

1

00:00:00,000 --> 00:00:06,000

The human genome remains one of modern science's greatest mysteries.

2

00:00:06,000 --> 00:00:10,000

We still understand very little about our genetic history.

3

00:00:10,000 --> 00:00:13,000

Are homosaviors a miracle of nature?

4

00:00:13,000 --> 00:00:17,000

Or could there be another, more profound explanation?

5

00:00:17,000 --> 00:00:27,000

The evolution of the humanoid primate on this planet is because of the genetic manipulation of extraterrestrial entities.

6

00:00:27,000 --> 00:00:34,000

The more we look into our DNA, we recognize that something happened.

7

00:00:34,000 --> 00:00:44,000

Ancient astronaut theorist George O'Souklos and author David Childress are meeting with experts in religion, science and mythology.

8

00:00:44,000 --> 00:00:51,000

For a provocative discussion on the truth behind the origin and future of mankind.

9

00:00:51,000 --> 00:00:56,000

Extraterrestrials are trying to influence our DNA and upgrade it.

10

00:00:56,000 --> 00:01:03,000

I think Earth has been a hybridization program all along.

11

00:01:03,000 --> 00:01:08,000

There is a doorway in the universe.

12

00:01:08,000 --> 00:01:12,000

Beyond it is the promise of truth.

13

00:01:12,000 --> 00:01:17,000

It demands we question everything we have ever been taught.

14

00:01:17,000 --> 00:01:21,000

The evidence is all around us.

15

00:01:21,000 --> 00:01:25,000

The future is right before our eyes.

16

00:01:25,000 --> 00:01:31,000

We are not alone. We have never been alone.

17

00:01:37,000 --> 00:01:42,000

I'm excited to be here with you guys to talk about DNA.

18

00:01:42,000 --> 00:01:51,000

Because the ancient astronaut theory for 50 years now has suggested that man and animal, they were essentially the same.

19

00:01:51,000 --> 00:01:59,000

But then the so-called gods arrived and they saw that one of these species had potential.

20

00:01:59,000 --> 00:02:06,000

And this is when they changed the genetic makeup in order to make us intelligent.

21

00:02:06,000 --> 00:02:12,000

I've been doing a lot of research about DNA and I think we can see there's some sort of design.

22

00:02:12,000 --> 00:02:16,000

There's intelligence behind this whole creation.

23

00:02:16,000 --> 00:02:21,000

This is really interesting because recently scientists have been able to start manipulating DNA.

24

00:02:21,000 --> 00:02:28,000

Right. And the more we look into the science of our DNA and into the science of evolution,

25

00:02:28,000 --> 00:02:32,000

we recognize that something happened.

26

00:02:32,000 --> 00:02:39,000

Something happened in our DNA that cannot be explained away with just coincidence.

27

00:02:39,000 --> 00:02:43,000

Remember in the Bible it says in Genesis chapter 1,

28

00:02:43,000 --> 00:02:49,000

let us make man in our own image curious, plural terminology.

29

00:02:49,000 --> 00:02:50,000

Right.

30

00:02:50,000 --> 00:02:56,000

Well, the ancients asked who is God talking to and the response was he was talking to his angels.

31

00:02:56,000 --> 00:03:02,000

And if we understand in our modern terms that these angels might have been extraterrestrials,

32

00:03:02,000 --> 00:03:08,000

there you go, right from the Bible, you have a clear definitive statement of an extraterrestrial

development

33

00:03:08,000 --> 00:03:09,000

of human DNA.

34

00:03:09,000 --> 00:03:10,000

Absolutely.

35

00:03:10,000 --> 00:03:13,000

And DNA holds information, but it's programmable.

36

00:03:15,000 --> 00:03:21,000

DNA is the molecule that defines every living creature on Earth.

37

00:03:21,000 --> 00:03:28,000

DNA is the molecule of life itself with a code, a molecule with a code on it.

38

00:03:28,000 --> 00:03:36,000

The DNA code is essentially like a language consisting of genes that confer particular traits like

39

00:03:36,000 --> 00:03:41,000

eye color, hair color, all these traits basically that we recognize.

40

00:03:41,000 --> 00:03:48,000

In a sense, DNA is the program that gets run by the computer and the computer is the cell.

41

00:03:48,000 --> 00:03:57,000

The cell executes the instructions in the DNA molecule in order for organisms to live and develop.

42

00:03:57,000 --> 00:04:02,000

And it depends a little bit on the environment and other things that are happening.

43

00:04:02,000 --> 00:04:09,000

And that's why, for example, two identical twins, even though they have the same DNA, are not precisely identical.

44

00:04:11,000 --> 00:04:20,000

In 1859, nearly a century before the discovery of DNA, English biologist Charles Darwin theorized

45

00:04:20,000 --> 00:04:28,000

in his controversial book on the origin of species that every living thing was the product of natural selection,

46

00:04:28,000 --> 00:04:34,000

evolving over millions of years to adapt and survive in changing environments.

47

00:04:34,000 --> 00:04:42,000

When scientists later discovered DNA and its ability to adapt, it seemed to be in line with Darwin's theory.

