

1

00:00:00,000 --> 00:00:03,000

Strange unnatural forces.

2

00:00:03,000 --> 00:00:06,000

This is when you experience time vortex.

3

00:00:06,000 --> 00:00:07,000

That's when it started.

4

00:00:10,000 --> 00:00:12,000

Mysterious disappearances.

5

00:00:12,000 --> 00:00:14,000

They find tracks in the snow.

6

00:00:14,000 --> 00:00:16,000

The tracks stop in the middle of the lake.

7

00:00:16,000 --> 00:00:18,000

He completely disappeared.

8

00:00:19,000 --> 00:00:23,000

Could black holes not only be found in the universe,

9

00:00:23,000 --> 00:00:26,000

but also here on Earth?

10

00:00:26,000 --> 00:00:31,000

And if so, could they be facilitating extraterrestrial visitation?

11

00:00:33,000 --> 00:00:36,000

Eventually it rips the fabric of space and time.

12

00:00:37,000 --> 00:00:40,000

And that's where all hell breaks loose.

13

00:00:56,000 --> 00:01:01,000

The Space Telescope

14

00:01:11,000 --> 00:01:15,000

Menlo Park, California, May 2017

15

00:01:17,000 --> 00:01:21,000

Scientists working at the Slac National Accelerator Laboratory

16

00:01:21,000 --> 00:01:25,000

fire the world's most powerful x-ray laser at a molecule.

17

00:01:26,000 --> 00:01:31,000

They were looking to see what would happen if you took an atom with a lot of electrons

18

00:01:31,000 --> 00:01:33,000

and hit it with a high-energy x-rays.

19

00:01:33,000 --> 00:01:38,000

Could you knock the electrons out of orbit around the atom

20

00:01:38,000 --> 00:01:40,000

and produce something that had very few electrons?

21

00:01:40,000 --> 00:01:43,000

But the system behaved very differently than expected.

22

00:01:44,000 --> 00:01:47,000

At first the experiment goes as planned.

23

00:01:47,000 --> 00:01:50,000

Electrons are knocked out of their orbits like pinballs.

24

00:01:51,000 --> 00:01:54,000

But then, in one quadrillionth of a second,

25

00:01:54,000 --> 00:01:58,000

a powerful force sucks electrons into a void,

26

00:01:58,000 --> 00:02:01,000

and the molecule dramatically explodes.

27

00:02:02,000 --> 00:02:07,000

It would suddenly start sucking in all the electrons from the rest of the molecule

28

00:02:07,000 --> 00:02:11,000

in a manner that they just had not anticipated.

29

00:02:11,000 --> 00:02:18,000

The electrons were then compressed and then drew other electrons into the process.

30

00:02:18,000 --> 00:02:22,000

And by golly, it looked like a black hole.

31

00:02:24,000 --> 00:02:26,000

A black hole?

32

00:02:26,000 --> 00:02:30,000

A region of space that exhibits such a strong gravitational field

33

00:02:30,000 --> 00:02:34,000

that nothing, not even light, can escape from it?

34

00:02:35,000 --> 00:02:39,000

Fundamentally, there's just a lot of mass crammed into a very small space.

35

00:02:40,000 --> 00:02:42,000

What does that mean?

36

00:02:42,000 --> 00:02:45,000

It means there's a very strong gravitational field around them.

37

00:02:45,000 --> 00:02:47,000

Light can't even escape.

38

00:02:47,000 --> 00:02:49,000

And that's where it gets the name black hole.

39

00:02:50,000 --> 00:02:54,000

When one puts in spin into the black hole equations,

40

00:02:54,000 --> 00:02:58,000

one gets a much more exotic phenomenon.

41

00:02:58,000 --> 00:03:04,000

What happens then is you get a vortex around the black hole,

42

00:03:04,000 --> 00:03:06,000

a vortex of space time.

43

00:03:07,000 --> 00:03:10,000

And here we actually saw something that resembled a black hole,

44

00:03:10,000 --> 00:03:12,000

except it wasn't gravitational.

45

00:03:12,000 --> 00:03:14,000

It was electromagnetic.

46

00:03:14,000 --> 00:03:17,000

That is, it used the power of laser beams.

47

00:03:17,000 --> 00:03:19,000

Now, how is that possible?

48

00:03:19,000 --> 00:03:22,000

Well, it turns out that in Einstein's theory,

49

00:03:22,000 --> 00:03:25,000

not just gravity, but any form of energy,

50

00:03:25,000 --> 00:03:29,000

if it's concentrated enough, could become a black hole.

51

00:03:31,000 --> 00:03:34,000

For decades, since their discovery,

52

00:03:34,000 --> 00:03:39,000

scientists have long believed that black holes could only exist in outer space.

53

00:03:39,000 --> 00:03:45,000

But if that were true, how is it that they can be simulated in an Earth-based laboratory?

54

00:03:48,000 --> 00:03:54,000

Normally, when we think of black holes, we think of a collapsed star and a great mass.

55

00:03:54,000 --> 00:03:59,000

But with these new experiments, it's showing us that black holes can be created in different ways,

56

00:03:59,000 --> 00:04:06,000

including with electromagnetic energy or high-energy pulses in a laboratory.

57

00:04:07,000 --> 00:04:12,000

And so, therefore, black holes could be in any place.

58

00:04:12,000 --> 00:04:16,000

There's areas around the Earth that we don't understand,

59

00:04:16,000 --> 00:04:20,000

that have unusual characteristics similar to a black hole.

60

00:04:20,000 --> 00:04:25,000

And so it's possible that these places are also black holes.

61

00:04:26,000 --> 00:04:29,000

If black holes can exist here on Earth,

62

00:04:29,000 --> 00:04:34,000

could their presence help to explain the numerous reports of strange phenomena

63

00:04:34,000 --> 00:04:37,000

going back thousands of years?

64

00:04:39,000 --> 00:04:44,000

On Earth, there have been stories of people missing time

65

00:04:44,000 --> 00:04:49,000

or jumping a distance at much faster speeds

66

00:04:49,000 --> 00:04:53,000

than what it would have taken in their plane or in their boat.

