

1

00:00:00,000 --> 00:00:05,000

A fiery object crashes into the Earth

2

00:00:05,000 --> 00:00:08,000

and ignites the modern UFO era.

3

00:00:08,000 --> 00:00:11,000

It wanted to become the absolute touchstone event

4

00:00:11,000 --> 00:00:13,000

and the best-known event in the world,

5

00:00:13,000 --> 00:00:16,000

connecting our reality to the E.T. phenomena.

6

00:00:16,000 --> 00:00:18,000

For more than seven decades,

7

00:00:18,000 --> 00:00:21,000

the Army has denied what it initially reported,

8

00:00:21,000 --> 00:00:24,000

that it had recovered a flying disk.

9

00:00:24,000 --> 00:00:28,000

But could evidence of such an event still exist?

10

00:00:28,000 --> 00:00:32,000

Oh, my God! There is something there and we need to dig it up.

11

00:00:32,000 --> 00:00:35,000

Are there remnants of alien technology

12

00:00:35,000 --> 00:00:37,000

scattered in the New Mexico Desert?

13

00:00:37,000 --> 00:00:41,000

I think he's holding something made by another intelligence.

14

00:00:41,000 --> 00:00:44,000

I have never, ever seen anything like this.

15

00:00:44,000 --> 00:00:47,000

And could materials already recovered

16

00:00:47,000 --> 00:00:52,000

soon reveal the truth about an extraterrestrial presence on Earth?

17

00:00:52,000 --> 00:00:54,000

There's something big going on here.

18

00:00:54,000 --> 00:00:57,000

I'm getting chills because we've got some elements

19

00:00:57,000 --> 00:00:59,000

that are showing up. They shouldn't be there.

20

00:00:59,000 --> 00:01:02,000

If the evidence has not yet been uncovered,

21

00:01:02,000 --> 00:01:06,000

that does not mean the evidence is not there.

22

00:01:09,000 --> 00:01:13,000

There is a doorway in the universe.

23

00:01:13,000 --> 00:01:17,000

Beyond it is the promise of truth.

24

00:01:17,000 --> 00:01:22,000

It demands we question everything we have ever been taught.

25

00:01:22,000 --> 00:01:26,000

The evidence is all around us.

26

00:01:26,000 --> 00:01:30,000

The future is right before our eyes.

27

00:01:30,000 --> 00:01:33,000

We are not alone.

28

00:01:33,000 --> 00:01:36,000

We have never been alone.

29

00:01:44,000 --> 00:01:49,000

Los Angeles, California, October 2019.

30

00:01:49,000 --> 00:01:53,000

Ancient astronaut theorist, George O. Suclos,

31

00:01:53,000 --> 00:01:57,000

is meeting up with investigative journalist Linda Moulton-How

32

00:01:57,000 --> 00:01:59,000

at a secure storage facility.

33

00:01:59,000 --> 00:02:01,000

Let's do it.

34

00:02:01,000 --> 00:02:03,000

For more than two decades,

35

00:02:03,000 --> 00:02:08,000

Linda has been in possession of highly unusual metal fragments,

36

00:02:08,000 --> 00:02:11,000

given to her by someone who claims they were extracted

37

00:02:11,000 --> 00:02:13,000

from an extraterrestrial craft.

38

00:02:13,000 --> 00:02:16,000

Man, this is some door.

39

00:02:16,000 --> 00:02:18,000

Okay.

40

00:02:18,000 --> 00:02:21,000

Well, over the years I've learned

41

00:02:21,000 --> 00:02:24,000

that this is really pretty valuable.

42

00:02:24,000 --> 00:02:28,000

And I better keep it in something like a safety deposit box.

43

00:02:28,000 --> 00:02:30,000

Right.

44

00:02:30,000 --> 00:02:34,000

In recent months, the United States Army has taken an interest

45

00:02:34,000 --> 00:02:38,000

in doing its own examination of these materials.

46

00:02:38,000 --> 00:02:41,000

Linda is eager to show George O. Suclos

47

00:02:41,000 --> 00:02:44,000

just what it is that has caught the Army's attention.

48

00:02:44,000 --> 00:02:49,000

Here is where the magic business magnesium is increased.

49

00:02:49,000 --> 00:02:51,000

Inside the magic box.

50

00:02:51,000 --> 00:02:54,000

Yeah. Here, I'll take it over here and show it to you.

51

00:03:00,000 --> 00:03:05,000

I have found, since having this in 1996,

52

00:03:05,000 --> 00:03:10,000

an evolving with research that it has become now so valuable.

53

00:03:10,000 --> 00:03:13,000

What am I looking at, Linda? What is this?

54

00:03:13,000 --> 00:03:16,000

Well, here is. See all these layers?

55

00:03:16,000 --> 00:03:18,000

Yeah.

56

00:03:18,000 --> 00:03:22,000

When you go to a scanning electron microscope,

57

00:03:22,000 --> 00:03:26,000

and you see that the black, the black side,

58

00:03:26,000 --> 00:03:29,000

it's pure bismuth, and it's 1 to 4 microns,

59

00:03:29,000 --> 00:03:32,000

which is about half the size of a blood cell.

60

00:03:32,000 --> 00:03:35,000

And it's a little bit of a black circle.

61

00:03:35,000 --> 00:03:40,000

And it's 1 to 4 microns, which is about half the size of a blood cell.

62

00:03:40,000 --> 00:03:43,000

And then it's alternating, just like a tort cake.

63

00:03:43,000 --> 00:03:44,000

Yeah.

64

00:03:44,000 --> 00:03:47,000

And the top silver, that's the magnesium zinc alkyl.

65

00:03:47,000 --> 00:03:48,000

Okay.

66

00:03:48,000 --> 00:03:51,000

So layer by layer by layer in microns.

67

00:03:51,000 --> 00:03:53,000

It's almost as if it's reflective, too.

68

00:03:53,000 --> 00:03:58,000

Yes. And when you get it in the sun, it looks like a snow field.

69

00:03:58,000 --> 00:04:00,000

And that's the magnesium zinc.

70

00:04:00,000 --> 00:04:03,000

In addition to this layered material,

71

00:04:03,000 --> 00:04:07,000

Linda also has an unusual piece of aluminum.

72

00:04:07,000 --> 00:04:10,000

As I understand from a physicist,

73

00:04:10,000 --> 00:04:16,000

it is this pure aluminum, 99.5% pure aluminum.

74

00:04:16,000 --> 00:04:19,000

As far as I know, we can't produce 99.5.

75

00:04:19,000 --> 00:04:22,000

I mean, this is incredibly pure.

