

1

00:00:00,000 --> 00:00:03,000

Strange tales of giant beasts.

2

00:00:03,000 --> 00:00:08,000

Half ape and half human.

3

00:00:08,000 --> 00:00:13,000

Sometimes they have six fingers and double rows of teeth.

4

00:00:13,000 --> 00:00:16,000

Their strength is tremendous.

5

00:00:16,000 --> 00:00:20,000

Massive footprints of mysterious creatures

6

00:00:20,000 --> 00:00:23,000

found around the globe.

7

00:00:23,000 --> 00:00:26,000

An adult male would stand 10 feet in height

8

00:00:26,000 --> 00:00:29,000

and weigh 1,000 pounds.

9

00:00:29,000 --> 00:00:33,000

And ancient myths describing human-like monsters

10

00:00:33,000 --> 00:00:37,000

who travel between dimensions.

11

00:00:37,000 --> 00:00:41,000

They have the ability to appear and disappear at will.

12

00:00:41,000 --> 00:00:45,000

On every continent, there are legends of Bigfoot,

13

00:00:45,000 --> 00:00:49,000

and evidence that might prove the story is true.

14

00:00:49,000 --> 00:00:52,000

We can't rule it out as a possibility

15

00:00:52,000 --> 00:00:56,000

that Bigfoot is somehow an extraterrestrial species.

16

00:00:56,000 --> 00:00:59,000

Millions of people around the world believe

17

00:00:59,000 --> 00:01:04,000

we have been visited in the past by extraterrestrial beings.

18

00:01:04,000 --> 00:01:07,000

What if it were true?

19

00:01:07,000 --> 00:01:11,000

Did ancient aliens really help to shape our history?

20

00:01:11,000 --> 00:01:14,000

And if so, might there be a connection

21

00:01:14,000 --> 00:01:19,000

between extraterrestrials and the legend of Bigfoot?

22

00:01:19,000 --> 00:01:22,000

The Legend of Bigfoot

23

00:01:49,000 --> 00:01:56,000

Mount Everest, November 9, 1951

24

00:01:56,000 --> 00:02:01,000

On the men-long glacier at an altitude of 18,000 feet,

25

00:02:01,000 --> 00:02:05,000

British explorers Eric Shipton and Michael Ward

26

00:02:05,000 --> 00:02:10,000

came across a mile-long trail of unusual footprints.

27

00:02:10,000 --> 00:02:13,000

Not excelsior to the unknown,

28

00:02:13,000 --> 00:02:16,000

unusual footprints.

29

00:02:18,000 --> 00:02:22,000

Not expecting to find humans in this remote corner of the mountain,

30

00:02:22,000 --> 00:02:27,000

the climbers examined the prints to determine what made them.

31

00:02:27,000 --> 00:02:33,000

To their surprise, the footprints were in the shape of a large human-like foot,

32

00:02:33,000 --> 00:02:37,000

one roughly twice the normal size.

33

00:02:37,000 --> 00:02:42,000

The footprints suggested in fact we're dealing with a large primate one

34

00:02:42,000 --> 00:02:45,000

that shares with us the habit of walking on two legs,

35

00:02:45,000 --> 00:02:50,000

but has some superficial resemblance in its foot to our footprints,

36

00:02:50,000 --> 00:02:52,000

only much larger scale,

37

00:02:52,000 --> 00:02:56,000

but differ from the other great apes in the lack of a divergent big toe,

38

00:02:56,000 --> 00:03:00,000

suggesting they're adapted to a wholly terrestrial environment

39

00:03:00,000 --> 00:03:03,000

living on the ground.

40

00:03:05,000 --> 00:03:10,000

Photographs brought back from the expedition launched a media sensation

41

00:03:10,000 --> 00:03:14,000

and marked the beginning of the Bigfoot phenomena.

42

00:03:16,000 --> 00:03:19,000

But where do these giant footprints come from?

43

00:03:19,000 --> 00:03:22,000

Could they be a hoax?

44

00:03:22,000 --> 00:03:28,000

Or is there some mysterious unknown creature living in the remote wilderness?

45

00:03:31,000 --> 00:03:35,000

According to the histories and myths of the Himalayan region,

46

00:03:35,000 --> 00:03:38,000

one such ape-like creature is the Yeti,

47

00:03:38,000 --> 00:03:42,000

more commonly known as the Abominable Snowman.

48

00:03:43,000 --> 00:03:46,000

The notorious Himalayan Yeti,

49

00:03:46,000 --> 00:03:50,000

it's often described as being less than six feet in height,

50

00:03:50,000 --> 00:03:54,000

much more aggressive when encountered.

51

00:03:54,000 --> 00:04:00,000

All of these sightings really make for a creature which seems to be hiding from us,

52

00:04:00,000 --> 00:04:02,000

is a creature which is hiding in plain sight.

53

00:04:02,000 --> 00:04:05,000

And obviously the direct evidence comes in the form of its footprints,

54

00:04:05,000 --> 00:04:09,000

hence why it's quite often referred to as Bigfoot.

55

00:04:10,000 --> 00:04:12,000

People often ask, why don't we catch Bigfoot?

56

00:04:12,000 --> 00:04:16,000

Bigfoot could be some sort of supernatural creature, like a phantom.

57

00:04:16,000 --> 00:04:20,000

You know, if Bigfoot is however a flesh and blood animal,

58

00:04:20,000 --> 00:04:24,000

then I would have to say that their numbers would have to be few and far between.

59

00:04:26,000 --> 00:04:28,000

Since the Mount Everest discovery,

60

00:04:28,000 --> 00:04:33,000

there have been numerous sightings of large ape-like creatures on every continent,

61

00:04:33,000 --> 00:04:37,000

many clustered in the Pacific Northwest area of the United States,

62

00:04:37,000 --> 00:04:41,000

including Mount Shasta in Northern California.