67

00:04:53,000 --> 00:05:01,000

And that raises the question whether very strange things apply in the vicinity of a black hole.

68

00:05:01,000 --> 00:05:08,000

Maybe a vortex opens, maybe some type of passageway into the other realms and dimensions,

69

00:05:08,000 --> 00:05:11,000

which exist all around us.

70

00:05:12,000 --> 00:05:19,000

Ancient astronaut theorists suggest that evidence of humans taking incredible journeys through time-space portals

71

00:05:19,000 --> 00:05:23,000

exists in ancient texts from all over the world.

72

00:05:23,000 --> 00:05:29,000

One such example can even be found in the Old Testament of the Hebrew Bible

73

00:05:29,000 --> 00:05:33,000

and involves the story of Moses on Mount Sinai.

74

00:05:37,000 --> 00:05:42,000

Something very bizarre happened on Mount Sinai.

75

00:05:42,000 --> 00:05:48,000

There's an ancient legend that states when God calls Moses to heaven,

76

00:05:48,000 --> 00:05:56,000

a cloud descended, and then curiously states a door opened in the cloud,

77

00:05:56,000 --> 00:06:02,000

and Moses walked in the door closed behind him and he ascended.

78

00:06:03,000 --> 00:06:08,000

According to the Bible, Moses ascends for 40 days and 40 nights.

79

00:06:08,000 --> 00:06:11,000

He does not eat, does not drink, does not sleep.

80

00:06:11,000 --> 00:06:14,000

40 days passed for us on Earth.

81

00:06:15,000 --> 00:06:19,000

How much time passed for Moses in heaven?

82

00:06:19,000 --> 00:06:23,000

What was the opening at Mount Sinai?

83

00:06:24,000 --> 00:06:29,000

It sounds like the cloud was some type of a transportational device

84

00:06:29,000 --> 00:06:33,000

within the context of an open vortex.

85

00:06:33,000 --> 00:06:41,000

The entire mountain seemed to have been subject to some radical alteration

86

00:06:41,000 --> 00:06:45,000

of the normal physical laws that govern us.

87

00:06:45,000 --> 00:06:49,000

If this has any kind of a literal understanding to it,

88

00:06:49,000 --> 00:06:55,000

that a doorway to heaven would have been an alteration in the fabric of space

89

00:06:55,000 --> 00:06:59,000

as we understand it today, possibly of time itself.

90

00:06:59,000 --> 00:07:07,000

In light of our modern understandings, we need to re-investigate what the Bible is actually teaching us.

91

00:07:19,000 --> 00:07:24,000

Space would allow us to quickly travel back and forth through space and time.

92

00:07:24,000 --> 00:07:31,000

And if so, have they been used by extraterrestrials to visit Earth for centuries?

93

00:07:31,000 --> 00:07:41,000

Perhaps further clues can be found by examining ancient knowledge about powerful vortices carved in stone.

94

00:07:50,000 --> 00:07:56,000

The Hitomi, an X-ray astronomy satellite launched by the Japan Aerospace Exploration Agency

95

00:07:56,000 --> 00:08:01,000

just five weeks earlier, begins spinning uncontrollably.

96

00:08:02,000 --> 00:08:07,000

The onboard altitude control system is unable to slow down the spinning,

97

00:08:07,000 --> 00:08:12,000

and over a period of hours, the satellite breaks into 10 fragments

98

00:08:12,000 --> 00:08:15,000

and is observed tumbling out of orbit.

99

00:08:16,000 --> 00:08:22,000

In the ensuing investigation, a significant factor emerges.

100

00:08:23,000 --> 00:08:28,000

The satellite's star tracker system, designed to keep it properly oriented,

101

00:08:28,000 --> 00:08:34,000

experienced glitches whenever the satellite passed through a field of high radiation

102

00:08:34,000 --> 00:08:37,000

known as the South Atlantic Anomaly.

103

00:08:39,000 --> 00:08:44,000

The Earth's magnetic field is generated deep in its interior.

104

00:08:44,000 --> 00:08:49,000

By motions of liquid iron and other substances,

105

00:08:49,000 --> 00:08:54,000

the thermal currents generated by a radioactive decay in the core, etc.

106

00:08:54,000 --> 00:08:56,000

So it's a very complex phenomenon.

107

00:08:57,000 --> 00:09:02,000

What we see on the surface looks like a magnetic field of a bar magnet,

108

00:09:02,000 --> 00:09:08,000

but apparently there's some kind of imperfection in it that is very deep,

109

00:09:08,000 --> 00:09:13,000

and it creates a very localized reversal of the Earth's magnetic field.

110

00:09:13,000 --> 00:09:16,000

This is called the South Atlantic Anomaly.

111

00:09:16,000 --> 00:09:23,000

Astronauts flying through this region or satellites are exposed to a very brief,

112

00:09:23,000 --> 00:09:26,000

but intense field of radiation.

113

00:09:28,000 --> 00:09:33,000

Comprised in the area of the magnetosphere, above much of South America,

114

00:09:33,000 --> 00:09:35,000

as well as the Atlantic Ocean,

115

00:09:35,000 --> 00:09:40,000

the South Atlantic Anomaly has caused problems with spacecraft for decades.

116

00:09:41,000 --> 00:09:44,000

It is for this reason that the International Space Station

117

00:09:44,000 --> 00:09:48,000

requires extra shielding when passing by it,

118

00:09:49,000 --> 00:09:56,000

and why NASA laptops have crashed when the space shuttle flies through its intense levels of radiation.

119

00:09:58,000 --> 00:10:02,000

When you go through this South Atlantic Anomaly, strange things happen.

120

00:10:02,000 --> 00:10:06,000

There are flashes of light, electronics will malfunction,

121

00:10:06,000 --> 00:10:11,000

and even spacecraft have to be specially shielded to go through this area.

