

1

00:00:00,000 --> 00:00:02,000

Legends of lizard people.

2

00:00:02,000 --> 00:00:05,000

It had arms and legs like that of a man.

3

00:00:05,000 --> 00:00:09,000

Statues depicting strange creatures.

4

00:00:09,000 --> 00:00:14,000

They have the facial features of, it seems to be reptiles,

5

00:00:14,000 --> 00:00:19,000

and underground caves said to be home to serpent gods.

6

00:00:19,000 --> 00:00:23,000

There are too many stories about reptilian entities living within the Earth

7

00:00:23,000 --> 00:00:25,000

for them to be dismissed.

8

00:00:25,000 --> 00:00:29,000

Throughout history, there have been stories of beings half human,

9

00:00:29,000 --> 00:00:32,000

half reptile.

10

00:00:32,000 --> 00:00:36,000

Could they be more than mere fantasy?

11

00:00:36,000 --> 00:00:41,000

And if so, might they be visitors from another planet?

12

00:00:41,000 --> 00:00:50,000

That you have to wonder if there's not some truth to the stories of reptilian intervention on planet Earth.

13

00:00:50,000 --> 00:00:58,000

Millions of people around the world believe we have been visited in the past by extraterrestrial beings.

14

00:00:58,000 --> 00:01:01,000

What if it were true?

15

00:01:01,000 --> 00:01:06,000

Did ancient aliens really help to shape our history?

16

00:01:06,000 --> 00:01:14,000

And if so, might there be a connection between aliens and strange beings called the reptilians?

17

00:01:28,000 --> 00:01:46,000

Music

18

00:01:46,000 --> 00:01:54,000

Bishop Bill, South Carolina, June 1988, 2 a.m.

19

00:01:54,000 --> 00:01:59,000

17-year-old Christopher Davis had pulled over on a deserted road

20

00:01:59,000 --> 00:02:03,000

near scape or swamp to fix a flat tire.

21

00:02:03,000 --> 00:02:07,000

Just as he finished, he heard a noise behind him.

22

00:02:07,000 --> 00:02:14,000

He saw a strange, seven-foot-tall creature with red glowing eyes running towards him.

23

00:02:14,000 --> 00:02:22,000

Davis started to drive away, but the creature caught up with him and jumped on the roof of the car.

24

00:02:22,000 --> 00:02:30,000

Swerving hard to throw the creature off, he saw it had three fingers and green skin.

25

00:02:30,000 --> 00:02:35,000

Finally, it fell from the car, and Davis sped away.

26

00:02:35,000 --> 00:02:40,000

And he ended up getting out of where he was, and he went immediately home.

27

00:02:40,000 --> 00:02:44,000

He was so upset that his parents called the police department.

28

00:02:44,000 --> 00:02:47,000

Sheriff Liston Troustill actually went out there and interviewed him.

29

00:02:47,000 --> 00:02:53,000

He asked him to take a lighter detector test, and this young boy passed the light detector test with flying colors.

30

00:02:53,000 --> 00:02:59,000

What Christopher Davis told the detective he saw was a lizard man.

31

00:02:59,000 --> 00:03:05,000

And what's interesting is that the police took the story very, very seriously.

32

00:03:05,000 --> 00:03:13,000

Although Christopher Davis' sighting of the lizard man was certainly the most famous and infamous one, it's not the only one.

33

00:03:13,000 --> 00:03:20,000

They tracked down a number of other witnesses who both previously and after had seen the lizard man.

34

00:03:22,000 --> 00:03:31,000

In the spring of 1988, a crop duster named Frank Mitchell reported seeing what he said was a lizard man,

35

00:03:31,000 --> 00:03:37,000

crossed his grassy runway one morning as he was about to take off.

36

00:03:38,000 --> 00:03:49,000

And two years later in 1990, birth of blithers and her five children claimed they nearly hit a lizard-like man while driving near the same swamp.

37

00:03:52,000 --> 00:03:55,000

Could these incidents all be related?

38

00:03:55,000 --> 00:04:05,000

Is it merely coincidence that three separate people on three separate occasions reported seeing a lizard man near the skateboard swamp?

39

00:04:06,000 --> 00:04:13,000

Could there possibly be another species of life down here, something we're not aware of, and they're interacting with people?

40

00:04:15,000 --> 00:04:25,000

Further sightings of a so-called lizard man have been reported not only in this area, but also in Tennessee, Illinois, and Austria.

41

00:04:26,000 --> 00:04:38,000

In fact, alleged encounters with these creatures have become so widespread they are now collectively known by one name, the reptilians.

42

00:04:39,000 --> 00:04:45,000

But could accounts of the reptilians be more than just the product of overactive imaginations?

43

00:04:46,000 --> 00:04:56,000

Ancient astronaut theorists say yes, and as evidence, they point to the legends of serpent gods that can be found throughout the world.

