

1

00:00:00,305 --> 00:00:07,306

This design has been taken from a text that's at least 1,800 years old.

2

00:00:07,306 --> 00:00:13,307

Our vehicle was showing positive lift like an aircraft would.

3

00:00:13,307 --> 00:00:18,308

So the information contained in the ancient texts is indeed accurate.

4

00:00:18,308 --> 00:00:25,309

Now this is a vast medical text and it's considered the foundation of traditional Indian medicine.

5

00:00:25,309 --> 00:00:28,309

Oh so this is the basis for Ayurvedic medicine.

6

00:00:28,309 --> 00:00:34,310

Yes, this book was written more than 100 years before Hippocrates, the father of modern medicine.

7

00:00:34,310 --> 00:00:43,312

Incredible. There is information about science, technology and medicine preserved in ancient India.

8

00:00:43,312 --> 00:00:46,312

Where did the ancestors receive this information?

9

00:00:46,312 --> 00:00:49,312

Aliens. People from other planets.

10

00:00:58,314 --> 00:01:18,317

Music

11

00:01:19,317 --> 00:01:21,317

India.

12

00:01:21,317 --> 00:01:24,318

Home to over 1.3 billion people.

13

00:01:24,318 --> 00:01:28,318

It is the second most populous nation in the world.

14

00:01:28,318 --> 00:01:33,319

Although it is home to some of mankind's oldest civilizations,

15

00:01:33,319 --> 00:01:39,320

India has in recent years also undergone rapid modernization.

16

00:01:39,320 --> 00:01:48,321

The city of Bangalore for example is the headquarters of literally thousands of information technology companies

17

00:01:48,321 --> 00:01:52,322

and has been ranked as one of the most high tech cities in the world.

18

00:01:53,322 --> 00:02:00,323

But these advancements also coexist with the country's ancient origins.

19

00:02:00,323 --> 00:02:07,324

Roughly 80% of the Indian population practices Hinduism.

20

00:02:07,324 --> 00:02:12,325

And for the Hindu faithful, their gods are not mythological creatures,

21

00:02:12,325 --> 00:02:18,326

but are real flesh and blood beings that have at times been present here on earth.

22

00:02:19,326 --> 00:02:25,327

For the Indian people, the basis of their religion is essential to the fabric of their lives.

23

00:02:27,327 --> 00:02:33,328

Many of the faithful to this day see these accounts not as fanciful, but as history.

24

00:02:33,328 --> 00:02:39,329

They take it literally that the gods walked among human beings and conveyed knowledge.

25

00:02:39,329 --> 00:02:46,330

In the Hindu tradition, these ancient gods are not considered just symbolic or mythical beings.

26

00:02:46,330 --> 00:02:53,331

They are considered as flesh and blood beings that came down from the sky and existed in real life.

27

00:02:55,332 --> 00:03:01,333

The foundation of Hinduism is carefully preserved in India's most ancient texts.

28

00:03:01,333 --> 00:03:08,334

And according to their traditions, these texts are accounts given directly by the gods themselves

29

00:03:08,334 --> 00:03:11,334

and only transcribed by humans.

30

00:03:12,334 --> 00:03:21,336

This collection includes the Vedas or Hindu scriptures, as well as other manuscripts written in the early Sanskrit language.

31

00:03:21,336 --> 00:03:30,337

Vedic scholars suggest knowledge pertaining to architecture, science, technology, weaponry and medicine

32

00:03:30,337 --> 00:03:34,338

are preserved in meticulous detail in these works.

33

00:03:34,338 --> 00:03:39,338

The origins of the Vedic text goes back to cosmic time.

34

00:03:39,338 --> 00:03:43,339

They have been around for thousands of thousands of years.

35

00:03:43,339 --> 00:03:49,340

It is believed that the knowledge came directly from gods.

36

00:03:49,340 --> 00:03:52,340

We are seeing a handbook of the gods.

37

00:03:52,340 --> 00:03:59,341

We are looking at an endowment from some superior intelligence that appears to have been given to us as a very practical guide

38

00:03:59,341 --> 00:04:03,342

in ways that benefit humankind all across the board.

39

00:04:04,342 --> 00:04:11,343

But if the ancient texts of India are truly attributable to extraterrestrial gods,

40

00:04:11,343 --> 00:04:15,344

just what information do they contain?

41

00:04:20,345 --> 00:04:25,345

Sirpur, India, the Sarang Tila temple.

42

00:04:25,345 --> 00:04:30,346

This structure, which dates back to the 7th century AD,

43

00:04:30,346 --> 00:04:38,347

was recently unearthed after being buried by a powerful earthquake that occurred in the 11th century.

44

00:04:38,347 --> 00:04:46,349

Although the rest of the area was completely leveled, the structure itself remained largely intact.

45

00:04:46,349 --> 00:04:51,349

Archaeologists suggest that this is due to the advanced construction techniques

46

00:04:51,349 --> 00:04:58,350

known as Ayurvedic, or Vedic architecture, utilized by its builders.

47

00:04:59,351 --> 00:05:03,351

The principles they used are derived from the ancient science of design

48

00:05:03,351 --> 00:05:08,352

that can be traced back to the ancient Indian texts.

49

00:05:08,352 --> 00:05:15,353

In March 2017, researcher and ancient astronaut theorist, Jorjio Sukhlos,

50

00:05:15,353 --> 00:05:22,354

traveled to India to meet with archaeologist Dr. Arun Sharma, who headed the dig.