63

00:04:43,000 --> 00:04:48,000

In 1979, I was up on the side of Mount Shasta on the foothills,

64

00:04:48,000 --> 00:04:50,000

trying to get to the base of the mountain.

65

00:04:51,000 --> 00:04:53,000

It was so dense and so tough.

66

00:04:53,000 --> 00:04:57,000

As we're standing there, we heard this crashing sound.

67

00:04:59,000 --> 00:05:02,000

Simultaneously, we smelled this awful smell.

68

00:05:02,000 --> 00:05:04,000

I mean, it was foul.

69

00:05:04,000 --> 00:05:09,000

But what was horrifying was whatever it was was coming at us through this impenetrable hedge.

70

00:05:09,000 --> 00:05:14,000

And then we heard the most blood-curdling combination of us.

71

00:05:14,000 --> 00:05:19,000

Elephant trumpeting, a lion roaring.

72

00:05:23,000 --> 00:05:27,000

And it was so loud, it bounced off the foothills two miles away.

73

00:05:29,000 --> 00:05:32,000

That was probably the most terrified I've ever been in my life.

74

00:05:32,000 --> 00:05:36,000

And the next thing I knew, we were headed down the mountain, almost getting off corners.

75

00:05:39,000 --> 00:05:46,000

I had heard from sheriffs about a rancher in Montana who had gone out to go hunting,

76

00:05:46,000 --> 00:05:51,000

comes around a ridge, has an eight-foot tall reddish brown,

77

00:05:51,000 --> 00:05:56,000

primate-looking, long-haired creature standing right in front of him.

78

00:05:58,000 --> 00:06:02,000

He picks up a 30-odd six and just fires.

79

00:06:03,000 --> 00:06:06,000

And the creature disappeared in a flash of light.

80

00:06:07,000 --> 00:06:14,000

If the Sasquatch, when a bullet is shot at it, disappears in a flash of light,

81

00:06:14,000 --> 00:06:18,000

then what in the world are we dealing with and what do they want?

82

00:06:19,000 --> 00:06:24,000

Why is the creature known as Bigfoot so difficult to capture or kill?

83

00:06:24,000 --> 00:06:28,000

Could it be, as ancient astronaut Theorist contend,

84

00:06:28,000 --> 00:06:34,000

that the creature's ghost-like abilities are the result of its otherworldly origin?

85

00:06:35,000 --> 00:06:44,000

Many Sasquatch researchers have noted that there's a connection between UFO activity and Bigfoot activity.

86

00:06:45,000 --> 00:06:51,000

In fact, Bigfoot has been seen coming out of some UFO flying saucer craft.

87

00:06:52,000 --> 00:06:59,000

You have to wonder if somehow Bigfoot himself isn't some kind of extraterrestrial.

88

00:07:02,000 --> 00:07:08,000

Many of the North American Indian tribes have legends and mythological tales about these Sasquatch,

89

00:07:08,000 --> 00:07:11,000

the Anasazi and various other Indian cultures.

90

00:07:11,000 --> 00:07:14,000

Look at these as a ghost creature.

91

00:07:14,000 --> 00:07:18,000

There's something that it's impossible to capture, close to impossible to see,

92

00:07:19,000 --> 00:07:21,000

but they do know that they exist.

93

00:07:26,000 --> 00:07:32,000

Although mainstream scientists consider the mysterious beast as no more than a modern-day myth,

94

00:07:33,000 --> 00:07:39,000

the number of Bigfoot sightings reported and photographed continues to steadily increase.

95

00:07:41,000 --> 00:07:45,000

Specifically what you get is obviously big feet, you get a hairy creature,

96

00:07:45,000 --> 00:07:49,000

you get a very specific smell, very harsh smell,

97

00:07:49,000 --> 00:07:54,000

and it's also said that the sound which Bigfoot makes is kind of whistling.

98

00:07:57,000 --> 00:08:01,000

So all of these components really make for a typical Bigfoot sighting,

99

00:08:01,000 --> 00:08:04,000

and they are concise across the board.

100

00:08:05,000 --> 00:08:09,000

They seem to be very delusive, very retiring and retreating.

101

00:08:09,000 --> 00:08:12,000

Aggressive behaviors are very rarely reported.

102

00:08:12,000 --> 00:08:19,000

The witness sees the creature and both go in opposite directions with no interaction whatsoever.

103

00:08:22,000 --> 00:08:26,000

They range in size from perhaps six feet to ten feet tall.

104

00:08:26,000 --> 00:08:31,000

Coloration, the most common description is of a dark brown fur.

105

00:08:31,000 --> 00:08:37,000

Their names vary from location, but you have of course in America,

106

00:08:37,000 --> 00:08:41,000

Bigfoot, otherwise known as Sasquatch in the Pacific Northwest.

107

00:08:42,000 --> 00:08:45,000

Down in Florida, it's known as the Skunk Ape.

108

00:08:45,000 --> 00:08:48,000

Down in Australia, we have the Yawing.

109

00:08:50,000 --> 00:08:56,000

But if a Bigfoot creature really does exist, how has it remained so elusive?

110

00:09:00,000 --> 00:09:06,000

Researchers point out that accounts of giant human-like beasts date back thousands of years.

111

00:09:06,000 --> 00:09:10,000

Throughout ancient history, we have a number of legends about giants,

112

00:09:10,000 --> 00:09:15,000

about wild men, about hairy beasts that live at the edge of civilization.

113

00:09:15,000 --> 00:09:19,000

These were humans, you know, people who were however wild.

114

00:09:19,000 --> 00:09:23,000

They were hairy, they didn't wear clothes, they lived in the woods,

115

00:09:23,000 --> 00:09:27,000

and yet in other ways they had special powers.

