:17,520

You have to wonder if this trident wasn't some high tech extraterrestrial device.

77

00:08:17,520 --> 00:08:27,520

The weapons used by these Greek gods can be compared in some ways to modern weaponry.

78

00:08:27,520 --> 00:08:33,520

It's interesting that the United States Navy developed nuclear missiles for its submarines

79

00:08:33,520 --> 00:08:38,520

with the names Poseidon and Trident.

80

00:08:38,520 --> 00:08:44,520

Perhaps this was Poseidon carrying out some sort of wrath on ancient Crete

81

00:08:44,520 --> 00:08:50,520

or finally rejecting him as a god.

82

00:08:50,520 --> 00:08:56,520

Is it really possible that mega disasters caused by earthquakes and tsunamis

83

00:08:56,520 --> 00:09:04,520

could be triggered by alien technology as some ancient astronaut theorists believe?

84

00:09:04,520 --> 00:09:13,520

And if so, might such catastrophic events have been provoked to change the course of human history?

85

00:09:13,520 --> 00:09:19,520

Perhaps further evidence can be found in modern military technology

86

00:09:19,520 --> 00:09:26,520

designed to use the weather as a weapon of mass destruction.

87

00:09:31,520 --> 00:09:38,520

Haiti, January 12, 2010.

88

00:09:43,520 --> 00:10:01,520

At 4.53 p.m., a fierce 7.0 magnitude earthquake slams into the Haitian capital of Port-au-Prince, causing massive destruction.

89

00:10:01,520 --> 00:10:07,520

It is the country's most severe earthquake in over 200 years.

90

00:10:07,520 --> 00:10:11,520

An earthquake that doesn't affect anyone is a natural hazard.

91

00:10:11,520 --> 00:10:20,520

When that natural hazard makes landfall and affects a population, that is when it becomes a natural disaster.

92

00:10:20,520 --> 00:10:30,520

When it's a huge system that affects a lot of people with death and destruction, then we term it a mega disaster.

93

00:10:34,520 --> 00:10:39,520

According to local news reports, missionaries in Haiti

94

00:10:39,520 --> 00:10:48,520

videotaped a strange ball of light floating in the sky less than 24 hours before the earthquake.

95

00:10:48,520 --> 00:10:53,520

UFOs have been reported throughout history connected to earthquakes.

96

00:10:53,520 --> 00:11:00,520

Scientists used to disregard the idea of earthquake lights up until the 1960s when they were actually photographed in Japan.

97

00:11:00,520 --> 00:11:08,520

Finally, they had to take notice that there are strange aerial phenomena that go along with earthquakes.

98

00:11:08,520 --> 00:11:19,520

Often referred to as earthquake weather, scientists have linked the strange phenomena to the geophysical activity that precedes an earthquake.

99

00:11:19,520 --> 00:11:25,520

Earthquakes are basically when the plates on the surface of the earth move relative to each other in a sudden fashion.

100

00:11:25,520 --> 00:11:29,520

This sudden motion releases a lot of energy.

101

00:11:30,520 --> 00:11:38,520

If they were simply tectonic plates that gave off, like for example, a discharge into the air, they would burn out pretty quickly.

102

00:11:38,520 --> 00:11:42,520

But we are talking about bright lights that hover and linger.

103

00:11:45,520 --> 00:11:53,520

Could the sudden discharge of immense energy really have produced strange lights in the skies above earthquake zones?

104

00:11:54,520 --> 00:12:01,520

Or might the lights and the apparent natural disasters have had a more technological origin?

105

00:12:05,520 --> 00:12:14,520

In 1996, the United States Air Force commissioned a secret study called the 2025 Report.

106

00:12:15,520 --> 00:12:23,520

In it, the military examined the feasibility of combat capabilities and tactics in the year 2025.

107

00:12:23,520 --> 00:12:33,520

One of the areas that was seen as ripe for research, exploitation and development was the modification of the weather as a tool of warfare.

108

00:12:33,520 --> 00:12:38,520

People might think the idea that we could weaponize the weather is something just straight out of science fiction.