51

00:05:22,354 --> 00:05:24,354

This is beautiful.

52

00:05:24,354 --> 00:05:26,355

These are the steps.

53

00:05:26,355 --> 00:05:29,355

The steps are not straight.

54

00:05:29,355 --> 00:05:33,356

On the two corners, they have uplifted, got uplifted.

55

00:05:33,356 --> 00:05:39,357

This is the effect of the earthquake that happened here in the 11th century AD.

56

00:05:39,357 --> 00:05:43,357

But the rest of the township was totally destroyed.

57

00:05:43,357 --> 00:05:48,358

Really? Now is this considered Ayurvedic architecture right here?

58

00:05:48,358 --> 00:05:50,358

Yes, Vedic architecture.

59

00:05:50,358 --> 00:05:55,359

The temple is built of heavy stones and joined by Ayurvedic paste.

60

00:05:55,359 --> 00:06:01,360

It is so strong that even after 1600 years, it is not dead.

61

00:06:01,360 --> 00:06:03,360

That's amazing.

62

00:06:03,360 --> 00:06:07,361

Now I will show you the original mortar places.

63

00:06:07,361 --> 00:06:09,361

Okay.

64

00:06:09,361 --> 00:06:14,362

Although much of the site has been renovated using modern concrete,

65

00:06:14,362 --> 00:06:19,363

blocks held together by the Ayurvedic paste can still be found.

66

00:06:19,363 --> 00:06:24,364

Here you see between the two stones, there is no gap.

67

00:06:24,364 --> 00:06:26,364

So here Ayurvedic paste was applied.

68

00:06:26,364 --> 00:06:29,364

It seems to be almost like some type of glue.

69

00:06:29,364 --> 00:06:31,365

Yes, it is a glue.

70

00:06:31,365 --> 00:06:33,365

They have not moved from their place.

71

00:06:33,365 --> 00:06:36,365

It is such a form of joining.

72

00:06:36,365 --> 00:06:42,366

If you want to make it live long, you follow the ancient pattern, not the cement.

73

00:06:42,366 --> 00:06:45,367

Cement has got the life of 70 years.

74

00:06:45,367 --> 00:06:52,368

The glue-like substance is said to form a bond that is at least 20 times stronger than concrete.

75

00:06:52,368 --> 00:06:56,368

But modern builders have been unwilling to entertain the notion

76

00:06:56,368 --> 00:07:02,369

that such an ancient concoction could be superior to today's building materials.

77

00:07:02,369 --> 00:07:04,370

Wow, look at this.

78

00:07:04,370 --> 00:07:05,370

Beautiful.

79

00:07:05,370 --> 00:07:12,371

The detailed instructions for making this paste can be found in an ancient Indian text known as the Maya Matam,

80

00:07:12,371 --> 00:07:16,372

a manuscript dedicated to construction techniques.

81

00:07:16,372 --> 00:07:24,373

The information contained within the document is understood to have been passed down to humans from Maya Suram,

82

00:07:24,373 --> 00:07:31,374

the ancient king of the demigods who was said to oversee various construction projects on Earth,

83

00:07:31,374 --> 00:07:34,374

including cities in the sky.

84

00:07:34,374 --> 00:07:39,375

Now we are in front of one sanctum centurum.

85

00:07:39,375 --> 00:07:44,376

And just at the entry point, here is the slit.

86

00:07:44,376 --> 00:07:49,377

Curiously, there is a more astounding earthquake-proof feature at the site,

87

00:07:49,377 --> 00:07:55,377

which indicates that advanced knowledge was used in its construction.

88

00:07:55,377 --> 00:08:02,379

Located at key points within the Surang Tilak Temple are several 80-foot-long shafts

89

00:08:02,379 --> 00:08:08,379

designed to form air pockets that can dissipate the impact of seismic events.

90

00:08:09,380 --> 00:08:13,380

The book in which all this is described, I will show you.

91

00:08:13,380 --> 00:08:14,380

Just please.

92

00:08:14,380 --> 00:08:16,381

This is the book.

93

00:08:16,381 --> 00:08:17,381

All right.

94

00:08:17,381 --> 00:08:18,381

It is in two volumes.

95

00:08:18,381 --> 00:08:19,381

Wow.

96

00:08:19,381 --> 00:08:20,381

Two volumes. Every detail is given.

97

00:08:20,381 --> 00:08:23,382

Oh, wow, this is big. It's a huge book.

98

00:08:23,382 --> 00:08:28,383

And this text has been around for 4,500 years.

99

00:08:28,383 --> 00:08:30,383

Which travelled from mouth to mouth.

100

00:08:30,383 --> 00:08:33,383

When the writing started, then it was written down.

101

00:08:33,383 --> 00:08:37,384

In your opinion, where did this knowledge come from?

102

00:08:37,384 --> 00:08:44,385

Those who are more advanced in other planets used to visit the Earth.

103

00:08:44,385 --> 00:08:49,386

And I think they must have given some knowledge to the local people.

104

00:08:49,386 --> 00:08:54,386

And you think that this knowledge originated from the stars?

105

00:08:54,386 --> 00:08:58,387

I think there was a part played by these aliens.

106

00:08:58,387 --> 00:09:00,387

It's amazing.

