

1

00:00:00,000 --> 00:00:07,000

Ancient Star Rituals Summoning Higher Powers

2

00:00:07,000 --> 00:00:13,000

What the discipline of this baton world is telling us is that we can control time.

3

00:00:13,000 --> 00:00:17,000

Legends of otherworldly beings, traveling through time.

4

00:00:17,000 --> 00:00:25,000

It's not outside the realm of possibility that these aliens, they are in fact time travelers.

5

00:00:25,000 --> 00:00:30,000

And scientific theory revealing the secrets of the universe.

6

00:00:30,000 --> 00:00:36,000

If someone can travel faster than the speed of light, then theoretically someone could travel in time.

7

00:00:36,000 --> 00:00:41,000

Are alien beings really from out of this world?

8

00:00:41,000 --> 00:00:46,000

Or might they be evidence of man's future technological achievements?

9

00:00:46,000 --> 00:00:54,000

They have to wonder if they weren't time traveling extraterrestrials, or even humans coming from our own future.

10

00:00:54,000 --> 00:01:02,000

Millions of people around the world believe we have been visited in the past by extraterrestrial beings.

11

00:01:02,000 --> 00:01:05,000

What if it were true?

12

00:01:05,000 --> 00:01:10,000

Did ancient aliens really help to shape our history?

13

00:01:10,000 --> 00:01:17,000

And if so, might new evidence reveal the existence of time travelers?

14

00:01:47,000 --> 00:01:54,000

The Earth, Switzerland, September 26th 1905.

15

00:01:54,000 --> 00:01:59,000

Albert Einstein publishes his special theory on relativity.

16

00:01:59,000 --> 00:02:06,000

According to his astonishing scientific breakthrough, space and time are one.

17

00:02:06,000 --> 00:02:13,000

In the old theory of Newton, space was a rigid container and time was an absolute flow.

18

00:02:13,000 --> 00:02:16,000

In Einstein's theory, this was revolutionized.

19

00:02:16,000 --> 00:02:22,000

Space now became a flexible medium and time now could be altered.

20

00:02:22,000 --> 00:02:29,000

Einstein realized that if you move faster, the ticks on your clock actually change.

21

00:02:29,000 --> 00:02:33,000

Prior to Einstein, no one understood that or would even have expected that,

22

00:02:33,000 --> 00:02:38,000

because it only happens when you get very, very close to the speed of light.

23

00:02:38,000 --> 00:02:45,000

There is a way within the laws of physics to travel long distances and still be alive.

24

00:02:45,000 --> 00:02:53,000

And that actually is related to special relativity and the idea that if you can travel very, very close to the speed of light, time will slow down for you.

25

00:02:53,000 --> 00:03:01,000

And in this sense, if you can travel very near the speed of light, only a day or two would pass instead of the whole four years.

26

00:03:02,000 --> 00:03:09,000

January 30th, 1933. Berlin, Germany.

27

00:03:09,000 --> 00:03:18,000

Adolf Hitler and his Nazi party take power and Albert Einstein flees to the United States.

28

00:03:18,000 --> 00:03:27,000

Fearing Hitler's rise to power, he warns the US and the world of terrible dangers posed to humanity,

29

00:03:27,000 --> 00:03:34,000

especially if Nazis were to acquire advanced technology.

30

00:03:34,000 --> 00:03:38,000

But by revealing to the world his breakthrough theories,

31

00:03:38,000 --> 00:03:45,000

might Einstein have accidentally helped the Nazis build a time machine?

32

00:03:45,000 --> 00:03:49,000

Southwest Poland. The Owl Mountains.

33

00:03:49,000 --> 00:04:00,000

Here, concealed under rolling hills were seven underground complexes built for a top secret Nazi program called D-Glock.

34

00:04:00,000 --> 00:04:09,000

Some researchers believe it was in these covert facilities between 1943 and 1945

35

00:04:09,000 --> 00:04:16,000

that third Reich scientists carried out clandestine experiments in an effort to win World War II.

36

00:04:19,000 --> 00:04:27,000

They were developing lots of exotic things. They were in charge of the V-1, the V-2 rocket programs.

37

00:04:27,000 --> 00:04:36,000

But then, I think the culmination of their experimentation was with the Glock or the Bell. They called it that because it was bell shaped.

38

00:04:38,000 --> 00:04:47,000

What disappeared to be was some sort of device that had very, very powerful, rapidly rotating, energetic magnetic fields.

39

00:04:47,000 --> 00:04:52,000

And there are thoughts that this basically was a time machine.

40

00:04:52,000 --> 00:04:58,000

The idea was that you would be able to move back and forth in time, change history,

41

00:04:58,000 --> 00:05:03,000

change certain events and create a new timeline and a new reality.

