

1

00:00:00,079 --> 00:00:08,082

This wall exists here at one of the most inaccessible places.

2

00:00:08,082 --> 00:00:13,084

These types of walls, they exist all over the world.

3

00:00:13,084 --> 00:00:18,086

The building style is not similar. It is identical.

4

00:00:18,086 --> 00:00:23,087

Or alien structures built on Earth as part of a master plan.

5

00:00:23,087 --> 00:00:27,089

These temples actually act as batteries. They store energy.

6

00:00:27,089 --> 00:00:31,090

And they also allow the energy to expand as certain times during the day.

7

00:00:31,090 --> 00:00:35,092

Could they reveal an extraterrestrial connection?

8

00:00:35,092 --> 00:00:43,095

Ancient cultures around the world connected their temples to each other almost like a master circuit board.

9

00:00:43,095 --> 00:00:49,097

And did they serve a larger purpose? One that reaches beyond Earth.

10

00:00:49,097 --> 00:00:57,100

They're somehow looking at the Earth from space and seeing how these structures would fit around the globe.

11

00:00:57,100 --> 00:01:02,102

Who could be doing this except for extraterrestrials?

12

00:01:19,108 --> 00:01:24,110

The World of Tanks

13

00:01:24,110 --> 00:01:31,112

The World of Tanks

14

00:01:31,112 --> 00:01:34,113

The World of Tanks

15

00:01:34,113 --> 00:01:38,115

Krong Siem Reap, Northwest Cambodia.

16

00:01:38,115 --> 00:01:43,117

Just outside the magnificent ruins of Angkor Wat,

17

00:01:43,117 --> 00:01:49,119

stands an ancient pyramid temple known as Bok Sai Cham Krong.

18

00:01:49,119 --> 00:01:54,121

While it is a solid rock structure and therefore cannot be carbon dated,

19

00:01:54,121 --> 00:02:03,124

mainstream archaeologists suggest that it was constructed in the 10th century AD.

20

00:02:03,124 --> 00:02:08,126

9,000 miles away in the Batang Basin of Guatemala,

21

00:02:08,126 --> 00:02:12,127

lay the ruins of the Mayan city of Tikal.

22

00:02:12,127 --> 00:02:17,129

Amongst the long-abandoned structures is a temple of the Great Jaguar,

23

00:02:17,129 --> 00:02:22,131

which is believed to date back to the 8th century AD.

24

00:02:22,131 --> 00:02:31,134

When you see pictures of these two pyramids on two different continents, they're virtually identical.

25

00:02:31,134 --> 00:02:36,136

It's as if the same architect had designed both of these.

26

00:02:36,136 --> 00:02:42,138

Although the Cambodian pyramid is much smaller than the pyramid in Guatemala,

27

00:02:42,138 --> 00:02:47,140

the similarities between the specific design features are uncanny.

28

00:02:47,140 --> 00:02:51,141

Both have an unusually steep slope angle that we don't see in other pyramids.

29

00:02:51,141 --> 00:02:54,142

They both have a stepped formation.

30

00:02:54,142 --> 00:02:57,144

There's a stairwell going up the middle.

31

00:02:57,144 --> 00:02:59,144

There's a domed area on the top.

32

00:02:59,144 --> 00:03:01,145

There's a little door that goes in.

33

00:03:01,145 --> 00:03:05,146

And there's interior structure that looks the same as well.

34

00:03:05,146 --> 00:03:10,148

You have the civilization in Cambodia and the civilization in Mesoamerica.

35

00:03:10,148 --> 00:03:12,149

There are so many parallels, it's incredible.

36

00:03:12,149 --> 00:03:17,151

It's unbelievable that scholars haven't until now recognized those parallels.

37

00:03:17,151 --> 00:03:21,152

Is it possible that they were working off the same blueprint?

38

00:03:21,152 --> 00:03:26,154

And if so, where did that blueprint come from?

39

00:03:26,154 --> 00:03:33,157

Could it be that these seemingly unrelated sites, located thousands of miles apart,

40

00:03:33,157 --> 00:03:36,158

share a common architect?

41

00:03:36,158 --> 00:03:42,160

Cambodian lore attributes the building of anchor to Priyapisnokar,

42

00:03:42,160 --> 00:03:47,162

a being of half-human, half-divine origin.

43

00:03:47,162 --> 00:03:52,164

Priyapisnokar is the son of the moon goddess and a mortal.

44

00:03:52,164 --> 00:03:56,165

One day, she takes him up to heaven,

45

00:03:56,165 --> 00:03:58,166

where he meets the great high god Indra,

46

00:03:58,166 --> 00:04:02,167

who decides that the boy is to be given special schooling.

47

00:04:02,167 --> 00:04:06,169

At Indra's heaven, he was given instructions,

48

00:04:06,169 --> 00:04:10,170

instructions about mathematics, engineering, architecture,

49

00:04:10,170 --> 00:04:13,171

all these different scientific disciplines.

50

00:04:13,171 --> 00:04:18,173

One very provocative way of looking at this story is that Indra's heaven

51

00:04:18,173 --> 00:04:22,175

is not just a place in the stars, it is actually a spacecraft.

52

00:04:22,175 --> 00:04:27,176

And that Priyapishnokar was instructed by extraterrestrial beings on this craft

53

00:04:27,176 --> 00:04:29,177

in the art of temple making.

54

00:04:30,177 --> 00:04:33,179

According to ancient astronaut theorists,

55

00:04:33,179 --> 00:04:38,180

an interesting parallel exists between the Mayan and Cambodian stories.