109

00:12:38,520 --> 00:12:44,520

The idea that we could pulverize whole nations just by modifying and exploiting the weather.

110

00:12:44,520 --> 00:12:48,520

And that this is a verifiable report that is now in the public domain.

111

00:12:48,520 --> 00:12:55,520

So we do know that governments and military bodies are significantly researching weaponizing the weather.

112

00:12:58,520 --> 00:13:04,520

One of the big advantages of using weather as a weapon is that it's really difficult to prove who attacked you.

113

00:13:05,520 --> 00:13:10,520

The other thing is that weather itself can cause a heck of a lot more damage than weapons can.

114

00:13:10,520 --> 00:13:15,520

You could have, for instance, a powerful thunderstorm that could go all the way across the U.S.

115

00:13:16,520 --> 00:13:22,520

It could cause basically nuclear level destruction all the way across a huge swath.

116

00:13:23,520 --> 00:13:27,520

There have been many attempts to control the weather during warfare.

117

00:13:27,520 --> 00:13:30,520

And one of the most famous attempts was in Vietnam.

118

00:13:35,520 --> 00:13:42,520

In which there's a real effort to seed the clouds over the Ho Chi Minh Trail and create torrential rains.

119

00:13:43,520 --> 00:13:52,520

By flooding the North Vietnamese and Viet Cong supply lines, it would reduce their utility and choke off supplies to gorillas in the south.

120

00:13:52,520 --> 00:13:56,520

So certainly we've had success in seeding clouds.

121

00:13:57,520 --> 00:14:05,520

If the weather can be manipulated by the military to produce powerful storms and even catastrophes,

122

00:14:05,520 --> 00:14:08,520

is this only a recent innovation?

123

00:14:08,520 --> 00:14:14,520

Or is there evidence of the weaponized use of weather in the ancient past?

124

00:14:14,520 --> 00:14:29,520

Tales of a great flood destroying the world can be found in the earliest myths of many ancient cultures across the globe.

125

00:14:30,520 --> 00:14:37,520

Both the Hebrew Bible and the Islamic Quran describe an epic flood in the tale of Noah's Ark.

126

00:14:38,520 --> 00:14:48,520

God was unhappy with the people for their sinful ways and as a kind of punishment and also an act of purification sent the Great Deleuge.

127

00:14:49,520 --> 00:14:53,520

Most living things would die in this except for a few birds and fish.

128

00:14:54,520 --> 00:14:59,520

But he told Noah very specifically how to build a craft that could survive the storm.

129

00:15:00,520 --> 00:15:04,520

Noah is to collect pairs of the air-breathing animals on earth.

130

00:15:04,520 --> 00:15:08,520

And he packs these animals and his family into the ark.

131

00:15:08,520 --> 00:15:15,520

And then it rains for 40 days and 40 nights and floods the entire earth.

132

00:15:15,520 --> 00:15:19,520

And all air-breathing animals and people are killed.

133

00:15:20,520 --> 00:15:33,520

In ancient Mesopotamia, a similar story of a catastrophic flood was chiseled into clay tablets dating to 2000 BC.

134

00:15:33,520 --> 00:15:47,520

Known as the Epic of Gilgamesh, this early Sumerian poem describes angry gods that send a great flood to destroy mankind while allowing only a chosen few to survive.

135

00:15:48,520 --> 00:15:53,520

The gods had created humanity to perform whatever labor they were supposed to do.

136

00:15:53,520 --> 00:15:59,520

But what happened was that according to the old Mesopotamian stories, human beings just started causing too much trouble.

137

00:15:59,520 --> 00:16:06,520

They became noisy, they became rebellious, and it was just time to wipe them out.

138

00:16:07,520 --> 00:16:11,520

And that's actually what's reported in those old creation stories.

139

00:16:17,520 --> 00:16:24,520

But did such stories of great floods engulfing the world merely spring from man's imagination?

140

00:16:24,520 --> 00:16:27,520

Or were they real?

