

1

00:00:00,000 --> 00:00:03,000

He is the man who harnessed lightning.

2

00:00:03,000 --> 00:00:05,000

He really is the quintessential wizard.

3

00:00:05,000 --> 00:00:10,000

He envisioned new technologies far before their time.

4

00:00:10,000 --> 00:00:13,000

These images would burst into his mind.

5

00:00:13,000 --> 00:00:18,000

He also claimed to have contact with other worldly beings.

6

00:00:18,000 --> 00:00:24,000

You have to wonder if extraterrestrials themselves weren't feeding him information.

7

00:00:25,000 --> 00:00:32,000

Nikola Tesla is considered one of the most innovative and mysterious men who ever lived.

8

00:00:32,000 --> 00:00:35,000

But was he simply a mad genius?

9

00:00:35,000 --> 00:00:39,000

Or might his brilliance have had extraterrestrial origins?

10

00:00:39,000 --> 00:00:46,000

He was actually being communicated with by extraterrestrials and publicly proclaimed this.

11

00:00:46,000 --> 00:00:53,000

Millions of people around the world believe we have been visited in the past by extraterrestrial beings.

12

00:00:54,000 --> 00:00:57,000

What if it were true?

13

00:00:57,000 --> 00:01:02,000

Did ancient aliens really help to shape our history?

14

00:01:02,000 --> 00:01:08,000

And if so, is there a connection to the genius of Nikola Tesla?

15

00:01:23,000 --> 00:01:30,000

New York City

16

00:01:30,000 --> 00:01:36,000

January 7th, 1943

17

00:01:36,000 --> 00:01:43,000

Famed inventor Nikola Tesla dies of a heart attack on the 33rd floor of the hotel building.

18

00:01:43,000 --> 00:01:48,000

The building was built in the year of Nikola Tesla.

19

00:01:48,000 --> 00:01:55,000

The inventor Nikola Tesla dies of a heart attack on the 33rd floor of the hotel New Yorker.

20

00:01:55,000 --> 00:02:04,000

Within hours of his body being discovered, his nephew arrives at room 3327 and discovers Tesla's remains,

21

00:02:04,000 --> 00:02:11,000

as well as his technical papers and notebooks have already been removed.

22

00:02:11,000 --> 00:02:17,000

Speculation spreads that the Federal Bureau of Investigation had seized the items

23

00:02:17,000 --> 00:02:21,000

and quickly designated them top secret.

24

00:02:21,000 --> 00:02:26,000

Nikola Tesla was completely paranoid about someone trying to kill him,

25

00:02:26,000 --> 00:02:33,000

and as soon as he died, U.S. government agents swooped in and confiscated all of his scientific papers.

26

00:02:33,000 --> 00:02:39,000

In a very short time, everything that he had been guarding with his life was gone.

27

00:02:39,000 --> 00:02:47,000

The official story is that nothing of any great significance was found with just a lot of scientific papers and documents.

28

00:02:47,000 --> 00:02:54,000

However, there have been a lot of rumors over the years that the material that was recovered was profoundly significant

29

00:02:54,000 --> 00:03:01,000

in terms of a lot of highly advanced scientific concepts.

30

00:03:01,000 --> 00:03:06,000

Just who was this mysterious figure known as Tesla?

31

00:03:06,000 --> 00:03:15,000

And why would his notebooks elicit so much interest from the United States government?

32

00:03:15,000 --> 00:03:21,000

The life of Nikola Tesla was a dramatic one from the very beginning.

33

00:03:21,000 --> 00:03:33,000

He was born at the stroke of midnight on July 10th, 1856, during a violent lightning storm in what is now Croatia.

34

00:03:33,000 --> 00:03:40,000

It was during an electrical storm, and the midwife saw this as a bad omen, but there was a flash of lightning.

35

00:03:40,000 --> 00:03:45,000

And Tesla's mother said, no, this will be a child of light.

36

00:03:45,000 --> 00:03:50,000

At an early age, Nikola Tesla showed a superior mind.

37

00:03:50,000 --> 00:03:58,000

He was already inventing things. He invented toys that used insects to power them.

38

00:03:58,000 --> 00:04:07,000

But he was fascinated by thunderstorms, and when he would see the lightning, he became fascinated with electricity.

39

00:04:07,000 --> 00:04:19,000

And he was determined that he was going to harness the power of the Earth and the universe for the benefit of mankind.

40

00:04:19,000 --> 00:04:28,000

In 1881, after eight years studying physics, math and engineering at universities in Gross Austria and Prague,

41

00:04:28,000 --> 00:04:35,000

Tesla became an electrical engineer for a telephone company in Budapest.

42

00:04:35,000 --> 00:04:46,000

Three years later, the 28-year-old moved to the United States and took a job in New York City, working for Thomas Edison.

43

00:04:46,000 --> 00:04:54,000

But very quickly, the two would become rivals in what became known as the War of the Currents.