42

00:05:03,000 --> 00:05:18,000

The existence of the mysterious bell shaped device, measuring nine feet wide and 12 feet tall,

43

00:05:18,000 --> 00:05:24,000

was first exposed by the high ranking Nazi general, Jakub Sporenberg,

44

00:05:24,000 --> 00:05:28,000

while being interrogated by Polish authorities after the war.

45

00:05:29,000 --> 00:05:34,000

But when the Allies eventually captured the German research center,

46

00:05:34,000 --> 00:05:41,000

neither the Nazi bell nor its project commander, Hans Kamler, could be found.

47

00:05:41,000 --> 00:05:49,000

Hans Kamler was in charge of all the super secret Nazi technology, and this guy just disappears after the war.

48

00:05:50,000 --> 00:06:01,000

In fact, there are four official versions of his death, so nobody really knows how he died, when he died, if he died, where he went, or what happened.

49

00:06:05,000 --> 00:06:11,000

Is it possible that the German military was experimenting with time travel technology?

50

00:06:12,000 --> 00:06:18,000

And if so, might the Nazi bell have actually traveled to the future?

51

00:06:21,000 --> 00:06:24,000

December 9th, 1965.

52

00:06:26,000 --> 00:06:36,000

Thousands witness a brilliant fireball flash across the sky, before crashing in Kecksburg, Pennsylvania, 30 miles southeast of Pittsburgh.

53

00:06:37,000 --> 00:06:45,000

The military was immediately on the scene, grabbed everything up, and then said nothing happened.

54

00:06:45,000 --> 00:06:51,000

The thing that intrigues me about the Kecksburg crash is the description of the object.

55

00:06:51,000 --> 00:06:59,000

Unlike most of the flying saucers you hear about, this one was bulbous, has been described like an acorn,

56

00:06:59,000 --> 00:07:04,000

or what I could see is kind of something that resembled the Nazi bell.

57

00:07:06,000 --> 00:07:14,000

Might the object that crashed at Kecksburg have been the long lost Nazi bell that disappeared 20 years earlier?

58

00:07:14,000 --> 00:07:25,000

And is it possible that German scientists had discovered a way to transport humans from one time and place to another, as some researchers believe?

59

00:07:26,000 --> 00:07:33,000

If so, did they use Einstein's theories to create their own time machine?

60

00:07:33,000 --> 00:07:38,000

Or might their inspiration have been perhaps more divine?

61

00:07:44,000 --> 00:07:47,000

Tibet, May 1938.

62

00:07:49,000 --> 00:07:53,000

While on an expedition through the northeast region of the Himalayan Mountains,

63

00:07:54,000 --> 00:08:04,000

Nazi officials searching for the origins of the Aryan, or master race, instead discovered the Buddhist teachings known as the Kalashakra.

64

00:08:06,000 --> 00:08:11,000

In the Buddhist tradition there's the notion of samsara, or the wheel of time.

65

00:08:11,000 --> 00:08:19,000

In the Kalashakra initiation, the teaching is to understand time, particularly biological time,

66

00:08:19,000 --> 00:08:29,000

calendar time, and astrological time, and how those things actually influence you.

67

00:08:33,000 --> 00:08:40,000

And so what the discipline of Kalashakra is telling us is that whereas we seem to see time as linear,

68

00:08:40,000 --> 00:08:48,000

this is not the case, that time is somehow cyclical, and that we can somehow master this and control time.

69

00:08:50,000 --> 00:08:55,000

Throughout the Buddhist world, the Buddhists build what they call stupas.

70

00:08:55,000 --> 00:08:58,000

They look very much like the Nazi bell.

71

00:08:58,000 --> 00:09:05,000

The stupas, it is said that we can use this shape to somehow connect with the gods.

72

00:09:05,000 --> 00:09:14,000

Now when we put the practice of Kalashakra on this, what we are talking about is somehow a practice of transcending time.

73

00:09:15,000 --> 00:09:25,000

The Kalashakra teaching gives individuals actual practices and techniques to be able to step outside of time and to be able to move in time.

74

00:09:27,000 --> 00:09:34,000

So it's entirely possible that the Nazis were looking for secrets on how to travel in time.

75

00:09:35,000 --> 00:09:44,000

Is it really possible that the Nazis unlocked the secrets of time travel during their expedition in

Tibet?

76

00:09:44,000 --> 00:09:59,000

And if so, might the early teachings of the Kalashakra be evidence that ancient Tibetan Buddhist monks had knowledge of time travel thousands of years ago, as some ancient astronaut theorists believe?

77

00:09:59,000 --> 00:10:06,000

Perhaps the answer can be found in the legends and rituals of an ancient civilization in New Mexico.