141

00:16:28,520 --> 00:16:36,520

If so, might such devastation have had an otherworldly origin as ancient astronaut theorists believe?

142

00:16:37,520 --> 00:16:42,520

If the human race in the early 21st century is now weaponized in the weather,

143

00:16:42,520 --> 00:16:46,520

why shouldn't aliens from some far away world have already developed it?

144

00:16:47,520 --> 00:16:56,520

If ancient aliens were able to weaponize the weather, then I don't think we can rule out the idea that possibly some of these great ancient floods

145

00:16:56,520 --> 00:17:06,520

may not have been the work of gods, but could have been the work of highly advanced technological aliens actually seeking to potentially obliterate the human race.

146

00:17:07,520 --> 00:17:15,520

There are more than a thousand different flood myths from cultures all around the world.

147

00:17:15,520 --> 00:17:25,520

And the tendency has been for archaeologists to say that that's simply because people's fantasies work in the same way.

148

00:17:26,520 --> 00:17:33,520

But I also think there's a much simpler explanation for why the flood myth is so universal.

149

00:17:34,520 --> 00:17:38,520

I think it's a memory of what happened at the end of the Ice Age.

150

00:17:38,520 --> 00:17:44,520

What's much more mysterious is that coupled with these memories of global devastation,

151

00:17:44,520 --> 00:17:53,520

there are also memories of almost godlike beings with incredible powers and abilities who were caught up in that cataclysm.

152

00:17:55,520 --> 00:17:59,520

The deluge stories are really very interesting.

153

00:18:00,520 --> 00:18:04,520

What they all say is that the angels, the gods, whatever we want to call them today,

154

00:18:04,520 --> 00:18:12,520

they basically just got tired of humanity where there's a wanton intention to wipe out or thin out the human race.

155

00:18:14,520 --> 00:18:23,520

Right there we have a perfect example that maybe the extraterrestrials were unhappy with Homo sapiens

156

00:18:23,520 --> 00:18:32,520

and it is possible that they then created some type of a catastrophe, some flood to eliminate mankind.

157

00:18:32,520 --> 00:18:42,520

But it's also possible that benevolent extraterrestrials warned us about an impending catastrophe

158

00:18:42,520 --> 00:18:46,520

so that not everyone would be destroyed.

159

00:18:47,520 --> 00:18:55,520

Could the mythic floods of the ancient past really have been the result of extraterrestrial influence?

160

00:18:55,520 --> 00:19:00,520

Or is it possible, as some ancient astronaut theorists contend,

161

00:19:00,520 --> 00:19:05,520

that aliens may have actually helped mankind survive nature's fury?

162

00:19:06,520 --> 00:19:12,520

Perhaps further evidence can be found near one of Earth's most dangerous places,

163

00:19:13,520 --> 00:19:16,520

active volcanoes.

164

00:19:21,520 --> 00:19:25,520

The Republic of Indonesia, Southeast Asia.

165

00:19:26,520 --> 00:19:36,520

This archipelago, encompassing over 17,000 islands, is home to 129 active volcanoes.

166

00:19:36,520 --> 00:19:40,520

Here, in April 1815,

167

00:19:41,520 --> 00:19:48,520

the Mount Tambora volcano exploded in a cataclysm of fire, smoke and ash.

168

00:19:49,520 --> 00:19:57,520

The amount of material discharged into the atmosphere, estimated to have been 120 cubic tons,

169

00:19:57,520 --> 00:20:02,520

makes the event the largest volcanic eruption in recorded history.

170

00:20:03,520 --> 00:20:11,520

With a death toll of nearly 71,000 people, it was the world's deadliest eruption.

171

00:20:15,520 --> 00:20:18,520

They had quite an effect worldwide.

172

00:20:18,520 --> 00:20:22,520

The year of 1816 was known as the year without the summer.

173

00:20:22,520 --> 00:20:30,520

And the reason is because very large volcanic eruptions inject a lot of ash and aerosols in the atmosphere,

174

00:20:30,520 --> 00:20:35,520

and they can actually lower the global average temperature.

