

1

00:00:00,000 --> 00:00:02,000

Mysterious skulls.

2

00:00:02,100 --> 00:00:06,640

The DNA didn't match anything known to be human.

3

00:00:06,740 --> 00:00:09,280

Bizarre mutations.

4

00:00:09,380 --> 00:00:12,980

This could be a reptilian type of humanoid life.

5

00:00:13,080 --> 00:00:15,180

And terrifying monsters.

6

00:00:15,280 --> 00:00:18,660

The Apache had a demonic figure that could petrify you

7

00:00:18,760 --> 00:00:20,560

through its gaze.

8

00:00:20,660 --> 00:00:22,720

In cultures throughout the world,

9

00:00:22,820 --> 00:00:27,360

there are stories of strange human-like gods.

10

00:00:27,860 --> 00:00:30,700

Could our ancestors have really encountered

11

00:00:30,800 --> 00:00:33,500

these otherworldly beings?

12

00:00:33,600 --> 00:00:36,960

And might they have a connection to us?

13

00:00:37,060 --> 00:00:40,540

What we have are remnants of the teachers

14

00:00:40,640 --> 00:00:44,580

that visited mankind in the remote past.

15

00:00:44,680 --> 00:00:47,640

Our DNA contains a lost extraterrestrial gene that's

16

00:00:47,740 --> 00:00:50,580

now resurfacing at the right time.

17

00:00:50,680 --> 00:00:54,220

Since the dawn of civilization, mankind

18

00:00:54,240 --> 00:00:58,320

has credited its origins to gods and other visitors

19

00:00:58,420 --> 00:01:00,580

from the stars.

20

00:01:00,680 --> 00:01:03,260

What if it were true?

21

00:01:03,360 --> 00:01:06,020

Did extraterrestrial beings really

22

00:01:06,120 --> 00:01:08,520

help to shape our history?

23

00:01:08,620 --> 00:01:13,660

And if so, might humans be just one link in the chain

24

00:01:13,760 --> 00:01:15,300

of alien evolution?

25

00:01:24,240 --> 00:01:28,060

megacol As Pop Rain

26

00:01:28,060 --> 00:01:32,180

deficit,

27

00:01:44,180 --> 00:01:53,540

number 41.

28

00:01:53,540 --> 00:02:01,540

of 2.8 pounds, 25% heavier than the average adult male skull.

29

00:02:01,540 --> 00:02:07,220

It has a cranial capacity of 1,500 cubic centimeters,

30

00:02:07,220 --> 00:02:09,220

20% greater than normal.

31

00:02:11,860 --> 00:02:15,060

And it is missing a sagittal suture.

32

00:02:15,060 --> 00:02:18,700

The connective tissue joint found between the parietal bones

33

00:02:18,700 --> 00:02:21,300

in all human skulls.

34

00:02:21,460 --> 00:02:26,020

This is just one of hundreds of strange, misshapen skulls

35

00:02:26,020 --> 00:02:29,540

that have been found on the southern coast of Peru,

36

00:02:29,540 --> 00:02:33,140

dating back to 1927.

37

00:02:33,140 --> 00:02:37,140

It was at this time that archaeologist Julio Teo

38

00:02:37,140 --> 00:02:40,740

first excavated a massive burial complex

39

00:02:40,740 --> 00:02:43,380

thought to have been built by the Baracas people

40

00:02:43,380 --> 00:02:47,780

who lived in the region from 800 BC to 100 BC.

41

00:02:48,740 --> 00:02:53,780

Julio Teo was the father of Peruvian archaeology.

42

00:02:53,780 --> 00:02:57,780

In the 1920s, he discovered mummy bundles,

43

00:02:57,780 --> 00:03:03,780

and in each mummy bundle was a person with an elongated skull.

44

00:03:03,780 --> 00:03:07,780

They were buried in family mausoleums,

45

00:03:07,780 --> 00:03:11,780

in some cases as deep as 30 feet into the bedrock.

46

00:03:11,780 --> 00:03:15,780

Mainstream archaeologists say the elongation

47

00:03:15,780 --> 00:03:19,780

is most likely the result of headbinding,

48

00:03:19,780 --> 00:03:22,780

which involves wrapping the heads of infants

49

00:03:22,780 --> 00:03:27,780

while their skulls are still soft in order to change the shape.

50

00:03:27,780 --> 00:03:30,780

It is a practice found in numerous cultures

51

00:03:30,780 --> 00:03:35,780

throughout the world that dates back thousands of years.

52

00:03:35,780 --> 00:03:40,780

But why would people desire to elongate the heads of their children?

53

00:03:40,780 --> 00:03:44,780

Ancient astronaut theorists suggest that headbinding

54

00:03:44,780 --> 00:03:48,780

originated with primitive humans who were attempting to imitate

55

00:03:48,780 --> 00:03:52,780

the appearance of extraterrestrial visitors.

56

00:03:52,780 --> 00:03:55,780

But according to researcher Brian Forster,

57

00:03:55,780 --> 00:03:59,780

the assistant director of the Baracas History Museum,

58

00:03:59,780 --> 00:04:03,780

headbinding would not account for the other anomalies

59

00:04:03,780 --> 00:04:06,780

that the Baracas skulls exhibit.

60

00:04:07,780 --> 00:04:11,780

About 5% of the elongated skulls that we find in Baracas

61

00:04:11,780 --> 00:04:16,780

are so complex in shape and size that it's hard to believe

62

00:04:16,780 --> 00:04:21,780

that they're the result of any form of cranial deformation or headbinding.

63

00:04:22,780 --> 00:04:25,780

Not only are they elongated vertically,

64

00:04:25,780 --> 00:04:29,780

but also the eye sockets are much larger than normal.