116

00:09:29,000 --> 00:09:33,000

Is it possible that the supernatural creatures of Native American myths

117

00:09:33,000 --> 00:09:39,000

are in fact descriptions of encounters with Bigfoot in the remote past?

118

00:09:39,000 --> 00:09:43,000

And are such creatures extraterrestrial in nature?

119

00:09:44,000 --> 00:09:51,000

Ancient astronaut theorists believe the answers can be found in numerous ancient texts.

120

00:09:51,000 --> 00:09:55,000

In the Book of Enoch, we have a category called the Nethilimor, the Watchers,

121

00:09:55,000 --> 00:10:03,000

people who set to come down from heaven to earth and basically lived ever after amongst us.

122

00:10:03,000 --> 00:10:08,000

Now, the Bible gives some very little discussion as to really what they looked like

123

00:10:08,000 --> 00:10:11,000

except the fact that they were giants, that they were big,

124

00:10:11,000 --> 00:10:14,000

and clearly they are deemed to be less worthy.

125

00:10:14,000 --> 00:10:18,000

And I think this is of interest because when you start looking on the Bigfoot,

126

00:10:18,000 --> 00:10:24,000

you really are confronted with a creature which even we today would classify more as a animal

127

00:10:24,000 --> 00:10:26,000

rather than as a human being.

128

00:10:27,000 --> 00:10:32,000

In the Old Testament, we can read stories where the gods saw the earth women

129

00:10:32,000 --> 00:10:37,000

and thought they were extremely beautiful and so they made babies with them

130

00:10:37,000 --> 00:10:42,000

and upon giving birth, according to the texts, they created a race of giants.

131

00:10:42,000 --> 00:10:47,000

What they witnessed had absolutely nothing to do with the divine

132

00:10:47,000 --> 00:10:52,000

or with the spiritual because those gods were not gods at all.

133

00:10:52,000 --> 00:10:57,000

They were misinterpreted flesh and blood, extraterrestrials.

134

00:10:57,000 --> 00:11:02,000

The Bigfoot

135

00:11:02,000 --> 00:11:09,000

Might Bigfoot and the Himalayan Yeti really be creatures of alien origin

136

00:11:09,000 --> 00:11:13,000

as some ancient astronaut theorists contend.

137

00:11:13,000 --> 00:11:21,000

Perhaps further evidence can be found in ancient tales of giant beings with supernatural powers.

138

00:11:27,000 --> 00:11:30,000

Iraq

139

00:11:30,000 --> 00:11:35,000

Site of ancient Mesopotamia and the cradle of civilization.

140

00:11:37,000 --> 00:11:41,000

In the remains of the ancient city of Nineveh,

141

00:11:41,000 --> 00:11:48,000

Sumerian tablets dating back to as early as 1800 BC tell the story of King Gilgamesh.

142

00:11:49,000 --> 00:11:56,000

In this epic poem, Gilgamesh has a companion named Enkidu

143

00:11:56,000 --> 00:12:03,000

who is described as a hairy wild man living outside human society.

144

00:12:05,000 --> 00:12:13,000

What is fascinating about the epic of Gilgamesh is the fact that it relates to us a story of Enkidu

145

00:12:14,000 --> 00:12:18,000

who allegedly was a giant.

146

00:12:18,000 --> 00:12:26,000

It is possible that Enkidu, this wild hairy beast, this giant,

147

00:12:26,000 --> 00:12:30,000

could have been of extraterrestrial origin

148

00:12:30,000 --> 00:12:34,000

because that is what the ancient Sumerian texts are saying.

149

00:12:35,000 --> 00:12:39,000

Enkidu is described in the epic of Gilgamesh

150

00:12:39,000 --> 00:12:46,000

as being a hairy man-like monster with great strength.

151

00:12:46,000 --> 00:12:55,000

And when you read that story, you have to think that Enkidu is some kind of a bigfoot Sasquatch.

152

00:12:57,000 --> 00:13:01,000

This is the actual first fashion being by the gods

153

00:13:01,000 --> 00:13:07,000

where they put their genetic marker on it to make a new being that would be their slave

154

00:13:07,000 --> 00:13:11,000

and they call this being the Enkidu.

155

00:13:11,000 --> 00:13:15,000

Is it possible, as ancient astronaut theorists suggest,

156

00:13:15,000 --> 00:13:23,000

that the epic of Gilgamesh actually describes a hominid creature created by extraterrestrial

beings?

157

00:13:23,000 --> 00:13:31,000

Sumerian texts also describe ancient sky gods who came to Earth called the Anunnaki.

158

00:13:32,000 --> 00:13:39,000

The ancient astronaut theory explains how these gods were probably extraterrestrials

159

00:13:39,000 --> 00:13:42,000

and put their genetic marker on this beast,

160

00:13:42,000 --> 00:13:46,000

but that beast would still exist and probably went on its own evolutionary path

161

00:13:46,000 --> 00:13:50,000

to be the bigfoot in the Sasquatch that we have today.

162

00:13:50,000 --> 00:13:55,000

Do ancient accounts of such human-like beasts provide further evidence

163

00:13:55,000 --> 00:14:01,000

that this otherworldly being may have really existed throughout our history?

164

00:14:06,000 --> 00:14:10,000

Some believe the giant in the Old Testament story of David and Goliath

165

00:14:10,000 --> 00:14:14,000

may also be an early representation of bigfoot.

166

00:14:15,000 --> 00:14:19,000

If you think about the story of David and Goliath from the Bible,

167

00:14:19,000 --> 00:14:21,000

Goliath is huge and he's big and he's hairy,

168

00:14:21,000 --> 00:14:25,000

but he doesn't live on the edge of civilization or avoid people.

169

00:14:25,000 --> 00:14:31,000

He's really being used as a weapon, almost, a weapon of terror against the Israelites.

