

1

00:00:00,535 --> 00:00:04,536

Some stories attribute great powers to the moon.

2

00:00:04,536 --> 00:00:08,537

It does have some effect on us.

3

00:00:08,537 --> 00:00:12,538

Since the time of the very first Apollo moon missions,

4

00:00:12,538 --> 00:00:16,539

researchers have poured over photos of the moon,

5

00:00:16,539 --> 00:00:20,540

looking for structures, and they've found some unusual things.

6

00:00:20,540 --> 00:00:24,541

Only 300 kilometers away from where Apollo 11 ended up landing,

7

00:00:24,541 --> 00:00:27,542

the moon was in the air.

8

00:00:27,542 --> 00:00:31,543

This area has undeniable architecture

9

00:00:31,543 --> 00:00:35,544

that looks like what you would see from obelisks.

10

00:00:35,544 --> 00:00:39,545

Somebody built something on the moon a long, long time ago,

11

00:00:39,545 --> 00:00:43,546

and I don't think it was Earthlings.

12

00:00:43,546 --> 00:00:47,548

The entire object may be of artificial origin.

13

00:00:47,548 --> 00:00:51,549

My question is, who built the moon?

14

00:00:51,549 --> 00:00:54,549

Since the dawn of the Apollo 11,

15

00:00:54,549 --> 00:00:57,550

who built the moon?

16

00:00:57,550 --> 00:01:00,551

Since the dawn of civilization,

17

00:01:00,551 --> 00:01:04,552

mankind has credited its origins to gods and other visitors

18

00:01:04,552 --> 00:01:08,553

from the stars. What if it were true?

19

00:01:08,553 --> 00:01:14,555

Did extraterrestrial beings really help to shape our history?

20

00:01:14,555 --> 00:01:18,556

And if so, might the answer be found

21

00:01:18,556 --> 00:01:22,557

not on Earth, but on the moon?