65

00:04:30,780 --> 00:04:33,780

There are two holes in the back of the skull,

66

00:04:33,780 --> 00:04:38,780

called foramen, through which blood and nerve flow occurred,

67

00:04:38,780 --> 00:04:42,780

and also their jaws were very robust.

68

00:04:43,780 --> 00:04:49,780

Among the largest of them, we find skulls 60% heavier than normal human skulls

69

00:04:49,780 --> 00:04:55,780

at a brain capacity that is 2.5 times larger than the normal human brain.

70

00:04:59,780 --> 00:05:05,780

But if these elongated skulls were not the result of the ancient practice of headbinding,

71

00:05:05,780 --> 00:05:10,780

then just who or what were these mysterious beings?

72

00:05:11,780 --> 00:05:17,780

In 2014, DNA testing was performed on Baracas skull number 44,

73

00:05:17,780 --> 00:05:20,780

which rendered surprising results.

74

00:05:21,780 --> 00:05:23,780

Some initial DNA testing has been done,

75

00:05:23,780 --> 00:05:27,780

and the results, according to the geneticists, are quite scartling.

76

00:05:27,780 --> 00:05:32,780

There were certain segments of the DNA that didn't match anything known to be human.

77

00:05:33,780 --> 00:05:39,780

What it suggests to me is that Baracas could very well have been an ancient bloodline

78

00:05:39,780 --> 00:05:46,780

related to Homo sapiens, but not specifically Homo sapiens itself.

79

00:05:48,780 --> 00:05:51,780

When you look at this kind of archaeological evidence,

80

00:05:51,780 --> 00:05:56,780

you're seeing concrete, tangible DNA testable proof

81

00:05:57,780 --> 00:06:02,780

that extraterrestrials walked on Earth right among us.

82

00:06:03,780 --> 00:06:11,780

Personally, I think it is quite possible that what we have there are remnants of the so-called teachers

83

00:06:11,780 --> 00:06:15,780

that visited mankind in the remote past.

84

00:06:17,780 --> 00:06:23,780

Could it be that this skull and other similar skulls found in southern Peru

85

00:06:23,780 --> 00:06:26,780

are something other than human?

86

00:06:27,780 --> 00:06:31,780

While mainstream scholars continue to dismiss this possibility,

87

00:06:31,780 --> 00:06:37,780

there is now evidence that at one time the Earth was inhabited by other species

88

00:06:37,780 --> 00:06:43,780

that possessed intelligence equal to, or even greater than, humans.

89

00:06:47,780 --> 00:06:51,780

Gibraltar, September 1, 2014.

90

00:06:52,780 --> 00:06:57,780

Inside Gorham's cave, on the edge of the Mediterranean Sea,

91

00:06:57,780 --> 00:07:05,780

anthropologists announce a finding that fundamentally changes our understanding of early human

history.

92

00:07:05,780 --> 00:07:12,780

A pattern of cross-hatched lines carved into the rock over 39,000 years ago

93

00:07:12,780 --> 00:07:17,780

is the first known example of cave art created not by our ancestors,

94

00:07:17,780 --> 00:07:22,780

but by another intelligent species, the Neanderthals.

95

00:07:23,780 --> 00:07:29,780

Previous to this, it was generally regarded that only anatomically modern humans had that capability.

96

00:07:29,780 --> 00:07:37,780

That cave paintings and etchings and making of figurines was really something that was restricted to modern humans.

97

00:07:37,780 --> 00:07:45,780

And so the Gibraltar site clearly indicates that Neanderthals had the capacity for symbolic

representation.

98

00:07:46,780 --> 00:07:52,780

Like humans, Neanderthals are thought to have evolved from Homo erectus.

99

00:07:52,780 --> 00:07:57,780

But contrary to popular belief, they are not our ancestors.

100

00:07:57,780 --> 00:08:02,780

They were actually a separate species that lived alongside early humans.

101

00:08:03,780 --> 00:08:09,780

More and more evidence is coming to light that suggests that Neanderthals were at least socially intelligent,

102

00:08:09,780 --> 00:08:14,780

at least thinking in symbolic behavior, and therefore may have even been as far as we know,

103

00:08:14,780 --> 00:08:17,780

may have been even more intelligent than that also.

104

00:08:17,780 --> 00:08:23,780

We find lots of evidence that Neanderthals used tools perhaps in different ways than we did.

105

00:08:23,780 --> 00:08:31,780

Certainly the discovery of graves where flowers are buried, they love their children just as we love ours.

106

00:08:31,780 --> 00:08:35,780

The technology available to them is only now being discovered.

107

00:08:36,780 --> 00:08:44,780

DNA studies show that Neanderthals lived among modern humans for thousands of years

108

00:08:44,780 --> 00:08:48,780

and interbred with them before becoming extinct.

109

00:08:48,780 --> 00:08:56,780

And they were not the only other intelligent human-like species in prehistoric times.

110

00:08:57,780 --> 00:09:05,780

In 2003, scientists identified fluorescences known as the Hobbit people in Indonesia.

111

00:09:05,780 --> 00:09:14,780

And as recently as 2008, the species Donisa ben Hominin was discovered in southern Siberia.

112

00:09:15,780 --> 00:09:23,780

What is intriguing about this find is that DNA evidence suggests that they are genetically distinct

113

00:09:23,780 --> 00:09:30,780

from both Neanderthals and anatomically modern humans, suggesting perhaps that at 40,000 years ago

114

00:09:30,780 --> 00:09:37,780

you had as many as three different human forms on planet Earth.

115

00:09:39,780 --> 00:09:44,780

You know, there absolutely have to be still unknown human litigious out there,

116

00:09:44,780 --> 00:09:48,780

whether they're totally different species or varieties.

117

00:09:48,780 --> 00:09:55,780

I'm sure that the paleontologists of the present day and the near future will find more of our family tree.