44

00:04:58,000 --> 00:05:04,000

In South America, Kwezel Kodil, Kukul Kan, they're always referenced as serpent gods.

45

00:05:04,000 --> 00:05:10,000

Even in Japan or ancient China, we have these dragon emperors and dragon gods.

46

00:05:10,000 --> 00:05:20,000

It's very possible that there was a time in the past that ancient man was interacting with what appeared to be living serpent beings, a lost reptilian race.

47

00:05:21,000 --> 00:05:25,000

We can find these stories of serpent gods all around the world.

48

00:05:26,000 --> 00:05:39,000

I don't mean just particular geographic regions, but on every continent, on virtually every ancient culture, you have them in India, you have them in China, in Greece, in England.

49

00:05:40,000 --> 00:05:47,000

In South and North America, in Africa, I mean, it doesn't matter where you go in the world.

50

00:05:48,000 --> 00:05:54,000

There are these direct references to these serpent-like beings that descend from the sky.

51

00:05:55,000 --> 00:06:02,000

So to me, this is not a figment of the imagination and certainly not coincidence.

52

00:06:03,000 --> 00:06:16,000

In addition to myths and legends passed down through oral history, early written texts also speak of serpent beings that were once present on Earth.

53

00:06:17,000 --> 00:06:22,000

The Bible speaks of a reptilian race, the Seraphim. We read about them in the book of Isaiah.

54

00:06:23,000 --> 00:06:28,000

Some will interpret them as being the fiery ones, but the correct understanding is reptilian.

55

00:06:32,000 --> 00:06:40,000

There's always been knowledge of the reptilians. Some are good, others bad.

56

00:06:43,000 --> 00:06:51,000

Religious texts tell of reptilian beings whose existence is inexorably linked to that of the Earth and humankind.

57

00:06:51,000 --> 00:07:04,000

So, for example, in the Bible, the book of Genesis has a story about a serpent who tempts Eve, the first woman, by offering her the forbidden fruit from the Tree of Knowledge.

58

00:07:05,000 --> 00:07:15,000

Eve falls for the snake's blandishments and she eats of that apple and forever changes human history, causing Adam and Eve to be expelled from the Garden of Eden

59

00:07:15,000 --> 00:07:25,000

and causing the serpent to be punished in that he is doomed to slither upon the ground as a punishment for his disobeying God's will.

60

00:07:28,000 --> 00:07:36,000

It is understood in ancient legend that prior to God punishing the serpent, the serpent was completely humanoid in character

61

00:07:36,000 --> 00:07:47,000

and that this serpent, this Nahash, was only one of a race of reptilian beings who served God.

62

00:07:48,000 --> 00:08:02,000

When you hear that story from a modern perspective, it sounds an awful lot like what people describe as the reptilians, lizard-like beings, or beings with the faces or visage of a viper.

63

00:08:07,000 --> 00:08:20,000

But if the serpent in the Garden of Eden really was a reptilian alien, as ancient astronaut theorists suggest, could there be similar stories recorded in the ancient texts of other cultures as well?

64

00:08:21,000 --> 00:08:27,000

In the Quran, there's a fascinating category of creatures known as the djinns.

65

00:08:28,000 --> 00:08:35,000

The djinns are ancient, they were here before humans. They're a category unto themselves not unlike angels.

66

00:08:36,000 --> 00:08:39,000

And at one point, Iblis, the leader of the djinns, offended God.

67

00:08:40,000 --> 00:08:50,000

Crossed him was rebellious and was cursed like the serpent in the Garden of Eden and became earthbound, trapped on earth for eternity and they are here with us.

68

00:08:51,000 --> 00:09:08,000

Throughout the Mediterranean and the Near East, there's a very strong belief linking snakes, skinks, lizards, and other reptiles to supernatural or magical creatures and in some cases to the souls of ancestors.

69

00:09:09,000 --> 00:09:19,000

So it can be considered bad luck to kill one of these beings if you find it in the home because it might be a djinn or another kind of supernatural creature that is visiting you.

70

00:09:21,000 --> 00:09:28,000

The djinn, kukulkan, the serpent in the Garden of Eden.

71

00:09:29,000 --> 00:09:36,000

Could all of these stories about otherworldly serpent beings able to influence humanity be based on fact?

72

00:09:38,000 --> 00:09:44,000

And if they have been part of human history for thousands of years, where do they come from?

73

00:09:45,000 --> 00:09:53,000

Are they alien creatures coming to earth from another planet? Or could they be living right under our feet?

74

00:10:00,000 --> 00:10:05,000

Los Angeles, California. January 1934.

75

00:10:06,000 --> 00:10:12,000

The Los Angeles Times publishes an article entitled, Lizard People's Catacomb City-Hunted.

