

1

00:00:00,000 --> 00:00:05,000

Giant volcanic rock walls rise up from the sea.

2

00:00:05,000 --> 00:00:09,000

We consider the sheer scale of the nanodual construction site.

3

00:00:09,000 --> 00:00:11,000

It's mind-boggling.

4

00:00:11,000 --> 00:00:16,000

Just how were these massive structures built and why?

5

00:00:16,000 --> 00:00:21,000

Ancient astronaut theorists, Giorgio Succi and David Chondris

6

00:00:21,000 --> 00:00:26,000

embarked on an incredible journey to these remote ruins in search of answers.

7

00:00:26,000 --> 00:00:28,000

Wow, look at this.

8

00:00:29,000 --> 00:00:37,000

250 million tons of basalt just piled up and in artificial islands.

9

00:00:37,000 --> 00:00:42,000

Will they solve the mystery of one of the world's most back-lane sites?

10

00:00:42,000 --> 00:00:44,000

It should be getting close to the wall.

11

00:00:44,000 --> 00:00:48,000

So as soon as you get close to those stones, it disconnects.

12

00:00:48,000 --> 00:00:49,000

That's so strange.

13

00:00:49,000 --> 00:00:53,000

The more you know, the more mysterious it gets.

14

00:00:53,000 --> 00:00:59,000

There is a doorway in the universe.

15

00:00:59,000 --> 00:01:04,000

Beyond it is the promise of truth.

16

00:01:04,000 --> 00:01:09,000

It demands we question everything we have ever been taught.

17

00:01:09,000 --> 00:01:13,000

The evidence is all around us.

18

00:01:13,000 --> 00:01:17,000

The future is right before our eyes.

19

00:01:17,000 --> 00:01:20,000

We are not alone.

20

00:01:20,000 --> 00:01:24,000

We have never been alone.

21

00:01:32,000 --> 00:01:37,000

The Pacific Ocean, January 1836.

22

00:01:37,000 --> 00:01:43,000

The British-cutter Lantan arrives at the shores of the Micronesian island of Pongpei.

23

00:01:43,000 --> 00:01:48,000

It is one of the first European expeditions to reach this remote landmass,

24

00:01:48,000 --> 00:01:54,000

which is located roughly 2,500 miles northeast of Australia.

25

00:01:54,000 --> 00:01:58,000

The ship surgeon, identified only as Dr. Campbell,

26

00:01:58,000 --> 00:02:04,000

writes about a megalithic site that stands off Pongpei's southeastern shore.

27

00:02:04,000 --> 00:02:10,000

He speculates that the massive structures are as old as the Egyptian pyramids

28

00:02:10,000 --> 00:02:13,000

and must have been the work of great men.

29

00:02:13,000 --> 00:02:17,000

It is one of the earliest accounts of what will later be known

30

00:02:17,000 --> 00:02:20,000

as Non-Middle.

31

00:02:20,000 --> 00:02:24,000

Non-Middle is this amazing construction.

32

00:02:24,000 --> 00:02:27,000

It's a full-on city.

33

00:02:27,000 --> 00:02:31,000

When pilots during World War II would fly over that part of the Pacific,

34

00:02:31,000 --> 00:02:37,000

they would look out their windows and they would see what essentially was described as the Venice of the Pacific.

35

00:02:37,000 --> 00:02:40,000

So that became one of its nicknames.

36

00:02:40,000 --> 00:02:45,000

Today, much of Non-Middle is hidden beneath dense vegetation,

37

00:02:45,000 --> 00:02:51,000

making it appear as though the edge of Pongpei extends further out into the ocean.

38

00:02:51,000 --> 00:02:58,000

But in reality, it is an 11-square-mile complex consisting of more than 100 man-made islets,

39

00:02:58,000 --> 00:03:02,000

standing atop a submerged coral reef.

40

00:03:02,000 --> 00:03:10,000

Archaeologists estimate that to construct the site, the builders used 250 million tons of basalt.

41

00:03:10,000 --> 00:03:17,000

A black rock that forms when basalt lava from a volcano cools and becomes solid.

42

00:03:17,000 --> 00:03:23,000

Some of the basalt logs and blocks weigh upwards of 50 tons.

43

00:03:27,000 --> 00:03:33,000

Nanmedal is this mysterious island in the middle of nowhere.

44

00:03:34,000 --> 00:03:41,000

You have at least 600 miles in every direction where there is absolutely nothing.

45

00:03:41,000 --> 00:03:47,000

And so to find this incredible megalithic structure there,

46

00:03:47,000 --> 00:03:51,000

you have to wonder why that place existed in the first place.

47

00:03:51,000 --> 00:03:58,000

When we consider the sheer scale of the Nanmedal construction site, it's mind-boggling.

48

00:03:58,000 --> 00:04:05,000

Why would they need this scale of construction on a tiny island in the middle of nowhere?

49

00:04:05,000 --> 00:04:11,000

It is a complete mystery who exactly constructed it and when.

50

00:04:12,000 --> 00:04:18,000

Historians have attributed the megalithic construction to the Sondallur dynasty.

51

00:04:18,000 --> 00:04:26,000

The Empire ruled over Nanmedal for approximately 500 years from 1100 to 1628 AD.

52

00:04:26,000 --> 00:04:32,000

But speculation that they were the builders of Nanmedal has been the subject of controversy.

53

00:04:32,000 --> 00:04:38,000

As many believe that an accurate dating of the structures is virtually impossible to determine.

54

00:04:38,000 --> 00:04:42,000

It's difficult really to put dates on Nanmedal.

55

00:04:42,000 --> 00:04:49,000

Currently mainstream archaeologists are giving the city a date of about 1100 AD.

56

00:04:49,000 --> 00:04:55,000

And they're coming up with that date by dating some of the coral rubble that's there.

57

00:04:55,000 --> 00:05:04,000

What I think of there is that this is the date of the last repair work on this amazing city.

58

00:05:04,000 --> 00:05:09,000

And that the city itself was actually built much earlier than that.

59

00:05:09,000 --> 00:05:14,000

The thing is they left no records, they left no literature, no history, no art.

60

00:05:14,000 --> 00:05:19,000

Nothing that says that they had these advanced technologies or concepts like mathematics

61

00:05:19,000 --> 00:05:23,000

that would enable them to build such an archaeological wonder.

62

00:05:23,000 --> 00:05:28,000

So it leaves this great mystery of who actually constructed Nanmedal and why.

63

00:05:29,000 --> 00:05:35,000

Baltimore, Maryland, September 16th, 2019.