118

00:09:57,780 --> 00:10:08,780

What we're now seeing is a Lord of the Rings type situation in which there are multiple Hominid populations coexisting on Earth at the same time.

119

00:10:09,780 --> 00:10:15,780

When we look at the Denisovans, we're seeing that they actually have traces in their DNA

120

00:10:15,780 --> 00:10:21,780

of a species that is completely unlike anything we've seen anywhere else on Earth.

121

00:10:21,780 --> 00:10:25,780

We don't know where it comes from and we don't know who these people are.

122

00:10:25,780 --> 00:10:28,780

It's a complete baffling mystery.

123

00:10:29,780 --> 00:10:37,780

Did Neanderthals and other ancient Hominids possess capabilities on par with,

124

00:10:37,780 --> 00:10:42,780

or perhaps even exceeding, those of our human ancestors?

125

00:10:42,780 --> 00:10:47,780

And if science is only now discovering the truth about these species,

126

00:10:47,780 --> 00:10:54,780

then what other forms of intelligent life may have also roamed the Earth thousands of years ago?

127

00:10:55,780 --> 00:11:03,780

My humans have shared the Earth with and interbred with species not indigenous to this planet.

128

00:11:03,780 --> 00:11:15,780

Ancient astronaut theorists suggest there may be further clues to be found with Pirancus skull number 44 by reconstructing its face.

129

00:11:15,780 --> 00:11:25,780

New York City, March 27th, 2015.

130

00:11:25,780 --> 00:11:35,780

Brian Forester has enlisted artist Marcia Moore to help him examine Pirancus skull number 44 in an entirely new way.

131

00:11:36,780 --> 00:11:43,780

Drawing on her experience doing facial reconstructions with 3D models,

132

00:11:43,780 --> 00:11:53,780

Marcia will try to bring the ancient skull back to life by scanning it onto a computer and digitally rebuilding its face.

133

00:11:53,780 --> 00:12:01,780

So the first thing that we're going to do, I'm going to get a visual,

134

00:12:01,780 --> 00:12:08,780

and now it's going to laser cut slices of this skull.

135

00:12:08,780 --> 00:12:12,780

And it's going to patch up this entire skull to make a 3D model.

136

00:12:12,780 --> 00:12:18,780

And we'll get to an accurate feel of this individual.

137

00:12:18,780 --> 00:12:22,780

If you'd like to take your skull away from the carousel,

138

00:12:22,780 --> 00:12:29,780

up here on the computer, this is how we generated the skull model with all of these little dots the laser picked up

139

00:12:29,780 --> 00:12:34,780

and was able to create a fairly accurate rendering of this skull.

140

00:12:34,780 --> 00:12:38,780

That's amazing.

141

00:12:38,780 --> 00:12:49,780

Analyzing the bone structure, Marcia begins to generate virtual layers of muscle and tissue to recreate the facial anatomy of the Pirancus skull.

142

00:12:49,780 --> 00:12:55,780

You can tell by this skull the cheeks are prominent, the chin is very prominent,

143

00:12:55,780 --> 00:13:00,780

the eyes, obviously the sockets are much larger and that's always difficult.

144

00:13:00,780 --> 00:13:04,780

I'm adding a little bit more length to the neck.

145

00:13:04,780 --> 00:13:14,780

I think that probably this skull had a very strong neck, so added material there, create the cranial formation of the skull.

146

00:13:14,780 --> 00:13:28,780

Based on the shape of the skull, Marcia approximates where to add additional tissue and muscle until finally a face emerges.

147

00:13:28,780 --> 00:13:30,780

That's remarkable.

148

00:13:30,780 --> 00:13:37,780

Yeah, so I'm going to show you the build up, slowly building up the cheeks, the jawline, the eyes.

149

00:13:37,780 --> 00:13:44,780

This again is a reconstruction, but it's an interpretation of what this physical could have looked like.

150

00:13:44,780 --> 00:13:46,780

And here she is.

151

00:13:46,780 --> 00:13:50,780

Well, you have brought a 2,000 year old skull to life.

152

00:13:50,780 --> 00:13:53,780

And answers some questions, but presents many more.

153

00:13:53,780 --> 00:13:56,780

Absolutely.

154

00:13:56,780 --> 00:14:06,780

Marcia's interpretation I find very intriguing because what she has been able to represent is atypical of the native people that we find in coastal areas.

155

00:14:06,780 --> 00:14:11,780

The Paragus culture disappeared 2,000 years ago.

156

00:14:11,780 --> 00:14:17,780

They left no descendants, nor did they leave oral tradition or written documentation of any sort.

157

00:14:17,780 --> 00:14:24,780

So we have no idea, in fact, who they were and where they came from.

158

00:14:25,780 --> 00:14:43,780

From Marcia's interpretation, I believe that it is possible that beings have come from other parts of our universe to this planet and have mingled with the genetics that were here.

159

00:14:43,780 --> 00:14:47,780

I believe that they're a subspecies of humanity.

160

00:14:48,780 --> 00:14:53,780

Could this be the face of an alien human hybrid?

161

00:14:53,780 --> 00:15:04,780

Or might Paragus skull number 44 have origins completely outside a planet Earth, as some ancient astronaut theorists suggest?

162

00:15:07,780 --> 00:15:16,780

I have seen those skulls close up, and the moment I was able to do this, it changes everything.

163

00:15:16,780 --> 00:15:34,780

Because if you compare a skull where you can prove that the skull was artificially elongated and you compare that to one of the Paragus skulls, then you can see a market difference between the two.

164

00:15:34,780 --> 00:15:40,780

I think personally that they are themselves the extraterrestrial.

165

00:15:41,780 --> 00:15:55,780

Is Paragus skull number 44 evidence of another intelligent, perhaps even extraterrestrial species living among humans in the distant past?

