

1

00:00:00,000 --> 00:00:07,000

Throughout the ancient world, there were tales of mortals and immortals.

2

00:00:07,000 --> 00:00:15,000

In Christian traditions, in Islamic traditions, and Hindu traditions, you have these divine beings who live forever.

3

00:00:15,000 --> 00:00:23,000

Could these stories be a count of alien visitors who traveled the world from thousands of light years away?

4

00:00:23,000 --> 00:00:28,000

Imagine an advanced civilization that has interstellar travel.

5

00:00:28,000 --> 00:00:34,000

If they could travel through the stars, they could stretch their longevity, maybe even to centuries.

6

00:00:34,000 --> 00:00:43,000

And if humans are to one day colonize other planets, will we too need to discover the key to immortality?

7

00:00:43,000 --> 00:00:49,000

What our extraterrestrial ancestors have wanted us to do is be like them.

8

00:00:49,000 --> 00:00:58,000

They want us to be a space-faring race that goes to the stars, and to live these extended lives where we become essentially immortal.

9

00:01:01,000 --> 00:01:05,000

There is a doorway in the universe.

10

00:01:05,000 --> 00:01:09,000

Beyond it is the promise of truth.

11

00:01:09,000 --> 00:01:18,000

If the matters we question everything we have ever been taught, the evidence is the truth.

12

00:01:19,000 --> 00:01:23,000

The future is what we pay for our lives.

13

00:01:23,000 --> 00:01:29,000

We are not alone. We have never been alone.

14

00:01:37,000 --> 00:01:43,000

Oxford, England, the Ashmolean Museum of Art and Archaeology.

15

00:01:43,000 --> 00:01:50,000

Among the hundreds of historic artifacts on display is an ancient Sumerian cuneiform text.

16

00:01:50,000 --> 00:02:01,000

Dating back to at least 2000 BC, the four-sided clay document is a list of kings who lived far longer than the average human lifespan.

17

00:02:01,000 --> 00:02:07,000

In the Ashmolean Museum in Oxford, there's an astounding artifact.

18

00:02:07,000 --> 00:02:11,000

It's referred to as WB 44, the Sumerian Kings List.

19

00:02:12,000 --> 00:02:18,000

On one panel, it tells us about eight kings that ruled over five cities.

20

00:02:18,000 --> 00:02:23,000

And what's astounding about this is the length of the reigns of these kings.

21

00:02:23,000 --> 00:02:27,000

One king is said to have ruled for 43,200 years.

22

00:02:27,000 --> 00:02:31,000

Another king rules for 28,000 years.

23

00:02:31,000 --> 00:02:33,000

It's astounding.

24

00:02:33,000 --> 00:02:40,000

Curiously, the Sumerian Kings List is not the only ancient record of rulers who lived for centuries.

25

00:02:41,000 --> 00:02:49,000

A curious document was found in a tomb in a Luxor, and it's called the Turin Kings List.

26

00:02:51,000 --> 00:03:05,000

We only have fragments of this document, but what this document lays out is that many of the really early Egyptian pharaohs had lives that were many hundreds of years.

27

00:03:06,000 --> 00:03:12,000

And that some of these pharaohs lived for seven, eight, 900 years.

28

00:03:13,000 --> 00:03:22,000

We have a similar story in the Bible of Methuselah, and that he's said to have lived for 969 years.

29

00:03:22,000 --> 00:03:29,000

So how is it that people are able to live such great ages?

30

00:03:30,000 --> 00:03:40,000

Is it merely coincidence that in three different ancient traditions, there are records of their earliest leaders living impossibly long lives?

31

00:03:41,000 --> 00:03:54,000

Curiously, in all three cultures, it was also recorded that during the time when people lived to these incredible ages, humans shared the earth with beings who came down from the sky.

32

00:03:55,000 --> 00:04:03,000

The ancient Egyptians referred to a time called the First Time when the gods walked among men.

33

00:04:05,000 --> 00:04:12,000

Ancient Egyptian creation mythology tells us that these original god beings came from the stars.

34

00:04:12,000 --> 00:04:21,000

This sounds very much like the arrival of the Anunnaki, the divine lords of light of the Sumerian tradition when they arrived atop Mount Kursakl.

35

00:04:22,000 --> 00:04:26,000

It's also virtually identical to the arrival of the Watchers.

36

00:04:26,000 --> 00:04:31,000

The Watchers are the angels of the Old Testament.

37

00:04:31,000 --> 00:04:38,000

They are the fallen angels who came to earth and intermingled with humans.

38

00:04:41,000 --> 00:04:48,000

The Watchers, like divine beings in many other ancient cultures, were referred to as immortals,

39

00:04:48,000 --> 00:04:53,000

but often they were described as having very human-like traits.

40

00:04:53,000 --> 00:05:00,000

There were 200 of these Watchers and they were led by an individual named Samjaisi.

41

00:05:00,000 --> 00:05:07,000

They shone. There was a translucent, there was an aura about them that was as bright as the sun,

42

00:05:07,000 --> 00:05:13,000

but they seemed to be more human in their appetites than one would like to believe.

43

00:05:14,000 --> 00:05:18,000

They're hungry, they eat, they want affection, they lost.