78

00:10:18,000 --> 00:10:21,000

Chaco Canyon, New Mexico.

79

00:10:22,000 --> 00:10:32,000

In a remote desert region, 150 miles northwest of Albuquerque, lie the mysterious ruins of an ancient Pueblo people.

80

00:10:32,000 --> 00:10:38,000

Called the Anasazi, they thrive from 900 to 1100 AD.

81

00:10:38,000 --> 00:10:53,000

This is the Plaza of Pueblo Bonito. This is a representation of our place in the universe.

82

00:10:53,000 --> 00:11:02,000

You've got the worlds above, the worlds below, and this right here is our plane of our world.

83

00:11:02,000 --> 00:11:14,000

This is the exact place where time and space began for the ancestral Pueblans who inhabited this place hundreds and hundreds of years ago.

84

00:11:18,000 --> 00:11:31,000

Scholars believe the Anasazi, or ancient ones, built their civilization with advanced knowledge of engineering, mathematics, and astronomy.

85

00:11:32,000 --> 00:11:48,000

Somehow, some way, they built a city that is perfectly circular, that goes out in perfectly straight lines, that the structures of the city themselves actually predict of the 5200 year cycle of the moon and cycles of the sun, all in the geometry, all in the stone, if you will.

86

00:11:49,000 --> 00:12:03,000

These are very elaborate constructions which required engineering skills beyond what the local folks had, and had to be done by an advanced civilization.

87

00:12:03,000 --> 00:12:24,000

The Anasazi built Chaco Canyon, and they built it as part of a promise of a way of living, that they were to uphold the wishes of the creator.

88

00:12:24,000 --> 00:12:31,000

And so Chaco Canyon is the delivery of the teachings. The teachings came from the star people.

89

00:12:34,000 --> 00:12:48,000

But how did these ancient people engineer such elaborate structures without modern machinery? And just who were the star people who brought knowledge to the Anasazi?

90

00:12:49,000 --> 00:12:59,000

Ancient astronaut theorists believe the answers can be found by looking at the ancient rituals and myths of Chaco Canyon.

91

00:13:00,000 --> 00:13:17,000

According to local legends, the Anasazi believed in a multi-dimensional existence and practiced sacred rituals called crystal star gazing. Ceremonies believed by some to enable time travel.

92

00:13:18,000 --> 00:13:39,000

If you go up into the cliff dwellings of the Anasazi, there are elaborate star maps up in those caves, and that's where the crystal star gazing ceremonies took place, where they had the ability to traverse space and time.

93

00:13:40,000 --> 00:13:53,000

What we're seeing within this area are people who basically say that they somehow emerged out of a different dimension onto this place, and they say that this for them is a place of emergence.

94

00:13:53,000 --> 00:13:57,000

They say that they interacted with mysterious creatures.

95

00:13:58,000 --> 00:14:07,000

Did the Anasazi really believe in interdimensional time travel, as some ancient astronaut theorists believe?

96

00:14:07,000 --> 00:14:17,000

If so, might they have left behind tangible evidence of otherworldly contact?

97

00:14:18,000 --> 00:14:30,000

I'm standing in front of the petroglyphs at Una Vida, and they're very amazing, as you can tell, with animal life.

98

00:14:30,000 --> 00:14:42,000

But there's also some very weird creatures standing there, humanoid figures, and one guy is holding what to me looks like a representation of a spiral galaxy.

99

00:14:43,000 --> 00:14:52,000

Native Americans were very aware of our place in the universe that we were part of a giant spiral galaxy.

100

00:14:55,000 --> 00:15:02,000

The spiral symbol, the one that you see on the walls, is a connection between the Anasazi and the extraterrestrials.

101

00:15:02,000 --> 00:15:07,000

They had contact, and they either came with them or they either left with them.

102

00:15:07,000 --> 00:15:13,000

We just don't know, but it's a bridge that existed between the Anasazi and the star people.

103

00:15:21,000 --> 00:15:33,000

Four very interesting humanoid petroglyphs have been found, one of which hovers above the other three humanoids with antennae sprouting out of its head.

104

00:15:33,000 --> 00:15:43,000

Some have suggested that this is a depiction of the ancient ant people that emerged to essentially jumpstart human civilization.

105

00:15:46,000 --> 00:15:53,000

According to the legends of the Hopi, a Native American tribe believed to be the descendants of the Anasazi.

106

00:15:53,000 --> 00:15:58,000

The ant people saved them from the first destruction of the universe.

107

00:15:59,000 --> 00:16:12,000

The ant people are described as very special cosmic visitors, maybe even star beings, extraterrestrials, who rescued them from this cataclysm by taking them underground.