22

00:01:24,557 --> 00:01:30,559

Music

23

00:01:30,559 --> 00:01:36,561

Music

24

00:01:36,561 --> 00:01:40,562

Music

25

00:01:40,562 --> 00:01:44,563

Music

26

00:01:44,563 --> 00:01:48,564

Music

27

00:01:48,564 --> 00:01:52,565

Music

28

00:01:52,565 --> 00:01:57,566

Music

29

00:01:57,566 --> 00:02:02,568

Music

30

00:02:02,568 --> 00:02:07,569

Music

31

00:02:07,569 --> 00:02:12,570

Music

32

00:02:12,570 --> 00:02:17,572

Music

33

00:02:17,572 --> 00:02:21,573

Music

34

00:02:21,573 --> 00:02:26,574

Music

35

00:02:26,574 --> 00:02:31,575

Music

36

00:02:31,575 --> 00:02:36,577

Music

37

00:02:36,577 --> 00:02:41,578

Music

38

00:02:41,578 --> 00:02:46,579

Music

39

00:02:46,579 --> 00:02:50,580

Music

40

00:02:50,580 --> 00:02:55,582

Music

41

00:02:55,582 --> 00:03:00,583

Music

42

00:03:00,583 --> 00:03:06,585

Music

43

00:03:06,585 --> 00:03:11,586

Music

44

00:03:11,586 --> 00:03:16,587

Music

45

00:03:16,587 --> 00:03:21,589

Music

46

00:03:21,589 --> 00:03:26,590

Music

47

00:03:26,590 --> 00:03:31,591

Music

48

00:03:31,591 --> 00:03:36,593

Music

49

00:03:36,593 --> 00:03:41,594

Music

50

00:03:41,594 --> 00:03:45,595

Music

51

00:03:45,595 --> 00:03:50,596

Music

52

00:03:50,596 --> 00:03:55,598

Music

53

00:03:55,598 --> 00:04:00,599

Music

54

00:04:00,599 --> 00:04:05,600

Music

55

00:04:05,600 --> 00:04:10,602

Music

56

00:04:10,602 --> 00:04:14,603

Music

57

00:04:14,603 --> 00:04:19,604

Music

58

00:04:19,604 --> 00:04:24,605

Music

59

00:04:24,605 --> 00:04:29,607

Music

60

00:04:29,607 --> 00:04:34,608

Music

61

00:04:34,608 --> 00:04:39,610

Music

62

00:04:39,610 --> 00:04:43,611

Music

63

00:04:43,611 --> 00:04:48,612

Music

64

00:04:48,612 --> 00:04:53,613

Music

65

00:04:53,613 --> 00:04:58,615

Music

66

00:04:58,615 --> 00:05:03,616

Music

67

00:05:03,616 --> 00:05:08,617

Music

68

00:05:08,617 --> 00:05:12,618

Music

69

00:05:12,618 --> 00:05:17,620

Music

70

00:05:17,620 --> 00:05:22,621

Music

71

00:05:22,621 --> 00:05:27,622

Music

72

00:05:27,622 --> 00:05:32,624

Music

73

00:05:32,624 --> 00:05:37,625

Music

74

00:05:37,625 --> 00:05:41,626

Music

75

00:05:41,626 --> 00:05:46,627

Music

76

00:05:46,627 --> 00:05:51,629

Music

77

00:05:51,629 --> 00:05:56,630

Music

78

00:05:56,630 --> 00:06:01,631

Music

79

00:06:01,631 --> 00:06:06,633

Music

80

00:06:06,633 --> 00:06:10,634

Music

81

00:06:10,634 --> 00:06:15,635

Music

82

00:06:15,635 --> 00:06:20,636

Music

83

00:06:20,636 --> 00:06:25,638

Music

84

00:06:25,638 --> 00:06:30,639

Music

85

00:06:30,639 --> 00:06:35,640

Music

86

00:06:35,640 --> 00:06:39,642

Music

87

00:06:39,642 --> 00:06:44,643

Music

88

00:06:44,643 --> 00:06:49,644

Music

89

00:06:49,644 --> 00:06:54,646

Music

90

00:06:54,646 --> 00:06:59,647

Music

91

00:06:59,647 --> 00:07:04,648

Music

92

00:07:04,648 --> 00:07:08,649

Music

93

00:07:08,649 --> 00:07:13,651

Music

94

00:07:13,651 --> 00:07:18,652

Music

95

00:07:18,652 --> 00:07:23,653

Music

96

00:07:23,653 --> 00:07:28,655

Music

97

00:07:28,655 --> 00:07:33,656

Music

98

00:07:33,656 --> 00:07:37,657

Music

99

00:07:37,657 --> 00:07:42,658

Music

100

00:07:42,658 --> 00:07:47,660

Music

101

00:07:47,660 --> 00:07:52,661

Music

102

00:07:52,661 --> 00:07:57,662

Music

103

00:07:57,662 --> 00:08:02,664

Music

104

00:08:02,664 --> 00:08:06,665

Music

105

00:08:06,665 --> 00:08:11,666

Music

106

00:08:11,666 --> 00:08:16,667

Music

107

00:08:16,667 --> 00:08:21,669

Music

108

00:08:21,669 --> 00:08:26,670

Music

109

00:08:26,670 --> 00:08:31,671

Music

110

00:08:31,671 --> 00:08:35,673

Music

111

00:08:35,673 --> 00:08:40,674

Music

112

00:08:40,674 --> 00:08:45,675

Music

113

00:08:45,675 --> 00:08:50,677

Music

114

00:08:50,677 --> 00:08:55,678

Music

115

00:08:55,678 --> 00:09:00,679

Music

116

00:09:00,679 --> 00:09:04,680

Music

117

00:09:04,680 --> 00:09:09,682

Music

118

00:09:09,682 --> 00:09:14,683

Music

119

00:09:14,683 --> 00:09:19,684

Music

120

00:09:19,684 --> 00:09:24,686

Music

121

00:09:24,686 --> 00:09:29,687

Music

122

00:09:29,687 --> 00:09:33,688

Music

123

00:09:33,688 --> 00:09:38,689

Music

124

00:09:38,689 --> 00:09:43,691

Music

125

00:09:43,691 --> 00:09:48,692

Music

126

00:09:48,692 --> 00:09:53,693

Music

127

00:09:53,693 --> 00:09:58,695

Music

128

00:09:58,695 --> 00:10:02,696

Music

129

00:10:02,696 --> 00:10:07,697

Music

130

00:10:07,697 --> 00:10:12,698

Music

131

00:10:12,698 --> 00:10:17,700

Music

132

00:10:17,700 --> 00:10:22,701

Music

133

00:10:22,701 --> 00:10:27,702

Music

134

00:10:27,702 --> 00:10:31,703

Music

135

00:10:31,703 --> 00:10:36,705

Music

136

00:10:36,705 --> 00:10:41,706

Music

137

00:10:41,706 --> 00:10:46,708

Music

138

00:10:46,708 --> 00:10:51,709

Music

139

00:10:51,709 --> 00:10:56,710

Music

140

00:10:56,710 --> 00:11:00,711

Music

141

00:11:01,712 --> 00:11:12,714

After Apollo 11, NASA would send six more manned missions to the moon, culminating with Apollo 17 in 1972.

142

00:11:12,714 --> 00:11:23,717

One of the most interesting questions with regard to our interaction with the moon is why we have never gone back there again since the Apollo missions.

143

00:11:23,717 --> 00:11:35,721

And what else is very telling is that although the USSR at the time was getting to be quite able to

send its own astronauts to the moon, it never seems to have done so.