166

00:15:55,780 --> 00:16:08,780

Ancient astronaut theorists suggest that the facial reconstruction does resemble an ancient ruler that they believe was from the stars, the Egyptian pharaoh, Akhenaten.

167

00:16:09,780 --> 00:16:24,780

He has big eyes, he has an extended head, and in some ways he looks like one of the oddness like Akhenaten or their children with large extended heads.

168

00:16:25,780 --> 00:16:36,780

Akhenaten ruled in the 14th century BC and was considered a heretical pharaoh for changing the polytheistic religion of ancient Egypt.

169

00:16:36,780 --> 00:16:44,780

He declared there was only one god, Aten, a god he depicted as a disc in the sky.

170

00:16:45,780 --> 00:17:01,780

Akhenaten became enthralled with the Aten disc, and the Aten disc was something that was supposedly the sun, but it was depicted in a completely different way than the Egyptians had depicted the sun before.

171

00:17:01,780 --> 00:17:08,780

And so it's interesting to think of the Aten disc as possibly some kind of a spaceship.

172

00:17:09,780 --> 00:17:23,780

And so when you see these oddness like Akhenaten, you have to wonder if they're not some kind of extraterrestrials. They look a lot like the gray aliens.

173

00:17:24,780 --> 00:17:43,780

Akhenaten's reign also marked a radical change in art, transitioning from idealistic portrayals of people to much more realistic renditions, a fact which has only added to the speculation about the ancient pharaoh and his family's origins.

174

00:17:43,780 --> 00:17:58,780

There are so many illustrations of them painted on the temple walls, as well as granite sculptures of Akhenaten, of his wife Nefertiti, of their daughter Meretaten.

175

00:17:59,780 --> 00:18:09,780

Even King Tut was one of the children of Akhenaten and Nefertiti. There are busts of King Tut that also show an elongated skull.

176

00:18:09,780 --> 00:18:23,780

We're also seeing that they have a very narrow rib cage and the distance between their neck and their waist is longer than typical humans would have on Earth.

177

00:18:23,780 --> 00:18:43,780

You look at this granite bust of Meretaten where her head extends all the way back, there's no hair. And you tell me that if a guy actually made that as a mistake, that he would still be allowed to work or even allowed to finish the sculpture, he was sculpting what they really look like.

178

00:18:44,780 --> 00:19:06,780

Is the facial reconstruction of the paraca skull the face of an ancient astronaut? Does its similarity to the depictions of the Egyptian pharaoh Akhenaten provide evidence that our planet has, in fact, been visited by extraterrestrials?

179

00:19:07,780 --> 00:19:19,780

Ancient astronaut theorists say yes and believe that further proof of an extraterrestrial presence here on Earth can be found within humanity itself.

180

00:19:19,780 --> 00:19:48,780

Houston, Texas, 2010. Doctors at the Texas Heart Institute examine a 59-year-old man complaining of chest pains and make an astounding discovery. The patient has a three-chambered heart similar to that of a reptile.

181

00:19:49,780 --> 00:20:01,780

Researchers attributed the rare condition to an evolutionary phenomenon called edivism, when a lost trait of a distant ancestor reemerges in a modern organism.

182

00:20:03,780 --> 00:20:17,780

So the idea is if you look at where we evolved from, we were first fish, fish have a two-chambered heart, and then we came on land where we're more like a reptile that has a three-chambered heart, and then eventually the four-chambered heart as we became mammals and then humans.

183

00:20:18,780 --> 00:20:29,780

So interestingly, during development, that same sequence of evolution is played out again as embryos. So if there's any sort of defect in the embryo along the way, it could get stalled out of that earlier state.

184

00:20:30,780 --> 00:20:36,780

And now this man has a heart that's more typical of our distant ancestors, the reptiles.

185

00:20:37,780 --> 00:20:49,780

While the discovery of a human with a reptilian heart is incredibly rare, other genetic conditions have been found that suggest a link with reptiles.

186

00:20:50,780 --> 00:21:05,780

Since the 1800s, over 100 cases of human tails have been reported in medical journals. People with a disease, ichthyosis, have dry, scaly skin.

187

00:21:06,780 --> 00:21:15,780

And people with the diseases, called syndactyly and ectrodactyly, have fused fingers and claw-like hands.

188

00:21:16,780 --> 00:21:38,780

But if such anatomical irregularities are a link to our ancient ancestors, as some scientists suggest, could it be that they are not the remnants of a reptilian stage in human development, but instead reveal that humans once commingled with reptilian aliens?

189

00:21:39,780 --> 00:21:50,780

Ancient astronaut theorists say yes and believe that further clues can be found in the stories of China's first emperor, Fushi.

190

00:21:52,780 --> 00:21:59,780

Fushi is one of the mythical rulers of China and he's considered to be the original or prototypical man.

191

00:22:00,780 --> 00:22:04,780

He was created along with his sister, Niu Hua.

192

00:22:05,780 --> 00:22:18,780

They were humanoid in form in the sense that their upper bodies were that of humans, but their lower bodies were that of snakes, and they're often represented with snake tails intertwined together.

193

00:22:19,780 --> 00:22:34,780

Similar stories of reptilian humanoid beings exist in cultures around the ancient world, including Japan, Greece, and South America.

194

00:22:36,780 --> 00:22:41,780

We even have good drawings and reliefs of many of these fantastic creatures.

195

00:22:41,780 --> 00:22:48,780

And so is it possible that some of these creatures really are aliens that look like that?

196

00:22:49,780 --> 00:22:52,780

And it seems like in some cases that is probably the case.

197

00:22:56,780 --> 00:23:03,780

Other unusual anomalies also appear to mirror the descriptions of divine beings from ancient texts.