64

00:05:35,000 --> 00:05:42,000

A team of scientists backed by the U.S. Department of State Ambassadors Fund for Cultural Preservation

65

00:05:42,000 --> 00:05:49,000

completes a six-month project to conduct the first LIDAR survey of this world heritage site.

66

00:05:49,000 --> 00:05:55,000

LIDAR utilizes laser wave pulses to create a 3D representation of an area

67

00:05:55,000 --> 00:06:01,000

and allows unprecedented access to otherwise impenetrable locations.

68

00:06:01,000 --> 00:06:11,000

This recent LIDAR survey at Temwin Island at Nanmedal indicates that there was a specially designed irrigation system

69

00:06:11,000 --> 00:06:18,000

that could support people on this relatively small island adjacent to Panape

70

00:06:18,000 --> 00:06:21,000

and then Nanmedal is built there too.

71

00:06:21,000 --> 00:06:28,000

So who then would have built such a sophisticated irrigation system

72

00:06:28,000 --> 00:06:32,000

which no one knew about until this recent LIDAR survey?

73

00:06:32,000 --> 00:06:37,000

And it doesn't seem that the so-called builders, the Sautilares, were the builders of this.

74

00:06:37,000 --> 00:06:43,000

While the study continues to credit the construction of Nanmedal to the Sautilares,

75

00:06:43,000 --> 00:06:49,000

many researchers suggest that the oral history of the people of Panape contradicts this notion.

76

00:06:49,000 --> 00:06:55,000

This recent LIDAR survey is sensational because the big mystery about Nanmedal was always

77

00:06:55,000 --> 00:06:58,000

where did the people get their food from or their water?

78

00:06:58,000 --> 00:07:02,000

And according to the local population, it had to be boated in.

79

00:07:02,000 --> 00:07:09,000

But if you now look at this new LIDAR survey, which suggests that there is an artificial irrigation system on Temwin,

80

00:07:09,000 --> 00:07:13,000

well, they could have collected the water right there,

81

00:07:13,000 --> 00:07:21,000

and this leads me to think that the Sautilares appropriated whatever was at Temwin Island and Nanmedal.

82

00:07:21,000 --> 00:07:29,000

Does the LIDAR survey prove that the conventional theories crediting the Sautilares as the creators of Nanmedal are wrong?

83

00:07:29,000 --> 00:07:34,000

But if so, who built Nanmedal and why?

84

00:07:35,000 --> 00:07:39,000

September 2019

85

00:07:41,000 --> 00:07:45,000

Intrigued by the results of the recent LIDAR survey,

86

00:07:45,000 --> 00:07:53,000

ancient astronaut theorists, Georgiosuchilos and David Childress embark on a journey to the remote island of Panape.

87

00:07:53,000 --> 00:08:00,000

They are hoping to find evidence that could shed new light on what has become a centuries-old mystery.

88

00:08:00,000 --> 00:08:01,000

Here we are.

89

00:08:01,000 --> 00:08:02,000

It's exciting.

90

00:08:02,000 --> 00:08:08,000

This expedition is the first for Georgios, but David's fifth visit to the megalithic site.

91

00:08:08,000 --> 00:08:09,000

All right, hello.

92

00:08:09,000 --> 00:08:10,000

Hi, Gus.

93

00:08:10,000 --> 00:08:11,000

This is our guy.

94

00:08:11,000 --> 00:08:12,000

How are you, Gus?

95

00:08:12,000 --> 00:08:13,000

Welcome to see you.

96

00:08:13,000 --> 00:08:15,000

At Mangrove Bay on the island's north shore,

97

00:08:15,000 --> 00:08:21,000

Georgios and David meet up with Mike Rinesha's National Historic Preservation Officer, Gus Kohler.

98

00:08:21,000 --> 00:08:22,000

So, ready to go?

99

00:08:22,000 --> 00:08:23,000

Let's get going, yeah.

100

00:08:23,000 --> 00:08:27,000

From here, they will travel by boat to Nanmedal.

101

00:08:27,000 --> 00:08:32,000

Nanmedal is one of the last ancient mysteries that I have yet to see,

102

00:08:32,000 --> 00:08:35,000

and it's been 30 years since I've wanted to come here,

103

00:08:35,000 --> 00:08:41,000

and I cannot wait to see what awaits us and what better guide than David Childress?

104

00:08:41,000 --> 00:08:45,000

Nanmedal is the eighth wonder of the world.

105

00:08:45,000 --> 00:08:49,000

It's one of the most amazing megalithic sites that I've ever seen,

106

00:08:49,000 --> 00:08:51,000

but it's very little known.

107

00:08:51,000 --> 00:08:53,000

The archaeologists who come here...

108

00:08:53,000 --> 00:08:54,000

What do they say?

109

00:08:54,000 --> 00:08:55,000

Yeah, what they...

110

00:08:55,000 --> 00:08:58,000

How do they say it was made, Nanmedal?

111

00:08:58,000 --> 00:09:01,000

Everyone has their own theory.

112

00:09:01,000 --> 00:09:07,000

If you imagine, if you carry it, you know, it's very uneven terrain.

113

00:09:07,000 --> 00:09:09,000

You've got mountains, you've got valleys.

114

00:09:09,000 --> 00:09:10,000

Very rugged.

115

00:09:10,000 --> 00:09:11,000

Very rugged.

116

00:09:11,000 --> 00:09:12,000

Very rugged.

117

00:09:12,000 --> 00:09:17,000

And then the question of putting it or having it hung underneath a boat...

118

00:09:17,000 --> 00:09:21,000

I mean, we've tried to carry locks, small ones on rafts,

119

00:09:21,000 --> 00:09:23,000

tried to imitate out...

120

00:09:23,000 --> 00:09:24,000

It's just impossible.

121

00:09:24,000 --> 00:09:25,000

They can't do it.

122

00:09:25,000 --> 00:09:26,000

Really?

123

00:09:26,000 --> 00:09:30,000

So you have actually tried to do it the way that mainstream archaeology suggests,

124

00:09:30,000 --> 00:09:32,000

and it didn't quite work?

125

00:09:32,000 --> 00:09:34,000

Not with the rafts that we had.

126

00:09:34,000 --> 00:09:39,000

According to mainstream scholars, bamboo rafts transported the blocks used

127

00:09:39,000 --> 00:09:44,000

in the construction of Nanmedal, but Gus Kohler does not agree.

128

00:09:44,000 --> 00:09:49,000

As far as he's concerned, this method has repeatedly been tested,

129

00:09:49,000 --> 00:09:54,000

and has failed, even when the smallest of basalt columns are used.

130

00:09:54,000 --> 00:10:00,000

One of the most recent attempts was made for a television documentary in 1995.