108

00:16:12,000 --> 00:16:20,000

What's interesting about this is that in ancient Samaria, they tell of beings called the Anunaki who also came from the stars.

109

00:16:21,000 --> 00:16:27,000

The Hopi word Anu means ant, and the word Naki means friend.

110

00:16:27,000 --> 00:16:34,000

Is it possible that the Anunaki are the ant friends or ant people that the Hopi were describing?

111

00:16:37,000 --> 00:16:49,000

A group of hikers exploring a system of hidden caverns in Chaco Canyon discovered wall paintings and even cuneiform writings similar to those found on Samarian artifacts.

112

00:16:51,000 --> 00:17:04,000

After careful analysis, ancient astronaut theorists suggest that the caverns were originally inhabited by beings visiting from the future, called the wingmakers.

113

00:17:07,000 --> 00:17:16,000

The wingmakers were, they claimed, humans and in a sense extraterrestrials from 300 years in the future.

114

00:17:16,000 --> 00:17:28,000

And they were using Chaco Canyon as their base for this time zone, where they were coming from the future into our present time.

115

00:17:31,000 --> 00:17:44,000

My belief is that yes, the wingmakers were the culture bearers, bringing us a look at what our future was, which was mathematics, it was science, it was art, it was cultivation.

116

00:17:47,000 --> 00:17:52,000

Might there be truth to the story of the time traveling wingmakers at Chaco Canyon?

117

00:17:52,000 --> 00:17:59,000

And if so, is it possible the wingmakers were actually alien visitors?

118

00:18:00,000 --> 00:18:08,000

Ancient astronaut theorists say yes, and suggest the evidence still lies in Chaco Canyon.

119

00:18:09,000 --> 00:18:27,000

This is a kiva. A kiva was known to be the most sacred of places where ceremonies took place with the ancestral Pueblans when they talked about the cosmos, the universe, and our place in the universe.

120

00:18:28,000 --> 00:18:35,000

Mainstream archaeologists believe the kivas were once covered with timber to make a roof.

121

00:18:35,000 --> 00:18:43,000

But strangely, some Hopi legends refer to this circular structure as a cloudhouse.

122

00:18:45,000 --> 00:18:53,000

What if these cloudhouses were nothing else but biodomes or biospheres made of nuts and bolts?

123

00:18:54,000 --> 00:19:06,000

It is interesting that biospheres today look as if people are living sort of sunk into the ground with a giant dome over it, and here we have something very similar.

124

00:19:06,000 --> 00:19:18,000

So the question is, why would anybody do this? And according to the ancient myths, they were witness to an incredible event that had something to do with ancient aliens.

125

00:19:19,000 --> 00:19:23,000

And to them, it was a divine encounter.

126

00:19:27,000 --> 00:19:38,000

Is it possible that alien beings inhabited biospheres in Chaco Canyon? Like those our own scientists envision for future use on other planets?

127

00:19:39,000 --> 00:19:47,000

And might they have traveled here, not in spacecraft, but through an interdimensional space-time portal?

128

00:19:50,000 --> 00:20:03,000

But if so, where did they come from? Perhaps answers can be found halfway around the world in the ancient Indian text of the Mahabharata.

129

00:20:09,000 --> 00:20:24,000

The Mahabharata. In this sacred Indian text written in the 8th century BC, King Revita is described as traveling to the heavens to meet with the creator God Brahma.

130

00:20:24,000 --> 00:20:28,000

Only to return to Earth, hundreds of years in the future.

131

00:20:29,000 --> 00:20:37,000

Some researchers believe this Hindu tale may be one of the oldest records of successful time travel in the ancient past.

132

00:20:38,000 --> 00:20:48,000

There's the story of a king called Rava Yata, and he is taken into space to see the gods.

133

00:20:48,000 --> 00:20:56,000

And when he returns to the earth, he finds that many ages have gone by and it's been hundreds of years.

134

00:20:56,000 --> 00:21:03,000

And this is the kind of thing that would happen to space travelers and in time travel as well.

135

00:21:03,000 --> 00:21:11,000

You think you're gone for only a few days, but when you return to Earth, you find out that you've been gone for hundreds of years.

136

00:21:13,000 --> 00:21:20,000

Like the legend of Chaco Canyon, similar tales of time travel can be found all around the ancient world.

137

00:21:21,000 --> 00:21:35,000

In Japan, the legend of Urashimetaro details a fisherman's visit to the protector god of the sea, Rayu Jin, in an underwater palace for what seemed like only three days.

138

00:21:36,000 --> 00:21:42,000

When he returns to his fishing village, he finds that it's been 300 years that he's been gone.

139

00:21:43,000 --> 00:21:50,000

And his house is in ruins. Everybody he knows is long dead. No one remembers him or his family.

