

1

00:00:00,344 --> 00:00:07,346

What I think is cool is that we're watching all this stuff that's happening here on the screen.

2

00:00:07,346 --> 00:00:12,348

But we're looking at Dr. Chopra right now. He sits there perfectly still, motionless.

3

00:00:12,348 --> 00:00:14,348

But look at all the activity.

4

00:00:14,348 --> 00:00:20,350

Very, very conscious control of his brain activity and all this inner world that he can activate or not.

5

00:00:20,350 --> 00:00:29,353

In many spiritual traditions in the East they say that three states of consciousness that we all go through every day are sleep, dreams and waking.

6

00:00:29,353 --> 00:00:41,357

But then there's a state of consciousness that's called cosmic consciousness which is beyond the physical world and basically a record of the entire history of the universe.

7

00:00:59,363 --> 00:01:01,364

The Universe

8

00:01:12,367 --> 00:01:21,370

Although completely invisible to the naked eye, a virtual universe of electromagnetic waves permeates our entire world.

9

00:01:21,370 --> 00:01:31,373

And this vast network of impulses carries within it information and data that we have come to depend on in our digital age.

10

00:01:31,373 --> 00:01:40,376

It is the backbone of what is otherwise referred to as the cloud which remotely stores billions of gigabytes of data.

11

00:01:40,376 --> 00:01:46,378

When we think about the cloud what we're really talking about is data transfer, information transfer.

12

00:01:47,378 --> 00:01:56,381

You're sending bits of information through the air wirelessly up to satellites, down to servers, back again, into your computer, into your phone.

13

00:01:56,381 --> 00:02:01,383

And there's close to seven billion people using cloud computing now.

14

00:02:01,383 --> 00:02:12,386

So you can imagine that pretty much anywhere on the planet that has internet access you're going to find these hidden sort of secret patterns and codes that are floating around us.

15

00:02:16,388 --> 00:02:27,391

According to historians the concept of an intergalactic computer network was first proposed by scientist J.C.R. Licklider in the 1960s.

16

00:02:27,391 --> 00:02:37,394

However, ancient astronaut theorists suggest that the idea may actually trace all the way back to our ancient past.

17

00:02:38,395 --> 00:02:45,397

Corva Island, Rekshur, India

18

00:02:45,397 --> 00:02:54,400

Religious pilgrims seeking enlightened wisdom travel here to a temple dedicated to the celestial sage, Narada.

19

00:02:55,400 --> 00:03:10,405

According to the Hindu scriptures, Narada had the supernatural ability to gain access to a hidden domain that most humans are completely unaware of, the realm of cosmic knowledge.

20

00:03:10,405 --> 00:03:17,407

Tales about Narada appear in the Mahabharata, in the Ramayana, in the Puranas.

21

00:03:17,407 --> 00:03:26,410

Tradition has it that Narada transcendent consciousness to gather his stories and give teachings of great wisdom.

22

00:03:26,410 --> 00:03:35,413

Narada is called Narada Rishi. Rishis are like sages in western concept.

23

00:03:35,413 --> 00:03:45,416

So they have gained this ability to be able to tap into the knowledge, access that knowledge directly from the cosmos.

24

00:03:47,417 --> 00:04:00,421

Narada is interesting specifically that he clearly had access to an essential knowledge that is at the fabric of the divine cosmic order.

25

00:04:05,423 --> 00:04:14,426

This idea of an otherworldly repository of cosmic information is most commonly referred to today as the Akashic record.

26

00:04:15,426 --> 00:04:24,429

The term was coined in 1883 by author Alfred Percy Sennett in his book, Esoteric Buddhism.

27

00:04:24,429 --> 00:04:38,433

In it, he describes how according to Eastern philosophy, universal records physically exist in the ever-pervasive realm known as the Akasha, which can be accessed by enlightened individuals.

28

00:04:39,434 --> 00:04:44,435

Akashic is a Sanskrit word. It means sky.

29

00:04:44,435 --> 00:04:49,437

So Akashic records can be considered as cosmic knowledge.

30

00:04:49,437 --> 00:04:54,438

So it is belonging to the cosmos. Everything is written in sky.

31

00:04:54,438 --> 00:04:57,439

It's not belonging to human beings.

32

00:04:57,439 --> 00:05:02,441

You simply cannot go and bring it in a tangible form.

33

00:05:03,441 --> 00:05:10,444

It's something that can be accessed through your mind, through your brain power, through your spiritual web-legged.

34

00:05:13,445 --> 00:05:20,447

The Akashic field, it's the immeasurable potential of all that was, is and will ever be.

35

00:05:20,447 --> 00:05:26,449

It's completely non-local. Non-local means there's no experience of space or time.