170

00:14:32,000 --> 00:14:37,000

When you start reading the Bible in more detail and descriptions of these giants,

171

00:14:37,000 --> 00:14:42,000

there were various other big creatures in our ancestors' world

172

00:14:42,000 --> 00:14:47,000

which we no longer are aware of and bigfoot might just be one category

173

00:14:47,000 --> 00:14:49,000

which somehow has been able to survive.

174

00:14:51,000 --> 00:14:53,000

Whether or not Goliath is a bigfoot,

175

00:14:53,000 --> 00:14:56,000

I did definitely sit within the same category of a creature

176

00:14:56,000 --> 00:15:00,000

which clearly is not human, but clearly is also present here

177

00:15:00,000 --> 00:15:03,000

and which is taller than our ancestors' world.

178

00:15:04,000 --> 00:15:09,000

My question is, what is the truth behind this particular story?

179

00:15:09,000 --> 00:15:14,000

And it is possible, as some scholars have suggested,

180

00:15:14,000 --> 00:15:19,000

that Goliath might have been an extraterrestrial,

181

00:15:19,000 --> 00:15:24,000

that he was a type of giant, a human abomination,

182

00:15:24,000 --> 00:15:30,000

a half-alien, half-human creature that was so terrifying,

183

00:15:30,000 --> 00:15:37,000

so horrendous that David took it upon himself to vanquish that beast.

184

00:15:40,000 --> 00:15:43,000

All cultures across the world, whether it's South America,

185

00:15:43,000 --> 00:15:48,000

Native American Indians, Europe, Russia, China, Tibet, Australia,

186

00:15:49,000 --> 00:15:54,000

all these nations have legends and tales of giant hairy wild men.

187

00:15:54,000 --> 00:15:57,000

Now, you know, people say, well, legends are just legends,

188

00:15:57,000 --> 00:16:01,000

but when you have cultures and countries separated by oceans,

189

00:16:01,000 --> 00:16:04,000

all talking about very similar things, to me,

190

00:16:04,000 --> 00:16:06,000

this does suggest that in times past,

191

00:16:06,000 --> 00:16:11,000

these things were very, very prevalent and widespread across the world.

192

00:16:13,000 --> 00:16:16,000

Legends of giants were common in the ancient world.

193

00:16:18,000 --> 00:16:23,000

But similar stories emerged much later with Viking explorer, Leif Erickson,

194

00:16:23,000 --> 00:16:26,000

who in the 10th century AD,

195

00:16:26,000 --> 00:16:31,000

wrote of horrible, ugly, hairy creatures with dark eyes.

196

00:16:33,000 --> 00:16:36,000

Leif Erickson was familiar with the different types of tribes

197

00:16:36,000 --> 00:16:38,000

and indigenous people.

198

00:16:38,000 --> 00:16:43,000

Now, he spoke very specifically about these large, hairy creatures with dark eyes

199

00:16:43,000 --> 00:16:46,000

and a very specific scent that they had that stood out

200

00:16:46,000 --> 00:16:48,000

from all the other cultures that they interacted with

201

00:16:48,000 --> 00:16:50,000

on their travels into the New World.

202

00:16:52,000 --> 00:16:55,000

Could these have been the Sasquatch or Yeti that we speak of today?

203

00:16:55,000 --> 00:16:57,000

Very possibly.

204

00:16:59,000 --> 00:17:03,000

Medieval mythologies have also described hairy wild men

205

00:17:03,000 --> 00:17:05,000

with strange magical powers.

206

00:17:07,000 --> 00:17:10,000

According to historians, the wizard Merlin,

207

00:17:10,000 --> 00:17:12,000

found in the tales of King Arthur,

208

00:17:12,000 --> 00:17:16,000

is based on a legendary Welsh figure named Merlin Wilt,

209

00:17:16,000 --> 00:17:20,000

who is described as a hairy madman,

210

00:17:21,000 --> 00:17:24,000

who wanders in the company of beasts.

211

00:17:25,000 --> 00:17:30,000

There are many stories, for example, of the wild man dating from medieval times.

212

00:17:30,000 --> 00:17:33,000

There you have Merlin,

213

00:17:33,000 --> 00:17:37,000

our Merlin who is familiar to us from the legend of King Arthur.

214

00:17:37,000 --> 00:17:40,000

You have a legend about Merlin as being a wild man,

215

00:17:40,000 --> 00:17:44,000

being someone who was hairy and unkempt and lived in the woods

216

00:17:44,000 --> 00:17:48,000

because he communicated so closely with the spirit world

217

00:17:48,000 --> 00:17:52,000

that he was untamed, that he was unable to live in human society.

218

00:17:52,000 --> 00:17:58,000

And so you have this idea that these creatures who are wild humanoids

219

00:17:58,000 --> 00:18:01,000

also have special messages for us.

220

00:18:01,000 --> 00:18:03,000

They can prophecy.

221

00:18:03,000 --> 00:18:05,000

They are living close to the spirit world in some way.

222

00:18:06,000 --> 00:18:09,000

But could all these similar accounts

223

00:18:09,000 --> 00:18:12,000

found throughout history and around the world

224

00:18:12,000 --> 00:18:17,000

be proof that Bigfoot is more than just myth?

225

00:18:20,000 --> 00:18:24,000

And is there any evidence that its origins lie not on Earth,

226

00:18:24,000 --> 00:18:26,000

but in the stars?

227

00:18:28,000 --> 00:18:31,000

There are a number of cases on record where Bigfoot has been seen

228

00:18:31,000 --> 00:18:36,000

in the same precise time frame as UFO activities being reported.