175

00:20:38,520 --> 00:20:45,520

The volcano on its own is not the disaster, but when it erupts and affects large groups of people, it certainly is.

176

00:20:49,520 --> 00:20:53,520

And volcanic eruptions have killed millions of people over time.

177

00:20:54,520 --> 00:21:01,520

According to local religious traditions, volcanoes are considered sacred,

178

00:21:01,520 --> 00:21:06,520

and the Mount Tambora eruption is thought to have been the work of the gods.

179

00:21:06,520 --> 00:21:08,520

But why?

180

00:21:09,520 --> 00:21:16,520

Researchers claim answers can be found near the most volatile volcano in Indonesia today,

181

00:21:16,520 --> 00:21:22,520

Mount Marapi, a site that in Javanese mysticism is believed to be the most important volcano in Indonesia.

182

00:21:23,520 --> 00:21:27,520

It is also believed to be the center of the world.

183

00:21:31,520 --> 00:21:40,520

Strangely, this revered volcano is located just 29 miles from a mysterious ancient Buddhist temple called Borobudur.

184

00:21:41,520 --> 00:21:47,520

Whenever we are confronted with certain temple sites, some of them are obviously more interesting than others,

185

00:21:47,520 --> 00:21:51,520

but in this case we have a very interesting location.

186

00:21:51,520 --> 00:21:54,520

Because it is said that this mountain is the center of the universe.

187

00:21:55,520 --> 00:22:02,520

And you will always find that this is linked somehow in mythology with the ascent or the descent of a very important god.

188

00:22:02,520 --> 00:22:05,520

Sometimes it creates a deity or somebody else.

189

00:22:07,520 --> 00:22:14,520

Built during the 8th and 9th centuries, the Borobudur temple was designed in the form of a stepped pyramid,

190

00:22:14,520 --> 00:22:20,520

and features a large round dome on top encircled by 72 statues of Buddha,

191

00:22:20,520 --> 00:22:25,520

each seated in a bell-shaped enclosure called a stupa.

192

00:22:27,520 --> 00:22:31,520

Is it possible, as ancient astronaut theorists believe,

193

00:22:31,520 --> 00:22:41,520

that the temple and stupas were built to honor other worldly beings and their spacecraft that arrived at Mount Marapi in the ancient past?

194

00:22:42,520 --> 00:22:59,520

There is no question that Borobudur was a place of pilgrimage that was built only because something significant happened in the remote past in that specific area.

195

00:23:00,520 --> 00:23:11,520

The volcano was so huge for them, so incomprehensible that they over time built stupas all directed to the sky,

196

00:23:13,520 --> 00:23:24,520

because each stupa on that complex represents a chariot of the gods with which to actually reach outer space.

197

00:23:25,520 --> 00:23:28,520

This is a very specific shape for a temple.

198

00:23:28,520 --> 00:23:34,520

It's almost as if it is a flat-topped pyramid with something sticking on top there as if something has landed.

199

00:23:38,520 --> 00:23:42,520

And then the question is, why did they construct it so specifically?

200

00:23:42,520 --> 00:23:49,520

Was it something which was visually remembering as to what had happened there, or what was still happening on a regular interval?

201

00:23:50,520 --> 00:23:59,520

All over the world, volcanoes often have some god associated with them,

202

00:23:59,520 --> 00:24:05,520

who's controlling the volcano, causing earthquakes, causing devastating eruptions.

203

00:24:05,520 --> 00:24:15,520

And in fact, in Indonesia, the people there believe that there's an entire city of gods inside Mount Marapi.

204

00:24:16,520 --> 00:24:28,520

When I read stories about ancient volcano gods descending or ascending from and into volcanoes,

205

00:24:28,520 --> 00:24:36,520

then I think to myself, are we really talking about something here that's a figment of our ancestors' imagination,

206

00:24:36,520 --> 00:24:40,520

or is there some truth behind these stories?

207

00:24:40,520 --> 00:24:42,520

And the answer is yes.