56

00:04:38,180 --> 00:04:45,183

In the Maya manuscripts, the god Kukulcan is responsible for their temple architecture.

57

00:04:45,183 --> 00:04:51,185

He was also credited with educating humans on mathematics, engineering and science.

58

00:04:51,185 --> 00:04:54,186

The same teachings attributed to Pishnokar.

59

00:04:55,187 --> 00:04:59,188

Kukulcan is supposed to have descended from a star.

60

00:04:59,188 --> 00:05:03,189

He is represented as the feathered serpent,

61

00:05:03,189 --> 00:05:08,191

but also he is represented as a big being with a helmet.

62

00:05:08,191 --> 00:05:14,193

A helmet has rays on it, and he is sitting on a half-open sort of egg.

63

00:05:14,193 --> 00:05:18,195

He was the teacher, according to Central American mythology.

64

00:05:18,195 --> 00:05:21,196

He definitely is an extraterrestrial.

65

00:05:22,196 --> 00:05:27,198

Could these two otherworldly architects be one and the same?

66

00:05:27,198 --> 00:05:35,201

And if so, does further evidence of a master builder exist in other parts of the world as well?

67

00:05:36,201 --> 00:05:42,204

In Mesoamerica, we have the gods associated with the construction of the pyramids over there.

68

00:05:42,204 --> 00:05:48,206

This reflects the same kind of entity that the Mesopotamians reported,

69

00:05:48,206 --> 00:05:55,208

that the Egyptians reported as being the architect that designed the cities, that designed these structures.

70

00:05:56,209 --> 00:06:02,211

So you have the same pattern and the same claim happening over and over again,

71

00:06:02,211 --> 00:06:09,214

over a span of at least 7,000 years, where it's the same type of god

72

00:06:09,214 --> 00:06:15,216

planning and directing the construction of these types of similar buildings.

73

00:06:15,216 --> 00:06:20,218

We seem to be talking about the same architect that seems to be crossing different continents at different times.

74

00:06:20,218 --> 00:06:25,219

It's interesting that when you start looking at all of these structures, covering many thousands of years,

75

00:06:25,219 --> 00:06:28,220

you begin to see that there's a relationship.

76

00:06:30,221 --> 00:06:35,223

Pyramids are found by the hundreds in nearly every region of the world,

77

00:06:35,223 --> 00:06:45,227

including Central America, Mesopotamia, Egypt, China, and even Antarctica.

78

00:06:46,227 --> 00:06:51,229

And many cultures' most sacred structures appear remarkably alike.

79

00:06:52,229 --> 00:07:01,232

It is striking that you can travel around the planet and you can find structures that are similar in nature.

80

00:07:01,232 --> 00:07:10,236

For example, in China, the Zhiyan Altar of Heaven, or the stone circle above Saxa Huaman in Peru.

81

00:07:11,236 --> 00:07:17,238

All over the planet, you see tall, megalithic architecture.

82

00:07:17,238 --> 00:07:21,240

You see cyclopians, stone structures as well.

83

00:07:22,240 --> 00:07:26,242

A bunch of primitive people who somehow get motivated all over the world

84

00:07:26,242 --> 00:07:31,243

to haul around these gigantic blocks of stone that could be 20 tons, 100 tons.

85

00:07:32,244 --> 00:07:36,245

And everybody around the world seemed to be doing the same thing.

86

00:07:37,246 --> 00:07:41,247

There is a kind of a master blueprint that we see in the architecture,

87

00:07:41,247 --> 00:07:45,249

and it's not in just one or two or three civilizations.

88

00:07:45,249 --> 00:07:47,249

It's in all the civilizations.

89

00:07:47,249 --> 00:07:52,251

China, India, South America, it's there.

90

00:07:52,251 --> 00:07:57,253

Archaeologists tell as well there was no connection at those times.

91

00:07:57,253 --> 00:08:01,254

There had to be something, and that's too much of a coincidence.

92

00:08:01,254 --> 00:08:05,256

So there we get the idea that it's more of a network than any single structure,

93

00:08:05,256 --> 00:08:07,257

and they sort of feed off each other.

94

00:08:10,258 --> 00:08:15,259

Are the curious parallels between structures seen throughout the world truly random?

95

00:08:16,260 --> 00:08:18,261

Or could they be interconnected?

96

00:08:18,261 --> 00:08:23,262

And if so, was it important, not just that the temples were built,

97

00:08:23,262 --> 00:08:27,264

but exactly how they were constructed?

98

00:08:32,266 --> 00:08:34,266

Cusco, Peru.

99

00:08:35,267 --> 00:08:38,268

The remnants of the Cori Cancha, or Temple of the Sun,

100

00:08:38,268 --> 00:08:42,269

are considered a marvel of Incan architecture.

101

00:08:43,270 --> 00:08:47,271

Modern engineers say the precision of the stonework

102

00:08:47,271 --> 00:08:51,273

rivals that being produced today with advanced machining.

103

00:08:53,273 --> 00:08:59,275

But incredibly, the Inca weren't the only ancient people to achieve such building proficiency.

104

00:09:03,277 --> 00:09:06,278

6,500 miles away, in Giza, Egypt,

105

00:09:07,278 --> 00:09:13,281

we see the same signature building techniques at the Valley Temple next to the Sphinx.

106

00:09:14,281 --> 00:09:17,282

Let's say you stand in front of the Sphinx Temple in Egypt,

107

00:09:17,282 --> 00:09:19,283

and you look at the stone masonry there,

108

00:09:19,283 --> 00:09:22,284

and then you had the capability of closing your eyes,

109

00:09:22,284 --> 00:09:26,285

and the next moment you're at the Cori Cancha Temple in Cusco.