198

00:23:04,780 --> 00:23:15,780

Millions of infants are born with blue patches of skin called Mongolian spots, evoking the blue skin gods common to India and Egypt.

199

00:23:18,780 --> 00:23:32,780

There have also been many cases of gigantism throughout history, bringing to mind biblical stories of the Nephilim, giants that were said to be the hybrid offspring of humans and devils.

200

00:23:33,780 --> 00:23:36,780

And so are the divine beings called the watchers.

201

00:23:39,780 --> 00:23:49,780

Within us is the whole evolutionary development of humankind, as well as the other species that humans developed from, reptiles, fish, and so forth.

202

00:23:51,780 --> 00:24:02,780

Extrapolating this idea, if extraterrestrials had a hand in retooling our DNA, then do we also carry their genetic makeup within us as we would?

203

00:24:04,780 --> 00:24:09,780

We know today that our DNA contains a lot of junk DNA that we still don't understand.

204

00:24:10,780 --> 00:24:21,780

So when we see these genetic anomalies surface in physical form in children, it could be that it's not anomaly, it's actually a lost extraterrestrial gene, a marker that's now resurfacing at the right time.

205

00:24:24,780 --> 00:24:30,780

Like the Neanderthals, did extraterrestrials breed with early man thousands of years ago?

206

00:24:31,780 --> 00:24:37,780

Did they leave behind genetic evidence in our DNA that still exists today?

207

00:24:39,780 --> 00:24:49,780

Ancient astronaut theorists say yes and suggest that Earth may at one time have been home to not one alien race, but many.

208

00:24:50,780 --> 00:24:55,780

West Virginia, September 1952.

209

00:24:58,780 --> 00:25:07,780

Multiple witnesses report seeing a strange ball of light shooting across the night sky and landing in a nearby wooded area.

210

00:25:08,780 --> 00:25:16,780

Those who investigate the crash site describe seeing a 10 foot tom bird-like creature with glowing red eyes.

211

00:25:17,780 --> 00:25:22,780

It was this huge humanoid type figure anywhere from about 10 feet to 12 feet high.

212

00:25:22,780 --> 00:25:29,780

It had these fiery blazing eyes and was emitting these sparks and flashes of light.

213

00:25:30,780 --> 00:25:37,780

It was described as having a cow-like head, not unlike an ace of spades card in a deck of cards.

214

00:25:39,780 --> 00:25:45,780

The entire group was unanimous, and the entire group was unanimous.

215

00:25:45,780 --> 00:25:55,780

It was connected with the overflight of the strange light, and it was also connected with this red pulsating light that they saw

216

00:25:56,780 --> 00:26:06,780

And it was also connected with this red pulsating light that they saw.

217

00:26:08,780 --> 00:26:14,780

Curiously, Native American mythology also describes the same as those of the Argentineian.

218

00:26:15,780 --> 00:26:19,580

a similar half-bird, half-human creature

219

00:26:19,680 --> 00:26:25,960

that shared the planet with mankind thousands of years ago.

220

00:26:26,060 --> 00:26:28,860

The Apache had a demonic figure in their mythology,

221

00:26:28,960 --> 00:26:34,760

the giant owl man, who could petrify you through its gaze.

222

00:26:34,860 --> 00:26:37,300

It was truly a terrifying presence

223

00:26:37,400 --> 00:26:40,380

that could come at any time, particularly in the night

224

00:26:40,480 --> 00:26:43,800

sky, when owls fly.

225

00:26:43,860 --> 00:26:46,360

And it's a pretty common theme in a lot of Native American

226

00:26:46,460 --> 00:26:50,840

mythology, that there was a time in the past when the Earth

227

00:26:50,940 --> 00:26:56,600

was overrun by pretty scary monsters of various forms.

228

00:26:56,700 --> 00:26:58,880

And the big owl, the owl man, is one of these sort

229

00:26:58,980 --> 00:26:59,980

of representatives.

230

00:27:05,780 --> 00:27:09,720

Might the stories of owl man and other strange creatures

231

00:27:09,820 --> 00:27:12,980

describe beings that the Native Americans actually

232

00:27:13,040 --> 00:27:15,380

encountered?

233

00:27:15,480 --> 00:27:18,480

Ancient astronaut theorists say yes,

234

00:27:18,580 --> 00:27:22,220

and point to similar creation myths from across the world

235

00:27:22,320 --> 00:27:28,060

of gods that resemble not just anthropomorphic birds,

236

00:27:28,160 --> 00:27:34,200

but also reptiles, insects, and sea creatures.

237

00:27:34,220 --> 00:27:41,600

All around the world, we have figurines and carvings and paintings,

238

00:27:41,700 --> 00:27:46,100

rock paintings, of these very bizarre creatures that can be

239

00:27:46,200 --> 00:27:48,980

found not only on every continent,

240

00:27:49,080 --> 00:27:54,140

but once you compare them, they're also incredibly similar.

241

00:27:54,240 --> 00:27:58,920

So one has to wonder if these figurines and these statues

242

00:27:59,020 --> 00:28:01,560

of these different creatures,

243

00:28:01,620 --> 00:28:04,660

figurines and these statues of these different depictions

244

00:28:04,760 --> 00:28:07,220

of what they refer to as the gods,

245

00:28:07,320 --> 00:28:13,460

if they're actually rooted in some type of reality.

246

00:28:13,560 --> 00:28:15,900

Did our ancestors really encounter

247

00:28:16,000 --> 00:28:20,240

these intelligent life forms thousands of years ago?

248

00:28:20,340 --> 00:28:23,140

And if so, just what were they?

249

00:28:29,040 --> 00:28:30,440

Cambridge, Massachusetts.

250

00:28:31,620 --> 00:28:35,580

February, 2013.