208

00:24:42,520 --> 00:24:47,520

It was not some type of spiritual event,

209

00:24:47,520 --> 00:24:55,520

but it was where extraterrestrials descended from the sky in nuts and bolts spaceships.

210

00:24:57,520 --> 00:25:03,520

But what is it about volcanoes that seem to attract celestial visitors,

211

00:25:03,520 --> 00:25:08,520

and might they have had the power to trigger volcanic eruptions?

212

00:25:11,520 --> 00:25:15,520

Hawaii

213

00:25:18,520 --> 00:25:23,520

Here, in the middle of the Pacific Ocean, lies Mount Kilauea.

214

00:25:25,520 --> 00:25:33,520

Spewing lava almost continuously since 1983, it is the most active volcano in the world.

215

00:25:40,520 --> 00:25:49,520

According to ancient Hawaiian legends, the volcano is home to Pele, the goddess of lightning, and fire.

216

00:25:51,520 --> 00:25:57,520

She lives in the enormous volcano on the big island in her crater, and I've been up there as a big crater,

217

00:25:57,520 --> 00:26:00,520

and you can imagine the powerful goddess could live there.

218

00:26:00,520 --> 00:26:07,520

She has come from a place of the clouds, a place in the sky, and that's mysterious. We don't know where that is.

219

00:26:08,520 --> 00:26:13,520

Is it possible, as ancient astronaut theorists believe,

220

00:26:13,520 --> 00:26:20,520

that the origin of the Pele legend can be traced to contact with extraterrestrial beings?

221

00:26:24,520 --> 00:26:31,520

Just like the American military has hollowed out Cheyenne Mountain near Colorado Springs

222

00:26:31,520 --> 00:26:38,520

to create a secret and virtually impenetrable military base inside of a mountain.

223

00:26:39,520 --> 00:26:49,520

We have, in a sense, similar stories of ancient gods or extraterrestrials doing this to volcanoes, using them as bases.

224

00:26:49,520 --> 00:26:59,520

And if there was some danger of people discovering it, or people were building their homes or cities too close,

225

00:27:00,520 --> 00:27:03,520

these aliens could have their volcano erupt.

226

00:27:07,520 --> 00:27:13,520

Is there something extraterrestrial behind those stories of volcano gods?

227

00:27:13,520 --> 00:27:20,520

Absolutely yes, because all around the world our ancestors worshiped nature.

228

00:27:20,520 --> 00:27:29,520

There was a god of thunder, there was a god of rain, and even a god of a volcano.

229

00:27:31,520 --> 00:27:39,520

However, there was a fine line between worshiping nature and worshiping something else,

230

00:27:39,520 --> 00:27:43,520

and that something else was extraterrestrials.

231

00:27:44,520 --> 00:27:49,520

They were space travelers that came here from another planetary system.

232

00:27:50,520 --> 00:27:57,520

Might some of the planet's most active volcanoes really have been home to extraterrestrial forces,

233

00:27:57,520 --> 00:28:01,520

as some ancient astronaut theorists contend?

234

00:28:01,520 --> 00:28:11,520

Researchers believe further clues can be found in one of the driest and deadliest places on Earth.

235

00:28:12,520 --> 00:28:18,520

The Sahara Desert

236

00:28:19,520 --> 00:28:29,520

Stretching across northern Africa and covering nearly three and a half million square miles,

237

00:28:29,520 --> 00:28:34,520

it is one of the hottest and most formidable places on Earth.

238

00:28:35,520 --> 00:28:47,520

With an average rainfall of only half an inch per year, humans have fought a relentless battle to adapt to the harsh environment, or die.

239

00:28:50,520 --> 00:29:02,520

Historians have often looked at the Sahara Desert and wondered what it is that created this particularly inhospitable, desolate area of the planet.

240

00:29:04,520 --> 00:29:15,520

But in the Algerian Sahara, in the region of Tessili-Nagir, numerous cave paintings, some estimated to date back as far as 8,000 BC,

241

00:29:15,520 --> 00:29:20,520

depict a time when the land was lush and teeming with life.

