

1

00:00:00,000 --> 00:00:03,000

A 2,000 year old computer.

2

00:00:03,000 --> 00:00:06,000

It had more complicated inner workings

3

00:00:06,000 --> 00:00:08,000

than a modern day Swiss watch.

4

00:00:08,000 --> 00:00:11,000

Giant power plants.

5

00:00:11,000 --> 00:00:14,000

It's very strange, but it's clearly a battery.

6

00:00:14,000 --> 00:00:19,000

And weapons, more powerful than anything that exists today.

7

00:00:19,000 --> 00:00:24,000

It roared and then flashes of fire came out of it.

8

00:00:24,000 --> 00:00:28,000

Throughout the world, there are artifacts and stories

9

00:00:28,000 --> 00:00:32,000

that point to advanced technology in the distant past.

10

00:00:32,000 --> 00:00:37,000

Could these be products of our ancestors' imaginations?

11

00:00:37,000 --> 00:00:41,000

Or might there be a more profound explanation?

12

00:00:41,000 --> 00:00:47,000

It sounds fantastic to us that they could have had some kind of alien technology.

13

00:00:47,000 --> 00:00:50,000

It's clearly what they're describing.

14

00:00:50,000 --> 00:00:55,000

Millions of people around the world believe we have been visited in the past

15

00:00:55,000 --> 00:00:58,000

by extraterrestrial beings.

16

00:00:58,000 --> 00:01:01,000

What if it were true?

17

00:01:01,000 --> 00:01:06,000

Did ancient aliens really help to shape our history?

18

00:01:06,000 --> 00:01:13,000

And if so, might we find proof by examining mysterious devices?

19

00:01:25,000 --> 00:01:32,000

The Geese and Necropolis, Egypt, 1993

20

00:01:32,000 --> 00:01:46,000

A team of engineers,

21

00:01:46,000 --> 00:01:51,000

uses a remotely operated camera in an attempt to discover the true function

22

00:01:51,000 --> 00:01:54,000

of what is believed to be an air shaft,

23

00:01:54,000 --> 00:01:58,000

leading from the supposed Queen's Chamber of the Great Pyramid.

24

00:01:58,000 --> 00:02:02,000

First discovered in 1872,

25

00:02:02,000 --> 00:02:07,000

archaeologists long considered these narrow tunnels to be ventilation ducts.

26

00:02:07,000 --> 00:02:10,000

The first to be discovered in 1872,

27

00:02:10,000 --> 00:02:15,000

archaeologists long considered these narrow tunnels to be ventilation ducts.

28

00:02:15,000 --> 00:02:18,000

This robot traveled up this small shaft,

29

00:02:18,000 --> 00:02:23,000

which was too small for a human or any type of device to go through.

30

00:02:23,000 --> 00:02:26,000

And all of a sudden it finds a closed door,

31

00:02:26,000 --> 00:02:30,000

hinged by two little metal clamps.

32

00:02:30,000 --> 00:02:33,000

According to mainstream archaeologists,

33

00:02:33,000 --> 00:02:38,000

the door and metal handles were intentionally built as a symbolic passageway

34

00:02:38,000 --> 00:02:42,000

that the Queen would travel through to the afterlife.

35

00:02:43,000 --> 00:02:47,000

But some researchers have questioned

36

00:02:47,000 --> 00:02:52,000

why this passageway would have been designed with a deliberate blockage.

37

00:02:52,000 --> 00:02:58,000

And why, on a plateau filled with monumental pyramids

38

00:02:58,000 --> 00:03:01,000

believed to serve as royal tombs,

39

00:03:01,000 --> 00:03:05,000

is the Great Pyramid the only one with such a door?

40

00:03:05,000 --> 00:03:09,000

Egyptologists are very much fond of saying that

41

00:03:09,000 --> 00:03:14,000

pyramids are tombs and that they have been robbed at some point in the past.

42

00:03:14,000 --> 00:03:18,000

But the fact is that we have found in the 20th century

43

00:03:18,000 --> 00:03:24,000

a number of pyramids whose central King's Chamber, so to speak, is intact.

44

00:03:24,000 --> 00:03:26,000

And when they opened to sarcophagus,

45

00:03:26,000 --> 00:03:30,000

they found that sarcophagus to be empty as well.

46

00:03:31,000 --> 00:03:34,000

If the Great Pyramid was not a tomb,

47

00:03:34,000 --> 00:03:37,000

what may have been its true purpose?

48

00:03:38,000 --> 00:03:43,000

In May 2011, another team of researchers set out to further explore

49

00:03:43,000 --> 00:03:46,000

the blocked air shaft in the Queen's Chamber.

50

00:03:46,000 --> 00:03:49,000

This time, the crew used a robot,

51

00:03:49,000 --> 00:03:52,000

equipped with a micro snake camera,

52

00:03:52,000 --> 00:03:56,000

to slip through a hole and reveal what was beyond the door.

53

00:03:56,000 --> 00:03:59,000

When they actually penetrated this small door,

54

00:03:59,000 --> 00:04:02,000

they found a hidden room within the pyramid.

55

00:04:02,000 --> 00:04:06,000

What they found was copper fittings, or the metal fittings.

56

00:04:06,000 --> 00:04:10,000

Another feature of the back of these metal fittings

57

00:04:10,000 --> 00:04:16,000

was that on one side, the loop looked like it was corroded.

58

00:04:18,000 --> 00:04:22,000

The camera also looked down and scanned the floor.

59

00:04:22,000 --> 00:04:25,000

What we saw was red markings.

60

00:04:25,000 --> 00:04:29,000

My interpretation of the picture was that the camera

61

00:04:29,000 --> 00:04:31,000

was red of markings.

62

00:04:31,000 --> 00:04:35,000

My interpretation of those were electrical symbols.

63

00:04:35,000 --> 00:04:37,000

But why were they there?

64

00:04:38,000 --> 00:04:41,000

Could these artifacts be actual evidence

65

00:04:41,000 --> 00:04:45,000

that electricity once coursed through the structure?