122

00:10:12,000 --> 00:10:17,000

Although scientists understand the nature of the South Atlantic Anomaly,

123

00:10:17,000 --> 00:10:20,000

there is disagreement as to its effects,

124

00:10:20,000 --> 00:10:25,000

and there is an increasing number who believe it may also create vortices

125

00:10:25,000 --> 00:10:28,000

that can alter both time and space.

126

00:10:30,000 --> 00:10:34,000

Nature has found thresholds and doorways

127

00:10:34,000 --> 00:10:40,000

that people don't even know exist that can open under these specific circumstances.

128

00:10:40,000 --> 00:10:46,000

If one can change the metric of space time directly with electromagnetic fields,

129

00:10:46,000 --> 00:10:53,000

then nature itself, because of the enormous electromagnetic fields it develops in weather disturbances, for example,

130

00:10:53,000 --> 00:11:01,000

could possibly create its own electrodynamic black hole or rotating black hole solutions.

131

00:11:02,000 --> 00:11:06,000

Many ancient astronaut theorists support this claim

132

00:11:06,000 --> 00:11:10,000

and suggest that our ancestors were so aware of it

133

00:11:10,000 --> 00:11:16,000

that they even carved numerous representations of it in stone, all over the world.

134

00:11:20,000 --> 00:11:22,000

Inga Brazil

135

00:11:23,000 --> 00:11:28,000

Here stands an ancient rock formation known as the Inga Stone.

136

00:11:29,000 --> 00:11:35,000

The formation is covered with carved symbols that are of unknown origin and meaning.

137

00:11:35,000 --> 00:11:40,000

But some researchers claim to have at least partially deciphered the carvings

138

00:11:40,000 --> 00:11:48,000

and suggest they revealed that whoever made them had advanced knowledge of both astronomy and physics.

139

00:11:49,000 --> 00:11:56,000

In the Inga River in Brazil we find this incredible 150-foot long, 12-foot tall stone, the Inga Stone.

140

00:11:56,000 --> 00:12:03,000

It's covered with the most immaculate carvings, highly detailed, but totally mysterious.

141

00:12:03,000 --> 00:12:07,000

We don't know who exactly created them for what purpose.

142

00:12:07,000 --> 00:12:13,000

And it has the most strange carvings on the rock on the surface.

143

00:12:13,000 --> 00:12:18,000

There's also another petroglyphs and geoglyphs around the Inga Stone

144

00:12:18,000 --> 00:12:22,000

and some of them have to do with constellations, the Southern Cross.

145

00:12:22,000 --> 00:12:30,000

Milkway, the Orion constellation and other constellations that were described in that area as well.

146

00:12:30,000 --> 00:12:35,000

Some people interpret that the spirals around it had to do with energy,

147

00:12:35,000 --> 00:12:40,000

vortices of energy. There is a magnetic anomalies on the Inga Stone, that's for sure.

148

00:12:42,000 --> 00:12:46,000

We know that the Inga Stone contains astronomical data.

149

00:12:46,000 --> 00:12:51,000

And what's interesting about this is that the native peoples typically didn't make astronomical depictions.

150

00:12:51,000 --> 00:12:54,000

They made depictions of supernatural beings.

151

00:12:54,000 --> 00:13:02,000

So this kind of hints us in the idea that maybe the origin of this knowledge is indeed extraterrestrial beings.

152

00:13:05,000 --> 00:13:12,000

Curiously, the Inga Stone is located within the exact same geographical area as the South Atlantic anomaly.

153

00:13:13,000 --> 00:13:20,000

Is it possible that the stone's enigmatic carvings were inspired by the arrival of an ancient space traveler,

154

00:13:20,000 --> 00:13:24,000

one who had landed here centuries ago?

155

00:13:24,000 --> 00:13:31,000

And if so, could the South Atlantic anomaly, while perhaps the largest and best known of its kind,

156

00:13:31,000 --> 00:13:36,000

be one of many similar anomalies that exist here on Earth?

157

00:13:37,000 --> 00:13:41,000

The Bermuda Triangle

158

00:13:41,000 --> 00:13:43,000

The Devil's Sea

159

00:13:43,000 --> 00:13:45,000

Easter Island

160

00:13:45,000 --> 00:13:48,000

The Indus Valley

161

00:13:48,000 --> 00:13:56,000

These are just a few of 12 triangular zones spaced evenly around the globe known for disappearances,

162

00:13:56,000 --> 00:14:01,000

high energy and other unexplainable phenomena.

163

00:14:02,000 --> 00:14:07,000

Collectively, they have been referred to as the vial vortices.

164

00:14:07,000 --> 00:14:16,000

The Scottish-born biologist and crypto zoologist and writer Ivan T. Sanderson

165

00:14:16,000 --> 00:14:23,000

came up with a theory to do with paranormal phenomena occurring at different parts of the world.

166

00:14:24,000 --> 00:14:32,000

He believed that there were 12 principal locations where this would actually take place,

167

00:14:32,000 --> 00:14:37,000

and he referred to them as the vial vortices.

168

00:14:40,000 --> 00:14:44,000

In other words, that they were quite violent in their action.

169

00:14:44,000 --> 00:14:50,000

Sanderson was trying to find an explanation to all of these disappearances,

170

00:14:50,000 --> 00:14:59,000

and it was this geometric pattern on the Earth that he thought was a solution to what was going on,

171

00:14:59,000 --> 00:15:06,000

and that certain spots on the Earth were just anomalistic and had these strange energy patterns.

172

00:15:06,000 --> 00:15:14,000

There is no question that his work proves to me that there's a lot more that we don't understand about this planet,

173

00:15:14,000 --> 00:15:19,000

whether it's natural or some kind of paranormal episode, I don't know,

174

00:15:19,000 --> 00:15:26,000

but there's no question this planet is very, very unusual when it comes to these certain spots.

175

00:15:27,000 --> 00:15:35,000

If extraterrestrials visited Earth in the distant past, maybe they simply harnessed what was already present in the Earth,

176

00:15:35,000 --> 00:15:40,000

and that they had a technology to bring these places into a higher energetic state

177

00:15:40,000 --> 00:15:45,000

where they could use them as black holes or wormholes or for other purposes.