242

00:29:20,520 --> 00:29:23,520

But if so, what happened?

243

00:29:24,520 --> 00:29:29,520

The scenes that you see at Tessili-Nagir are totally bizarre.

244

00:29:29,520 --> 00:29:39,520

They're showing a Sahara that was once fertile with giraffes and antelope and other animals we find only in Central Africa, really.

245

00:29:39,520 --> 00:29:50,520

And combined with them are these bizarre pictures of what even the archaeologists have called the Martians and the Spacemen.

246

00:29:50,520 --> 00:29:55,520

They have strange helmets on and suits.

247

00:29:55,520 --> 00:29:59,520

They look exactly like extraterrestrials.

248

00:30:01,520 --> 00:30:09,520

The petroglyphs that we find there are incredible. They look like modern-day astronauts.

249

00:30:10,520 --> 00:30:24,520

With suits, with helmets, with visors, and according to the legends of the Tessili region, the natives were visited at a time when a climate change was happening.

250

00:30:25,520 --> 00:30:46,520

So is it possible that the reason why we have these depictions of these ancient aliens is because they assisted the native population at the time of climate change to move into a new area of habitation?

251

00:30:47,520 --> 00:30:55,520

Did alien beings visit this region thousands of years ago?

252

00:30:56,520 --> 00:31:06,520

And if so, might they have warned the local population of an enormous climate change, one that would trigger a vast migration?

253

00:31:07,520 --> 00:31:11,520

Ancient astronaut theorists believe the answer is yes.

254

00:31:16,520 --> 00:31:24,520

And for evidence, they point to the ancient legends of a West African tribal people known as the Dogon.

255

00:31:26,520 --> 00:31:39,520

According to the Dogon themselves, they were guided by their alien fish gods, the Nomo, to this area near the Niger River where there's a lot more water.

256

00:31:39,520 --> 00:31:47,520

So they had to transit across the inhospitable Sahara to find their homeland.

257

00:31:49,520 --> 00:31:59,520

And their own explanation is that alien gods led them to this fertile area where they could establish their civilization.

258

00:32:00,520 --> 00:32:04,520

The Nomos describe coming down in some type of flying craft.

259

00:32:05,520 --> 00:32:09,520

The Dogon tribe gave some very interesting details which sound like a UFO.

260

00:32:10,520 --> 00:32:17,520

A large spinning disk that made a lot of sound and wind as it descended to Earth and the Nomos appear.

261

00:32:18,520 --> 00:32:25,520

So this is a very interesting story which was replicated by many different cultures of seeing beings descending from the heavens to Earth.

262

00:32:26,520 --> 00:32:28,520

Were they gods or were they extraterrestrials?

263

00:32:30,520 --> 00:32:35,520

Even today, the Dogon believe they are the children of the Nomo.

264

00:32:36,520 --> 00:32:40,520

Strange gods who came here from the Sirius star system.

265

00:32:42,520 --> 00:32:53,520

The Dogon tribe look up at the star system of Sirius and they are convinced that they were visited here and they were told about a star system.

266

00:32:54,520 --> 00:32:59,520

But a binary system that we didn't know about for years later.

267

00:33:01,520 --> 00:33:03,520

How did these people know this?

268

00:33:05,520 --> 00:33:16,520

The Dogon have always been focused upon in the sense that they have this story, this information about their ancestors who somehow had this contact with this non-human intelligence.

269

00:33:17,520 --> 00:33:19,520

Now the question is how did they attain this?

270

00:33:20,520 --> 00:33:29,520

It really might come from the Sahara desert, from specifically culture pockets like the Sili and the Jhar and that the Dogon are descendants from these people.

271

00:33:31,520 --> 00:33:44,520

Could the de Sili Niger cave paintings and the legends of the Dogon tribe really be proof of alien contact in the distant past as ancient astronaut theorists believe?

272

00:33:47,520 --> 00:33:58,520

Perhaps additional evidence can be found, half a hemisphere away at an archaeological site near the city of Chefeng in China.