48

00:04:42,000 --> 00:04:51,000

But today, with a far greater breadth of scientific knowledge, a number of Darwin's assumptions have been found to be incorrect.

49

00:04:51,000 --> 00:04:54,000

And one burning question remains.

50

00:04:54,000 --> 00:05:02,000

If evolution is the only factor in the development of life on Earth, then why are humans so incredibly unique?

51

00:05:03,000 --> 00:05:09,000

We don't see dolphins building cars. We don't see elephants building houses, you know.

52

00:05:09,000 --> 00:05:14,000

That might sound trite, but it's a fact that these animals just simply haven't progressed and advanced in the way we have.

53

00:05:14,000 --> 00:05:21,000

There's something definitely different about the human race, and the big question is, why is that?

54

00:05:22,000 --> 00:05:28,000

Nobody has ever denied that evolution exists because there is a fossil record.

55

00:05:28,000 --> 00:05:35,000

However, even Darwin himself, in the origin of species, in the last chapter, he says, you know, I like my theory,

56

00:05:35,000 --> 00:05:41,000

but there's something that does not make sense, and this is why we have the so-called missing link.

57

00:05:41,000 --> 00:05:51,000

And the ancient astronaut theory suggests that that missing piece is an external, artificial mutation of our genetic makeup.

58

00:05:51,000 --> 00:06:01,000

I mean, we know that's possible. Even now, scientists are cutting DNA, you know, isolating the gene that is responsible for this, responsible for that, moving things around.

59

00:06:01,000 --> 00:06:08,000

DNA is essentially digital. It's information, right? But it's programmable. You can cut, copy, paste, and edit it.

60

00:06:08,000 --> 00:06:17,000

So after Crick and Watson discovered the double helix nature of DNA, it launches this whole search into molecular biology, bioengineering, and so forth.

61

00:06:19,000 --> 00:06:29,000

In 1953, molecular biologists James D. Watson and Francis Crick made one of the most important scientific breakthroughs in human history,

62

00:06:29,000 --> 00:06:34,000

when they identified the double helix structure of DNA.

63

00:06:35,000 --> 00:06:46,000

The discovery led to a radical new era of genetic experimentation, culminating in a revolutionary method to edit DNA, known as CRISPR.

64

00:06:47,000 --> 00:06:53,000

Developed in 2012 by scientists Jennifer Doudna and Emmanuel Charpentier,

65

00:06:54,000 --> 00:07:05,000

CRISPR, which stands for Cluster Regularly Interspaced Short Palindromic Repeats, is a tool that enables scientists to target and modify individual genes.

66

00:07:07,000 --> 00:07:14,000

CRISPR can be thought of as a kind of a genetic scissors that can snip DNA at a desired location.

67

00:07:14,000 --> 00:07:22,000

And what that allows people to do is effectively cut out one sequence and paste in another sequence, just like you might do in a word processor.

68

00:07:23,000 --> 00:07:29,000

CRISPR is incredibly powerful because it allows DNA sequences to be altered in desired ways.

69

00:07:29,000 --> 00:07:39,000

It could be used to improve crops, it could be used to fight pathogens, it could be used to confer immunity to a disease,

70

00:07:39,000 --> 00:07:48,000

and of course it could be used for other purposes like creating blue eyes from brown eyes or blonde hair from brown hair.

71

00:07:49,000 --> 00:08:00,000

You know, one of the most fascinating things I've found about the whole CRISPR scenario and why it's so important too is that we can alter and edit DNA so then it's passed on to future generations.

72

00:08:00,000 --> 00:08:04,000

And that is kind of a really dangerous premise.

73

00:08:04,000 --> 00:08:07,000

But that's a very controversial issue today in modern science.

74

00:08:07,000 --> 00:08:11,000

We're doing the work of angels by directing evolution.

75

00:08:12,000 --> 00:08:22,000

While genetic engineering of humans may seem like an issue that won't need to be faced for many years to come, it has in fact already happened.

76

00:08:22,000 --> 00:08:33,000

In November 2018, Chinese biophysics researcher Ha-Jeon Kui made the shocking announcement that he used CRISPR on twin female embryos.

77

00:08:33,000 --> 00:08:40,000

And the plan to monitor the twins' health for the next 18 years.

78

00:08:40,000 --> 00:08:49,000

In a bold effort to make the twins immune to HIV, he deleted a single gene known as CCR5.

79

00:08:49,000 --> 00:08:58,000

Although the procedure was a success, his unauthorized actions to tamper with human biology on such an audacious scale

80

00:08:58,000 --> 00:09:03,000

led Chinese authorities to incarcerate him for a three-year prison sentence.

81

00:09:03,000 --> 00:09:14,000

We just don't know enough about the long-term effects of gene editing to be performing those types of procedures on humans at this point.

82

00:09:14,000 --> 00:09:25,000

As far as these experiments are concerned, what they demonstrated was that scientists now have the ability to quite literally play God.

83

00:09:26,000 --> 00:09:41,000

Further research published in the journal Cell showed that the removal of gene CCR5 also significantly improves memory, cognition, and even the brain's ability to repair itself after a stroke.

84

00:09:41,000 --> 00:09:53,000

These developments, as ethically complicated as they are, prove that DNA can in fact be altered to advance the evolution of human beings.