44

00:05:18,000 --> 00:05:25,000

I think that the Watchers most definitely are extraterrestrials who came to earth.

45

00:05:25,000 --> 00:05:38,000

Countless ancient original cultures speak of a time when the gods descended from the sky and mingled with people to impart their knowledge.

46

00:05:39,000 --> 00:05:47,000

Ancient Egypt, ancient China, ancient Samaria, ancient Japan, ancient Greece.

47

00:05:47,000 --> 00:05:54,000

And so I think the different cultures were visited by the same teachers who were extraterrestrials.

48

00:05:54,000 --> 00:06:02,000

Could it be that the earliest human civilizations shared the earth with visitors from another world?

49

00:06:02,000 --> 00:06:10,000

And if so, is this somehow connected to the ancient records of people who lived extraordinarily long lives?

50

00:06:10,000 --> 00:06:20,000

Ancient astronaut theorists suggest an important clue can be found in a famous verse from the Bible that is often mistranslated.

51

00:06:20,000 --> 00:06:29,000

In many English versions of the book of Genesis, chapter 1 verse 27 states that God created man in his own image.

52

00:06:29,000 --> 00:06:35,000

But in the original Hebrew, instead of his image, it says our image.

53

00:06:35,000 --> 00:06:40,000

God says in Genesis, let us make man in our image.

54

00:06:40,000 --> 00:06:44,000

Well, you have to say, well, who is our, who are the other people there?

55

00:06:44,000 --> 00:06:51,000

Well, the word God in Hebrew is Elohim and that is plural.

56

00:06:51,000 --> 00:07:00,000

If you look at the original Hebrew in which the sentence was written, all of a sudden you have the

truth.

57

00:07:00,000 --> 00:07:09,000

Because according to the ancient astronaut theory, someone came and someone altered our DNA in order for us to become humans.

58

00:07:09,000 --> 00:07:13,000

And essentially gave us more intelligence.

59

00:07:14,000 --> 00:07:25,000

Practically every culture, including our Bible says in the beginning God in the plural created humans according to their own image.

60

00:07:25,000 --> 00:07:33,000

They may be believing God, but God is something gigantic, spiritual, not explainable.

61

00:07:33,000 --> 00:07:38,000

In my opinion, when you read the Bible, it's all about extraterrestrials.

62

00:07:39,000 --> 00:07:49,000

Part of ancient astronaut theory is that what our extraterrestrial ancestors have wanted us to do

is be like them.

63

00:07:49,000 --> 00:07:55,000

They want us to achieve the same things that they achieved.

64

00:07:55,000 --> 00:08:00,000

The goal was some thousands of years in the future.

65

00:08:00,000 --> 00:08:07,000

This humanity should be able to construct spaceships to spread out in the universe again.

66

00:08:09,000 --> 00:08:20,000

If Homo sapiens were genetically engineered by extraterrestrial space travelers to one day become like them and seed life on other planets,

67

00:08:20,000 --> 00:08:24,000

what might this mean for the future of the human race?

68

00:08:24,000 --> 00:08:35,000

Some experts have suggested that interstellar travel will only be possible when science finds a way to dramatically extend the human lifespan.

69

00:08:36,000 --> 00:08:46,000

Maybe our generation with new developments in technologies will be living to the mid 100s, 150s, maybe even up to 200 in the next few decades.

70

00:08:46,000 --> 00:08:51,000

So imagine an advanced civilization that has interstellar travel.

71

00:08:51,000 --> 00:08:59,000

Certainly if they can travel through the stars, they could stretch their longevity, maybe even to centuries.

72

00:08:59,000 --> 00:09:11,000

Could it be that the ancient people referred to the gods as immortals because they encountered space travelers who lived for thousands of years?

73

00:09:11,000 --> 00:09:22,000

And if so, is it possible that there are records of early rulers living for centuries because these visitors somehow extended their lifespans?

74

00:09:23,000 --> 00:09:32,000

It was natural for people in those days to live a life close to a thousand years.

75

00:09:32,000 --> 00:09:39,000

We're talking about those who interacted with these beings from the stars.

76

00:09:39,000 --> 00:09:41,000

Are these things connected?

77

00:09:41,000 --> 00:09:49,000

We're talking about an age in which otherworldly beings assist humankind in becoming very much like the gods.

78

00:09:52,000 --> 00:10:02,000

But if our ancestors from deep antiquity were so close to becoming like their extraterrestrial creators, as ancient astronaut Dira suggests,

79

00:10:02,000 --> 00:10:09,000

what kept them from revising this destination and are humans today still on the same path?

80

00:10:09,000 --> 00:10:16,000

Perhaps further clues can be found by examining a story shared by different cultures all over the world.

81

00:10:16,000 --> 00:10:20,000

The story of the Great Fly.

82

00:10:23,000 --> 00:10:36,000

The Bible's Book of Genesis in chapter 6 verse 9 begins the story of Noah and the flood in which God sends a great village to cleanse the earth,

83

00:10:36,000 --> 00:10:39,000

which has become overrun by sin.

84

00:10:39,000 --> 00:10:51,000

It is one of the most well-known tales from the Bible, but curiously, nearly identical stories exist in dozens of other ancient traditions.