229

00:18:39,000 --> 00:18:44,000

For example, there was a big wave of UFO activity in Pennsylvania

230

00:18:44,000 --> 00:18:47,000

in the early 1970s, and people were actually reporting

231

00:18:47,000 --> 00:18:52,000

these large shadowy, lumbering, ape-like creatures walking out of the woods.

232

00:18:55,000 --> 00:18:59,000

In Texas, there's a road known locally as Ghostlight Road,

233

00:18:59,000 --> 00:19:03,000

and it's called Ghostlight Road because people see these weird balls of light

234

00:19:03,000 --> 00:19:05,000

flying through the woods.

235

00:19:06,000 --> 00:19:12,000

Coincidentally, people also have reported huge numbers of Bigfoot-type reports

236

00:19:12,000 --> 00:19:14,000

in these very same woods.

237

00:19:19,000 --> 00:19:21,000

Bigfoot are intelligent.

238

00:19:21,000 --> 00:19:24,000

They're very, very secretive and very, very hidden.

239

00:19:24,000 --> 00:19:26,000

They're able to skirt up around civilization.

240

00:19:26,000 --> 00:19:31,000

Perhaps they do have some sort of extra abilities that allow them to do this,

241

00:19:31,000 --> 00:19:34,000

and if so, where did those abilities come from?

242

00:19:36,000 --> 00:19:42,000

We can't factor out that possibly Bigfoot is somehow an extraterrestrial species.

243

00:19:45,000 --> 00:19:50,000

Back in 1980, I had been investigating a lot of animal mutilations,

244

00:19:50,000 --> 00:19:54,000

and I get a letter from a man up in Snohomish, Washington,

245

00:19:55,000 --> 00:19:59,000

famous for where the Sasquatch or Bigfoot sightings.

246

00:20:01,000 --> 00:20:04,000

He said, I was out at my father's place,

247

00:20:06,000 --> 00:20:11,000

and I hear a sound in the trees as if wind has come in.

248

00:20:11,000 --> 00:20:15,000

With the trees starting to move comes the silver disc,

249

00:20:17,000 --> 00:20:21,000

and then he sees a beam comes down to the ground.

250

00:20:22,000 --> 00:20:28,000

In the beam is a tall, shaggy primate looking, he said, it looked like a gorilla.

251

00:20:29,000 --> 00:20:36,000

Comes down to the bottom, and the tall creature walks by as if he doesn't exist.

252

00:20:37,000 --> 00:20:43,000

The next thing, animal mutilations are reported within a few days.

253

00:20:51,000 --> 00:20:58,000

If Bigfoot creatures are aligned with extraterrestrial beings, as ancient astronaut theorists believe,

254

00:20:58,000 --> 00:21:02,000

what might be the purpose of their presence on this planet?

255

00:21:03,000 --> 00:21:10,000

And might the worldwide sightings be part of a clandestine program that has been going on for thousands of years?

256

00:21:11,000 --> 00:21:18,000

Bigfoot could have been brought here, you know, to sort of let's put it in alongside the natives and see what happens.

257

00:21:19,000 --> 00:21:25,000

There are stories from the star people coming down and releasing these Bigfoot type creatures into the wilderness.

258

00:21:25,000 --> 00:21:31,000

Of course you have to wonder what prompted those stories, and that's why there are researchers out there who do believe

259

00:21:31,000 --> 00:21:35,000

that Bigfoot is, if you like, an animal born on another world.

260

00:21:37,000 --> 00:21:44,000

One idea is that these are entities that have been dropped down here as part of a research project.

261

00:21:45,000 --> 00:21:56,000

Another idea is that the Bigfoot creatures perhaps were criminals or some other type of undesirable from an alien planet that have been left on our world.

262

00:22:00,000 --> 00:22:09,000

If extraterrestrials did create a race of Bigfoot creatures thousands of years in the past, as ancient astronaut theorists believe,

263

00:22:10,000 --> 00:22:14,000

might they have had a reason for keeping them hidden from us?

264

00:22:15,000 --> 00:22:23,000

Perhaps further evidence can be found, not in the world we know, but hidden, deep underground.

265

00:22:29,000 --> 00:22:33,000

The Siskiyou Mountains, southwestern Oregon.

266

00:22:34,000 --> 00:22:45,000

In 1874, Hunter Elijah Davidson discovered a large cave, leading to a 500 acre network of underground tunnels and caverns.

267

00:22:47,000 --> 00:22:55,000

Known as the Oregon Caves, the ancient subterranean structure is one of the few marble caves in the world.

268

00:22:56,000 --> 00:23:08,000

Some believe this underground world is home to the Sasquatch creatures that have been reported in this area by Native Americans for hundreds of years.

269

00:23:11,000 --> 00:23:20,000

There are a number of sightings of these creatures in caves, a number of explorers hearing very strange animalistic screams coming from these caves

270

00:23:20,000 --> 00:23:24,000

and seeing sort of shadowy, lumbering creatures within them.

271

00:23:26,000 --> 00:23:33,000

You know, if you're a large flesh and blood animal, 7 to 8 feet tall, certainly you're going to be out hunting all day to feed.

272

00:23:37,000 --> 00:23:44,000

But at night, potentially, you know, Bigfoot hunters out there, regular hunters, other wild animals, you need to be careful.

273

00:23:44,000 --> 00:23:48,000

The ideal location to hide out would be underground.

274

00:23:49,000 --> 00:23:53,000

So, you know, maybe that's another reason we haven't found Bigfoot.

275

00:23:53,000 --> 00:23:57,000

Instead of looking around us, maybe we should be looking below us.

276

00:23:58,000 --> 00:24:04,000

These cavern systems that exist worldwide have not been fully explored.

277

00:24:06,000 --> 00:24:10,000

In fact, probably a very small percentage of them have been even discovered.

278

00:24:10,000 --> 00:24:12,000

What could exist down there?

