

1

00:00:00,000 --> 00:00:07,000

Hidden power, secrets, cover-ups, corruption.

2

00:00:07,000 --> 00:00:14,000

You think you know the whole story?

3

00:00:14,000 --> 00:00:17,000

Think again.

4

00:00:17,000 --> 00:00:23,000

I've been governor, a Navy SEAL, a fighter.

5

00:00:23,000 --> 00:00:26,000

I've heard things that'll blow your mind,

6

00:00:26,000 --> 00:00:31,000

and now I think it's time you get the whole story.

7

00:00:31,000 --> 00:00:37,000

Now, the top secret government project that can destroy the world.

8

00:00:37,000 --> 00:00:42,000

One of the most dangerous projects the United States government has ever attempted.

9

00:00:42,000 --> 00:00:43,000

There it is.

10

00:00:43,000 --> 00:00:46,000

When aimed at the sky, it can change the weather.

11

00:00:46,000 --> 00:00:51,000

With a billion watts, you easily move a cloud wherever you want to move it using harp.

12

00:00:51,000 --> 00:00:56,000

When aimed at the ground, it can set off earthquakes and tsunamis.

13

00:00:56,000 --> 00:01:01,000

My father's hope was that this type of technology would be doing more good and not doing any harm.

14

00:01:01,000 --> 00:01:04,000

And they're saying now we have a weapon.

15

00:01:04,000 --> 00:01:09,000

When it's pointed at you, it can literally blow your mind.

16

00:01:09,000 --> 00:01:13,000

This is the death ray.

17

00:01:13,000 --> 00:01:17,000

Jesse Ventura and his team head north to Alaska.

18

00:01:17,000 --> 00:01:20,000

Take a wild ride to the Arctic Tundra.

19

00:01:20,000 --> 00:01:23,000

We're out here in the wilder lands of Alaska.

20

00:01:23,000 --> 00:01:26,000

And confront the ultimate conspiracy weapon.

21

00:01:26,000 --> 00:01:28,000

This is more than possible.

22

00:01:28,000 --> 00:01:29,000

Let's f**k it.

23

00:01:29,000 --> 00:01:33,000

Harp, the real life doomsday machine.

24

00:01:35,000 --> 00:01:38,000

Hold on a second guys, I got a problem.

25

00:01:38,000 --> 00:01:41,000

We have to get out of there, Perrin.

26

00:01:41,000 --> 00:01:45,000

I'm Jesse Ventura, and this is conspiracy theory.

27

00:01:50,000 --> 00:01:56,000

Jesse Ventura is at the gates to what could be the most dangerous weapon the world has ever seen.

28

00:01:58,000 --> 00:02:00,000

And they won't let him in.

29

00:02:00,000 --> 00:02:04,000

So you're telling me if I got rid of the cameras, you'd take me inside?

30

00:02:04,000 --> 00:02:06,000

I'm saying there's no chance that would happen.

31

00:02:06,000 --> 00:02:11,000

Weeks of investigation have led the governor and his team to remote Alaska.

32

00:02:11,000 --> 00:02:17,000

To this place where the US military is blasting the skies with millions of watts of energy.

33

00:02:17,000 --> 00:02:20,000

A place with the innocent name of Harp.

34

00:02:20,000 --> 00:02:22,000

Back up a little bit, can we do it?

35

00:02:22,000 --> 00:02:25,000

When I get denied something, I get angry.

36

00:02:27,000 --> 00:02:32,000

It was a confrontation I didn't expect as a former governor.

37

00:02:32,000 --> 00:02:37,000

And it all began when I got a call from a guy named Jerry Smith.

38

00:02:37,000 --> 00:02:43,000

He told me the government was about to fire up some kind of futuristic weapon.

39

00:02:43,000 --> 00:02:47,000

We met at an out of the way tavern in St. Paul.

40

00:02:47,000 --> 00:02:53,000

He looked like an insurance agent, but there was nothing mild-mannered about what he had to say.

41

00:02:55,000 --> 00:02:57,000

Jerry Smith is an author.

42

00:02:57,000 --> 00:03:02,000

He writes about the military's desire to harness the weather and use it as a weapon of mass destruction.