76

00:04:22,000 --> 00:04:25,000

So where were these pieces allegedly found?

77

00:04:25,000 --> 00:04:31,000

These came out of white sands in New Mexico outside of Roswell.

78

00:04:31,000 --> 00:04:35,000

Is there a connection to Roswell with this piece?

79

00:04:37,000 --> 00:04:43,000

In July of 1947, an unidentified flying object crashed to Earth

80

00:04:43,000 --> 00:04:47,000

in the desert just outside Roswell, New Mexico.

81

00:04:47,000 --> 00:04:51,000

It is today the most famous UFO event on record.

82

00:04:51,000 --> 00:04:57,000

In part because it was the army itself that reported the craft as a flying disk.

83

00:04:57,000 --> 00:05:01,000

July 8th and 9th, the newspaper headlines,

84

00:05:01,000 --> 00:05:05,000

Army captures flying disk outside of Roswell.

85

00:05:05,000 --> 00:05:07,000

How did the newspaper get that story?

86

00:05:07,000 --> 00:05:08,000

Walter Howe.

87

00:05:08,000 --> 00:05:12,000

He was the official public information officer at the Roswell 509,

88

00:05:12,000 --> 00:05:14,000

who gave the story to the newspaper.

89

00:05:14,000 --> 00:05:18,000

But the military quickly walked back its story.

90

00:05:18,000 --> 00:05:24,000

Within days, the mysterious Roswell UFO was given an earthly origin.

91

00:05:24,000 --> 00:05:29,000

When the government claimed that the downed craft was merely a weather balloon.

92

00:05:29,000 --> 00:05:32,000

They changed it and said it was a weather balloon and everything else.

93

00:05:32,000 --> 00:05:36,000

They said they took it at the right Patterson Air Force Base in Ohio.

94

00:05:36,000 --> 00:05:40,000

When you really think about this, why on Earth would anyone send

95

00:05:40,000 --> 00:05:46,000

any kind of weather balloon to right field for technical analysis?

96

00:05:46,000 --> 00:05:48,000

None of that makes any sense whatsoever,

97

00:05:48,000 --> 00:05:52,000

unless that material was much more exotic and much more scientifically interesting

98

00:05:52,000 --> 00:05:55,000

than just a mere balloon.

99

00:05:55,000 --> 00:05:58,000

When you look at the whole Roswell incident,

100

00:05:58,000 --> 00:06:04,000

it seems to be a recovery that was very much a scramble, ad hoc thing.

101

00:06:04,000 --> 00:06:10,000

And in fact, witnesses had been to the crash site before the military got there.

102

00:06:10,000 --> 00:06:14,000

So in the chaos of trying to clean up this crash site,

103

00:06:14,000 --> 00:06:18,000

you have to wonder whether they would really get it all.

104

00:06:18,000 --> 00:06:21,000

Where would this material actually go?

105

00:06:21,000 --> 00:06:26,000

And would they have left some of it behind just by accident?

106

00:06:28,000 --> 00:06:35,000

In April 2011, the FBI released thousands of files as part of its online FBI vault,

107

00:06:35,000 --> 00:06:41,000

including a 1950 briefing to FBI Director J. Edgar Hoover regarding

108

00:06:41,000 --> 00:06:47,000

informant information about three flying saucers that were recovered in New Mexico.

109

00:06:47,000 --> 00:06:51,000

Many researchers believe this corroborates long-standing rumors

110

00:06:51,000 --> 00:06:58,000

that the Roswell incident involved not one, but three crashed UFOs.

111

00:06:58,000 --> 00:07:02,000

And there were numerous other incidents reported during that time period

112

00:07:02,000 --> 00:07:09,000

in the area of Roswell and White Sands proving ground that remain mostly unknown.

113

00:07:09,000 --> 00:07:14,000

You look at where the world today, when they think of UFO crash, they think of Roswell.

114

00:07:14,000 --> 00:07:18,000

Certainly, there have been crashes in New Mexico outside of Roswell.

115

00:07:18,000 --> 00:07:26,000

We know that there were a lot of UFO crashes going from the 40, like 47, 48, 49 and so forth.

116

00:07:26,000 --> 00:07:30,000

How did you come into possession of these pieces?

117

00:07:30,000 --> 00:07:34,000

I'll never forget the day that Art Bell called me.

118

00:07:34,000 --> 00:07:41,000

And he said, Linda, I received a box with a letter and there's some metal pieces in here.

119

00:07:41,000 --> 00:07:47,000

He said, I think they're aluminum, but I want you to start investigating.

120

00:07:47,000 --> 00:07:51,000

That would have been in 1996 that spring.

121

00:07:54,000 --> 00:08:02,000

Art Bell was the founder and original host of the long-running, paranormal-themed radio program, Coast to Coast AM.

122

00:08:02,000 --> 00:08:10,000

In 1996, he and Linda began to receive shipments in the mail of small, metallic fragments.

123

00:08:11,000 --> 00:08:20,000

We started getting two shipments coming from a man who identified himself in a series of five typed letters.

124

00:08:20,000 --> 00:08:30,000

He said he was an Army Sergeant that his grandfather had died in 1974 and had left a box that had a diary and metals.

125

00:08:30,000 --> 00:08:35,000

And the Army Sergeant said, I want you to have this and see what you can find out.

126

00:08:36,000 --> 00:08:42,000

The letters detail how the grandfather extracted the metallic items from a wedge-shaped craft

127

00:08:42,000 --> 00:08:50,000

while working as a member of a recovery crew between Roswell and White Sands Proving Ground in 1948.

128

00:08:50,000 --> 00:08:57,000

Art Bell turned over these mysterious fragments and letters to Linda Moldenhau for further study.

129

00:08:57,000 --> 00:09:05,000

In June of 1996, Linda commissioned University researchers to use a scanning electron microscope

130

00:09:05,000 --> 00:09:11,000

and a technique known as X-ray fluorescence spectrometry to analyze the samples.

131

00:09:11,000 --> 00:09:20,000

The analysis revealed alternating microscopic layers of the metals bismuth, magnesium and zinc, only microns thick.

132

00:09:20,000 --> 00:09:25,000

A combination that baffles exotic metal experts.

133

00:09:25,000 --> 00:09:28,000

I think we've got technology that we didn't make.

134

00:09:28,000 --> 00:09:33,000

A lot of people have come forward with bits and pieces of the same tail.

135

00:09:33,000 --> 00:09:41,000

We are presently analyzing meta-materials that we did not make, that's created in a way that is beyond our technology.

136

00:09:41,000 --> 00:09:45,000

Are there more pieces of these items?