279

00:24:12,000 --> 00:24:18,000

Could we have a whole system of life forms that exist down there that we have yet to identify?

280

00:24:20,000 --> 00:24:22,000

You have fish that never see light.

281

00:24:23,000 --> 00:24:25,000

You have insect species.

282

00:24:25,000 --> 00:24:32,000

There's the possibility of a complete potential infrastructure for Bigfoot to survive on.

283

00:24:33,000 --> 00:24:37,000

Perhaps Bigfoot is one of these life forms.

284

00:24:38,000 --> 00:24:44,000

But no one sees Sasquatches going on highways, paths and forests moving back and forth.

285

00:24:45,000 --> 00:24:54,000

If we're dealing with non-human intelligence and non-humans made them to do work on this planet, maybe there's a tunnel system.

286

00:24:57,000 --> 00:25:05,000

And that might explain why you could have them in Georgia, Michigan, Pennsylvania, California, all over.

287

00:25:07,000 --> 00:25:17,000

One thing that's always intrigued me as well about Bigfoot is this description of a musky, sulfur-ish type smell that's often associated with close encounters.

288

00:25:20,000 --> 00:25:30,000

You know, the Christian version of the devil and fire and brimstone and that sulfur type smell tends to be associated with the subterranean world or hell.

289

00:25:31,000 --> 00:25:43,000

So is there a connection possibly between the idea of subterranean devils, if you will, or Lucifer, and that sulfur smell and that sulfur smell with Bigfoot?

290

00:25:46,000 --> 00:25:53,000

Is it possible that a race of subterranean creatures has been living beneath the Earth's surface without our knowledge?

291

00:25:54,000 --> 00:26:00,000

If so, might Bigfoot have been interacting with us for thousands of years?

292

00:26:01,000 --> 00:26:06,000

In ancient Greek myths, we find references to the troglodytes.

293

00:26:08,000 --> 00:26:17,000

These hairy, beastly-looking creatures that lived underground, that sometimes were extremely terrifying,

294

00:26:18,000 --> 00:26:26,000

but sometimes they also were very wise and taught mankind in various disciplines.

295

00:26:27,000 --> 00:26:35,000

Now, according to the ancient legends, the troglodytes are believed to have descended from the sky.

296

00:26:38,000 --> 00:26:44,000

Obviously, they were hiding out somewhere that was inaccessible to our ancestors.

297

00:26:44,000 --> 00:26:48,000

They wanted to keep their presence a secret.

298

00:26:49,000 --> 00:27:01,000

There are multiple stories that actually talk about explorations into these tunnels where sometimes people never returned.

299

00:27:02,000 --> 00:27:11,000

People who have done research have found dens, nests, collections of brush that are put together in particular patterns

300

00:27:11,000 --> 00:27:15,000

that suggest very large creatures are nesting in them.

301

00:27:17,000 --> 00:27:23,000

And I find that fairly persuasive evidence, something is making those dens or nests out of brush.

302

00:27:24,000 --> 00:27:28,000

Something is using those, a limb living underground.

303

00:27:31,000 --> 00:27:40,000

Throughout the world, there are many extensive and mysterious cavern systems that are linked together into bed

304

00:27:40,000 --> 00:27:44,000

and in India, also in North America.

305

00:27:45,000 --> 00:27:50,000

Some of them also go throughout the Pacific Northwest, like areas like Manchester.

306

00:27:51,000 --> 00:28:00,000

So it's an interesting idea that Bigfoot is actually traveling underground through these tunnel systems.

307

00:28:01,000 --> 00:28:06,000

And those underground bases and tunnel systems would have been made by extraterrestrials.

308

00:28:07,000 --> 00:28:16,000

Might extraterrestrials really have built caves and tunnel systems to hide the legendary creature known as Bigfoot,

309

00:28:17,000 --> 00:28:19,000

as some ancient astronaut theorists believe?

310

00:28:21,000 --> 00:28:27,000

And if so, is it possible that these otherworldly beings still dwell there today?

311

00:28:27,000 --> 00:28:36,000

Could Sasquatch Bigfoot be something that lives here on Earth underground?

312

00:28:39,000 --> 00:28:47,000

What is the relationship between the Sasquatch, the non-human phenomenon and this planet?

313

00:28:48,000 --> 00:28:53,000

There is also the possibility that he is actually an alien creature.

314

00:28:54,000 --> 00:29:01,000

Now, we don't know how intelligent he is, but one theory is that the Bigfoot is actually a more intelligent creature

315

00:29:02,000 --> 00:29:10,000

and he's avoiding man hiding out in mountainous regions that are cold, waiting for man to destroy himself at which time he'll assume dominance.

316

00:29:11,000 --> 00:29:19,000

And of course, he also could be the result of genetic hybridization that aliens landed on our planet

317

00:29:19,000 --> 00:29:23,000

and used DNA to create a hybrid between man and the apes.

318

00:29:24,000 --> 00:29:33,000

All bets are on, but the evidence that he exists somewhere certainly is strong based on all of the evidence we've found in terms of eyewitness observations for Prince at Central.

319

00:29:36,000 --> 00:29:43,000

Could the intermingling of human and alien beings have resulted in this strange hybrid creature?

320

00:29:44,000 --> 00:29:57,000

As ancient astronaut theorists contend, perhaps further investigation of the Bigfoot mystery will reveal an even more disturbing truth.

321

00:29:58,000 --> 00:30:05,000

Russia, February 28, 1927.

322

00:30:06,000 --> 00:30:17,000

Noted biologist and geneticist Ilya Ivanov conducts controversial experiments to artificially inseminate female apes with human sperm.

323

00:30:18,000 --> 00:30:32,000

The procedure is unsuccessful, but three years later Ivanov reverses the test using ape sperm and human female hosts.