43

00:03:02,000 --> 00:03:07,000

What I have for you is one of the most dangerous projects the US government has ever attempted.

44

00:03:07,000 --> 00:03:13,000

That's going on live in our atmosphere and the general public are still blissfully unaware of it.

45

00:03:13,000 --> 00:03:18,000

Harp. High-frequency, active or rural research program.

46

00:03:18,000 --> 00:03:22,000

It is a field of antennas on the ground in southeastern Alaska,

47

00:03:22,000 --> 00:03:25,000

sold together as the work is one giant antenna.

48

00:03:25,000 --> 00:03:28,000

It's 360 antennas.

49

00:03:28,000 --> 00:03:32,000

Each can generate 10,000 watts.

50

00:03:32,000 --> 00:03:36,000

3.6 million watts, collectively.

51

00:03:36,000 --> 00:03:41,000

The largest legal AM radio station in the US is only 50,000 watts.

52

00:03:41,000 --> 00:03:43,000

But they're not broadcasting out.

53

00:03:43,000 --> 00:03:45,000

They're not broadcasting out.

54

00:03:45,000 --> 00:03:47,000

They're not broadcasting out.

55

00:03:47,000 --> 00:03:53,000

When Harp is fired up, all those antennas shoot powerful radio waves into the ionosphere,

56

00:03:53,000 --> 00:03:55,000

the uppermost part of the atmosphere.

57

00:03:55,000 --> 00:03:57,000

They literally heat it.

58

00:03:57,000 --> 00:04:04,000

They create irregularities that allow the ionosphere to bounce powerful radio signals back to Earth.

59

00:04:04,000 --> 00:04:07,000

Officially, it's only in the research stage.

60

00:04:07,000 --> 00:04:10,000

To what purpose do they say they're doing that for?

61

00:04:10,000 --> 00:04:13,000

So they can communicate with deeply submerged submarines.

62

00:04:13,000 --> 00:04:19,000

And they could use this to locate, monitor, enemy underground bases

63

00:04:19,000 --> 00:04:22,000

with the manufacturer and launch of weapons and mass destruction.

64

00:04:22,000 --> 00:04:26,000

Big oil companies develop the Harp technology.

65

00:04:26,000 --> 00:04:29,000

But when the US government is trying to make a new technology,

66

00:04:29,000 --> 00:04:32,000

it's not going to be able to do that.

67

00:04:32,000 --> 00:04:36,000

Big oil companies develop the Harp technology.

68

00:04:36,000 --> 00:04:42,000

But when the US government realized its wider potential, it bought up all the plans.

69

00:04:42,000 --> 00:04:48,000

By the time work began in 1993, Harp was in the hands of the military.

70

00:04:48,000 --> 00:04:53,000

Jerry Smith says those hands turned the tool into a weapon.

71

00:04:55,000 --> 00:05:01,000

The Harp array seems to be based on a set of patents for a ground-based Star Wars weapon system.

72

00:05:01,000 --> 00:05:04,000

Now it may be good to have Ronald Reagan's shield.

73

00:05:04,000 --> 00:05:08,000

Something that could destroy incoming missiles and things of that nature if they're fired at us.

74

00:05:08,000 --> 00:05:15,000

Exactly. This same set of patents also describes how it could be used to manipulate the weather over North America.

75

00:05:16,000 --> 00:05:19,000

Missile defense and weather control.

76

00:05:19,000 --> 00:05:23,000

Jerry Smith says that's only the tip of the iceberg in Alaska,

77

00:05:23,000 --> 00:05:30,000

because the extra low-frequency waves that Harp generates can also drill much deeper than the ocean.

78

00:05:30,000 --> 00:05:33,000

Deep into your brain.

79

00:05:33,000 --> 00:05:38,000

That ELF that allows them to see deep in the Earth and communicate with deeply submerged submarines

80

00:05:38,000 --> 00:05:42,000

is at the same frequency that the human brain works at.

81

00:05:42,000 --> 00:05:49,000

Brain waves really are, in part, radio waves. The brain can be influenced by external signals.

82

00:05:50,000 --> 00:05:58,000

Mind control? That seems a little far out, but weather manipulation is all too plausible.