36

00:05:27,449 --> 00:05:38,453

This is the level of entanglement where everything in the universe is inseparably correlated with everything else in the universe.

37

00:05:40,453 --> 00:05:54,458

I have always called the universe the wireless network, where information is just out there and stored from all our minds and memories from every creature living in this universe.

38

00:05:54,458 --> 00:05:59,459

This bank of knowledge has been with us since the formation of the universe.

39

00:06:02,460 --> 00:06:09,463

The idea of the Akashic record, it's where inventions come from, it's where art comes from, it's where science comes from.

40

00:06:09,463 --> 00:06:14,464

You can call it whatever you want. It's something that's in the substrate, right?

41

00:06:14,464 --> 00:06:18,465

It's something that you can access and sort of find information that's been hidden.

42

00:06:18,465 --> 00:06:24,467

It's not even hidden, I mean it's available to us all the time. It's just that certain people who tune into it can unlock it.

43

00:06:24,467 --> 00:06:33,470

This Akashic record may be something that every biological entity in the universe can gain access to.

44

00:06:33,470 --> 00:06:39,472

I believe it's something that even extraterrestrials would tap into.

45

00:06:40,473 --> 00:06:47,475

Throughout history, countless prophets and visionaries have alluded to accessing such a realm.

46

00:06:47,475 --> 00:06:59,479

And spiritual practitioners the world over claim that through deep prayer and meditation, an individual may be granted glimpses into this divine domain.

47

00:07:00,479 --> 00:07:08,482

There seemed to be a common way to tap into all of this information that all these prophets were following.

48

00:07:09,482 --> 00:07:19,485

The first thing was to quiet your mind. And this is the time where your brain waves start to tap into higher dimensional realities.

49

00:07:20,485 --> 00:07:29,488

When we say deep meditation, we mean going into that state of awareness. That's called cosmic consciousness.

50

00:07:29,488 --> 00:07:42,492

What you're accessing is the non-local aspects of consciousness which are connected to past, present, future in a sense.

51

00:07:43,493 --> 00:07:50,495

If a cosmic realm of information truly exists, could there really be a way for humans to access it?

52

00:07:51,495 --> 00:07:57,497

Perhaps further clues can be found by testing what's happening in the brain.

53

00:07:57,497 --> 00:08:00,498

Under Deep Meditation

54

00:08:04,500 --> 00:08:09,501

Los Angeles, California, March 2017

55

00:08:09,501 --> 00:08:10,501

Dr. Nardi?

56

00:08:10,501 --> 00:08:11,502

Oh, yeah.

57

00:08:11,502 --> 00:08:12,502

Giorgio.

58

00:08:12,502 --> 00:08:24,506

Editor and researcher Giorgio Succolos meets with neuroscientist Dr. Dario Nardi, who has extensively studied neurological effects on the human brain during deep meditation.

59

00:08:24,506 --> 00:08:26,507

Dr. Chopra, I'm Giorgio.

60

00:08:26,507 --> 00:08:27,507

Great pleasure to meet you.

61

00:08:27,507 --> 00:08:28,507

Nice to meet you too.

62

00:08:28,507 --> 00:08:29,508

And are you ready?

63

00:08:29,508 --> 00:08:30,508

Oh, yes, I'm ready.

64

00:08:30,508 --> 00:08:50,514

World-renowned physician, author and guided meditation expert Dr. Deepak Chopra has agreed to allow Dr. Dario Nardi to utilize advanced brain mapping software to observe real-time changes in his brain as he enters a state of deep meditation.

65

00:08:51,515 --> 00:08:54,516

Okay, Dr. Chopra, we're going to get a baseline.

66

00:08:54,516 --> 00:08:59,517

Okay, so we're taking a look at the brain now before his meditation.

67

00:08:59,517 --> 00:09:06,519

So each of the sensors corresponds roughly to a particular brain region, anatomical areas of the brain.

68

00:09:06,519 --> 00:09:09,520

We see activity more towards the front of the brain.

69

00:09:09,520 --> 00:09:11,521

What do these different colors mean?

70

00:09:11,521 --> 00:09:15,522

So when we see that red and orange and even yellow, that's much more active.

71

00:09:15,522 --> 00:09:20,524

And when we see the dark blue and the black here, then the brain has gotten very quiet.

72

00:09:20,524 --> 00:09:21,524

Okay.

73

00:09:21,524 --> 00:09:25,526

And each one of these views here indicates a different wave band.

74

00:09:25,526 --> 00:09:29,527

And you're expecting to see something different once he goes into deep meditation.

75

00:09:29,527 --> 00:09:31,528

Yes, absolutely.

76

00:09:31,528 --> 00:09:34,528

Okay, Dr. Chopra, when you're ready.