76

00:10:14,000 --> 00:10:26,000

Accounting the attempt by mining engineer G. Warren Shufeld to locate and excavate a maze of tunnels which he believed were beneath the streets of downtown Los Angeles.

77

00:10:27,000 --> 00:10:45,000

Warren Shufeld was a mining engineer and he invented a device that he called the radio X-ray to be used for gold mining and this device could find tunnels underground and he actually created a map of the tunnels.

78

00:10:45,000 --> 00:10:56,000

Included on Shufeld's map of tunnels were 16 places where he said he had located gold deposits.

79

00:10:58,000 --> 00:11:06,000

Shufeld gained momentum after meeting with a Hopi medicine man who told him the legend of the lizard people that live in underground cities.

80

00:11:07,000 --> 00:11:21,000

Warren Shufeld had a sit-down with an Indian medicine man in Arizona who told him there was a Hopi legend that there was three cities on the Pacific coast that were completely underground.

81

00:11:22,000 --> 00:11:37,000

The story goes that 5,000 years ago there was a meteor shower and these lizard people sought refuge underground. They dug these tunnels and one of the network of tunnels was under the city of Los Angeles.

82

00:11:38,000 --> 00:11:55,000

According to the legend, the lizard people carved out vast chambers large enough to house 1,000 families using advanced technologies such as a mysterious chemical that could easily pour through bedrock.

83

00:11:56,000 --> 00:12:19,000

Shufeld obtained permission from the city and began digging to try and reach the vast tunnel system. The city council, perhaps motivated by the alleged gold that was contained within the tunnels, allowed Shufeld to dig a 250 foot shaft under the agreement that he would give them 50% of the treasure if recovered.

84

00:12:20,000 --> 00:12:34,000

Warren Shufeld was a successful mining engineer and it seems that he had some kind of connection at the Los Angeles Times since the times really followed the story. It was a story that caught the popular imagination.

85

00:12:34,000 --> 00:12:50,000

After a month of digging and not reaching the tunnel system, Warren Shufeld and his team ran out of money and stopped the search. But fascination with the story continues to this day.

86

00:13:04,000 --> 00:13:15,000

We have taken control of our planet and our living underground. It seems incredible and yet it's what some of the stories are telling us.

87

00:13:17,000 --> 00:13:28,000

Is it possible that an advanced race of lizard people once lived underneath the western United States? And could they still be there today?

88

00:13:29,000 --> 00:13:35,000

Astonishingly, a nearly identical legend exists halfway around the world.

89

00:13:38,000 --> 00:13:40,000

Vinaras, India

90

00:13:43,000 --> 00:13:54,000

Within this city lies the well of Sheshna, which in Hindu legend is an entrance into an underground city of the Nagas.

91

00:13:55,000 --> 00:14:01,000

A race of semi-divine serpent people known throughout eastern culture.

92

00:14:02,000 --> 00:14:22,000

In Vinaras, a sacred city of India, there is a well, the well of Sheshna. This is one of the portals to the underground city called Patala. And the Nagas live in this place. It's a place of great power and mystery and some danger. And only the holy can make contact with it.

93

00:14:25,000 --> 00:14:48,000

Patala is an underworld in Hindu mythology. There are many beings that live in there, many reptilians which are called Nagas. As a demigod, they must have descended from heaven to the earth to teach, to give special qualities to the human world. Nagas are not really evil of being as a Judeo-Christian in the context.

94

00:14:49,000 --> 00:15:01,000

Ancient astronaut theorists claim the Hindu stories of the Nagas bear a striking resemblance to the Hopi stories of lizard people who also resided beneath the earth.

95

00:15:02,000 --> 00:15:08,000

So here we are linking the Nagas, the serpent beings, with the reptilian beings of the Hopi tradition.

96

00:15:08,000 --> 00:15:20,000

We see a common thread here of these beings who are at one time reviled and also revered, but also as beings that have a direct influence on humanity.

97

00:15:21,000 --> 00:15:32,000

Is it merely coincidence that extremely similar legends of advanced reptilian beings living underground can be found on opposite sides of the world?

98

00:15:33,000 --> 00:15:41,000

And is it possible these reptilian underground dwellers surface every so often to interact with humanity?

99

00:15:41,000 --> 00:15:50,000

Perhaps more clues can be found in artifacts on earth in the cradle of civilization.

100

00:15:51,000 --> 00:15:55,000

Southern Iraq 1923.

101

00:15:56,000 --> 00:16:06,000

British archaeologist Sir Leonard Woolley leads an excavation to uncover the remains of one of the oldest agricultural communities in the world.

102

00:16:06,000 --> 00:16:12,000

The Ubeid culture, which dates back to 5900 BC.