66

00:04:47,000 --> 00:04:51,000

And if so, could the Great Pyramid of Giza

67

00:04:51,000 --> 00:04:54,000

have been built to serve as not a royal tomb,

68

00:04:54,000 --> 00:04:58,000

but a power plant, as some researchers contend?

69

00:04:58,000 --> 00:05:04,000

If we dismiss the tomb theory and we look at the pyramid itself,

70

00:05:04,000 --> 00:05:08,000

we see something that modern engineers

71

00:05:08,000 --> 00:05:11,000

can really tune into and understand.

72

00:05:12,000 --> 00:05:16,000

What we have is a very, very precise building

73

00:05:16,000 --> 00:05:20,000

that has the precision of a fraction of an inch.

74

00:05:20,000 --> 00:05:23,000

It's something that is very noteworthy

75

00:05:23,000 --> 00:05:27,000

and not indicative of a simple agrarian culture.

76

00:05:28,000 --> 00:05:32,000

So what we have is something that is almost like a machine.

77

00:05:33,000 --> 00:05:36,000

If the Great Pyramid was a sophisticated machine,

78

00:05:36,000 --> 00:05:39,000

potentially capable of creating energy,

79

00:05:39,000 --> 00:05:42,000

how could it have worked?

80

00:05:43,000 --> 00:05:46,000

Some researchers believe clues can be found

81

00:05:46,000 --> 00:05:49,000

by exploring underneath the structure.

82

00:05:51,000 --> 00:05:55,000

In 2000, maritime engineer John Cadman

83

00:05:55,000 --> 00:05:58,000

proposed a theory that the Egyptians pumped water

84

00:05:58,000 --> 00:06:01,000

from the nearby Nile River

85

00:06:01,000 --> 00:06:05,000

into a small chamber underneath the Great Pyramid.

86

00:06:06,000 --> 00:06:10,000

The pump could then create intense hydraulic pressure

87

00:06:10,000 --> 00:06:14,000

that would cause the entire pyramid to vibrate.

88

00:06:18,000 --> 00:06:21,000

In the subterranean chamber, there is some evidence

89

00:06:21,000 --> 00:06:24,000

that shows that there had been water present in it

90

00:06:24,000 --> 00:06:28,000

that had been water erosion on the floor

91

00:06:28,000 --> 00:06:31,000

and then up in the fin area

92

00:06:31,000 --> 00:06:35,000

and then also because it was a hydraulic pulse generator.

93

00:06:36,000 --> 00:06:39,000

They have a rarefaction wave,

94

00:06:39,000 --> 00:06:41,000

extremely low pressure wave,

95

00:06:41,000 --> 00:06:43,000

which would have struck the ceiling

96

00:06:43,000 --> 00:06:45,000

and the ceiling is actually chipped.

97

00:06:45,000 --> 00:06:49,000

And that would have been from the actual compression waves

98

00:06:49,000 --> 00:06:52,000

hitting the ceiling. That's very evident.

99

00:06:54,000 --> 00:06:57,000

If Cadman's theory proves true,

100

00:06:57,000 --> 00:07:00,000

what would have been the purpose of the hydraulic pulse?

101

00:07:00,000 --> 00:07:04,000

Engineer Chris Dunn believes the answer can be found

102

00:07:04,000 --> 00:07:07,000

by further examination of the shafts

103

00:07:07,000 --> 00:07:10,000

in what some call the Queen's Chamber,

104

00:07:10,000 --> 00:07:14,000

where traces of zinc and hydrochloric acid

105

00:07:14,000 --> 00:07:16,000

have been discovered.

106

00:07:17,000 --> 00:07:20,000

I believe the chemical coming in through the northern shaft

107

00:07:20,000 --> 00:07:22,000

was hydrated zinc

108

00:07:22,000 --> 00:07:25,000

and the other chemical coming through the southern shaft

109

00:07:25,000 --> 00:07:30,000

and into the chamber was dilute hydrochloric acid.

110

00:07:31,000 --> 00:07:34,000

These are actually seen on the chamber walls.

111

00:07:35,000 --> 00:07:39,000

Dunn suggests that the two chemicals were poured down

112

00:07:39,000 --> 00:07:41,000

through the shafts and then mixed together

113

00:07:41,000 --> 00:07:45,000

inside the Queen's Chamber, triggering combustion.

114

00:07:45,000 --> 00:07:49,000

This vessel represents the Queen's Chamber.

115

00:07:49,000 --> 00:07:53,000

Into the tubes, we're going to pour hydrated zinc

116

00:07:53,000 --> 00:07:57,000

and then hydrochloric acid.

117

00:07:57,000 --> 00:08:00,000

When you bring these two liquids together

118

00:08:00,000 --> 00:08:03,000

and a chemical reaction occurs,

119

00:08:03,000 --> 00:08:08,000

and a product of that chemical reaction is hydrogen.

120

00:08:08,000 --> 00:08:11,000

And you can see the vapor, the hydrogen,

121

00:08:11,000 --> 00:08:15,000

escaping through the chimney.

122

00:08:15,000 --> 00:08:17,000

And there you have the reaction.

123

00:08:19,000 --> 00:08:21,000

Dunn speculates that the hydrogen gas

124

00:08:21,000 --> 00:08:25,000

traveled from the Queen's Chamber into the King's Chamber.

125

00:08:27,000 --> 00:08:31,000

Then, the vibrations from the subterranean pool

126

00:08:31,000 --> 00:08:35,000

energize the hydrogen atoms into a microwave energy beam.

127

00:08:35,000 --> 00:08:39,000

The evidence that indicates the use of hydrogen

128

00:08:39,000 --> 00:08:41,000

can be found in the King's Chamber.

129

00:08:43,000 --> 00:08:47,000

There is a shaft in the King's Chamber

130

00:08:47,000 --> 00:08:51,000

as dimensions of 8.4 by 4.8,

131

00:08:51,000 --> 00:08:54,000

which would be suitable for a waveguide

132

00:08:54,000 --> 00:08:58,000

for a maser or microwave amplification

133

00:08:58,000 --> 00:09:01,000

of the hydrogen gas.

