

1

00:00:00,000 --> 00:00:07,000

A scientific breakthrough opens the door to an entirely new reality.

2

00:00:07,000 --> 00:00:12,000

This technology can alter our world beyond our wildest imagination.

3

00:00:12,000 --> 00:00:18,000

It has the potential to put every star in the sky within our reach.

4

00:00:18,000 --> 00:00:25,000

Variations of it could be stable and might eventually provide fuel for a starship.

5

00:00:26,000 --> 00:00:35,000

But is it possible that this incredible technology was ripped from a crashed extraterrestrial spacecraft?

6

00:00:38,000 --> 00:00:42,000

It doesn't really coincide with the aerodynamics of a regular airplane.

7

00:00:42,000 --> 00:00:45,000

Honestly, my skin is tingling from this.

8

00:00:45,000 --> 00:00:50,000

And if we harness its awesome power, will we suddenly make the giant leap

9

00:00:50,000 --> 00:00:55,000

from citizens of Earth to citizens of the universe?

10

00:00:55,000 --> 00:01:02,000

If you can manipulate time and space through some type of an element, you can do anything you want.

11

00:01:05,000 --> 00:01:09,000

There is a doorway in the universe.

12

00:01:09,000 --> 00:01:13,000

Beyond it is the promise of truth.

13

00:01:13,000 --> 00:01:18,000

It demands we question everything we have ever been taught.

14

00:01:18,000 --> 00:01:22,000

The evidence is all around us.

15

00:01:22,000 --> 00:01:26,000

The future is right before our eyes.

16

00:01:26,000 --> 00:01:29,000

We are not alone.

17

00:01:29,000 --> 00:01:32,000

We have never been alone.

18

00:01:32,000 --> 00:01:39,000

Roswell, New Mexico, June 1947.

19

00:01:39,000 --> 00:01:47,000

On a dusty patch of desert, 30 miles north of town, an unidentified object crashes to Earth.

20

00:01:47,000 --> 00:01:56,000

The initial press release from the Roswell Army airfield on July 8th reports the recovery of the crash.

21

00:01:56,000 --> 00:02:04,000

Curiously, the following day, the official story is changed to suggest it was nothing more than a failed weather balloon.

22

00:02:04,000 --> 00:02:23,000

But more than six decades later, the FBI declassifies a memo dated March 22, 1950, in which FBI director J. Edgar Hoover is briefed not about the recovery of the crash, but about the recovery of the crash.

23

00:02:23,000 --> 00:02:41,000

We have all heard the Roswell story about the Roswell crash in 1947 and claims that bits and pieces of metal, the strange material were picked up and stashed away by the military.

24

00:02:41,000 --> 00:02:45,000

Over the years, people have claimed there are other crashes.

25

00:02:45,000 --> 00:02:57,000

The reality is, if this technology exists and if we could figure out how it works and if we can duplicate it, I suspect that it would be put to military uses and would never see the light of day, at least not in my lifetime.

26

00:02:57,000 --> 00:03:08,000

The truth is that our government and other governments have had retrieval of physics that they don't understand and they still don't understand to this day.

27

00:03:08,000 --> 00:03:21,000

It is waiting for our physics and our engineering to catch up to our even being able to explore and understand the technology we have retrieved.

28

00:03:23,000 --> 00:03:32,000

Is it possible that the United States military really is in possession of one or more crashed extraterrestrial craft?

29

00:03:32,000 --> 00:03:43,000

While the government has denied such claims for decades, one man has come forward to say that he has seen the evidence with his own eyes.

30

00:03:43,000 --> 00:03:59,000

My name's Bob Lazar. I'm known for working at a classified base known as S-4 out in Nevada Desert near Area 51. And there, we reverse engineered alien spacecraft.

31

00:03:59,000 --> 00:04:10,000

In the late 1980s, the U.S. government had recovered alien spacecraft, several of them, and the technology. That's a fact.

32

00:04:11,000 --> 00:04:29,000

In May 1989, Bob Lazar, a physicist and former employee of Los Alamos National Laboratory, first came forward with the incendiary news that the government was conducting experiments at a top secret installation known as Area 51.

33

00:04:30,000 --> 00:04:43,000

He admitted that the government had not only recovered alien spacecraft at Roswell, but also validated the persistent rumors of alien technology being reverse engineered in the Nevada Desert.

34

00:04:44,000 --> 00:04:55,000

Nearly three decades later, in 2018, Bob Lazar once again told his incredible story to documentary filmmaker Jeremy Corbell.

35

00:04:55,000 --> 00:05:04,000

He said it's a secret that needed to be told to the world that his life was in danger and that he was coming forward and wanted to tell it.

36

00:05:04,000 --> 00:05:14,000

Area 51 is known all over the world because of Bob Lazar. Whether people believe his story or not, it put Area 51 on the map and it's never gone away.

37

00:05:15,000 --> 00:05:35,000

For years, skeptics dismissed Area 51 as pure fantasy and attacked Lazar, calling him a fraud and a liar. But in 2013, a Freedom of Information Act request forced the CIA to come clean and admit that Area 51 is real.

38

00:05:36,000 --> 00:05:41,000

What they didn't acknowledge about Area 51 was that it had anything to do with UFOs or extraterrestrials.

39

00:05:43,000 --> 00:05:52,000

What they said was, Area 51 was just a secret base for the U-2 spy plane, which went into operation around 1960.