103

00:16:13,000 --> 00:16:18,000

Among the remains, they discover some unusual clay artifacts.

104

00:16:19,000 --> 00:16:24,000

Among the dwellings and tools, they also discovered these strange looking clay figurines.

105

00:16:25,000 --> 00:16:28,000

And I say strange because they don't really look human.

106

00:16:29,000 --> 00:16:33,000

They have the facial features of what seems to be reptiles.

107

00:16:33,000 --> 00:16:44,000

Now is it possible that the Sumerians were depicting a race of beings that were living among them at the time?

108

00:16:45,000 --> 00:16:56,000

Mainstream scholars have debated the meaning of the statues since their discovery, thinking perhaps they were Sumerian gods.

109

00:16:57,000 --> 00:17:04,000

However, ancient astronaut theorists believe the statues could have a different meaning.

110

00:17:05,000 --> 00:17:11,000

These clay figurines have these what are called coffee bean eyes. They have these elongated skulls.

111

00:17:12,000 --> 00:17:17,000

They look very much like some kind of reptilian extraterrestrial.

112

00:17:17,000 --> 00:17:27,000

And they're breastfeeding children and doing very normal human things that you wouldn't think that gods would necessarily be doing.

113

00:17:28,000 --> 00:17:35,000

So it's this mixture of human activity with these reptilian aliens.

114

00:17:37,000 --> 00:17:40,000

So we're showing mammalian reptilian physiology.

115

00:17:40,000 --> 00:17:50,000

When it shows them holding those babies, it's not a normal thing to have anywhere an iconography throughout the entire world.

116

00:17:51,000 --> 00:17:56,000

And it makes you suspect as to whether or not they had actual physical contacts between them.

117

00:17:57,000 --> 00:18:00,000

But just what are these strange creatures?

118

00:18:01,000 --> 00:18:08,000

Where do the reptilians that have reportedly been witnessed by humans for thousands of years come from?

119

00:18:09,000 --> 00:18:18,000

Some ancient astronaut theorists believe the answer can be found by looking back not thousands of years, but millions.

120

00:18:20,000 --> 00:18:23,000

Well, Ontario 1982.

121

00:18:24,000 --> 00:18:34,000

At the National Museum of Canada, paleontologist and curator of vertebrate fossils, Dale Russell, publishes a thought experiment.

122

00:18:34,000 --> 00:18:52,000

Based on the trend toward larger brain sizes and the upright posture of dinosaurs, he proposes a theory about what one species of dinosaur would have evolved into if it had survived the mass extinction 65 million years ago.

123

00:18:53,000 --> 00:19:06,000

What he did is take the dinosaur known as Trudon, they noticed the morphological changes in the skeletal structure of the dinosaur and based on over time where it was going, they extrapolated it out further.

124

00:19:07,000 --> 00:19:19,000

And strangely enough or wonderfully enough, they actually came up with a model that resembled a humanoid reptilian being, which actually matched that of the reports that we were hearing now as well as reports from ancient history.

125

00:19:19,000 --> 00:19:26,000

So for me, this was one of the most compelling pieces of information where science actually says it is possible.

126

00:19:27,000 --> 00:19:38,000

The dinosaurs hadn't died out. This would have become what he called the dinosaur roid, an upright standing semi-humanoid, semi-reptilian entity, what we might call a reptoid.

127

00:19:39,000 --> 00:19:48,000

He thought it might stand four to five feet high, weigh about 90 pounds and have a fairly advanced brain. Now did this entity ever come into existence?

128

00:19:49,000 --> 00:19:59,000

What if some of the dinosaurs didn't become extinct? What if they managed to survive the global extinction or presumed extinction 65 million years ago?

129

00:20:00,000 --> 00:20:14,000

And over time, some of them developed through natural selection and they grew smaller, they became more intelligent, they became more adept and adaptive and took on a humanoid form.

130

00:20:14,000 --> 00:20:25,000

We necessarily shouldn't think that the reptilians are extraterrestrials. Perhaps in some strange way they're our forefathers, albeit from millions and millions of years in the past.

131

00:20:27,000 --> 00:20:35,000

If the reptilians do exist, could they be the descendants of dinosaurs that walked the earth millions of years ago?

132

00:20:35,000 --> 00:20:48,000

Our concept of dinosaurs is changing all the time, of course, and nowadays we're making so many new discoveries every year that we're reinterpreting them in many ways.

133

00:20:49,000 --> 00:21:04,000

Certainly, if you look 20, 30 years back, there were so many things that have been found and so many other things we know now, particularly I think it's been very important that nowadays it's completely very well accepted.

134

00:21:05,000 --> 00:21:13,000

The idea that dinosaurs are not extinct, that dinosaurs essentially evolve into birds and that they're alive today.