134

00:09:01,000 --> 00:09:05,000

And from there, we can actually propose

135

00:09:05,000 --> 00:09:08,000

many different ideas of what they did with it.

136

00:09:08,000 --> 00:09:10,000

The ancient Egyptians demonstrated

137

00:09:10,000 --> 00:09:13,000

an exceptional level of skill

138

00:09:13,000 --> 00:09:16,000

in everything that they created during the Old Kingdom,

139

00:09:16,000 --> 00:09:20,000

but the question remains, did they do it on their own?

140

00:09:20,000 --> 00:09:24,000

Or did they have some access to information

141

00:09:24,000 --> 00:09:28,000

or to the information that they had in the King's Chamber?

142

00:09:28,000 --> 00:09:32,000

Or did they have some access to information or technology

143

00:09:32,000 --> 00:09:35,000

that was not of this Earth?

144

00:09:37,000 --> 00:09:40,000

If Giza was, in fact, a power plant,

145

00:09:40,000 --> 00:09:44,000

could the energy have been used for some other worldly purpose,

146

00:09:44,000 --> 00:09:48,000

as some ancient astronaut theorists suggest?

147

00:09:49,000 --> 00:09:52,000

Perhaps further evidence that advanced technology

148

00:09:52,000 --> 00:09:56,000

really did exist on Earth thousands of years ago

149

00:09:56,000 --> 00:10:01,000

can be found by examining yet another mysterious device,

150

00:10:01,000 --> 00:10:04,000

the Ark of the Covenant.

151

00:10:11,000 --> 00:10:15,000

Approximately 17 miles northeast of Jerusalem

152

00:10:15,000 --> 00:10:19,000

lies the ancient ruins of the city of Jericho.

153

00:10:19,000 --> 00:10:23,000

Here, archaeologists have uncovered evidence

154

00:10:23,000 --> 00:10:27,000

of settlements dating back to 9,000 B.C.

155

00:10:27,000 --> 00:10:29,000

According to the Hebrew Bible,

156

00:10:29,000 --> 00:10:33,000

Jericho is believed to be where God spoke to Joshua,

157

00:10:33,000 --> 00:10:35,000

the successor to Moses,

158

00:10:35,000 --> 00:10:39,000

and instructed him to march around the walled city

159

00:10:39,000 --> 00:10:44,000

once every six days with seven priests carrying rams horns

160

00:10:44,000 --> 00:10:47,000

and followed by the Ark of the Covenant,

161

00:10:47,000 --> 00:10:51,000

the golden chest containing the Ten Commandments.

162

00:10:52,000 --> 00:10:56,000

Then, on the seventh day, under orders by God,

163

00:10:56,000 --> 00:11:00,000

Joshua and the Israelites marched around the perimeter of the city

164

00:11:00,000 --> 00:11:02,000

one last time.

165

00:11:03,000 --> 00:11:07,000

But this time, they blew the rams horns.

166

00:11:08,000 --> 00:11:11,000

The walls of Jericho fell

167

00:11:12,000 --> 00:11:15,000

and the city was sacked.

168

00:11:16,000 --> 00:11:21,000

In the Old Testament, you see very clear descriptions

169

00:11:21,000 --> 00:11:24,000

in Joshua 6 about the shofar,

170

00:11:24,000 --> 00:11:28,000

which is described as a trumpet that was used in the battle of Jericho

171

00:11:28,000 --> 00:11:31,000

to actually bring the walls down.

172

00:11:34,000 --> 00:11:39,000

To religious scholars, the collapse of Jericho's walls was a miracle.

173

00:11:39,000 --> 00:11:42,000

To most modern-day scientists and historians,

174

00:11:42,000 --> 00:11:46,000

the destruction was most probably caused by an earthquake.

175

00:11:46,000 --> 00:11:50,000

But could it have been something else?

176

00:11:50,000 --> 00:11:55,000

Could the Israelites have possessed advanced sound wave technology?

177

00:11:55,000 --> 00:11:58,000

If so, where did it come from?

178

00:11:58,000 --> 00:12:01,000

In the scriptures, we have a fascinating story

179

00:12:01,000 --> 00:12:04,000

about the fall of the walls of Jericho.

180

00:12:04,000 --> 00:12:07,000

Armies were told to circle the wall repeatedly

181

00:12:07,000 --> 00:12:11,000

and then finally blow their horns and down came the walls.

182

00:12:12,000 --> 00:12:16,000

And we know there was a powerful presence, the Ark of the Covenant.

183

00:12:16,000 --> 00:12:20,000

This mysterious sacred item was with them at all times,

184

00:12:20,000 --> 00:12:25,000

which of course was part of the event and part of the fall of the walls of Jericho.

185

00:12:27,000 --> 00:12:32,000

The idea that some kind of sonic weapon

186

00:12:32,000 --> 00:12:36,000

was used to destroy these huge, thick ancient walls

187

00:12:36,000 --> 00:12:41,000

to allow the Israelites to basically take over that city is a fascinating one.

188

00:12:41,000 --> 00:12:44,000

So what kind of technology were they using?

189

00:12:44,000 --> 00:12:48,000

It sounds utterly fantastic to us

190

00:12:48,000 --> 00:12:52,000

that they could have had some kind of advanced alien technology.

191

00:12:52,000 --> 00:12:55,000

It's clearly what they're describing.

192

00:12:56,000 --> 00:13:01,000

There is little doubt that the Ark of the Covenant was a weapon.

193

00:13:01,000 --> 00:13:08,000

It was described as a weapon famously when the Israelites crossed over into Canaan.

194

00:13:09,000 --> 00:13:12,000

They had to pass by Jericho,

195

00:13:12,000 --> 00:13:16,000

and it could be that there was some technology.