324

00:30:33,000 --> 00:30:46,000

Before the experiment can bear fruit, the Soviet government arrests Ivanov and exiles him, but had the scientist already made an evolutionary breakthrough,

325

00:30:47,000 --> 00:30:54,000

might Ivanov have actually created a hybrid species from ape and human DNA?

326

00:30:56,000 --> 00:31:06,000

Ilya Ivanov was a person who was obsessed with making this freak, this creature which was half man, half chimpanzee.

327

00:31:07,000 --> 00:31:14,000

But also is completely convinced that if he's able to do this, there will be interbreeding of these two species.

328

00:31:14,000 --> 00:31:22,000

And really if a person like that, a top scientist is convinced that this is possible, then really nature might have done so,

329

00:31:22,000 --> 00:31:26,000

or our ancestors might have done so at one point in the past as well.

330

00:31:27,000 --> 00:31:30,000

And this creature might indeed be the result of this offspring.

331

00:31:31,000 --> 00:31:42,000

Ivanov was aware that combining ape and human is possible with the idea that there could be new traits and things garnered that scientifically would benefit humanity in the long run.

332

00:31:44,000 --> 00:31:59,000

If recent modern science could create hybrid human and ape creatures, might similar yet very advanced technology have been used by extraterrestrial beings in the remote past, as ancient astronaut theorists contend.

333

00:32:00,000 --> 00:32:07,000

You know, it's like the island of Dr. Moro, strange creatures that these mad scientists dabble with.

334

00:32:07,000 --> 00:32:12,000

We know that people are chimeras, they are part animal, part human.

335

00:32:14,000 --> 00:32:19,000

There are people wandering this planet right now with workable pig valves keeping them alive.

336

00:32:22,000 --> 00:32:29,000

So there's no question if science can dabble, it will dabble, and it could create some abominations.

337

00:32:32,000 --> 00:32:39,000

I shudder to think of the kinds of creatures some scientists on this planet may have tried to develop.

338

00:32:40,000 --> 00:32:43,000

And they had to just dispose of them because they were too hideous.

339

00:32:48,000 --> 00:32:55,000

Is it possible that offshoots of a certain species occurred over hundreds of thousands of years?

340

00:32:55,000 --> 00:33:02,000

The ancient alien theory answers that exact question, and the answer is yes.

341

00:33:03,000 --> 00:33:18,000

It was made possible by a direct artificial intervention of our genes in the remote past by flesh and blood extraterrestrials who used our planet as some type of an experimental platform.

342

00:33:21,000 --> 00:33:30,000

All around the world we can find carvings or statues of these hybrid beings, and some of them are in India like the Naga, which is a half-man, half-snake.

343

00:33:32,000 --> 00:33:36,000

In Greece we have the Medusa with her hair made of snakes.

344

00:33:37,000 --> 00:33:51,000

In Egypt the entire god Pantheon consists of these half-man, half-animals with Anubis for example, with the head of a dog and the body of a human being.

345

00:33:52,000 --> 00:34:07,000

And to suggest that all of these creatures were nothing else but fantasy in my opinion doesn't really hold water because our ancestors depicted what they saw.

346

00:34:08,000 --> 00:34:23,000

But if the monster we know as Bigfoot really exists and is an ancient alien hybrid that has survived to modern times, what was it created for?

347

00:34:24,000 --> 00:34:38,000

Some ancient astronaut theorists believe the answer can be found by taking another look at the Sumerian stories of the Anunnaki and the Bigfoot-like creature called Ankhidu.

348

00:34:39,000 --> 00:34:44,000

The gods originally came here to mine gold, but they didn't like to mine the gold themselves.

349

00:34:45,000 --> 00:34:48,000

So the Anunnaki created what we call the Ankhidu.

350

00:34:49,000 --> 00:34:55,000

They decided amongst the gods to fashion a worker being, the perfect working model.

351

00:34:58,000 --> 00:35:04,000

Not as sophisticated or as advanced as us, it was the first working model that they used as a slave laborer.

352

00:35:05,000 --> 00:35:22,000

If the creature known as Bigfoot really was created by aliens to mine precious metals thousands of years ago, as ancient astronaut theorists believe, why would it still be around today?

353

00:35:23,000 --> 00:35:34,000

Is it simply what remains of an ancient race of hybrid beings? Or might these giant beasts still be working on behalf of extraterrestrials?

354

00:35:36,000 --> 00:35:40,000

Why would they put a Sasquatch character here that they made?

355

00:35:41,000 --> 00:35:47,000

And it may be that we're dealing with intelligences that can create anything, the genetic material.

356

00:35:47,000 --> 00:36:00,000

They would make a creature that would be strong, big enough to fend for itself, have some kind of a mission, but is not to interact with homo sapiens at all.

357

00:36:01,000 --> 00:36:06,000

Might explain why Sasquatch has always been so elusive.

358

00:36:07,000 --> 00:36:15,000

It could have been an experiment out of natural curiosity by them, or perhaps they had a purpose in putting Bigfoot on our planet.

359

00:36:17,000 --> 00:36:27,000

Perhaps to test out the environment before they ultimately land here and take over. It could be a long term genetic experiment.

360

00:36:32,000 --> 00:36:43,000

Is it possible that the reason we have not found hard evidence of Bigfoot's existence is because it is hiding out, performing some secret extraterrestrial mission?

361

00:36:44,000 --> 00:36:59,000

Or might its elusiveness be a survival instinct, one highly evolved over thousands of years, while hiding from a far more dangerous alien hybrid species? Human beings.

362

00:37:04,000 --> 00:37:07,000

Hong Kong, 1935

363

00:37:08,000 --> 00:37:21,000

In a small medicinal shop, German paleontologist Dr. Gustav von Konigswald purchased a set of giant molars thought to be the teeth of an ancient dragon.