110

00:09:27,286 --> 00:09:30,287

Well, if you wouldn't know where you are,

111

00:09:30,287 --> 00:09:32,288

you couldn't tell the difference between the two,

112

00:09:32,288 --> 00:09:38,290

because the engineering styles of those two temples are very similar.

113

00:09:39,290 --> 00:09:42,291

What you find is that the blocks are fitted together so tightly,

114

00:09:42,291 --> 00:09:45,292

you can barely slip paper between the joints,

115

00:09:45,292 --> 00:09:48,293

and there's these gigantune blocks,

116

00:09:48,293 --> 00:09:53,295

but they're not just regular-shaped rectangular blocks.

117

00:09:53,295 --> 00:09:56,296

These blocks are L-shaped blocks,

118

00:09:56,296 --> 00:10:01,298

and they've been quarried like that to basically go round a corner wall.

119

00:10:02,298 --> 00:10:09,301

What makes these structures so impressive is not only their design,

120

00:10:09,301 --> 00:10:14,303

but also the fact that they were built with megalithic stones.

121

00:10:17,304 --> 00:10:20,305

Some of these massive blocks are so large

122

00:10:20,305 --> 00:10:24,306

that even engineers today have no idea how they were put in place.

123

00:10:26,307 --> 00:10:29,308

The limestone blocks at the Valley Temple

124

00:10:29,308 --> 00:10:34,310

are estimated to weigh upwards of 200 tons each,

125

00:10:34,310 --> 00:10:40,312

and many of these stones had to be lifted and placed up to 40 feet above ground,

126

00:10:40,312 --> 00:10:43,313

or the height of a four-story building.

127

00:10:44,314 --> 00:10:49,316

However, this was not merely accomplished at these two sites.

128

00:10:50,316 --> 00:10:55,318

Across the globe, ancient cultures chose time and time again

129

00:10:55,318 --> 00:10:58,319

to build with similar awe-inspiring blocks

130

00:10:58,319 --> 00:11:04,321

fitted together with minimal clearance between adjacent stones and no use of mortar.

131

00:11:07,322 --> 00:11:13,324

When you're using these really massive stones, it's really, really impractical.

132

00:11:13,324 --> 00:11:16,325

Why was that their first choice?

133

00:11:16,325 --> 00:11:19,327

Why did they choose to use these massive blocks

134

00:11:19,327 --> 00:11:24,328

when obviously smaller blocks would have been more manageable and easier to work with?

135

00:11:26,329 --> 00:11:35,332

Even more confounding is the fact that many of these megalithic constructions

136

00:11:35,332 --> 00:11:41,335

were built in impractical locations, often thousands of feet above sea level.

137

00:11:47,337 --> 00:11:49,337

Santorini, Greece.

138

00:11:50,338 --> 00:11:56,340

Researcher and editor Georgios Sucasos traveled to the ancient site of Thera

139

00:11:56,340 --> 00:11:58,341

on the island's highest peak.

140

00:12:00,341 --> 00:12:06,344

The megalithic architecture found here dates back to at least the 9th century BC.

141

00:12:08,344 --> 00:12:14,347

This wall exists here at one of the most inaccessible places.

142

00:12:15,347 --> 00:12:21,349

In order to get here, you take a car, you go up these harrowing switchback roads

143

00:12:21,349 --> 00:12:25,351

and then you're on foot for at least 45 minutes.

144

00:12:25,351 --> 00:12:32,353

And so the idea that is given that this was just built on a whim to me seems insane.

145

00:12:32,353 --> 00:12:36,355

There had to have been a reason why this is here.

146

00:12:36,355 --> 00:12:38,355

The blocks are huge.

147

00:12:39,356 --> 00:12:47,359

There is one block right here that's at least six feet long and one here seven feet long

148

00:12:47,359 --> 00:12:50,360

and they're about 32 inches thick.

149

00:12:50,360 --> 00:12:59,363

So we're talking blocks of stone that are as big as people weighing about a ton or more.

150

00:12:59,363 --> 00:13:04,365

And we have 12 levels of stone blocks.

151

00:13:05,365 --> 00:13:09,367

This was placed here deliberately, deliberately.

152

00:13:09,367 --> 00:13:11,367

This is not coincidence.

153

00:13:11,367 --> 00:13:19,370

Somebody at the quarry said we need a stone of this particular size that fits right here.

154

00:13:19,370 --> 00:13:28,374

And walls like this not only exist in Greece, but in Italy, in Spain, in South America,

155

00:13:28,374 --> 00:13:31,375

and also in Egypt.

156

00:13:32,375 --> 00:13:35,376

So the building style is not similar.

157

00:13:35,376 --> 00:13:37,377

It is identical.

158

00:13:41,378 --> 00:13:47,380

The use of such enormous blocks is the main reason many of these ancient structures,

159

00:13:47,380 --> 00:13:52,382

like the walls at Thera, have survived until today.

160

00:13:52,382 --> 00:14:00,385

But why was it so important that they remain standing thousands of years into the future?

161

00:14:01,386 --> 00:14:07,388

There was an architect here who had complete understanding of stone, of masonry,

162

00:14:07,388 --> 00:14:13,390

and that you can do extraordinary things with it that will last a lifetime and forever.