83

00:05:58,000 --> 00:06:02,000

Jesse drives off to begin the investigation,

84

00:06:02,000 --> 00:06:10,000

and he can't shake off thoughts of recent events like the Indonesian tsunami and Hurricane Katrina.

85

00:06:11,000 --> 00:06:16,000

Back at his war-room, the governor meets with his elite team of investigators

86

00:06:16,000 --> 00:06:21,000

researchers and operatives, all of them itching to get on the case.

87

00:06:21,000 --> 00:06:26,000

All right, people, I want no excuses. What have you come up with?

88

00:06:26,000 --> 00:06:31,000

Well, we've got a physicist that says that Harp can do everything that Jerry Smith told you it can do.

89

00:06:31,000 --> 00:06:34,000

And how exactly is he going to do that? Start a hurricane?

90

00:06:34,000 --> 00:06:39,000

Yeah, quite literally. He has a device that shows that you can actually move clouds,

91

00:06:39,000 --> 00:06:41,000

and he's going to do this experiment for me.

92

00:06:41,000 --> 00:06:44,000

That's interesting. Where do we go from here, people?

93

00:06:44,000 --> 00:06:48,000

This photo was actually taken just before the big tsunami hit the coast of Indonesia.

94

00:06:48,000 --> 00:06:51,000

And what we're seeing is the aurora borealis or the northern lights.

95

00:06:51,000 --> 00:06:56,000

They occur any time there's any sort of electromagnetic occurrence in the ionosphere,

96

00:06:56,000 --> 00:07:00,000

and they say that when they turn Harp on, the colors get really wild up there.

97

00:07:00,000 --> 00:07:05,000

And the other thing that's interesting before the tsunami was that there were no pre-tremors,

98

00:07:05,000 --> 00:07:07,000

or any warning, it just happened.

99

00:07:07,000 --> 00:07:10,000

How often are the northern lights spotted in Indonesia?

100

00:07:10,000 --> 00:07:13,000

Why would we want to cause a tsunami and kill thousands of Indonesian people?

101

00:07:13,000 --> 00:07:18,000

Alex, maybe they didn't want to. Maybe they were just experimenting with the thing.

102

00:07:18,000 --> 00:07:21,000

They put it up too high, and this was the end result.

103

00:07:21,000 --> 00:07:23,000

What do you think they're going to do after it happens?

104

00:07:23,000 --> 00:07:27,000

Then come out and say, oops, we made a mistake and fess up to it?

105

00:07:27,000 --> 00:07:29,000

I mean, think about it. They're testing whole new technology, right?

106

00:07:29,000 --> 00:07:31,000

So here they're testing this thing?

107

00:07:31,000 --> 00:07:33,000

Every time they come up with something new, they got to check it out.

108

00:07:33,000 --> 00:07:36,000

And if there's collateral damage from it, that's what they look at.

109

00:07:36,000 --> 00:07:40,000

Oh, well, it works. So there was a little collateral damage in it.

110

00:07:40,000 --> 00:07:42,000

At least now we know it works.

111

00:07:49,000 --> 00:07:53,000

Coming up, the investigation moves to Alaska,

112

00:07:53,000 --> 00:07:57,000

and the conspiracy theory is put to the test.

113

00:07:57,000 --> 00:08:00,000

Why is there so much military investment?

114

00:08:00,000 --> 00:08:05,000

Well, basically, the military was involved because there was a...

115

00:08:05,000 --> 00:08:07,000

Let me back up.

116

00:08:07,000 --> 00:08:13,000

Then a simple demonstration shows how harp can control and change the weather.

117

00:08:13,000 --> 00:08:16,000

We're using about 100 watts in the civil cloud chamber.

118

00:08:16,000 --> 00:08:19,000

Harp uses a billion watts.

119

00:08:19,000 --> 00:08:22,000

And later, a tense confrontation.

120

00:08:22,000 --> 00:08:27,000

Jesse Ventura at the gates to what could be the deadliest weapon in the world.

121

00:08:27,000 --> 00:08:29,000

Come on, man. I'm a Navy SEAL.

122

00:08:29,000 --> 00:08:33,000

The military don't do things unless it has a military purpose

123

00:08:33,000 --> 00:08:37,000

and a military purpose is destruction and wage and war.