85

00:09:56,000 --> 00:10:10,000

The way that I'm looking at this is this whole CRISPR technology is simply a rediscovery of technology that existed way before and has been used here on planet Earth.

86

00:10:10,000 --> 00:10:13,000

Perhaps, of course, not by human beings.

87

00:10:13,000 --> 00:10:29,000

You know, this is something that Eric von Daniken has proposed in chariots of the gods over 50 years ago that the ultimate proof of an extraterrestrial intervention will not be found in a crashed spaceship somewhere

88

00:10:29,000 --> 00:10:35,000

or a ray gun that's discovered in a cave, but rather in our DNA.

89

00:10:35,000 --> 00:10:48,000

Just recently in 2018, this Australian geneticist discovered these DNA knots, which they call the iMotif, and they think that this is perhaps what's grading the modern human.

90

00:10:48,000 --> 00:10:52,000

So one has to ask the question, who did that?

91

00:10:52,000 --> 00:11:09,000

Actually, in 2018, this Australian geneticist discovered these knots in our DNA, and some of the doctors think that this is perhaps what's grading the modern human.

92

00:11:09,000 --> 00:11:20,000

This is the major discovery that they've made, that our DNA doesn't necessarily look like a double helix all the time, it can take on different expressions, but this one is like really sticking out.

93

00:11:20,000 --> 00:11:24,000

But these knots have been there from the very beginning of our DNA.

94

00:11:24,000 --> 00:11:29,000

And I'm going to predict that they have a very significant role to play in our evolutionary future.

95

00:11:29,000 --> 00:11:32,000

I wouldn't be surprised if they find that, because they can.

96

00:11:32,000 --> 00:11:35,000

We don't believe anything is a coincidence.

97

00:11:35,000 --> 00:11:36,000

Right.

98

00:11:36,000 --> 00:11:50,000

In April 2018, Dr. Daniel Christ at the Garvin Institute of Medical Research in Sydney, Australia, announced that he had discovered a curious anomaly in human DNA.

99

00:11:50,000 --> 00:12:00,000

Dr. Christ and his team identified sections of the double helix genetic structure that are twisted into what they described as knots.

100

00:12:01,000 --> 00:12:13,000

While the function of these knots remains largely a mystery, scientists suspect these unusual DNA shapes may play an essential role in human evolution.

101

00:12:13,000 --> 00:12:21,000

We don't exactly know the function, but presumably because it's changing the shape of the DNA.

102

00:12:21,000 --> 00:12:28,000

One of the proposed ideas is that they may be involved in gene regulation.

103

00:12:29,000 --> 00:12:41,000

We've known for more than 50 years that the way genes are turned on and off, the way they're regulated, is at least as important as what the genes actually do once they're turned on.

104

00:12:43,000 --> 00:12:53,000

Is it possible, as ancient astronaut theorists propose, that these mysterious DNA knots not only played an important role in the evolution of humankind,

105

00:12:53,000 --> 00:13:00,000

but are physical evidence that extraterrestrials manipulated human DNA?

106

00:13:01,000 --> 00:13:08,000

There are these parts inside our DNA that do not correspond to that double helix structure.

107

00:13:08,000 --> 00:13:20,000

How crazy is that? Because through science, we've learned that it seems as if those parts were somehow extraordinary from the rest of the structure.

108

00:13:20,000 --> 00:13:30,000

It's almost like added information. I think the common denominator of this whole discussion is that DNA is changeable, is malleable.

109

00:13:30,000 --> 00:13:42,000

More and more question marks arise because we now have evidence that some of the things that happened with our own human DNA are not coincidental.

110

00:13:42,000 --> 00:13:48,000

So one has to ask the question, what was the purpose of it and who did that?

111

00:13:48,000 --> 00:13:58,000

And of course, the ancient astronaut theory suggests that this was done through a targeted manipulation of our genes by artificial means.

112

00:13:58,000 --> 00:14:05,000

This goes into the old Kabbalistic beliefs about the pre-adamic civilizations, that we had a humanoid civilization.

113

00:14:05,000 --> 00:14:13,000

And then along came God, the angels, and made Adam out of that which was beforehand.

114

00:14:15,000 --> 00:14:20,000

According to an ancient Jewish interpretation of the Bible known as the Kabbalah,

115

00:14:20,000 --> 00:14:25,000

Adam was created from a human-like race that already existed on Earth.

116

00:14:26,000 --> 00:14:32,000

There are some who believe this points to the genetic engineering of Homo sapiens,

117

00:14:32,000 --> 00:14:39,000

and that further manipulation of human DNA can be found in the biblical story of the Garden of Eden.

118

00:14:39,000 --> 00:14:47,000

Let's look then at the story of the Garden of Eden and Adam and Eve, living blissfully in this Edenic garden.

119

00:14:47,000 --> 00:14:54,000

And then suddenly this serpent being comes to them and offers them some special food to eat.

120

00:14:54,000 --> 00:14:56,000

Who is this serpent?

121

00:14:56,000 --> 00:15:04,000

Ancient legend tells us that the serpent in the Garden of Eden was actually a humanoid form.