163

00:14:13,390 --> 00:14:20,393

Not only did they actually build things which were guaranteed to last,

164

00:14:20,393 --> 00:14:26,395

often they're working with unusual angles and they're so tightly fitted that earthquakes

165

00:14:26,395 --> 00:14:28,395

are very difficult to break them apart.

166

00:14:28,395 --> 00:14:30,396

In fact, they are earthquake proof.

167

00:14:35,398 --> 00:14:40,400

Ancient astronaut theorists point out that other common design elements

168

00:14:40,400 --> 00:14:46,402

were incorporated in structures throughout the world to ensure their longevity,

169

00:14:46,402 --> 00:14:52,404

including the widespread use of metal braces inserted into keystone cuts

170

00:14:52,404 --> 00:14:55,405

to reinforce ancient constructions.

171

00:14:55,405 --> 00:15:02,408

This unusual way of fitting large stones together is found in ancient Egypt.

172

00:15:02,408 --> 00:15:05,409

It's found in ancient Ethiopia.

173

00:15:05,409 --> 00:15:09,410

It is found in India and Greece and in Italy.

174

00:15:09,410 --> 00:15:12,411

It is found at Angkor Wat in Cambodia.

175

00:15:12,411 --> 00:15:16,413

It's found at the Composites in Vietnam.

176

00:15:16,413 --> 00:15:22,415

And we find it in Peru at Oyonte Tambo and at Cusco.

177

00:15:22,415 --> 00:15:27,417

And we see it also at Tijuana Co and Puma Punku in Bolivia.

178

00:15:29,418 --> 00:15:33,419

The two stones essentially have a channel dug in between them

179

00:15:33,419 --> 00:15:37,421

and there's a certain slot into which is poured molten metal.

180

00:15:37,421 --> 00:15:40,422

Now, this brings up all kinds of questions because, one,

181

00:15:40,422 --> 00:15:45,423

alloys were not supposed to have been discovered until about 2500 BC.

182

00:15:45,423 --> 00:15:51,426

The fact that these stones go back to at least 13,000 BC creates a huge problem.

183

00:15:51,426 --> 00:15:55,427

We have here, again, shared technology crossing huge span of time

184

00:15:55,427 --> 00:15:59,429

in order to make sure that the stones never ever fall apart.

185

00:16:01,429 --> 00:16:07,432

People working on different sides of the world trying to build similar things

186

00:16:07,432 --> 00:16:14,434

are not necessarily going to think of the same way to build it in certain respects.

187

00:16:14,434 --> 00:16:19,436

The similarities in the way some of the stones were cut, the keystone,

188

00:16:19,436 --> 00:16:25,438

other factors that people wouldn't necessarily think of for them to show up

189

00:16:25,438 --> 00:16:29,440

and for them to be used to give greater duration to these structures

190

00:16:29,440 --> 00:16:35,442

way beyond any reasonable expectation that the people living then were going to continue to use these

191

00:16:35,442 --> 00:16:39,443

tells us that there's somebody maybe with a longer time span

192

00:16:39,443 --> 00:16:42,444

who was behind the design of these things.

193

00:16:42,444 --> 00:16:47,446

Whoever was behind the design wanted these things to last a really long time.

194

00:16:48,446 --> 00:16:52,448

Who were the teachers of these engineering styles?

195

00:16:52,448 --> 00:17:01,451

The only conclusion there is, is that aliens had a hand in these creations a long time ago.

196

00:17:01,451 --> 00:17:08,454

They're all human-made, but with the assistance or the technology provided by extraterrestrials.

197

00:17:09,454 --> 00:17:16,457

If ancient structures found all over the world were built to outlast the beings that constructed them,

198

00:17:16,457 --> 00:17:21,458

is it possible that they were meant to serve a greater purpose?

199

00:17:21,458 --> 00:17:28,461

One not known to the builders themselves, but only to those who instructed them.

200

00:17:29,461 --> 00:17:33,463

Giza Plateau, Egypt.

201

00:17:33,463 --> 00:17:40,465

The Great Pyramid is arguably the most enigmatic structure on the face of the Earth.

202

00:17:40,465 --> 00:17:47,468

It is the only surviving wonder of the ancient world,

203

00:17:47,468 --> 00:17:52,470

and has inspired endless speculation as to how it was built

204

00:17:52,470 --> 00:17:55,471

and what purpose it's set to.

205

00:17:55,471 --> 00:18:00,473

Ever since the first studies of the Great Pyramid in Egypt have been made,

206

00:18:00,473 --> 00:18:05,475

researchers have been amazed at the mathematical knowledge

207

00:18:05,475 --> 00:18:11,477

that is encoded into the Great Pyramid, the measurements that are used in it.

208

00:18:11,477 --> 00:18:18,479

Even the placement of the Great Pyramid has aroused great interest among Egyptologists.

209

00:18:18,479 --> 00:18:24,481

The Great Pyramid is a line that is a line that is a line that is a line that is a line

210

00:18:24,481 --> 00:18:28,483

that is a line to within three sixtieths of a degree of north.

211

00:18:28,483 --> 00:18:33,485

A more accurate alignment than any other structure on Earth.

212

00:18:33,485 --> 00:18:39,487

When you look at the Great Pyramid's alignment, it's a line very, very close to true north.

213

00:18:39,487 --> 00:18:45,489

Even more interesting is to think about tracking back in time because the Earth's axis has been

shifting slowly.

214

00:18:45,489 --> 00:18:47,490

It's what we call processes.

215

00:18:47,490 --> 00:18:53,492

And so if there's been a shift in that alignment, it could be that it was even more accurately aligned to north

216

00:18:53,492 --> 00:18:56,493

than past when they built it.