178

00:15:46,000 --> 00:15:53,000

Is it possible that the so-called vial vortices, in addition to phenomena like the South Atlantic anomaly,

179

00:15:53,000 --> 00:16:01,000

could help explain mysterious disappearances, and that there are locations on Earth where conditions are optimal

180

00:16:01,000 --> 00:16:11,000

for the creation of black holes or portals, areas where humans could, without warning, be suddenly thrust into another space or time?

181

00:16:11,000 --> 00:16:18,000

If you look at the bottom of a black hole, it could be a place where you want to think of a hole actually in space and time

182

00:16:18,000 --> 00:16:23,000

that reconnects somewhere else, and so you can go through the black hole like a door or a tunnel

183

00:16:23,000 --> 00:16:28,000

and end up either in another part of the universe or in another actual universe.

184

00:16:29,000 --> 00:16:36,000

Could extraterrestrials have used these so-called portals to visit the Earth in the distant past?

185

00:16:37,000 --> 00:16:43,000

Ancient astronaut theorists say yes, and suggest further clues can be found

186

00:16:43,000 --> 00:16:52,000

by investigating one of the places that in recent decades has been the site of more curious disappearances than any other.

187

00:16:52,000 --> 00:16:55,000

The Bermuda Triangle

188

00:16:57,000 --> 00:17:00,000

Fort Lauderdale, Florida

189

00:17:00,000 --> 00:17:04,000

December 5, 1945

190

00:17:05,000 --> 00:17:10,000

Five Navy Avenger torpedo bombers, collectively known as Flight 19,

191

00:17:10,000 --> 00:17:14,000

set out on a training mission over the Bermuda Triangle.

192

00:17:15,000 --> 00:17:21,000

Without warning, all five bombers experienced malfunctions with their onboard instruments.

193

00:17:21,000 --> 00:17:27,000

They contact air control and report their mysterious difficulties.

194

00:17:28,000 --> 00:17:33,000

And all five of their compasses were not working correctly,

195

00:17:33,000 --> 00:17:38,000

and they had two navigational instruments that they could use, and they were not working properly either.

196

00:17:38,000 --> 00:17:42,000

It caused total confusion, and they didn't know of their position.

197

00:17:42,000 --> 00:17:45,000

So they did what a lot of other pilots have done in the past.

198

00:17:45,000 --> 00:17:50,000

They made a series of turns, and that's what causes pilots to become confused.

199

00:17:51,000 --> 00:17:59,000

The planes disappeared from radar, and their last communication consisted of nothing but eerie static.

200

00:18:02,000 --> 00:18:07,000

The Navy immediately launched two sea planes to search for the missing bombers.

201

00:18:07,000 --> 00:18:11,000

Just 20 minutes after takeoff, they too vanished.

202

00:18:13,000 --> 00:18:19,000

The unusual thing is they didn't find any parts, no life jackets or life rafts.

203

00:18:21,000 --> 00:18:27,000

Despite some claims in more modern times that Grumman Avengers have been discovered,

204

00:18:27,000 --> 00:18:30,000

that might have been Flight 19,

205

00:18:30,000 --> 00:18:37,000

the actuality of the case is that it is a mystery of exactly what happened.

206

00:18:38,000 --> 00:18:44,000

The disappearance of Flight 19 is one of many bizarre and unexplainable events

207

00:18:44,000 --> 00:18:49,000

that have taken place in the area that is now known as the Bermuda Triangle.

208

00:18:50,000 --> 00:18:55,000

The Bermuda Triangle is really located off of Florida.

209

00:18:56,000 --> 00:18:59,000

The northern point of it is the island of Bermuda.

210

00:18:59,000 --> 00:19:05,000

It then goes down to essentially southern Florida and then out into the Bahamas.

211

00:19:05,000 --> 00:19:10,000

And this is an area that has historically had strange phenomenon.

212

00:19:12,000 --> 00:19:19,000

It is something that goes back all the way to the time of Christopher Columbus

213

00:19:19,000 --> 00:19:26,000

as he passed through this area because he found that his compasses strangely didn't work

214

00:19:26,000 --> 00:19:30,000

as he passed through what we now know as the Bermuda Triangle.

215

00:19:30,000 --> 00:19:38,000

He also saw mysterious lights in the same area just a few days later after his compasses failed.

216

00:19:39,000 --> 00:19:45,000

The famous Mary Celeste ship was found in the Bermuda Triangle without any crew on it at all.

217

00:19:45,000 --> 00:19:47,000

And no one could explain it.

218

00:19:48,000 --> 00:19:55,000

What's very bizarre about some of these instances is that these people vanished in front of multiple witnesses.

219

00:19:55,000 --> 00:19:58,000

In circumstances that seem to be impossible.

220

00:19:58,000 --> 00:20:04,000

It's like these people were here and they suddenly just blinked out as if they walked off the surface of the earth.

221

00:20:06,000 --> 00:20:12,000

My guess is that you're dealing with something that is dimensional and when you go through it,

222

00:20:12,000 --> 00:20:15,000

there's that possibility you may never come back.

223

00:20:16,000 --> 00:20:23,000

For decades, scientists and researchers have struggled to find a cause for the mysterious disappearances.

224

00:20:23,000 --> 00:20:29,000

They are equally puzzled by the numerous reports of everything from instrument failure

225

00:20:29,000 --> 00:20:34,000

to compasses that strangely point to true north instead of magnetic north.

226

00:20:36,000 --> 00:20:44,000

Electromagnetic phenomenon associated with thunderstorms that can perhaps open up portals in space time

227

00:20:44,000 --> 00:20:47,000

and that we never would have thought possible.

228

00:20:47,000 --> 00:20:53,000

An analogy is that lightning is still poorly understood.

229

00:20:53,000 --> 00:20:56,000

Lightning typically carries several million volts.

230

00:20:56,000 --> 00:21:03,000

This is not sufficient voltage to jump from a cloud miles above the ground to the ground or between clouds.