137

00:09:45,000 --> 00:09:53,000

Well, for the last 15 years I had a combination of another piece of the bismuth magnesium zinc

138

00:09:53,000 --> 00:09:57,000

and another smaller piece of the aluminum.

139

00:09:57,000 --> 00:10:03,000

So the pair that I had before is now involved with military testing.

140

00:10:04,000 --> 00:10:13,000

In 2019, Linda handed over additional samples of the exotic metals for examination by the United States Army.

141

00:10:14,000 --> 00:10:23,000

As far as Linda is concerned, even though the fragments were allegedly taken from a craft that was in the Army's possession in 1948,

142

00:10:23,000 --> 00:10:28,000

there are likely only a handful of people who are aware of its existence.

143

00:10:28,000 --> 00:10:35,000

She is hopeful that the examination of her materials will prove that they were not manufactured on Earth

144

00:10:35,000 --> 00:10:44,000

and perhaps those who know what really happened at Roswell will finally reveal both the truth and what they recovered to the public.

145

00:10:44,000 --> 00:10:52,000

Do you have any new leads that maybe happened recently of someone that has found other material?

146

00:10:52,000 --> 00:11:03,000

Well, there is a geologist down in Roswell and he has sent me emails saying that he's got the exotic metals and all of these materials

147

00:11:03,000 --> 00:11:11,000

and I think we could go down there, see what he has found so far and maybe go out with him and explore ourselves.

148

00:11:11,000 --> 00:11:13,000

Awesome, let's go.

149

00:11:14,000 --> 00:11:23,000

If multiple flying discs crashed in the New Mexico desert in 1947, was all the debris recovered long ago?

150

00:11:25,000 --> 00:11:31,000

Or could there be remnants that were spirited away by curious locals and military personnel

151

00:11:31,000 --> 00:11:36,000

and some still lying out in the open waiting to be found?

152

00:11:42,000 --> 00:11:47,000

Roswell, New Mexico, July 1947

153

00:11:49,000 --> 00:12:00,000

Major Jesse Marcel, the head intelligence officer at Roswell Army Airfield, travels to Fort Worth, Texas with the debris recovered from the Roswell crash site.

154

00:12:02,000 --> 00:12:09,000

He and Brigadier General Roger Ramey, head of the 8th Air Force, are scheduled to present their findings to the media.

155

00:12:11,000 --> 00:12:21,000

Jesse Marcel flies to Fort Worth, the headquarters of the 8th Air Force, and he's set up to tell the whole world about the crash of a flying saucer at Roswell.

156

00:12:21,000 --> 00:12:29,000

Except Roger Ramey says to Jesse Marcel, could you just go in the map room for a second, I want to arrange some stuff out here.

157

00:12:29,000 --> 00:12:36,000

The story from Jesse Marcel and from the photographer is that the real wreckage had been spirited away.

158

00:12:37,000 --> 00:12:45,000

Hold up something, get some Reynolds wrap out of the fish in your freezer and hold it up and say that's what you found, not a disc.

159

00:12:45,000 --> 00:12:49,000

Which is exactly what they did and the reporters basically just turned around, went home.

160

00:12:50,000 --> 00:13:05,000

For UFO researchers, evidence that the actual wreckage from Roswell was indeed replaced with a weather balloon can be found within the notorious photograph, along with clues as to what was being hidden from the public.

161

00:13:06,000 --> 00:13:14,000

When General Roger Ramey was posing for photographs with Jesse Marcel in the aftermath of all of this, you can see him very clearly holding a piece of paper.

162

00:13:15,000 --> 00:13:20,000

General Ramey had a document in his hands, the so-called Ramey Memo.

163

00:13:20,000 --> 00:13:33,000

Modern forensic document analysis and photographic enhancement has enabled some researchers to zoom in on this and to clarify at least some portions of the text.

164

00:13:33,000 --> 00:13:44,000

What it tells us is astounding. Some of the phrases in the memo are victims of the wreck and disc which we will ship.

165

00:13:44,000 --> 00:13:50,000

So clearly if the official story is true, well this makes no sense.

166

00:13:50,000 --> 00:13:58,000

No clearly something more than just a weather balloon was involved here and the memo might just be the smoking gun.

167

00:13:59,000 --> 00:14:12,000

As far as Roswell researchers are concerned, the memo points to a cover-up with a downed UFO and its extraterrestrial crew being shipped from the base and locked away from the public eye.

168

00:14:12,000 --> 00:14:20,000

But if true, might there be fragments of evidence from the crash that were small enough to slip through the cracks?

169

00:14:21,000 --> 00:14:24,000

The question is always, well where is the evidence, where is the evidence?

170

00:14:24,000 --> 00:14:33,000

Well if the evidence has not yet been uncovered or dug out of the ground, that does not mean the evidence is not there.

171

00:14:37,000 --> 00:14:43,000

Central New Mexico, October 19th, 2019.

172

00:14:44,000 --> 00:14:59,000

Investigative journalist Linda Moulton-Howe has invited ancient astronaut theorist, Georgiosuchlos, to join her on a trip to a spot in the desert just outside Roswell, very near what is known as the

Skip Site.

173

00:14:59,000 --> 00:15:12,000

According to eyewitnesses, one of the three UFOs seen in the sky in July 1947 first crashed to Earth near this location, then was propelled back into the air.

174

00:15:13,000 --> 00:15:17,000

Skipping like a stone in a pond before finally coming to rest.

175

00:15:19,000 --> 00:15:29,000

Linda was contacted by geologist Frank Kimbler, who wants to show her mysterious metal fragments that he found here and search the area for more.

176

00:15:29,000 --> 00:15:37,000

Linda, this is so exciting. I have not been here in a couple of years, so I'm really looking forward to meeting Frank.

177

00:15:37,000 --> 00:15:54,000

Well I'm glad that we've got a geologist who's helping because the geologist looks at land and says if there is debris, there's going to be some kind of a drift with the land and just from what I know, he has studied some areas meticulously.

178

00:15:54,000 --> 00:15:55,000

Right.

179

00:15:56,000 --> 00:16:06,000

Georgios and Linda arrive at the Skip Site and meet Frank Kimbler, a local geologist and professor of Earth science.

180

00:16:06,000 --> 00:16:08,000

How are you? Good to see you.

181

00:16:08,000 --> 00:16:10,000

Linda, finally.

182

00:16:10,000 --> 00:16:13,000

Yes, you and I have been chasing these artifacts.

183

00:16:13,000 --> 00:16:17,000

Chasing the metals. Looking for parts.

184

00:16:18,000 --> 00:16:29,000

Professor Kimbler has spent nearly a decade searching areas beneath the purported trajectory of the Roswell craft with infrared technology and metal detectors.