85

00:10:51,000 --> 00:11:00,000

We've heard about the flood of Noah, which wiped out that whole generation and brought about a new generation of descendants of Noah.

86

00:11:00,000 --> 00:11:07,000

The fact is, there's all these stories of the Great Flood in all countries across the world.

87

00:11:07,000 --> 00:11:11,000

Plato talked about Atlantis.

88

00:11:11,000 --> 00:11:16,000

He talked about a whole civilization destroyed by floods.

89

00:11:16,000 --> 00:11:27,000

In the Bible, Turkey, in Egypt, among Native Americans, there's a story that the Great Flood wrapped around the entire planet.

90

00:11:27,000 --> 00:11:29,000

All life was destroyed.

91

00:11:29,000 --> 00:11:42,000

The connection between the biblical story of the Great Flood and the destruction of other societies around the world through floods tell us one thing.

92

00:11:42,000 --> 00:11:56,000

There actually was a Great Flood, and that at one point in the history of this planet, all life was wiped out as the earth was covered in water.

93

00:11:56,000 --> 00:12:06,000

In all mythologies, including the Bible, some gods are coming down and teach the human a Great Flood will come and destroy you.

94

00:12:06,000 --> 00:12:15,000

And these gods knew it long before, and they knew it because they themselves made the Great Flood.

95

00:12:15,000 --> 00:12:21,000

The Great Flood was created by extraterrestrials on purpose.

96

00:12:21,000 --> 00:12:29,000

Could the story of the Great Flood be an historical record of a real event that was brought on by extraterrestrials?

97

00:12:29,000 --> 00:12:41,000

But if the ancient astronaut theory is current and aliens genetically engineer humankind, why would they then destroy their greatest creation?

98

00:12:41,000 --> 00:12:55,000

We have the records as described in the book of Enoch and other literature that the Watchers led to the moral corruption of all humanity, which led to the destruction of the face of the earth.

99

00:12:55,000 --> 00:13:01,000

They were introducing hidden technologies centuries before they were meant to be introduced.

100

00:13:01,000 --> 00:13:04,000

They corrupted the human gene pool.

101

00:13:04,000 --> 00:13:17,000

In Genesis 6, we hear about the sons of God. They see the daughters of men, and they lust after them, and they come down, and they take them as wives.

102

00:13:17,000 --> 00:13:22,000

And then they create a hybrid race called the Nephilim.

103

00:13:22,000 --> 00:13:29,000

You weren't supposed to fraternize with the natives, but this is what we are told in the Bible.

104

00:13:29,000 --> 00:13:31,000

Now, what are we to make of these texts?

105

00:13:31,000 --> 00:13:37,000

Are we to say, well, maybe these angels, these sons of God, did they have sex the old fashioned way?

106

00:13:37,000 --> 00:13:44,000

We don't know, but we need to start looking at these stories from a 21st century perspective.

107

00:13:45,000 --> 00:13:59,000

But the technology that we have with genetic engineering, splicing genes and what have you, maybe we can revisit this story and look at it from maybe an extraterrestrial hypothesis or point of view.

108

00:13:59,000 --> 00:14:01,000

They're creating a hybrid race.

109

00:14:01,000 --> 00:14:12,000

The DNA of the off-world intelligence and human DNA creates this hybrid race, and most of these beings, for better or for worse,

110

00:14:12,000 --> 00:14:16,000

had what we could call superhuman powers.

111

00:14:16,000 --> 00:14:22,000

As far as ancient astronaut theorists are concerned, a genetic upgrade occurred.

112

00:14:22,000 --> 00:14:29,000

One that closed the gap between mortals and immortals far more quickly than was intended.

113

00:14:29,000 --> 00:14:35,000

And it is a story that once again was told across many cultures.

114

00:14:36,000 --> 00:14:43,000

When the sons of God procreated with the daughters of men, it is said that mighty ones were born.

115

00:14:43,000 --> 00:14:49,000

They've had a longer lifespan as well, dating maybe centuries, up to a thousand years.

116

00:14:49,000 --> 00:14:54,000

Not immortal, but a lifespan much, much longer than ours.

117

00:14:55,000 --> 00:15:02,000

When you look back at ancient Egyptian history, the pharaohs themselves were said to be demigods.

118

00:15:03,000 --> 00:15:06,000

Part God, part human.

119

00:15:06,000 --> 00:15:09,000

This was present in the Greek imagination.

120

00:15:09,000 --> 00:15:13,000

The Olympians were known to get involved in the world of the mortals.

121

00:15:13,000 --> 00:15:14,000

They would intervene.

122

00:15:14,000 --> 00:15:20,000

Sometimes they'd get attracted to immortal and children would come, hercules, persius.

123

00:15:20,000 --> 00:15:24,000

These are the offspring, demigods, half-god, half-human.

124

00:15:25,000 --> 00:15:31,000

But in many of the ancient stories, the gods who were responsible for this upgrade of humanity

125

00:15:31,000 --> 00:15:35,000

were acting against the wishes of their superiors.

126

00:15:35,000 --> 00:15:42,000

They were not just helping to jumpstart human civilization, but creating a new race of immortals.