217

00:18:56,493 --> 00:19:01,495

The Great Pyramid is not only perfectly aligned to the cardinal points,

218

00:19:01,495 --> 00:19:06,497

its placement on the Earth is seemingly intentional as well.

219

00:19:06,497 --> 00:19:15,500

If you pass a great circle from the Great Pyramid through its cardinal and its ordinal directions,

220

00:19:15,500 --> 00:19:21,502

what you find is that these circles will pass through more landmass of the Earth

221

00:19:21,502 --> 00:19:24,503

than any other location on Earth.

222

00:19:24,503 --> 00:19:30,506

You find that the Great Pyramid is essentially located at the centre of the world's landmass.

223

00:19:34,507 --> 00:19:39,509

Since the first accurate survey of the Great Pyramid in 1925,

224

00:19:39,509 --> 00:19:44,511

mathematicians and researchers have discovered even more profound connections

225

00:19:44,511 --> 00:19:50,513

relating to geodetic information or information pertaining to the measurement

226

00:19:50,513 --> 00:19:55,515

and representation of the Earth encoded in its design.

227

00:19:55,515 --> 00:20:04,518

The Great Pyramid was built the level of technological sophistication far in excess of anything that we have today.

228

00:20:04,518 --> 00:20:10,520

They don't use the inch as we normally have it in the English system, it's the cubit.

229

00:20:10,520 --> 00:20:18,523

And what's interesting about this cubit is that it is exactly one 25 millionth of the polar diameter of the Earth,

230

00:20:18,523 --> 00:20:21,524

meaning the distance from the North Pole to the South Pole of the Earth.

231

00:20:21,524 --> 00:20:26,526

Chop it up into 25 million pieces, there's your cubit, it's perfect.

232

00:20:27,526 --> 00:20:31,528

If you actually take the length of the Great Pyramid at its mean socket level,

233

00:20:31,528 --> 00:20:38,530

which is the corners of the actual building, it translates into 365.24 pyramid cubits,

234

00:20:38,530 --> 00:20:43,532

which just happens to be the Earth right down to a quarter day.

235

00:20:44,532 --> 00:20:52,535

The measurements of the length and width of the perimeter of the Great Pyramid

236

00:20:52,535 --> 00:20:58,538

correspond to an exact fraction of both the latitude and longitude measurements at the equator.

237

00:20:59,538 --> 00:21:06,541

Scaled up, this means the Great Pyramid directly corresponds to the circumference of the equator,

238

00:21:06,541 --> 00:21:09,542

as well as the measurement from the equator to the pole,

239

00:21:09,542 --> 00:21:13,543

making it a scale model of the Northern Hemisphere.

240

00:21:17,545 --> 00:21:26,548

Recently, using satellite technology, researchers have realized yet another advanced formula encoded in the design.

241

00:21:28,549 --> 00:21:31,550

If you take the location of the Great Pyramid as a coordinate,

242

00:21:32,550 --> 00:21:38,552

this number sequence of this coordinate matches exactly the speed of light traveling through space

243

00:21:38,552 --> 00:21:42,554

measured in meters per second, this is amazing stuff.

244

00:21:44,554 --> 00:21:51,557

When you consider the vast amount of information about the Earth that's encoded into the Great Pyramid,

245

00:21:51,557 --> 00:21:55,558

you can't just dismiss all of this as pure coincidence.

246

00:21:58,559 --> 00:22:04,562

Although the Great Pyramid at Giza offers an astounding example of encoded information,

247

00:22:05,562 --> 00:22:12,565

other sites around the world, such as the Mesoamerican Pyramids and the ziggurats of Mesopotamia,

248

00:22:12,565 --> 00:22:19,567

have also been found to be aligned to exact cardinal points and embody mathematical concepts.

249

00:22:22,568 --> 00:22:26,570

These buildings were built under divine guidance.

250

00:22:27,570 --> 00:22:29,571

This is a mark of the gods.

251

00:22:29,571 --> 00:22:35,573

They put certain things in these buildings to let us know they are not entirely of human origin.

252

00:22:35,573 --> 00:22:38,574

They represent something larger than we are.

253

00:22:39,574 --> 00:22:47,577

The builders wanted to make sure that a future generation would know that there's a discrepancy in knowledge.

254

00:22:47,577 --> 00:22:55,580

And what I'm suggesting is that all these ancient structures are calling cards left by extraterrestrials.

255

00:22:56,581 --> 00:23:03,583

Ancient astronaut theorists suggest that evidence of extraterrestrial intervention in the construction

256

00:23:03,583 --> 00:23:11,586

and placement of these incredible structures can also be found by examining their alignments with the stars.

257

00:23:12,586 --> 00:23:20,589

If I wanted to leave behind a piece of evidence that suggests where I'm from,

258

00:23:21,590 --> 00:23:28,592

one way, for example, is by creating monuments that are in the shape of constellations.

259

00:23:28,592 --> 00:23:36,595

In ancient Egypt, the three pyramids are aligned with the constellation of Orion's Belt.

260

00:23:36,595 --> 00:23:42,597

The pyramids are not the only monuments that have this particular configuration.

261

00:23:43,598 --> 00:23:53,601

The ancient site of Teotihuacan in Mexico also contains three pyramids that are oriented to match up with the belt stars of Orion.

262

00:23:54,602 --> 00:24:00,604

And other sites throughout the world have been found to have similar astronomical alignments.