131

00:10:00,000 --> 00:10:06,000

After several attempts, they were unable to demonstrate how this would be done,

132

00:10:06,000 --> 00:10:09,000

even with smaller blocks weighing only one ton.

133

00:10:11,000 --> 00:10:16,000

After a 90-minute boat ride, David and Giorgio get their first look

134

00:10:16,000 --> 00:10:20,000

at the massive basalt walls of Nanmedal.

135

00:10:20,000 --> 00:10:21,000

All right, so here we go.

136

00:10:21,000 --> 00:10:24,000

Here's the massive sea wall here, but it's just huge.

137

00:10:24,000 --> 00:10:29,000

Look at these giant stones, how they're piled up here.

138

00:10:29,000 --> 00:10:32,000

But it's just huge.

139

00:10:32,000 --> 00:10:39,000

It's just 250 million tons of basalt just piled up

140

00:10:39,000 --> 00:10:43,000

and into giant walls and artificial islands.

141

00:10:43,000 --> 00:10:45,000

It boggles the mind.

142

00:10:45,000 --> 00:10:47,000

It's just so incredible.

143

00:10:47,000 --> 00:10:50,000

Some of these blocks are just massive, massive.

144

00:10:50,000 --> 00:10:52,000

Huge.

145

00:10:53,000 --> 00:10:59,000

The first time I laid eyes on Nanmedal, I thought it was prehistoric.

146

00:10:59,000 --> 00:11:07,000

This place potentially is thousands of years older than what mainstream archaeology suggests.

147

00:11:08,000 --> 00:11:11,000

Nanmedal astounds you when you see it,

148

00:11:11,000 --> 00:11:17,000

but most archaeologists really don't want to open this Pandora's box

149

00:11:17,000 --> 00:11:26,000

of what is there on this island because it's not easily explained by mainstream archaeology.

150

00:11:27,000 --> 00:11:33,000

Rufino Mauricio, the director of the Federal States of Micronesia Office of National Archives,

151

00:11:33,000 --> 00:11:40,000

is among many who believe that the secret to Nanmedal's origins may not be a terrestrial one.

152

00:11:41,000 --> 00:11:46,000

The existence of Nanmedal itself continues to pass on people

153

00:11:46,000 --> 00:11:50,000

because it welcomes all kinds of possibilities,

154

00:11:50,000 --> 00:11:57,000

including possibilities of people from the outer space influencing what was built here.

155

00:11:58,000 --> 00:12:00,000

People from outer space?

156

00:12:01,000 --> 00:12:05,000

It is a question that Giorgio and David are determined to answer.

157

00:12:05,000 --> 00:12:08,000

And as the first step in their investigation,

158

00:12:08,000 --> 00:12:11,000

they are eager to make a closer examination of the site

159

00:12:11,000 --> 00:12:15,000

and investigate the details of its baffling construction.

160

00:12:21,000 --> 00:12:24,000

So here we're just on the edge of Tamuen Island.

161

00:12:24,000 --> 00:12:26,000

Amazing.

162

00:12:26,000 --> 00:12:29,000

After docking on Pompey's Tamuen Island,

163

00:12:29,000 --> 00:12:34,000

ancient astronaut theorists Giorgio Sucasos and David Chondris

164

00:12:34,000 --> 00:12:38,000

are now approaching the ancient ruins of Nanmedal by land.

165

00:12:39,000 --> 00:12:45,000

With them is Micronesia's National Historic Preservation Officer, Gus Coler.

166

00:12:45,000 --> 00:12:47,000

Okay, we're going to make a left up there.

167

00:12:47,000 --> 00:12:49,000

A left up here, okay.

168

00:12:50,000 --> 00:12:51,000

This is it, huh?

169

00:12:51,000 --> 00:12:53,000

This is it.

170

00:12:54,000 --> 00:12:59,000

To get an expert opinion on the construction of this staggering megalithic complex,

171

00:12:59,000 --> 00:13:05,000

they have enlisted UCLA Professor of Structural Engineering, Dr. Henry Burton.

172

00:13:06,000 --> 00:13:10,000

I'm a structural engineer, so I think about how to design things

173

00:13:10,000 --> 00:13:14,000

to make sure that they move through structures in a way that they're stable.

174

00:13:14,000 --> 00:13:16,000

They're okay back there.

175

00:13:16,000 --> 00:13:21,000

So my role is to bring a modern perspective on the structures that we're seeing here in Micronesia.

176

00:13:23,000 --> 00:13:25,000

Wow, look at this.

177

00:13:25,000 --> 00:13:27,000

Amazing, huh?

178

00:13:27,000 --> 00:13:28,000

That's amazing.

179

00:13:28,000 --> 00:13:30,000

I mean, look at some of those.

180

00:13:30,000 --> 00:13:31,000

I know.

181

00:13:31,000 --> 00:13:32,000

Look at that guy.

182

00:13:33,000 --> 00:13:38,000

So here's this huge wall here, full of prismatic basalt.

183

00:13:38,000 --> 00:13:41,000

How would you build that then today?

184

00:13:41,000 --> 00:13:45,000

Well, you'd certainly need cranes, I can tell you that.

185

00:13:45,000 --> 00:13:51,000

Even for some of these smaller blocks you're talking about on the order of tens of tons.

186

00:13:52,000 --> 00:13:56,000

So how would you build this if you didn't have any cranes?

187

00:13:57,000 --> 00:14:04,000

Well, that I can't, I can't, yeah, I can't think of any way that you'd be able to build this.

188

00:14:06,000 --> 00:14:10,000

Because one would argue perhaps this was done with some sort of scaffolding,

189

00:14:10,000 --> 00:14:14,000

but wouldn't you need really strong trees?

190

00:14:14,000 --> 00:14:20,000

And they don't really have strong trees here to build that type of scaffolding.

191

00:14:20,000 --> 00:14:22,000

Yeah, it's a mystery to me.

192

00:14:23,000 --> 00:14:26,000

I can't imagine how it could be built without cranes.

193

00:14:26,000 --> 00:14:32,000

So Gus, what is your tradition of how they built these walls?

194

00:14:32,000 --> 00:14:36,000

Well, according to our oral history, these rocks came from the north,

195

00:14:36,000 --> 00:14:39,000

we're in the Saudis, this area in the Saudis.

196

00:14:39,000 --> 00:14:45,000

And in fact, the recent studies have been able to collaborate that 40% of these rocks actually came from the north.

197

00:14:45,000 --> 00:14:48,000

And that is distance wise how long, how far?

198

00:14:48,000 --> 00:14:50,000

Up to 20 miles maybe?

199

00:14:50,000 --> 00:14:53,000

Just imagine moving that boulder right there.