122

00:15:04,000 --> 00:15:08,000

It stood erect, had arms and had legs, clearly it spoke.

123

00:15:08,000 --> 00:15:15,000

The serpent talks to Eve and says, hey, have a piece of fruit, eats Adam too.

124

00:15:15,000 --> 00:15:25,000

And suddenly they completely change into what we would call modern people who are now creating clothing, creating ornaments.

125

00:15:25,000 --> 00:15:31,000

They're building houses and vehicles, tools and things like that.

126

00:15:31,000 --> 00:15:44,000

We have in a sense an evolutionary leap from primitive humans to more modern humans who are more aware of themselves and their surroundings.

127

00:15:46,000 --> 00:15:54,000

According to ancient astronaut theorists, strikingly similar creation myths exist in ancient cultures around the world.

128

00:15:54,000 --> 00:16:02,000

For instance, Mayan tradition describes how humans were created by a feathered serpent known as Kukulcan.

129

00:16:02,000 --> 00:16:14,000

And ancient Chinese stories portray the first emperor, Wang Di, as the offspring of a human woman and a dragon god who descended from the sky.

130

00:16:14,000 --> 00:16:20,000

But perhaps most remarkable of all is the creation story of the Sumerians,

131

00:16:21,000 --> 00:16:28,000

who are believed by most mainstream archaeologists to be the earliest human civilization on Earth.

132

00:16:28,000 --> 00:16:39,000

Approximately 4,000 years ago, the Sumerians recorded stories about powerful beings called the Anunnaki, who descended to Earth from the sky.

133

00:16:40,000 --> 00:16:43,000

One of these figures was known as Enki.

134

00:16:44,000 --> 00:16:55,000

And according to author Zechariah Sitchin, who spent years studying the Sumerian cuneiform tablets, Enki is the equivalent of the serpent in the Garden of Eden.

135

00:16:56,000 --> 00:17:00,000

Enki is the god of technology of the Anunnaki.

136

00:17:01,000 --> 00:17:17,000

Zechariah Sitchin noticed that Enki was symbolized by a serpent, and he made the simple leap to suggest that he, in fact, is the serpent in the Garden of Eden that was responsible for putting us on our current path of evolution.

137

00:17:18,000 --> 00:17:23,000

Enki altered our human DNA in order to awaken us and to illuminate us.

138

00:17:23,000 --> 00:17:39,000

Ancient astronaut theory proposes that this actually is extraterrestrial intervention, that as the Egyptian and Sumerian stories tell us, beings came from other worlds and activated that part of our brain that makes us human.

139

00:17:40,000 --> 00:17:50,000

What's fascinating to me is that all around the world, in ancient cultures, there are these stories of a so-called tree of life.

140

00:17:51,000 --> 00:18:00,000

And in ancient Sumeria, you have this tree of life. It looks like, for all intents and purposes, like a double helix structure.

141

00:18:01,000 --> 00:18:09,000

Then in Portugal, in Sylve, there is this egg, this ancient giant egg that was discovered, and it has a double helix structure on there.

142

00:18:10,000 --> 00:18:13,000

Or even the Caduceus symbol in ancient Greece.

143

00:18:14,000 --> 00:18:17,000

Of Hermes, yeah, it's a double helix. So yeah, we're looking at a DNA strand.

144

00:18:17,000 --> 00:18:23,000

Let's go to a really direct one, ancient Egypt, Ptah. You look up his name in the Egyptian Hieroglyphic Dictionary by Budgen.

145

00:18:24,000 --> 00:18:26,000

He says, he is the God that fashioned the human body.

146

00:18:27,000 --> 00:18:29,000

And you look at his hieroglyph, and there's a double helix.

147

00:18:30,000 --> 00:18:32,000

That cannot be by chance.

148

00:18:33,000 --> 00:18:40,000

And so this idea, to me, suggests that someone wanted to leave behind a message about our DNA.

149

00:18:41,000 --> 00:18:46,000

I'll be doing a lot of research about DNA lately.

150

00:18:47,000 --> 00:18:51,000

I was talking to Gary Nolan, who is a very well-known geneticist at Stanford.

151

00:18:52,000 --> 00:19:00,000

And he was telling me that they realized that every 600,000 years DNA doubles in complexity.

152

00:19:01,000 --> 00:19:08,000

So they kept going back to the very first time where it started, where it couldn't double anymore.

153

00:19:08,000 --> 00:19:11,000

And that was nine billion years ago.

154

00:19:12,000 --> 00:19:15,000

They're saying that our DNA started nine billion years ago.

155

00:19:16,000 --> 00:19:17,000

And Earth is how old?

156

00:19:18,000 --> 00:19:19,000

Four and a half billion.

157

00:19:20,000 --> 00:19:21,000

So how could we do that?

158

00:19:22,000 --> 00:19:23,000

Our DNA is twice as old as Earth.

159

00:19:24,000 --> 00:19:25,000

So it didn't come from Earth then.

160

00:19:26,000 --> 00:19:31,000

And I think we need to talk about Francis Crick for a moment too, because even Crick himself believed that there was some kind of an intervention.