107

00:09:00,387 --> 00:09:06,388

According to the Hindu faithful, the construction techniques used at the Surang Tilak Temple

108

00:09:06,388 --> 00:09:12,389

are just one example of advanced technology detailed in the ancient Sanskrit texts.

109

00:09:12,389 --> 00:09:19,390

Other works are said to contain information far beyond the scope of early man.

110

00:09:19,390 --> 00:09:29,392

Perhaps even providing concrete proof of extraterrestrial activity on Earth.

111

00:09:29,392 --> 00:09:36,393

The Indus Valley, Northwest India and Pakistan, June 2011.

112

00:09:36,393 --> 00:09:45,394

Paleontologists discovered a 4,300-year-old skull featuring multiple drilled holes in it.

113

00:09:45,394 --> 00:09:51,395

Remarkably, they conclude these are signs that brain surgery was performed.

114

00:09:51,395 --> 00:10:00,397

And it even appears that the operation was successful, as the wound showed signs of advanced healing.

115

00:10:00,397 --> 00:10:08,398

In ancient India, they performed incredible kinds of medicine and surgical procedures on people.

116

00:10:08,398 --> 00:10:11,398

Things like operating on the skull.

117

00:10:11,398 --> 00:10:18,399

What's fascinating about this is, is this kind of advanced medical knowledge goes way back.

118

00:10:18,399 --> 00:10:24,400

And they were able to use those techniques to heal people.

119

00:10:24,400 --> 00:10:32,401

Vedic scholars suggest that not only were the ancient Hindus able to perform brain surgery,

120

00:10:32,401 --> 00:10:36,402

but other advanced procedures as well.

121

00:10:36,402 --> 00:10:43,403

And much of this medical knowledge was sent to record in a Sanskrit text dating back to 800 BC,

122

00:10:43,403 --> 00:10:48,404

known as the Sushruta Samhita.

123

00:10:48,404 --> 00:10:55,405

In 2017, at a local library in Mahabalipuram, India,

124

00:10:55,405 --> 00:11:03,406

George Yosuklos meets with fellow ancient astronaut theorist Praveen Mohan to take a closer look at the text.

125

00:11:03,406 --> 00:11:12,408

Now this is a vast medical text that contains information about more than 11,000 illnesses.

126

00:11:13,408 --> 00:11:24,409

It talks about 700 medicinal plants, 64 preparations from mineral resources, 57 preparations from animal resources,

127

00:11:24,409 --> 00:11:29,410

and is considered the foundation of Ayurveda, the traditional Indian medicine.

128

00:11:29,410 --> 00:11:32,411

Oh, so this is the basis for Ayurvedic medicine, right here?

129

00:11:32,411 --> 00:11:38,412

Yes. I was able to find a passage. I thought you might find it interesting.

130

00:11:38,412 --> 00:11:45,413

Right here, as you can see, it says that surgical operations are of eight types.

131

00:11:45,413 --> 00:11:58,415

They are incising, excising, scraping, puncturing, probing, extracting, secreting fluids, and even suturing.

132

00:11:58,415 --> 00:12:02,415

So imagine we had suturing 2,600 years ago.

133

00:12:02,415 --> 00:12:09,416

And this book was written more than 100 years before Hippocrates, the father of modern medicine.

134

00:12:09,416 --> 00:12:15,417

That is amazing. And how was this information obtained? Like, what's the story behind this?

135

00:12:15,417 --> 00:12:23,418

Well, the title Sushruta Samhita means that the author Sushruta is not really the author.

136

00:12:23,418 --> 00:12:31,420

He did not write this book. He got this information from a character called Danvantri,

137

00:12:31,420 --> 00:12:34,420

who was an otherworldly being.

138

00:12:34,420 --> 00:12:42,421

Danvantri is believed to be the physician to the gods and the father of Ayurvedic medicine.

139

00:12:42,421 --> 00:12:48,422

Danvantri itself has a divine origin associated with the turning of the Milky Ocean.

140

00:12:48,422 --> 00:12:54,423

The turning of the milk of sea refers to perhaps the Milky Way.

141

00:12:54,423 --> 00:13:04,425

Danvantri came out of that, and then he was the god of medicine, and he then gave this knowledge of medicine to human beings.

142

00:13:04,425 --> 00:13:15,426

Danvantri was said to have originated from the Milky Way, and so all of a sudden you have a connection with this deity arriving from the Milky Way.

143

00:13:15,426 --> 00:13:22,427

What more do you want the knowledge contained in this document known as the Sushruta Samhita?

144

00:13:22,427 --> 00:13:28,428

Was brought here by an extraterrestrial visitor?

145

00:13:28,428 --> 00:13:35,429

Ayurvedic medicine is considered one of the world's oldest and most detailed healing sciences.

146

00:13:35,429 --> 00:13:41,430

Is it possible that it was really handed down to mankind by alien sources?

147

00:13:42,430 --> 00:13:51,432

Ancient astronaut theorists say yes, and suggest that other texts clearly reveal this extraterrestrial connection.

148

00:13:56,433 --> 00:14:03,434

Mumbai University, Kalina, India, January 2015.

149

00:14:04,434 --> 00:14:15,435

The Indian Science Congress presents talks on various technical disciplines to an audience of some of India's top engineers.

150

00:14:15,435 --> 00:14:29,438

Included in the list of presentations is a lecture on ancient Indian aviation technology given by retired pilot and flight instructor Captain Anand J. Bodhas.