135

00:21:15,000 --> 00:21:27,000

And now that we know that not all the dinosaurs died out, and as a matter of fact some survived to become birds, warm-blooded birds mind you, from a dinosaur which is considered reptile and cold-blooded.

136

00:21:28,000 --> 00:21:45,000

We're recognizing that even if these are birds now and we didn't recognize them now as being part of the dinosaur family, what could these other pockets that have survived the devastation 65 million years ago, could they have evolved parallel to mankind in hidden cavern systems?

137

00:21:46,000 --> 00:21:52,000

And could they be actually the beings that we think are extraterrestrial but are actually our terrestrial neighbors?

138

00:21:53,000 --> 00:22:07,000

Paleontologists generally argue that the dinosaurs died out totally 65 million years ago. I think

it's certainly within the realm of feasibility that some found an ecological nest to survive in and may even exist today.

139

00:22:08,000 --> 00:22:28,000

And I point out that while we hear you have all abductees talking about little grays and tall humanoids, a minority of them do report encounters with what we would call reptoids. So it's possible that on some planet, if not Earth, somewhere else they evolve from dinosaurs.

140

00:22:29,000 --> 00:22:44,000

To find another place in the universe that was so rich with resources and so capable of supporting life was probably a very exciting discovery for extraterrestrial visitors to Earth in our prehistory.

141

00:22:45,000 --> 00:22:58,000

In their eyes, this could have been the place they could colonize or perhaps act as a working environment for experiments they were doing with new species they were trying to engineer.

142

00:22:59,000 --> 00:23:22,000

Maybe they manipulated dinosaur DNA to favor certain mutations. By playing with certain mutations in the genes of dinosaurs, highly advanced extraterrestrials through genetic modification may have been able to alter the course of dinosaur evolution to favor the rise of mammals.

143

00:23:23,000 --> 00:23:32,000

Is it possible celestial travelers manipulated the DNA of reptiles and mammals on Earth as ancient astronaut theorists believe?

144

00:23:33,000 --> 00:23:42,000

And could one of their experiments have resulted in a reptilian human hybrid species that now exists primarily underground?

145

00:23:42,000 --> 00:24:11,000

It's very possible that the reptilian agenda extends well into our history. We really don't know the full record of dinosaurs on our planet. Since dinosaurs were here for millions of years, many of these references to a current reptilian race or an ancient serpent race that was worshipped by various cultures could be an offshoot, a genetic variation of dinosaurs that naturally evolved here on Earth.

146

00:24:12,000 --> 00:24:27,000

If extraterrestrials assisted the evolution of reptiles as well as human beings, could there have been some mixing of reptile and human genes? Perhaps we need to look no further than our own bodies.

147

00:24:34,000 --> 00:24:37,000

Punjab, India. 2001.

148

00:24:38,000 --> 00:24:59,000

A boy named Balaji is born with a bizarre deformity, a 7-inch tail. Believing his tail to be a sign of divinity, people begin flocking to his house offering prayers, money and gifts, hoping their wishes will be fulfilled in return.

149

00:25:00,000 --> 00:25:24,000

The other wise seemed normal, but he had a weird serpent-like tail at the base of his spine. And the reason why he was being worshipped was that their own legends reported beings with tails like this. And they thought that he was the reincarnated form of one of the gods.

150

00:25:25,000 --> 00:25:43,000

Over 100 cases of human tails have been reported in medical journals since the 1800s. Every human embryo has a small tail in the early stages of development, which is absorbed by the growing body by nine weeks of pregnancy.

151

00:25:44,000 --> 00:25:58,000

Similarities in the developmental stages of embryos of animals have been observed for a very long time. Darwin noted that closely related species often have embryos that start off looking essentially identical.

152

00:25:59,000 --> 00:26:07,000

And then it's not until later in development that they start to develop some of their characteristics that sort of uniquely define the different species.

153

00:26:07,000 --> 00:26:19,000

And in fact, our own embryos have a tail, for instance, and look very much like the embryos of other vertebrate animals if we go really, really early into our development.

154

00:26:20,000 --> 00:26:40,000

If you go back far enough, humans and reptiles share a common ancestor. If you go back about 300 million years before present, you find this group is evolving where one line went off towards what's now the reptiles and the birds, and the other line went off to a whole series of animals, including the ancestors of what became the mammals.

155

00:26:40,000 --> 00:26:45,000

And that occurred, that split starts to occur by about 250 million years before present.

156

00:26:46,000 --> 00:26:56,000

For so many years, we grew up thinking that reptiles were the closest relative to dinosaurs, and now we know that's a little bit different.

157

00:26:56,000 --> 00:27:01,000

In fact, if you look at Tyrannosaurus, it's essentially the predecessor to modern birds.

158

00:27:01,000 --> 00:27:10,000

So we go way back and we look at how evolution has changed animal forms over the years, and some of the mammals looked a lot like reptiles.