251

00:28:35,680 --> 00:28:39,860

Analyzing data gathered by NASA's Kepler Space Telescope,

252

00:28:39,960 --> 00:28:42,760

astronomers at the Harvard Smithsonian Center

253

00:28:42,860 --> 00:28:48,300

for Astrophysics announced that 6% of all red dwarf stars

254

00:28:48,400 --> 00:28:52,500

have habitable, Earth-like planets.

255

00:28:52,600 --> 00:28:56,280

Because red dwarf stars burn much longer than our sun,

256

00:28:56,380 --> 00:28:58,880

the discovery raises the possibility

257

00:28:58,940 --> 00:29:02,040

that life on these planets could be much older

258

00:29:02,140 --> 00:29:05,440

and much different than life on Earth.

259

00:29:05,540 --> 00:29:07,740

The environment plays a really pivotal role

260

00:29:07,840 --> 00:29:10,680

in sort of the direction that organisms evolve.

261

00:29:10,780 --> 00:29:12,620

And so you can imagine that evolution played out

262

00:29:12,720 --> 00:29:14,620

on a different planet.

263

00:29:14,720 --> 00:29:16,280

It might follow the same types of rules,

264

00:29:16,380 --> 00:29:19,320

but have completely different end products.

265

00:29:19,420 --> 00:29:21,460

So it would look completely different.

266

00:29:21,560 --> 00:29:25,960

Let's go to any other star with planets around it.

267

00:29:26,060 --> 00:29:28,560

Intelligence is going to happen because of crises

268

00:29:29,340 --> 00:29:31,460

is going to happen because you can only survive

269

00:29:31,560 --> 00:29:33,860

without intelligence.

270

00:29:33,960 --> 00:29:36,960

But it could be from a reptile that we're a reptile equivalent.

271

00:29:37,060 --> 00:29:39,660

It could be from a quadruplet.

272

00:29:39,760 --> 00:29:41,860

It might be from a moscow creature.

273

00:29:41,960 --> 00:29:43,760

The cause is probably to be the same.

274

00:29:43,860 --> 00:29:46,360

The end result anatomically totally different.

275

00:29:50,660 --> 00:29:52,760

There could be a myriad of different forms

276

00:29:52,860 --> 00:29:55,660

that intelligent life takes throughout the cosmos.

277

00:29:55,860 --> 00:29:57,360

When we look to the earthly record

278

00:29:57,460 --> 00:29:59,860

of otherworldly beings that have visited Earth,

279

00:29:59,960 --> 00:30:02,060

they exhibit different characteristics.

280

00:30:02,160 --> 00:30:06,460

They have bird heads, dog heads, reptilian type forms.

281

00:30:06,560 --> 00:30:08,260

It's possible that these are the forms

282

00:30:08,360 --> 00:30:10,660

that these beings take on their home planet,

283

00:30:10,760 --> 00:30:12,760

and they might even coexist with beings

284

00:30:12,860 --> 00:30:14,460

that are even different from them.

285

00:30:17,760 --> 00:30:20,760

Is it possible that like the Neanderthals,

286

00:30:20,860 --> 00:30:23,460

Denisovans, and florescences

287

00:30:23,460 --> 00:30:27,360

that existed alongside humans here on Earth?

288

00:30:27,460 --> 00:30:29,660

There are similar intelligent beings

289

00:30:29,760 --> 00:30:31,460

that evolved differently from us

290

00:30:31,560 --> 00:30:34,460

on planets all across the universe.

291

00:30:36,060 --> 00:30:38,860

And if many such species do exist,

292

00:30:38,960 --> 00:30:40,860

light Earth have been visited

293

00:30:40,960 --> 00:30:43,860

by more than just one race of aliens.

294

00:30:44,760 --> 00:30:46,860

Ancient astronaut theorists believe

295

00:30:46,960 --> 00:30:49,860

that the answers lie not only in stories

296

00:30:49,960 --> 00:30:52,260

of divine beings from the past,

297

00:30:52,760 --> 00:30:56,860

but in sightings that continue to this very day.

298

00:31:02,260 --> 00:31:06,860

Fort McDowell, Arizona, February 2015.

299

00:31:08,260 --> 00:31:11,260

Thousands flock to this small desert community,

300

00:31:11,360 --> 00:31:13,660

20 miles outside of Phoenix,

301

00:31:13,760 --> 00:31:17,260

to attend the annual International UFO Congress.

302

00:31:19,460 --> 00:31:21,260

Many attendees and speakers

303

00:31:21,260 --> 00:31:24,260

share stories of being abducted by aliens,

304

00:31:24,360 --> 00:31:27,260

and their accounts describe extraterrestrials

305

00:31:27,360 --> 00:31:30,260

that take a variety of physical forms.

306

00:31:32,260 --> 00:31:34,260

Within the field of ethology,

307

00:31:34,360 --> 00:31:37,260

there are multiple types of aliens reported.

308

00:31:37,360 --> 00:31:39,260

This includes winged humanoids,

309

00:31:39,360 --> 00:31:43,260

like Muthman, the Houston Batman.

310

00:31:45,260 --> 00:31:48,260

It also includes so-called insectoids,

311

00:31:48,360 --> 00:31:50,260

which, as their name suggests,

312

00:31:50,260 --> 00:31:52,260

they look like large insects.

313

00:31:53,560 --> 00:31:55,260

And then we have the reptilians,

314

00:31:55,360 --> 00:31:58,260

bipedal, reptile-type creatures.

315

00:31:59,260 --> 00:32:01,260

I think it's highly possible that they've adapted

316

00:32:01,360 --> 00:32:04,260

and developed physically in those fashions

317

00:32:04,360 --> 00:32:09,260

in relation to the conditions on their relative home planet.