200

00:14:53,000 --> 00:14:56,000

How many people would it take to move that?

201

00:14:56,000 --> 00:15:00,000

What kind of a boat would you have that you could put that boulder on?

202

00:15:01,000 --> 00:15:04,000

Well, I mean, you'd be talking about a barge, right?

203

00:15:04,000 --> 00:15:10,000

So there are barges that hold up to hundreds of tons.

204

00:15:10,000 --> 00:15:13,000

They have hundreds of tons in terms of capacity.

205

00:15:13,000 --> 00:15:14,000

So that's what you're talking about.

206

00:15:14,000 --> 00:15:16,000

You're talking about basically shipping barges.

207

00:15:16,000 --> 00:15:18,000

Giant shipping barges.

208

00:15:18,000 --> 00:15:19,000

Yes.

209

00:15:19,000 --> 00:15:21,000

Like what we have today.

210

00:15:21,000 --> 00:15:30,000

The idea that people actually drag these things across a rugged terrain or on rafts is absolutely preposterous in my opinion.

211

00:15:30,000 --> 00:15:45,000

The bottom line is that it is an impossibility to move 250 million tons of basalt from one side of the island to the other without modern technology, without modern machinery.

212

00:15:46,000 --> 00:15:57,000

As a heavy rain suddenly sets in, the team makes its way through the ancient site and towards a remarkable feature in one of the basalt walls.

213

00:15:57,000 --> 00:15:59,000

So the weather here changes every 30 seconds?

214

00:15:59,000 --> 00:16:01,000

Yeah, welcome to Bonbe.

215

00:16:01,000 --> 00:16:13,000

For structural engineer Henry Burton, just as impressive as the size of the stones used to construct non-Madame, is the engineering knowledge the ancient builders must have had.

216

00:16:14,000 --> 00:16:23,000

So what's interesting about this is if you look at the doorway in any modern building and you open up the walls, you'll find a beam directly over the doorway.

217

00:16:23,000 --> 00:16:28,000

And why this type of beam is important is because it supports all of the load that's above it.

218

00:16:28,000 --> 00:16:30,000

It's called a lintel, right?

219

00:16:30,000 --> 00:16:33,000

So that's actually a structural element that's used in design.

220

00:16:33,000 --> 00:16:37,000

This is interesting because this is actually in bending, right?

221

00:16:37,000 --> 00:16:40,000

It's subtle, but this is actually a bending action that you're seeing here.

222

00:16:40,000 --> 00:16:43,000

And it becomes a little bit more interesting when you have to do the design.

223

00:16:43,000 --> 00:16:46,000

What type of mathematics or physics is involved here?

224

00:16:46,000 --> 00:16:49,000

Well, there are several things you have to think about.

225

00:16:49,000 --> 00:16:52,000

So first you'd have to think about the load that's being placed on this, right?

226

00:16:52,000 --> 00:16:55,000

Then you would have to consider the structural mechanics.

227

00:16:55,000 --> 00:16:57,000

So you'd have to consider the cross-sectional properties of this thing.

228

00:16:57,000 --> 00:17:00,000

You would have to consider the material properties.

229

00:17:00,000 --> 00:17:08,000

Now, if we're talking about sort of what governs the bending shape of this thing, then there's some actual calculus involved in understanding that.

230

00:17:10,000 --> 00:17:15,000

Dr. Burton said that in order to calculate these stress levels,

231

00:17:15,000 --> 00:17:19,000

he would need advanced mathematics such as calculus.

232

00:17:19,000 --> 00:17:29,000

And that is a pretty tall order because even archaeologists would have to admit that calculus did not exist in the 11th century AD.

233

00:17:29,000 --> 00:17:36,000

Calculus for all intents and purposes was not invented until the 17th century AD.

234

00:17:41,000 --> 00:17:44,000

So gentlemen, we're going to cross.

235

00:17:44,000 --> 00:17:46,000

All right, let's do it.

236

00:17:49,000 --> 00:17:54,000

Although no inscriptions of any kind exist on the stone structures,

237

00:17:54,000 --> 00:18:02,000

in 1907 excavations were performed in areas believed to be ceremonial temples and tombs.

238

00:18:02,000 --> 00:18:07,000

So this is the central part of Nandoas, the ceremonial center.

239

00:18:08,000 --> 00:18:10,000

This is unreal.

240

00:18:10,000 --> 00:18:13,000

Right up front, you'll see a tomb.

241

00:18:14,000 --> 00:18:18,000

Isn't this great? This is something else, isn't it?

242

00:18:23,000 --> 00:18:24,000

This is extraordinary.

243

00:18:24,000 --> 00:18:30,000

So this area is the main ceremonial center of Nandoas. This is where they perform all the rituals.

244

00:18:30,000 --> 00:18:33,000

And then this was some type of a tomb at some point?

245

00:18:33,000 --> 00:18:36,000

They said it was a burial tomb of some of the chiefs.

246

00:18:36,000 --> 00:18:37,000

Okay.

247

00:18:37,000 --> 00:18:40,000

But they're not really sure that it was a tomb, are they?

248

00:18:40,000 --> 00:18:43,000

It was excavated during the German time.

249

00:18:43,000 --> 00:18:46,000

And what did they discover? Did they discover bones?

250

00:18:46,000 --> 00:18:51,000

Nobody knows for sure because the guy who did the excavation died the very next day.

251

00:18:52,000 --> 00:19:01,000

And then later some of the excavated material from here was put on a ship and that ship sank in the Marshall Islands and everything was lost.

252

00:19:01,000 --> 00:19:04,000

So the excavator died and the ship sank.

253

00:19:04,000 --> 00:19:08,000

So is this similar to the curse of the pharaohs?

254

00:19:08,000 --> 00:19:14,000

Because also in ancient Egypt they were saying that if you excavate something, you'll have a curse and you die.

255

00:19:14,000 --> 00:19:16,000

And some people have died.

256

00:19:16,000 --> 00:19:22,000

Well, what I'm trying to explain is that the local people believed that it was because he disturbed this area.

257

00:19:23,000 --> 00:19:27,000

Although Pompey is home to 34,000 people,

258

00:19:28,000 --> 00:19:33,000

Narn-Medal is completely uninhabited and has been for centuries.

259

00:19:33,000 --> 00:19:39,000

Among the reasons is that the native islanders believe this ancient site is cursed.

260

00:19:39,000 --> 00:19:42,000

There's all kinds of taboos about visiting this place.

261

00:19:42,000 --> 00:19:45,000

Like it's got ghosts there.

262

00:19:45,000 --> 00:19:53,000

The local islanders believe that the city of Narn-Medal is cursed and they believe that if they spend the night there, they'll die.