159

00:27:11,000 --> 00:27:21,000

They look like little furred lizards, in fact. So yeah, I mean, if you're looking at the evolution of life on the planet, yeah, we're all related.

160

00:27:22,000 --> 00:27:31,000

In addition to humans born with tails, there are other genetic conditions that might suggest a link with our reptilian past.

161

00:27:32,000 --> 00:27:36,000

People with the disease, ichthyosis, have dry, scaly skin.

162

00:27:38,000 --> 00:27:46,000

And people with the diseases, called syndactyly and ectrodactyly, have fused fingers and claw-like hands.

163

00:27:47,000 --> 00:27:53,000

There's even a biblical legend that people who lived before the patriarch Noah had webbed fingers.

164

00:27:54,000 --> 00:28:16,000

Legend says that until the time of Noah, all human beings were born with webbed fingers, almost a reptilian in nature, and that Noah was the first to be born without that, and as such was a sign and a symbol of things to come.

165

00:28:17,000 --> 00:28:23,000

Might there have been a time when reptilian characteristics were more prevalent in humans?

166

00:28:24,000 --> 00:28:30,000

There are traditions in numerous cultures of reptilian bloodlines associated with royalty.

167

00:28:31,000 --> 00:28:36,000

According to legend, Alexander the Great was sired by a dragon.

168

00:28:37,000 --> 00:28:45,000

Japanese legends state the founder of the imperial dynasty, Jimo, was the great grandson of a dragon god.

169

00:28:46,000 --> 00:28:52,000

And in China, ancient emperors were described as having a dragon-like appearance.

170

00:28:53,000 --> 00:29:00,000

Is it possible these ancient rulers did have a more direct connection to reptilian ancestors?

171

00:29:01,000 --> 00:29:18,000

The royal bloodline issue is one of which they believe that the heredity of certain individuals carried some form of a unique signature in their blood that was bestowed upon them by ancient reptilian human beings.

172

00:29:19,000 --> 00:29:21,000

So let's ask this question.

173

00:29:22,000 --> 00:29:37,000

Why throughout no human history have there been certain families and bloodlines that have claimed to be superior to the rest of humanity?

174

00:29:38,000 --> 00:29:41,000

So superior that they have a right to rule over them.

175

00:29:42,000 --> 00:29:50,000

Why did Chinese emperors claim the right to rule because of their alleged descendants from the Serpent Gods?

176

00:29:51,000 --> 00:30:00,000

Why did the kings of media now, Iran, why were they called the Dragon Dynasty of Media?

177

00:30:01,000 --> 00:30:06,000

Why is this constant theme unfolding all the way through history?

178

00:30:06,000 --> 00:30:13,000

Might the stories of rulers with reptilian bloodlines be true?

179

00:30:14,000 --> 00:30:22,000

And if so, is it possible that all humans have a genetic connection to reptilian ancestors?

180

00:30:23,000 --> 00:30:28,000

Some believe more proof can be found in our brains.

181

00:30:29,000 --> 00:30:32,000

January 1977.

182

00:30:33,000 --> 00:30:44,000

Esteemed scientist Carl Sagan publishes his Pulitzer Prize winning book, Dragons of Eden.

183

00:30:45,000 --> 00:30:48,000

Speculations on the evolution of human intelligence.

184

00:30:49,000 --> 00:30:59,000

The book explores the theory put forth by neuroscientist Paul McLean, which connects parts of the brain to different time periods in history.

185

00:31:01,000 --> 00:31:07,000

Paul McLean suggested that the forebrain itself could actually be subdivided into three different parts.

186

00:31:08,000 --> 00:31:17,000

One of which he called the reptilian complex, the other he called the paleo-mimilion complex, or later was referred to as the limbic system.

187

00:31:18,000 --> 00:31:21,000

The other he called the neomimilion complex.

188

00:31:22,000 --> 00:31:29,000

This was significant because he tied these three different aspects of the forebrain to evolutionary history and to development.

189

00:31:30,000 --> 00:31:39,000

So he suggested that the more primitive reptilian brain was the oldest part of the brain and it was reminiscent of our evolving from reptiles.

190

00:31:40,000 --> 00:31:55,000

So the reptilian complex or the basal ganglia, McLean associated with some of the more aggressive

behaviors or territoriality of some of these things we typically associate with many reptilian species.

191

00:31:56,000 --> 00:32:01,000

If a human only had the reptilian part of the brain, they basically would be operating just by instinct.

192

00:32:02,000 --> 00:32:04,000

If they want food, they would just take it.

193

00:32:05,000 --> 00:32:10,000

If they want sex, they would just rape the person. There'd be no higher order thought at all.