318

00:32:10,260 --> 00:32:12,260

I think there are all kinds of creatures

319

00:32:12,360 --> 00:32:15,260

with intelligence in this universe

320

00:32:15,360 --> 00:32:17,260

that would shock us.

321

00:32:17,360 --> 00:32:19,260

I think your environment determines

322

00:32:19,260 --> 00:32:22,260

what you're going to end up looking like eventually.

323

00:32:22,360 --> 00:32:24,260

I think after time,

324

00:32:24,360 --> 00:32:27,260

that complexity of who you are physically

325

00:32:27,360 --> 00:32:30,260

adapts to what that planet is.

326

00:32:32,260 --> 00:32:35,260

If you look at some of the Sumerian illustrations,

327

00:32:35,360 --> 00:32:38,260

you see an avian bird head

328

00:32:38,360 --> 00:32:40,260

on top of a very strong human body.

329

00:32:41,260 --> 00:32:43,260

You look on the Egyptian paintings.

330

00:32:43,360 --> 00:32:46,260

You have a human with an elongated skull

331

00:32:46,360 --> 00:32:48,260

and very green skin.

332

00:32:48,260 --> 00:32:51,260

And there is a one-to-one correlation between

333

00:32:51,360 --> 00:32:54,260

modern sightings that people are reporting,

334

00:32:54,360 --> 00:32:57,260

both from abduction contact experiences,

335

00:32:57,360 --> 00:33:00,260

as well as what we hear from insider testimony,

336

00:33:00,360 --> 00:33:03,260

and what we see in the most ancient records

337

00:33:03,360 --> 00:33:05,260

of contact with the gods.

338

00:33:05,360 --> 00:33:08,260

It's the same people they never really left.

339

00:33:10,260 --> 00:33:12,260

Could there be a connection

340

00:33:12,360 --> 00:33:14,260

between the strange-looking gods

341

00:33:14,360 --> 00:33:16,260

depicted by ancient civilizations

342

00:33:16,260 --> 00:33:18,260

and these present-day encounters

343

00:33:18,360 --> 00:33:20,260

with extraterrestrials?

344

00:33:21,260 --> 00:33:24,260

Are we, in fact, seen similar beings

345

00:33:24,360 --> 00:33:26,260

to the ones described by our ancestors

346

00:33:26,360 --> 00:33:29,260

thousands of years ago?

347

00:33:31,260 --> 00:33:34,260

Despite the many different kinds of aliens reported,

348

00:33:34,360 --> 00:33:36,260

there are certain distinct similarities

349

00:33:36,360 --> 00:33:39,260

within such sightings.

350

00:33:41,260 --> 00:33:43,260

Move on, the mutual UFO network.

351

00:33:43,260 --> 00:33:46,260

It's one of the longest-lasting, most respected

352

00:33:46,360 --> 00:33:49,260

UFO research groups in the world.

353

00:33:50,260 --> 00:33:54,260

Mufon's studies of UFO landings and humanoid cases

354

00:33:54,360 --> 00:33:59,260

has shown that most UFO events involving entities

355

00:33:59,360 --> 00:34:03,260

revolve around sightings of creatures that are humanoid.

356

00:34:03,360 --> 00:34:07,260

That's to say, two arms, two legs, a body, and a head.

357

00:34:09,260 --> 00:34:11,260

When we look at all of the different reports

358

00:34:11,260 --> 00:34:15,260

of extraterrestrials coming here to Earth,

359

00:34:15,360 --> 00:34:20,260

and they're all generally humanoid in form,

360

00:34:20,360 --> 00:34:23,260

and it would seem that the human form

361

00:34:23,360 --> 00:34:26,260

is very much a universal form.

362

00:34:32,260 --> 00:34:35,260

If intelligent life would evolve much differently

363

00:34:35,360 --> 00:34:39,260

on other planets, as mainstream science suggests,

364

00:34:40,260 --> 00:34:43,260

then why would so many people describe encounters

365

00:34:43,360 --> 00:34:47,260

with extraterrestrials that have human characteristics?

366

00:34:49,260 --> 00:34:53,260

There may well have been some original proto-alien civilization

367

00:34:53,360 --> 00:34:56,260

that seeded the universe.

368

00:34:56,360 --> 00:35:01,260

Over time, the image of creatures with two arms, two legs,

369

00:35:01,360 --> 00:35:05,260

a torso, and a head, two eyes, and a mouth pretty much

370

00:35:05,260 --> 00:35:11,260

rules throughout the entire spectrum of UFO activity and sightings.

371

00:35:12,260 --> 00:35:19,260

Now, that would imply that our lineage is something that is bipedal.

372

00:35:19,360 --> 00:35:25,260

Whether a creature walks upright with the face of an insect

373

00:35:25,360 --> 00:35:28,260

or the face of a human doesn't really matter.

374

00:35:28,360 --> 00:35:33,260

You still have a two-legged creature that originated somewhere.

375

00:35:36,260 --> 00:35:39,260

Given the number of humanoid appearing gods,

376

00:35:39,360 --> 00:35:44,260

it suggests that there is a common ancestor for all intelligent life in the universe,

377

00:35:44,360 --> 00:35:48,260

and perhaps we're on the verge of rediscovering that common ancestor.

378

00:35:51,260 --> 00:35:56,260

Could there be one common source for all intelligent life in the universe?

379

00:35:57,260 --> 00:36:03,260

A primordial species that seeded different planets with beings similar to ourselves.

380

00:36:04,260 --> 00:36:10,260

Ancient astronaut theorists believe the ultimate truth about mankind's origins

381

00:36:10,260 --> 00:36:18,260

might be found by examining not only our past, but also our future.

382

00:36:21,260 --> 00:36:24,260

June 2013.