127

00:15:43,000 --> 00:15:50,000

Enoch, who's the scribe of God, says that these angels went against the will of God.

128

00:15:50,000 --> 00:15:55,000

Now, you can imagine those angels were extraterrestrial in origin.

129

00:15:55,000 --> 00:15:58,000

And when there was a prime directive, they violated it.

130

00:15:59,000 --> 00:16:03,000

They gave us gifts, and we weren't ready for those gifts.

131

00:16:03,000 --> 00:16:08,000

It's like giving a gun to a baby. Nothing good will happen.

132

00:16:08,000 --> 00:16:14,000

Maybe the extraterrestrials were protecting humanity, and humanity is considered a sacred project.

133

00:16:14,000 --> 00:16:18,000

And they know that while they'd begun it thousands of years ago,

134

00:16:18,000 --> 00:16:24,000

it would take thousands or perhaps tens of thousands of years for humanity to reach its ultimate fulfillment.

135

00:16:24,000 --> 00:16:29,000

But they were committed ultimately to the sacredness or the fulfillment of the project.

136

00:16:30,000 --> 00:16:33,000

And this is why they restarted civilization.

137

00:16:34,000 --> 00:16:38,000

As far as ancient astronaut theorists are concerned,

138

00:16:38,000 --> 00:16:42,000

the story of Noah and his family being saved from the flood

139

00:16:42,000 --> 00:16:48,000

shows that Earth's extraterrestrial visitors did not abandon their plan for humankind.

140

00:16:49,000 --> 00:16:54,000

As further evidence, they cite a 2,000-year-old text called the Zohar

141

00:16:54,000 --> 00:17:01,000

that continues the biblical story of the Watchers after the cataclysm that ended the previous age of humans.

142

00:17:02,000 --> 00:17:07,000

The Zohar says that there's a great secret about the angels who walked with us on Earth.

143

00:17:08,000 --> 00:17:10,000

The Watchers.

144

00:17:11,000 --> 00:17:18,000

They ascended to the stars, and they are the ones who come back and shepherd us,

145

00:17:18,000 --> 00:17:26,000

watch over us, they watch over humanity, and direct the course of our civilization.

146

00:17:27,000 --> 00:17:30,000

I think that the extraterrestrials never left.

147

00:17:30,000 --> 00:17:36,000

Why? Because according to the ancient astronaut theory, we are their offspring.

148

00:17:36,000 --> 00:17:40,000

They made us homo sapiens sapiens who we are today.

149

00:17:40,000 --> 00:17:45,000

If you have such a creation, I don't think you would just abandon that.

150

00:17:46,000 --> 00:17:49,000

We are a long-term project.

151

00:17:50,000 --> 00:17:56,000

If the first human shared the planet with alien visitors, as ancient astronaut theorists suggest,

152

00:17:56,000 --> 00:18:03,000

is it possible that these otherworldly beings have remained on Earth for thousands of years,

153

00:18:03,000 --> 00:18:07,000

continuing to direct the course of humanity?

154

00:18:07,000 --> 00:18:14,000

And if humans were designed to ultimately achieve immortality, just how will that happen?

155

00:18:15,000 --> 00:18:22,000

Perhaps further clues can be found by examining a strange substance discovered on Easter Island.

156

00:18:23,000 --> 00:18:26,000

Easter Island

157

00:18:27,000 --> 00:18:41,000

Lying over 2,000 miles off the coast of Chile, this remote landmass is famous for the nearly 1,000 monolithic stone statues called Noi found along its coastline.

158

00:18:42,000 --> 00:18:51,000

For ancient astronaut theorists, the enormous statues, along with the local legends that say they represent giant beings who came down from the sky,

159

00:18:51,000 --> 00:18:58,000

present a compelling case for Easter Island being a place of extraterrestrial visitation.

160

00:18:59,000 --> 00:19:12,000

And what has made this notion even more intriguing is the discovery that the island soil contains a substance called rapamycin that might be able to extend the human lifespan.

161

00:19:13,000 --> 00:19:19,000

In 1968, a remarkable substance was found, a kind of bacterial substance called rapamycin.

162

00:19:19,000 --> 00:19:25,000

Now it was given that name because it was found on Rapa Nui or Easter Island, which in itself is very interesting.

163

00:19:26,000 --> 00:19:33,000

And what they found was it could actually help when people had organ transplants to stop them rejecting them,

164

00:19:33,000 --> 00:19:36,000

but it could also help to cancer therapies as well.

165

00:19:36,000 --> 00:19:44,000

Then they found that it had very strong anti-aging properties. It would almost reverse aging in certain medical situations.

166

00:19:45,000 --> 00:19:50,000

Rapamycin has already been shown to extend lifespan and improve health in mice.

167

00:19:51,000 --> 00:19:57,000

And in 2018, researchers at Texas A&M began testing the substance on dogs.

168

00:19:58,000 --> 00:20:01,000

While there is still much to learn about the effects of rapamycin,

169

00:20:01,000 --> 00:20:07,000

scientists are hopeful that it could prove to actually reverse aging on a cellular level.

170

00:20:08,000 --> 00:20:15,000

Was it a coincidence that rapamycin was found on Easter Island where there's possible alien visitations? We don't know.