44

00:04:54,000 --> 00:05:02,000

In a sense, you have dueling wizards. Edison was performing with direct current. Tesla came along with alternating current.

45

00:05:02,000 --> 00:05:07,000

Competing to win the right to harness Niagara Falls, that was the big prize.

46

00:05:07,000 --> 00:05:15,000

If you harness Niagara Falls, you would control all the power for the entire northeast.

47

00:05:15,000 --> 00:05:25,000

In Edison's direct current distribution system, the steady stream of electricity would lose potency as it traveled down the line.

48

00:05:25,000 --> 00:05:34,000

This required power plants every half mile and could only supply enough power to light bulbs.

49

00:05:34,000 --> 00:05:42,000

Tesla designed a far more sophisticated system utilizing alternating current, which could easily be manipulated along the way,

50

00:05:42,000 --> 00:05:48,000

allowing for not only light bulbs to be powered, but also other electric devices.

51

00:05:48,000 --> 00:05:57,000

Using Niagara Falls as a hydroelectric power source, Tesla's system could illuminate the entire northeast.

52

00:05:57,000 --> 00:06:05,000

It'd be like comparing a horse and buggy to a jet plane. Tesla had the jet plane. Edison had the horse and buggy.

53

00:06:05,000 --> 00:06:10,000

There is no comparison at all. Tesla had a quantum leap ahead.

54

00:06:12,000 --> 00:06:20,000

Edison criticized Tesla's model as highly dangerous in an effort to ensure that his system won out.

55

00:06:20,000 --> 00:06:29,000

He even went so far as holding public demonstrations using alternating current to electrocute cats and dogs.

56

00:06:29,000 --> 00:06:35,000

And even a rogue elephant.

57

00:06:35,000 --> 00:06:46,000

But Nikola Tesla's superior AC power system ultimately prevailed, and today it still remains the foundation of the world's power grid.

58

00:06:46,000 --> 00:07:01,000

Tesla allowed the world to be electrified, and not only that, he brought electricity from being kind of a useful thing to being a universal thing that could be used all throughout society.

59

00:07:01,000 --> 00:07:12,000

Nikola Tesla is one of the most amazing geniuses mankind has ever known. His ideas went far and beyond what was accepted at the time.

60

00:07:12,000 --> 00:07:20,000

If it hadn't been for Tesla, we would be living in very different times.

61

00:07:20,000 --> 00:07:30,000

But Nikola Tesla not only efficiently electrified the world, his legacy includes groundbreaking work on electric railroads,

62

00:07:30,000 --> 00:07:46,000

fluorescent and neon lights, wireless radio communications, X-ray, remote control, turbine engines,

63

00:07:46,000 --> 00:08:01,000

speedometers, helicopters, and even torpedoes. By the time of his death, Tesla held nearly 700 worldwide patents.

64

00:08:01,000 --> 00:08:15,000

Nikola Tesla was one of the world's greatest inventors. Tesla was like Leonardo da Vinci. He had the mind of a futurist, and he was able to do incredible things.

65

00:08:15,000 --> 00:08:26,000

During Nikola Tesla's time, the Industrial Revolution was firmly taking hold. Factories using steam and coal power replaced manual labor.

66

00:08:26,000 --> 00:08:34,000

Hundreds of thousands of miles of railway and roads were built, dramatically changing the landscape of society.

67

00:08:34,000 --> 00:08:41,000

But this extraordinary innovation came at a price, a complete disregard for the environment.

68

00:08:41,000 --> 00:08:53,000

Nikola Tesla said that there was a difference between progress and technology. Progress benefits mankind. Technology does not necessarily do that.

69

00:08:53,000 --> 00:09:00,000

If you have a technology that is polluting the planets, that's not progress.

70

00:09:00,000 --> 00:09:06,000

But just how is it that Nikola Tesla was so far ahead of his time?

71

00:09:07,000 --> 00:09:16,000

For decades, the forward-thinking inventor, a man shrouded in mystery, has fascinated scholars and researchers.

72

00:09:16,000 --> 00:09:27,000

Tesla came from a very strange area. Actually, it wasn't too far from Transylvania. He was tall and thin. He spoke 11 or 12 different languages.

73

00:09:27,000 --> 00:09:35,000

And he does these fantastic inventions and fantastic performances. So he had this mystique about him.

74

00:09:35,000 --> 00:09:51,000

Nikola Tesla is born at a time which coincidentally coincides with an ancient Zoharic prophecy that speaks about the opening of the gates of wisdom upon the Earth.

75

00:09:51,000 --> 00:09:59,000

And who's born at this time? Nikola Tesla. Albert Einstein. This is the beginning of so many things.

76

00:10:03,000 --> 00:10:16,000

What could there really be something more to the prophecies, rumors and wild speculations surrounding Nikola Tesla? Something perhaps even otherworldly.

77

00:10:17,000 --> 00:10:24,000

Throughout history, there have been various prophets and scientists that have really affected the human evolution.