144

00:11:35,721 --> 00:11:47,724

Could it be that there were agencies associated with the moon, aliens or other beings who had warned humanity to stay away for some reason?

145

00:11:47,724 --> 00:11:50,725

Music

146

00:11:50,725 --> 00:11:55,726

Is it possible that the American astronauts were not alone on the moon?

147

00:11:55,726 --> 00:12:01,728

Is that why after Apollo 17, we never went back?

148

00:12:01,728 --> 00:12:13,731

Some ancient astronaut theorists propose an even more incredible possibility that the moon came to orbit Earth not by chance, but by design.

149

00:12:13,731 --> 00:12:16,732

Music

150

00:12:16,732 --> 00:12:21,733

Humans have been mesmerized by the moon since the dawn of man.

151

00:12:21,733 --> 00:12:35,737

And although many theories have been proposed, scientists cannot say with absolute certainty how this celestial object came into being.

152

00:12:35,737 --> 00:12:43,739

When I was a student, nobody really knew where the moon came from, but because it's so relatively big, this was a real problem.

153

00:12:43,739 --> 00:12:51,741

And I think that there is so tendency to think that moons get somehow captured by the parent planets.

154

00:12:51,741 --> 00:12:58,743

If you've got one body here and another body coming along, it can't just get trapped into orbit like that.

155

00:12:58,743 --> 00:13:01,744

The difficulty there is just basic physics.

156

00:13:01,744 --> 00:13:10,746

So this remained a puzzle until about 20 years ago when another theory came along, and that is that the proto-Earth was very early on in the history of the solar system,

157

00:13:10,746 --> 00:13:20,749

hit by a Mars-sized body, hit obliquely, but this Mars-sized body plowed into the center of the Earth and became the Earth's core,

158

00:13:20,749 --> 00:13:28,751

and a lot of the outer material got stripped off by this gargantuan collision and coalesced to form the moon.

159

00:13:28,751 --> 00:13:39,754

Now, they had to come up with a very bizarre theory for how the moon came into being, because all the conventional theories don't make any sense.

160

00:13:39,754 --> 00:13:49,756

The best theory of the moon's formation is fantasmagorically catastrophic, collision of two things, you know,

161

00:13:49,756 --> 00:14:01,760

at just the right angle to form this belt of debris that then formed the moon, but the moon, its exact size is such that it gives us total eclipses.

162

00:14:01,760 --> 00:14:14,763

Its disk exactly covers the sun, and the chances of that occurring are so literally astronomically small. It's very disturbing.

163

00:14:14,763 --> 00:14:27,767

The sun's diameter is 400 times greater than the moon, and coincidentally, the sun also happens to be nearly precisely 400 times further away.

164

00:14:27,767 --> 00:14:38,769

This is the reason that the sun and the moon appear the same size in the Earth's sky, and why we on Earth can experience eclipses of the sun.

165

00:14:38,769 --> 00:14:49,772

It's just perfectly in that orbit to eclipse our sun. The odds of the moon being in that orbit, accidentally, are a zillion to one.

166

00:14:49,772 --> 00:15:00,775

So that right there is evidence that our moon is in a perfect orbit around our planet that's not accidental.

167

00:15:00,775 --> 00:15:08,777

In order to have a solar eclipse, the moon has to be exactly the size that it is, which is 2,160 miles.

168

00:15:08,777 --> 00:15:21,781

Not 2,161, not 2,159, but 2,160 miles at its equator. And there are people out there that actually think that's a coincidence.

169

00:15:21,781 --> 00:15:24,782

The fact is that that is by design.

170

00:15:24,782 --> 00:15:32,784

Throughout our observable galaxy, this relationship and others have not been duplicated.

171

00:15:32,784 --> 00:15:37,785

Other moons are sizeably smaller by comparison to their mother planet.

172

00:15:37,785 --> 00:15:49,788

Earth's satellite not only orbits closer than it should for its size, it is also the only moon in the solar system that has a near perfect circular orbit.

173

00:15:49,788 --> 00:15:56,790

And no other lunar bodies are known to have such a stabilizing role as the moon has with the Earth.

174

00:15:56,790 --> 00:16:04,792

Recent computer simulations have shown that without the moon's presence, the Earth's axis tilt would be completely different than it is today.

175

00:16:04,792 --> 00:16:12,795

We might not even have seasons as we know them presently. Without the seasons, it could be very difficult for life on Earth.

176

00:16:12,795 --> 00:16:20,797

So the moon is actually performing an incredible function. It's life sustaining. Without it, we might not be here.

177

00:16:20,797 --> 00:16:32,800

There are so many peculiarities about the way the moon has affected the Earth that one might be forgiven for believing that there is intelligence behind it, that something made it that way.