124

00:08:47,000 --> 00:08:52,000

Jesse Ventura has been tipped that the U.S. military's IONUSFIR research project in Alaska

125

00:08:52,000 --> 00:08:54,000

is not what it seems.

126

00:08:54,000 --> 00:08:58,000

Officially, the giant complex of antennas outside the village of Gakona

127

00:08:58,000 --> 00:09:01,000

is conducting communication studies.

128

00:09:01,000 --> 00:09:06,000

But a growing conspiracy theory says harp is actually a weapon

129

00:09:06,000 --> 00:09:12,000

with the ability to shoot down aircraft, manipulate nature, and control your mind.

130

00:09:23,000 --> 00:09:26,000

The investigation is underway.

131

00:09:27,000 --> 00:09:31,000

Alex Piper is touched down in Fairbanks, Alaska.

132

00:09:31,000 --> 00:09:35,000

He's here to meet with one of the heads of harp research.

133

00:09:36,000 --> 00:09:42,000

Meanwhile, the governor's advisor, Michael Braverman, is at Stanford University

134

00:09:42,000 --> 00:09:44,000

with two harp researchers.

135

00:09:44,000 --> 00:09:50,000

Doctors Morris Cohen and Mark Galkowski have done extensive experimentation at harp.

136

00:09:50,000 --> 00:09:54,000

The harp facility is a unique facility for basic research.

137

00:09:54,000 --> 00:10:00,000

It's really about understanding the portion of the atmosphere that right now we know very little about.

138

00:10:00,000 --> 00:10:03,000

We really hope to understand more about this upper atmospheric region

139

00:10:03,000 --> 00:10:07,000

and understand some of the basic physical processes that go on there.

140

00:10:08,000 --> 00:10:11,000

Alex is not finding the same cooperation in Fairbanks.

141

00:10:12,000 --> 00:10:14,000

Hey, Governor, it's Alex.

142

00:10:14,000 --> 00:10:16,000

Yeah, so I spoke to the professor.

143

00:10:16,000 --> 00:10:19,000

He claims it's strictly there for experiments, research purposes only,

144

00:10:19,000 --> 00:10:22,000

that it can't change the weather, it's not a weapon.

145

00:10:22,000 --> 00:10:25,000

The problem is, as soon as he saw where I was going with my questions,

146

00:10:25,000 --> 00:10:27,000

he refused to be on camera.

147

00:10:29,000 --> 00:10:31,000

Yeah, make of it what you will.

148

00:10:33,000 --> 00:10:38,000

As Alex awaits instructions in Alaska, a visitor arrives at the team's office.

149

00:10:40,000 --> 00:10:44,000

Broke Sarno is a scientist, engineer, and doctor of physics.

150

00:10:45,000 --> 00:10:48,000

He spent years studying arctic weather patterns.

151

00:10:50,000 --> 00:10:55,000

He's about to demonstrate the awesome power of this so-called research project.

152

00:10:55,000 --> 00:11:01,000

He'll show how harp's ELF radio waves can actually push around rain clouds in the sky.

153

00:11:01,000 --> 00:11:05,000

And in the process, change the weather.

154

00:11:05,000 --> 00:11:08,000

Well, this is a basic cloud chamber.

155

00:11:08,000 --> 00:11:12,000

I'm going to make a cloud inside of it, stabilize it, make sure it's all nice and still,

156

00:11:12,000 --> 00:11:15,000

and then we're going to move it using harp impulses.

157

00:11:15,000 --> 00:11:19,000

Weather manipulation, the ability to control the weather in specific areas.

158

00:11:19,000 --> 00:11:21,000

Is it possible?

159

00:11:21,000 --> 00:11:23,000

It is not even remotely possible.

160

00:11:23,000 --> 00:11:26,000

The harp researchers may not be as candid as they appear.

161

00:11:26,000 --> 00:11:29,000

They deny harp can control the weather.

162

00:11:29,000 --> 00:11:35,000

But Dr. Agnew shows investigator Jun Sarpong just how easy the process can be.

163

00:11:35,000 --> 00:11:40,000

When I turn the pulses on, this cloud should move from bottom to top.

164

00:11:40,000 --> 00:11:41,000

Are you ready?

165

00:11:41,000 --> 00:11:42,000

Yeah.