196

00:13:19,000 --> 00:13:22,000

According to many ancient astronaut theorists,

197

00:13:22,000 --> 00:13:28,000

Moses and the Israelites acquired a supernatural source of energy at Mount Sinai.

198

00:13:29,000 --> 00:13:34,000

This powerful energy source was later contained in the Ark of the Covenant

199

00:13:34,000 --> 00:13:39,000

and would have provided the kind of power necessary to amplify Joshua's horns

200

00:13:39,000 --> 00:13:43,000

and make them into a powerful sonic weapon.

201

00:13:44,000 --> 00:13:49,000

The Ark of the Covenant appears to be some sort of advanced technology.

202

00:13:49,000 --> 00:13:54,000

What's interesting about the battle of Jericho is that this particular use of the shofar

203

00:13:54,000 --> 00:14:00,000

clearly seems to be the same thing that we're seeing with particle beam technology,

204

00:14:00,000 --> 00:14:04,000

death ray technology, thunderbolt technology.

205

00:14:04,000 --> 00:14:08,000

It very clearly seems that once again we have an extraterrestrial technology

206

00:14:08,000 --> 00:14:15,000

that the ancient people had at the ready that they could use when needed for military campaigns.

207

00:14:18,000 --> 00:14:24,000

But even if the Israelites possessed some sort of advanced extraterrestrial technology,

208

00:14:24,000 --> 00:14:30,000

could the amplified sound of ram's horns really bring down stone walls?

209

00:14:31,000 --> 00:14:36,000

According to scientists and former astronaut Professor Taylor Wang,

210

00:14:36,000 --> 00:14:43,000

recent research into the field of physical acoustics suggests it is a distinct possibility.

211

00:14:44,000 --> 00:14:48,000

Jericho wall breaking apart, if you said it has happened,

212

00:14:48,000 --> 00:14:51,000

caused by acoustic, caused by sound.

213

00:14:52,000 --> 00:14:58,000

Well, what possibility has to be somehow a resonance is built in that wall.

214

00:14:58,000 --> 00:15:01,000

It may not be the whole wall, maybe some of the structural material.

215

00:15:01,000 --> 00:15:05,000

When the resonance happens, amplitude gets larger and up.

216

00:15:05,000 --> 00:15:12,000

Yes, it could destroy almost anything because what the resonance does is store enormous amount of energy.

217

00:15:12,000 --> 00:15:16,000

So you keep on feeding it, eventually it shatters everything.

218

00:15:17,000 --> 00:15:21,000

When you want to know how powerful sound is,

219

00:15:21,000 --> 00:15:24,000

you have to realize that the basic thing that sound is is a pressure wave.

220

00:15:24,000 --> 00:15:28,000

And it will come down to the amount of energy you put into your sound wave.

221

00:15:28,000 --> 00:15:32,000

And whether or not that particular pressure wave you generate

222

00:15:32,000 --> 00:15:36,000

will couple or impact the thing you're trying to destroy.

223

00:15:39,000 --> 00:15:42,000

You can make it quite powerful because you can make a very high amplitude,

224

00:15:42,000 --> 00:15:44,000

very large pressures in the sound.

225

00:15:44,000 --> 00:15:47,000

It might be at a frequency or amplitude where we no longer hear it as sound,

226

00:15:47,000 --> 00:15:51,000

but from a physics point of view it is still sound because it's a pressure wave in the air.

227

00:15:51,000 --> 00:15:54,000

So it can get quite destructive if you put enough energy into it.

228

00:15:58,000 --> 00:16:02,000

You could also think of it as a particle weapon because you're moving air around

229

00:16:02,000 --> 00:16:05,000

and you would just need something to focus the sound, which we know how to do.

230

00:16:05,000 --> 00:16:08,000

And so that would give you a directed energy beam with sound.

231

00:16:09,000 --> 00:16:14,000

Did advanced extraterrestrial technology really help the Israelites

232

00:16:14,000 --> 00:16:19,000

survive their exodus in the desert, as the Hebrew Bible contends?

233

00:16:19,000 --> 00:16:27,000

And if so, might early humans have possessed other equally astounding technological devices?

234

00:16:27,000 --> 00:16:32,000

Ancient astronaut theorists say yes and believe further clues can be found

235

00:16:32,000 --> 00:16:37,000

by examining an object that dates back to the second century BC,

236

00:16:37,000 --> 00:16:41,000

one that functioned as a computer.

237

00:16:47,000 --> 00:16:53,000

Did aliens really inspire our ancestors to build ancient temples and pyramids?

238

00:16:53,000 --> 00:16:58,000

And if they came here, did they leave behind any advanced knowledge of physics,

239

00:16:58,000 --> 00:17:01,000

astronomy, or mathematics?

240

00:17:01,000 --> 00:17:06,000

If so, is there any evidence that remains to this day?

241

00:17:06,000 --> 00:17:12,000

One example might be this one, often described as the world's first mechanical computer.

242

00:17:12,000 --> 00:17:16,000

It dates back over 2,000 years.

243

00:17:16,000 --> 00:17:22,000

The Antikythera device was found in 1900 by sponge divers

244

00:17:22,000 --> 00:17:27,000

diving off a small island in the Aegean called Antikythera.

245

00:17:27,000 --> 00:17:34,000

There was a shipwreck there, and in it was a coral encrusted box,

246

00:17:34,000 --> 00:17:37,000

and it was made of metal alloys.

247

00:17:37,000 --> 00:17:42,000

And it then went to the Athens Museum, where a good 50 years later,

248

00:17:42,000 --> 00:17:48,000

they were able to x-ray this box, and they were able to discern

249

00:17:48,000 --> 00:17:55,000

cogged wheels that were interconnected and give us a very good depiction

250

00:17:55,000 --> 00:17:59,000

of what this thing was, and it is a computer.

251

00:17:59,000 --> 00:18:02,000

It's a really sophisticated machine.

252

00:18:06,000 --> 00:18:10,000

It's a very interesting piece of technology because it serves two purposes.