161

00:19:32,000 --> 00:19:36,000

Two decades after discovering the structure of DNA in 1953,

162

00:19:36,000 --> 00:19:40,000

Francis Crick made a statement that shocked the scientific world.

163

00:19:41,000 --> 00:19:50,000

He had come to the conclusion that human DNA was far too complex to have evolved over the 4.5 billion-year history of planet Earth.

164

00:19:52,000 --> 00:20:03,000

Francis Crick asked the question, could it be that the extremely complex DNA that we have in us was ceded from outside,

165

00:20:03,000 --> 00:20:11,000

was an intelligent entity involved in sort of flooding the Earth with the genes that made humans?

166

00:20:12,000 --> 00:20:16,000

And I think that this is certainly a logical possibility.

167

00:20:17,000 --> 00:20:32,000

Francis Crick wrote and promoted the idea that it was possible that DNA may have been ceded on this planet from another star system

168

00:20:33,000 --> 00:20:36,000

in a process known as directed panspermia.

169

00:20:37,000 --> 00:20:45,000

Francis Crick comes up of course with the idea of directed panspermia as an explanation of an extraterrestrial civilization that shoots DNA,

170

00:20:46,000 --> 00:20:49,000

loads it up on a rocket, shoots it out into space, and this is the origin of human DNA.

171

00:20:50,000 --> 00:20:52,000

So this is Francis Crick himself as a believer.

172

00:20:53,000 --> 00:20:55,000

The man who discovered DNA won the Nobel Prize for it.

173

00:20:56,000 --> 00:20:57,000

You don't get a greater authority than that.

174

00:20:58,000 --> 00:21:01,000

He said it was impossible that this could have happened spontaneously.

175

00:21:01,000 --> 00:21:09,000

So are you talking about intervention in the middle of the evolution or from the very beginning?

176

00:21:10,000 --> 00:21:11,000

Both.

177

00:21:12,000 --> 00:21:19,000

In my opinion, someone changed the genetic makeup into humanoid species.

178

00:21:20,000 --> 00:21:26,000

I'm glad you brought that up, Georgia, because geneticists have discovered other types of hominins in our DNA, denisobens and others.

179

00:21:27,000 --> 00:21:34,000

In recent years, new discoveries in genetic research have profoundly altered the timeline of human evolution.

180

00:21:35,000 --> 00:21:43,000

When you look at the evolution of humanity and the different species that have existed throughout time, early on we had a pretty simple story.

181

00:21:44,000 --> 00:21:51,000

We started with our ancestors, we split from chimpanzees and monkeys, the homo sapien ancestors developed,

182

00:21:51,000 --> 00:21:59,000

and what confuses the story is, as we do more research in archaeology, we're discovering a wide range of different hominids.

183

00:22:01,000 --> 00:22:09,000

Before modern humans occupied the Eurasian continent, there were two so-called archaic humans existing there.

184

00:22:10,000 --> 00:22:20,000

To the west and the central area we had the Neanderthals, but from the central to the eastern part of the continent we had the so-called denisovan.

185

00:22:21,000 --> 00:22:23,000

And there are a number of others.

186

00:22:24,000 --> 00:22:32,000

Given the great diversity of the number of different species, how is it that homo sapiens ended up the only one left?

187

00:22:34,000 --> 00:22:44,000

Scientists now believe that dating back as much as 40,000 years ago, at least eight human-like species existed on Earth at the same time.

188

00:22:45,000 --> 00:23:02,000

The discovery could be that the evolution of the humanoid primate on this planet is because of the genetic manipulation of extraterrestrial biological entities using this planet Earth like a laboratory.

189

00:23:03,000 --> 00:23:16,000

This would suggest that some type of experimentation has been going on because why would there all of a sudden be these brand new species that come along and then suddenly disappear again?

190

00:23:17,000 --> 00:23:26,000

So the mystery deepens because at first we thought based on Darwin that because we came from primates that we must also have 48 chromosomes just like the primates.

191

00:23:27,000 --> 00:23:37,000

And then they discovered that that's not true, that humans have 46 chromosomes, 23 pairs. And that became a big mystery. What happened to the other two?

192

00:23:39,000 --> 00:23:48,000

One principle that biologists generally agree on is that species which are closely related usually have the same number of chromosomes.

193

00:23:49,000 --> 00:24:02,000

Chromosomes are long physical molecules that consist of a DNA strand. And when we talk about the genome, we're talking primarily about the DNA stored in the chromosomes.

194

00:24:03,000 --> 00:24:13,000

Once the idea of evolution by descent caught hold, it was assumed traits would be shared between humans and other primates because of our common ancestry.

195

00:24:14,000 --> 00:24:19,000

So when it was discovered that humans actually have 46 chromosomes, that was surprising.

196

00:24:21,000 --> 00:24:33,000

Some researchers believe that these missing chromosomes may hold the key to what causes human beings to behave differently and demonstrate higher intelligence than other species on Earth.

197

00:24:34,000 --> 00:25:00,000

We broke away from a common primate ancestor that we shared with chimpanzees and other types of ape. And what's so significant is that this brain seemed to change the amount of chromosomes that were in our cells.