263

00:19:53,000 --> 00:20:00,000

The islanders say that at night there are lights that move around in the city.

264

00:20:00,000 --> 00:20:03,000

Even today few locals also come here today.

265

00:20:03,000 --> 00:20:07,000

I mean it's a sacred place, it's taboo because they believe this area.

266

00:20:07,000 --> 00:20:12,000

This whole place is either good or bad spirits but it's got spirits roaming this area.

267

00:20:12,000 --> 00:20:17,000

An unexplainable death after the opening of a sacred tomb.

268

00:20:17,000 --> 00:20:22,000

All evidence gathered from the site mysteriously lost at sea.

269

00:20:24,000 --> 00:20:31,000

Could Narn-Medal be home to something that mankind is not yet met to discover?

270

00:20:40,000 --> 00:20:41,000

Man oh man.

271

00:20:41,000 --> 00:20:44,000

Look how tall that is.

272

00:20:44,000 --> 00:20:51,000

While visiting the ancient site of Narn-Medal, ancient astronaut theorists Giorgio Succolos and David Chondras,

273

00:20:51,000 --> 00:20:59,000

along with their guide Gus Kohler and structural engineer Dr. Henry Burton have traveled to the site of Narn-Dawas.

274

00:20:59,000 --> 00:21:04,000

The royal mortuary said to belong to Narn-Medal's original builders.

275

00:21:04,000 --> 00:21:09,000

This is supposed to be the biggest stone here at Narn-Dawas.

276

00:21:09,000 --> 00:21:10,000

This cornerstone right here?

277

00:21:10,000 --> 00:21:15,000

This thing, it's supposed to be the biggest of all the stones here.

278

00:21:15,000 --> 00:21:18,000

Henry, do you think you can calculate the weight of this?

279

00:21:18,000 --> 00:21:20,000

Yeah, we can certainly estimate it.

280

00:21:20,000 --> 00:21:25,000

I have a measuring tape, we can estimate the volume and we know the density so that can give us the mass.

281

00:21:25,000 --> 00:21:27,000

Alright, let's do that.

282

00:21:27,000 --> 00:21:30,000

Yeah, so this is about four meters.

283

00:21:30,000 --> 00:21:33,000

Alright, here's the far corner here.

284

00:21:33,000 --> 00:21:40,000

Using the dimensions and the density of one of the basalt stone blocks, Dr. Burton calculates its weight.

285

00:21:40,000 --> 00:21:41,000

250.

286

00:21:41,000 --> 00:21:42,000

250.

287

00:21:42,000 --> 00:21:46,000

Alright, so based on the measurements you're looking at a weight of about 54 tons.

288

00:21:46,000 --> 00:21:47,000

54 tons then.

289

00:21:47,000 --> 00:21:49,000

So 50 times give or take.

290

00:21:49,000 --> 00:21:59,000

And you have one, two, three, four of those monoliths essentially stacked on top of each other at a height of 40 feet?

291

00:21:59,000 --> 00:22:05,000

So Gus, what is then the oral history of moving this stone on the island?

292

00:22:05,000 --> 00:22:11,000

Well, according to the legends, the stones were flown up here.

293

00:22:11,000 --> 00:22:15,000

Rocks were brought from the north and they were flown up here.

294

00:22:15,000 --> 00:22:26,000

For generations, the people of Pompeii have told the story that Non-Midal was constructed by strange visitors through a process of levitation.

295

00:22:26,000 --> 00:22:38,000

It is this legend that is suggested to ancient astronaut theorists that Non-Midal is not only an ancient megalithic structure, it is also an extraterrestrial one.

296

00:22:39,000 --> 00:22:47,000

So we have in the oral traditions a story about two brothers, Olesopa and Olesipa.

297

00:22:47,000 --> 00:22:51,000

They managed to construct what you know today as Non-Midal.

298

00:22:51,000 --> 00:22:57,000

According to oral histories, the stones flew to the Non-Midal area.

299

00:22:57,000 --> 00:23:00,000

How did they fly there? We don't know.

300

00:23:00,000 --> 00:23:06,000

The two brothers who started Non-Midal, according to the Bon-Pen legend, were foreigners.

301

00:23:06,000 --> 00:23:10,000

They were not from here, so we don't know where they were from.

302

00:23:10,000 --> 00:23:17,000

According to legend, the twin sorcerers who created Non-Midal were of giant proportions.

303

00:23:17,000 --> 00:23:27,000

Much like the legends of Easter Island, where it is said that giants magically floated the stone Moai statues into place.

304

00:23:27,000 --> 00:23:35,000

Similar stories involving levitation are associated with numerous other megalithic sites, like Stonehenge in England.

305

00:23:35,000 --> 00:23:38,000

The Great Pyramid in Giza, Egypt.

306

00:23:38,000 --> 00:23:41,000

The Ushma Pyramid in the Yucatan Peninsula.

307

00:23:41,000 --> 00:23:44,000

And Kumapunko in Bolivia.

308

00:23:45,000 --> 00:23:51,000

There are other stories around the world that say the exact same thing.

309

00:23:51,000 --> 00:23:57,000

How gigantic stones were moved into place as if by magic.

310

00:23:57,000 --> 00:24:00,000

And you have to ask yourself, is there a connection?

311

00:24:00,000 --> 00:24:06,000

Did all of our ancestors receive the same knowledge from the extraterrestrials?

312

00:24:06,000 --> 00:24:09,000

And the answer to that is a resounding yes.

313

00:24:09,000 --> 00:24:17,000

We have done scientific studies and 40% of the rocks that come from this side of the earth came from the north.

314

00:24:17,000 --> 00:24:22,000

So it does kind of collaborate our oral legend that it came from the north.

315

00:24:22,000 --> 00:24:23,000

The other 60%.

316

00:24:23,000 --> 00:24:25,000

I think they don't know where it came from.

317

00:24:25,000 --> 00:24:27,000

But it's not from here, right?

318

00:24:27,000 --> 00:24:29,000

Nobody's been able to source that.

319

00:24:29,000 --> 00:24:32,000

So yeah, 60% of the stones, they don't know where they came from.

320

00:24:32,000 --> 00:24:38,000

That's incredible that the 60% is essentially still a mystery, yes?

321

00:24:42,000 --> 00:24:51,000

For decades, mainstream archaeologists have been frustrated by their failure to identify this source for much of the basalt used in the construction of Nhan Madal.

322

00:24:51,000 --> 00:25:03,000

But recently, a growing number of scientists have become convinced that it came from a volcanic outcropping located 25 miles northeast of Nhan Madal called Huysan Malik.

323

00:25:03,000 --> 00:25:07,000

The unusual formation extends over 400 feet into the air.