273

00:33:59,520 --> 00:34:10,520

Here, scholars have found 5,000 year old stone carvings and other artifacts, believed to have been engraved by a neolithic people known as the Hongshan.

274

00:34:11,520 --> 00:34:27,520

The Hongshan people in China are known to have strange carvings, jade statuettes showing long-headed people looking very much like extraterrestrials.

275

00:34:28,520 --> 00:34:46,520

But most curious among the Hongshan's ancient carvings is this one, an image of what many scholars and archaeologists consider to be the depiction of a massive comet or meteor.

276

00:34:47,520 --> 00:34:54,520

Similar to one that researchers believe struck the region around 3000 BC.

277

00:35:00,520 --> 00:35:09,520

The evidence that we have that there was a massive catastrophe at that time and approximately between 3113 and about 3116 BC is so fascinating.

278

00:35:10,520 --> 00:35:17,520

A whole team at Harvard and Princeton took a look scientifically at the Peruvian ice shelves there in the Andes Mountains.

279

00:35:17,520 --> 00:35:32,520

And they dug down and they said there was a massive planet-wide glaciation of the earth, a gigantic catastrophe that froze woolly mammoths with tropical vegetation in their mouths, froze the entire planet at that time.

280

00:35:33,520 --> 00:35:44,520

But how is it possible that these ancient people could have known of a catastrophic meteor strike that wouldn't occur for another 116 years?

281

00:35:44,520 --> 00:35:55,520

It seems like they were possibly warned by their extraterrestrial gods of this coming catastrophe and were able to leave and relocate somewhere else.

282

00:35:56,520 --> 00:36:08,520

If we argue that this carving was done before the event took place, then somebody must have given them this knowledge.

283

00:36:08,520 --> 00:36:16,520

And in the ancient Astron opinion, that knowledge was given to the Hongshan culture by extraterrestrials.

284

00:36:16,520 --> 00:36:32,520

The question whether this is by coincidence or somehow by some intelligence who is pulling the string of these meteorites and comets, our ancestors were absolutely convinced that there was an intelligence behind it.

285

00:36:32,520 --> 00:36:39,520

You might have certain comets which are programmed to bring life, you might also have certain comets which are programmed to bring destruction.

286

00:36:40,520 --> 00:36:55,520

Like the Hongshan people, like the ancient ancestors of the Dogen tribe, really have received warnings of impending catastrophes from extraterrestrial beings, as many ancient astronaut theorists believe.

287

00:36:56,520 --> 00:37:14,520

If so, why? Did alien visitors really want to save the lives of Earth's human inhabitants? Or were they trying to achieve something more, something that might forever change the course of human history?

288

00:37:15,520 --> 00:37:18,520

November 8th, 2011

289

00:37:27,520 --> 00:37:39,520

A massive asteroid a quarter mile in diameter narrowly misses the Earth while passing by inside the orbit of the moon. It is known as a near-Earth object.

290

00:37:40,520 --> 00:37:52,520

It's a kind of wake-up call. It tells us that indeed these objects are real, they come very close, and someday they may come so close that they would hit.

291

00:37:52,520 --> 00:38:06,520

There are probably a million near-Earth asteroids that are large enough that they could do significant destruction, by which I mean if they hit a city they would destroy. They could kill millions of people.

292

00:38:10,520 --> 00:38:17,520

An asteroid strike of significance, something big, could be devastating for the planet.

293

00:38:17,520 --> 00:38:24,520

It will cover the sun for years, and will go into an ice age and will all starve to death.

294

00:38:25,520 --> 00:38:45,520

According to mainstream science, one such object, an asteroid six miles in diameter, smashed into the Earth 65 million years ago, triggering a global catastrophe that forever changed the history of our planet.

295

00:38:46,520 --> 00:38:54,520

The Chic Shaloo crater is in Yucatan, Mexico, and it's the largest impact crater on Earth.

296

00:38:54,520 --> 00:39:11,520

And this crater is 180 kilometers in diameter, it's absolutely ginormous, and it represents an event that occurred at the end of the Cretaceous period 65 million years ago, and that's coincident with a mass extinction.