171

00:20:15,000 --> 00:20:23,000

In fact, one question to ask is what do the aliens do to live very long lives themselves? Do they take certain substances?

172

00:20:24,000 --> 00:20:34,000

Could it be that the anti-aging substance found on Easter Island was left behind by alien visitors who used it as a way to extend their lifespans?

173

00:20:35,000 --> 00:20:45,000

In numerous ancient traditions, there are stories of the gods possessing elixirs of immortality and sometimes sharing them with humans.

174

00:20:46,000 --> 00:20:55,000

There are many ancient cultures that had their own food and drink that could bring immortality.

175

00:20:56,000 --> 00:21:07,000

For instance, in China, there was the peaches of immortality that were given out by the goddess known as the Old Mother of the West.

176

00:21:08,000 --> 00:21:16,000

These were given to the immortals of China to quite literally allow them to live for eternity.

177

00:21:18,000 --> 00:21:26,000

For the Greeks, it's this nectar ambrosia of literally the food of the god, but if you consume that, then you yourself will be divine.

178

00:21:27,000 --> 00:21:35,000

In the Vedas, you have this drink, soma, and the same idea that this is what feeds the gods and keeps them alive and immortal.

179

00:21:35,000 --> 00:21:41,000

And if we humans eat that food, these substances will keep us alive forever.

180

00:21:42,000 --> 00:21:54,000

If these gods were in fact alien visitors, could it be that they were able to achieve immortality simply by ingesting some type of plant or drug?

181

00:21:55,000 --> 00:22:05,000

Some ancient astronaut theorists suggest that substances like ambrosia were merely symbolic devices representing the gods' ability to extend their lives.

182

00:22:06,000 --> 00:22:13,000

And they believe this was accomplished using the same technology that scientists are developing today.

183

00:22:14,000 --> 00:22:15,000

Gene Slicing

184

00:22:18,000 --> 00:22:23,000

Cambridge, Massachusetts, January 6th, 2021

185

00:22:24,000 --> 00:22:35,000

A team of scientists working with a gene-manipulating technology known as CRISPR at the Broad Institute of Harvard and MIT makes a groundbreaking discovery.

186

00:22:35,000 --> 00:22:42,000

By editing specific genes in mice, the researchers were able to double the lifespans of their test subjects.

187

00:22:43,000 --> 00:22:49,000

CRISPR, you can think of it like we can cut and snip out pieces of our DNA.

188

00:22:50,000 --> 00:22:58,000

And if we can discover, for example, part of our genetic code that has to do with aging, we can maybe cut it out.

189

00:22:58,000 --> 00:23:09,000

Or we can add things into the genetic code that might extend life to potentially create a human that could live forever.

190

00:23:10,000 --> 00:23:17,000

If we can rewrite the DNA code in principle, we can live forever.

191

00:23:18,000 --> 00:23:25,000

Already, we've been able to slice and dice that for a mouse, and eventually we'll do it for a human.

192

00:23:28,000 --> 00:23:46,000

While it remains to be seen, if CRISPR technology will succeed in increasing the human lifespan, some scientists believe the key to immortality may be found by studying a strange sea creature that has the ability to live forever.

193

00:23:47,000 --> 00:24:00,000

So one thing in nature that seems to be immortal is the immortal jellyfish, where it can actually revert to an earlier state when damaged or at risk and then regrow back into the adult state.

194

00:24:01,000 --> 00:24:11,000

The cells of all animals begin as stem cells, which then develop into organs, muscles, bones, and whatever else the organism needs.

195

00:24:12,000 --> 00:24:28,000

The jellyfish species, *turitopsis dorni*, commonly known as the immortal jellyfish, can take mature adult cells and turn them back into stem cells, allowing the jellyfish to, in effect, start its development all over.

196

00:24:29,000 --> 00:24:37,000

So you're really reversing the biological timeline and then resetting it going forward, so that you're actually not only living longer, but you're also younger.

197

00:24:38,000 --> 00:24:46,000

And thinking about how these things get reversed, to me is an intriguing way to approach the biology and the immortality.

198

00:24:47,000 --> 00:24:57,000

By understanding species like the immortal jellyfish and through the technology of gene editing, might we greatly extend the human lifespan?

199

00:24:58,000 --> 00:25:07,000

And could extraterrestrials have used similar means to achieve immortality, allowing them to travel great distances through space?

200

00:25:08,000 --> 00:25:21,000

It often seems to me that we live in a time of rediscovery, meaning that the fact that we come up with ways with which to improve and prolong our lives,

201

00:25:22,000 --> 00:25:27,000

extraterrestrials have figured that out long ago.

202

00:25:28,000 --> 00:25:44,000

But while scientists are optimistic that the human lifespan can be lengthened through genetic engineering, many aerospace experts believe that biological bodies are simply not equipped to withstand the rigors of extended space travel.

203

00:25:44,000 --> 00:25:55,000

They suggest that if humans are to one day colonize other planets, it will require merging man and machine.

204

00:26:14,000 --> 00:26:27,000

The ancient clivered stone makes a shocking announcement. He claims to be part of a top secret military unit once tasked with recovering extraterrestrial craft and their pilots for the U.S. government.