40

00:05:52,000 --> 00:06:01,000

But now the government is saying, oh yes, we admit it, we've got Area 51, but there's really nothing to see here.

41

00:06:01,000 --> 00:06:13,000

But researchers don't buy that at all. There's so many stories of UFOs and extraterrestrial activity around Area 51 that no one believes what the government is saying.

42

00:06:14,000 --> 00:06:29,000

According to Lazar, the notorious military base located northwest of Las Vegas near Groom Lake had

an even more top secret offshoot buried just to the south, deep under Papus Mountain called S-4.

43

00:06:30,000 --> 00:06:35,000

It was here that he claims the U.S. Navy hid the alien saucers.

44

00:06:36,000 --> 00:06:47,000

They had a hangar hidden in the desert to make it look like it was actually part of the desert terrain. Officially, there's nothing there. They've never had a facility, that's what they'll tell you.

45

00:06:48,000 --> 00:06:55,000

You look at maps, you can see roads that go from Groom Lake down to Papus. So what the heck was that for?

46

00:06:56,000 --> 00:07:06,000

By his account, the Navy became aware of Lazar through his work at Los Alamos, and he was recruited for his experience with particle physics and electronics.

47

00:07:08,000 --> 00:07:22,000

Lazar alleged that he was funneled immediately into Black Project Galileo and was tasked with reverse engineering the propulsion system of a flying saucer housed at S-4 that he referred to as the sport model.

48

00:07:22,000 --> 00:07:36,000

The science was something we were trying to figure out, but we knew how the devices would operate. You know, for instance, the propulsion of the craft. It's a reactionless craft. It's a field propulsion craft.

49

00:07:36,000 --> 00:07:43,000

And what it does is it creates a distortion in space and time in front of it, where space actually bends.

50

00:07:44,000 --> 00:08:00,000

Lazar said that the crucial ingredients make this incredible technology work was an element that did not yet exist on the periodic table, an element he mysteriously referred to as element 115.

51

00:08:01,000 --> 00:08:16,000

At the time Lazar came forward, the periodic table, a list of all known chemical elements arranged by atomic number, electron configuration, and recurring chemical properties contained a total of only 109 elements.

52

00:08:17,000 --> 00:08:32,000

He said that this heavy element was the key to a propulsion system. Element 115 was the fuel by which interstellar travel was made possible.

53

00:08:32,000 --> 00:08:43,000

It's really interesting as you look at the history of this reverse engineering process that Lazar talks about, because there had to be a way to get that technology here in the first place.

54

00:08:44,000 --> 00:08:57,000

Of course, most people think it has something to do with the Roswell crash and other crashes that may have happened. The bottom line is it came from an alien source, and we have to figure out what to do with it to our best benefit.

55

00:08:58,000 --> 00:09:08,000

Is the Navy in possession of not only extraterrestrial spacecraft, but its fuel source, element 115?

56

00:09:12,000 --> 00:09:15,000

July 18, 2017.

57

00:09:16,000 --> 00:09:18,000

Langsburg, Michigan.

58

00:09:21,000 --> 00:09:34,000

While producing his documentary about Bob Lazar and Area 51, independent filmmaker Jeremy Corbell asks if the former government physicist knows of the location of element 115.

59

00:09:36,000 --> 00:09:40,000

Did you ever get a piece of element 115 out of Los Alamos?

60

00:09:41,000 --> 00:09:52,000

If a piece of element 115 did exist, it would provide the first tangible evidence that the U.S. government is in possession of extraterrestrial technology.

61

00:09:52,000 --> 00:09:59,000

Element 115 would be proof positive that he's telling the truth. If you could get a piece of it, it would be proof that it's alien.

62

00:10:00,000 --> 00:10:11,000

The day after the interview, Corbell received word from Lazar that he had been presented a search warrant by the FBI for his business United Nuclear.

63

00:10:11,000 --> 00:10:21,000

According to Lazar, they claimed that they were looking for two-year-old paperwork concerning a customer that ordered some potentially toxic material.

64

00:10:22,000 --> 00:10:33,000

I start getting a bunch of texts. He's being raided, not just by the FBI, by multiple agencies. Forensic collection agents, people mirroring computers.

65

00:10:33,000 --> 00:10:41,000

They turned his business upside down. I've talked to a number of federal agents. Their job is to do operations like this.

66

00:10:41,000 --> 00:10:47,000

You do not go for a full turnover of a place of business for paperwork you make a phone call.

67

00:10:48,000 --> 00:11:00,000

Bob Lazar never provided an answer to the question of whether he was in possession of element 115. But why? Could it be that the FBI was listening in?

68

00:11:00,000 --> 00:11:06,000

If so, did they raid his business in an attempt to find the answer for themselves?

69

00:11:06,000 --> 00:11:13,000

But more importantly, if his story is true, what are the implications for humankind?

70

00:11:14,000 --> 00:11:27,000

Some scientists suggest that if the U.S. government is in possession of the type of technology Bob Lazar described, it could lead to the greatest technological leap in human history.

71

00:11:27,000 --> 00:11:52,000

Moscow, 1963. Astrophysicist Nikolai Kardashev examines an unidentified radio emission coming from a quasar named CTA 102.