253

00:18:10,000 --> 00:18:15,000

One was that it was an astronomical device where you could, by using it,

254

00:18:15,000 --> 00:18:18,000

chart your position to the stars and navigate your way through the seas.

255

00:18:18,000 --> 00:18:22,000

It was also an astrological device so that someone could tell you,

256

00:18:22,000 --> 00:18:26,000

ah, if you were born on this date and your planet sign is this,

257

00:18:26,000 --> 00:18:30,000

then certain things are going to happen to you when the planets are in this alignment.

258

00:18:30,000 --> 00:18:35,000

So it was a very interesting piece of technology that literally had

259

00:18:35,000 --> 00:18:40,000

more complicated gears and inner workings than a modern day Swiss watch.

260

00:18:40,000 --> 00:18:43,000

And it's found to be dated, I think, like 200 BC,

261

00:18:43,000 --> 00:18:46,000

so it's really an anomaly as to who could have created that

262

00:18:46,000 --> 00:18:48,000

and what it was being used for.

263

00:18:49,000 --> 00:18:56,000

When archaeologists first started to examine this thing in the 1950s,

264

00:18:56,000 --> 00:19:03,000

they said that they never could conceive of the ancient Greeks having such complicated machinery.

265

00:19:03,000 --> 00:19:09,000

And in fact, they said this was tantamount to finding a jet airplane in the tomb of King Tut.

266

00:19:19,000 --> 00:19:22,000

Even older than the Antikythera mechanism,

267

00:19:22,000 --> 00:19:27,000

are these carvings on a wall at the Dendera Temple complex in Egypt?

268

00:19:27,000 --> 00:19:35,000

To some, the strange designs look eerily similar to objects very much in use today.

269

00:19:35,000 --> 00:19:42,000

In Egypt, there is this underground crypt at Dendera that was always secret,

270

00:19:42,000 --> 00:19:47,000

and only the high priests had access to that crypt.

271

00:19:47,000 --> 00:19:51,000

It's very hot in there, very narrow, low ceiling,

272

00:19:51,000 --> 00:19:59,000

and on the walls you have these reliefs of what looks like ancient light bulbs.

273

00:19:59,000 --> 00:20:03,000

Because we have to question one thing,

274

00:20:03,000 --> 00:20:08,000

how did the ancient Egyptians light the inside of their tombs?

275

00:20:11,000 --> 00:20:14,000

According to most mainstream archaeologists,

276

00:20:14,000 --> 00:20:20,000

torches were used by the ancient Egyptians to light the pitch black chambers of tombs and temples.

277

00:20:20,000 --> 00:20:26,000

Yet nowhere on the ceilings is there even the slightest evidence of soot or smoke residue.

278

00:20:28,000 --> 00:20:37,000

There isn't enough oxygen inside those tombs with which to support or feed a flame of a torch.

279

00:20:37,000 --> 00:20:43,000

The only remaining solution is by some sort of an artificial light source.

280

00:20:43,000 --> 00:20:48,000

And that is, for example, a light bulb.

281

00:20:48,000 --> 00:20:56,000

So, as an underground crypt at Dendera, we find reliefs of such light bulbs?

282

00:20:57,000 --> 00:21:04,000

But how could the ancient Egyptians have used anything resembling a modern day light bulb without access to electricity?

283

00:21:05,000 --> 00:21:10,000

After all, electricity wouldn't be discovered for thousands of years.

284

00:21:10,000 --> 00:21:16,000

That is, of course, with the exception of what scientists call the Baghdad Battery.

285

00:21:16,000 --> 00:21:19,000

The Baghdad Battery was discovered in ancient Iraq.

286

00:21:19,000 --> 00:21:24,000

Scholars today say there's no way that ancient man was using electricity or light bulbs.

287

00:21:24,000 --> 00:21:29,000

So they look at this Baghdad Battery and there's about a dozen of them that have been found in Iraq.

288

00:21:29,000 --> 00:21:33,000

And the only mainstream theory is that they were using it for electroplating jewelry.

289

00:21:34,000 --> 00:21:40,000

Two major proponents of ancient alien theory, Jason Martel and Georgiosucholos,

290

00:21:40,000 --> 00:21:48,000

demonstrate just how the Baghdad Battery could generate electricity using a modern mock-up of the device.

291

00:21:48,000 --> 00:21:51,000

Well, basically this is made out of a clay pot.

292

00:21:51,000 --> 00:21:54,000

Clay just found naturally in that region in southern Iraq.

293

00:21:54,000 --> 00:22:01,000

And then they would use a small copper lining and something along the lines of an asphalt stopper wrapped around an iron rod.

294

00:22:01,000 --> 00:22:09,000

And these all applied together, and the combination of some weak acidic acid, vinegar, grape juice, orange juice, in this case wine,

295

00:22:09,000 --> 00:22:14,000

would be able to generate a charge by combining these elements with the iron rod and the copper.

296

00:22:14,000 --> 00:22:18,000

And the combination of that creates an abundance of electricity.

297

00:22:18,000 --> 00:22:23,000

So what we're going to do is basically just fill the clay pot with some orange juice here.

298

00:22:23,000 --> 00:22:25,000

I'll try not to spill it too much.

299

00:22:25,000 --> 00:22:29,000

And then we'll go ahead and put the copper rod back in there, copper and iron rod.

300

00:22:29,000 --> 00:22:32,000

We'll give it a moment to kind of fill that copper area there.

301

00:22:32,000 --> 00:22:40,000

And then by turning on the voltmeter and applying this to each side, we should be able to generate a charge.

302

00:22:42,000 --> 00:22:44,000

And there it goes, into the positive.

303

00:22:44,000 --> 00:22:54,000

And if we give it some time to get the electrolytes really buzzing in there, you'll see that this volt will actually continue to rise.

304

00:22:55,000 --> 00:23:02,000

It is a battery. Everybody agrees with that, but nobody knows why they made it and how they made it.

305

00:23:02,000 --> 00:23:04,000

What mind would think of that?