205

00:26:28,000 --> 00:26:37,000

I was involved in situations where we actually did recoveries of crashed saucers, for lack of a better term, to breeze thereof.

206

00:26:37,000 --> 00:26:42,000

There were bodies that were involved with some of these crashes, also somewhere alive.

207

00:26:43,000 --> 00:26:49,000

While we were doing all this, we were telling the American public there was nothing to it, we were telling the world there was nothing to it.

208

00:26:50,000 --> 00:27:00,000

Sargent Stone would later describe a specific mission in which he learned that the pilot of an extraterrestrial craft was, quote, a biological robot.

209

00:27:01,000 --> 00:27:08,000

So what he found was that the so-called grey aliens with the skinny bodies, giant heads, were like biological robots.

210

00:27:09,000 --> 00:27:14,000

They had few organs, they had all this machinery and computing inside them.

211

00:27:14,000 --> 00:27:23,000

And he really questioned what this was all about and the conclusion was that they must have been created to travel huge distances from their planet to this planet.

212

00:27:24,000 --> 00:27:29,000

Because if they were just a biological entity, they simply would not have survived.

213

00:27:30,000 --> 00:27:36,000

Could it be that Earth is being visited by alien entities that are part-machine?

214

00:27:37,000 --> 00:27:41,000

Is this why the ancient people referred to the gods as immortals?

215

00:27:41,000 --> 00:27:47,000

Because they were not entirely biological beings and appeared to never age.

216

00:27:48,000 --> 00:28:00,000

As further support for this notion, ancient astronaut theorists point to a strange figure that appears in 18th century France, the mysterious Count de Saint-Germain.

217

00:28:01,000 --> 00:28:07,000

The Count de Saint-Germain is probably one of the most enigmatic gentlemen of human history.

218

00:28:08,000 --> 00:28:15,000

He was an adventurer, he was a scientist, he was a composer, he knew several languages.

219

00:28:16,000 --> 00:28:22,000

Yet strangely, he always was the same age whenever anybody saw him.

220

00:28:24,000 --> 00:28:30,000

One of the most interesting stories about the Count was that when he was at a social gathering, he met an old woman.

221

00:28:30,000 --> 00:28:35,000

And the old woman said, I met you 60 years ago when I was a young woman.

222

00:28:35,000 --> 00:28:40,000

And you looked in your 40s then the same as you do now, he hadn't aged.

223

00:28:41,000 --> 00:28:47,000

Another thing that people talk about was that he had so much knowledge of history and of science.

224

00:28:47,000 --> 00:28:50,000

He knew a lot of the leaders and kings.

225

00:28:51,000 --> 00:29:00,000

Throughout his reportedly very long life, the Count de Saint-Germain befriended many noblemen and rulers, who he was believed to have great influence over.

226

00:29:01,000 --> 00:29:06,000

In the mid 1700s, he was a diplomat for King Louis XV.

227

00:29:06,000 --> 00:29:11,000

And in the 1760s, he traveled to Russia.

228

00:29:11,000 --> 00:29:18,000

And he was complicit in the overthrow that put Catherine the Great in place as a czar of Russia.

229

00:29:19,000 --> 00:29:25,000

It was rumored that he later advised the Russian imperial commander in the war against the Turks, which the Russians ultimately won.

230

00:29:26,000 --> 00:29:33,000

He was supposed to have died in 1784, but there were reported sightings of him just the following year.

231

00:29:34,000 --> 00:29:40,000

Entering into a Masonic lodge in France, where his name was actually noted there and there.

232

00:29:42,000 --> 00:29:47,000

He was reportedly at the beheading of Marie Antoinette several years later.

233

00:29:48,000 --> 00:29:56,000

And there are many other reports of his presence all the way around the world in the 19th century.

234

00:29:57,000 --> 00:30:10,000

In addition to appearing in historical records long after he was alleged to have died, it was said by many who knew the Count de Saint-Germain that he had odd habits and possessed extraordinary abilities.

235

00:30:11,000 --> 00:30:14,000

One of the strange things about him were his dietary habits.

236

00:30:15,000 --> 00:30:19,000

He'd sit with other people as they ate, but he wouldn't eat with them.

237

00:30:20,000 --> 00:30:30,000

One of Count de Saint-Germain's contacts in the 18th century was Casanova, who said he had an ability to melt diamonds, that he had amazing abilities and powers.

238

00:30:31,000 --> 00:30:34,000

He thought that he was an incredible superhuman type of person.

239

00:30:35,000 --> 00:30:51,000

So if Saint-Germain had lived centuries and he was alien from the past, certainly when you look at aliens who were thousands of years in advance of us, they could have had alterations genetically or mechanically.

240

00:30:52,000 --> 00:30:54,000

They would allow them to live a very long time.

241

00:30:55,000 --> 00:31:01,000

Is it possible that the Count de Saint-Germain was an extraterrestrial entity that was part robotic?

242

00:31:01,000 --> 00:31:06,000

Much like the grey alien that Sergeant Clifford Stone claims to have examined.

243

00:31:07,000 --> 00:31:19,000

Ancient astronaut Theorist suggests that such a scenario is not so far-fetched considering that today we are already creating robots that are incredibly human-like in their appearance.