185

00:16:29,000 --> 00:16:40,000

When an object crashes, they're going to scatter a variety of materials around knobs, control devices, plastic, wires, whatever.

186

00:16:40,000 --> 00:16:48,000

If it's coming apart, it's going to leave those pieces behind and those are the kinds of pieces that I want to find and have found some of.

187

00:16:48,000 --> 00:16:59,000

Since 2011, Professor Kimbler has uncovered more than a dozen metal fragments that he has subjected to scientific testing and found to be highly unique.

188

00:16:59,000 --> 00:17:03,000

That's what we want to go out there and see where you've been getting this.

189

00:17:03,000 --> 00:17:06,000

Frank, what's inside the case?

190

00:17:06,000 --> 00:17:17,000

Oh, this is the magic right here. This is some of the material that I have found out here using a metal detector.

191

00:17:17,000 --> 00:17:18,000

Interesting.

192

00:17:18,000 --> 00:17:29,000

The stuff is very interesting. It's all twisted and mangled up. Something that you would expect to happen from a crash is to have metal that's compact and twisted.

193

00:17:29,000 --> 00:17:41,000

When Professor Kimbler laid out his box of his pieces of metal, the first thing that struck me is these were tiny, tiny, tiny fragments.

194

00:17:41,000 --> 00:17:45,000

Could they possibly be from wreckage?

195

00:17:45,000 --> 00:17:52,000

These pieces are small, which is things that the government would have missed. They wouldn't have been able to find it.

196

00:17:52,000 --> 00:17:56,000

And here's my magic. Let's get a comparison here.

197

00:17:56,000 --> 00:17:58,000

Look at that.

198

00:17:58,000 --> 00:18:08,000

Look at it. It's like a snow field. After all these years, all of the pieces, they look absolutely pristine. That's the magnesium zinc side.

199

00:18:08,000 --> 00:18:11,000

This has got layers to it. That's amazing.

200

00:18:11,000 --> 00:18:13,000

But I bet you've never seen anything like this.

201

00:18:13,000 --> 00:18:14,000

No.

202

00:18:14,000 --> 00:18:22,000

Being an earth scientist, being a geologist, I've seen lots of all kinds of materials that are out there. I have never, ever seen anything like this.

203

00:18:23,000 --> 00:18:28,000

This fragment that Linda is showing me, that stuff is absolutely amazing.

204

00:18:28,000 --> 00:18:31,000

I've never seen anything like it before in my life.

205

00:18:31,000 --> 00:18:35,000

And what's interesting about it is that it has some layers, some banding on it.

206

00:18:35,000 --> 00:18:43,000

And that banding is very similar to some of the banding that I found in photomicrographs of the material that I have from out here.

207

00:18:43,000 --> 00:18:51,000

I think as Georgio is holding this, he's holding something made by another intelligence from someplace we don't know.

208

00:18:51,000 --> 00:18:56,000

And this is truly extraterrestrial.

209

00:18:56,000 --> 00:19:03,000

Is it possible that Georgio is holding an actual fragment of an extraterrestrial craft?

210

00:19:03,000 --> 00:19:10,000

And if so, could even more incredible artifacts still remain in the desert outside Roswell?

211

00:19:11,000 --> 00:19:29,000

Ancient astronaut theorist Georgio Sucas and investigative journalist Linda Moulton-Howe are in an area outside Roswell, New Mexico with geologist Frank Kimbler.

212

00:19:29,000 --> 00:19:35,000

I've got one of the infrared pictures right here that actually is kind of contrast enhanced.

213

00:19:35,000 --> 00:19:46,000

As far as Professor Kimbler is concerned, if one or more extraterrestrial crafts really did crash in the desert, the best place to find more debris is right here.

214

00:19:46,000 --> 00:19:53,000

Right now we are roughly about maybe two, two and a half miles from where the objects skipped down.

215

00:19:53,000 --> 00:20:00,000

According to eyewitness accounts, this is actually the disturbed area right here, which is right where we're going.

216

00:20:00,000 --> 00:20:05,000

And it's right where the eyewitness accounts basically says that the craft left a furl.

217

00:20:05,000 --> 00:20:11,000

So you can tell that something went on. It even looks like there's a little gouge mark that was left by the craft as it came in.

218

00:20:11,000 --> 00:20:18,000

The disturbed area that Professor Kimbler identified has become known as the gouge.

219

00:20:18,000 --> 00:20:30,000

In 2002, an archaeological dig was conducted in this area by the University of New Mexico, Albuquerque, to search for topographical evidence of a UFO crash.

220

00:20:30,000 --> 00:20:43,000

They found a V-shaped gouge that seemed to indicate that something came down and skated across the ground, like a typical aircraft crashing into the ground, leaving a big furrow there.

221

00:20:43,000 --> 00:20:52,000

Author Donald Schmidt, an advisor to the International UFO Museum and Research Center Board of Directors, took part in the excavation.

222

00:20:52,000 --> 00:21:11,000

We flagged that area, did electromagnetic sensory testing of the site to seep through possible samples from the crash, all in an attempt to find a piece of that missing evidence that would demonstrate once and for all,

223

00:21:11,000 --> 00:21:15,000

that this was something extraordinary.

224

00:21:15,000 --> 00:21:27,000

The dig collected countless soil samples from in and around the gouge, but curiously, access to this wealth of potential evidence has been restricted by the Bureau of Land Management ever since.

225

00:21:27,000 --> 00:21:37,000

There's 600 pounds of stuff stored in a vault in the Maxwell Museum at the University of New Mexico that nobody has looked at, and it needs to be looked at.

226

00:21:37,000 --> 00:21:45,000

Demands by UFO researchers to be given access to the contents of the 2002 dig have fallen on deaf ears.

227

00:21:45,000 --> 00:21:58,000

In the nearly two decades since, the V-shaped gouge has been filled in with sediment, but many believe that if there is more debris still to be found, it is most likely to be found here.

228

00:21:58,000 --> 00:22:04,000

We need to get going and we need to get out there so you guys can experience finding some of this stuff, which is amazing.

229

00:22:04,000 --> 00:22:08,000

Alright, let's go explore.

230

00:22:08,000 --> 00:22:10,000

So where do you think is best here and now?

231

00:22:10,000 --> 00:22:14,000

We're in the perfect spot and we're going to cover this whole thing right here.

232

00:22:14,000 --> 00:22:26,000

Uncovering bits of debris in this vast desert is a daunting task, but after nearly a decade spent combing the entire area, Professor Kimbler has pinpointed certain hotspots.