306

00:23:04,000 --> 00:23:11,000

You know, electrical current that several thousand years ago, it's very strange, but it's clearly a battery.

307

00:23:11,000 --> 00:23:21,000

The whole idea that ancient civilizations actually had knowledge of electricity and used electricity is an accepted archaeological fact today.

308

00:23:21,000 --> 00:23:32,000

Just like in our own civilization where about 200 years ago Benjamin Franklin and other scientists began experimenting with simple electrical devices,

309

00:23:32,000 --> 00:23:40,000

we now have evidence that over 3,000 years ago people were also experimenting with electrical devices.

310

00:23:40,000 --> 00:23:45,000

Where might it have led them? What other electrical devices would they have been able to create?

311

00:23:45,000 --> 00:23:52,000

I believe they probably created all kinds of electrical devices.

312

00:23:52,000 --> 00:24:03,000

Are the Antikythera device and the Baghdad battery evidence that our ancestors really were in possession of advanced technology?

313

00:24:03,000 --> 00:24:09,000

And if so, might this technology have had extraterrestrial origins?

314

00:24:09,000 --> 00:24:21,000

Ancient astronaut theorists believe further clues may be found in the story of a top secret Nazi project simply known as the Bell.

315

00:24:23,000 --> 00:24:38,000

In a remote valley just outside Ljubljana, Ljubljana, Poland stands a strange circular structure known as the Henge or Flytrap.

316

00:24:40,000 --> 00:24:53,000

We are in the middle of a valley which was taken over by the SS and transformed into a secret research, development and industrial facility.

317

00:24:53,000 --> 00:24:55,000

It was closely guarded.

318

00:24:57,000 --> 00:25:04,000

Inside of this valley we have three security rings closing specific areas from each other.

319

00:25:05,000 --> 00:25:12,000

Inside of the innermost circle this structure stands and it's quite mysterious.

320

00:25:15,000 --> 00:25:23,000

Mainstream scholars believe the structure served as the concrete support base to a cooling tower used by a coal mine.

321

00:25:24,000 --> 00:25:32,000

But according to Wittkowski and others, the German high command would not have devoted so many military resources here

322

00:25:32,000 --> 00:25:36,000

if the valley contained only an energy plant.

323

00:25:37,000 --> 00:25:46,000

They say the Henge was used to test a new highly advanced machine known as Deglaka or the Bell.

324

00:25:46,000 --> 00:25:54,000

The Bell Deglaka was probably one of the top secret projects of the Third Reich.

325

00:25:54,000 --> 00:25:58,000

It was so secret that it's even unclear on how much Hitler was told.

326

00:25:59,000 --> 00:26:15,000

There's a great deal of evidence that suggests that the scientists including Hermann Oberthen, Werner von Braun and others were working on a bell shaped craft that was electromagnetic in its propulsion system.

327

00:26:16,000 --> 00:26:31,000

Surviving sketches depict the bell as having a ceramic covering and dimensions measuring 10 feet high and 5 feet in diameter.

328

00:26:31,000 --> 00:26:36,000

Its design appears contrary to modern aerodynamic principles.

329

00:26:37,000 --> 00:26:47,000

If you're starting to think about a bell shaped for flight, the challenge you're facing I think is making it aerodynamic when you move around side to side and forward and backward.

330

00:26:47,000 --> 00:26:54,000

Because you're presenting a very large cross-sectional area to the air and you're going to generate a lot of drag.

331

00:26:54,000 --> 00:27:01,000

So you might be very good if you wanted just like a hovercraft that went up and down, but once you start moving I think you're going to run into trouble.

332

00:27:01,000 --> 00:27:07,000

But if the bell was not a new type of aircraft, then what was it?

333

00:27:07,000 --> 00:27:14,000

According to some ancient astronaut theorists, the bell may have been a time machine.

334

00:27:14,000 --> 00:27:22,000

There is a kind of vortices named solitons which vortices isolated electromagnetically from the outside world.

335

00:27:22,000 --> 00:27:34,000

Recent research and experiments show that the link between gravity and electromagnetic physics is much stronger than the scientists out for some time.

336

00:27:35,000 --> 00:27:47,000

The laws of the universe being universal, if you take the right electromagnetic field and very high voltage, pulse it or phase it in a certain way, you can get some very strange phenomenon.

337

00:27:47,000 --> 00:27:50,000

You can make things disappear and reappear.

338

00:27:50,000 --> 00:28:06,000

Therefore, it follows the reason that this would be studied and that the Nazi bell was probably an attempt by that regime to develop some type of flying machine that would use these sort of advanced electromagnetic concepts.

339

00:28:08,000 --> 00:28:12,000

But was time travel even a possibility?

340

00:28:12,000 --> 00:28:19,000

According to German-born physicist Albert Einstein, humans were theoretically capable of it.

341

00:28:19,000 --> 00:28:26,000

His theory of special relativity actually showed for the first time that time can slow down when you go very fast.

342

00:28:26,000 --> 00:28:29,000

And so that has an impact on going into the future.

343

00:28:29,000 --> 00:28:38,000

It allows you to travel really fast somewhere and your time goes slower than somebody else and you end up in the future relative to what you thought you were doing.

344

00:28:39,000 --> 00:28:45,000

The harder one to think about is general relativity where Einstein talks about gravity and how it to describe gravity.

345

00:28:45,000 --> 00:28:55,000

And there you can start thinking about space-time and bending it and actually by warping space and time in the right way you end up going backwards in time.

346

00:29:01,000 --> 00:29:05,000

While no records exist, indicating the bell was ever used during the war.

347

00:29:08,000 --> 00:29:18,000

As the Allied military forces pushed into Germany, the entire project and its commander, SS General Hans Kamler, suddenly disappeared.

348

00:29:19,000 --> 00:29:25,000

SS General Hans Kamler was going to defect in exchange for immunity.

349

00:29:25,000 --> 00:29:28,000

But then by the end of the war he disappeared.