78

00:10:24,000 --> 00:10:29,000

Like Einstein, Galileo, Copernicus. And Tesla is definitely one of these type of people.

79

00:10:29,000 --> 00:10:36,000

We have to wonder if these people aren't somehow involved in some larger plan of influence on humanity as a whole.

80

00:10:37,000 --> 00:10:43,000

Some researchers into Tesla think that he was some kind of special human receiver.

81

00:10:43,000 --> 00:10:55,000

And if that's the case, then we have someone who the ETs were helping to move along and develop the amazing inventions that light the world today.

82

00:10:56,000 --> 00:11:12,000

Is it possible that Tesla knew he was on a mission? Was he attempting to up level our technology to the point at which we would be capable of having all of the abilities of those who in ancient times were called the gods?

83

00:11:13,000 --> 00:11:22,000

Is it possible, as some ancient astronaut theorists suggest, that Nikola Tesla was being influenced by extraterrestrials?

84

00:11:24,000 --> 00:11:28,000

Extra-terrestrials on a mission to advance mankind?

85

00:11:31,000 --> 00:11:39,000

Perhaps answers can be found by further examining the inspiration behind one of Tesla's greatest achievements.

86

00:11:43,000 --> 00:11:46,000

Cambridge, Massachusetts.

87

00:11:46,000 --> 00:11:52,000

The Massachusetts Institute of Technology is home to some of the world's greatest minds.

88

00:11:53,000 --> 00:12:01,000

MIT researchers are on the forefront of innovation, including the development of wireless transmission of power.

89

00:12:02,000 --> 00:12:08,000

Efficient wireless transmission of electricity has eluded scientists for years.

90

00:12:08,000 --> 00:12:16,000

Radio waves, microwaves, and even laser beam transmission of power have fallen short.

91

00:12:16,000 --> 00:12:25,000

But in 2007, MIT researchers were able to safely transmit power wirelessly seven feet across a room.

92

00:12:26,000 --> 00:12:31,000

A feat heralded as a first step to cutting the power cord.

93

00:12:31,000 --> 00:12:44,000

Incredibly, a world in which all electrical devices would be automatically powered at all times, requiring no charging or wires, was envisioned more than a century earlier.

94

00:12:45,000 --> 00:12:48,000

By inventor Nikola Tesla.

95

00:12:49,000 --> 00:12:55,000

And by some accounts, he was close to actually achieving that goal.

96

00:12:57,000 --> 00:13:05,000

The ideas of Tesla for wireless power have only been briefly investigated by various scientists.

97

00:13:05,000 --> 00:13:16,000

And the tests that were done by Tesla in 1899 to 1900 Colorado Springs verified the fact that the use of wireless was actually possible.

98

00:13:18,000 --> 00:13:24,000

Tesla went out to Colorado Springs to see if he could send electricity miles, which is a tremendous achievement.

99

00:13:24,000 --> 00:13:28,000

But he had a huge tower and there was 200 feet to the top.

100

00:13:28,000 --> 00:13:37,000

His assistant was located at the laboratory and Tesla said, when I give you the signal, I want you to throw the switch and fire up the wireless system.

101

00:13:37,000 --> 00:13:41,000

And Tesla probably walked four miles away.

102

00:13:41,000 --> 00:13:49,000

Tesla inserted light bulbs into the earth to see if his tower was in fact creating a wireless circuit with the ground.

103

00:13:49,000 --> 00:13:52,000

If so, the bulbs would light up.

104

00:13:52,000 --> 00:13:55,000

These light bulbs were being lit.

105

00:13:55,000 --> 00:14:01,000

So he was able to establish that he could transmit electrical power over great distances.

106

00:14:01,000 --> 00:14:03,000

But he did keep it a secret.

107

00:14:03,000 --> 00:14:09,000

He even kept the mechanics a secret from his assistant who didn't totally know all the details of what he was doing.

108

00:14:12,000 --> 00:14:19,000

Shoram, New York, 1901.

109

00:14:19,000 --> 00:14:27,000

Tesla convinces banker JP Morgan to give him \$150,000 for the construction of a radio station.

110

00:14:27,000 --> 00:14:35,000

But instead, he uses the money to build a giant wireless transmitter he calls Wardencllyffe Tower.

111

00:14:36,000 --> 00:14:43,000

Wardenclyffe was 187 feet to the top, but it also went 120 feet down into the ground.

112

00:14:43,000 --> 00:14:54,000

Tesla had envisioned receiving stations which would look just like the Wardenclyffe Tower at different nodal points around the earth.

113

00:14:54,000 --> 00:14:59,000

So he would jump energy by means of wireless from station to station.

114

00:14:59,000 --> 00:15:04,000

He even thought that he could eventually use the same system to jump power to different planets.

115

00:15:05,000 --> 00:15:14,000

But Tesla's dream of creating a highly efficient broadcast of wireless electricity was cut short when in 1904,

116

00:15:14,000 --> 00:15:22,000

its funder JP Morgan discovered Tesla's true intentions to provide free power to everyone on the planet.