198

00:25:01,000 --> 00:25:15,000

In 2005, a team of scientists discovered that two chromosomes in the ape genome appeared to have fused together to create a single larger chromosome in humans called chromosome 2.

199

00:25:16,000 --> 00:25:25,000

In their own terms, this is what they say, this is not natural. This is not the product of evolution. Something intervened to fuse these two chromosomes.

200

00:25:26,000 --> 00:25:27,000

So was that an upgrade?

201

00:25:27,000 --> 00:25:35,000

You can call that an upgrade? Absolutely. Like what CRISPR can do now, we can alter and edit DNA so then it's passed on to future generations.

202

00:25:36,000 --> 00:25:42,000

But the point is that this is what defines us as humans and it is definitely an intervention. It's an upgrade.

203

00:25:43,000 --> 00:25:50,000

So essentially, we weren't necessarily created from scratch but built upon and added from that which was already there.

204

00:25:50,000 --> 00:25:57,000

This is why I'm asking the questions because I'm looking at ancient patterns and we're seeing modern patterns. We're going through this right now.

205

00:26:01,000 --> 00:26:09,000

What all this ultimately speaks to me is that while the time span is vast, hundreds of thousands of years, there seems to be a project. We're the project.

206

00:26:10,000 --> 00:26:11,000

Absolutely.

207

00:26:11,000 --> 00:26:13,000

And they're aiming us towards an ultimate outcome.

208

00:26:13,000 --> 00:26:23,000

Right. I've been working with hundreds of people the last few years about their abduction experiences and in my experience working with many individuals.

209

00:26:24,000 --> 00:26:33,000

The common denominator of the abduction is it has to do with some sort of genetic engineering and genetic combining of the DNA.

210

00:26:34,000 --> 00:26:55,000

Throughout the world, thousands of people have reported being abducted by extraterrestrials. While such reports are rarely taken seriously, many researchers suggest that the accounts given by alleged abductees are too similar to dismiss and may reveal an extraterrestrial agenda.

211

00:26:56,000 --> 00:27:17,000

The first documented case of a reported alien abduction appeared in the Boston Traveler on October 25th, 1965. According to the account, Betty and Barney Hill were driving through New Hampshire late at night when a large flying saucer rapidly approached them and then hovered over their car.

212

00:27:18,000 --> 00:27:29,000

The couple claimed that they had been taken aboard the craft and were subjected to numerous medical experiments, including both eggs and sperm being taken.

213

00:27:32,000 --> 00:27:41,000

In the more than five decades since the Hill's compelling reported alien abduction, thousands of people have come forward with similar claims.

214

00:27:42,000 --> 00:28:05,000

What's particularly notable is the fact that during alien abductions people talk about blood, eggs, semen, cells, DNA taken from their bodies and essentially experimented on by these strange, short, black eyed entities that have become known as the grays.

215

00:28:06,000 --> 00:28:15,000

The people that come to me don't know each other, so they are telling me all these different stories that are actually strikingly similar.

216

00:28:15,000 --> 00:28:26,000

Most of the time extraterrestrials are doing some sort of genetic manipulation, taking eggs from the female or sperm if it's a male.

217

00:28:27,000 --> 00:28:32,000

Sometimes these children and fetuses disappear from the mother, don't they? And they're suddenly gone.

218

00:28:32,000 --> 00:28:33,000

Yes.

219

00:28:33,000 --> 00:28:34,000

There are cases like that, right?

220

00:28:34,000 --> 00:28:39,000

Exactly. So these are kind of medical mysteries, anomalies.

221

00:28:41,000 --> 00:28:52,000

One of the most shocking and disturbing accounts of extraterrestrial abduction involved a Las Vegas couple, Diane Swanson and Brett Oldham in 1987.

222

00:28:52,000 --> 00:28:57,000

At the time, Diane was almost four months pregnant with her first child.

223

00:28:59,000 --> 00:29:12,000

We were asleep and I don't know what time it was, but I was woken up and I sat up. Our bedroom door was open and there were these three entities looking over the door, so I thought it was a dream.

224

00:29:12,000 --> 00:29:17,000

And you know how you're so scared you just go, and then it went black.

225

00:29:17,000 --> 00:29:26,000

And then I woke up and I was on this ice cold metal bed and then I was strapped down, but I couldn't move.

226

00:29:26,000 --> 00:29:34,000

And then that's when I realized they were doing something to me and I remember just calling, just saying, please, please don't take my baby, don't hurt us.

227

00:29:35,000 --> 00:29:40,000

I woke up the next morning in my own bed and I was covered in blood.

228

00:29:43,000 --> 00:29:51,000

Brett rushed me to my doctor's office and he took us in right away and he thought I had miscarried, but he wasn't sure.

229

00:29:51,000 --> 00:29:56,000

He gave me an examination and he was very perplexed.

230

00:29:56,000 --> 00:30:00,000

He told us that there was no evidence of me ever being pregnant.

231

00:30:00,000 --> 00:30:05,000

He said, that was crazy because he had just saw me the week before.

232

00:30:06,000 --> 00:30:12,000

The sudden disappearance of the four month old fetus baffled many in the medical community.

233

00:30:12,000 --> 00:30:21,000

What you have here is a ultrasound image of a three month fetus and this fetus here is lying on its back.