350

00:29:29,000 --> 00:29:33,000

So where did Hans Kamler go and what did he take?

351

00:29:34,000 --> 00:29:36,000

I think he took the bell.

352

00:29:37,000 --> 00:29:42,000

Did he create a wormhole? Did he create a stargate? And this is what the Nazis were working on.

353

00:29:45,000 --> 00:29:55,000

Did Kamler and the other Nazis really use the bell to escape justice by disappearing across time or possibly to another planet?

354

00:29:56,000 --> 00:30:02,000

In the spring of 1945, Germany's war effort collapsed.

355

00:30:02,000 --> 00:30:10,000

And as the Allied armies advanced towards Berlin, German scientists and engineers abandoned their laboratories.

356

00:30:10,000 --> 00:30:14,000

Hitler's search for a wonder weapon failed.

357

00:30:14,000 --> 00:30:24,000

Instead, it was the Americans who scored the decisive technological edge with their development of the atomic bomb.

358

00:30:27,000 --> 00:30:35,000

But according to ancient astronaut theorists, a similar and perhaps even more devastating weapon had already existed.

359

00:30:36,000 --> 00:30:42,000

Unleashed in an area that is now part of India more than 3,000 years ago.

360

00:30:45,000 --> 00:30:53,000

An unmanned aerial vehicle hurtles across the sky.

361

00:30:53,000 --> 00:31:06,000

It travels at supersonic speeds, spitting fire, launching deadly missiles, programmed to seek and destroy.

362

00:31:07,000 --> 00:31:14,000

The effect is devastating. High-tech warfare at its most lethal.

363

00:31:14,000 --> 00:31:30,000

But what could be a page stolen from a US military black project is actually a description written down over 2,500 years ago in the sacred Hindu text known as the Mahabharata.

364

00:31:31,000 --> 00:31:38,000

When it comes to the ancient Indian accounts, they really eye-witness testimony of the gods fighting.

365

00:31:40,000 --> 00:31:51,000

When you read the ancient Hindu epics, they talk about horrific weapons, missiles and atomic weapons.

366

00:31:52,000 --> 00:31:58,000

Massive laser weapons that are melting and devastating entire cities.

367

00:31:59,000 --> 00:32:05,000

I refuse to think that our ancestors came up with these stories out of thin air.

368

00:32:06,000 --> 00:32:11,000

When writing was first invented, they wrote down their history.

369

00:32:12,000 --> 00:32:17,000

The first things that were ever written down were actual events.

370

00:32:18,000 --> 00:32:29,000

How is it that some of the earliest written accounts of warfare describe sophisticated weaponry that humans wouldn't develop for thousands of years?

371

00:32:31,000 --> 00:32:39,000

For the answer, ancient astronaut theorists point to numerous descriptions of deadly weapons found

throughout the Mahabharata.

372

00:32:41,000 --> 00:32:46,000

Many strikingly similar to those used by the military today.

373

00:32:47,000 --> 00:32:57,000

One example are the incendiary weapons wielded by Vishnu, which are specially equipped to find their targets.

374

00:32:58,000 --> 00:33:02,000

Vishnu has a flying guided missile to the Nare and Astra.

375

00:33:03,000 --> 00:33:08,000

And once it is launched, it will destroy everything that is moving.

376

00:33:09,000 --> 00:33:14,000

So, you know, according to the description, it is Mohsen detecting a weapon.

377

00:33:15,000 --> 00:33:18,000

Was it pretty much like our modern weaponry?

378

00:33:20,000 --> 00:33:23,000

There is also a weapon that was a heat seeking.

379

00:33:25,000 --> 00:33:34,000

Heat seeking is a very effective way of finding something you would fire a missile from behind one aircraft at an aircraft in front of you, specifically targeted against the hot engine.

380

00:33:36,000 --> 00:33:42,000

And then you were able to move off from behind the airplane and the heat seeker would still be able to find the target.

381

00:33:45,000 --> 00:33:50,000

I am aware that there are forces of nature.

382

00:33:52,000 --> 00:34:02,000

You've got thunder, lightning, earthquakes, but how would you go from witnessing that to a description of heat seeking missiles?

383

00:34:05,000 --> 00:34:13,000

In addition to guided missiles, the Mahabharata is filled with accounts of other sophisticated weapons wielded by the gods.

384

00:34:14,000 --> 00:34:21,000

In the Mahabharata, 46 different types of weapons are described and each one has a specific function.

385

00:34:22,000 --> 00:34:30,000

The Pasupati is a weapon that actually multiplies into seven different arrows, so then it hits seven different targets at the same time.

386

00:34:31,000 --> 00:34:37,000

Salva is an anti-god. He can make his vehicle disappear.

387

00:34:38,000 --> 00:34:41,000

So, we're talking about flying objects that are stealth.

388

00:34:41,000 --> 00:34:44,000

He also can put people into sleep.

389

00:34:45,000 --> 00:34:48,000

So, we're perhaps talking about nerve gas.

390

00:34:49,000 --> 00:34:55,000

They talk about weapons that are so high tech that it could only be from extraterrestrials.

391

00:34:57,000 --> 00:35:10,000

But of all the weapons described in the Mahabharata, perhaps the most deadly was a device called the Ramastra, a weapon that the text warned was never to be used.

392

00:35:11,000 --> 00:35:15,000

The Ramastra is described as the ultimate weapon.

393

00:35:16,000 --> 00:35:22,000

Once it is launched, it will simply burn everything so it incinerates the entire universe.

394

00:35:27,000 --> 00:35:35,000

We're talking about a nuclear blast, a hundred-fold magnitude of the bomb that we have seen or experienced in our own times.

395

00:35:35,000 --> 00:35:42,000

It should never be used. And yet, someone was going to make use of that Ramastra.

396

00:35:43,000 --> 00:35:47,000

So, that's the dilemma that the books talks about in the Mahabharata.

397

00:35:49,000 --> 00:35:55,000

India now has a rocket program and one of their rockets is called Shakti.