72

00:11:52,000 --> 00:12:08,000

It is the first official Soviet effort in the search for extraterrestrial intelligence. And it inspires Kardashev to speculate that alien civilizations could exist that are millions or even billions of years ahead of us.

73

00:12:08,000 --> 00:12:20,000

He creates what is known as the Kardashev Scale, a classification scheme ranking three levels of civilizations based on their ability to harness energy.

74

00:12:22,000 --> 00:12:35,000

A type I civilization has the energy of an entire planet. They might, for example, control the weather. Earthquakes, volcanoes, they can modify them. They have the power of a planet. That's type I.

75

00:12:35,000 --> 00:12:48,000

A type II civilization has mastered the energy of a star. They've colonized the nearby planets very similar to the Federation of Planets like in Star Trek.

76

00:12:48,000 --> 00:13:07,000

Star Trek would be a type II civilization. Then there's type III. Galactic. They roam the galactic space lanes. They harness the power of black holes. That's like the Empire of Star Wars. That would be a type III civilization.

77

00:13:07,000 --> 00:13:20,000

Now on this cosmic scale, what are we? Do we control the Earth? Do we control the stars? Do we control the galaxy? We are type zero. We get energy from dead plants.

78

00:13:20,000 --> 00:13:33,000

Some scientists suggest that if humans were even to ascend to what Kardashev called a type I civilization, our current understanding of the laws of the universe would be dramatically altered.

79

00:13:34,000 --> 00:13:53,000

Now some of my colleagues say, Bah, humbug, the stars are so far away. Aliens can't possibly reach us, but that assumes that they're just type I. What happens if they are a thousand years ahead of us? Or for a type III civilization, a hundred thousand years more advanced than us?

80

00:13:54,000 --> 00:14:09,000

Then new laws of physics began to open up, and all the Bah humbugs have to be thrown out the window because a new scale of physics emerges once you are type II or type III.

81

00:14:10,000 --> 00:14:25,000

There are several theoretical physicists who believe that once humans achieve the status of a type I civilization, evolving to type II and colonizing other planets will happen quickly and will be akin to our leap from ape to human.

82

00:14:27,000 --> 00:14:37,000

If so, could Bob Lazar's accounts of reverse engineered alien spacecraft signal a revolutionary turning point in human evolution?

83

00:14:38,000 --> 00:14:44,000

Perhaps further clues can be found by examining a recent scientific breakthrough.

84

00:14:49,000 --> 00:14:53,000

Dubna, Russia, August 10, 2003.

85

00:14:54,000 --> 00:15:09,000

Russian and U.S. nuclear physicists at the Joint Institute for Nuclear Research shoot a beam of calcium atoms at a target of element 95, a mercurium, inside a particle accelerator.

86

00:15:10,000 --> 00:15:18,000

The collision results in the creation of the heaviest atom ever observed, element 115.

87

00:15:19,000 --> 00:15:30,000

Because element 115 is highly unstable, it exists in stable form for only a fraction of a second, before disintegrating into radioactive fragments.

88

00:15:31,000 --> 00:15:38,000

But could this be the very same element that Bob Lazar said was the fuel source for an extraterrestrial craft?

89

00:15:40,000 --> 00:15:52,000

Some physicists believe that if they can produce a stable form of this newly synthesized element, it has the potential to facilitate the greatest technological leap in human history.

90

00:15:53,000 --> 00:16:00,000

Most of these elements beyond uranium only exist for a fraction of a second. They're there and then they're gone again.

91

00:16:01,000 --> 00:16:10,000

But we physicists think that we can make use of it to create nuclear energy on a much more efficient scale than plutonium.

92

00:16:11,000 --> 00:16:18,000

And that variations of it could be stable and might eventually provide fuel for a starship.

93

00:16:19,000 --> 00:16:32,000

This technology can absolutely instantaneously alter our world beyond our wildest imagination and it could do so so rapidly that it would be a shock to the human consciousness.

94

00:16:33,000 --> 00:16:41,000

So the idea is to study these technologies and try to get parts of it that will benefit humanity.

95

00:16:42,000 --> 00:16:51,000

Mainstream scientists believe stabilizing enough Moscovium to power an intergalactic spacecraft is still decades away.

96

00:16:51,000 --> 00:17:02,000

But the question remains, could this element 115 be the same element 115 that Bob Lazar claims was recovered by the U.S. military?

97

00:17:03,000 --> 00:17:11,000

It has always been theorized that element 115 itself does exist, but we hadn't physically made it ourselves until 2003.

98

00:17:11,000 --> 00:17:22,000

However, the element 115 that Bob Lazar had his hands on, that had a different isotopic ratio that allowed it to be stabilized.

99

00:17:23,000 --> 00:17:35,000

While scientists suggest that it may be possible to create a stable version of Muscovium, there are some who believe this newly synthesized element is simply a decoy.

100

00:17:35,000 --> 00:17:51,000

Could it be that some secret government agency arranged for the introduction of this highly unstable element in order to convince the public that the element 115 Bob Lazar described does not exist?

101

00:17:52,000 --> 00:18:07,000

Whenever somebody makes a bizarre claim that's written off as science fiction, like element 115 was, and then years later the science catches up and it's, oh yeah, he was right.

102

00:18:07,000 --> 00:18:11,000

There is an element 115 and we've just manufactured some.

103

00:18:11,000 --> 00:18:22,000

Well, it's the idea that this is disinformation and they'll be saying it's one of these heavy elements that's only stable for a very short period of time.