166

00:11:45,000 --> 00:11:49,000

Oh, yeah, you can really see.

167

00:11:49,000 --> 00:11:52,000

It's almost like there's a wind inside the chamber.

168

00:11:52,000 --> 00:11:56,000

So this was the sky you would see rapid movement in the sky.

169

00:11:56,000 --> 00:12:01,000

Right, and this is just a fraction of the power that's used in harp.

170

00:12:01,000 --> 00:12:04,000

We're using about 100 watts in this little cloud chamber.

171

00:12:04,000 --> 00:12:06,000

Harp uses a billion watts.

172

00:12:06,000 --> 00:12:11,000

So we pushed a couple of cubic feet of cloud vapor in a few seconds.

173

00:12:11,000 --> 00:12:16,000

With a billion watts, you could easily move a cloud wherever you wanted to move it using harp.

174

00:12:24,000 --> 00:12:27,000

Could harp be used as an electronic weapon?

175

00:12:27,000 --> 00:12:29,000

Certainly not.

176

00:12:33,000 --> 00:12:36,000

Is there an example where harp has actually been used in warfare?

177

00:12:36,000 --> 00:12:37,000

Yes.

178

00:12:37,000 --> 00:12:42,000

In the first Iraq war, there's evidence that harp was used to irradiate the battlefield

179

00:12:42,000 --> 00:12:44,000

prior to the invasion from Kuwait.

180

00:12:44,000 --> 00:12:48,000

When the tanks rolled into the area, the troops piled out of the bunkers,

181

00:12:48,000 --> 00:12:52,000

not willing to give a fight, they gave up in mass.

182

00:12:52,000 --> 00:12:53,000

These were the Iraqi troops.

183

00:12:53,000 --> 00:12:56,000

And what exactly did harp do to them?

184

00:12:56,000 --> 00:12:58,000

It can prevent you from sleeping.

185

00:12:58,000 --> 00:12:59,000

It creates anxiety.

186

00:12:59,000 --> 00:13:03,000

It can even upset your bowels, how they work.

187

00:13:03,000 --> 00:13:10,000

And if it's played just right, harp can be tuned to a point where it makes the recipients so paranoid

188

00:13:10,000 --> 00:13:13,000

they begin to have visions like nightmares.

189

00:13:14,000 --> 00:13:16,000

So harp is purely a research facility?

190

00:13:16,000 --> 00:13:17,000

Yes.

191

00:13:17,000 --> 00:13:20,000

So then what is the military doing there?

192

00:13:20,000 --> 00:13:22,000

Why is there so much military investment?

193

00:13:22,000 --> 00:13:29,000

Well, as basically the military was involved because there was a...

194

00:13:29,000 --> 00:13:34,000

Let me back up and say the location of harp was actually picked because that property was actually

195

00:13:34,000 --> 00:13:36,000

belonged to the U.S. Air Force, I believe.

196

00:13:36,000 --> 00:13:40,000

And so that site was actually suitable, a suitable location for that.

197

00:13:40,000 --> 00:13:45,000

And I believe that's one of the reasons that the military is involved in this harp program.

198

00:13:45,000 --> 00:13:49,000

I'm not allowed to know, but it is what it is.

199

00:13:52,000 --> 00:13:56,000

It's clear the researchers want to avoid discussing the military uses of harp.

200

00:13:57,000 --> 00:14:00,000

Their hesitations cause the team to wonder.

201

00:14:02,000 --> 00:14:04,000

So what are the real dangers of harp?

202

00:14:04,000 --> 00:14:10,000

Picture a ground wire, like a long extension cord being stretched from the earth up to the ionosphere,

203

00:14:10,000 --> 00:14:12,000

creating an ion path.

204

00:14:12,000 --> 00:14:18,000

If the power that's in the ionosphere discharged back down to the ground,

205

00:14:18,000 --> 00:14:22,000

it would be a lightning bolt of devastating proportions.

206

00:14:22,000 --> 00:14:25,000

What would that mean exactly?

207

00:14:25,000 --> 00:14:31,000

Picture 50 Mount St. Helen's volcanoes going off every second for a minute.

208

00:14:36,000 --> 00:14:38,000

So the effects could be catastrophic?

209

00:14:38,000 --> 00:14:39,000

Absolutely.