117

00:15:22,000 --> 00:15:29,000

With lack of additional funding, by 1908 the project was completely abandoned.

118

00:15:29,000 --> 00:15:35,000

And in 1917, the tower was demolished.

119

00:15:37,000 --> 00:15:42,000

No company, no corporation wants to give away its technology freely.

120

00:15:42,000 --> 00:15:48,000

So Tesla was shut down so that the world wouldn't have free energy.

121

00:15:48,000 --> 00:15:55,000

But just how was Tesla able to transmit electricity wirelessly for several miles

122

00:15:55,000 --> 00:16:00,000

when modern scientists can only manage seven feet?

123

00:16:00,000 --> 00:16:08,000

Tesla credited his many inventions to the ability to realize them entirely in his mind.

124

00:16:08,000 --> 00:16:19,000

He also described experiencing intense flashes of light, which were followed by moments of intense creativity and clarity.

125

00:16:19,000 --> 00:16:26,000

He would see an invention appear before his eyes in almost holographic detail.

126

00:16:26,000 --> 00:16:33,000

He said that he could rotate these visions, take them apart piece by piece,

127

00:16:33,000 --> 00:16:42,000

and he knew exactly how he was going to build these inventions based on his visionary experiences.

128

00:16:42,000 --> 00:16:48,000

One of his greatest creations is the rotating magnetic field, and that came in a flash of intuition.

129

00:16:48,000 --> 00:16:55,000

He felt that we were receivers, that all impulses came from the outside and that we worked on these impulses.

130

00:16:55,000 --> 00:16:59,000

So he doesn't believe that they come from dreams or inner visions.

131

00:16:59,000 --> 00:17:03,000

He really felt that we were in a sense self-propelled robots.

132

00:17:06,000 --> 00:17:15,000

Some ancient astronaut theorists believe there may be another explanation for Tesla's uncanny abilities and mysterious visions.

133

00:17:16,000 --> 00:17:25,000

They suggest these spontaneous episodes are proof that Tesla was receiving information from an other worldly source.

134

00:17:25,000 --> 00:17:29,000

These images would literally burst into his mind.

135

00:17:29,000 --> 00:17:38,000

Somehow, somewhere, some connection was made, and it's the same way that biblical prophets received their prophecy.

136

00:17:38,000 --> 00:17:43,000

Nikola Tesla was clearly in touch with something.

137

00:17:44,000 --> 00:17:52,000

You have to wonder if extraterrestrials themselves weren't feeding him images of inventions that only he could understand.

138

00:17:52,000 --> 00:18:03,000

Nikola Tesla felt there was a knowledge base located somewhere in the universe that all of humanity could tap into

139

00:18:03,000 --> 00:18:08,000

if they just knew how to properly tune their mind to this knowledge base.

140

00:18:09,000 --> 00:18:19,000

Is it possible Nikola Tesla was actually being fed images to a system in furthering mankind?

141

00:18:19,000 --> 00:18:31,000

And if so, could Tesla have tapped into an ancient source of knowledge, perhaps even rediscovering technology that may have been used before?

142

00:18:31,000 --> 00:18:40,000

We have these stories of towers that might have relayed energy, like the obelisks that we can find all around the world,

143

00:18:40,000 --> 00:18:46,000

that they at some point were all connected and that they were feeding off the Earth's magnetic grid.

144

00:18:46,000 --> 00:18:57,000

It's been discovered in ancient Egyptian temples and tombs, carvings that look suspiciously like modern-day light bulbs and Tesla coils.

145

00:18:58,000 --> 00:19:06,000

Was there a certain technology and energy system of ancient times that we still have remnants of today?

146

00:19:06,000 --> 00:19:12,000

Giant pyramids, obelisks, huge standing stones and towers?

147

00:19:12,000 --> 00:19:18,000

Perhaps they were all part of some extraterrestrial huge energy system.

148

00:19:21,000 --> 00:19:26,000

Was Tesla's Wardenclyffe Tower meant to connect to an ancient energy grid?

149

00:19:27,000 --> 00:19:32,000

Powered not only by the Earth, but eventually by other planets as well.

150

00:19:32,000 --> 00:19:43,000

And if so, is it possible Nikola Tesla was communicating with advanced celestial beings that visited Earth thousands of years ago?

151

00:19:45,000 --> 00:19:55,000

Perhaps further clues can be found with the mysterious radio transmissions Tesla claimed he received in 1899 from outer space.

152

00:19:57,000 --> 00:20:02,000

Colorado Springs, July 1899.

153

00:20:05,000 --> 00:20:16,000

While testing a magnifying transmitter built to track storms, Nikola Tesla claims he received some sort of transmission from an unknown source.

154

00:20:19,000 --> 00:20:26,000

One night he was tracking thunderstorms 600 miles away, but all of a sudden he heard these beeps.