324

00:25:07,000 --> 00:25:15,000

And incredibly, the rock used to construct Nhan Madal appears to have been extracted from the least accessible part of the mountain.

325

00:25:15,000 --> 00:25:17,000

The very top.

326

00:25:17,000 --> 00:25:19,000

But how?

327

00:25:19,000 --> 00:25:27,000

According to the oral history of Pompeii, the basalt was taken by what the natives referred to as a giant bird.

328

00:25:27,000 --> 00:25:36,000

There's one story that says that at some point there were these giant roosters that lived on top of that mountain.

329

00:25:36,000 --> 00:25:43,000

And this rooster took these basalt blocks and flew them over to Nhan Madal.

330

00:25:44,000 --> 00:25:55,000

Now, monster roosters do not exist, so my mind always goes to misunderstood technology, machines that were provided by the extraterrestrials.

331

00:25:58,000 --> 00:26:05,000

I believe that the islanders are correct when they say all those stones were flown through the air.

332

00:26:05,000 --> 00:26:09,000

Because I can't see how it was done in any other way.

333

00:26:10,000 --> 00:26:21,000

As far as ancient astronaut theorists are concerned, the local legends, along with hard evidence that basalt appears to have been excavated from the top of Huysan Malik,

334

00:26:21,000 --> 00:26:28,000

add credence to the idea that advanced alien technology was used in the construction of Nhan Madal.

335

00:26:29,000 --> 00:26:37,000

And to help prove their theory, Georgiosuchlos and David Chondris, along with structural engineer Dr. Henry Burton,

336

00:26:37,000 --> 00:26:42,000

traveled 25 miles across the island to visit the nearest basalt quarry.

337

00:26:42,000 --> 00:26:44,000

Man, look at this.

338

00:26:44,000 --> 00:26:45,000

Wow.

339

00:26:45,000 --> 00:26:46,000

What a quarry.

340

00:26:46,000 --> 00:26:50,000

So how does one free the basalt from this wall?

341

00:26:50,000 --> 00:26:56,000

Yeah, no, it would certainly require some specialized tools, some type of excavator, some type of drill tip.

342

00:26:56,000 --> 00:27:03,000

Once you start taking rocks off, depending on how much room you have to drive things up, depending on the size of the blocks,

343

00:27:03,000 --> 00:27:05,000

you might need a crane to sort of move things around.

344

00:27:05,000 --> 00:27:09,000

You would need some type of machinery to be able to do that today.

345

00:27:09,000 --> 00:27:16,000

How did people from at least a thousand years ago remove these blocks from this quarry?

346

00:27:16,000 --> 00:27:25,000

They had to somehow pry these columns out of the cliff and, you know, remove them so that they would be, yeah,

347

00:27:25,000 --> 00:27:31,000

a standalone piece of prismatic basalt and then move it, millions of tons of it.

348

00:27:31,000 --> 00:27:41,000

I would think that, yeah, there was very much a special survey done of this island looking for material that could be used to build.

349

00:27:41,000 --> 00:27:42,000

Right.

350

00:27:42,000 --> 00:27:45,000

And I would say that an aerial survey would accomplish all of that.

351

00:27:45,000 --> 00:27:56,000

Yes, or any type of, you know, advanced radar technology that, in my opinion, existed with the extraterrestrials at the time.

352

00:27:56,000 --> 00:28:05,000

For Giorgio and David, the more they learn about non-Madal from the weight of the basalt columns to the distance they had to be transported

353

00:28:05,000 --> 00:28:13,000

to the tools that would be needed to quarry the rock, the more difficult it becomes to explain how all of this could have been accomplished

354

00:28:13,000 --> 00:28:17,000

without the help of advanced extraterrestrial technology.

355

00:28:17,000 --> 00:28:28,000

Nevertheless, according to the oral history of Pompeii, the most compelling evidence cannot be found by examining the megalithic structures themselves,

356

00:28:28,000 --> 00:28:30,000

but what lies beneath them.

357

00:28:31,000 --> 00:28:51,000

In search of further clues to help solve the mystery of non-Madal, David Childress and Giorgio Succolos meet up once again with historical preservation officer, Gus Kohler.

358

00:28:51,000 --> 00:28:53,000

You guys ready for a trip?

359

00:28:53,000 --> 00:28:54,000

Yes.

360

00:28:54,000 --> 00:29:02,000

Gus has provided access and underwater drones so they can get an additional perspective on the ruins of non-Madal.

361

00:29:02,000 --> 00:29:14,000

With their drone operator, Ross Conklin, David and Giorgio head out towards an area where it has been reported that there are a number of incredible structures that lie hidden under the water.

362

00:29:14,000 --> 00:29:21,000

Structures that some believe are part of an incredibly ancient submerged city called Con Aue So.

363

00:29:25,000 --> 00:29:30,000

According to oral history, non-Madal is supposedly built above Canemoiselle.

364

00:29:30,000 --> 00:29:34,000

And it's deep under the water. It's another city.

365

00:29:34,000 --> 00:29:35,000

It's another city.

366

00:29:35,000 --> 00:29:36,000

It's different than non-Madal.

367

00:29:36,000 --> 00:29:37,000

It's a second city.

368

00:29:37,000 --> 00:29:44,000

Could it be that the coral reef itself is that city and the coral's grown over it?

369

00:29:44,000 --> 00:29:45,000

It's very possible.

370

00:29:47,000 --> 00:29:52,000

After a short trip across the shoreline, the team arrives at their destination.

371

00:29:52,000 --> 00:29:59,000

So when you were scuba diving here about 30 years ago, you saw basalt columns encrusted in coral.

372

00:29:59,000 --> 00:30:03,000

That's what we think. We think they're basalt column. We don't know.

373

00:30:03,000 --> 00:30:11,000

So wouldn't that correlate with an extreme age if you have columns encrusted in coral?

374

00:30:11,000 --> 00:30:15,000

It would have been. I mean, it's about 80 feet deep or so.

375

00:30:15,000 --> 00:30:21,000

And it would mean that ocean levels were 80 feet lower than they are today whenever they built that.

376

00:30:21,000 --> 00:30:25,000

Right. And that would mean that we're talking 12,000 years ago at least.

377

00:30:25,000 --> 00:30:26,000

Like the last Ice Age.

378

00:30:26,000 --> 00:30:27,000

Right.

379

00:30:27,000 --> 00:30:33,000

So, yeah, this city would be 12,000 years old or older.

380

00:30:35,000 --> 00:30:37,000

12,000 years old?