140

00:21:55,000 --> 00:22:05,000

And in the Hebrew Bible, descriptions of the prophet Jeremiah in Jerusalem are eerily similar to both of these accounts of time travel.

141

00:22:06,000 --> 00:22:15,000

Even in the Bible, the prophet Jeremiah was sitting together with a few of his friends and there was a young boy, his name was Abimelech.

142

00:22:16,000 --> 00:22:24,000

And Jeremiah said to Abimelech, go out of Jerusalem, there is a hill and collect some figs for us.

143

00:22:24,000 --> 00:22:28,000

The boy went out and collected the fresh figs.

144

00:22:28,000 --> 00:22:36,000

Of a sudden, Abimelech hears some noise and wind in the air and he becomes unconscious. He had a blackout.

145

00:22:37,000 --> 00:22:42,000

After a time, he wakes up again and he saw it was nearly the evening.

146

00:22:43,000 --> 00:22:48,000

So he runs back to the society and the city was full of strange soldiers.

147

00:22:49,000 --> 00:22:53,000

And he said, what's going on here? What is Jeremiah and all the others?

148

00:22:53,000 --> 00:22:57,000

And an old man said that was 62 years ago.

149

00:22:58,000 --> 00:23:02,000

It's a time travel story written in the Bible.

150

00:23:09,000 --> 00:23:12,000

Southern Egypt, Agilchia Island.

151

00:23:14,000 --> 00:23:21,000

Here, just six miles upstream from Aswan in the Nile River Valley lies the temple of Isis.

152

00:23:22,000 --> 00:23:36,000

Built in the fourth century BC, the temple was a center of worship for the Egyptian goddess of fertility and nature until the sixth century AD.

153

00:23:37,000 --> 00:23:43,000

Isis became the most important deity which ancient Egypt ever had.

154

00:23:44,000 --> 00:23:56,000

She was married to her brother, Osiris, and together they really became the popular husband and wife to which everybody wanted to be like.

155

00:23:57,000 --> 00:24:03,000

She is seen as a symbol of life, whereas Osiris is seen as the deity who rules over the dead.

156

00:24:04,000 --> 00:24:10,000

And so, whether you are alive or whether you're dead, you can always identify with Isis and Osiris.

157

00:24:13,000 --> 00:24:25,000

According to ancient Egyptian religious belief, the goddess Isis was known as the Divine Mother and believed to be the soul of the brightest star in the sky, Sirius.

158

00:24:26,000 --> 00:24:34,000

To the ancient Egyptians, Osiris was Orion. That constellation actually was a literal living embodiment of the great god Osiris.

159

00:24:35,000 --> 00:24:46,000

Sirius was the representation of his wife, sister, and consort Isis. Together, those two essentially ruled the skies and the life of the Egyptian people themselves.

160

00:24:47,000 --> 00:25:00,000

Many ancient cultures, including the Egyptians, Chinese, the Greeks, the Japanese, all had beliefs and legends that our gods who created us have come from Sirius.

161

00:25:00,000 --> 00:25:07,000

And this star, extremely important star to almost all ancient cultures.

162

00:25:08,000 --> 00:25:21,000

This knowledge originally emerged in ancient Egypt and in Africa with the Dogon tribe, who taught that beings of light came from Sirius and created humankind.

163

00:25:22,000 --> 00:25:30,000

It is clear that so many cultures possessed information about Sirius and they single out Sirius apart from everything else.

164

00:25:31,000 --> 00:25:39,000

And it's got nothing to do with its brightness. It has to do with the fact that somehow Sirius is responsible for sending us emissaries who educate us.

165

00:25:40,000 --> 00:25:58,000

Could the Sirius star system really be the point of origin for the gods of ancient man? Or was it, in fact, the place of origin for extraterrestrial time travelers, as ancient astronaut theorists believe?

166

00:25:59,000 --> 00:26:09,000

According to astronomers, Sirius is approximately 8.5 light-years away from Earth, an incredibly vast distance.

167

00:26:10,000 --> 00:26:21,000

The light-year is about 6 trillion miles. So it's quite a ways to Sirius. Our best rockets go about 7 miles a second. So it's pretty fast.

168

00:26:21,000 --> 00:26:25,000

But even at that speed, to get to Sirius would take about 200,000 years.

169

00:26:28,000 --> 00:26:34,000

So far, the farthest humans have traveled is the moon, at about 250,000 miles away.

170

00:26:34,000 --> 00:26:39,000

Our next step will be Mars, someday. But even that is a huge, huge stretch for humans.

171

00:26:40,000 --> 00:26:46,000

Six months trip to Mars. And just being able to survive there without oxygen and the things we usually have around us is a huge challenge.