231

00:21:03,000 --> 00:21:05,000

Yet nature doesn't.

232

00:21:05,000 --> 00:21:10,000

Combine that with the strange location of the Bermuda Triangle

233

00:21:10,000 --> 00:21:14,000

where the collision point of these cold and warm currents.

234

00:21:14,000 --> 00:21:19,000

You can have a playground for exotic physics, I believe.

235

00:21:21,000 --> 00:21:28,000

Mite storm clouds, lightning flashes and powerful ocean currents located within the Bermuda Triangle

236

00:21:28,000 --> 00:21:32,000

have unexpected and otherworldly effects.

237

00:21:33,000 --> 00:21:38,000

Ancient astronaut theorists believe such an audacious theory is possible

238

00:21:38,000 --> 00:21:47,000

and point to the story of pilot Bruce Gernon as the best evidence that such incredible phenomenon can and do exist.

239

00:21:49,000 --> 00:21:59,000

On December the 4th, 1970, almost 25 years to the day after the disappearance of Flight 19.

240

00:22:00,000 --> 00:22:11,000

A pilot by the name of Bruce Gernon was in an aircraft flying between Andros Island and the island of Biminay

241

00:22:11,000 --> 00:22:17,000

when he had an absolute incredible experience.

242

00:22:22,000 --> 00:22:25,000

The controls on his plane also went crazy.

243

00:22:26,000 --> 00:22:32,000

He felt in the end that somehow he had been in the Bermuda Triangle when it was activated.

244

00:22:32,000 --> 00:22:39,000

Since that time, researchers have been trying to find out exactly what happened during that flight.

245

00:22:46,000 --> 00:22:52,000

In March 2018, ancient astronaut theorist and author David Childress

246

00:22:52,000 --> 00:22:59,000

traveled to an airfield in West Palm Beach, Florida to meet face to face with one of the very few men

247

00:22:59,000 --> 00:23:05,000

who experienced the strange power of the Bermuda Triangle and survived.

248

00:23:06,000 --> 00:23:08,000

So what is our plan today?

249

00:23:08,000 --> 00:23:13,000

Well, we're gonna recreate our flight that I had in 1970.

250

00:23:13,000 --> 00:23:17,000

And I can show you on the chart here, we're gonna go direct from Palm Beach,

251

00:23:17,000 --> 00:23:21,000

right to this curved area of Andros Island on the western shore.

252

00:23:21,000 --> 00:23:23,000

And we're gonna go down to a thousand feet at this point.

253

00:23:23,000 --> 00:23:27,000

And that's where my experience in 1970 began.

254

00:23:27,000 --> 00:23:30,000

I am the only living person that has flown through the heart of it

255

00:23:30,000 --> 00:23:34,000

and then exited what I call a time tunnel vortex and survived.

256

00:23:34,000 --> 00:23:37,000

So have you ever retraced your flight?

257

00:23:37,000 --> 00:23:42,000

I've never been on the exact flight path that I was when I had this event.

258

00:23:42,000 --> 00:23:45,000

And that's what I'd like to take you through today, the exact flight path.

259

00:23:45,000 --> 00:23:49,000

Into the Bermuda Triangle and this isn't a one-way flight, is it?

260

00:23:49,000 --> 00:23:51,000

No, sir. We'll be back.

261

00:23:51,000 --> 00:23:53,000

Okay, I'm ready.

262

00:23:57,000 --> 00:24:03,000

At the North Palm Beach County Airport, located 20 miles outside of West Palm Beach, Florida,

263

00:24:03,000 --> 00:24:08,000

author and researcher David Childress and professional pilot Bruce Gernan

264

00:24:08,000 --> 00:24:16,000

are about to retrace the exact path of a mysterious flight that Gernan made nearly five decades ago.

265

00:24:16,000 --> 00:24:22,000

It was a flight over the region of the Atlantic Ocean known as the Bermuda Triangle,

266

00:24:22,000 --> 00:24:28,000

during which Gernan claims to have experienced an inexplicable shift in time.

267

00:24:29,000 --> 00:24:36,000

So Bruce, it was 1970 and you were flying out of Andros. Who was with you on this flight?

268

00:24:36,000 --> 00:24:40,000

My dad and our business partner was with us and it was a routine flight,

269

00:24:40,000 --> 00:24:45,000

but this is the area where I took off and started my ascent.

270

00:24:45,000 --> 00:24:48,000

I was at a thousand feet just like we are right now.

271

00:24:49,000 --> 00:24:54,000

I started climbing straight out over that bank right there.

272

00:24:54,000 --> 00:24:55,000

Here it is.

273

00:24:55,000 --> 00:24:57,000

Got it? Okay.

274

00:24:57,000 --> 00:25:00,000

I don't know. It looks kind of eerie here.

275

00:25:00,000 --> 00:25:03,000

There's nothing much around, is there?

276

00:25:03,000 --> 00:25:06,000

Very remote area behind the bank.

277

00:25:06,000 --> 00:25:08,000

Wow, what was that?

278

00:25:08,000 --> 00:25:09,000

Did you feel that?

279

00:25:09,000 --> 00:25:10,000

There it is.

280

00:25:10,000 --> 00:25:11,000

Right there.

281

00:25:11,000 --> 00:25:12,000

That was a weird...

282

00:25:12,000 --> 00:25:13,000

Can you catch that?

283

00:25:13,000 --> 00:25:14,000

Something we should maybe...

284

00:25:14,000 --> 00:25:15,000

Okay.

285

00:25:15,000 --> 00:25:17,000

It's out of control.

286

00:25:17,000 --> 00:25:19,000

It's okay guys, we just hit a rough spot.

287

00:25:19,000 --> 00:25:21,000

We just got a little bit of a fear.

288

00:25:22,000 --> 00:25:23,000

Turbulence.

289

00:25:23,000 --> 00:25:24,000

How about that? Yeah, wow.

290

00:25:24,000 --> 00:25:27,000

I have to admit, I'm actually glad we did advantage.