151

00:14:29,438 --> 00:14:39,439

In his lecture, Captain Anand Bodhas told young engineers that they should recreate what is given in ancient Vedic texts,

152

00:14:39,439 --> 00:14:48,440

because in the field of aviation there are much more advanced devices mentioned than what we have today.

153

00:14:48,440 --> 00:14:58,442

This was a very controversial talk because you had one camp that thought that the ancient civilizations of India possessed incredible flying technology.

154

00:14:58,442 --> 00:15:04,443

Yet you then had that other camp that said this is crazy, it's nonsense.

155

00:15:04,443 --> 00:15:18,445

But something was going on many, many, many, many thousands of years ago, and they presented evidence and documented facts that they had flying machines that were capable of doing incredible things.

156

00:15:18,445 --> 00:15:23,446

How did they know this?

157

00:15:24,446 --> 00:15:37,448

Captain Bodhas is just the latest in a long line of researchers to suggest that the ancient texts contained actual information about lost technology pertaining to aerial vehicles,

158

00:15:37,448 --> 00:15:41,449

often referred to in the texts as Vimanas.

159

00:15:42,449 --> 00:16:01,452

In 1895, a full eight years before the Wright brothers successfully launched their flying machine, Sanskrit scholar Shivkar Tampade tested an aircraft he fashioned based solely on information

gleaned from the ancient Indian writings.

160

00:16:02,452 --> 00:16:16,454

Tampade in India was a student of the Vedic scriptures and he decided to try and construct one of the Vimana flying craft that we're seeing in the Vedic scriptures.

161

00:16:17,454 --> 00:16:25,455

The first aircraft of Tampade was called Madhutstaka, which means friend of the wind.

162

00:16:25,455 --> 00:16:32,456

He was able to fly this aircraft in front of thousands of people in Mumbai Beach.

163

00:16:32,456 --> 00:16:41,458

The legend has it that he flew for like 30 seconds at 1500 feet. The Wright brothers only went 120 feet for 12 seconds.

164

00:16:41,458 --> 00:16:46,459

If this is true, that changes aviation history dramatically.

165

00:16:46,459 --> 00:16:57,460

But even more exciting is that he based his design on something written thousands of years before

mankind even though flying was possible.

166

00:16:58,460 --> 00:17:10,462

In 2017, Kavya Vadadi, an aircraft design engineer in Delhi, India, was able to recreate the Maruth Saka as a digital 3D model,

167

00:17:10,462 --> 00:17:16,463

utilizing the same information contained in the texts that Tampade studied.

168

00:17:16,463 --> 00:17:22,464

She shared her digital file with aerospace systems engineer Travis Taylor,

169

00:17:22,464 --> 00:17:28,465

so he could 3D print it in order to test its aerodynamic properties in a wind tunnel.

170

00:17:28,465 --> 00:17:34,466

But just how would this ancient design hold up when put to the test?

171

00:17:36,466 --> 00:17:42,467

University of California at Irvine, April 2017

172

00:17:43,467 --> 00:17:49,468

Aerospace engineer Travis Taylor has obtained a model of an aircraft

173

00:17:49,468 --> 00:17:55,469

whose design specifications are based solely on information gleaned from ancient Indian texts

174

00:17:55,469 --> 00:18:01,470

that are believed to have been formally set to writing in 500 BC.

175

00:18:01,470 --> 00:18:09,471

He is going to subject it to wind tunnel analysis to determine if it is a viable flying machine.

176

00:18:10,471 --> 00:18:15,472

So, explain to me what we've set up here with that wind tunnel.

177

00:18:15,472 --> 00:18:20,473

Okay, so this is our aerospace vehicle model. It's connected to this boom.

178

00:18:20,473 --> 00:18:26,474

The armature has a force gauge on it. We're going to have air flow go past it at about 50 miles per hour or so.

179

00:18:26,474 --> 00:18:32,475

And then we're going to measure forces against it to determine if it's going to fly or not.

180

00:18:32,475 --> 00:18:39,476

And so what are the signs that you're looking for in order to determine whether this is in fact aerodynamically sound?

181

00:18:39,476 --> 00:18:44,477

Right, so we're going to measure the normal force and the normal force is up or down.

182

00:18:44,477 --> 00:18:50,477

If it starts to move up, then that'll be exciting because it's actually going to be rising and that's how you get flight.

183

00:18:50,477 --> 00:18:54,478

You know, when an airplane turns up and starts to move, it's because it's getting lift.

184

00:18:54,478 --> 00:19:01,479

The other thing is I don't want to see it going real bad side to side or real bad chatter up and down because that would mean it's unstable.

185

00:19:01,479 --> 00:19:04,480

All right, well, let's do it. Let's fire her up and see what happens.

186

00:19:12,481 --> 00:19:15,481

The flow is coming up to speed.

187

00:19:15,481 --> 00:19:24,483

While being subjected to 50 mile an hour winds, the craft exhibits a slight lift upwards, yet remains relatively steady.

188

00:19:24,483 --> 00:19:27,483

No side to side wobble.

189

00:19:28,483 --> 00:19:38,485

Sensors record the measurements of various forces, as well as torque and pitch to determine just how aerodynamic the body is.

190

00:19:38,485 --> 00:19:41,485

It looks very stable.

191

00:19:47,486 --> 00:19:50,487

All right, so let's look at the results.