172

00:26:47,000 --> 00:26:52,000

The distances are too vast, and our technology is just nowhere at the level of being able to do that.

173

00:26:54,000 --> 00:27:03,000

We got to the moon. That's as far as we got. That's not to say that another civilization couldn't have done that. It's just on Earth, we just don't have the technology to do that.

174

00:27:04,000 --> 00:27:19,000

What if interstellar distances were too great, even for advanced extraterrestrial beings? Or might their level of technical sophistication be beyond our wildest dreams?

175

00:27:20,000 --> 00:27:31,000

Simply because it is impossible to us, doesn't mean it's impossible for everybody. And definitely when it comes to beings out there who are able to transcend this boundary of time,

176

00:27:31,000 --> 00:27:37,000

it is clear that they are not subject to time in the way we are subject to it.

177

00:27:40,000 --> 00:27:49,000

Do some of the ancient myths and legends provide proof of successful intergalactic time travel? As ancient astronaut theorists believe.

178

00:27:50,000 --> 00:27:59,000

If so, might time travel have allowed passage for alien beings, as well as humans, to and from our world?

179

00:28:00,000 --> 00:28:06,000

Perhaps the answers can be found in a laboratory deep underground in Geneva, Switzerland.

180

00:28:07,000 --> 00:28:25,000

Stores Connecticut, January 2012. In a lab at the University of Connecticut, theoretical physicist Ronald Mallet demonstrates his large-scale model of a time machine.

181

00:28:26,000 --> 00:28:38,000

Using a device called a ring laser that produces a circulating beam of light, the professor hopes to prove that the twisting light actually bends space, forming a loop in time.

182

00:28:39,000 --> 00:28:49,000

Now what's happening here is that these lasers, even though you can't see it, they're actually

creating a circulating pattern of light.

183

00:28:49,000 --> 00:28:57,000

And that circulating pattern of light is actually twisting the empty space in here.

184

00:28:58,000 --> 00:29:04,000

The twisting of space will eventually lead to a twisting of time. In Einstein's theory the two are connected.

185

00:29:04,000 --> 00:29:17,000

And that twisting of time will be where time travel is occurring because if you think of time as being a straight line, then if we twist space, then what will happen eventually is that the space will twist time into a loop.

186

00:29:18,000 --> 00:29:26,000

So breakthrough my work is to use light to manipulate time, and that should allow for the possibility of going back in time using light.

187

00:29:27,000 --> 00:29:43,000

Although this is only a prototype, Mallet believes he may be able to create a working time machine in as little as 10 years.

188

00:29:43,000 --> 00:29:52,000

He believes the energy of the light beams will produce a gravitational field strong enough to drag a spinning neutron through time.

189

00:29:52,000 --> 00:30:03,000

Let's say I'll call the spin up a 1, and I'll call spin down a 0. So imagine I send a stream of neutrons with spin up, spin up, spin down, spin up.

190

00:30:03,000 --> 00:30:13,000

What do you call that? That's binary code. So by using the spin of neutrons I can send a binary code which can be translated into a message.

191

00:30:14,000 --> 00:30:23,000

But could this technology ultimately be able to send larger objects through time, like a person or a spacecraft?

192

00:30:24,000 --> 00:30:32,000

Einstein's theory of relativity allowed for something called the Einstein-Rosen bridge, which is what we today call a wormhole.

193

00:30:32,000 --> 00:30:40,000

It opened up the possibility that we can travel from point A on Earth to point B somewhere else in the universe as if there were nothing in between.

194

00:30:43,000 --> 00:30:56,000

If the possibility exists to travel instantly from one end of the universe to another through wormholes, might there be evidence that such technology was used in the ancient past?

195

00:30:58,000 --> 00:31:05,000

The ancient Egyptians knew about Stargate and wormhole travel. The evidence that I discovered is that the temple of Hathor at Dendera.

196

00:31:05,000 --> 00:31:16,000

When you enter into this temple you look up on the ceiling which is called the astronomical ceiling, and you see the gods as ascended light beings traveling on their ships of eternity.

197

00:31:16,000 --> 00:31:26,000

And it suggests to me that the ancients didn't use the term wormhole for these time travel portals, but were clearly talking about the same thing.

198

00:31:27,000 --> 00:31:39,000

Is it possible, as ancient astronaut theorists believe, that advanced celestial beings traveled in time through wormholes on their way to Earth?

199

00:31:40,000 --> 00:31:50,000

Or might they have possessed an even more advanced time travel technology, perhaps based on the complex science of quantum physics?

200

00:31:51,000 --> 00:31:55,000

Geneva, Switzerland

201

00:31:56,000 --> 00:32:11,000

300 feet underground in a tunnel more than 16 miles in circumference lies the world's greatest particle accelerator, the large Hadron Collider.