297

00:39:12,520 --> 00:39:22,520

And that's the mass extinction that took out many animals and plants, the most particularly the dinosaurs.

298

00:39:24,520 --> 00:39:32,520

Many scientists are still studying the details of the impact that produced the dinosaur extinction.

299

00:39:33,520 --> 00:39:40,520

They discovered the actual crater, the smoking gun, the remnant of that impact.

300

00:39:40,520 --> 00:39:46,520

From the size of the crater we can infer how much energy.

301

00:39:46,520 --> 00:39:52,520

It was 100 million megatons of TNT equivalent.

302

00:39:53,520 --> 00:40:02,520

We don't have any other example that's that clean, but there must have been impacts like that throughout the history of the Earth.

303

00:40:06,520 --> 00:40:19,520

Was such a devastating collision the result of chance, an intergalactic accident, or might it have been a planned event, as some ancient astronaut theorists believe?

304

00:40:20,520 --> 00:40:23,520

And if so, why?

305

00:40:25,520 --> 00:40:34,520

The reason that some kind of alien force would want to create the extinction of dinosaurs and other large animals would be to make the Earth safer for people.

306

00:40:34,520 --> 00:40:44,520

The idea of tidal waves and Earthquakes and catastrophes causing mass extinctions, the Earth becomes a better place to live.

307

00:40:44,520 --> 00:40:55,520

We're able to have our civilization in a much more protected manner without having to worry about giant animals crashing into our house all the time.

308

00:40:58,520 --> 00:41:03,520

One can ask the question, why would extraterrestrials do this?

309

00:41:03,520 --> 00:41:08,520

Well, the answer is very simple. We are their product, we are their offspring.

310

00:41:09,520 --> 00:41:20,520

They treat us as creator beings and we are their offspring and they're able to make decisions about humanity based on their needs.

311

00:41:23,520 --> 00:41:32,520

So perhaps their needs were satisfied and they decided they didn't want humankind around anymore, so it's just as easy to wipe them out as it is to continue to perpetuate their existence.

312

00:41:33,520 --> 00:41:48,520

If aliens are visiting us, you know, and they're not necessarily hostile, but the very fact that there have been UFO sightings during earthquakes, tsunamis, floods, tornadoes, is this a concern?

313

00:41:48,520 --> 00:41:57,520

We look at us humans from the religious side, or if we look at the humans from the scientific side, we look at us as the greatest.

314

00:41:57,520 --> 00:42:04,520

Something so gigantic and wonderful like humans does not exist somewhere in the universe out there.

315

00:42:04,520 --> 00:42:16,520

I could imagine that the extraterrestrials, one day they have enough of our arrogance and ignorance and they say we try to teach you now since centuries.

316

00:42:16,520 --> 00:42:23,520

But you still believe you are the greatest thing out there in the universe, so we have enough and we punish you again.

317

00:42:24,520 --> 00:42:37,520

You have to wonder if extraterrestrials with their super technology haven't been involved in some of these catastrophes, actually creating them to change history.

318

00:42:37,520 --> 00:42:52,520

We know that our ancestors survived some of the greatest disasters and on each occasion there is always an intelligence out there who's willing to tell us and help us in making sure that we survive.

319

00:42:53,520 --> 00:43:02,520

And the question is, if something is going to happen in the future, are we going to be relying once again on the non-human intelligence to help us?

320

00:43:07,520 --> 00:43:18,520

Devastating earthquakes and deadly floods, catastrophic eruptions and planet-crushing collisions.

321

00:43:19,520 --> 00:43:26,520

Are Earth's mega disasters simply the consequence of natural events?

322

00:43:26,520 --> 00:43:35,520

Or is mankind simply a pawn in the great cosmic experiment, one engineered by other worldly forces?

323

00:43:36,520 --> 00:43:49,520

Might alien beings be manipulating human history in an effort to test us, to make us stronger? Or are they paving the way for Earth's future?

324

00:43:49,520 --> 00:43:55,520

A future where humans would no longer exist.