192

00:19:50,487 --> 00:20:00,488

So what happened during the test was the normal force, which is where we measure the lift, it was positive between .03 and .06 pounds of force.

193

00:20:00,488 --> 00:20:02,488

That means we were measuring lift.

194

00:20:02,488 --> 00:20:09,489

So our vehicle in the wind tunnel experiment was showing positive lift like an aircraft would.

195

00:20:09,489 --> 00:20:13,490

Did you expect these results from a shape that's like that?

196

00:20:13,490 --> 00:20:19,491

Well, the shape looks like a lifting body to me, but you never know until you actually do the experiment.

197

00:20:19,491 --> 00:20:24,492

And we have experimental results now that says it is. So that's the exciting part.

198

00:20:24,492 --> 00:20:34,493

And what do you say to anyone who questions the idea that this information has been taken from a text that's at least 1,800 years old?

199

00:20:34,493 --> 00:20:47,495

The only thing you can say is we performed a good scientific experiment, and the results were that the shape made from those texts is a viable aerodynamic structure.

200

00:20:50,496 --> 00:20:58,497

The aircraft model created using details garnered from the ancient Indian texts has proven to be flight worthy.

201

00:20:58,497 --> 00:21:10,499

Is it possible that by studying the ancient Indian texts, we may be able to recreate advanced technology that existed thousands of years ago in India?

202

00:21:11,499 --> 00:21:19,500

Ancient astronaut theorists suggest that the texts may also contain details for advanced spacecraft.

203

00:21:24,501 --> 00:21:32,502

Hindu scholars point out that stories of space travel can be found throughout the pages of the ancient Sanskrit texts.

204

00:21:32,502 --> 00:21:40,503

There are even detailed accounts of humans entering flying crafts and being transported to other solar systems.

205

00:21:42,504 --> 00:21:53,505

In the ancient text of Vishnupurana, Lord Vishnu decides to take Dhruva, a human being, through an interstellar journey.

206

00:21:53,505 --> 00:22:05,507

We know this because it is specifically stated that Dhruva would be taken beyond planets like Mercury, Venus, and even beyond some other stars.

207

00:22:05,507 --> 00:22:22,510

According to the text, he went past seven planetary systems in a physical craft, and eventually he reached the solar system and planet of Vishnu Loka, the planet that Vishnu is said to have come from.

208

00:22:22,510 --> 00:22:28,511

So here we have the story of extraterrestrials taking a human to another solar system.

209

00:22:31,511 --> 00:22:43,513

Although few details exist of the craft Dhruva was transported in, scholars have noted that highly specific descriptions of space vehicles can be found throughout the texts.

210

00:22:44,513 --> 00:23:08,517

In 2014, in an article in the Journal of Engineering and Innovative Technology titled, Vedic Ion Engine, a team of aerospace scientists post the theory that what is being described in a thousand-year-old text called the Samarangana Sutradara is a modern Ion Mercury Vortex engine used for space travel.

211

00:23:09,517 --> 00:23:24,519

In the Samaranga Sutradara text, there's a description of an engine that uses Mercury, and the Mercury swirls on a vortex and it uses the heat from perhaps solar power to create some type of flying capability.

212

00:23:24,519 --> 00:23:29,520

My thought on this is it sounds a lot like an Ion Engine.

213

00:23:30,520 --> 00:23:34,521

The concept for Ion Engines has actually been around for more than 100 years.

214

00:23:34,521 --> 00:23:44,522

Now the way it works is xenon gas, which is like helium or neon, but heavier, is introduced into a chamber here, and it's ionized, which means it's given an electric charge.

215

00:23:44,522 --> 00:23:53,524

And once it has an electric charge, a voltage applied between this grid and one just behind it causes the xenon to shoot out of the engine.

216

00:23:53,524 --> 00:24:04,525

Well, the action of the xenon going out this direction causes a reaction that pushes the spacecraft in the other direction, and that's how the ion thruster propels the spacecraft.

217

00:24:04,525 --> 00:24:10,526

You heat the ions up, and then you accelerate them at the back end of the spacecraft.

218

00:24:10,526 --> 00:24:20,528

It puts out a small amount of thrust before a very long time, and that's why ion engines are uniquely perfect for interspace travel.

219

00:24:24,528 --> 00:24:41,531

In 2007, NASA launched the Dawn spacecraft, which used a conventional multi-stage chemical rocket to blast off from Earth, but then switched to an Ion Engine for its journey through deep space.

220

00:24:41,531 --> 00:24:49,532

Crucial to that mission was an ion thruster, and it gets its energy from solar panels.

221

00:24:50,532 --> 00:25:01,534

So here you have this solar-powered ion thruster with this vortex in the middle of it going out to the asteroid belt, and it's described in Sanskrit texts.

222

00:25:05,535 --> 00:25:17,536

If information detailing previously lost technology was purposely left for humans to rediscover, are we now sufficiently advanced to successfully replicate it?

223

00:25:18,537 --> 00:25:26,538

And if so, are there any other developments beyond ancient space travel that scientists have been able to exploit?

224

00:25:35,539 --> 00:25:38,540

Mahabali Puram, India

225

00:25:39,540 --> 00:25:44,541

While at a local library with fellow ancient astronaut theorist Praveen Mohan,

226

00:25:44,541 --> 00:25:52,542

Georgiosukhlos gets a first-hand look at early copies of some of India's most important ancient texts.