155

00:20:28,000 --> 00:20:37,000

And it was three beats in sequence, and so it was mathematical and it didn't make any sense to him.

156

00:20:37,000 --> 00:20:44,000

And the more he thought about it, he thought that they came from outer space, perhaps from the Martians.

157

00:20:47,000 --> 00:20:54,000

Mars orbit brings it close to the Earth periodically about once every 1.8 years.

158

00:20:54,000 --> 00:21:01,000

And at one of those close encounters, he believed he was picking up signals from Mars.

159

00:21:01,000 --> 00:21:13,000

He most likely had a radio receiver that was sensitive enough to receive radio waves, as we now know, come from galaxies and lots of different extra-terrestrial sources.

160

00:21:13,000 --> 00:21:16,000

So he interpreted them as signals from ETs.

161

00:21:16,000 --> 00:21:21,000

But perhaps he had an open channel that we really still don't understand today.

162

00:21:22,000 --> 00:21:30,000

Tesla believed it's absurd to think with the only intelligent beings in the universe if that's the case, where are they in the intelligence hierarchy,

163

00:21:30,000 --> 00:21:35,000

and why wouldn't they want to communicate with an intelligent force on the Earth?

164

00:21:38,000 --> 00:21:47,000

Tesla reported this otherworldly communication and proclaimed his belief in extra-terrestrials in February of 1901.

165

00:21:47,000 --> 00:21:52,000

In an article for Collier's Weekly titled, Talking with the Planets.

166

00:21:53,000 --> 00:22:01,000

Tesla became obsessed with trying to receive further radio communications from other planets.

167

00:22:01,000 --> 00:22:12,000

Based on these transmissions that Tesla was receiving, he developed the theory that this extra-terrestrial presence had been on Earth for a millennia.

168

00:22:12,000 --> 00:22:20,000

That these extra-terrestrials had been controlling mankind from the very beginning.

169

00:22:20,000 --> 00:22:23,000

How far did these communications go?

170

00:22:23,000 --> 00:22:30,000

Did it lead to the point where he was actually able to receive useful information that was helping him build his inventions?

171

00:22:30,000 --> 00:22:39,000

Many believe that this is what happened, and that Tesla had direct contact through the things he'd invented with extra-terrestrial intelligence.

172

00:22:40,000 --> 00:22:49,000

But the shocking revelation was shunned by Tesla's scientific peers, and led many to deem him a mad scientist.

173

00:22:49,000 --> 00:22:54,000

So you have Nikolai Tesla electrifying the world, literally.

174

00:22:54,000 --> 00:22:59,000

Then about the time that he had a falling out with J.P. Morgan, a very powerful man.

175

00:22:59,000 --> 00:23:05,000

He'd also had a legendary falling out with Edison, another legendary powerful man.

176

00:23:05,000 --> 00:23:17,000

Then it came out that he was trying to perhaps signal the planet Mars, and his enemies exploited this, I think, to try and discredit him.

177

00:23:17,000 --> 00:23:28,000

In the early 1900s, it was rumored that Tesla was being considered to receive the Nobel Prize, but mysteriously, he never did.

178

00:23:28,000 --> 00:23:33,000

Even today, scientists don't take him into account the way they should.

179

00:23:33,000 --> 00:23:41,000

Tesla talked about atoms working like solar systems, and that light could work as a wave and a particle.

180

00:23:41,000 --> 00:23:53,000

Einstein got a Nobel Prize for saying light worked like a particle, and Bohr and Rutherford got a Nobel Prize for saying that atoms were like little solar systems.

181

00:23:53,000 --> 00:23:59,000

So why is he removed from the history of quantum physics when he really belongs at the heart of it?

182

00:24:00,000 --> 00:24:07,000

So I think he's been unfairly treated by the physicists, and part of the reason is his attachment to extraterrestrials.

183

00:24:08,000 --> 00:24:13,000

Was Nikolai Tesla simply letting his imagination get the better of him?

184

00:24:13,000 --> 00:24:19,000

Or is it possible he really was in contact with extraterrestrial beings?

185

00:24:22,000 --> 00:24:24,000

Belgrade, Serbia.

186

00:24:25,000 --> 00:24:29,000

Housing more than 160,000 documents.

187

00:24:29,000 --> 00:24:42,000

The Nikolai Tesla Museum offers rare insight into some of Tesla's future plans, including what some believe to be drawings of spaceships.

188

00:24:42,000 --> 00:24:53,000

According to historians, Tesla began work on his flying machine in 1910, focusing on the use of field propulsion or anti-gravity.

189

00:24:53,000 --> 00:25:01,000

It is believed Tesla had discovered that high amounts of electricity could actually create lift in an object.

190

00:25:01,000 --> 00:25:14,000

Throughout the 1920s and 30s, Tesla continually talked about anti-gravity ships that could derive power from his Wardenclyffe towers that were going to be broadcasting power.

191

00:25:14,000 --> 00:25:21,000

He claimed that these ships did not have wings or fuel, they were completely electric.