263

00:24:01,604 --> 00:24:08,607

Were ancient structures and even entire complexes purposefully encoded with advanced principles

264

00:24:08,607 --> 00:24:13,609

so that future generations would recognize and otherworldly influence?

265

00:24:15,609 --> 00:24:22,612

Ancient astronaut theorists say yes, but suggest an even more profound purpose might be revealed

266

00:24:22,612 --> 00:24:29,615

by examining these structures from an extraterrestrial perspective.

267

00:24:38,618 --> 00:24:43,620

Saint-Jean-de-Mittage, Quebec, Canada, May 2016.

268

00:24:45,620 --> 00:24:50,622

After extensively studying the manuscripts of the ancient Mayan civilization

269

00:24:50,622 --> 00:24:54,624

that reached its peak in 1000 A.D.,

270

00:24:54,624 --> 00:25:00,626

15-year-old student William Gaddery stumbles across something astonishing.

271

00:25:01,626 --> 00:25:08,629

The star diagrams contained in the documents perfectly correlate with the layout of existing Mayan cities.

272

00:25:09,629 --> 00:25:18,632

Gaddery discovered that there were 22 star maps in the texts that lined up with the cities very nicely, 117 different cities.

273

00:25:19,633 --> 00:25:27,636

But there was a 23rd map in which one of the cities did not exist on the map.

274

00:25:28,636 --> 00:25:36,639

Now he was really concerned about this because he felt, wait a minute, this is like a treasure map and X marks the spot.

275

00:25:37,639 --> 00:25:43,641

Gaddery found it odd that only one star on the maps did not match up with a Mayan city

276

00:25:43,641 --> 00:25:49,644

and concluded that perhaps it really did exist but had not yet been discovered.

277

00:25:50,644 --> 00:25:55,646

With the assistance of the Canadian Space Agency and Dr. Armand Larocke,

278

00:25:55,646 --> 00:25:59,647

a remote sensing specialist from the University of New Brunswick,

279

00:26:00,648 --> 00:26:06,650

Gaddery was able to use satellite imagery to pinpoint the exact coordinates where the city should be.

280

00:26:08,651 --> 00:26:11,652

What they see is absolutely mind-blowing.

281

00:26:11,652 --> 00:26:15,653

There it is, a perfect square object.

282

00:26:16,654 --> 00:26:21,655

It's clearly angular, it's clearly geometric, it has symmetrical proportions on both sides.

283

00:26:22,656 --> 00:26:30,659

This square, according to Dr. Armand Larocke himself, could actually be the foundation of a pyramid.

284

00:26:32,659 --> 00:26:40,662

Although archaeologists have yet to visit the site, the lost city was given the name Ka'akchi or mouth of fire.

285

00:26:42,663 --> 00:26:53,667

Gaddery's discovery would seem to confirm that the Maya precisely placed their cities in a way that perfectly neared the stars above.

286

00:26:54,667 --> 00:27:02,670

An astonishing accomplishment considering that the territory they occupied spans over 75,000 square miles.

287

00:27:03,671 --> 00:27:07,672

We have the entirety of all Mayan civilization.

288

00:27:08,672 --> 00:27:14,675

Every one of those cities perfectly gridded out, mathematical precision with star maps.

289

00:27:15,675 --> 00:27:17,676

How could a primitive culture have done this?

290

00:27:19,676 --> 00:27:26,679

Ancient astronaut theorists say the Maya were told where to build their cities by extraterrestrial visitors

291

00:27:26,679 --> 00:27:31,681

and suggest that this occurred with other civilizations throughout the world.

292

00:27:33,682 --> 00:27:37,683

But it was not only the stars that determined the placement of important sites.

293

00:27:38,683 --> 00:27:43,685

Many were also aligned with the very energy of the Earth itself.

294

00:27:44,686 --> 00:27:49,687

Herefordshire, England, 1921

295

00:27:51,688 --> 00:27:56,690

Alfred Watkins, a landscape photographer, makes a curious discovery.

296

00:27:58,691 --> 00:28:07,694

Many of the prehistoric standing stones, mounds, forts and earthworks in the area fall directly in a straight line extending for several miles.

297

00:28:08,694 --> 00:28:14,697

He coins the term laylines to describe these alignments, which he later finds throughout England and France.

298

00:28:16,697 --> 00:28:21,699

These so-called laylines actually cross over all of the ancient stone structures.

299

00:28:22,699 --> 00:28:31,703

Like Stonehenge or Avebury, something is going on here in which this idea of these lines has been used to create a new world.

300

00:28:31,703 --> 00:28:42,707

We see that the Templars borrowed this same science of gridlines during the Crusades and then started to build all of the cathedrals throughout Europe on the so-called laylines.

301

00:28:44,707 --> 00:28:49,709

Ancient cultures had this understanding that the world has a new world.

302

00:28:49,709 --> 00:28:56,712

The ancient cultures understood that these lines of power were almost like sources of energy and by building structures along these sources of energy they could almost tap its power.

303

00:28:58,713 --> 00:29:07,716

In 1992, after 30 years of building structures, the Templars were able to build structures that were used to create the new world.

304

00:29:07,716 --> 00:29:14,718

The Templars were almost like sources of energy and by building structures along these sources of energy they could almost tap its power.

305

00:29:16,719 --> 00:29:27,723

In 1992, after 30 years of visiting the megalithic standing stones in the Carnac region of France and hearing stories about energetic laylines,

306

00:29:28,724 --> 00:29:34,726

thermodynamics engineer Pierre Maraud sets out to discover if there is any truth to the theory.