291

00:25:27,000 --> 00:25:30,000

That's right in this exact area here.

292

00:25:31,000 --> 00:25:32,000

Where did that?

293

00:25:32,000 --> 00:25:33,000

We did that.

294

00:25:33,000 --> 00:25:35,000

Oh, a premonition maybe.

295

00:25:35,000 --> 00:25:36,000

Kind of, yeah.

296

00:25:36,000 --> 00:25:37,000

Okay, now.

297

00:25:37,000 --> 00:25:40,000

Alright, so did you think that anything strange was going to happen to you that day?

298

00:25:40,000 --> 00:25:42,000

No, no, no premonitions.

299

00:25:42,000 --> 00:25:47,000

But this strange cloud formed right in front of us and it was like a lenticular shaped cloud.

300

00:25:47,000 --> 00:25:50,000

But it was just sort of hovering there.

301

00:25:50,000 --> 00:25:53,000

And it did look a little strange.

302

00:25:53,000 --> 00:25:57,000

As soon as I got over it started expanding.

303

00:25:57,000 --> 00:26:01,000

And then before you know it, I'm inside the cloud.

304

00:26:01,000 --> 00:26:03,000

And so now I can't see anything.

305

00:26:03,000 --> 00:26:06,000

Visibility was near zero.

306

00:26:06,000 --> 00:26:08,000

There was lightning in there.

307

00:26:08,000 --> 00:26:11,000

There was flashes of light.

308

00:26:11,000 --> 00:26:15,000

These flashes got more and more intense the deeper we went in it.

309

00:26:15,000 --> 00:26:17,000

It got darker too.

310

00:26:17,000 --> 00:26:19,000

It's almost like night and day.

311

00:26:19,000 --> 00:26:22,000

My co-pilot, my dad, he said,

312

00:26:22,000 --> 00:26:25,000

maybe we ought to turn around and go back to Andrews.

313

00:26:25,000 --> 00:26:30,000

I didn't want to turn around and go back through this cloud that was freaking me out.

314

00:26:30,000 --> 00:26:32,000

That would have been worse.

315

00:26:32,000 --> 00:26:34,000

There was no turning back.

316

00:26:34,000 --> 00:26:37,000

I said to my dad, well, hold on, not yet.

317

00:26:37,000 --> 00:26:40,000

Rather than turning back for land,

318

00:26:40,000 --> 00:26:44,000

Bruce decided to pull out of the cloud that the plane had become immersed in

319

00:26:44,000 --> 00:26:47,000

and continued on his flight path.

320

00:26:47,000 --> 00:26:49,000

But when he came out of the cloud,

321

00:26:49,000 --> 00:26:54,000

he realized that the situation was even more incredible than he first thought.

322

00:26:54,000 --> 00:26:59,000

His plane was surrounded on all sides by a giant storm.

323

00:26:59,000 --> 00:27:02,000

And there appeared to be no way out.

324

00:27:02,000 --> 00:27:06,000

I felt like we were trapped inside this strange storm.

325

00:27:06,000 --> 00:27:14,000

And then I noticed a big tunnel about a mile wide and 10 miles long.

326

00:27:14,000 --> 00:27:16,000

So I said, oh, right, we'll go through that.

327

00:27:16,000 --> 00:27:18,000

My dad agreed.

328

00:27:18,000 --> 00:27:21,000

When we entered the tunnel, an incredible thing happened.

329

00:27:21,000 --> 00:27:28,000

A series of clouds formed a swirling line that was slowly rotating counterclockwise.

330

00:27:28,000 --> 00:27:30,000

It felt like we were hydroplane.

331

00:27:30,000 --> 00:27:36,000

Somehow we were at zero gravity, we were floating and going forward somehow.

332

00:27:36,000 --> 00:27:45,000

And then I came out of the tunnel, I looked back behind, and I watched the tunnel collapse.

333

00:27:45,000 --> 00:27:50,000

The radar controller comes back on the microphone and he's yelling really loud.

334

00:27:50,000 --> 00:27:52,000

He's all excited.

335

00:27:52,000 --> 00:27:55,000

He says, I got an airplane directly over Miami Beach.

336

00:27:55,000 --> 00:28:01,000

So I look at my watch, I got another 30 minutes to go here.

337

00:28:01,000 --> 00:28:06,000

At least 80 miles east of you guys, I tell.

338

00:28:06,000 --> 00:28:09,000

But then I looked down and there's Miami Beach right below me.

339

00:28:09,000 --> 00:28:14,000

I traveled 100 miles in only three minutes.

340

00:28:14,000 --> 00:28:20,000

100 miles in three minutes?

341

00:28:20,000 --> 00:28:29,000

Bruce's plane would have to have been traveling 2,000 miles per hour to cross that distance in such a short amount of time.

342

00:28:29,000 --> 00:28:35,000

A speed that his small plane was not even remotely capable of.

343

00:28:35,000 --> 00:28:41,000

But the people on the plane, except for a little bit of mist and fog around them, they don't really notice anything strange.

344

00:28:41,000 --> 00:28:48,000

No, they didn't notice anything strange, but all their watches were set back 20 minutes.

345

00:28:48,000 --> 00:28:55,000

I believe now that what was happening was I was seeing the fabric of time.

346

00:28:55,000 --> 00:29:02,000

And I believe that is what creates the mystery of the Bermuda Triangle.

347

00:29:02,000 --> 00:29:09,000

Could it be that the so-called tunnel that Bruce describes was actually some type of electromagnetic vortex,

348

00:29:09,000 --> 00:29:15,000

one that like a black hole could alter both time and space?

349

00:29:15,000 --> 00:29:20,000

For ancient astronaut theorists, the answer is a resounding yes.

350

00:29:20,000 --> 00:29:26,000

And they argue that even more evidence can be found by studying ancient disappearances,

351

00:29:26,000 --> 00:29:35,000

not only of individuals, but of an entire civilization.

352

00:29:35,000 --> 00:29:38,000

Easter Island.