192

00:25:23,000 --> 00:25:28,000

But were Tesla's designs truly the first of their kind?

193

00:25:28,000 --> 00:25:38,000

Or is it possible, as ancient astronaut theorists suggest, that similar vehicles had already visited the planet in the remote past?

194

00:25:38,000 --> 00:25:50,000

In the ancient Indian epics, the Vedas, we find references of Vimanas, those flying chariots that were used by the gods in order to travel from point A to point B.

195

00:25:50,000 --> 00:25:57,000

Some of these Vimanas were able to alter direction at the drop of a hat without any effort.

196

00:25:57,000 --> 00:26:05,000

So now reading this from a modern day perspective would suggest that some type of anti-gravity device was used.

197

00:26:05,000 --> 00:26:10,000

You could link this from the ancient to the modern world with the modern UFO phenomenon.

198

00:26:10,000 --> 00:26:19,000

And so the idea that Tesla might have worked on an anti-gravity device is very plausible to me.

199

00:26:20,000 --> 00:26:35,000

Are the depictions of flying machines in ancient Hindu texts like the Mahabharata really prove that Tesla had received other worldly knowledge in order to design anti-gravity spaceships?

200

00:26:35,000 --> 00:26:46,000

And if the so-called mad scientist actually did make contact with extraterrestrials, is it possible he continued to carry out their wishes?

201

00:26:46,000 --> 00:26:48,000

In secret.

202

00:27:16,000 --> 00:27:23,000

It's namesake to the world stage. Tesla.

203

00:27:23,000 --> 00:27:35,000

It's interesting to think in 1931 Tesla told reporters that he had converted a Pierce Arrow car into a completely electric car.

204

00:27:35,000 --> 00:27:41,000

Tesla showed them the car. He drove it around. It went as fast as 90 miles per hour.

205

00:27:41,000 --> 00:27:52,000

When you look at it, many of the inventions that Tesla talked about and even patented were eventually developed.

206

00:27:52,000 --> 00:27:59,000

The list of technologies that can be traced back to the drawing board of Nikola Tesla is endless.

207

00:27:59,000 --> 00:28:04,000

Modern humanoid robotics. Solar and wind power.

208

00:28:04,000 --> 00:28:13,000

Weather manipulation. Drones. And even planetary exploration vehicles.

209

00:28:13,000 --> 00:28:22,000

Getting as little as just two hours of sleep per day, the inventor's sole purpose on Earth appeared to be geared toward one end.

210

00:28:22,000 --> 00:28:28,000

Advancing technology for the future of the human race.

211

00:28:28,000 --> 00:28:34,000

He always had his eye on the future. And further, he was trying to shape the future through his inventions.

212

00:28:34,000 --> 00:28:51,000

Mr. Tesla was not unique in this. Many of the founders' leaders of religion also were compelled by inner experiences which pushed them to materialize these things in the world.

213

00:28:51,000 --> 00:28:59,000

So in a religious context, we would say that a religious leader is in touch with something divine.

214

00:28:59,000 --> 00:29:20,000

In a scientific context, we wouldn't necessarily use the word divine, but yet somehow somewhere people are being contacted, receiving communications, which are leading to the clear introduction of new things in humanity.

215

00:29:20,000 --> 00:29:32,000

Tesla seemed to have this drive that put everything else by the wayside. When he was working on an invention, food, sleep, relationships, human interaction, none of that mattered.

216

00:29:32,000 --> 00:29:43,000

It's almost as if he was on some type of a mission, a mission possibly with a greater plan under the influence of extraterrestrials.

217

00:29:43,000 --> 00:29:49,000

Was Nikola Tesla really inspired to invent by an extraterrestrial source?

218

00:29:49,000 --> 00:30:04,000

As some ancient astronaut theorists suggest. And if so, might further clues be found in what some believe to be the rantings of a madman.

219

00:30:04,000 --> 00:30:19,000

By the time Nikola Tesla moved into his final home, the Hotel New Yorker, in January 1934, he had become better known for his eccentricities than his inventions.

220

00:30:19,000 --> 00:30:30,000

He reportedly was an extreme germaphobe, preferred to work in almost complete darkness, and was also obsessed with the number three.

221

00:30:30,000 --> 00:30:38,000

Tesla was definitely interested in numerology, and he was very superstitious. He had to circle a building three times before he entered.

222

00:30:38,000 --> 00:30:48,000

He had calculated nodal points around the planet, and they probably linked to the numbers three, six, and nine. And he said that the numbers were very important.

223

00:30:48,000 --> 00:31:00,000

Nikola Tesla was quoted as saying, if you knew the magnificence of the three, six, and nine, you would have a key to the universe.

224

00:31:00,000 --> 00:31:12,000

If we go to the great pyramid of Giza, not only are there the three larger pyramids at Giza, all side by side, mirroring the positions of the stars in Orion's belt,

225

00:31:12,000 --> 00:31:23,000

but we also see a group of three smaller pyramids immediately away from the three larger pyramids, three and three.