307

00:29:35,726 --> 00:29:40,728

And Maraud actually went to Carnac in France where there are at least 80,000 standing stones.

308

00:29:41,728 --> 00:29:49,731

And as a skeptic he actually measured the energy of these stones and found that these stones actually act as batteries, as coils, as alternators.

309

00:29:50,732 --> 00:30:00,735

They store energy and they also allow the energy to expand at certain times during the day, demonstrating that the stones are built exactly where they need to be to harness a specific energy.

310

00:30:01,736 --> 00:30:14,740

If extraterrestrials instructed our ancestors on where to build their most important structures, as ancient astronaut theorists suggest, was it to exploit the power of the site?

311

00:30:16,741 --> 00:30:25,744

Perhaps further clues can be found by examining what many consider to be the holiest and most contentious site on the planet.

312

00:30:31,746 --> 00:30:36,748

Chichen Itza, Mexico, August 2015.

313

00:30:37,749 --> 00:30:42,750

A sinkhole is discovered under the 1,000-year-old El Castillo Temple.

314

00:30:44,751 --> 00:30:50,753

Scientists worried about the stability of the pyramid begin extensive examinations of the site.

315

00:30:51,754 --> 00:30:58,756

While investigating, they discovered two nested structures contained within the confines of the pyramid.

316

00:30:59,757 --> 00:31:03,758

The pyramid at Chichen Itza is actually not one pyramid but three.

317

00:31:04,759 --> 00:31:11,761

These are built like Russian dolls. They keep repeating the same design feature, the same construction method, the same unit of measure over time.

318

00:31:12,761 --> 00:31:18,764

So obviously something worked thousands of years ago and they kept repeating it again and again and again, like a cookie cutter.

319

00:31:19,764 --> 00:31:24,766

It is a pyramid that's inside of another pyramid.

320

00:31:25,766 --> 00:31:33,769

We also see this at the great pyramid of Cholula, one of the largest pyramids in the world, just outside of Mexico City.

321

00:31:34,769 --> 00:31:40,772

Also, we see this at Joseph's pyramid in Sokara in Egypt.

322

00:31:40,772 --> 00:31:50,775

So ancient peoples were for some reason rebuilding over and over again these ancient structures because they apparently were in a location that was so important.

323

00:31:51,776 --> 00:31:56,777

There's something special about that place.

324

00:31:56,777 --> 00:32:06,781

Throughout the world, evidence of sacred sites that have transcended various cultures and religious traditions can be found.

325

00:32:07,781 --> 00:32:13,784

The Temple Mount is considered holy to all the world religions.

326

00:32:14,784 --> 00:32:20,786

The Temple Mount is also a sacred place for the people of the world.

327

00:32:20,786 --> 00:32:25,788

The Temple Mount is considered holy to all the world religions.

328

00:32:26,788 --> 00:32:34,791

The Temple of Solomon was built there. Later Christianity built their own churches upon it.

329

00:32:35,792 --> 00:32:41,794

This is where the Prophet of Islam, Muhammad, had a vision where in which he ascended to heaven.

330

00:32:42,794 --> 00:32:49,797

And it was upon this vision that proclaimed the Temple Mount to be sacred to Islam.

331

00:32:50,797 --> 00:32:56,799

What it was considered sacred before the ancient Israelites even came into the land of Israel.

332

00:32:57,800 --> 00:33:08,804

We read in the Bible about Abraham meeting a very strange priest by the name of Malkhi Sedek who was to have had his own temple there.

333

00:33:09,804 --> 00:33:14,806

So there was a very ancient connection to this specific place.

334

00:33:14,806 --> 00:33:20,808

In Lebanon there is the Temple Tubao Bek.

335

00:33:21,808 --> 00:33:28,811

Later under Greek control they built a different structure on the same foundation stone and called the area Heliopolis.

336

00:33:29,811 --> 00:33:33,813

There are cathedrals throughout the world that had pre-Christian foundations.

337

00:33:34,813 --> 00:33:43,816

We have it all over the world which means that a sacred site has a power of its own that is larger

or older or longer lasting.

338

00:33:44,817 --> 00:33:47,818

It is more sacred than any particular tradition.

339

00:33:48,818 --> 00:33:50,819

The thing is the location is what's sacred.

340

00:33:51,819 --> 00:34:01,823

Could it be that much like the locations of the Mayan cities that are mapped out based on a cosmic grid and the ley lines in England,

341

00:34:02,823 --> 00:34:07,825

these worldwide sacred sites also connect to a larger blueprint.

342

00:34:08,826 --> 00:34:14,828

The origins of the idea of a world grid can be traced back to ancient Greece.

343

00:34:17,829 --> 00:34:25,832

Philosophers like Plato were very adamant that the ancient sacred places were specially positioned along the face of the earth in a very deliberate way

344

00:34:26,832 --> 00:34:28,833

and they conformed to what was called a world grid.

345

00:34:29,833 --> 00:34:33,835

The temples were not placed haphazardly, they actually had a structure and purpose to them.

346

00:34:34,835 --> 00:34:44,839

In the 1960s, researcher Ivan T. Sanderson plotted out his own planetary grid based on Plato's work.

347

00:34:45,839 --> 00:34:49,841

Other world grid researchers would later build upon his model.

348

00:34:52,842 --> 00:34:59,844

What they identified was that there was a geometric pattern that could be superimposed on the earth

349

00:34:59,844 --> 00:35:05,846

and that grid point usually started at the great pyramid itself

350

00:35:06,847 --> 00:35:09,848

and they would go out from there in a geometric form.