353

00:29:38,000 --> 00:29:44,000

Located in the Pacific Ocean, over 2,000 miles off the coast of Chile,

354

00:29:44,000 --> 00:29:48,000

this remote island was once home to the Rapa Nui people,

355

00:29:48,000 --> 00:29:57,000

who, after flourishing for hundreds of years, seemed to mysteriously disappear sometime in the 18th century.

356

00:29:57,000 --> 00:30:04,000

It seems at some point it may be as much as 10,000 people live there at its peak.

357

00:30:04,000 --> 00:30:10,000

But about 100 years later, when more Europeans started showing up on a regular basis,

358

00:30:10,000 --> 00:30:14,000

it seemed to be down to about 1,500.

359

00:30:14,000 --> 00:30:22,000

So something happened at Easter Island to seriously decrease their population.

360

00:30:22,000 --> 00:30:29,000

While mainstream historians have long debated the cause of the mass disappearance of the Rapa Nui,

361

00:30:29,000 --> 00:30:35,000

ancient astronaut theorists believe it may have something to do with Easter Island being located

362

00:30:35,000 --> 00:30:42,000

in one of the 12 areas that were identified by cryptozoologist Ivan T. Sanderson as vile vortices,

363

00:30:42,000 --> 00:30:51,000

places on Earth where strange electromagnetic activity is more likely to occur.

364

00:30:51,000 --> 00:30:57,000

We know there are places around the world that have an unknown energy.

365

00:30:57,000 --> 00:31:09,000

Easter Island, Mexico, Egypt, Indus Valley, also in Asia, in Tibet, all around the world in these areas,

366

00:31:09,000 --> 00:31:13,000

also there were built megalithic structures.

367

00:31:13,000 --> 00:31:15,000

How we can explain that?

368

00:31:15,000 --> 00:31:25,000

The only possible explanation is an ancient contact with sophisticated alien civilizations around the world.

369

00:31:26,000 --> 00:31:34,000

The traditions of Rapa Nui are absolutely incredible because their entire society is based on this idea

370

00:31:34,000 --> 00:31:40,000

that they were seeded by none other than the Birdmen.

371

00:31:40,000 --> 00:31:42,000

So what were they describing?

372

00:31:42,000 --> 00:31:46,000

And so if you look at this whole idea of the Rapa Nui,

373

00:31:46,000 --> 00:31:54,000

what if the stories of the Birdmen are nothing else but a description of extraterrestrials

374

00:31:54,000 --> 00:32:01,000

that somehow were involved on the happenings that were going on on Easter Island?

375

00:32:02,000 --> 00:32:14,000

Exeterrestrial groups have been terraforming and harvesting genetic material on this planet for more than 270 million years.

376

00:32:14,000 --> 00:32:17,000

Is that what Easter Island was?

377

00:32:17,000 --> 00:32:20,000

A genetic experiment?

378

00:32:20,000 --> 00:32:24,000

And maybe that's why they were transferred out.

379

00:32:30,000 --> 00:32:34,000

Is it possible that because Easter Island, like the Bermuda Triangle,

380

00:32:34,000 --> 00:32:38,000

is located at a place of increased electromagnetic activity,

381

00:32:38,000 --> 00:32:43,000

that the area serves as a kind of extraterrestrial portal?

382

00:32:44,000 --> 00:32:52,000

A gateway which when opened could allow alien beings to come to Earth and humans to travel back with them?

383

00:32:52,000 --> 00:33:02,000

Ancient astronaut theorists say yes and suggest this phenomenon might also happen in every country on Earth.

384

00:33:03,000 --> 00:33:07,000

The World of Trees

385

00:33:08,000 --> 00:33:14,000

Holland, Michigan, February 18, 1978.

386

00:33:14,000 --> 00:33:22,000

Stephen Kabaki, a student at Hope College, tells his roommates he's going out cross-country skiing.

387

00:33:22,000 --> 00:33:27,000

When Stephen doesn't return by nightfall, his roommates contact the police

388

00:33:27,000 --> 00:33:31,000

and a massive search and rescue operation is launched.

389

00:33:33,000 --> 00:33:41,000

Two days later, they find Stephen's backpack and his skis sitting on the beach to the Great Lakes.

390

00:33:41,000 --> 00:33:50,000

And they walk out and they search the area and they find tracks in the snow leading out onto the ice towards the lake.

391

00:33:50,000 --> 00:33:57,000

The tracks appeared to stop in the middle of the lake. There was no hole, there was nothing, that was just where they stopped.

392

00:33:57,000 --> 00:34:00,000

He completely disappeared.

393

00:34:03,000 --> 00:34:11,000

A little over a year later, Stephen Kabaki awakens in a field some 700 miles from where he disappeared.

394

00:34:11,000 --> 00:34:20,000

Certain it was the same day as the one when he went missing. He had no memory of where he had been or how he had traveled across the country.

395

00:34:20,000 --> 00:34:25,000

Where he was for that one year and two months is a complete black hole.

396

00:34:26,000 --> 00:34:34,000

After months of investigation, there was no credible evidence that Stephen Kabaki had staged or faked his disappearance.

397

00:34:34,000 --> 00:34:43,000

So how was it that a 23-year-old skier suddenly vanished without a trace, only to return just over a year later

398

00:34:43,000 --> 00:34:47,000

and with no memory of where he had gone or for how long?

399

00:34:48,000 --> 00:34:56,000

These are the questions currently being answered by former police detective turned missing persons investigator Dave Politis.

400

00:34:59,000 --> 00:35:00,000

This is Dave.

401

00:35:00,000 --> 00:35:06,000

For the past nine years, he has been investigating the world's most baffling missing persons cases

402

00:35:06,000 --> 00:35:14,000

and has concluded that there are certain places on earth where unexplained disappearances occur in astonishingly high numbers.

403

00:35:15,000 --> 00:35:21,000

I know a lot of people throughout the world have heard of the Bermuda Triangle, missing ships and planes over water.

404

00:35:21,000 --> 00:35:30,000

I don't think many people have heard about the disappearances of people on land that fit this exact profile that we've established.