244

00:31:20,000 --> 00:31:25,000

One of the most cutting-edge is a Hanson robotics creation named Sophia.

245

00:31:26,000 --> 00:31:38,000

What is absolutely mind-blowing about Sophia and other robotic entities is it's not hard to imagine the population of extraterrestrials creating humanoid robots like the ones that we're building today.

246

00:31:39,000 --> 00:31:41,000

Probably even more advanced.

247

00:31:42,000 --> 00:31:47,000

And it makes a lot of sense for us to send robots into space instead of flesh and blood bodies.

248

00:31:48,000 --> 00:31:51,000

If it makes sense for us, it probably makes sense for extraterrestrials as well.

249

00:31:51,000 --> 00:32:05,000

If the ancient astronaut theory is correct and humankind was created to follow in the footsteps of its extraterrestrial creators, will that mean merging man and machine?

250

00:32:06,000 --> 00:32:11,000

According to some scientists, that process is already underway.

251

00:32:12,000 --> 00:32:13,000

On the way.

252

00:32:20,000 --> 00:32:21,000

Arlington, Virginia.

253

00:32:22,000 --> 00:32:31,000

Located just four miles west of the Pentagon, is the headquarters for the Defense Advanced Research Projects Agency, better known as DARPA.

254

00:32:32,000 --> 00:32:41,000

Since 2002, DARPA has been investing hundreds of millions of dollars in its brain-machine interface program for the U.S. military.

255

00:32:42,000 --> 00:32:48,000

The technologies they are developing allow humans to control mechanical devices with their minds.

256

00:32:49,000 --> 00:32:53,000

There are these brain-computer interfaces where we can implant electrodes in the brain.

257

00:32:54,000 --> 00:33:00,000

And for example, you can control a prosthetic limb by just using your thoughts with these brain-computer interfaces.

258

00:33:01,000 --> 00:33:02,000

The chip records activation in your brain.

259

00:33:03,000 --> 00:33:09,000

It sends that information to your computer, which then sends that to, let's say, a prosthetic limb to control it.

260

00:33:10,000 --> 00:33:16,000

This is certainly a good way to extend lives when the brain is not the part that's failing, but it's the rest of the body that's failing.

261

00:33:16,000 --> 00:33:29,000

Because you can actually now imagine human sort of metal, robotic, cyborg combinations where your brain is now not just controlling maybe your biological body, but something artificial and man-made.

262

00:33:30,000 --> 00:33:38,000

You give this technology another 50 years and we will appear as God beings to a person living at the beginning of the 20th century.

263

00:33:38,000 --> 00:33:43,000

So let's now look back at the extraterrestrial gods of the ancient world.

264

00:33:44,000 --> 00:33:52,000

They must have had at least the level of technological sophistication that we are enjoying and experiencing today, probably even more advanced.

265

00:33:53,000 --> 00:34:02,000

I think it's fascinating where we are in this moment in time because what if one day we can create artificial human beings?

266

00:34:02,000 --> 00:34:09,000

And in fact, we are merely rediscovering what has happened already a long time ago.

267

00:34:10,000 --> 00:34:21,000

As far as some ancient astronaut theorists are concerned, merging biology and technology is an important first step in becoming like our alien ancestors.

268

00:34:22,000 --> 00:34:35,000

But they believe the extraterrestrial beings that people have reported encountering on Earth may be merely avatars, vessels for intelligences that can move from one body to another.

269

00:34:36,000 --> 00:34:49,000

What if they're digital beings or light beings? We have numerous stories that tell us that the God

beings were originally light beings that could then phase into a physical flesh and blood form

270

00:34:49,000 --> 00:34:53,000

and then phase back into their light body form when they want to travel the stars.

271

00:34:54,000 --> 00:35:05,000

We hear the story of the Anunnaki, the divine lords of light of the Samaritan tradition, or the arrival of the Watchers, the lords of light who descended upon Mount Kermit.

272

00:35:06,000 --> 00:35:13,000

The stories of Vishnu actually describe Vishnu having many manifestations of himself as other gods.

273

00:35:13,000 --> 00:35:24,000

He would come to our reality as a different God. He came to Earth many different times as many different people and had adventures and activities and then he would go back into the heavens as Vishnu.

274

00:35:25,000 --> 00:35:39,000

The aliens could be avatars. They could withstand all the rigors of outer space because they are part biological and part mechanical but controlled by an alien consciousness in a different star system.

275

00:35:40,000 --> 00:35:54,000

While the notion of a conscious being that can move from one body to another may sound far-fetched, humankind is working towards realizing this technology right now by attempting to map the human brain.

276

00:35:55,000 --> 00:36:02,000

Whole brain emulation is the ability to create a carbon copy of the brain itself.

277

00:36:03,000 --> 00:36:14,000

Already by slicing and dicing the brain of a fruit fly, we've been able to catalog all the connections of a fruit fly's brain up to 100,000 neurons.

278

00:36:15,000 --> 00:36:24,000

Think about that. Every single connection of the brain of a fruit fly map using computers by slicing and dicing the brain.

279

00:36:25,000 --> 00:36:27,000

Now the human brain is much more complicated.