383

00:36:25,260 --> 00:36:30,260

In an article for Forbes, graphic artist and researcher Nicolet Lam

384

00:36:30,260 --> 00:36:37,260

illustrates just how the human face might change over the next 100,000 years.

385

00:36:38,260 --> 00:36:45,260

With the help of a computational biologist and taking into account future technological,

386

00:36:45,260 --> 00:36:48,260

environmental, and genetic influences,

387

00:36:50,260 --> 00:36:55,260

he came up with eerie renderings that show an increasingly large cranium

388

00:36:55,260 --> 00:37:01,260

with a pronounced forehead, huge eyes, and more pigmented skin tone.

389

00:37:03,260 --> 00:37:06,260

As far as the future is, it's always really hard to predict,

390

00:37:06,360 --> 00:37:09,260

especially in terms of homo sapiens sapiens,

391

00:37:09,360 --> 00:37:14,260

because we've been so good at modifying our environment through our technology.

392

00:37:14,360 --> 00:37:17,260

So if you try to think about what we might look like in the future,

393

00:37:17,360 --> 00:37:20,260

it gets us a bit hard because we don't exactly know

394

00:37:20,360 --> 00:37:24,260

what these environmental pressures may be on us right now.

395

00:37:26,260 --> 00:37:30,260

While Lam's work was dismissed by some scientists as conjecture,

396

00:37:30,360 --> 00:37:37,260

anthropologists have found that humanity has changed greatly over the past 200,000 years.

397

00:37:38,260 --> 00:37:44,260

Homo sapiens have developed more delicate skeletons, smaller faces, and more pointed chins.

398

00:37:46,260 --> 00:37:52,260

And recent studies have shown the human body is still undergoing significant changes.

399

00:37:55,260 --> 00:38:01,260

So over the last 40,000 to 50,000 years, tooth sizes have reduced very, very dramatically.

400

00:38:01,360 --> 00:38:10,260

And this is largely the product of expansion of both cooking and, ultimately, the development of pottery.

401

00:38:11,260 --> 00:38:17,260

These cultural innovations for changing what we eat and how we eat

402

00:38:17,260 --> 00:38:22,260

led to dramatic declines in how large our jaws were

403

00:38:22,360 --> 00:38:26,260

and, ultimately, what our tooth sizes look like.

404

00:38:27,260 --> 00:38:31,260

The future direction of human evolution is difficult to chart.

405

00:38:31,360 --> 00:38:37,260

But certainly we would think that some continued expansion of brain size

406

00:38:37,360 --> 00:38:42,260

may be something that we're going to continue to see as we move forward in human evolution.

407

00:38:43,260 --> 00:38:50,260

In 2012, scientists from the University of Tennessee announced findings

408

00:38:50,360 --> 00:38:56,260

that show that human skull size has also increased dramatically just since the late 1800s.

409

00:38:58,260 --> 00:39:01,260

What they found is totally amazing.

410

00:39:01,360 --> 00:39:07,260

The average height of the skull increased by an astonishing 8 millimeters

411

00:39:07,260 --> 00:39:10,260

or almost 0.3 inches.

412

00:39:10,360 --> 00:39:17,260

The actual increase in brain volume caused by this height change is 200 cubic centimeters,

413

00:39:17,360 --> 00:39:19,260

which is the size of a tennis ball.

414

00:39:21,260 --> 00:39:27,260

Our jaws are becoming longer and narrower, and the size of the head is becoming bigger.

415

00:39:27,360 --> 00:39:30,260

Well, this starts to sound pretty familiar, doesn't it?

416

00:39:31,260 --> 00:39:35,260

Ancient astronaut Thea Respeculate

417

00:39:35,360 --> 00:39:42,260

that extended space travel may also lead us to appear more like the grays in the distant future.

418

00:39:43,260 --> 00:39:50,260

Some have suggested that the reason why the grays have these what appear to be atrophied bodies

419

00:39:50,360 --> 00:39:55,260

is because that over time their bodies changed.

420

00:39:55,260 --> 00:40:03,260

They too at some point had larger muscles, but because they became space travelers, their muscles atrophied.

421

00:40:04,260 --> 00:40:09,260

When you go to space, you don't have that pressure pushing down on you, so those muscles aren't used.

422

00:40:10,260 --> 00:40:13,260

And so you lose muscle very rapidly.

423

00:40:14,260 --> 00:40:18,260

Also associated with that, your bones begin to atrophy.

424

00:40:19,260 --> 00:40:24,260

We're talking about longer and longer missions out into space, going to Mars, going farther.

425

00:40:24,260 --> 00:40:28,260

And so astronauts will be subjected to these stresses for a long period of time.

426

00:40:32,260 --> 00:40:39,260

Is it possible that the gray aliens at one time looked more like us when they were planet-bound?

427

00:40:41,260 --> 00:40:44,260

And so we're on that same track.

428

00:40:46,260 --> 00:40:51,260

And we are becoming more and more like these gray aliens themselves.

429

00:40:54,260 --> 00:41:00,260

Our lineage has come about due to other extraterrestrials that are similar to us.

430

00:41:01,260 --> 00:41:08,260

Perhaps the lineage began elsewhere millions and millions of years ago.

431

00:41:12,260 --> 00:41:20,260

Are humans and perhaps even other extraterrestrial races that our ancestors encountered descendants of the grays?

432

00:41:21,260 --> 00:41:26,260

Did these otherworldly travelers generate intelligent life?

433

00:41:27,260 --> 00:41:30,260

Not only here on Earth, but throughout the universe.

434

00:41:32,260 --> 00:41:38,260

And might the course of human evolution lead us to become more and more like them?

435

00:41:40,260 --> 00:41:46,260

Perhaps we will discover that our true destiny is to continue their mission.

436

00:41:46,260 --> 00:41:52,260

And one day, join our alien ancestors in the stars.