227

00:25:52,542 --> 00:25:57,543

And now let me show you the other book. This is the Bhagavad Gita.

228

00:25:57,543 --> 00:26:08,544

Among the most influential is the Bhagavad Gita, part of the 13,000-page epic called the Mahabharata, which contains 19 individual books.

229

00:26:08,544 --> 00:26:16,545

Historians think this text was written around 500 B.C., so this book is 2,500 years old.

230

00:26:16,545 --> 00:26:23,547

But according to quote-unquote mythology, this was supposed to be written at least 10,000 years ago.

231

00:26:24,547 --> 00:26:37,549

It's a very popular book, and some people even say atomic science is hidden in this book. Not just regular people, but modern physicists.

232

00:26:37,549 --> 00:26:48,550

So the argument can be made that the knowledge of, for example, the atom is contained in a book that is at least 2,500 years old.

233

00:26:49,551 --> 00:26:54,551

And some stories say that it was given by an otherworldly being.

234

00:26:54,551 --> 00:26:55,551

Yes.

235

00:26:55,551 --> 00:26:56,552

Okay.

236

00:26:56,552 --> 00:27:02,552

Even Robert Oppenheimer, who's the father of atomic bomb, was fascinated by this book.

237

00:27:02,552 --> 00:27:04,553

Really? Wow.

238

00:27:04,553 --> 00:27:05,553

Yes.

239

00:27:05,553 --> 00:27:06,553

Okay, that's interesting.

240

00:27:06,553 --> 00:27:08,553

The Bhagavad Gita

241

00:27:14,554 --> 00:27:22,556

Hornada del Muerto Desert, New Mexico, July 16, 1945.

242

00:27:22,556 --> 00:27:27,556

In the middle of the barren Alamogordo bombing and gunnery range,

243

00:27:27,556 --> 00:27:31,557

scientists detonate the first man-made nuclear weapon.

244

00:27:36,558 --> 00:27:41,558

The destruction was comparable to no other weapon known to man.

245

00:27:43,559 --> 00:27:50,560

The father of the atomic bomb was J. Robert Oppenheimer, the leader of the Manhattan Project,

246

00:27:50,560 --> 00:27:55,561

a secret government program created to develop such a weapon.

247

00:27:55,561 --> 00:28:05,562

Oppenheimer, when he saw the successful nuclear test and realized what a terrible weapon he was unleashing,

248

00:28:05,562 --> 00:28:10,563

he quoted the Bhagavad Gita, and became death the destroyer of worlds.

249

00:28:16,564 --> 00:28:24,565

Oppenheimer's interest in ancient Sanskrit literature began while he was a professor at the University of California, Berkeley,

250

00:28:24,565 --> 00:28:30,566

and was introduced to the texts by renowned scholar, Arthur W. Reiner.

251

00:28:30,566 --> 00:28:38,567

Under Reiter's tutelage, Oppenheimer extensively studied the Vedic scriptures and became proficient in Sanskrit.

252

00:28:39,567 --> 00:28:46,568

According to his biographers, he kept a hard cover of the Bhagavad Gita on his bookshelf,

253

00:28:46,568 --> 00:28:50,569

and was known to give copies away to his friends as gifts.

254

00:28:50,569 --> 00:28:57,570

One of the ideas that's deep within the Vedic scriptures, the Bhagavad Gita, is the idea of duty.

255

00:28:58,570 --> 00:29:06,571

He felt it was his duty to do this, even though it would be a terrible thing, he realized, to develop this new nuclear weapon.

256

00:29:07,572 --> 00:29:13,572

So he believed he was part of a cosmic cycle, and we had to do this to advance.

257

00:29:15,573 --> 00:29:25,574

Perhaps he knew that by developing the atomic bomb, we were actually reconnecting with technologies that we had been exposed to many thousands of years before.

258

00:29:27,575 --> 00:29:35,576

One of the key ideas found within the Indian texts is the concept of the cyclical nature of existence,

259

00:29:35,576 --> 00:29:40,577

that once we complete a cosmic cycle, it just begins once more.

260

00:29:42,577 --> 00:29:49,578

Oppenheimer himself came to see that he was in a sense fulfilling some ancient destiny,

261

00:29:49,578 --> 00:29:54,579

and that this weapon could ultimately be used to stop a major war, which is exactly what happened.

262

00:29:54,579 --> 00:29:57,579

It totally broke the momentum of World War II.

263

00:29:57,579 --> 00:30:06,581

In that sense, he was seeing that he was in some way fulfilling a destiny that came to him from a seemingly supernatural source,

264

00:30:06,581 --> 00:30:10,581

i.e. extraterrestrial gods who influenced ancient India.

265

00:30:12,581 --> 00:30:17,582

If Oppenheimer's work on the atomic bomb was inspired by the ancient Indian texts,

266

00:30:18,582 --> 00:30:25,583

could this mean that similar weapons actually existed on Earth thousands of years ago?

267

00:30:32,585 --> 00:30:37,585

Tahr Desert, Rajasthan, India, 1992.

268

00:30:39,586 --> 00:30:44,586

Engineers conducting soil sampling at a site where a housing development was to be built

269

00:30:45,587 --> 00:30:49,587

discover a heavy layer of radioactive ash under the soil.

270

00:30:51,587 --> 00:30:58,589

Further examination reveals the contamination stretches across a three square mile area of the desert.