77

00:09:34,528 --> 00:09:39,530

Okay, so he's going into his meditative process right now.

78

00:09:39,530 --> 00:09:44,532

And we can see the brain activity swiftly dropping and becoming much darker.

79

00:09:44,532 --> 00:09:47,533

Yeah, there we go.

80

00:09:47,533 --> 00:09:48,533

Beautiful.

81

00:09:48,533 --> 00:09:54,535

Okay, so we're seeing here a region that doesn't get used very often, certainly not by itself,

82

00:09:54,535 --> 00:09:55,535

down in the corner here.

83

00:09:55,535 --> 00:10:01,537

So this is an area of the brain in the back, the visual cortex, where we're going to see the brain.

84

00:10:01,537 --> 00:10:08,539

This is an area of the brain in the back, the visual cortex, where we're seeing that the brain is really disengaging from everyday life

85

00:10:08,539 --> 00:10:15,542

and going into the special state, this altered state, and to really connect with something beyond ourselves.

86

00:10:15,542 --> 00:10:22,544

Is that something that only a person that's been trained in meditation for a long time can activate?

87

00:10:22,544 --> 00:10:26,545

It's not a region of the brain that people normally activate upon command.

88

00:10:26,545 --> 00:10:27,546

Amazing.

89

00:10:27,546 --> 00:10:32,547

What I think is cool is that we're watching all this stuff that's happening here on the screen,

90

00:10:32,547 --> 00:10:35,548

but we're looking at Dr. Chopra right now.

91

00:10:35,548 --> 00:10:39,549

He sits there perfectly still, motionless, but look at all the activity.

92

00:10:39,549 --> 00:10:46,552

Very, very conscious control of his brain activity and all this inner world that he can activate or not.

93

00:10:46,552 --> 00:10:55,555

In many spiritual traditions in the East, they say that three states of consciousness that we all go through everyday are sleep, dreams, and waking.

94

00:10:55,555 --> 00:11:01,556

But then there's a state of consciousness, that's called cosmic consciousness, which is beyond the physical world

95

00:11:01,556 --> 00:11:06,558

and basically a record of the entire history of the universe.

96

00:11:10,559 --> 00:11:19,562

Is it possible that humans have the ability to access information beyond that which has been accumulated through their own experiences?

97

00:11:20,563 --> 00:11:29,565

Theoretical scientists propose that they have found evidence that there truly is a vast field of information present in the cosmos.

98

00:11:29,565 --> 00:11:34,567

But if so, just what is it that we are tapping into?

99

00:11:38,568 --> 00:11:41,569

Tuscany, Italy, 2004.

100

00:11:42,570 --> 00:11:47,571

After years of studying the nature of electromagnetic and gravitational fields,

101

00:11:47,571 --> 00:11:57,574

celebrated futurist and Nobel Prize nominee Dr. Ervin Laszlo announces that he has found evidence of the A or Akashic field.

102

00:11:58,575 --> 00:12:04,577

Dr. Laszlo took work from the discovery of the quantum zero-point energy,

103

00:12:04,577 --> 00:12:10,579

which is a radiation field that exists all around us that we can't perceive, but we can detect it indirectly.

104

00:12:10,579 --> 00:12:15,580

It's very solid theoretically. It was first discovered by Einstein.

105

00:12:15,580 --> 00:12:24,583

So we know that the zero-point energy exists and it carries a lot of information about the universe in it.

106

00:12:25,583 --> 00:12:33,586

Laszlo proposed that this didn't carry just a physical information about the physics of the universe,

107

00:12:33,586 --> 00:12:37,587

but also it contained intellectual information.

108

00:12:40,588 --> 00:12:48,591

According to theoretical physicists, zero-point energy is an all-pervasive sea of quantum energy waves

109

00:12:48,591 --> 00:12:52,592

that is invisible but exists throughout the universe.

110

00:12:52,592 --> 00:12:58,594

The fabric of space itself is made of energy and information.

111

00:12:58,594 --> 00:13:03,596

And the way this information propagates through the universe is through waves.

112

00:13:03,596 --> 00:13:06,597

We call that quantum waves.

113

00:13:06,597 --> 00:13:13,599

And so the Akashic field is made of quantum waves that are common to all intelligent life.

114

00:13:13,599 --> 00:13:26,603

This means that all human brains, extraterrestrial brains, any sort of otherworldly beings also are tapping into similar quantum waves.

115

00:13:27,603 --> 00:13:36,606

This idea of an intelligent informational field that we can access with our consciousness is not pseudoscience.

116

00:13:36,606 --> 00:13:45,609

It's not superstition. It is a basic fact that our scientists are finding out is really true.