405

00:35:30,000 --> 00:35:35,000

Certain profile points replicate themselves time after time after time.

406

00:35:35,000 --> 00:35:40,000

When they bring in search dogs, bloodhounds, they can't pick up a cent.

407

00:35:40,000 --> 00:35:44,000

When they bring in professional trackers, they can't track point to point.

408

00:35:44,000 --> 00:35:49,000

Many, many times there's a weather event in relationship to the disappearance.

409

00:35:51,000 --> 00:35:57,000

Other times, the person disappears near a body of water or is found near a body of water.

410

00:35:57,000 --> 00:36:06,000

Other instances, if the person is found, they're found in a location that has been previously searched, not just once, maybe dozens of times.

411

00:36:06,000 --> 00:36:09,000

They leave the searchers scratching their head.

412

00:36:11,000 --> 00:36:22,000

After examining thousands of missing persons incidents, Dave Politis has identified 59 so-called hot spots in the United States alone.

413

00:36:22,000 --> 00:36:30,000

Places where more people appear to vanish and without any signs of foul play than anywhere else in the country.

414

00:36:30,000 --> 00:36:34,000

In the work we do, it's a rare event that you find somebody who's alive.

415

00:36:34,000 --> 00:36:40,000

But in those instances, the vast, vast majority of times, the victim doesn't remember what happened.

416

00:36:41,000 --> 00:36:45,000

They don't know why they got lost. They don't know where they went. They don't know where they've been.

417

00:36:47,000 --> 00:36:54,000

I've been very fortunate to meet some of the smartest people in the world of theoretical physicists.

418

00:36:54,000 --> 00:37:00,000

And during those conversations, many times it's gone towards portals.

419

00:37:01,000 --> 00:37:07,000

And the response coming back from the physicist was, these portals can be directed and targeted.

420

00:37:10,000 --> 00:37:25,000

Is it possible that when people go through these time tunnel portals and they have no memory of what went on, it's because there's nothing for them to have a memory of, because for them it was just an instantaneous thing.

421

00:37:25,000 --> 00:37:29,000

So I'm one of these people as an investigator that lives in the world of facts.

422

00:37:29,000 --> 00:37:38,000

I don't hypothesize, I don't theorize, and I'm very careful about where I tread and who I talk to about these things.

423

00:37:38,000 --> 00:37:46,000

And when you hear from the scientist who's credible, saying these things could be occurring, it makes you uncomfortable.

424

00:37:46,000 --> 00:37:48,000

And it makes you wonder really what might be going on.

425

00:37:50,000 --> 00:37:54,000

Could mankind be on the verge of an incredible breakthrough?

426

00:37:55,000 --> 00:38:02,000

One that acknowledges that black holes exist not only in deep space, but also here on Earth.

427

00:38:03,000 --> 00:38:15,000

For the answers, ancient astronaut theorists point to additional research being done, not out in space or in a laboratory, but deep beneath the Earth's oceans.

428

00:38:16,000 --> 00:38:22,000

September 3rd, 2013.

429

00:38:22,000 --> 00:38:30,000

Scientists from ETH Zurich and the University of Miami publish an incredible report.

430

00:38:30,000 --> 00:38:42,000

According to their research, they have discovered that many circular shaped ocean patterns, otherwise known as eddies, are the mathematical equivalent of black holes in space.

431

00:38:43,000 --> 00:38:56,000

Mainstream scientists are now forced to ask themselves, have black holes been on Earth all along, not only in the oceans, but also on dry land?

432

00:38:57,000 --> 00:39:01,000

Some people will say, oh, we understand black holes completely and that's nonsense.

433

00:39:02,000 --> 00:39:11,000

We're seeing in the universe black hole candidates and they're displaying a range of behaviors which we hadn't anticipated.

434

00:39:12,000 --> 00:39:22,000

It turns out that when you look at the mathematics of black holes, there's a certain universality that we see them when you pull the plug in your bathtub.

435

00:39:23,000 --> 00:39:29,000

You see them in hurricanes and twisters. You see them as a universal feature of nature.

436

00:39:31,000 --> 00:39:47,000

We are looking for solutions to a unified, electrodynamic space time that will allow us to open a portal, a vortex portal perhaps, to another star system that we can transit.

437

00:39:49,000 --> 00:39:56,000

And to do that with a far lower threshold of energy than one would expect from conventional black hole theory.

438

00:39:57,000 --> 00:40:11,000

But if, as scientists are now beginning to discover, black holes can provide gateways through time and distance, not only in outer space, but on our own planet, could they also be controlled?

439

00:40:12,000 --> 00:40:18,000

As far as ancient astronaut theorists are concerned, the answer is a resounding yes.

440

00:40:19,000 --> 00:40:28,000

And they argue that Earth's black holes have been controlled for thousands of years and by beings that are not of this world.

441

00:40:29,000 --> 00:40:44,000

We have to think of these vortex areas around the Earth as something that is useful and that if extraterrestrials and other people can manipulate these vortex areas, that we could do that too.

442

00:40:45,000 --> 00:40:52,000

Physicists are always talking about our strange and beautiful universe, but our Earth is pretty strange and beautiful too.

443

00:40:53,000 --> 00:41:00,000

And maybe these black holes on Earth are going to be the key to open up the gateways to the

universe for us.

444

00:41:01,000 --> 00:41:10,000

This is the stop of science fiction, but it's actually the border between science fact and science fiction. And these are things that cannot be ruled out.

445

00:41:11,000 --> 00:41:21,000

Will the realization that black holes exist here on Earth help to resolve some of history's most unanswered questions?

446

00:41:22,000 --> 00:41:30,000

Questions concerning not only mysterious disappearances, but also those involving extraterrestrial visitation.

447

00:41:31,000 --> 00:41:39,000

Ancient astronaut theorists say yes and suggest that mankind is standing on the threshold of an exciting future.

448

00:41:40,000 --> 00:41:53,000

One where dreams of traveling through time and space will become reality and where contact with our alien ancestors will unlock the mysteries about our ancient past.