271

00:31:00,589 --> 00:31:09,590

After coordinating off the area, scientists unearthed a city with completely demolished buildings.

272

00:31:15,591 --> 00:31:22,592

Scientists have discovered a radioactive ash that they believe dates to 8,000 to 12,000 years ago

273

00:31:22,592 --> 00:31:26,593

that shows evidence of a nuclear blast in ancient times.

274

00:31:28,593 --> 00:31:36,594

This is very interesting because the Sanskrit texts describe exactly this type of occurrence in this area in ancient times.

275

00:31:37,594 --> 00:31:46,596

In the Ramayana, one of the major ancient Sanskrit epics, a mighty weapon of the god Brahma, called the Brahmastra,

276

00:31:46,596 --> 00:31:53,597

is described as a weapon of immense power intended to rain down destruction from above.

277

00:31:53,597 --> 00:32:05,599

Brahma provided this weapon to the hero Rama as a last resort after all conventional means of warfare failed in his battle against the demon king.

278

00:32:07,599 --> 00:32:12,600

The Brahmastra is the deadliest weapon there is in the history of humankind.

279

00:32:12,600 --> 00:32:20,601

It is like a nuclear device that can be detonated and then it will have a very devastating effect.

280

00:32:22,601 --> 00:32:27,602

Once it was fired, it would fall on a lot of animals and then they dropped dead.

281

00:32:27,602 --> 00:32:33,603

And also people started losing their nails, their hair and they could not breathe.

282

00:32:33,603 --> 00:32:39,604

Brahma fires the Brahmastra weapon upon the Drumatulia.

283

00:32:39,604 --> 00:32:45,605

It is commonly accepted that this is in Rajasthan in Pakistan.

284

00:32:45,605 --> 00:32:51,606

It's the 19th largest desert in the world.

285

00:32:51,606 --> 00:32:57,607

Does the layer of radioactive ash recently discovered in the Tard Desert of Rajasthan?

286

00:32:58,607 --> 00:33:03,608

Provide proof that the stories recorded in the ancient scriptures have merit.

287

00:33:07,608 --> 00:33:13,609

Nuclear warfare, space travel, flying craft.

288

00:33:13,609 --> 00:33:21,610

Might there be greater truth about our technological past revealed in the ancient Indian texts?

289

00:33:22,610 --> 00:33:26,611

And if so, are they simply a guide to move us forward?

290

00:33:26,611 --> 00:33:32,612

Or might they serve as a warning for mankind's impending fate?

291

00:33:33,612 --> 00:33:38,613

Rudnakpur, India, the Chamukha Jain Temple.

292

00:33:39,613 --> 00:33:48,614

Built in the 15th century AD, this place of worship is dedicated to the Jains' first teacher god, Rishabhanata,

293

00:33:48,614 --> 00:33:58,616

who is credited with the task of civilizing human beings and teaching them writing, mathematics, science and agriculture.

294

00:33:59,616 --> 00:34:05,617

Jainism is an ancient Indian religion that predates Hinduism.

295

00:34:05,617 --> 00:34:14,618

Jains and Hindus hold a similar belief system relating to the cyclical nature of the universe, karma and reincarnation.

296

00:34:14,618 --> 00:34:18,619

Yet worship different gods.

297

00:34:19,619 --> 00:34:25,620

For Jains, the quest for knowledge is essential for their spiritual liberation.

298

00:34:25,620 --> 00:34:33,621

And the iconography of the temple is meant to symbolize Rishabhanata's attainment of cosmic enlightenment.

299

00:34:33,621 --> 00:34:43,623

The most uncanny feature in the temple of Rannakpur is not on the ground, it's not on the walls, but it is on the ceiling.

300

00:34:45,623 --> 00:35:00,625

The ceiling is almost identical to images of the Large Hadron Collider, a particle accelerator in Switzerland.

301

00:35:02,626 --> 00:35:09,627

If you look at the carving on the ceiling, you're seeing something that has a curious radial structure.

302

00:35:09,627 --> 00:35:15,628

It's circular, there's bands within bands, and then you have all of these lines that go towards the center.

303

00:35:15,628 --> 00:35:24,629

Now there is a more than passing similarity between the carving and what we're actually seeing in the Large Hadron Collider.

304

00:35:26,629 --> 00:35:36,631

The 17-mile long Large Hadron Collider, or LHC, is the world's largest and most powerful particle accelerator.

305

00:35:37,631 --> 00:35:48,633

It was created to smash tiny protons together at speeds of nearly 670 million miles per hour, roughly the speed of light.

306

00:35:50,633 --> 00:35:59,634

The total energy produced by the collisions is believed to reproduce similar states to those that existed moments after the Big Bang.

307

00:36:00,635 --> 00:36:06,636

The event which many scientists believe was responsible for the creation of the cosmos.

308

00:36:08,636 --> 00:36:16,637

By examining these collisions, scientists can attempt to answer the question of just how the universe began.

309

00:36:18,637 --> 00:36:26,639

The Hadron Super Collider, its purpose is to duplicate basically the condition of the Big Bang when the universe was first created.

310

00:36:27,639 --> 00:36:36,640

But one of the concerns is that since we're recreating conditions like the Big Bang at the beginning of the universe,

311

00:36:36,640 --> 00:36:42,641

some of the things running around at the beginning of the universe we don't want to encounter.