233

00:22:26,000 --> 00:22:33,000

Some of the artifacts he brought with him today were discovered in this very location just within the past month.

234

00:22:33,000 --> 00:22:38,000

So just above the area of the ground, we're going to sweep back and forth like this.

235

00:22:38,000 --> 00:22:44,000

We're going to cover this side to side, back and forth little by little.

236

00:22:44,000 --> 00:22:49,000

I've been out here six or seven or eight hours at a wax swing in this thing until my arms break off.

237

00:22:49,000 --> 00:22:52,000

We can cut across this way.

238

00:22:52,000 --> 00:22:54,000

You're waiting for that beat.

239

00:22:54,000 --> 00:22:56,000

We're looking off in this general direction out here.

240

00:22:56,000 --> 00:23:01,000

The craft basically either had some kind of mechanical failure or something blew up.

241

00:23:01,000 --> 00:23:07,000

Professor Kimbler scans the area along the gouge, meticulously covering every inch.

242

00:23:07,000 --> 00:23:12,000

After nearly two hours, he is not detected any metal objects.

243

00:23:12,000 --> 00:23:19,000

George, you know, my arm is about to break off and I'm kind of hoping that you just might have a little bit better luck than me doing this.

244

00:23:19,000 --> 00:23:25,000

You saw what I was doing. It's already fired up and I'm going to let you swing this and we can just walk.

245

00:23:25,000 --> 00:23:27,000

There you go. It's working perfect.

246

00:23:27,000 --> 00:23:28,000

Excellent.

247

00:23:28,000 --> 00:23:32,000

Maybe you'll be able to get the magic flowing on this.

248

00:23:32,000 --> 00:23:38,000

I think we need to head up right over here because this is right at the base of the hill and there's a bunch of disturbed rocks.

249

00:23:38,000 --> 00:23:42,000

Might be a good place to capture material that has run off.

250

00:23:42,000 --> 00:23:43,000

Oh.

251

00:23:43,000 --> 00:23:49,000

Within just a few minutes of taking over the metal detecting, George-O gets a hit.

252

00:23:49,000 --> 00:23:50,000

I heard something.

253

00:23:50,000 --> 00:23:51,000

Yeah.

254

00:23:51,000 --> 00:23:53,000

There is something.

255

00:23:53,000 --> 00:23:55,000

Oh my God.

256

00:23:58,000 --> 00:24:02,000

There is something there and we need to dig it up. Let me help you find it.

257

00:24:02,000 --> 00:24:04,000

Okay. It's right here somewhere.

258

00:24:04,000 --> 00:24:05,000

We'll find it.

259

00:24:05,000 --> 00:24:06,000

It's right.

260

00:24:06,000 --> 00:24:07,000

We will find it.

261

00:24:07,000 --> 00:24:10,000

You're on top of it. You're right there.

262

00:24:10,000 --> 00:24:11,000

Right there.

263

00:24:14,000 --> 00:24:16,000

See if it's there.

264

00:24:16,000 --> 00:24:18,000

It's in my hand.

265

00:24:18,000 --> 00:24:19,000

Wow.

266

00:24:19,000 --> 00:24:21,000

Now comes the hard part.

267

00:24:21,000 --> 00:24:23,000

It's a piece of wire.

268

00:24:23,000 --> 00:24:25,000

Oh, okay.

269

00:24:25,000 --> 00:24:27,000

A tiny little piece of wire.

270

00:24:27,000 --> 00:24:33,000

We're going to keep it. We're going to take it and have it analyzed because maybe it's got something in it that's weird.

271

00:24:33,000 --> 00:24:35,000

Let's still investigate this.

272

00:24:35,000 --> 00:24:37,000

We need to take it and have it tested.

273

00:24:37,000 --> 00:24:42,000

George-O hands off the metal detector to Linda, who continues along the gouge.

274

00:24:42,000 --> 00:24:48,000

Just a few feet from where George-O detected a piece of wire, they get another hit.

275

00:24:48,000 --> 00:24:52,000

All right.

276

00:24:52,000 --> 00:24:54,000

Pick up your bracelet too.

277

00:24:54,000 --> 00:24:59,000

I tell you what, let's dump it into this hand right here.

278

00:24:59,000 --> 00:25:00,000

There we go.

279

00:25:01,000 --> 00:25:03,000

It's another piece of wire.

280

00:25:03,000 --> 00:25:07,000

This is strange looking though. Why is it so twisted and mangled?

281

00:25:07,000 --> 00:25:08,000

I have no idea.

282

00:25:08,000 --> 00:25:16,000

You said that if there was debris, this would be one of the places because of the geographic terrain right here.

283

00:25:16,000 --> 00:25:21,000

It's runoff and this is what I've used time and time again to find stuff.

284

00:25:21,000 --> 00:25:29,000

As far as George-O and Linda are concerned, any metal objects found in the so-called gouge area are worth examining.

285

00:25:29,000 --> 00:25:38,000

Is it possible that these bits of wire represent debris from the 1947 crash that was overlooked by the military?

286

00:25:46,000 --> 00:25:57,000

Sergeant Melvin E. Brown, who served in the 509th Atomic Bomb Squadron for the U.S. Army Air Force, lies on his deathbed at a local hospital.

287

00:25:57,000 --> 00:26:04,000

With his dying words, Brown reveals to his family a secret that he has kept hidden for nearly 40 years.

288

00:26:04,000 --> 00:26:13,000

A secret about what he saw in 1947 when he was stationed in Roswell, New Mexico.

289

00:26:13,000 --> 00:26:18,000

Sergeant Melvin Brown is another key player in all of this.

290

00:26:18,000 --> 00:26:24,000

He was rounded up by a higher command in the aftermath of the crash.

291

00:26:24,000 --> 00:26:35,000

He was essentially put on guard duty and, intriguingly, there were some low flatbed lorries with tarpaulins over them.

292

00:26:35,000 --> 00:26:46,000

The first opportunity he got, he peeked inside the back of the truck, and there under a canvas tarp were two of the bodies from the crash site.

293

00:26:46,000 --> 00:26:50,000

When he was on his deathbed, he brought up Roswell.

294

00:26:50,000 --> 00:26:55,000

Days before he passed away, he talked about it was not a weather balloon.

295

00:26:55,000 --> 00:27:02,000

It wasn't from here, and I saw two of the bodies and they were not human.

296

00:27:02,000 --> 00:27:07,000

Deathbed testimony is a critical part of the Roswell story.

297

00:27:07,000 --> 00:27:13,000

There are seven. There are many reasons why some of the witnesses stayed quiet for so long.