234

00:30:21,000 --> 00:30:29,000

And if you measure what we call crown-rump length, and that would be the longest distance from the head to the rump, this area here.

235

00:30:29,000 --> 00:30:35,000

This is approximately about five to six centimeters, which is about the diameter of a baseball.

236

00:30:35,000 --> 00:30:42,000

So could the body absorb this fetus overnight? That's very unlikely.

237

00:30:44,000 --> 00:30:51,000

Is it possible, as Diane claims, that her unborn child was taken by extraterrestrials?

238

00:30:51,000 --> 00:30:55,000

And if so, what would be the purpose?

239

00:30:55,000 --> 00:31:02,000

I believe they took my child that night. I believe it with all my heart that they took my child.

240

00:31:04,000 --> 00:31:08,000

I believe that they're testing on us. I believe that they are.

241

00:31:08,000 --> 00:31:14,000

And I wonder sometimes do they have some kind of plan for that baby?

242

00:31:15,000 --> 00:31:24,000

Some researchers suggest that Diane's story, when considered alongside the many strikingly similar accounts of abductees being subjected to a child's death,

243

00:31:24,000 --> 00:31:30,000

may provide evidence of an extraterrestrial agenda.

244

00:31:30,000 --> 00:31:43,000

We believe that they are creating hybrids on craft that they began with the grays and they combined human genetics through some kind of gene splicing.

245

00:31:43,000 --> 00:32:02,000

When I say hybrids, I mean that the genetic material has been altered and upgraded, and perhaps some of the ET's genetic material has been inserted.

246

00:32:03,000 --> 00:32:11,000

From these children who you say have been taken and the hybrids, have we identified any of them that we can look at?

247

00:32:11,000 --> 00:32:22,000

Yes, I've been doing a lot of research in that field. I mean, I've been working with so many children that seem to have special abilities.

248

00:32:22,000 --> 00:32:29,000

So I believe that there are extraterrestrial species that are upgrading the DNA.

249

00:32:33,000 --> 00:32:43,000

To me, I think the extraterrestrial intervention has to do with supporting our evolution and growth.

250

00:32:43,000 --> 00:32:50,000

There's some sort of agenda going on because after the abduction experience, the person comes back upgraded.

251

00:32:50,000 --> 00:32:57,000

So are you saying then that these children have these greater abilities, psychic abilities and stuff like that?

252

00:32:57,000 --> 00:33:00,000

Exactly. I mean, that's what I believe is happening.

253

00:33:03,000 --> 00:33:15,000

Throughout the world, scientists and researchers have been baffled by numerous cases of children who display astonishing and inexplicable extrasensory abilities,

254

00:33:15,000 --> 00:33:20,000

often referred to as star children by ancient astronaut theorists.

255

00:33:20,000 --> 00:33:28,000

Some researchers suggest they have been genetically modified to possess heightened intuition and even psychic abilities.

256

00:33:29,000 --> 00:33:40,000

Dark kids are advanced in several departments. These kids, by and large, are much brighter than the old school child of a previous generation.

257

00:33:40,000 --> 00:33:52,000

They're using special gifts they have as advanced start kids. For example, in that area of telepathy, they can pick up on things that somebody else is thinking or sensing.

258

00:33:53,000 --> 00:34:04,000

In 1982, the Chinese government launched a nationwide search for children with psychic abilities such as telekinesis, telepathy and clairvoyance.

259

00:34:04,000 --> 00:34:15,000

In total, Chinese officials identified more than 1,000 children who possessed what researchers referred to as extra human function.

260

00:34:16,000 --> 00:34:30,000

Might further study of these incredible abilities revealed, as some ancient astronaut theorists suggest, that they are the result of extra-terrestrial manipulation of the human genome.

261

00:34:31,000 --> 00:34:41,000

So what is making these children to be alien hybrids? If we looked at their DNA, we would see it would be different than ours. Is that kind of what you're saying?

262

00:34:41,000 --> 00:34:48,000

They would have a normal human DNA plus added information.

263

00:34:48,000 --> 00:34:56,000

I believe that part of our DNA has to do with our super sensory abilities.

264

00:34:56,000 --> 00:35:06,000

We cannot see those abilities in the normal part of the DNA, but then you look at why certain people can do certain things.

265

00:35:06,000 --> 00:35:21,000

We have people who can move objects with their mind. We have people who can be completely blindfolded and are able to reprogram their brains entirely to be able to see with their eyes and so on and so forth.

266

00:35:22,000 --> 00:35:37,000

In her 2018 documentary film, *Superhuman, the Invisible, Made Visible*, renowned futurist Caroline Corey, investigated a group of children who demonstrate incredible extra sensory capabilities.

267

00:35:38,000 --> 00:35:49,000

In one segment, Caroline tested the children's ability to positively identify objects and images while wearing blindfolds that completely block out all light.

268

00:35:52,000 --> 00:35:56,000

Justin, tell me what's on this card.

269

00:35:56,000 --> 00:35:57,000

Teacup.

270

00:35:58,000 --> 00:36:00,000

And now tell me what's on this card.

271

00:36:01,000 --> 00:36:02,000

Oh, Tyler.