104

00:18:22,000 --> 00:18:29,000

That simply can't be the real fuel by which interstellar travel was made possible.

105

00:18:29,000 --> 00:18:33,000

He's making it up, therefore he is not divulging anything classified.

106

00:18:34,000 --> 00:18:46,000

But when this announcement was first made, some people said, wait a minute, if Bob Lazar was right about element 115, what else was he right about?

107

00:18:47,000 --> 00:19:05,000

For ancient astronaut theorists, the fact that an element 115 has now been added to the periodic table and that scientists are already speculating about how it might be used for space travel seems to lead further credence to Bob Lazar's claims.

108

00:19:06,000 --> 00:19:22,000

But if the military really did recover a stabilized version of element 115 from a crashed alien craft, did they come upon it by chance? Or could it have been given to us as part of an extraterrestrial agenda?

109

00:19:23,000 --> 00:19:36,000

October 18, 1947. The Ostrakhan region of the former Soviet Union.

110

00:19:36,000 --> 00:19:42,000

From a military aerospace development lab known as Kapustin Yar.

111

00:19:43,000 --> 00:19:51,000

Scientists successfully launched their first long range ballistic missile, a German A4 rocket.

112

00:19:51,000 --> 00:19:58,000

For the next decade, this will be the Soviet Union's only test site for ballistic missiles.

113

00:19:58,000 --> 00:20:05,000

And the beginning of a space program that put the first satellite and the first human being into space.

114

00:20:06,000 --> 00:20:16,000

Curiously, in 1948, Kapustin Yar was also the site of the Soviet Union's first reported UFO encounter.

115

00:20:16,000 --> 00:20:24,000

On June 19, 1948, a cigar shaped object was detected by Soviet radar.

116

00:20:25,000 --> 00:20:34,000

The silver cigar shaped object appeared over the testing grounds and the Soviets tried to shoot it down.

117

00:20:34,000 --> 00:20:45,000

It's a highly classified case. We don't know exactly what happened, but allegedly they were able to actually shoot this object down.

118

00:20:46,000 --> 00:21:04,000

They found remnants of bodies in it and also technology which was recovered and taken to the local bunker where they kept it allegedly for years and used it to reverse engineer some of the technology.

119

00:21:08,000 --> 00:21:14,000

The Kapustin Yar incident allegedly took place within a year of the famous Roswell event.

120

00:21:16,000 --> 00:21:27,000

Both the CIA and the Soviet MGB Intelligence Agency took interest in what might have crashed and been retrieved in enemy territory.

121

00:21:30,000 --> 00:21:36,000

You had American agents trying to find out what were the objects flying over the Soviet Union.

122

00:21:36,000 --> 00:21:40,000

At the same time, you had the Roswell incident in the United States.

123

00:21:41,000 --> 00:21:49,000

I can tell you that Stalin was very much interested and he had espionage information delivered by his agents to him.

124

00:21:49,000 --> 00:21:57,000

We have proof of that and he questioned Soviet academicians about the veracity of UFO threat to his country.

125

00:22:00,000 --> 00:22:06,000

If stories of UFO crashes and retrievals in both the United States and the Soviet Union are true,

126

00:22:06,000 --> 00:22:12,000

could it have led to a collaboration between the world's only two superpowers?

127

00:22:12,000 --> 00:22:21,000

And considering the fact that the alleged incidents took place within a year of each other, might it have been part of an extraterrestrial agenda?

128

00:22:24,000 --> 00:22:30,000

If there's a motivation of aliens or extraterrestrials in bringing these two superpowers together,

129

00:22:30,000 --> 00:22:38,000

it's to wake us up to recognize that once we get past all the artificial lines and borders on our planet and get out into space,

130

00:22:38,000 --> 00:22:41,000

that is the hope and promise of this collaboration.

131

00:22:46,000 --> 00:22:54,000

If extraterrestrial spacecraft were purposely crashed in both the United States and the Soviet Union more than 70 years ago,

132

00:22:54,000 --> 00:23:00,000

has the study of them led to technological breakthroughs that have been kept hidden from the public?

133

00:23:00,000 --> 00:23:06,000

And where have these alien visitors been during the seven decades that have passed?

134

00:23:07,000 --> 00:23:17,000

Ancient astronaut theorists believe they have been here all along and that recent events suggest they are ready to make their presence known to humanity.

135

00:23:18,000 --> 00:23:20,000

Once again.

136

00:23:24,000 --> 00:23:27,000

November 14th, 2004.

137

00:23:30,000 --> 00:23:33,000

100 miles off the coast of Southern California,

138

00:23:33,000 --> 00:23:41,000

fighter pilots with the USS Nimitz carrier strike group engage incoming an identified flying craft.

139

00:23:41,000 --> 00:23:43,000

Oh my gosh, dude.

140

00:23:43,000 --> 00:23:45,000

Wow, look at that, dude.

141

00:23:45,000 --> 00:23:47,000

Look at this plane.

142

00:23:47,000 --> 00:23:54,000

11 years later, in 2015, US fighter pilots engage yet another UFO.

143

00:23:54,000 --> 00:23:56,000

Oh, I think, dude.

144

00:23:56,000 --> 00:23:58,000

But if there's a...

145

00:23:58,000 --> 00:23:59,000

Who did this thing?