298

00:27:13,000 --> 00:27:19,000

Fear, threats. All of this plays a part.

299

00:27:19,000 --> 00:27:31,000

Many UFO researchers believe that much like these deathbed testimonies, it is only a matter of time before physical evidence of a crashed extraterrestrial craft finally surfaces.

300

00:27:32,000 --> 00:27:39,000

And some even suggest that such evidence has already been recovered.

301

00:27:39,000 --> 00:27:41,000

Albuquerque, New Mexico.

302

00:27:41,000 --> 00:27:43,000

Here it is, right here.

303

00:27:43,000 --> 00:27:54,000

One day after uncovering wires near the Roswell skip site, Giorgio Suclos and Linda Moulton-Hall have traveled to Theta Plate Lab, where they are met by owner Aaron Velasquez.

304

00:27:54,000 --> 00:27:55,000

Hi.

305

00:27:55,000 --> 00:27:57,000

It's good to finally meet you. Welcome.

306

00:27:57,000 --> 00:28:06,000

Geologist Frank Kimbler arrived earlier with the metal fragments he has collected over the past eight years in and around the Roswell crash site.

307

00:28:06,000 --> 00:28:08,000

Hey, Frank. Good to see you again.

308

00:28:08,000 --> 00:28:10,000

It's good to see you guys again.

309

00:28:10,000 --> 00:28:11,000

We're good.

310

00:28:11,000 --> 00:28:13,000

We're ready for some testing.

311

00:28:13,000 --> 00:28:15,000

We're ready for some testing. This is the exciting part.

312

00:28:15,000 --> 00:28:26,000

Professor Kimbler's fragments will be scientifically tested, along with the wires they found in the desert just yesterday to determine their elemental makeup.

313

00:28:26,000 --> 00:28:30,000

So we're going to use this machine. It's an X-ray fluorescence machine.

314

00:28:30,000 --> 00:28:32,000

It can do the materials identification.

315

00:28:32,000 --> 00:28:36,000

So we're going to hit it with an X-ray beam and it'll tell us what it can tell us.

316

00:28:36,000 --> 00:28:42,000

So it has the ability to show us the elements that are in this within a certain range.

317

00:28:42,000 --> 00:28:43,000

Is that right?

318

00:28:43,000 --> 00:28:45,000

Correct. Correct.

319

00:28:45,000 --> 00:28:49,000

Okay, here we go.

320

00:28:49,000 --> 00:28:50,000

So we're seeing a big peak here.

321

00:28:50,000 --> 00:28:51,000

This is iron.

322

00:28:51,000 --> 00:28:53,000

All right.

323

00:28:53,000 --> 00:28:56,000

What else seems like a match?

324

00:28:56,000 --> 00:28:59,000

Well, selenium.

325

00:28:59,000 --> 00:29:00,000

What in the world?

326

00:29:00,000 --> 00:29:03,000

Yeah, that is exactly my reaction.

327

00:29:03,000 --> 00:29:05,000

What is selenium doing with that?

328

00:29:05,000 --> 00:29:10,000

I know that selenium is used in the electronics industry for semiconductors.

329

00:29:10,000 --> 00:29:18,000

Let's go ahead and take a look at the second wire, please.

330

00:29:18,000 --> 00:29:20,000

That there is the selenium.

331

00:29:20,000 --> 00:29:21,000

Selenium.

332

00:29:21,000 --> 00:29:22,000

Still?

333

00:29:22,000 --> 00:29:28,000

The makeup of the second wire fragment appears to be nearly identical to the first.

334

00:29:28,000 --> 00:29:37,000

Might the presence of selenium, a semiconductor, indicate that they were part of an electronic device.

335

00:29:37,000 --> 00:29:38,000

This one.

336

00:29:38,000 --> 00:29:39,000

Okay.

337

00:29:39,000 --> 00:29:49,000

Frank has also brought with him a number of metal pieces that he has gathered in the same area over the years and has yet to test.

338

00:29:49,000 --> 00:29:56,000

So it looks like it's a match for iron, but I'm curious about that little shoulder.

339

00:29:56,000 --> 00:29:57,000

Copper.

340

00:29:57,000 --> 00:29:58,000

Okay.

341

00:29:58,000 --> 00:29:59,000

Copper.

342

00:29:59,000 --> 00:30:01,000

So I mean, it's a dead-on copper match.

343

00:30:01,000 --> 00:30:03,000

So we know we've got some copper in there.

344

00:30:03,000 --> 00:30:10,000

And then this stuff over here, I'd call it a good match for zirconium.

345

00:30:10,000 --> 00:30:11,000

For zirconium.

346

00:30:11,000 --> 00:30:12,000

Wow.

347

00:30:12,000 --> 00:30:13,000

Yeah.

348

00:30:13,000 --> 00:30:17,000

That would be unusual.

349

00:30:17,000 --> 00:30:21,000

This is a good match for molybdenum.

350

00:30:21,000 --> 00:30:26,000

So now we've got not only zirconium in there, but we have molybdenum.

351

00:30:26,000 --> 00:30:30,000

And those are considered impurities, Giorgio, but they shouldn't be there.

352

00:30:30,000 --> 00:30:34,000

But what does that mean when you say it shouldn't be there?

353

00:30:34,000 --> 00:30:38,000

Because that's unusual for any alloys that I looked at previously.

354

00:30:38,000 --> 00:30:40,000

It's part of our high-tech industry.

355

00:30:40,000 --> 00:30:42,000

It's weird for me, too.

356

00:30:42,000 --> 00:30:46,000

So you'd see molybdenum in a stainless steel, but not an iron copper alloy.

357

00:30:46,000 --> 00:30:47,000

Yeah.

358

00:30:47,000 --> 00:30:48,000

I agree with that.

359

00:30:48,000 --> 00:30:57,000

And zirconium has been found in some cases where material has been tested and it was

360

00:30:57,000 --> 00:30:59,000

somehow related to a crash.

361

00:30:59,000 --> 00:31:02,000

I've read across that myself.

362

00:31:02,000 --> 00:31:08,000

In 2009, a Freedom of Information Act request brought to light a research study conducted

363

00:31:08,000 --> 00:31:12,000

at Wright-Patterson Air Force Base in 1949.

364

00:31:12,000 --> 00:31:17,000

The site in Ohio, where the wreckage from Roswell was taken.

365

00:31:17,000 --> 00:31:22,000

According to released documents, metal urges discovered zirconium while examining pieces

366

00:31:22,000 --> 00:31:28,000

of strange metal recovered in the New Mexico desert.

367

00:31:28,000 --> 00:31:33,000

Is this a piece that you found where we were walking around?