178

00:16:33,800 --> 00:16:40,802

The moon is so strange, so odd in terms of what we find elsewhere in the solar system.

179

00:16:40,802 --> 00:16:55,806

And particularly in terms of what it does for the Earth, having made the Earth into a haven for life, that one feels obliged to ask the question, could such things have come about by chance?

180

00:16:55,806 --> 00:17:07,809

Was it placed there deliberately? Was it engineered maybe by aliens and therefore is our whole existence a planned event?

181

00:17:08,810 --> 00:17:22,813

Ancient astronaut theorists suggest that the perfect size and placement of the moon may not be the product of mere chance, but was engineered by extraterrestrial beings in Earth's prehistory.

182

00:17:22,813 --> 00:17:30,815

As evidence, they point to ancient accounts that speak of a time before the celestial object even existed.

183

00:17:32,816 --> 00:17:40,818

Beginning in the 5th century BC, Roman and Greek authors wrote of a time before there was a moon in the heavens.

184

00:17:41,818 --> 00:17:45,819

Allusions to this can also be found in the Hebrew Bible.

185

00:17:46,820 --> 00:17:53,822

And there are Zulu legends that say that the moon was brought to Earth hundreds of generations ago.

186

00:17:54,822 --> 00:18:01,824

Wurwani and Mpanku were the names of two Zulu deities from prehistory.

187

00:18:02,824 --> 00:18:06,825

The Zulus have a legend that it was they who brought the moon into existence.

188

00:18:07,825 --> 00:18:21,829

They supposedly did so by stealing an egg from a giant sky dragon, hollowing out the center, the yolk of the egg, and then rolling the resultant planet across the sky to become the moon.

189

00:18:21,829 --> 00:18:26,830

And the reason that the Zulus say the moon was put there was to keep an eye on human beings.

190

00:18:27,831 --> 00:18:32,832

The Zulu legend is really interesting. We first heard about it from a Zulu shaman named Kredo Mutua.

191

00:18:33,832 --> 00:18:36,833

And he talked about the fact that the moon was towed in to our orbit.

192

00:18:37,833 --> 00:18:44,835

And when it did so, it caused all kinds of floods and cataclysms and it changed the axis of the planet.

193

00:18:45,835 --> 00:18:49,836

And you can't help but wonder, could the moon be an artificial satellite?

194

00:18:49,836 --> 00:18:57,839

Could the moon have come from somewhere else and is now used as an observational base for extraterrestrial beings?

195

00:18:58,839 --> 00:19:04,840

Is it possible that the Zulu legend is true, as ancient astronaut Theorists suggest?

196

00:19:06,841 --> 00:19:10,842

Was our moon towed into place in the remote past?

197

00:19:11,842 --> 00:19:20,845

Perhaps further clues can be found by examining the scientific evidence suggesting that the moon is in fact hollow.

198

00:19:25,846 --> 00:19:31,848

The surface of the moon is scarred with tens of thousands of impact craters of various sizes.

199

00:19:32,848 --> 00:19:42,851

Scientists suggest this is due to the fact that there has never been an atmosphere on the moon to help protect it from bombardment by space debris.

200

00:19:44,851 --> 00:19:50,853

There are no natural erosive forces, like wind or flowing water, to affect its surface.

201

00:19:51,853 --> 00:19:57,855

And there is little geologic activity to conceal damage done throughout the moon's history.

202

00:19:58,855 --> 00:20:03,856

When you study the distribution of craters, you find the surface is totally saturated.

203

00:20:03,856 --> 00:20:09,858

That is, there are craters within craters within craters right down to the smallest scale of size.

204

00:20:10,858 --> 00:20:16,860

One of the things that's really interesting about lunar craters is that even though some of them are very large and some of them are very small,

205

00:20:16,860 --> 00:20:21,861

they all seem to have the same depth and that really shouldn't happen on a planetary body.

206

00:20:21,861 --> 00:20:23,862

There should be variation in depth.

207

00:20:23,862 --> 00:20:26,862

So why are the moon's craters so uniform?

208

00:20:27,863 --> 00:20:33,864

It's really, really unusual and it's really not explainable in terms of conventional or established geophysics.

209

00:20:34,865 --> 00:20:40,866

Some of the craters on the moon are nowhere near similar to what they should look like.

210

00:20:41,866 --> 00:20:52,869

In fact, they are incredibly wide craters and wherever the impact point is, they're convex, which means they're still the bulge of the moon.

211

00:20:52,869 --> 00:20:54,870

So this doesn't make any sense.

212

00:20:56,870 --> 00:21:05,873

It's likely that there is something under the lunar surface which is very resilient and which is preventing craters going any deeper than they do.