146

00:23:59,000 --> 00:24:01,000

It's rotating.

147

00:24:02,000 --> 00:24:15,000

The accompanying report revealed fighter pilot accounts of the craft descending from altitudes of 60,000 feet to 50 feet in a matter of seconds.

148

00:24:15,000 --> 00:24:20,000

Poverty or staying stationary on radar for short times.

149

00:24:20,000 --> 00:24:23,000

Departing at high velocities and turn rates.

150

00:24:23,000 --> 00:24:26,000

And even cloaking.

151

00:24:26,000 --> 00:24:35,000

The release of what became known as the Gimbal video was one of the most significant disclosures of government encounters with UFOs.

152

00:24:35,000 --> 00:24:41,000

In the description you're talking about maneuvers that would literally crush the spacecraft and kill any occupant.

153

00:24:41,000 --> 00:24:47,000

The only way you can circumvent that is if there's some sort of inertia dampening field around the craft itself.

154

00:24:47,000 --> 00:24:52,000

And that is, as far as we know, a technology that doesn't yet exist on this planet.

155

00:24:52,000 --> 00:24:54,000

My gosh.

156

00:24:55,000 --> 00:25:01,000

Reminiscent of the sport model, Bobbles R claims to have worked on it Area 51S4.

157

00:25:01,000 --> 00:25:06,000

Some of the crafts described in the DOD report were smooth, with no edges.

158

00:25:06,000 --> 00:25:14,000

Uniformly colored with no nacelles, pylons or wings, and were approximately 46 feet in length.

159

00:25:14,000 --> 00:25:23,000

According to Lazar, at the core of its design was a nuclear reactor powered by element 115.

160

00:25:24,000 --> 00:25:30,000

Element 115 was what we would call the fuel that provided the power for the reactor to work.

161

00:25:30,000 --> 00:25:38,000

Element 115 affects gravity. Element 115 produces its own gravitational energy.

162

00:25:38,000 --> 00:25:45,000

The resulting gravity wave creates a distortion in front of it, allowing the craft to slide forward.

163

00:25:45,000 --> 00:25:48,000

And that's how it proceeds.

164

00:25:48,000 --> 00:25:59,000

All of the Lazar's adamant that he observed the sport model in flight, skeptics argue that anti-gravity propulsion is the stuff of science fiction.

165

00:25:59,000 --> 00:26:01,000

Or is it?

166

00:26:05,000 --> 00:26:08,000

Los Angeles, California.

167

00:26:08,000 --> 00:26:12,000

March 9, 2019.

168

00:26:13,000 --> 00:26:18,000

Dissatisfied with mainstream scientific analysis of the DOD gimbal video,

169

00:26:18,000 --> 00:26:30,000

author and ancient astronaut theorist Mike Barra invited astrophysicist and aerospace engineer Dr. Travis Taylor to participate in an evaluation of the DOD's footage.

170

00:26:31,000 --> 00:26:39,000

They are also curious about the potential connection between the extraordinary movements of the UFO craft depicted,

171

00:26:39,000 --> 00:26:50,000

and what Bob Lazar reported as the unique properties of what he is convinced was a captured extraterrestrial spacecraft powered by element 115.

172

00:26:50,000 --> 00:26:57,000

So here's the thing though. If you assume the pilots are telling the truth, and if you assume the DOD is telling the truth,

173

00:26:57,000 --> 00:27:03,000

then don't you have a much stronger case for something unusual being present on these videos?

174

00:27:03,000 --> 00:27:17,000

Yeah, so if you make all those assumptions, then you have this craft in this video that is performing outside of our abilities to manipulate physics with aerospace vehicles today.

175

00:27:17,000 --> 00:27:25,000

Travis Taylor has worked on various programs for the United States Department of Defense and NASA for over 16 years.

176

00:27:25,000 --> 00:27:34,000

I'm an optical scientist, an aerospace engineer, an astronomer, and a physicist, and I've worked in the aerospace and defense industry since I was 17 years old.

177

00:27:34,000 --> 00:27:43,000

And it's intriguing that a lot of people are saying that this gimbal video is something like what Bob Lazar claims to have worked on.

178

00:27:43,000 --> 00:27:53,000

Mike Barra has written numerous books about U.S. and international space programs, and has done extensive research into aviation technology.

179

00:27:53,000 --> 00:28:01,000

The thing to me that's really interesting about this video is the fact that it actually encourages people to believe that these are alien spacecraft.

180

00:28:01,000 --> 00:28:04,000

Now, why would the government want to do that?

181

00:28:04,000 --> 00:28:14,000

For Mike and Travis, the first step in analyzing the DOD footage is to determine whether it is genuine or could have been fabricated.

182

00:28:14,000 --> 00:28:18,000

To assist them in this effort, they have turned to a master of illusion.

183

00:28:18,000 --> 00:28:23,000

Hollywood visual effects supervisor Sam Edwards.

184

00:28:23,000 --> 00:28:24,000

How are you doing, Travis?

185

00:28:24,000 --> 00:28:25,000

Well, thanks for having us.

186

00:28:25,000 --> 00:28:26,000

Yeah, it's great.

187

00:28:26,000 --> 00:28:27,000

Yeah, come on, after you.

188

00:28:27,000 --> 00:28:28,000

This way?

189

00:28:28,000 --> 00:28:29,000

Yeah, perfect.