398

00:35:56,000 --> 00:36:01,000

Shakti means goddess energy. This is also another divine weapon.

399

00:36:02,000 --> 00:36:09,000

Indians are now sort of going back to their text or rather, mythology and reliving it by their modern technology.

400

00:36:13,000 --> 00:36:25,000

Is it possible that alien beings visiting the Earth thousands of years ago dealt with the same issues of nuclear annihilation that humans are dealing with today?

401

00:36:26,000 --> 00:36:38,000

And might the deadly weapons currently being deployed by the world's military really be recreations of weapons first used on Earth by extraterrestrials in the ancient past?

402

00:36:39,000 --> 00:36:50,000

Perhaps. But then it should also be possible to predict mankind's military future by searching through still more ancient texts.

403

00:36:56,000 --> 00:37:00,000

May 2010, off the coast of California.

404

00:37:01,000 --> 00:37:09,000

A powerful new weapon shoots down unmanned aerial drones during secret testing carried out by the US Navy.

405

00:37:10,000 --> 00:37:22,000

Firing from a warship at a distance of nearly two miles, a ray of intense laser energy burns through targets traveling at speeds of more than 300 miles per hour.

406

00:37:23,000 --> 00:37:32,000

But is it possible that such so-called death rays could have been used before? Perhaps in ancient times.

407

00:37:33,000 --> 00:37:41,000

I'm quite convinced that there have been in the past advanced civilizations on Earth that did have such things as the so-called death ray.

408

00:37:43,000 --> 00:37:49,000

Whether it was used as a weapon or whether it was just observed being used is a very, very open question.

409

00:37:50,000 --> 00:38:01,000

In 214 BC, Greeks living in the Sicilian city of Syracuse prepared for an attack by a fleet of Roman warships.

410

00:38:02,000 --> 00:38:12,000

Though outnumbered by a superior military force, ancient texts suggest that Syracuse was well defended by a mysterious and powerful new weapon.

411

00:38:12,000 --> 00:38:22,000

Probably the most famous ancient death ray was the one that was built by the Greek inventor Archimedes.

412

00:38:23,000 --> 00:38:34,000

He was able to create this giant mirror and parabolic disk and focus the sun's rays on the fleet and set these ships on fire.

413

00:38:35,000 --> 00:38:42,000

So here we have what would be a primitive kind of death ray that really worked.

414

00:38:46,000 --> 00:38:54,000

But how could Archimedes have conceived such a formidable weapon, one far in advance of any known at the time?

415

00:38:55,000 --> 00:39:04,000

Researchers suggest the inventor may have drawn inspiration from Greek myths written nearly 600 years before the Battle of Syracuse.

416

00:39:05,000 --> 00:39:12,000

Myths that told the stories of gods that brandished cosmic weapons of incredible destructive force.

417

00:39:15,000 --> 00:39:20,000

If you look in the Greek tradition, they have a very clear description of Zeus's thunderbolt,

418

00:39:21,000 --> 00:39:33,000

which he was able to point at people or at other things that he wanted to explode, hit the button, and what they described as lightning would come out and create a fierce and terrible explosion.

419

00:39:37,000 --> 00:39:45,000

But if death ray type weapons had been used in ancient times, might there be some sort of tangible proof?

420

00:39:45,000 --> 00:39:47,000

Perhaps there is.

421

00:39:48,000 --> 00:39:54,000

Here, scattered throughout the Scottish countryside, can be found numerous ancient ruins.

422

00:39:55,000 --> 00:40:01,000

Many appear to have been forts or other enclosures, dating back thousands of years.

423

00:40:02,000 --> 00:40:06,000

Remarkably, they also appear to have been subjected to fire and heat.

424

00:40:07,000 --> 00:40:11,000

So intense, it practically turned the stone structures into glass.

425

00:40:11,000 --> 00:40:16,000

It's a process more scientifically known as vitrification.

426

00:40:18,000 --> 00:40:30,000

Here you have these stone buildings in which an analysis of the outside comes to the conclusion that they were heated to over a thousand degrees Celsius in temperature.

427

00:40:31,000 --> 00:40:38,000

Conventional fire could not have reached this heat. You needed to sustain the burn at a thousand degrees Celsius for a long period of time.

428

00:40:42,000 --> 00:40:53,000

According to Celtic legend, there once was a god named Lou, also known as the Shining One, the Sun God, and the God of War.

429

00:40:56,000 --> 00:41:04,000

Like the Greek god Zeus, Lou was said to wield a mighty magic spear, not unlike the thunderbolts of his Greek counterpart.

430

00:41:05,000 --> 00:41:15,000

When battle was near, Lou would draw out his spear and it roared, and then flashes of fire came out of it.

431

00:41:16,000 --> 00:41:23,000

And it tore through the ranks of the enemy, never tired of killing and slaying.

432

00:41:26,000 --> 00:41:28,000

It was one amazing weapon.

433

00:41:29,000 --> 00:41:40,000

I mean, how else can we explain all those numerous vitrified forts where the surface of the stone is as smooth as glass?

434

00:41:41,000 --> 00:41:48,000

And these spots can only be found in very concentrated areas through Northern Scotland.

435

00:41:49,000 --> 00:42:01,000

All these descriptions of sophisticated weaponry sounds almost like science fiction, but is it really? Because we have those weapons today.

436

00:42:02,000 --> 00:42:13,000

And I think that all the stuff that we have today has been around before and that our past is not science fiction, but science fact.

437

00:42:13,000 --> 00:42:24,000

Deadly laser beams, acoustic weapons, time machines.

438

00:42:25,000 --> 00:42:32,000

Were these mysterious devices really in the possession of our ancestors thousands of years ago?

439

00:42:33,000 --> 00:42:38,000

And if so, could they have been built with the help of extraterrestrial beams?

440

00:42:38,000 --> 00:42:54,000

Perhaps as our own technology continues to advance, we will come closer, not only to our future, but to a rediscovery of our past and a reconnection with our alien ancestors.