381

00:30:37,000 --> 00:30:44,000

Is it possible that extraterrestrials were not only responsible for constructing the incredible non-Madal complex,

382

00:30:44,000 --> 00:30:48,000

but also an earlier structure that is now beneath the water

383

00:30:48,000 --> 00:30:51,000

and that they are still accessing to this day?

384

00:30:54,000 --> 00:30:58,000

In many ancient texts, there can be found accounts of a great flood

385

00:30:58,000 --> 00:31:05,000

wiping out a previous civilization of humans, such as in the Sumerian epic of Gilgamesh,

386

00:31:05,000 --> 00:31:12,000

the Egyptian creation texts, the Vedic texts of India, and the Bible's book of Genesis.

387

00:31:12,000 --> 00:31:18,000

Today, more and more scientific evidence is emerging to suggest that such a cataclysm

388

00:31:18,000 --> 00:31:24,000

may actually have happened around the end of the last Ice Age, 12,000 years ago,

389

00:31:24,000 --> 00:31:27,000

when sea levels were 400 feet lower.

390

00:31:27,000 --> 00:31:35,000

Is it possible that non-Madal was built that long ago by a now forgotten pre-flood civilization?

391

00:31:35,000 --> 00:31:39,000

The builders of the non-Madal were a very advanced civilization.

392

00:31:39,000 --> 00:31:44,000

So whether these people originated on the island or as tradition states, they came from other areas.

393

00:31:44,000 --> 00:31:51,000

It may have been an inheritance from the lost city that was actually underwater that non-Madal was built upon.

394

00:31:53,000 --> 00:31:56,000

The team prepares to launch an underwater drone.

395

00:31:56,000 --> 00:32:01,000

This will be the first time that the ruins have ever been explored in this way.

396

00:32:01,000 --> 00:32:06,000

All right, so Gus, I'm going to ask you for a hand with this cable, just to wrangle it.

397

00:32:06,000 --> 00:32:07,000

Okay.

398

00:32:07,000 --> 00:32:08,000

Watch mode.

399

00:32:08,000 --> 00:32:09,000

Boom.

400

00:32:09,000 --> 00:32:11,000

All right.

401

00:32:11,000 --> 00:32:13,000

So you just kind of drop it.

402

00:32:13,000 --> 00:32:15,000

Yeah, there it is.

403

00:32:15,000 --> 00:32:16,000

All right.

404

00:32:19,000 --> 00:32:20,000

All right, now we're moving.

405

00:32:22,000 --> 00:32:23,000

Cool.

406

00:32:24,000 --> 00:32:26,000

A little bit of an image.

407

00:32:26,000 --> 00:32:28,000

Ooh, yeah, look at that.

408

00:32:30,000 --> 00:32:32,000

Open ocean, open ocean.

409

00:32:33,000 --> 00:32:35,000

It's just going to be getting close to the wall.

410

00:32:35,000 --> 00:32:36,000

Wow, cool.

411

00:32:36,000 --> 00:32:38,000

So let me drop down.

412

00:32:41,000 --> 00:32:43,000

And there we start to see the wall again.

413

00:32:45,000 --> 00:32:48,000

Now, it's disconnected there for a second.

414

00:32:48,000 --> 00:32:50,000

And it's connected.

415

00:32:51,000 --> 00:33:01,000

Curiously, the image being relayed by the drone continues to cut out every time it starts to get close to what appears to be an underwater wall of basalt columns.

416

00:33:03,000 --> 00:33:06,000

It just keeps disconnecting.

417

00:33:06,000 --> 00:33:14,000

The drone Ross is using tested perfectly just one day earlier and in an area that was also rich in basalt.

418

00:33:14,000 --> 00:33:19,000

So he is genuinely baffled as to why it is now malfunctioning.

419

00:33:19,000 --> 00:33:22,000

I think what we should do is reel this one back in.

420

00:33:22,000 --> 00:33:24,000

I have another underwater drone.

421

00:33:24,000 --> 00:33:28,000

We'll give that one a try and we'll just go straight to that wall.

422

00:33:28,000 --> 00:33:30,000

Okay, fingers crossed.

423

00:33:32,000 --> 00:33:34,000

Let's go.

424

00:34:02,000 --> 00:34:04,000

The image is sent back.

425

00:34:04,000 --> 00:34:08,000

The submersible drone they deployed suddenly stopped working.

426

00:34:08,000 --> 00:34:12,000

Fortunately, Ross came prepared with a backup.

427

00:34:13,000 --> 00:34:16,000

Alright, so I'm heading right for that corner over there.

428

00:34:25,000 --> 00:34:27,000

Okay, disconnected.

429

00:34:27,000 --> 00:34:29,000

Yep, okay, disconnected. Wow.

430

00:34:29,000 --> 00:34:33,000

As soon as you get close to those stones, it disconnects.

431

00:34:33,000 --> 00:34:37,000

So I'm just right below the surface and as soon as I try and drop.

432

00:34:37,000 --> 00:34:39,000

This is now our second one now.

433

00:34:39,000 --> 00:34:40,000

Yeah, now it's doing it to both.

434

00:34:40,000 --> 00:34:42,000

That's so strange.

435

00:34:43,000 --> 00:34:47,000

Curiously, the second drone has also malfunctioned.

436

00:34:47,000 --> 00:34:50,000

Could the stone materials have something to do with it?

437

00:34:50,000 --> 00:34:55,000

Both underwater drones worked on the north side of the island the day before.

438

00:34:55,000 --> 00:35:03,000

And then we came to the area of Nandmidal and outside only a few feet away from Nandmidal.

439

00:35:03,000 --> 00:35:06,000

Those machines no longer worked.

440

00:35:06,000 --> 00:35:11,000

It's as if something or someone was interfering with the devices.

441

00:35:11,000 --> 00:35:18,000

So it's very strange to think that maybe somehow those basalt blocks have been magnetized.

442

00:35:18,000 --> 00:35:22,000

And if that is the case, what were they exposed to?

443

00:35:22,000 --> 00:35:27,000

That they are now apparently magnetized as some people have suggested.

444

00:35:29,000 --> 00:35:32,000

People see lights in this city at night.

445

00:35:32,000 --> 00:35:37,000

They see lights moving around and that may be because the whole city is magnetic.

446

00:35:37,000 --> 00:35:43,000

And it's some kind of electromagnetic phenomenon that's coming from the rocks themselves.

447

00:35:43,000 --> 00:35:49,000

Oceanic basalt, like that found at Nandmidal, is ferromagnetic.

448

00:35:49,000 --> 00:35:55,000

Meaning that when exposed to a magnetic charge, it becomes magnetically charged itself.

449

00:35:55,000 --> 00:35:59,000

Rocks really have three basic effects on magnetic fields.