194

00:32:12,000 --> 00:32:23,000

Carl Sagan suggested that we need to actually focus on the reptilian brain because that's where these primitive urges of aggression and territorialism come from,

195

00:32:24,000 --> 00:32:27,000

especially in an age where we're involved with a lot of war and conflict.

196

00:32:28,000 --> 00:32:35,000

And where governments are appealing to our fear and our primitive aspects that are motivating us.

197

00:32:39,000 --> 00:32:52,000

But is it possible that the reptilian aspect of our brains, along with rare human anomalies like people born with tails, scaly skin and fused fingers,

198

00:32:52,000 --> 00:32:58,000

might be the result of something other than our evolution from prehistoric reptiles?

199

00:32:59,000 --> 00:33:07,000

Could it be evidence that the so-called reptilians not only exist, but that we may even share a similar genetic makeup?

200

00:33:09,000 --> 00:33:19,000

Ancient astronaut theorists believe the answer may lie with religious texts describing human-like entities with reptilian characteristics.

201

00:33:23,000 --> 00:33:31,000

Nog Hamadi Egypt, December 1945

202

00:33:34,000 --> 00:33:40,000

A farmer discovers a sealed earthenware jar containing 13 leather-bound papyrus books.

203

00:33:41,000 --> 00:33:52,000

These books, now known as the Nag Hamadi Codices, were written by the early Christians known as Gnostics in the first several centuries AD.

204

00:33:55,000 --> 00:34:04,000

These mysterious texts contain the Gospels of Thomas and Philip, as well as other previously unknown secret Gospels.

205

00:34:05,000 --> 00:34:14,000

Mixed in with the religious writings are poems, instructions for mystical practice, and a description of the origin of the universe.

206

00:34:15,000 --> 00:34:22,000

They shed a great deal of light on early religious issues, biblical texts and biblical history.

207

00:34:23,000 --> 00:34:29,000

But they made a mention of a very mysterious race of creatures that have become known as the Archons.

208

00:34:30,000 --> 00:34:35,000

We don't really know what the Archons were or even are.

209

00:34:36,000 --> 00:34:44,000

What's interesting is that there is actually a depiction and a description of the Archons looking definitively reptilian.

210

00:34:45,000 --> 00:34:50,000

So this has given rise to the idea that perhaps the reptilians, the Archons, were one and the same.

211

00:34:51,000 --> 00:34:55,000

They're very robot-like, very machine-like.

212

00:34:56,000 --> 00:34:59,000

And therefore very predictable.

213

00:35:00,000 --> 00:35:21,000

And given that you see the machine-like nature of so many reptilian animals and what have you in the human society, there is a correlation between the two and why the reptilian form is so common, an expression of this machine-like, unemotional, computer-like mentality.

214

00:35:22,000 --> 00:35:38,000

Considering that the reptilian aspect of our brains is believed to be responsible for our most aggressive and reflexive behaviors, is it possible the stories of the Archons really are describing reptilian humanoid beings?

215

00:35:39,000 --> 00:35:46,000

And might our own, so-called reptilian traits, really be the product of alien engineering?

216

00:35:47,000 --> 00:35:52,000

People focus on the Garden of Eden story in the Bible as if it's a one-off.

217

00:35:53,000 --> 00:35:58,000

Look around the world and you'll find similar stories on a similar theme.

218

00:35:59,000 --> 00:36:05,000

It seems to be talking about when humans were created, Adam and Eve.

219

00:36:06,000 --> 00:36:11,000

I would strongly suggest from my research that actually it's not talking about that at all.

220

00:36:11,000 --> 00:36:20,000

It's talking about the point when human genetics were interfered with and genetically manipulated.

221

00:36:21,000 --> 00:36:36,000

And so humans became at that point themselves a hybrid, which had a great infusion, I would suggest, of what I would call Archon genetics, symbolically the serpent in the Garden of Eden.

222

00:36:37,000 --> 00:36:47,000

One could make the argument that the being that approached Eve in the Garden of Eden might have been a reptilian.

223

00:36:48,000 --> 00:37:02,000

And one suggestion is that the whole idea of the Garden of Eden was nothing else but some type of a lab, a lab that was run by extraterrestrials in which we were ultimately created.

224

00:37:02,000 --> 00:37:08,000

Now this sounds absolutely insane and I'm aware of how this sounds.

225

00:37:09,000 --> 00:37:23,000

But if you look into the whole story along with all the other supporting accounts, then if you are of the same mindset, you could potentially come to the same conclusion.

226

00:37:24,000 --> 00:37:31,000

Are human beings really the product of genetic manipulation by extraterrestrial visitors?

227

00:37:32,000 --> 00:37:36,000

And where are ancestors some form of reptilian human hybrid?