202

00:32:12,000 --> 00:32:30,000

Completed in 2008 by the European Organization for Nuclear Research, also known as CERN, the massive international project may allow scientists to solve outstanding scientific mysteries concerning the creation of the universe.

203

00:32:31,000 --> 00:32:40,000

The Large Hadron Collider is a machine we use in science to study how particles smaller than an atom behave.

204

00:32:42,000 --> 00:32:50,000

The Large Hadron Collider is based on the principle of accelerating protons, which are one of the key elements of the nucleus of an atom.

205

00:32:50,000 --> 00:32:59,000

And you want to accelerate them up to very, very high speeds, basically in a circular motion, and collide two beams that are moving in opposite directions.

206

00:33:01,000 --> 00:33:07,000

When you make this collision of the particles, you get a large number of product particles out.

207

00:33:07,000 --> 00:33:17,000

Just like when you collide any two objects, they smash and break into pieces, the protons break into pieces, and it allows us to study the fundamental particles that make up all of matter.

208

00:33:17,000 --> 00:33:39,000

On December 13th, 2011, scientists working with the Large Hadron Collider announced their findings of possible evidence for the existence of the Higgs boson, or what some refer to as the God particle.

209

00:33:40,000 --> 00:33:47,000

The number of physicists have discovered that there is a link between the four forces of nature that we believe exist.

210

00:33:47,000 --> 00:33:59,000

And you might say the glue that holds these together, we believe, is this Higgs particle. It gives particles their mass, and it also is the thing that helps to bind the forces.

211

00:33:59,000 --> 00:34:06,000

So discovering this God particle is a way of understanding the possible unification of the forces of nature.

212

00:34:10,000 --> 00:34:19,000

Some scientists believe the discovery of the so-called God particle may lead to the creation of the Higgs singlet.

213

00:34:21,000 --> 00:34:34,000

A particle believed to possess the ability to jump into another dimension, move forward or backward in time, and appear in the future or past.

214

00:34:35,000 --> 00:34:40,000

In other words, it would make time travel possible.

215

00:34:42,000 --> 00:34:47,000

We live in a three-dimensional world, and sometimes people consider time a fourth dimension.

216

00:34:47,000 --> 00:34:56,000

But some theories in physics, string theory, predict that there are many, many more dimensions, ten or eleven dimensions altogether.

217

00:34:56,000 --> 00:35:00,000

Only these dimensions are not accessible to us, we don't see them.

218

00:35:00,000 --> 00:35:06,000

Now these dimensions are tiny, subatomic, smaller than particles inside of an atom.

219

00:35:06,000 --> 00:35:11,000

And if you could somehow travel along these other dimensions, it would take you somewhere else entirely.

220

00:35:13,000 --> 00:35:19,000

Could other dimensions really exist that we are not yet able to perceive?

221

00:35:20,000 --> 00:35:29,000

If so, might advanced beings from a distant galaxy have already mastered and utilized the God particle to visit Earth?

222

00:35:29,000 --> 00:35:32,000

As ancient astronaut theorists suggest.

223

00:35:34,000 --> 00:35:44,000

If you place a picture side by side of the Hadron Collider and the Aztec calendar, there is an eerie similarity between the two.

224

00:35:45,000 --> 00:35:51,000

The Aztec calendar was known to be a gateway to the universe.

225

00:35:51,000 --> 00:36:01,000

And the Hadron Collider is similar to that because we are trying to unlock the secrets of the universe with this machine.

226

00:36:01,000 --> 00:36:13,000

And I find it fascinating that we have a carving from a long time ago, and when compared to the modern day Hadron Collider, there is an eerie similarity.

227

00:36:13,000 --> 00:36:17,000

Is it coincidence? I think not.

228

00:36:18,000 --> 00:36:23,000

Did ancient man really make contact with early time travelers?

229

00:36:24,000 --> 00:36:29,000

And are humans on the verge of discovering that same incredible ability?

230

00:36:29,000 --> 00:36:32,000

Perhaps further evidence can be found.

231

00:36:32,000 --> 00:36:42,000

Evidence that ancient aliens may not have come from distant galaxies, but from our own future.

232

00:36:48,000 --> 00:37:06,000

Ever since the infamous UFO incident of 1947 in Roswell, New Mexico, there have been thousands of reports of extraterrestrial sightings and even first-hand accounts of alien abductions.

233

00:37:07,000 --> 00:37:19,000

Described as humanoids with large heads and small bodies, researchers believe these beings might, in fact, be an alien species that some call the grays.

234

00:37:21,000 --> 00:37:30,000

These aliens look not too dissimilar from us. They have heads, they have hands, they have two arms, two legs, two eyes, a nose, a rudimentary mouth.