117

00:13:47,610 --> 00:13:54,612

Nearly two decades prior to Laszlo's discovery, Nobel Prize-winning physicist Richard Feynman

118

00:13:54,612 --> 00:14:01,614

published his groundbreaking work in quantum physics, *The Strange Theory of Light and Matter*.

119

00:14:01,614 --> 00:14:12,618

In it, he explored the idea that electrons in our brains can be activated and informed by quantum waves, affecting our thoughts and subconscious.

120

00:14:13,618 --> 00:14:21,621

So Richard Feynman talked about the quantum entanglement theory and the idea that you could have subatomic particles

121

00:14:21,621 --> 00:14:31,624

at any distance whatsoever and they could affect each other where information can be sent at great speeds instantaneously, actually.

122

00:14:33,625 --> 00:14:38,626

The human brain is full of electrical activity. That creates radiation.

123

00:14:38,626 --> 00:14:41,627

That a very sensitive radio receiver could pick up.

124

00:14:41,627 --> 00:14:46,629

And other minds, other places, would also be able to send such waves.

125

00:14:47,629 --> 00:14:57,632

Feynman found from the idea of a quantum field of information, an electron moving in our brains, could be receiving radio signals from the past,

126

00:14:57,632 --> 00:15:03,634

but to compensate it must also receive waves from the future.

127

00:15:04,635 --> 00:15:12,637

Now, this means that every electron in our brains is actually a receiver.

128

00:15:13,637 --> 00:15:18,639

Information could traverse to any part of the universe instantaneously.

129

00:15:18,639 --> 00:15:25,641

This could mean that intelligent civilizations could send complex information to us.

130

00:15:25,641 --> 00:15:33,644

By quantum wave propagation or other means, they could very much be nudging society along through people having apparent visions,

131

00:15:33,644 --> 00:15:41,646

which could be nothing more complex than a radio broadcast, some sort of thought transference through the Akashic record.

132

00:15:43,647 --> 00:15:53,650

Could the Akashic field be similar to our modern invention of the cloud, but hold an infinitely larger field of information?

133

00:15:53,650 --> 00:16:02,653

One through which the user can gain not just insight, but even foresight into future events.

134

00:16:03,653 --> 00:16:13,657

Ancient astronaut theorists say yes and suggest further clues can be found by investigating the story of a blind Bulgarian peasant,

135

00:16:13,657 --> 00:16:16,658

entering incredibly accurate prophecies.

136

00:16:21,659 --> 00:16:25,661

Novoselos, Bulgaria, 1923.

137

00:16:26,661 --> 00:16:34,663

A 12-year-old peasant girl, Vangelia, is playing with her cousins in a field when she gets caught up in a freak storm.

138

00:16:34,663 --> 00:16:44,667

She was carried off into the air by tornado, and they found her motionless body in a field.

139

00:16:45,667 --> 00:16:56,671

And strangely, her eyes were completely caked with sand and dust, and she said that she couldn't open them without excruciating pain.

140

00:16:56,671 --> 00:17:00,672

And what then began was a decline in her ability to see.

141

00:17:03,673 --> 00:17:13,676

After the accident, Vangelia developed a striking ability to predict the future, and began making accurate revelations for the local population.

142

00:17:14,676 --> 00:17:26,680

By the 1980s, Vangelia, who adopted the name Babavanga, had given thousands of accurate predictions and gained a reputation as the Notre-Dame of the Balkans.

143

00:17:26,680 --> 00:17:35,683

Babavanga said that she could see in her mind's eye, and when she would look at a person, she said that she could see their whole life in its totality,

144

00:17:35,683 --> 00:17:40,685

complete from birth through their life until death, as if she were watching a movie.

145

00:17:41,685 --> 00:17:53,689

She was a study of many Bulgarian and Soviet scientists who scientifically started testing her and interviewing her and the people that she read.

146

00:17:53,689 --> 00:17:58,690

And they have found that it is an 80% accuracy.

147

00:17:59,691 --> 00:18:12,695

Her predictions were actually very accurate, which tells us that the ability to retrieve information beyond this earth plane has nothing to do with our five senses.

148

00:18:12,695 --> 00:18:23,698

In fact, when she became blind, it is as if her other senses developed to receive messages and information about the future.

149

00:18:24,699 --> 00:18:31,701

Among her numerous claims were predictions relating to world events, many which would later come true.

150

00:18:34,702 --> 00:18:38,703

New York City, September 11, 2001.

151

00:18:39,704 --> 00:18:44,705

American president will fall after being attacked by the steel birds.

152

00:18:45,706 --> 00:18:57,709

Two planes hijacked by members of a terrorist group called Al-Qaeda crash into the World Trade Center, taking the lives of nearly 3,000 innocent civilians.