226

00:31:23,000 --> 00:31:37,000

Similarly, we find lots of evidence that nature uses threefold and sixfold symmetry, including the hexagonal tile shape of the common honeycomb.

227

00:31:37,000 --> 00:31:46,000

These shapes are in nature, and the ancients emulated these shapes in the building of their sacred architecture.

228

00:31:46,000 --> 00:31:57,000

So Tesla's quote is neatly mirrored in the actual archaeological evidence that we find in many ancient architectural sites around the world.

229

00:31:59,000 --> 00:32:06,000

Could the numbers three, six, and nine really offer clues to the inner workings of the universe?

230

00:32:07,000 --> 00:32:18,000

If so, is it possible that Tesla uncovered this profound secret and used this knowledge to push the boundaries of science and technology?

231

00:32:18,000 --> 00:32:25,000

Perhaps the answer can be found by examining Tesla's most controversial invention.

232

00:32:28,000 --> 00:32:32,000

New York City, July 1934

233

00:32:33,000 --> 00:32:42,000

On his 78th birthday, Nikola Tesla makes headlines on the front page of the New York Times for his alleged death beam.

234

00:32:43,000 --> 00:32:54,000

According to the article, the weapon could generate enough energy to bring down a fleet of 10,000 enemy airplanes as far as 250 miles away.

235

00:32:55,000 --> 00:33:10,000

Tesla apparently discovered that he could direct a stream of plasma plus solid particles for long distances through the air and kind of direct a lightning bolt, and he called this a death rave.

236

00:33:12,000 --> 00:33:18,000

Tesla wanted to invent a machine that would knock out enemy aircraft in the air.

237

00:33:18,000 --> 00:33:25,000

You would point it to the skies, turn it on, and all of a sudden those planes would just fall like that.

238

00:33:27,000 --> 00:33:37,000

Tesla felt that if every country had a particle beam weapon, then no country would ever be invaded because planes would be shot down and ships would be sunk.

239

00:33:38,000 --> 00:33:49,000

So he was trying to sell this particle beam weapon to the US government during World War II, and I think Franklin Roosevelt was basically looking at two possibilities.

240

00:33:49,000 --> 00:34:04,000

Einstein was discussing the possibility of an atom bomb. Tesla was discussing the possibility of a particle beam weapon, and it turned out the atom bomb was able to be invented, and that's the way they went.

241

00:34:08,000 --> 00:34:19,000

Although the death ray announcement failed to ignite interest by the US War Department, some say other innovative work by Tesla did catch their attention.

242

00:34:21,000 --> 00:34:36,000

Earlier in his career, while conducting research with one of his transformer coils, Nikola Tesla had a near-death experience when he came in contact with a resonating electromagnetic charge of 3.5 million volts.

243

00:34:38,000 --> 00:34:55,000

Tesla was working with 60-foot lightning bolts, and he made a mistake, and he almost got electrocuted, and he couldn't get out, and he had to get one of his workers to stop the lightning from happening, and he barely escaped with his life, and because of the shock that he had, he had a revelation.

244

00:34:56,000 --> 00:35:12,000

Tesla said that he entered a state of timelessness, and he could see the past and the future and the present all at one in this mystic vision, but he was paralyzed and he couldn't do anything about it.

245

00:35:12,000 --> 00:35:19,000

Tesla was being essentially electrocuted, and right then his assistant cut the power to him.

246

00:35:20,000 --> 00:35:26,000

But what Tesla said it had done was moved him through time and space.

247

00:35:30,000 --> 00:35:36,000

But is it really possible Tesla had found a way to break through the space-time continuum?

248

00:35:38,000 --> 00:35:46,000

Ancient astronaut theorists believe the answer might be found by looking at what has become known as the Philadelphia Experiment.

249

00:35:47,000 --> 00:36:04,000

According to reports, right before Tesla's death, he was working with Albert Einstein and the United States Navy at the Philadelphia Naval Yard to create an electromagnetically charged invisibility cloak for the USS Eldridge.

250

00:36:05,000 --> 00:36:20,000

They were attempting to do a stealth technology, and apparently they mounted a bunch of Tesla coils to make a bunch of plasma around a ship, and this is well known to help hide things from radar.

251

00:36:21,000 --> 00:36:37,000

But something very unexpected happened. The ship didn't just disappear from radar, it disappeared completely, and it reappeared with some of the crew actually embedded in the metal of the ship.

252

00:36:38,000 --> 00:36:50,000

Although mainstream scientists believe the so-called Philadelphia Experiment is a hoax, some insist the account is authentic.

253

00:36:51,000 --> 00:37:06,000

We have leaked testimony from classified levels of secrecy in the US government. The Philadelphia Experiment was real, that the soldiers on that ship got disoriented, and they ended up walking into the hull.