368

00:31:33,000 --> 00:31:34,000

Absolutely.

369

00:31:34,000 --> 00:31:38,000

In fact, if we could bring the picture back up, there's an interesting little part on this

370

00:31:38,000 --> 00:31:42,000

that says this is one that I talked about before that has explosive cratering on it

371

00:31:42,000 --> 00:31:44,000

because it went through an explosion.

372

00:31:44,000 --> 00:31:48,000

And I could show that and prove it on that piece.

373

00:31:48,000 --> 00:31:50,000

So do you scan around?

374

00:31:50,000 --> 00:31:51,000

See that right there?

375

00:31:51,000 --> 00:31:52,000

That pit.

376

00:31:52,000 --> 00:31:56,000

That pit right there is an explosive crater.

377

00:31:56,000 --> 00:31:58,000

Explosive cratering?

378

00:31:58,000 --> 00:32:04,000

Could this curious feature indicate that the metal fragments Frank found in separate locations

379

00:32:04,000 --> 00:32:07,000

near Roswell came from exploded objects?

380

00:32:07,000 --> 00:32:13,000

Perhaps even one or more extraterrestrial cranes.

381

00:32:13,000 --> 00:32:18,000

As the team tests the rest of the metal fragments, they are surprised to discover that nearly

382

00:32:18,000 --> 00:32:22,000

all of them seem to have the same elemental makeup.

383

00:32:22,000 --> 00:32:25,000

There's definitely a similarity.

384

00:32:25,000 --> 00:32:29,000

I mean, it looks like it's the same materials just in different proportions.

385

00:32:29,000 --> 00:32:31,000

Why?

386

00:32:31,000 --> 00:32:33,000

So it could be the same stuff.

387

00:32:33,000 --> 00:32:35,000

I think we have the proof.

388

00:32:35,000 --> 00:32:37,000

We just need to get it more testing done.

389

00:32:37,000 --> 00:32:41,000

I can't wait to learn what we'll find out next.

390

00:32:41,000 --> 00:32:46,000

The battery of tests being performed by the U.S. Army on Linda's layered metal fragments

391

00:32:46,000 --> 00:32:50,000

could take months or even years.

392

00:32:50,000 --> 00:32:56,000

In the meantime, the material collected from the Roswell skip site has been sent to another lab

393

00:32:56,000 --> 00:32:58,000

for further analysis.

394

00:32:58,000 --> 00:33:04,000

But curiously, one element that has already been detected in Professor Kimbler's materials

395

00:33:04,000 --> 00:33:10,000

has also been found in another metal fragment suspected to be debris from a UFO

396

00:33:10,000 --> 00:33:16,000

and from a location on the other side of the world.

397

00:33:19,000 --> 00:33:24,000

The Roswell incident remains the most well-known UFO event in history,

398

00:33:24,000 --> 00:33:29,000

but there have been reports of numerous other UFO crashes all over the world,

399

00:33:29,000 --> 00:33:33,000

as well as the recovery of strange metal debris.

400

00:33:33,000 --> 00:33:39,000

In 1991, geologists searching for gold deposits in Russia's Ural Mountains

401

00:33:39,000 --> 00:33:42,000

made a highly unexpected discovery.

402

00:33:42,000 --> 00:33:51,000

At depths of over 30 feet, they found a scattering of tiny metal coils and springs.

403

00:33:51,000 --> 00:33:56,000

Russian scientists are finding these tiny nano particles.

404

00:33:56,000 --> 00:33:58,000

They found thousands of these things.

405

00:33:58,000 --> 00:34:00,000

They have to look at them through microscopes.

406

00:34:01,000 --> 00:34:06,000

Some of them are just 1-10,000th of an inch in size.

407

00:34:06,000 --> 00:34:11,000

They're all kinds of spirals and tiny machined bits.

408

00:34:11,000 --> 00:34:17,000

When they look at it, they seem to be exactly like the kind of tiny nano particles and machine bits

409

00:34:17,000 --> 00:34:20,000

that we are creating today.

410

00:34:21,000 --> 00:34:25,000

What you see under the electromicroscope is mind-boggling

411

00:34:25,000 --> 00:34:31,000

because you see spirals, you see definitely something where the scientists

412

00:34:31,000 --> 00:34:41,000

who investigated this came to the conclusion that these items are artificially made out of tungsten and molybdenum.

413

00:34:41,000 --> 00:34:49,000

And so that right there is incredibly interesting because that was found exactly at the skip site.

414

00:34:49,000 --> 00:34:57,000

Molybdenum is the same material detected in the metal fragments that Frank Kimbler found in the desert outside Roswell.

415

00:34:57,000 --> 00:35:02,000

It is a super-strong element commonly used in NASA spacecraft.

416

00:35:04,000 --> 00:35:09,000

These microscopic spirals were made of Wolfram and molybden.

417

00:35:09,000 --> 00:35:15,000

The melting temperature for Wolfram is above 6,000 degrees Fahrenheit

418

00:35:15,000 --> 00:35:19,000

and for molybden is about 5,000 degrees Fahrenheit.

419

00:35:21,000 --> 00:35:28,000

Some version of NASA from some other star system could send a probe here to Earth and it could fail

420

00:35:28,000 --> 00:35:32,000

and crash into Earth and we would look at it and think,

421

00:35:32,000 --> 00:35:34,000

wow, where did this come from?

422

00:35:34,000 --> 00:35:40,000

Maybe one day we might be creating our own Roswell when we send our first probe to the nearest star.

423

00:35:41,000 --> 00:35:47,000

Ancient astronaut theorists point out that dozens of visitors to the Ural Mountains have reported encounters

424

00:35:47,000 --> 00:35:52,000

with strange, cigar-shaped craft trailing fire across the sky.

425

00:35:53,000 --> 00:35:56,000

Could this be the Russian Roswell?

426

00:35:57,000 --> 00:36:06,000

Indeed, people living in the Ural Mountains, maybe more often than people living in other parts of Russia,

427

00:36:06,000 --> 00:36:10,000

witness some strange phenomena in the air and on the ground.

428

00:36:12,000 --> 00:36:19,000

Ural Mountains are a very interesting space in the paranormal history of Russia

429

00:36:19,000 --> 00:36:25,000

and I've studied a lot because there have always been incredible UFO sightings

430

00:36:25,000 --> 00:36:27,000

in the Ural Mountains.

431

00:36:27,000 --> 00:36:32,000

There are stories of civilizations that have disappeared or went under the ground,

432

00:36:32,000 --> 00:36:37,000

the so-called dwarf people in the Ural Mountains.