450

00:35:59,000 --> 00:36:03,000

They either have no effect, so the magnetic field stays kind of straight.

451

00:36:03,000 --> 00:36:06,000

They can effectively repel magnetic fields or attract them.

452

00:36:07,000 --> 00:36:10,000

Rock enhances the magnetic field.

453

00:36:12,000 --> 00:36:17,000

The natives say that the stones all flew across the island.

454

00:36:17,000 --> 00:36:27,000

And if that was the case, then some magnetic energy was put onto the stones, levitated them,

455

00:36:27,000 --> 00:36:32,000

they put them into place and that energy is still there in a residual manner.

456

00:36:32,000 --> 00:36:41,000

And that is why the drones wouldn't work there because there's still this energy that was used to levitate the stones.

457

00:36:41,000 --> 00:36:52,000

If they flew these stones through the air, if they're using some anti-gravity technology, they would then be magnetized.

458

00:36:52,000 --> 00:36:55,000

Clearly it has something to do with the structure.

459

00:36:55,000 --> 00:37:01,000

It's highly unlikely that two pieces of equipment are malfunctioning all at the same time.

460

00:37:02,000 --> 00:37:10,000

If the legend of Nandmidal is true and it was constructed by other worldly visitors using levitation technology,

461

00:37:10,000 --> 00:37:12,000

what was it built for?

462

00:37:13,000 --> 00:37:18,000

Why would anybody have to create artificial land or islands back in the day,

463

00:37:18,000 --> 00:37:21,000

especially with a sizable island right here?

464

00:37:21,000 --> 00:37:23,000

Right here. But think of Venice in Italy.

465

00:37:23,000 --> 00:37:27,000

It's a port city, it has canals, it's very much more boats.

466

00:37:27,000 --> 00:37:36,000

To me it's a giant naval base here for huge ships and those ships were coming out of Southeast Asia into the vast Pacific

467

00:37:37,000 --> 00:37:45,000

and they would meet here and then they would go on to other islands and then to Mexico and to Columbia and Peru.

468

00:37:47,000 --> 00:37:51,000

But then also it's airships and high technology.

469

00:37:51,000 --> 00:37:52,000

Right.

470

00:37:54,000 --> 00:38:00,000

I don't think that naval traffic and airship traffic are necessarily exclusive of each other.

471

00:38:00,000 --> 00:38:03,000

And it would seem that, you know, it's a combination of both.

472

00:38:03,000 --> 00:38:10,000

They were using it as a stepping stone, going out to other Pacific islands where other megaliths and pyramids and things were built.

473

00:38:11,000 --> 00:38:16,000

Was Nandmidal a port for an advanced free-flood civilization?

474

00:38:16,000 --> 00:38:24,000

As far as David Childress is concerned, it was not only a port, but one with an extraordinary origin

475

00:38:24,000 --> 00:38:29,000

and he believes the most important evidence to support his theory can be found.

476

00:38:30,000 --> 00:38:34,000

By examining the basalt stone used to build the massive complex.

477

00:38:41,000 --> 00:38:48,000

For more than three decades, ancient astronaut theorist David Childress has been studying Nandmidal.

478

00:38:49,000 --> 00:38:55,000

Over the years, he has entertained dozens of theories as to how it was constructed and why.

479

00:38:55,000 --> 00:38:59,000

Based on what he has learned over the course of his latest investigation,

480

00:38:59,000 --> 00:39:07,000

he is now more convinced than ever that it was built either by or with the help from extraterrestrial visitors.

481

00:39:07,000 --> 00:39:14,000

He is also convinced that the complex was built with basalt rock because of its electromagnetic properties.

482

00:39:14,000 --> 00:39:20,000

Properties that would make it possible to levitate the large megaton stones into place.

483

00:39:21,000 --> 00:39:28,000

Nandmidal is built out of millions and millions of tons of basalt which is magnetic.

484

00:39:28,000 --> 00:39:35,000

And perhaps this is something that extraterrestrials can manipulate, use for themselves,

485

00:39:35,000 --> 00:39:40,000

even it could possibly help power their spaceships and things.

486

00:39:41,000 --> 00:39:49,000

Nandmida for sure had to have been built when the worldwide water levels were much, much lower.

487

00:39:50,000 --> 00:39:56,000

And that, according to science, was between 11 and 20,000 years ago.

488

00:39:56,000 --> 00:40:04,000

So right there, we have physical evidence of a site that in my opinion was built in prehistory.

489

00:40:05,000 --> 00:40:12,000

When you find evidence deep under the water, potentially goes back tens of thousands of years,

490

00:40:12,000 --> 00:40:16,000

in a very important part of the Pacific, it does raise the question,

491

00:40:16,000 --> 00:40:21,000

is there a much earlier epoch to Nandmidal than people realize?

492

00:40:21,000 --> 00:40:30,000

So the incredible site of Nandmidal looks like it was part of a great culture that existed throughout the Pacific and probably beyond.

493

00:40:30,000 --> 00:40:36,000

We find evidence of similar construction at Gunan Padang which potentially goes back 20,000 years.

494

00:40:36,000 --> 00:40:42,000

We find similar basalt columns at Olmec sites in ancient Mexico.

495

00:40:42,000 --> 00:40:48,000

And these builders may have been influencing the pyramid constructions in ancient Mexico.

496

00:40:48,000 --> 00:40:53,000

All these indicators of an ancient lost civilization in the Pacific.

497

00:40:54,000 --> 00:41:02,000

There's no doubt in my mind that the engineering knowledge for Nandmidal came from the extraterrestrials.

498

00:41:02,000 --> 00:41:10,000

I have seen megalithic structures around the world, but this one is one of the few that absolutely defies logic.

499

00:41:10,000 --> 00:41:18,000

I would categorize Nandmidal in the same category like the Great Pyramid of Egypt and also Puma Punku.

500

00:41:18,000 --> 00:41:25,000

And you have to ask yourself, is there a connection? And the answer to that is a resounding yes.

501

00:41:26,000 --> 00:41:37,000

Do the incredible megalithic constructions at Nandmidal provide evidence that mankind has only begun to scratch the surface of an alien presence on planet Earth?

502

00:41:37,000 --> 00:41:42,000

One that dates back tens of thousands of years.

503

00:41:42,000 --> 00:41:49,000

As far as ancient astronaut theorists are concerned, the answer is a profound yes.

504

00:41:49,000 --> 00:42:00,000

And they are also convinced that further investigations will not only prove that extraterrestrials have revealed themselves to humanity at different times throughout history,

505

00:42:00,000 --> 00:42:05,000

but that we are about to be visited by these same alien visitors.

506

00:42:05,000 --> 00:42:07,000

Again.