153

00:19:01,711 --> 00:19:06,712

Sumatra, Indonesia, December 26, 2004.

154

00:19:07,713 --> 00:19:16,716

A huge wave will cover a big coast covered with people and towns, and everything will disappear beneath the water.

155

00:19:17,716 --> 00:19:33,721

A 9.1 magnitude earthquake off the coast of the island creates a devastating tsunami, completely engulfing over 3,000 miles of land and claiming the lives of over 230,000 people.

156

00:19:34,721 --> 00:19:39,723

Washington, D.C. January 20, 2009.

157

00:19:40,723 --> 00:19:49,726

The 44th president of the United States will be an African-American man. Everyone will put their hopes in him.

158

00:19:49,726 --> 00:19:52,727

I, Barack Hussein Obama, do solemnly swear.

159

00:19:52,727 --> 00:20:01,730

Barack Obama, an African-American senator from Illinois, is sworn into office as the 44th president of the United States.

160

00:20:01,730 --> 00:20:03,731

Congratulations, Mr. President.

161

00:20:08,732 --> 00:20:20,736

We must remember these amazing things are coming from someone who was born a peasant, who has not read books, had a slight maybe functional literacy with Braille,

162

00:20:20,736 --> 00:20:28,739

but she essentially has no access to televisions, no access to movies. This is coming out of her interiority.

163

00:20:31,740 --> 00:20:42,743

Baba Vanga proclaimed her prophetic abilities not only allowed her to tap into an unknown realm of information, but it also put her in contact with extraterrestrials.

164

00:20:43,743 --> 00:20:53,747

Baba Vanga has talked about these extraterrestrials that are invisible, or more like they are presences like clear reflections of water shimmering.

165

00:20:54,747 --> 00:21:00,749

And they shared with her many secrets which she says are locked inside the scriptures of many

religions.

166

00:21:02,750 --> 00:21:07,751

They have to wonder with her where she was getting this information.

167

00:21:08,752 --> 00:21:19,755

Is it possible she was able to access some kind of knowledge that's out there that normal people cannot access?

168

00:21:23,756 --> 00:21:32,759

Throughout the centuries, there have been oracles and prophets that have claimed contact with other worldly realms as a source of their inspiration.

169

00:21:32,759 --> 00:21:45,763

This includes prolific seers like Michelle de Nostradamus, better known as Nostradamus, who published his seminal book, *The Prophecies*, in 1555 AD.

170

00:21:46,764 --> 00:22:00,768

Biographers claim that he predicted numerous future events, including the Great London Fire of 1666, the rise of Adolf Hitler, and even the Iranian Revolution of 1979.

171

00:22:02,769 --> 00:22:09,771

Nostradamus has been often shown as a man looking at bowls of water. He did do that, but that was very minor.

172

00:22:10,771 --> 00:22:30,778

His main use was tapping into the divine source. Nostradamus tries in his labored narratives to explain a divine state where everything is happening, not in a linear sense, but all happening at once, past, present, and future concepts bind into one thing.

173

00:22:31,778 --> 00:22:54,786

Most prophets say that they are tapping into another reality beyond this earthly existence. So potentially they could be tapping into a layer of reality that is shared by otherworldly beings, extra-terrestrial intelligence, and so on and so forth.

174

00:22:55,786 --> 00:23:20,794

Maybe the information is there. It's that our brains are not evolved yet to see the information. So there have been mystics and there have been prophets and there have been philosophers who are able through either meditation or observation or whatever their medium is to get to that place of information and have been able to access something deeper, something greater, a bigger picture.

175

00:23:21,794 --> 00:23:38,800

If seers like Baba Vanga, Nostradamus, and others are able to access an unseen cloud of information to obtain their prophecies, might this realm have also been tapped by some of history's most brilliant minds?

176

00:23:39,800 --> 00:23:51,804

Perhaps further clues can be found by examining the shocking statements made by one of the greatest

visionaries of the 20th century, Nikola Tesla.

177

00:23:51,804 --> 00:24:14,811

New York City, 1922. Two Columbia University sociologists, William Ogburn and Dorothy Thomas, publish a paper in the Academy of Political Science Journal entitled, Our Inventions Inevitable.

178

00:24:15,812 --> 00:24:31,817

In it, they cite 148 instances of simultaneous inventions where two or more individuals, each operating without knowledge of the other's work, came up with the same groundbreaking innovation or theory at the same time.

179

00:24:32,817 --> 00:24:45,821

How is it that people in different continents, different cultures, can come up with the same idea at almost exactly the same time and it's seen throughout history?

180

00:24:45,821 --> 00:24:55,824

Albert Einstein says that he came up with the idea for relativity in a few moments. It suddenly came into his mind.