254

00:37:06,000 --> 00:37:13,000

And when the ship then rematerialized in our reality, their bodies melded with the metal in the hull.

255

00:37:14,000 --> 00:37:20,000

Had Tesla really discovered a way to travel through time and space?

256

00:37:22,000 --> 00:37:36,000

If so, might the secrets behind this technology, along with the blueprints for Tesla's death beam, have been included in the scientific documents that the FBI allegedly confiscated upon his death?

257

00:37:37,000 --> 00:37:46,000

Ancient astronaut theorists believe evidence of this might be found with the modern world's most sophisticated new weaponry.

258

00:37:50,000 --> 00:37:55,000

The Singapore Air Show, February 2014.

259

00:37:56,000 --> 00:38:09,000

An Israeli arms company known as Rafael Advanced Defense Systems reveals details of a laser defense system, capable of shooting missiles from the sky with a pulse of energy.

260

00:38:15,000 --> 00:38:19,000

The futuristic military hardware is called Iron Beam.

261

00:38:20,000 --> 00:38:30,000

The concept of Iron Beam is that it's essentially a high energy laser that is designed to rapidly heat up the target that it's aimed at.

262

00:38:30,000 --> 00:38:41,000

We're talking about aircraft, drones, missiles. Anything that could launch an attack on a city could be literally destroyed in the sky by iron beam.

263

00:38:41,000 --> 00:38:46,000

This sounds very much like Tesla's death ray.

264

00:38:46,000 --> 00:39:01,000

This is exactly the kind of technology that Tesla was talking about in the 1920s and 30s, of using these beam weapons to shoot down missiles and projectiles.

265

00:39:02,000 --> 00:39:10,000

The War Department sided with Einstein and Oppenheimer's atomic bomb, not with Tesla.

266

00:39:10,000 --> 00:39:23,000

But now what we're seeing is that Israel is developing this Iron Beam technology, because they realized that atomic weapons were far too destructive.

267

00:39:24,000 --> 00:39:35,000

Is it possible that Tesla developed a time viewing or time travel technology, and that he became aware of these developments?

268

00:39:37,000 --> 00:39:45,000

Tesla was once quoted as saying, the present is theirs, but the future for which I have really worked is mine.

269

00:39:45,000 --> 00:39:49,000

Did Tesla in fact see into the future?

270

00:39:49,000 --> 00:40:03,000

Might Iron Beam be proof that plans for the death ray not only existed, but also may have even been confiscated and carried out by the United States government?

271

00:40:04,000 --> 00:40:21,000

There are those who believe that Nikola Tesla was not only in contact with extraterrestrials, but was sent here to Earth by them to fulfill a mission and usher in a new age for mankind.

272

00:40:21,000 --> 00:40:31,000

One of the big questions is, who is Tesla? Is he in a sense an avatar, an enlightened being that

comes to the Earth to help humans?

273

00:40:32,000 --> 00:40:44,000

No one really knows exactly what's going on, but I think all great artists and Tesla saw himself as an artist feel that they're instruments of a higher purpose, and Tesla certainly felt that he was working along those lines.

274

00:40:44,000 --> 00:40:57,000

There is an agenda for humanity. There is a plan. And in every generation, whatever power it is that's behind the plan, sends to Earth certain specific souls.

275

00:40:57,000 --> 00:41:06,000

Who are by birth more inclined and able to be receptors to the higher knowledge?

276

00:41:09,000 --> 00:41:22,000

You have to wonder if Tesla was transplanted to Earth by extraterrestrials in order to envision and invent all of these amazing devices.

277

00:41:22,000 --> 00:41:33,000

If extraterrestrials put Tesla in place for a specific purpose, did they accomplish what they hoped to achieve? The answer may be no.

278

00:41:33,000 --> 00:41:45,000

Because if Tesla's technologies had been openly acknowledged here on Earth, we could have dreamed the deserts, we could be desalinating ocean water with tabletop energy levels,

279

00:41:45,000 --> 00:42:00,000

we could have a totally new and different world in which we don't have to pay for energy, which we have anti-gravity craft, which we have teleportation technology, and in which we truly have become a golden age here on Earth.

280

00:42:00,000 --> 00:42:02,000

That has not happened.

281

00:42:03,000 --> 00:42:11,000

Is it possible that Nikola Tesla really was influenced by otherworldly beings?

282

00:42:11,000 --> 00:42:20,000

Might he have been inspired to carry out an extraterrestrial experiment, as some ancient astronaut theorists suggest?

283

00:42:20,000 --> 00:42:27,000

And could it be that mankind was not ready to receive this advanced knowledge?

284

00:42:28,000 --> 00:42:30,000

Perhaps.

285

00:42:30,000 --> 00:42:40,000

But if such an audacious notion is true, then is it possible that we are now on the threshold of completing his experiment?

286

00:42:40,000 --> 00:42:52,000

And in doing so, might we reconnect not only with Tesla's genius, but with an alien intelligence that stretches throughout the galaxy?