235

00:37:30,000 --> 00:37:42,000

They certainly, in their descriptions, appear to be pretty close to us, or what they kind of look like is very, very early science fiction concepts of how the human race would eventually evolve over the eons.

236

00:37:44,000 --> 00:37:56,000

If you look at the extraterrestrials that are described, the grays that are related to the Roswell incident, you'll see that their forms, in many ways, resemble what we might project or predict.

237

00:37:56,000 --> 00:38:01,000

That we could look like in the future if we became a space-faring race.

238

00:38:07,000 --> 00:38:15,000

The Roswell crash in New Mexico, in fact, happened coincidentally close to the birthday of the Egyptian goddess Isis.

239

00:38:15,000 --> 00:38:39,000

So you have to wonder too if these so-called alien bodies that were allegedly found at the Roswell crash with thin bodies and big heads, if they weren't some kind of time-traveling extraterrestrials.

240

00:38:45,000 --> 00:38:58,000

Is it possible the beings believed to have been recovered at Roswell traveled here from the star Sirius, just like the Egyptian goddess Isis, as some ancient astronaut theorists believe?

241

00:39:02,000 --> 00:39:08,000

And might they be coming here using advanced expertise in space-time technology?

242

00:39:09,000 --> 00:39:26,000

I would think that it's quite possible that the alien visitors, if they're proved to be the way we think they are, that they're using certain forms of teleportation perhaps, or certainly they have propulsion devices that kind of approach the speed of light.

243

00:39:27,000 --> 00:39:50,000

What we do know is that the physics of our planet, quantum physics and string theory, have moved the ball so much further that it was in the last century to say there are no mathematical restrictions on time-travel to the future or to the past.

244

00:39:51,000 --> 00:40:03,000

And that once you know that the physics community is saying there are no restrictions, it's just us finding out how do we do this?

245

00:40:04,000 --> 00:40:15,000

Time-travel is basically the same as teleportation. We could go from place to place on Earth in a matter of milliseconds.

246

00:40:16,000 --> 00:40:29,000

This would revolutionize all kinds of travel at the same time, our connections between us and any

other civilization, and including civilizations on other planets as well.

247

00:40:30,000 --> 00:40:50,000

But just who really are these otherworldly creatures called the grays? Is it possible they came to Earth not from outer space, but from the future, or the past? Or might they actually be human time-travelers?

248

00:40:51,000 --> 00:41:02,000

They are very serious as to what the grays are. There are stories that they are beings which have been around since time immemorial and are still around.

249

00:41:04,000 --> 00:41:14,000

But there are also encounters which people have had, and in doing these encounters it has been said that really the grays are us from the future.

250

00:41:15,000 --> 00:41:34,000

And that they really have traveled back in time because somehow we have genetically created a situation whereby the grays are no longer able to procreate, then that they have to therefore come back to our times to sort of remedy the situation.

251

00:41:34,000 --> 00:41:48,000

People back in the 60s and 70s kind of speculated what would human beings look like in a thousand years or two thousand years.

252

00:41:48,000 --> 00:41:53,000

And the idea was that we would expand our intellectual knowledge so our brains would get bigger.

253

00:41:53,000 --> 00:42:00,000

And we'd have machinery that would basically do all the physical tasks for us that we do with our hands now.

254

00:42:00,000 --> 00:42:03,000

We really would become almost physically inert beings.

255

00:42:06,000 --> 00:42:13,000

And if you look at those early concepts of the future of the human race, they kind of look like the standard traditional grey alien, the Roswell alien.

256

00:42:20,000 --> 00:42:26,000

I rather am a believer in time travel. I say nothing will be impossible for us in the future.

257

00:42:26,000 --> 00:42:30,000

Even if you think it's completely crazy, it will happen.

258

00:42:32,000 --> 00:42:39,000

Whatever humans are able to think, to calculate, even to fantasies, will one day become reality.

259

00:42:41,000 --> 00:42:45,000

Sometimes I ask myself if UFOs are not time travelers.

260

00:42:47,000 --> 00:42:52,000

It's our own people of the future.

261

00:42:53,000 --> 00:43:05,000

Considering the scientific advancements from the last century alone, might it be possible future humans have discovered the ability to travel in time?

262

00:43:05,000 --> 00:43:15,000

As some ancient astronaut theorists believe, are they in fact the so-called visitors that have been recorded throughout the centuries?

263

00:43:16,000 --> 00:43:23,000

Or are they otherworldly aliens who have mastered travel through both time and space?

264

00:43:24,000 --> 00:43:32,000

Perhaps the answers can be found, not in the here and now, but in another place and time.