181

00:24:56,825 --> 00:25:08,829

Einstein's discovery of relativity was preceded almost simultaneously by a theoretical physicist, a Frenchman named Poincaré.

182

00:25:08,829 --> 00:25:22,833

You have the radio being developed by both Nikola Tesla and Guglielmo Marconi at the same time. You have the telephone also being developed at the same time.

183

00:25:23,833 --> 00:25:27,835

There's many incidences in history like this.

184

00:25:32,836 --> 00:25:42,840

During World War II, British engineer Sir Frank Whittle and a German physicist Hans von Ohen both invented the first jet engine.

185

00:25:43,840 --> 00:25:52,843

The designs were strikingly similar and because they were serving on different sides of the war, neither had any knowledge of the other's work.

186

00:25:55,844 --> 00:26:02,846

More recently, a revolutionary discovery was made by two scientists independent of each other.

187

00:26:03,846 --> 00:26:12,849

In fact, they were thousands of miles apart and they came up with the same discovery that neutrinos have mass.

188

00:26:13,850 --> 00:26:23,853

And one has to wonder if this can be attributed to coincidence or if both scientists tapped into what is known as the Akashic record.

189

00:26:24,853 --> 00:26:28,854

There have been discoveries that have shown up around the planet at the exact same time.

190

00:26:28,854 --> 00:26:35,857

People that aren't connected, people that have no influence upon each other and those are the things that start to emerge simultaneously around the planet.

191

00:26:36,857 --> 00:26:43,859

Here's the interesting thing. This goes back to the idea that we find information in the substrate of the physical world.

192

00:26:44,860 --> 00:26:50,861

It may just be that every single discovery that we ever wanted to discover is already in the room right now.

193

00:26:50,861 --> 00:26:58,864

It isn't that the information is not there. It's that our brains are not evolved yet to see the information.

194

00:26:59,864 --> 00:27:05,866

Now, not everybody is on the same wavelength. Not everybody is evolved at the same rate. That's also true.

195

00:27:06,867 --> 00:27:11,868

So there are people throughout history that could access that information.

196

00:27:12,869 --> 00:27:17,870

This fact has been documented all the way back to the time of the Renaissance and the Reformation.

197

00:27:18,870 --> 00:27:27,873

Things like the discovery of the telescope, the identification of the colors in the rainbow, the identification of basic chemistry, the theory of evolution.

198

00:27:28,874 --> 00:27:38,877

Scientists try to explain it. And they think people have a certain level of technology at a certain time and they have the tools in front of them to be able to make breakthroughs.

199

00:27:38,877 --> 00:27:45,879

That doesn't explain why it happens so precisely that in many cases it is literally simultaneous.

200

00:27:46,879 --> 00:27:54,882

We have to look at the possibility that extraterrestrials could be introducing ideas into this information field.

201

00:27:55,882 --> 00:27:59,884

Sort of as if something has been uploaded into the cloud.

202

00:28:00,884 --> 00:28:15,889

Curious statements made by one of history's greatest visionaries, Nikola Tesla, seem to point to some sort of influence from an otherworldly realm of information.

203

00:28:16,889 --> 00:28:26,892

Tesla was most notably responsible for the practical application of alternating currents, the foundation of our modern electrical grid.

204

00:28:29,893 --> 00:28:40,897

In his autobiography, Tesla talked about the day that he had the revelation of how to harness alternating current.

205

00:28:41,897 --> 00:28:56,902

Right before that, he had a serious flu. But he said that he felt that he could detect light from his forehead and that he was able to receive information from other sources and that this other source entered his consciousness.

206

00:28:56,902 --> 00:29:00,903

And he was then able to come up with this invention which changed the world.

207

00:29:03,904 --> 00:29:10,906

Tesla felt that we were receivers, that all impulses came from the outside and that we worked on these impulses.

208

00:29:11,907 --> 00:29:19,909

So he doesn't believe that they come from dreams or inner visions. He really felt that we were in a sense self-propelled robots.

209

00:29:20,910 --> 00:29:30,913

It appears that Tesla got more information than anyone rightfully should have been able to get for his time in history where he was and when he was.

210

00:29:32,913 --> 00:29:45,918

It could be the result of outside influence from the Akashic field steering us along a path to make sure that we have reached a certain level of technological sophistication within a certain prescribed time window.

211

00:29:50,919 --> 00:30:00,922

Could the nature of genius lie in the ability of visionaries to tap into an otherworldly realm of knowledge?

212

00:30:02,923 --> 00:30:17,928

If the information contained within this field was uploaded by extraterrestrials as ancient astronaut theorists propose, does this suggest that humans are on a predetermined path?

213

00:30:19,929 --> 00:30:23,930

And if so, what are we being guided to do?