213

00:21:05,873 --> 00:21:11,874

This could only really be either much harder rock, which it can't be because of the mass of the moon,

214

00:21:11,874 --> 00:21:17,876

or alternatively a methyl sphere of some kind which is preventing more damage.

215

00:21:18,876 --> 00:21:29,879

Does the uniform depth of the craters on the moon suggest some sort of metallic barrier underneath moon rock and dust?

216

00:21:30,879 --> 00:21:35,881

But if so, why wouldn't mainstream scientists acknowledge this?

217

00:21:37,881 --> 00:21:45,883

Ancient astronaut theorists suggest that by doing so, they might also have to acknowledge that the moon may be hollow.

218

00:21:48,884 --> 00:21:51,885

Yanky Clipper Houston.

219

00:21:51,885 --> 00:21:55,886

November 20, 1969.

220

00:21:56,886 --> 00:22:04,889

During their ascent back to the command module, Commander Charles Conrad Jr. and Lunar Module pilot Alan B.

221

00:22:04,889 --> 00:22:09,890

released the Apollo 12 launch vehicle and crash it back to the moon.

222

00:22:09,890 --> 00:22:13,891

Apollo 12 Houston, the ULAM is on its way down.

223

00:22:13,891 --> 00:22:15,891

Roger.

224

00:22:17,892 --> 00:22:21,893

Upon impact, something very unexpected happened.

225

00:22:21,893 --> 00:22:27,895

The moon was said to have seismically reverberated like a bell for more than an hour.

226

00:22:27,895 --> 00:22:32,896

With Apollo 12, people referred to a crash. It wasn't really a crash.

227

00:22:32,896 --> 00:22:38,898

It was a aimed deorbit of the rocket used to lift off the lunar module.

228

00:22:38,898 --> 00:22:49,901

And the crew separated the launch vehicle and crashed it back into the ground right close to where

they had a seismograph that they had installed down there.

229

00:22:50,901 --> 00:22:57,903

Well, it vibrated. So it was kind of the early clue as to how solid was the surface of the moon.

230

00:22:58,903 --> 00:23:07,905

What was amazing about this is that suddenly the moon began to ring like a bell and did so for nearly an hour.

231

00:23:07,905 --> 00:23:18,908

Dr. Venerable Braun, who was then the head of NASA, decided that for Apollo 13, they were going to intentionally crash a heavier portion of the rocket into the lunar surface.

232

00:23:19,909 --> 00:23:29,911

And when they did this, the moon rang like a gong this time for over three hours into a depth of over 20 miles.

233

00:23:31,912 --> 00:23:36,913

This was not expected, and it still puzzles a lot of scientists today.

234

00:23:36,913 --> 00:23:45,916

The inferences that the moon must be hollow because the moon is made predominantly on the surface of a kind of rock called basalt.

235

00:23:45,916 --> 00:23:52,917

Although it's a very lightweight rock, it also absorbs impact extremely well.

236

00:23:53,918 --> 00:24:02,920

And so if the whole of the moon was made of that kind of rock, you wouldn't expect it to reverberate when a large impact took place.

237

00:24:02,920 --> 00:24:11,922

The reason that this is played down is because the idea of the moon being hollow just contradicts what we know about physics.

238

00:24:14,923 --> 00:24:29,927

In his 1966 book, *Intelligent Life in the Universe*, renowned scientist and astronomer Carl Sagan defined modern scholarship regarding the composition of celestial bodies throughout the cosmos.

239

00:24:30,928 --> 00:24:35,929

Carl Sagan suggested that a natural satellite cannot be a hollow object.

240

00:24:36,929 --> 00:24:47,932

This is very odd because why would the moon be vibrating unless it's a hollow object? That would suggest it's artificial.

241

00:24:48,932 --> 00:24:52,933

Significant portions of the moon may have been hollowed out.

242

00:24:52,933 --> 00:25:00,936

If that is the case, the chances are that was not achieved naturally, that would have to have been achieved artificially.

243

00:25:00,936 --> 00:25:06,937

This brings up the important question, who would have had the ability, the skills and the technology to do that?

244

00:25:06,937 --> 00:25:12,939

Certainly not us. That would only have to be the work of extraterrestrials and no one else.

245

00:25:13,939 --> 00:25:22,941

Is it possible that the moon is not only hollow but also an artificial structure?

246

00:25:23,942 --> 00:25:28,943

And if so, could it be an extraterrestrial creation?

247

00:25:29,943 --> 00:25:40,946

Ancient astronaut theorists say yes, and as evidence, they point to research indicating that the moon is actually a spaceship.