190

00:28:29,000 --> 00:28:30,000

Here's the screening room.

191

00:28:30,000 --> 00:28:31,000

Wow.

192

00:28:31,000 --> 00:28:32,000

Wow, this is great.

193

00:28:32,000 --> 00:28:33,000

Yeah.

194

00:28:33,000 --> 00:28:34,000

Have a seat anywhere?

195

00:28:34,000 --> 00:28:47,000

So, do you think that you and your team could go and recreate a video that looked authentic like it came from, you know, the F-18 gun camera from, you know, 2004?

196

00:28:47,000 --> 00:28:51,000

Listen, I'm in the visual effects business, right?

197

00:28:51,000 --> 00:28:54,000

And we don't ever say no.

198

00:28:54,000 --> 00:28:55,000

Right, right.

199

00:28:55,000 --> 00:28:56,000

Right?

200

00:28:56,000 --> 00:29:02,000

But you know, the joke is about the moon landing is, it must be real because Hollywood would never make something so boring.

201

00:29:02,000 --> 00:29:03,000

Right?

202

00:29:03,000 --> 00:29:04,000

Right?

203

00:29:04,000 --> 00:29:08,000

So, there's no mediation at all to this image, right?

204

00:29:08,000 --> 00:29:10,000

It couldn't be more dull.

205

00:29:10,000 --> 00:29:14,000

It's just technically this is in there and that's in there.

206

00:29:14,000 --> 00:29:16,000

There's nobody's artistic vision at all.

207

00:29:16,000 --> 00:29:19,000

That to me is one of the best arguments right there for it.

208

00:29:19,000 --> 00:29:21,000

That makes perfect sense.

209

00:29:21,000 --> 00:29:36,000

While there is no way to determine for certain that the video wasn't fabricated based on what they are seeing, as well as the pilot's eyewitness corroboration, Mike, Travis and Sam are convinced that the footage is genuine.

210

00:29:36,000 --> 00:29:50,000

If true, the implications are profound as even some military personnel are of the opinion that the maneuvers displayed by the craft in the gimbal video resemble no known man-made technology.

211

00:29:50,000 --> 00:29:54,000

So now the next question is, is the origin of that advanced proportion?

212

00:29:54,000 --> 00:29:55,000

Right.

213

00:29:55,000 --> 00:29:58,000

Is it man-made advanced proportion or is it extraterrestrial?

214

00:29:58,000 --> 00:30:02,000

Let's try to reverse engineer what's there and understand what we're looking at.

215

00:30:02,000 --> 00:30:07,000

So yeah, it's air to air footage and I thought that was kind of cool.

216

00:30:07,000 --> 00:30:13,000

I stabilized out some of the camera motion so we could kind of get a better feel for its trajectory.

217

00:30:13,000 --> 00:30:15,000

Oh, okay.

218

00:30:15,000 --> 00:30:16,000

Wow, yeah.

219

00:30:16,000 --> 00:30:17,000

That's cool.

220

00:30:17,000 --> 00:30:19,000

That tells us how much it's actually moving.

221

00:30:19,000 --> 00:30:23,000

Which doesn't seem to me to be supersonic or anything like it.

222

00:30:23,000 --> 00:30:29,000

If you look at that, it looks to me like there's structure in a couple of places.

223

00:30:29,000 --> 00:30:32,000

Now we're below it, right?

224

00:30:32,000 --> 00:30:37,000

Something right in here and here and then something here.

225

00:30:37,000 --> 00:30:50,000

The interesting thing here is if you were looking at an SR-71 and it was below you, you're looking down at it, the wings would look sort of disc shaped like that and there would be a tail and there would be a nose structure and these would be your wings.

226

00:30:50,000 --> 00:30:55,000

If that's a wing then what's going on now?

227

00:30:55,000 --> 00:30:58,000

Right, it's still traveling in the same direction.

228

00:30:58,000 --> 00:31:00,000

It looks a lot like a top, doesn't it?

229

00:31:00,000 --> 00:31:05,000

It doesn't really coincide with the aerodynamics of a regular airplane.

230

00:31:05,000 --> 00:31:09,000

You look at fighter pilots, they can roll, they can pitch, they can crab, they can yaw.

231

00:31:09,000 --> 00:31:13,000

They can do all sorts of things to an airplane to make it look unusual.

232

00:31:13,000 --> 00:31:27,000

I hear what you're saying and we made a CG model and I kind of hand tracked it to sort of match its motion so we could kind of get a feel for what some of its dimensions are.

233

00:31:27,000 --> 00:31:34,000

Yeah, it's interesting if it's looking straight on like your model there, your model matches to it pretty good.

234

00:31:34,000 --> 00:31:38,000

Well, let me show you something else that catches my eye gentlemen.

235

00:31:38,000 --> 00:31:50,000

What seems odd to me, this kind of light that follows behind the craft, there's no such thing as a light source that follows around behind an aircraft.

236

00:31:50,000 --> 00:31:54,000

Right, because it's clearly there now that you pointed, I can't believe I didn't see it before.

237

00:31:54,000 --> 00:32:04,000

So the system is in black pot mode, what that tells me if black is hot, there's a cold region, a cold region around the vehicle.

238

00:32:04,000 --> 00:32:09,000

The thing about it is a cold region around a propulsion system is odd.