214

00:30:32,933 --> 00:30:34,933

Sophia Bulgaria

215

00:30:36,934 --> 00:30:48,938

After her death in 1996, the home of the 20th century prophet Baba Vanga is turned into a museum so that followers can continue to pay their respects.

216

00:30:50,939 --> 00:31:05,943

Among the hundreds of thousands of future readings given by the blind prophet during her lifetime, many relate to events concerning the whole of the human race, events, centuries, and even millennia into the future.

217

00:31:06,944 --> 00:31:12,946

If we look at Baba Vanga's prophecies, they're a lot like contemporary science fiction.

218

00:31:13,946 --> 00:31:27,950

In her accounts, Baba Vanga claimed the world will undergo many changes. It will rise and it will fall. The balance will be established when extraterrestrials start to communicate with humans.

219

00:31:27,950 --> 00:31:40,955

She said, you don't see it now, but there is a huge movement of crafts in the sky. Usually there are three of them flying. They tell me, be prepared for a big event, but they don't tell me what it is.

220

00:31:42,955 --> 00:31:52,958

Baba Vanga is unique in being very much a prophet that looks at the future of man in space, humanity in space, and extraterrestrial contact.

221

00:31:53,959 --> 00:31:57,960

Which she assures us will happen in the next 200 years.

222

00:32:00,961 --> 00:32:12,965

By 2130, Baba Vanga prophesied that human colonies deep under the ocean would be created with the assistance of extraterrestrial beings who would lend us a tremendous hand in developing this new civilization.

223

00:32:13,965 --> 00:32:25,969

By 2183, humans would already have a colony on Mars. The human colony would revolt, ultimately leading to a nuclear confrontation.

224

00:32:26,969 --> 00:32:39,974

By 2221, humanity in search of alien life would come into contact with knowledge of something absolutely horrific. But she does not tell us what this means.

225

00:32:43,975 --> 00:32:52,978

Are we headed toward the future that Baba Vanga somehow tapped into? A future that is written within the Akashic record?

226

00:32:56,979 --> 00:33:10,984

March 2017. The U.S. Congress passes the NASA Authorization Act and issues a mandate for the organization to get humans to Mars by 2033.

227

00:33:11,984 --> 00:33:19,986

Officials at the space agency immediately respond with a detailed plan outlining their strategy to accomplish this goal.

228

00:33:21,987 --> 00:33:33,991

Along with NASA mission plans, the European Space Agency, China, United Arab Emirates, and India are all slated to send orbiters to the planet in the next few years.

229

00:33:34,991 --> 00:33:47,995

And private ventures, including Mars 1, SpaceX, and even Boeing, have all set their sights on successfully colonizing the red planet within the next decade.

230

00:33:49,996 --> 00:33:56,998

At present, there's a race among several nations and private companies to get to Mars and to colonize Mars.

231

00:33:56,998 --> 00:34:04,001

So what's going on here? One of humanity's great visionaries, Elon Musk, sees real problems ahead for humanity.

232

00:34:05,001 --> 00:34:11,003

In his view, our colonization of Mars is an effort to save or back up humanity.

233

00:34:14,004 --> 00:34:26,008

It's a compelling possibility that in fact there is some greater organized effort being made to steer human knowledge towards a desired outcome.

234

00:34:27,008 --> 00:34:39,012

Our brain could act as a tuning fork or antenna for the Akashic record itself, which may have very

explicit directions, leading us down a certain path.

235

00:34:41,012 --> 00:34:49,015

We're going to Mars. We're going to be a space-faring nation and civilization going to other planets.

236

00:34:50,015 --> 00:34:59,018

And like the phenomenon of spontaneous invention, we have people all over the world suddenly pushing us to go to Mars.

237

00:35:01,019 --> 00:35:08,021

Is it possible that this information is actually being sent to humans in order to move us forward?

238

00:35:09,021 --> 00:35:21,025

Ancient astronaut theorists suggest that if mankind fulfills its mission to colonize Mars, we may be repeating the past.

239

00:35:24,026 --> 00:35:32,029

According to scientific evidence proposed by Dr. John Brandenburg in an article for the Journal of Cosmology in 2014,

240

00:35:33,029 --> 00:35:40,031

Bombavanga's prediction for a nuclear event on Mars may have happened once before.

241

00:35:42,032 --> 00:35:53,036

There appears to have been a devastating nuclear attack on Mars. Two massive nuclear weapons detonated over the surface of Mars apparently dropped from space.

242

00:35:54,036 --> 00:36:03,039

I originally proposed as an explanation that this was a natural nuclear reactor that had gone unstable.

243

00:36:04,039 --> 00:36:12,042

However, as I talked to more scientists, they said the xenon spectrum is wrong. That is weapon signature.