248

00:25:43,947 --> 00:25:51,949

Moscow, Russia, July 1970

249

00:25:52,949 --> 00:26:03,952

After years of studying findings from various moon missions, two government scientists, Mikhail Vasen and Alexander Shcherbakov,

250

00:26:03,952 --> 00:26:11,955

publish an article in Sputnik magazine, revealing their shocking conclusion about the nature of the moon.

251

00:26:12,955 --> 00:26:21,957

Their theory is that the moon is likely a creation of alien intelligence that was brought to Earth in the remote past.

252

00:26:21,957 --> 00:26:32,960

Two Russian physicists, Vasen and Shcherbakov, came up with the idea that the moon must be an artificial object.

253

00:26:33,960 --> 00:26:38,962

They based their ideas on, first of all, the fact that it appeared that the moon was hollow.

254

00:26:40,962 --> 00:26:50,965

Since no hollow planet could exist according to the known laws of physics, that would mean that the moon had to be an artificial and engineered object.

255

00:26:51,965 --> 00:27:01,968

This article was quite groundbreaking. In fact, what they did is to fundamentally redefine scholarship around what we think the moon is.

256

00:27:02,968 --> 00:27:11,971

Based on the maximum depth of the moon craters, Vasen and Shcherbakov proposed that the surface was only two and a half miles thick.

257

00:27:12,971 --> 00:27:20,973

NASA scientists had determined that this moon dust primarily consisted of chromium, titanium and zirconium.

258

00:27:21,973 --> 00:27:37,977

In their publication, Vasen and Shcherbakov noted if a material had to be devised to protect a giant artificial satellite from the unfavorable effects of temperature, cosmic radiation and meteorite bombardment,

259

00:27:37,977 --> 00:27:42,979

the experts would probably have hit on precisely these elements.

260

00:27:43,979 --> 00:27:57,983

Now they themselves proposed that this suggestion is outlandish. However, only through their calculations and all the mathematics, they determined that their theory is correct.

261

00:27:58,983 --> 00:28:04,985

We're talking people in academia who may perhaps lose their position at their universities.

262

00:28:05,985 --> 00:28:12,987

I don't think anybody would publish a paper like this unless they were 100% convinced that their findings are true.

263

00:28:13,987 --> 00:28:25,990

The entire object may be of artificial origin. And if that is the case, my question is, who built the moon, who placed it here and how long ago?

264

00:28:27,991 --> 00:28:40,994

And so these Russian scientists, their theory is that the moon is a spaceship. It's got engines within, but that on the outside they've coated it with this moon-looking substance.

265

00:28:41,995 --> 00:28:53,998

Now it's a far-fetched idea, but it makes a lot of sense in that you might want to shroud or cloak this craft and make it look like a very natural object.

266

00:28:54,998 --> 00:29:04,000

Since the publication of the Vossen and Shebikov article, other researchers have come out in support of their theory.

267

00:29:05,001 --> 00:29:14,003

In 1975, Don Wilson wrote *Our Mysterious Spaceship Moon*. In 1976, George Leonard wrote *Somebody Else's On The Moon*.

268

00:29:14,003 --> 00:29:21,005

And these books further explored a variety of anomalies. Now they note some very bizarre things.

269

00:29:22,005 --> 00:29:34,008

For example, the mineral and metallic composition of the material on the moon is not like anything that we see on Earth, and the apparent age of the moon seems to be greater than the actual age of our solar system.

270

00:29:35,009 --> 00:29:38,010

So they believe that the moon was actually brought here from somewhere else.

271

00:29:39,010 --> 00:29:47,012

Lots of people have talked about the idea that the moon itself is actually a spacecraft, that it was piloted here and put in this particular orbit.

272

00:29:48,012 --> 00:29:53,014

There's no question that there's evidence that the moon could be a modified natural object.

273

00:29:54,014 --> 00:30:09,018

There are ancient stories that speak of a time when the moon was not up in the sky, and there are descriptions that say that the moon was artificially pulled into place.

274

00:30:10,018 --> 00:30:22,021

So if we have two modern Russian scientists who have suggested that perhaps the moon was pulled into place, and that is a corroboration of ancient mythologies, that's when I listen.

275

00:30:24,022 --> 00:30:43,027

So the whole idea that our moon is some gigantic hollow spaceship that's been put into a special orbit around our planet, and contains cities and structures that are inside and outside of the

moon,

276

00:30:44,027 --> 00:30:59,031

is to me a very reasonable assertion, and in fact it would seem to be that our moon is some kind of gigantic artificial spaceship that is here to monitor our planet.

277

00:31:00,031 --> 00:31:10,034

Would I discount the fact that the moon is a foreign object, a spaceship, a death star? I don't think you're going to rule that out.

278

00:31:11,034 --> 00:31:21,037

Is it possible that the moon is actually a spacecraft, and might it have allowed extraterrestrials to discreetly monitor our planet?