272

00:36:03,000 --> 00:36:06,000

Isabella, what is the shape and color of this stone?

273

00:36:06,000 --> 00:36:10,000

Kind of like a circular and it's not really, it's kind of like see-through.

274

00:36:10,000 --> 00:36:14,000

Evie, tell me the shape and color of this stone.

275

00:36:15,000 --> 00:36:19,000

It's red and kind of a circle?

276

00:36:19,000 --> 00:36:20,000

Yes.

277

00:36:21,000 --> 00:36:24,000

Evie, tell me what I'm holding in my hand.

278

00:36:24,000 --> 00:36:25,000

It would have been a spoon.

279

00:36:26,000 --> 00:36:37,000

There's a study that was done where scientists were able to demonstrate that DNA is actually receiving information from the external environment.

280

00:36:37,000 --> 00:36:43,000

The environment literally is changing the information and the genetic code at a DNA level.

281

00:36:43,000 --> 00:36:49,000

All sorts of informational waves are being transmitted into our being.

282

00:36:49,000 --> 00:37:00,000

That said, a telepathic communication, for example, could also be a type of wave that we are receiving even at a DNA level.

283

00:37:00,000 --> 00:37:10,000

We could literally be communicating with non-visual, non-physical beings transmitting this information to us through our DNA.

284

00:37:11,000 --> 00:37:15,000

I think we are born with these abilities. We're not taught that we have them.

285

00:37:15,000 --> 00:37:21,000

How is that possible for a human to all of a sudden be able to do these superhuman things?

286

00:37:21,000 --> 00:37:27,000

I think it is because part of our DNA is what's responsible.

287

00:37:27,000 --> 00:37:33,000

Perhaps we're being altered genetically in order to advance the race beyond what is transpiring in our world now.

288

00:37:37,000 --> 00:37:43,000

Perhaps we're being altered genetically in order to advance the race beyond what is transpiring in our world now.

289

00:37:43,000 --> 00:37:50,000

I guarantee that's what they're doing with us, to us. I personally think it's to evolve us.

290

00:37:50,000 --> 00:38:00,000

What's fascinating to me is that with Darwinian evolution, one thing that's always said is that you need long, long periods of time.

291

00:38:00,000 --> 00:38:06,000

And with certain things that we now can see, it doesn't take a long time.

292

00:38:06,000 --> 00:38:13,000

Through science, we've learned that somehow all of a sudden evolution accelerated exponentially.

293

00:38:14,000 --> 00:38:25,000

Scientists believe that human DNA has been evolving for billions of years, making it nearly impossible to trace its trajectory back to its origins.

294

00:38:25,000 --> 00:38:39,000

But in 2007, University of Wisconsin professor John Hawks did a comprehensive analysis of the human genome going back 80,000 years and discovered something astonishing.

295

00:38:40,000 --> 00:38:54,000

According to his research, over the past 5,000 years, human DNA has evolved at a rate of approximately 100 times greater than at any previous time during that 80,000 year period.

296

00:38:54,000 --> 00:39:00,000

The essential question that remains for Dr. Hawks is, why?

297

00:39:01,000 --> 00:39:18,000

Humanity is expanding, is advancing. We are evolving, but is it possible that extraterrestrials may have enhanced our DNA and the more our own DNA gets enhanced, the more we become like them?

298

00:39:18,000 --> 00:39:24,000

So perhaps they are our ancestors, and perhaps that is our destiny.

299

00:39:25,000 --> 00:39:43,000

If extraterrestrials genetically engineered the human race thousands of years ago, as ancient astronaut theorists suggest, is it possible that they are continuing to upgrade our DNA, helping us to evolve so that we become like them?

300

00:39:45,000 --> 00:39:53,000

So what's the next step then? Is it possible that there's going to be some giant change and they're preparing us for that?

301

00:39:53,000 --> 00:40:02,000

I think there's a positive intention behind this, and here we are in this age of immense change and transformation. We're right on the verge of migrating into space.

302

00:40:02,000 --> 00:40:14,000

Perhaps they're aiming us towards an ultimate outcome because they want us to ultimately migrate into space and they want us to be more like them.

303

00:40:14,000 --> 00:40:27,000

I think for those who think that all alien interference or intervention is negative, is to block us, I think they're so advanced that if they wanted to destroy us, they would have done so by now.

304

00:40:27,000 --> 00:40:34,000

Oh absolutely. I always embrace this idea that the extraterrestrials mean well.

305

00:40:34,000 --> 00:40:46,000

This is growth, an evolution of our race, a fulfillment of prophecy, or the angelic or extraterrestrial goal. We're part of it. We're living it right now.

306

00:40:47,000 --> 00:41:01,000

My friends, I think we've learned a lot, and especially from you Caroline, this thing that is going on right now overall illustrates that we are not alone in the universe.

307

00:41:01,000 --> 00:41:10,000

We've never been alone in the universe and some type of experimentation has been going on to usher in a new era.

308

00:41:10,000 --> 00:41:11,000

Agreed.

309

00:41:11,000 --> 00:41:14,000

And so I'm looking forward to the future.

310

00:41:16,000 --> 00:41:17,000

Thank you.