239

00:32:09,000 --> 00:32:14,000

You typically are going to be warm coming out of the exhaust or near your engine or whatever.

240

00:32:14,000 --> 00:32:17,000

Doesn't that argue that it's not a conventional propulsion system?

241

00:32:18,000 --> 00:32:21,000

## The New York Air Force

242

00:32:23,000 --> 00:32:38,000

Ancient astronaut theorist Mike Barra, an aerospace engineer Travis Taylor, are meeting with Hollywood visual effects supervisor Sam Edwards in order to examine footage of a UFO taken by a US Navy pilot.

243

00:32:38,000 --> 00:32:50,000

They are also curious about the possible connections between the UFO craft depicted in the footage and the reported properties of the mysterious element known as 115.

244

00:32:50,000 --> 00:32:58,000

On my monitor, I'm taking that broader dynamic range image and I'm looking at different parts of the spectrum.

245

00:32:58,000 --> 00:33:02,000

I mean, you can see that field right around that thing.

246

00:33:02,000 --> 00:33:03,000

Yeah, exactly.

247

00:33:03,000 --> 00:33:04,000

It's not jet engines.

248

00:33:04,000 --> 00:33:15,000

Look, if we make the assumption that it's not the camera phenomena, that it is something to do with the propulsion system, then it's describing to me something like an Alcubierre bubble.

249

00:33:17,000 --> 00:33:28,000

An Alcubierre bubble is a theoretical model for transporting a spaceship by contracting space in front of it and expanding space behind it.

250

00:33:28,000 --> 00:33:40,000

A bubble of curved space would form around the craft and in an atmosphere like that of Earth, the air temperature inside the bubble would be significantly cooler than the surrounding atmospheric air.

251

00:33:41,000 --> 00:33:45,000

So much cooler that an infrared camera would detect it.

252

00:33:45,000 --> 00:33:52,000

This makes it possible for the craft to travel faster than the speed of light without breaking any of the laws of physics.

253

00:33:53,000 --> 00:33:54,000

Here's the thing.

254

00:33:54,000 --> 00:34:00,000

This is exactly the technology that Bob Lazar talked about with his sport model from Area 51.

255

00:34:00,000 --> 00:34:07,000

What he said was happening was that you're simply distorting the gravity field like this so you can kind of surf along this wave.

256

00:34:08,000 --> 00:34:17,000

And if you're dealing with something like, let's say, Element 115, if that really exists, if you're dealing with some sort of field propulsion, it's going to have a little bit of a halo around it.

257

00:34:19,000 --> 00:34:21,000

What Sam pointed out is absolutely extraordinary.

258

00:34:21,000 --> 00:34:25,000

What I'm seeing is this bubble around the craft.

259

00:34:25,000 --> 00:34:29,000

I'm willing to call it a craft now because I don't think it's just a drone anymore.

260

00:34:29,000 --> 00:34:34,000

I'm looking at something that points to a really, really extraordinary propulsion system.

261

00:34:34,000 --> 00:34:39,000

That right there is clearly something there if it's not a camera artifact.

262

00:34:40,000 --> 00:34:43,000

Well, the lights definitely rotate with the shape, right?

263

00:34:43,000 --> 00:34:44,000

Yeah.

264

00:34:44,000 --> 00:34:46,000

Which makes you think it's not a camera artifact.

265

00:34:47,000 --> 00:34:57,000

If this were just an artifact of the camera technology, I would have expected the halo to have looked slightly different.

266

00:34:57,000 --> 00:35:05,000

The fact that there's strange little striations from it that are turning when the vehicle turns, it doesn't look like it's a camera artifact.

267

00:35:07,000 --> 00:35:10,000

Sam, until I saw this, I had a completely different opinion of this video.

268

00:35:10,000 --> 00:35:11,000

Oh, nice.

269

00:35:11,000 --> 00:35:24,000

Seeing the video and the analysis that we did today with Sam, it's opened my mind to accept that it's possible that this is a vehicle that might function a lot like the stories that Bobbler's are told.

270

00:35:24,000 --> 00:35:29,000

This does have similarities that are uncanny.

271

00:35:30,000 --> 00:35:33,000

My skin is tingling from this.

272

00:35:37,000 --> 00:35:38,000

It's rotating.

273

00:35:39,000 --> 00:35:53,000

If the bubble of cold air enveloping the craft in the gimbal video is the same phenomenon exhibited by Bobbler's are sport model, could it be that the US military has mastered the element 115 propulsion system?

274

00:35:54,000 --> 00:35:59,000

It acts precisely how Bobbler's are described the abilities of the sport model.

275

00:35:59,000 --> 00:36:11,000

And by the way, I have spoken to multiple Defense Department sources who are familiar with the release of that video and they believe that it's because of special materials that that craft can do what it did.

276

00:36:11,000 --> 00:36:16,000

What the special materials are, I don't know, but it sure sounds like element 115 to me.

277

00:36:17,000 --> 00:36:23,000

But if the DoD is in possession of such extraordinary technology, why is it being kept a secret?

278

00:36:24,000 --> 00:36:28,000

Could other world powers have also recovered similar technology?

279

00:36:29,000 --> 00:36:32,000

And will the public ever know the full truth?

280

00:36:33,000 --> 00:36:38,000

In my mind, there is a deep state and that deep state is essentially the military.