312

00:36:42,641 --> 00:36:47,642

And this is a very difficult thing to face so many unknowns.

313

00:36:48,642 --> 00:36:56,643

Work on this subatomic realm, or quantum mechanics, can be traced to two scientific pioneers.

314

00:36:56,643 --> 00:37:02,644

Austrian physicist Erwin Schrödinger and German physicist Werner Heisenberg.

315

00:37:02,644 --> 00:37:10,645

According to biographers, both Schrödinger and Heisenberg were highly influenced by the ancient Indian texts.

316

00:37:11,645 --> 00:37:20,647

Heisenberg is on record saying quantum theory will not look so unusual to anyone who is a student of the Vedanta, the Hindu sacred scriptures.

317

00:37:20,647 --> 00:37:23,647

But why would he say something like that?

318

00:37:23,647 --> 00:37:32,649

The Hindus had a very interesting way of looking at the world including this concept of a quantum reality through what they called truities,

319

00:37:32,649 --> 00:37:39,650

which appear to be magnificently tiny particles that ultimately make up all of physical reality as we know it.

320

00:37:39,650 --> 00:37:50,651

It is fascinating how these very old texts are still relevant today and in fact may be largely responsible for the progress in quantum mechanics in the early 20th century.

321

00:37:50,651 --> 00:37:57,652

This suggests that the culture that wrote those texts has a very different meaning than the actual reality.

322

00:37:58,653 --> 00:38:04,654

This suggests that the culture that wrote those texts had knowledge of quantum mechanics.

323

00:38:04,654 --> 00:38:12,655

The Hindu texts in some ways mirrors or shadows things that will come later.

324

00:38:12,655 --> 00:38:22,656

Perhaps these people were being guided by extraterrestrials to protect that knowledge so that in our time we would look back at that and notice the similarity.

325

00:38:23,656 --> 00:38:32,658

And we have to look at the possibility that this is an endowment that has been given to us by these extraterrestrials for a greater divine purpose.

326

00:38:34,658 --> 00:38:39,659

The texts could serve as a window into our future and a warning.

327

00:38:39,659 --> 00:38:44,660

If we don't alter the course that we're on, it could be catastrophic.

328

00:38:45,660 --> 00:38:54,661

If extraterrestrials instructed our ancestors to record lost advanced technological knowledge and principles,

329

00:38:54,661 --> 00:39:01,662

was it meant to serve as a guidebook to our scientifically enlightened age?

330

00:39:01,662 --> 00:39:08,663

Or might it instead be a warning to prevent us from repeating the mistakes of the past?

331

00:39:08,663 --> 00:39:14,664

If so, what do the texts say about where mankind is headed next?

332

00:39:20,665 --> 00:39:22,665

New Delhi, India

333

00:39:24,666 --> 00:39:36,668

Scholars at the National Mission of Manuscripts set out to translate and preserve what they estimate to be over 4 million rare ancient texts related to various disciplines,

334

00:39:36,668 --> 00:39:39,668

including ancient science.

335

00:39:39,668 --> 00:39:48,669

Many of these texts have been preserved on palm leaves and are believed to be scattered in obscure locations throughout the subcontinent.

336

00:39:48,669 --> 00:39:54,670

Currently, less than 10% of the ancient writings of India have been published,

337

00:39:54,670 --> 00:40:00,671

and no one is certain what secrets lie hidden in these remaining undeciphered manuscripts.

338

00:40:01,671 --> 00:40:10,673

Is it possible that the roadmap for our future is yet to be revealed by studying these ancient Indian texts?

339

00:40:10,673 --> 00:40:13,673

These texts should be consulted.

340

00:40:13,673 --> 00:40:23,675

As we evolve into a world that is full of so many unknowns and the Vedic scriptures are a vast storehouse of knowledge,

341

00:40:23,675 --> 00:40:29,676

and by not consulting them, who knows, we may be missing something vital.

342

00:40:31,676 --> 00:40:36,677

We would be well served to go back to the Hindu texts.

343

00:40:36,677 --> 00:40:40,677

To recognize that perhaps we've been here before.

344

00:40:40,677 --> 00:40:44,678

The Vedic texts offers the key to us to move forward.

345

00:40:44,678 --> 00:40:52,679

Conversely, it could well be that ignoring it will be at our own peril, and that we could in fact face our end.

346

00:40:52,679 --> 00:40:59,680

What I really think is important here is that we pay more attention to these ancient texts.

347

00:41:00,680 --> 00:41:07,681

And try to learn what we can from them because this is the gods, the extraterrestrials giving us this information.

348

00:41:10,682 --> 00:41:20,683

Do the voices of the gods, as written in the pages of India's ancient texts, really contain information left for us to discover?

349

00:41:20,683 --> 00:41:25,684

Or do they convey knowledge that we were meant to avoid?

350

00:41:25,684 --> 00:41:29,685

For ancient astronaut theorists, one fact is certain.

351

00:41:29,685 --> 00:41:36,686

That mankind's extraterrestrial past provides the key to its future.

352

00:41:36,686 --> 00:41:43,687

A future that will either see us successfully avoid the mistakes of our ancestors,

353

00:41:43,687 --> 00:41:50,688

or warn us of the deadly mistakes we are destined to repeat.

354

00:41:55,689 --> 00:41:58,689

The Vedic texts offer the key to our future.