351

00:35:11,849 --> 00:35:20,852

Russian researchers did a full survey of all of the large stone structures that have ever been found all over the earth.

352

00:35:21,852 --> 00:35:33,857

A total of 3,300 different stone structures and they found that every single one of them was built right on one of the lines of this geometric pattern.

353

00:35:35,857 --> 00:35:40,859

On this grid, sites like Stonehenge in England,

354

00:35:41,859 --> 00:35:49,862

Megalus in West Africa, the Bermuda Triangle, Pyramids in Mexico and in Peru,

355

00:35:50,863 --> 00:35:58,866

islands like Easter Island, the bizarre city of Nand-Midal were also matching this grid.

356

00:35:59,866 --> 00:36:07,869

The specific power spots where we find pyramids and obelisks and other structures may have not been chosen just by chance.

357

00:36:07,869 --> 00:36:13,871

It could well be that they are part of an integrated hall and their location is highly, highly important.

358

00:36:14,872 --> 00:36:24,875

Some researchers speculate that ancient cultures around the world connected all of their temples to each other almost like a master circuit board

359

00:36:25,876 --> 00:36:34,879

where one temple connected to another temple connected to another added to the power of the structure, added to the power of the line itself.

360

00:36:37,880 --> 00:36:42,882

When we think of the power grid, we think of energy being transmitted along this grid.

361

00:36:43,882 --> 00:36:47,884

What if there's something else going on here? What if there's something bigger that we're not seeing?

362

00:36:48,884 --> 00:36:54,886

What if this world power grid is actually receiving energy from the solar system or from the universe itself?

363

00:36:56,887 --> 00:37:03,889

Who is it who's overseeing this larger picture of all of these structures on the earth?

364

00:37:03,889 --> 00:37:12,893

They're somehow looking at the earth from space and seeing how these structures would fit on a large scale around the globe.

365

00:37:13,893 --> 00:37:16,894

Who could be doing this except for extraterrestrials?

366

00:37:19,895 --> 00:37:25,897

If the placement of structures on earth were specifically plotted to serve an extraterrestrial function,

367

00:37:26,898 --> 00:37:30,899

might parts of this system still be online today?

368

00:37:31,900 --> 00:37:35,901

And if so, does it serve a purpose beyond earth?

369

00:37:55,908 --> 00:38:01,911

He tells his experience observing UFOs during his time working for the New Zealand military.

370

00:38:03,911 --> 00:38:07,913

He noted that these crafts were always following straight lines.

371

00:38:08,913 --> 00:38:13,915

After mapping them, he discovered that they followed a distinctive grid pattern.

372

00:38:15,916 --> 00:38:23,919

Additionally, while flying over some of these zones, he also noticed that various structures were actively being built along the paths.

373

00:38:25,919 --> 00:38:36,923

Bruce Cathy maintained that the American military, starting in World War II, had also figured out this special grid that surrounds the entire planet.

374

00:38:37,924 --> 00:38:44,926

And that the military was using certain spots on the earth to build military bases and other structures.

375

00:38:45,927 --> 00:38:52,929

Cathy suggested that the extraterrestrial craft may have been drawing power off the grid.

376

00:38:53,929 --> 00:39:02,933

And that after World War II and the Roswell incident, military personnel around the world had become aware of this UFO connection.

377

00:39:04,933 --> 00:39:11,936

So here we have an ancient grid structure, probably built by extraterrestrials,

378

00:39:12,936 --> 00:39:21,940

possibly to power their craft, that's now being reconstructed today by the military.

379

00:39:25,941 --> 00:39:33,944

Could it be that ancient structures throughout the world were designed to function together as part of a massive energy grid?

380

00:39:34,944 --> 00:39:44,948

And did the architects intentionally leave behind information for us to find once we had the technological knowledge to recognize this system?

381

00:39:45,948 --> 00:39:50,950

But why? What were the alien architects trying to tell us?

382

00:39:50,950 --> 00:40:06,956

The extraterrestrials knew that at some point in our evolution, a technologically advanced society would stumble across all of these ancient sites and see their correlation.

383

00:40:07,956 --> 00:40:22,962

Thus forcing us to take into consideration that some type of extraterrestrials showed our ancestors where to build these things, not for them, but for us.

384

00:40:23,962 --> 00:40:34,966

The grid itself may in fact be a source of unconventional energy that we are not necessarily utilizing with our technology now.

385

00:40:34,966 --> 00:40:44,970

An advanced intelligent race wanted to leave something behind for us to discover that would give us the clues to a greater level of science than we now understand.

386

00:40:45,970 --> 00:40:55,974

It could be that this master architect sought not only to influence the Earth, but also to connect the Earth to something greater or beyond our imagination.

387

00:40:55,974 --> 00:41:04,977

Perhaps this grid even extends out into the stars and the world grid of the Earth connects with the grid of other planets as well,

388

00:41:04,977 --> 00:41:12,980

and then integrates the Earth into a huge colony, if you will, or integrated circuit throughout the cosmos.

389

00:41:13,981 --> 00:41:26,985

This will be profound for planet Earth when this grid network is re-powered, and we don't know what effect it will ultimately have on our future.

390

00:41:26,985 --> 00:41:31,987

Maybe this will be the time when the extraterrestrials return.

391

00:41:32,987 --> 00:41:41,991

There are those who believe that the discovery of an ancient energy grid will offer a quantum leap in human achievement,

00:41:41,991 --> 00:41:53,995

because by harnessing the energy of the Earth we will not only advance beyond our planet, but far beyond the stars, and anything we could ever imagine.