280

00:36:28,000 --> 00:36:34,000

100 billion neurons with each neuron connected to 10,000 other neurons.

281

00:36:35,000 --> 00:36:48,000

But in principle that's also possible to create an exact copy of the brain to map every single neuron of the brain using transistors rather than neurons.

282

00:36:49,000 --> 00:36:53,000

And it would in principle be identical to who you are.

283

00:36:54,000 --> 00:37:00,000

It would have access to all your memories, all your dreams, all your foibles, all your mannerisms.

284

00:37:00,000 --> 00:37:07,000

It'll take of course decades to give you that kind of accuracy, but it is doable.

285

00:37:08,000 --> 00:37:20,000

Once scientists can completely replicate a human brain through whole brain emulation, then that information can be uploaded to a computer to digitally represent a person's consciousness.

286

00:37:21,000 --> 00:37:31,000

Could it be that extraterrestrials who already possess this capability have come forth by uploading their consciousness into artificial bodies?

287

00:37:32,000 --> 00:37:45,000

There are some theoretical physicists who say not only is this possible, but that this is how humans will eventually lead the planet and travel the stars.

288

00:37:51,000 --> 00:37:55,000

Bokeh Chica, Texas

289

00:37:56,000 --> 00:37:59,000

August 27, 2019

290

00:38:01,000 --> 00:38:07,000

SpaceX announces the successful test flight of its Starship prototype Star Hopper.

291

00:38:08,000 --> 00:38:17,000

The founder of the private aerospace company, billionaire Elon Musk, has also been at the forefront of efforts to upgrade humankind.

292

00:38:17,000 --> 00:38:24,000

It is his belief that both pursuits are critical to ensuring the survival of the human race.

293

00:38:25,000 --> 00:38:42,000

It's interesting that today we have these adventurer billionaires like Elon Musk, and they want to put computer chips in our brains, even map our own consciousness and put that in a robot or cyborg.

294

00:38:43,000 --> 00:38:53,000

And they're wanting to go into space at the same time, so in many ways they're like the alien explorers who came here in the past.

295

00:38:55,000 --> 00:39:06,000

I think with known technologies we can theorize that is within 100, within 200 years we're talking about fusion rockets and antimatter rockets capable of reaching the stars.

296

00:39:07,000 --> 00:39:13,000

And then I think we'll be sending robots into outer space that are actually avatars.

297

00:39:14,000 --> 00:39:21,000

I personally think this is the future of the space program, and I think we will do this using laser beams.

298

00:39:22,000 --> 00:39:28,000

If we can digitize the human brain, we can put that knowledge on a laser beam and shoot it to the moon.

299

00:39:29,000 --> 00:39:32,000

In one second you are on the moon.

300

00:39:32,000 --> 00:39:40,000

In 20 minutes you could be on Mars, and four years at the speed of light you could reach the nearby stars.

301

00:39:41,000 --> 00:39:42,000

And what would you do?

302

00:39:43,000 --> 00:39:47,000

If that laser beam goes to the moon, is then downloaded into an avatar.

303

00:39:48,000 --> 00:39:57,000

That avatar can withstand gravity fields, poisonous gases, radiation from the sun, and in fact I'll stick my neck out.

304

00:39:57,000 --> 00:40:05,000

I think this already exists. I think this is the preferred way for an advanced alien species to explore the universe.

305

00:40:06,000 --> 00:40:14,000

In fact, near the Earth there could be a digital highway with those digitized souls of billions of aliens going across the Milky Way galaxy.

306

00:40:15,000 --> 00:40:26,000

So I think when we meet aliens from outer space we should not be surprised if they're actually avatars that are controlled by the aliens in a distant star system.

307

00:40:27,000 --> 00:40:41,000

As entrepreneurs continue to invest billions in pursuit of both space travel and whole brain emulation, are we getting closer to becoming like the immortals our ancestors described thousands of years ago?

308

00:40:42,000 --> 00:40:56,000

And if these immortals were responsible for the creation of the human race, as ancient astronaut theorists suggest, could this evolution be exactly what they intended for humankind all along?

309

00:40:57,000 --> 00:41:06,000

Why would extraterrestrials come to Earth and start a human project knowing that it would take thousands of years for us to develop?

310

00:41:07,000 --> 00:41:12,000

Well, it could perhaps be that extraterrestrials have a different perspective of time than we do.

311

00:41:13,000 --> 00:41:23,000

If we think of the extraterrestrials as immortal, time is irrelevant and their goal is to assist humanity to become more like them.

312

00:41:23,000 --> 00:41:33,000

There's a potential that humanity is going to become a star-faring nation that has long life because you're going to need that for some of these long journeys.

313

00:41:34,000 --> 00:41:40,000

But we might become more like the gods that seem to live for thousands of years and travel the heavens.

314

00:41:40,000 --> 00:41:47,000

Is humanity on the verge of becoming an intergalactic civilization?

315

00:41:48,000 --> 00:41:57,000

And if so, is it possible that we resettle this path by an extraterrestrial race that visited Earth thousands of years ago?

316

00:41:58,000 --> 00:42:07,000

Perhaps one day, the immortal gods, seen descending from the sky on a distant planet, will be us.

317

00:42:10,000 --> 00:42:13,000