364

00:37:23,000 --> 00:37:33,000

After further study, von Konigswald determined that he had stumbled upon the first fossil evidence of an extinct species of ape called Gigantipithecus.

365

00:37:34,000 --> 00:37:50,000

Standing 10 feet tall and weighing up to 1200 pounds, this gigantic ape, believed to have lived alongside several early hominid species for tens of thousands of years, is the largest known primate to ever walk the earth.

366

00:37:52,000 --> 00:37:57,000

Might the creature known as Bigfoot be a descendant of this ancient beast?

367

00:37:58,000 --> 00:38:15,000

A popular theory for the origins of Sasquatch is that it may be descended from a known great ape, Gigantipithecus, a giant ape that lived during the latter part of the Pleistocene and achieved along with many other animals, gigantic proportions.

368

00:38:16,000 --> 00:38:27,000

As an ape with a small brain, it had extra crests and ridges of bone to provide attachment for the massive muscles to drive these very heavy, heavy jaws.

369

00:38:28,000 --> 00:38:43,000

By comparison, the gorilla has the crests and ridges that are found on Gigantipithecus or Bigfoot, presumably, to support the muscles attaching to a very small brain with a small cranial covering.

370

00:38:46,000 --> 00:38:51,000

The skulls of Gigantipithecus and the modern-day gorilla are typical of large primates.

371

00:38:54,000 --> 00:39:00,000

But the human skull, a species also believed to have descended from large primates, is very different.

372

00:39:01,000 --> 00:39:13,000

The human skull is remarkably smaller, our distinction being the much greater cranial capacity, smaller jaws, smaller muscles to drive these jaws.

373

00:39:14,000 --> 00:39:18,000

What can account for such significant differences in related species?

374

00:39:19,000 --> 00:39:25,000

And why are humans relatively hairless and possess brains far more advanced than other primates?

375

00:39:26,000 --> 00:39:35,000

Are we really the result of evolution? Or might the truth be that the real alien hybrid is not Bigfoot, but man?

376

00:39:36,000 --> 00:39:51,000

What today is referred to as the missing link is extraterrestrial intervention, because without that extraterrestrial intervention, evolution did not take place the way we're told in school.

377

00:39:52,000 --> 00:39:59,000

Right after we shed our fur for millennia, we had to keep warm by wearing furs.

378

00:39:59,000 --> 00:40:07,000

Yet we used to have fur all over our body, so something doesn't make sense.

379

00:40:08,000 --> 00:40:18,000

Our ancient ancestors here may well be, in a sense, aliens from some other solar system, perhaps the grays.

380

00:40:19,000 --> 00:40:29,000

What they've done is manipulate what were already humanoids on this planet, but brute humanoids.

381

00:40:30,000 --> 00:40:42,000

Hairy, brutish people, the caveman of ancient times, but were being genetically manipulated and given the DNA of these extraterrestrials.

382

00:40:43,000 --> 00:40:54,000

The progression of the Darwinian evolution, looking at the Neanderthal man, the australopithecine, all the way up to Cro-Magnon, it's very possible that that missing link is still being looked into.

383

00:40:55,000 --> 00:41:01,000

Now, I don't think they're ever going to find it, because the missing link more than likely was a genetic alteration on that hominid to make us.

384

00:41:02,000 --> 00:41:07,000

Could Homo sapiens really be a species not indigenous to planet Earth?

385

00:41:08,000 --> 00:41:24,000

And if humans are the result of genetic engineering by alien beings, as ancient astronaut theorists believe, might Bigfoot creatures really be the last surviving examples of prehistoric hominids?

386

00:41:25,000 --> 00:41:28,000

Creatures who would have originally dominated this planet.

387

00:41:29,000 --> 00:41:40,000

Is it possible that during the genetic manipulation of human beings, we at one point started out as Sasquatch and Bigfoot and Yeti's?

388

00:41:41,000 --> 00:41:54,000

One of the stories in the Sumerian myth is how the gods came into contact with this ape-like creature here on Earth, and said, we can put our genetic marker on this creature and make man in our image and after our likeness.

389

00:41:55,000 --> 00:42:06,000

These ape-like, hairy creatures existed here naturally on Earth and are possibly the origins of how humanity was spliced by the Oninaki into creating us that still exist today.

390

00:42:09,000 --> 00:42:17,000

Might the legend of Bigfoot really be the story of Earth creatures who escaped experimentation by ancient aliens?

391

00:42:18,000 --> 00:42:24,000

And could this help explain why they have been hiding from man for thousands of years?

392

00:42:25,000 --> 00:42:38,000

I think out of all the so-called paranormal phenomena that is scoffed at by science, we at some point in the not too distant future are going to have real irrefutable evidence of the existence of these creatures.

393

00:42:38,000 --> 00:42:49,000

The fact that Bigfoot have been able to skirt about on the periphery and remain hidden and remain secretive and be seldom seen means that they're intelligent.

394

00:42:50,000 --> 00:43:02,000

But what happens when populations keep expanding, remote areas start getting settled and Bigfoot starts to lose more and more of its territory? What's going to happen? Where's Bigfoot going to go?

395

00:43:03,000 --> 00:43:15,000

I think this is extraordinary powerful information to suggest that we were indeed engineered by ancient extraterrestrial beings and Bigfoot might just be the first intelligent life here on Earth.

396

00:43:18,000 --> 00:43:29,000

Is it possible that the legends of Bigfoot creatures are real? Could they have been the product of genetic manipulation by other worldly beings?

397

00:43:30,000 --> 00:43:39,000

Or are humans the real alien creatures manufactured by using alien and hominid DNA?

00:43:40,000 --> 00:43:53,000

If so, it might help to explain why Bigfoot is so elusive. Not because we are afraid of them, but because they are afraid of us.