279

00:31:22,037 --> 00:31:27,039

But if so, might these beings still be there today?

280

00:31:28,039 --> 00:31:35,041

November 1966

281

00:31:36,041 --> 00:31:45,043

Three years before the Apollo astronauts made it to the moon, the Orbiter-2 spacecraft situates itself in lunar orbit.

282

00:31:46,044 --> 00:31:55,046

It was designed to capture high-resolution images of the surface, to assist with the selection of landing sites for the Apollo missions.

283

00:31:56,046 --> 00:32:05,049

One image in particular catches the eye of researchers, as it shows what appear to be the shadows of several pointed spires.

284

00:32:07,049 --> 00:32:24,054

On November 20th, 1966, the lunar Orbiter-2, NASA's probe, photographs this area on the moon that was actually in the sea of tranquility only 300 kilometers away from where Apollo 11 ended up landing.

285

00:32:24,054 --> 00:32:34,057

And what's so bizarre is that this area has undeniable architecture that looks like what you would see from obelisks.

286

00:32:36,057 --> 00:32:46,060

There's eight different spires, and scientists calculated that the largest of these spires would be an obelisk that is 15 stories tall.

287

00:32:47,060 --> 00:32:55,062

These do appear to be just like an Egyptian-style obelisk, but what the heck are they doing on the moon?

288

00:32:57,063 --> 00:33:15,067

Of the multiple anomalies on the moon, I think the spires are some of the most fascinating ones, because astronomers have calculated that these spires are very tall for them to be exclusively natural occurrences.

289

00:33:17,068 --> 00:33:29,071

They have to be artificial, simply from the fact that the moon has been bombarded in kind of an incessant meteoric rain for 4.5 billion years.

290

00:33:30,071 --> 00:33:37,073

There is no way that anything bigger than a basketball can be standing straight up on the lunar surface.

291

00:33:38,074 --> 00:33:53,078

The inferences that NASA would have known this, and that one of the reasons that they sent their mission there was so that the astronauts of the Apollo mission could gain more information about these artificial structures on the moon.

292

00:33:53,078 --> 00:34:09,082

On Apollo 11, when the astronauts were descending to the lunar surface, they got this very strange computer alarm.

293

00:34:10,082 --> 00:34:23,086

The famous 1202 computer alarm, and basically nobody knew what it was, what it came out to was that the computer itself was overwhelmed with information.

294

00:34:25,086 --> 00:34:35,089

Because Buzz Aldrin, the lunar module pilot, had turned on the radars on the lunar lander. It had two radars, it had a side-looking radar, and it had a docking radar.

295

00:34:36,089 --> 00:34:39,090

In some other words, you had one that pointed down and one that pointed to the side.

296

00:34:40,090 --> 00:34:52,093

Now, if there's nothing on the surface of the moon, if there are no artificial structures, if there are no spires sticking 10, 20 stories up into the sky, why would you turn on the side radar?

297

00:34:53,094 --> 00:35:01,096

There's no reason to, but Aldrin did it, and I think it's because he knew, and NASA knew, that there was some danger of running into these things.

298

00:35:02,096 --> 00:35:07,097

Is it possible that NASA actually has knowledge of structures on the moon?

299

00:35:08,098 --> 00:35:18,100

In 1960, NASA officials commissioned a report from the Brookings Institute to weigh the implications of the discovery of evidence of extraterrestrial life.

300

00:35:19,101 --> 00:35:31,104

Due to the findings of the report, researchers believed it was determined before the moon missions to keep any extraterrestrial findings hidden from the public for fear of social unrest.

301

00:35:34,105 --> 00:35:47,108

Since the time of the very first Apollo moon missions, researchers have poured over NASA and Russian photos of the moon, looking for structures.

302

00:35:48,108 --> 00:35:51,109

And they found some unusual things.

303

00:35:52,109 --> 00:35:59,111

You would think, in fact, that if extraterrestrials are on the moon, or were, that they would have built all kinds of structures.

304

00:36:00,112 --> 00:36:08,114

And we're able to see some of these, even though NASA scientists don't acknowledge them as genuine.

305

00:36:09,114 --> 00:36:20,117

But perhaps as intriguing as the various structures seen on the surface of the moon are the numerous reports of lights and other unexplainable activity.

306

00:36:22,117 --> 00:36:33,120

Intermittent reflections emanating from the lunar surface have been observed for more than a century, including reports by famed astronomer Francis Bailey in 1835.

307

00:36:34,121 --> 00:36:39,122

And the phenomenon was also reported by the Apollo 11 crew.

308

00:36:41,122 --> 00:36:51,125

The windows are all dark, and that's when I began seeing the flash, and that streak, and another flash, and flicker flashes, we called them, and kept seeing them.