228

00:37:38,000 --> 00:37:49,000

Many ancient astronaut theorists say yes and they believe that reptilian humano not only existed on our planet tens of thousands of years ago,

229

00:37:49,000 --> 00:37:54,000

but that they are alive and well and living among us to this day.

230

00:38:00,000 --> 00:38:04,000

Eugene, Oregon, 1982.

231

00:38:05,000 --> 00:38:10,000

Wes Penry woke up in his bedroom, feeling paralyzed and icy cold.

232

00:38:11,000 --> 00:38:21,000

He saw what he described as a horrible creature across the room, green, hairless, extremely muscular and with red glowing eyes.

233

00:38:22,000 --> 00:38:26,000

Wes was terrified until the creature disappeared from his room.

234

00:38:27,000 --> 00:38:41,000

During the early 1980s, I noticed that there were reports coming across of individuals who claimed to have had contact not with the small diminutive little grey beings or the Nordic blondes from the 50s.

235

00:38:42,000 --> 00:38:43,000

These were quite different.

236

00:38:44,000 --> 00:38:47,000

These were reptilian humanoid beings.

237

00:38:48,000 --> 00:38:51,000

In other words, humanoid beings that had reptilian physiology to their outer appearance.

238

00:38:52,000 --> 00:38:57,000

And they started showing up in some of the shadows of some of the more reliable cases that I was investigating.

239

00:39:01,000 --> 00:39:12,000

I'm aware of a number of cases where people have woken up in the middle of the night, sort of frozen in bed, unable to move and seen these seven to eight foot tall reptilian type creatures just hovering over them.

240

00:39:13,000 --> 00:39:21,000

And each and every person who's reported on this has just got a sense of just complete dread and hatred.

241

00:39:22,000 --> 00:39:30,000

Now, you could, I guess, make the argument that the person was so terrified, they assumed that the reptilians were hostile.

242

00:39:31,000 --> 00:39:32,000

That's an interesting angle to take.

243

00:39:33,000 --> 00:39:39,000

Maybe it's just they look fierce, they look intimidating, that we necessarily assume they are.

244

00:39:40,000 --> 00:39:41,000

Perhaps they're not.

245

00:39:43,000 --> 00:39:53,000

Could recent reports of human encounters with strange reptile-like creatures really be proof that our reptilian ancestors still exist?

246

00:39:54,000 --> 00:39:57,000

But if so, what is their objective?

247

00:39:58,000 --> 00:40:01,000

The reptilian agenda is very simple.

248

00:40:02,000 --> 00:40:13,000

They are seeking to hijack life on Earth to over now thousands of years and more.

249

00:40:14,000 --> 00:40:20,000

Infiltrate and infiltrate human society to change it into their image.

250

00:40:21,000 --> 00:40:30,000

To centralize power in the hands of those that represent their interests to the point where they dictate from a central point.

251

00:40:33,000 --> 00:40:39,000

You have to wonder just what role reptilians do play in this planet.

252

00:40:41,000 --> 00:40:47,000

And whether there's some kind of battle between various extraterrestrial races.

253

00:40:48,000 --> 00:41:02,000

And that the reptilians have been forced underground away from our civilization by other extraterrestrials who have, in a sense, won the battle for planet Earth.

254

00:41:03,000 --> 00:41:13,000

Because the reptilians seem hostile and look hostile, does that mean there's an agenda to take us over to wipe us out? I don't know.

255

00:41:14,000 --> 00:41:17,000

We could look at it from the perspective we like cattle.

256

00:41:17,000 --> 00:41:26,000

Reptilians have no desire to wipe us out, but in some capacity we're useful to them in the same way that a cow is useful to a farmer.

257

00:41:27,000 --> 00:41:31,000

Personally, I do not subscribe to the reptilian agenda.

258

00:41:31,000 --> 00:41:36,000

We are not slaves. We have free will. We can do whatever the hell we want.

259

00:41:37,000 --> 00:41:51,000

It is very easy for human beings to say, oh look, the reason why we're in this shape on planet Earth is because we're a slave species. We're beholden to them.

260

00:41:53,000 --> 00:42:04,000

I would have to say that the thing that will finally unite humans and reptoids together is actually the fact that we all descended from a common heritage.

261

00:42:04,000 --> 00:42:11,000

And even though we look different now, if we share our planet and have different physical appearances, it doesn't really matter.

262

00:42:11,000 --> 00:42:23,000

I think it would be great to reinvent humankind by introducing us to another alien species, so there are advantages to be had for contact with these entities.

263

00:42:24,000 --> 00:42:32,000

Do scaly humanoid creatures known as reptilians really exist?

264

00:42:33,000 --> 00:42:41,000

And if so, are they an alien created species, one which harbors a sinister plan for humanity?

265

00:42:42,000 --> 00:42:52,000

Or will they reveal themselves to be our genetic brothers and initiate a future where reptilians and humans finally become one?