281

00:36:38,000 --> 00:36:46,000

And what makes that deep state ultimately is the incredible technology that our military has.

282

00:36:48,000 --> 00:36:56,000

And in fact, I believe it's quite possible that we're already exploring Mars and perhaps other planets.

283

00:36:56,000 --> 00:37:00,000

And the military is keeping it a secret from us.

284

00:37:02,000 --> 00:37:06,000

There's the possibility that this is part of an acclimatization program.

285

00:37:07,000 --> 00:37:15,000

The sort of drip feeding of the truth out to us, a declassified video here, a document there.

286

00:37:16,000 --> 00:37:19,000

And maybe Bobbler's are fits into that story.

287

00:37:19,000 --> 00:37:29,000

With the Pentagon's release of top secret UFO videos, along with increased scientific cooperation between world powers,

288

00:37:29,000 --> 00:37:38,000

and the addition of element 115 to the periodic table, is the public being slowly prepared to enter an entirely new reality?

289

00:37:39,000 --> 00:37:47,000

Ancient astronaut theorists say yes, and suggest that if the US government really is in possession of alien technology,

290

00:37:47,000 --> 00:37:52,000

and even more important question is, just where is it taking us?

291

00:37:52,000 --> 00:37:54,000

The US

292

00:38:03,000 --> 00:38:05,000

Dubna Russia

293

00:38:05,000 --> 00:38:08,000

December 26, 2018

294

00:38:09,000 --> 00:38:18,000

An international team of physicists at the Flareov Laboratory successfully fired the DC-280 cyclotron particle accelerator for the first time.

295

00:38:19,000 --> 00:38:27,000

Its beam is the most powerful ever recorded among the world's top nuclear facilities.

296

00:38:29,000 --> 00:38:37,000

The physicists will use the new facility to work on stabilizing super heavy metals, like element 115,

297

00:38:39,000 --> 00:38:43,000

so that their incredible energy potential can be harnessed.

298

00:38:44,000 --> 00:38:53,000

The Flareov Laboratory has been in the forefront of nuclear particle physics research, and on January 29, 2019,

299

00:38:53,000 --> 00:39:00,000

a TASS news agency came out with an announcement that this year there will be breakthroughs,

300

00:39:00,000 --> 00:39:07,000

because they will use many more atoms than before when they discovered element 114 and 115.

301

00:39:07,000 --> 00:39:13,000

And definitely there is much more effort that's going on in Dubna today than we know about.

302

00:39:16,000 --> 00:39:23,000

It's center of excellence when it comes to research into super heavy elements,

303

00:39:23,000 --> 00:39:33,000

and whenever you're dealing with these super heavy elements, you are dealing with something that has the capability to generate large amounts of energy.

304

00:39:34,000 --> 00:39:39,000

And again, this is what Bob Lazar said was the ultimate secret of UFO,

305

00:39:39,000 --> 00:39:44,000

so how long will it be before we are out there among the stars?

306

00:39:44,000 --> 00:39:46,000

And I think that's where we go next.

307

00:39:47,000 --> 00:39:52,000

We are at an interesting time in the development of our species.

308

00:39:53,000 --> 00:39:59,000

If the government has secretly been attempting to reverse engineer a stabilized version of element 115,

309

00:39:59,000 --> 00:40:05,000

recovered from an alien craft, will these new experiments accelerate that effort?

310

00:40:06,000 --> 00:40:16,000

I think we've got technology, bits and pieces, maybe an entire craft, or more than one craft, from somewhere else, stuff that we didn't make.

311

00:40:16,000 --> 00:40:22,000

The reality is, if this technology exists, and if we could figure out how it works, and if we can duplicate it,

312

00:40:22,000 --> 00:40:26,000

it has limitless potential that would propel the humanity to a new level.

313

00:40:27,000 --> 00:40:33,000

This technology would alter the basic fabric of how we relate to the external world.

314

00:40:33,000 --> 00:40:38,000

If you can produce a gravity wave, you've won. That's it.

315

00:40:38,000 --> 00:40:42,000

The entire landscape of your reality changes.

316

00:40:42,000 --> 00:40:50,000

It is a fearsome technology, a powerful technology, and with great power comes great responsibility.

317

00:40:51,000 --> 00:40:57,000

The idea that extraterrestrials are giving us technology perhaps is an exciting idea.

318

00:40:57,000 --> 00:41:05,000

But we have to wonder just what interactions we really are having with extraterrestrials and what they think of us.

319

00:41:06,000 --> 00:41:13,000

And I like to think that the space programs of our own military and of other countries as well,

320

00:41:13,000 --> 00:41:22,000

that we are going to work together, that our own efforts to go into space and other planets are for peaceful purposes,

321

00:41:22,000 --> 00:41:29,000

and not for ones of conquering other civilizations or taking other people's resources.

322

00:41:29,000 --> 00:41:34,000

And I think that the extraterrestrials too are watching us for those very reasons.

323

00:41:35,000 --> 00:41:45,000

Are we on the verge of harnessing the awesome power of element 115 and embarking on a journey unlike humanity has ever seen?

324

00:41:45,000 --> 00:41:56,000

Perhaps as we reach this critical next step in human evolution, we will finally know the full truth about both our history and our origins

325

00:41:56,000 --> 00:42:02,000

and begin the next chapter of mankind in the cosmos.

326

00:42:04,000 --> 00:42:09,000