433

00:36:37,000 --> 00:36:43,000

If the nanoparticles discovered in the Ural Mountains aren't debris from a crashed alien craft,

434

00:36:43,000 --> 00:36:50,000

they bring up another intriguing possibility because based on how deep below the Earth they were found,

435

00:36:50,000 --> 00:36:54,000

they could have been deposited there thousands of years ago.

436

00:36:55,000 --> 00:37:00,000

There's thinking that these things must be over 50,000 years old.

437

00:37:00,000 --> 00:37:08,000

So is this also a debris field from a crashed extraterrestrial craft in the Ural Mountains?

438

00:37:08,000 --> 00:37:15,000

There could be craft sites all over the world that are hundreds of thousands of years old,

439

00:37:15,000 --> 00:37:18,000

right up to modern times.

440

00:37:19,000 --> 00:37:23,000

Rumors abound that there are facilities located all over the world

441

00:37:23,000 --> 00:37:27,000

holding the remnants of crashed extraterrestrial craft,

442

00:37:27,000 --> 00:37:35,000

like in the remote hills of China, at Pine Gap, in Australia, and Rudlow Manor, in England.

443

00:37:35,000 --> 00:37:41,000

Who knows if over the chronology of the history of planet Earth,

444

00:37:41,000 --> 00:37:46,000

there were more craft just like at Roswell that crashed.

445

00:37:47,000 --> 00:37:53,000

Is it possible that Roswell is just one of many locations on planet Earth

446

00:37:53,000 --> 00:37:58,000

where debris from crashed extraterrestrial craft can be found?

447

00:37:58,000 --> 00:38:04,000

Perhaps further testing that was conducted on the metal fragments on Earth near the Roswell Skip site

448

00:38:04,000 --> 00:38:10,000

will reveal indisputable evidence of alien visitation.

449

00:38:11,000 --> 00:38:16,000

Albuquerque, New Mexico.

450

00:38:16,000 --> 00:38:23,000

Giorgio Suclos meets Linda Moulton-Hall at her home two weeks after sending out the materials collected at the Roswell crash site

451

00:38:23,000 --> 00:38:27,000

to a laboratory in Dallas, Texas for further testing.

452

00:38:27,000 --> 00:38:34,000

Erin Velasquez, who performed the initial testing, has received and analyzed the data.

453

00:38:34,000 --> 00:38:35,000

Hi Erin.

454

00:38:35,000 --> 00:38:36,000

Good to see you again. How are you?

455

00:38:36,000 --> 00:38:38,000

Nice to see you guys. Been well.

456

00:38:38,000 --> 00:38:42,000

We're sitting here on pins and needles. So what can you show us?

457

00:38:42,000 --> 00:38:49,000

So we found that of the samples of Frank's material, three of them, while they look like the rest,

458

00:38:49,000 --> 00:38:53,000

have a very, very high concentration of carbon in them.

459

00:38:53,000 --> 00:38:56,000

Much more than the aluminum, despite what they look like.

460

00:38:56,000 --> 00:39:00,000

There's been some supposition that that could be from high heat.

461

00:39:00,000 --> 00:39:02,000

So that was odd.

462

00:39:02,000 --> 00:39:09,000

But odd or still is we had one sample of the five, which had indium, which is a very rare element.

463

00:39:09,000 --> 00:39:13,000

So it's not the sort of thing that you would get by accident, guaranteed.

464

00:39:13,000 --> 00:39:17,000

So are we talking about something that's really strange here?

465

00:39:17,000 --> 00:39:19,000

Yes, yes.

466

00:39:19,000 --> 00:39:23,000

Well, what about those wires that we found?

467

00:39:23,000 --> 00:39:25,000

So that is also odd.

468

00:39:25,000 --> 00:39:31,000

So the elements that we found with the wire were all explainable except it too had indium in it.

469

00:39:31,000 --> 00:39:35,000

What about evidence of impact and heat?

470

00:39:35,000 --> 00:39:37,000

Yes, that's another thing that we noted.

471

00:39:37,000 --> 00:39:43,000

It was very obvious under the scanning electron microscope that these had been subjected to very, very high heat.

472

00:39:43,000 --> 00:39:44,000

They were melted.

473

00:39:44,000 --> 00:39:47,000

There was also some shearing apparent.

474

00:39:47,000 --> 00:39:54,000

So these were cut or sliced by some action as well over the years or at an impact.

475

00:39:54,000 --> 00:39:58,000

That's incredible.

476

00:39:58,000 --> 00:40:01,000

Yes, it's very interesting.

477

00:40:01,000 --> 00:40:06,000

For Giorgio and Linda, the results are nothing less than astonishing.

478

00:40:06,000 --> 00:40:14,000

Multiple tests have now confirmed that the materials recovered at the Roswell skip site are of a highly unusual nature

479

00:40:14,000 --> 00:40:20,000

and show evidence of having been subjected to an explosion.

480

00:40:20,000 --> 00:40:28,000

Might the strange layered material being examined by the U.S. Army proved to be even more extraordinary?

481

00:40:28,000 --> 00:40:36,000

In the Bismuth Magnesium Zinc, we're dealing with technologies that astound people who are in exotic metals

482

00:40:36,000 --> 00:40:40,000

because they couldn't make the Bismuth Magnesium Zinc.

483

00:40:40,000 --> 00:40:44,000

The genetic physicist tells me this is the key.

484

00:40:44,000 --> 00:40:58,000

This is the crux of how this kind of technology makes possible the unidentified flying objects move in such astounding ways.

485

00:40:58,000 --> 00:40:59,000

Whoa!

486

00:40:59,000 --> 00:41:09,000

And in this whole issue of finding more materials from UFOs, I'm still on the trail.

487

00:41:10,000 --> 00:41:21,000

Oftentimes I'm told that to suggest that a UFO, an extraterrestrial craft, crashed at Roswell is

nonsensical

488

00:41:21,000 --> 00:41:28,000

because extraterrestrials can fly across the galaxy and then they crash on Earth.

489

00:41:28,000 --> 00:41:34,000

Well, yeah, you know why? Because it's technology and technology fails.

490

00:41:35,000 --> 00:41:40,000

I think that there may be more material there to be found.

491

00:41:40,000 --> 00:41:47,000

Is physical evidence of an extraterrestrial presence on Earth right beneath our feet?

492

00:41:47,000 --> 00:41:56,000

Could there be debris from crashed alien craft, not only in the New Mexico desert, but all across the world?

493

00:41:56,000 --> 00:42:02,000

Perhaps the materials that have already been recovered will soon provide the ultimate proof

494

00:42:02,000 --> 00:42:08,000

that we are not alone in the universe or even on our own planet.