309

00:36:52,125 --> 00:36:56,126

I said, do you guys see anything unusual? Have you seen any flashes?

310

00:36:57,127 --> 00:37:00,128

Neil said, yeah, I saw about a hundred of them. How about you, Mike?

311

00:37:00,128 --> 00:37:07,129

No, I didn't see a thing. Any deep analysis by the crew as to what the hell it was now.

312

00:37:08,130 --> 00:37:14,131

Because we were on our way home. Let's let somebody else worry about that.

313

00:37:15,132 --> 00:37:26,134

These things were actually disclosed by NASA in their own transient lunar anomalies catalog, showing lights moving around, showing puffs of smoke,

314

00:37:27,135 --> 00:37:39,138

showing things that should not be there on the moon's surface, all of which suggests that there is, in fact, a very thriving extraterrestrial community living on the moon today.

315

00:37:41,138 --> 00:37:54,142

Might there not only be structures on the lunar surface, but also an identified activity? Activity that might point to current extraterrestrial occupation of the moon.

316

00:37:55,142 --> 00:38:04,145

Ancient astronaut theorists say yes, and suggest that further evidence may be found on the dark side of the moon.

317

00:38:09,146 --> 00:38:19,149

The moon is the most visible celestial body in the night sky, but we only ever see one side, as it is in synchronous rotation with Earth,

318

00:38:19,149 --> 00:38:28,151

meaning it takes just as long to rotate around its own axis as it does to complete its orbit around our planet.

319

00:38:28,151 --> 00:38:36,153

Therefore, we can only observe one side, and up to 41% of the moon's surface is never seen.

320

00:38:37,153 --> 00:38:48,156

The moon is in what we call synchronous rotation with the Earth. That is, the effect of the gravity of the Earth and the moon means that the moon only shows us one side, it's one face, the face of the moon.

321

00:38:49,157 --> 00:38:59,159

The reason for this is because when two objects get close enough to each other, they do become so-called phase-locks in that manner.

322

00:38:59,159 --> 00:39:04,161

It means it presents the same face to the Earth the whole time.

323

00:39:07,161 --> 00:39:13,163

Because of the tidal locking of the moon's rotation, it presents the same face.

324

00:39:14,163 --> 00:39:17,164

And of course, this leads to speculation.

325

00:39:17,164 --> 00:39:24,166

Because this creates a perfect place to create large installations on the moon that are not directly observable from Earth,

326

00:39:25,166 --> 00:39:34,169

hypothetically, on the far side of the moon, it's an excellent place to put a basis, and that has been a fixture of a lot of science fiction.

327

00:39:35,169 --> 00:39:44,171

There have been whistleblowers that say that they've been taken to a base, which is called lunar operations command, on the far side of the moon,

328

00:39:44,171 --> 00:39:56,175

and that this base is part of a network of bases on the far side of the moon that are run by various secret space programs and extraterrestrial civilizations.

329

00:39:57,175 --> 00:40:07,177

The Apollo missions have taken surveillance photographs of the moon's surface, and some of the photographs have shown what appeared to be structures.

330

00:40:10,178 --> 00:40:15,180

Could it be that there are active bases on the far side of the moon?

331

00:40:15,180 --> 00:40:21,181

Not only secret military bases, but extraterrestrial bases as well.

332

00:40:22,181 --> 00:40:30,184

And if so, what would happen if the full truth about the moon was finally revealed to the general public?

333

00:40:30,184 --> 00:40:40,186

Ultimately, when the truth of the origin of the moon and what is going on in the moon and structures on the moon,

334

00:40:40,186 --> 00:40:50,189

and perhaps even occupation of the moon is revealed to humans on Earth, it will be a shattering of our reality,

335

00:40:51,189 --> 00:41:03,192

and we'll be able to look up in the sky and see what is an extraterrestrial object in orbit around our planet, and we'll know it for what it is.

336

00:41:04,193 --> 00:41:16,196

There's not a single scientifically valid reason not to think that it's an extraterrestrial spacecraft brought here by extraterrestrial beings in order to assist humankind.

337

00:41:16,196 --> 00:41:19,197

For some, that's a terrifying thought.

338

00:41:22,197 --> 00:41:28,199

Did the Apollo astronauts encounter more on the surface of the moon than was publicly revealed?

339

00:41:29,199 --> 00:41:36,201

Might there have been evidence of colonization, or even that the moon itself is an artificial object?

340

00:41:36,201 --> 00:41:40,202

And could this be why we stopped going back?

341

00:41:41,203 --> 00:41:52,206

Perhaps the upcoming moon missions, the first in over four decades, will finally reveal the full truth about this mysterious celestial body,

342

00:41:52,206 --> 00:41:56,207

and also about our extraterrestrial past.

343

00:41:58,207 --> 00:42:00,208