244

00:36:13,042 --> 00:36:17,043

There's no natural phenomenon that can account for this nuclear data.

245

00:36:18,044 --> 00:36:26,046

Evidence has shown us that there's possibility that Mars did in fact suffer a nuclear war deep deep in ancient history.

246

00:36:27,047 --> 00:36:36,049

This would suggest that human events are repeated and that throughout time we go back and retrace our steps.

247

00:36:38,050 --> 00:36:46,053

It could be that the past, present and future has already happened and if that's the case, you're really looking at a system that repeats itself over and over and over again.

248

00:36:47,053 --> 00:36:53,055

And that could be looked at as a script. It could be looked at as a computer code.

249

00:36:54,055 --> 00:37:01,057

Then it would make sense that we are in some way being directed by that information. It is guiding our behavior.

250

00:37:03,058 --> 00:37:11,061

These prophecies may be actually something where people were tapping into a future that already existed in some other sense.

251

00:37:11,061 --> 00:37:22,064

And it appears to be something that is part of a greater cosmic script that we're all following that does have an extraterrestrial influence in making sure that we stay on the script.

252

00:37:27,066 --> 00:37:36,069

Is it possible that the Akashic record contains a script like a cosmic computer code that humans are being programmed to follow?

253

00:37:37,069 --> 00:37:49,073

Perhaps the answer can be found by examining evidence discovered by theoretical physicists that there is programming language embedded in the very fabric of the universe.

254

00:37:56,075 --> 00:37:59,076

College Park, Maryland, 2008.

255

00:38:00,076 --> 00:38:15,081

Renowned physicist and University of Maryland professor, S. James Gates Jr., co-authors a report announcing that he found specific computer code in the equations defining the fabric of the universe.

256

00:38:17,082 --> 00:38:25,084

He theorizes that since these error correcting codes are indistinguishable from those that drive search engines on our computers,

257

00:38:26,085 --> 00:38:30,086

it suggests that the cosmos is digital in nature.

258

00:38:33,087 --> 00:38:46,091

Professor Gates finding computer code in his string theories, it literally shook me because what he's saying is that there is code,

259

00:38:47,092 --> 00:38:54,094

and not only code but code that we use for our computers in the fabric of reality.

260

00:38:55,094 --> 00:39:03,097

So the implication is that our reality is digital, that every experience you've ever had is based on code.

261

00:39:05,097 --> 00:39:15,101

They have found computer algorithms in the existence of the universe, a code of one and zeros, which would imply that the idea of an information field

262

00:39:15,101 --> 00:39:22,103

or the cloud is not a new idea and it's happened before.

263

00:39:23,103 --> 00:39:30,105

Now what the forces are behind the Akashic record? Your guess is as good as mine.

264

00:39:34,107 --> 00:39:43,110

If computer code is embedded within the very fabric of the universe, might it have been put there by an ancient extraterrestrial race?

265

00:39:45,110 --> 00:39:49,111

Or possibly even an earlier race of humans?

266

00:39:51,112 --> 00:39:57,114

And has mankind established a new Akashic record with the creation of the cloud?

267

00:39:58,114 --> 00:40:09,118

But if so, are we merely following a pre-programmed cosmic script embedded within an invisible realm that exists all around us?

268

00:40:10,118 --> 00:40:14,120

Do we have free will or are we totally determined?

269

00:40:15,120 --> 00:40:21,122

The answer is if you're not aware of the choices you're making, you're a biological robot,

270

00:40:22,122 --> 00:40:31,125

but if you become conscious of the nature of the universe, then you can start to have some degree of freedom.

271

00:40:32,125 --> 00:40:44,129

And as we reclaim the Akashic records and even go beyond it, this could be the key that opens the door that will enable us to enter into a new level of existence or a new reality.

272

00:40:46,130 --> 00:40:56,133

We are evolving to a stage where we're unlocking secrets and codes and patterns that have always been there.

273

00:40:57,133 --> 00:41:11,138

It's mind-blowing that it's also conscious-altering. What it does is it starts to drive humanity towards discovering what we really are, who we really are, what's our purpose here as a species.

274

00:41:15,139 --> 00:41:23,142

Is there really a cosmic repository of all knowledge contained within the universe, past, present and future?

275

00:41:24,142 --> 00:41:33,145

And if so, does the recent invention of what is commonly known as the cloud help pave the way to a future of limitless possibilities?

276

00:41:35,146 --> 00:41:46,149

Perhaps when we finally tap into the Akashic record, we will find out that humanity has been following a program that has been in place for millions of years,

277

00:41:46,149 --> 00:41:53,151

a program that will ultimately lead us to our final destiny on Other Worlds.