210

00:14:39,000 --> 00:14:45,000

So in your expert opinion, do you think that this is a machine that actually should be stopped

211

00:14:45,000 --> 00:14:47,000

because it's just too dangerous?

212

00:14:47,000 --> 00:14:50,000

I think the machine should be shut off. It's too risky to use.

213

00:14:56,000 --> 00:15:02,000

Well, people, I talked to Alex and he was up in Alaskan, talked to this person up there,

214

00:15:02,000 --> 00:15:05,000

and apparently it's a train to nowhere. He says it's not a big story.

215

00:15:05,000 --> 00:15:10,000

No way, Governor. Agnew was convinced that there's more to this. We have to investigate further.

216

00:15:10,000 --> 00:15:13,000

Then who else do we go see? We've got to find someone else then.

217

00:15:13,000 --> 00:15:18,000

Well, I've got someone else for us to speak to. His name's Nick Begidge. He's also up in Alaska.

218

00:15:18,000 --> 00:15:23,000

Now, he's written a lot about harp, and he's probably one of the most informed people out there.

219

00:15:23,000 --> 00:15:24,000

There's only one problem.

220

00:15:24,000 --> 00:15:25,000

And that is?

221

00:15:25,000 --> 00:15:26,000

He'll only speak to you.

222

00:15:26,000 --> 00:15:28,000

Why just me?

223

00:15:28,000 --> 00:15:30,000

His brother's a senator and he trusts you.

224

00:15:30,000 --> 00:15:32,000

His brother's a U.S. senator?

225

00:15:32,000 --> 00:15:33,000

Yeah.

226

00:15:33,000 --> 00:15:38,000

Might get a hold of Alex and tell him we're on our way. I guess we're coming to Alaska.

227

00:15:41,000 --> 00:15:45,000

Coming up, Jesse Ventura approaches the super weapon from the sky.

228

00:15:46,000 --> 00:15:47,000

There it is.

229

00:15:50,000 --> 00:15:52,000

Then an explosive confrontation.

230

00:15:52,000 --> 00:15:57,000

When I did deny something, I do the opposite of getting intimidated. I get angry.

231

00:15:57,000 --> 00:16:03,000

And later, Jesse goes all in and gets a hard hit of harped mind-bending power.

232

00:16:15,000 --> 00:16:21,000

Jesse Ventura is in Alaska to investigate the mysterious military facility known as harp.

233

00:16:23,000 --> 00:16:28,000

The governor's conspiracy team has found evidence that harp's complex of massive transmitters

234

00:16:28,000 --> 00:16:34,000

is a trigger for a super weapon that heats up the ionosphere, tampering with nature.

235

00:16:34,000 --> 00:16:39,000

What experts call a formula for global terrorism.

236

00:16:39,000 --> 00:16:44,000

We've heard from enough experts. Now it's time to see for ourselves.

237

00:16:46,000 --> 00:16:52,000

Jesse Ventura lifts off from Anchorage and points the way toward a remote region of southeastern Alaska.

238

00:16:52,000 --> 00:16:55,000

They're headed to harp.

239

00:16:55,000 --> 00:17:03,000

They fly across miles of untouched wilderness, deeper and deeper, into the middle of nowhere.

240

00:17:04,000 --> 00:17:10,000

And then, just over the ridge, it comes into view.

241

00:17:12,000 --> 00:17:13,000

There it is.

242

00:17:16,000 --> 00:17:17,000

Whoa!

243

00:17:19,000 --> 00:17:20,000

There it is.

244

00:17:22,000 --> 00:17:23,000

There it is.

245

00:17:24,000 --> 00:17:25,000

There it is.

246

00:17:26,000 --> 00:17:27,000

There it is.

247

00:17:28,000 --> 00:17:29,000

There it is.

248

00:17:29,000 --> 00:17:30,000

There it is.

249

00:17:31,000 --> 00:17:32,000

Wow!

250

00:17:38,000 --> 00:17:40,000

I hear it's live today.

251

00:17:44,000 --> 00:17:45,000

You mean this thing is on right now?

252

00:17:45,000 --> 00:17:48,000

Yeah, it's on right now and they're gonna shut it off the other way.

253

00:17:48,000 --> 00:17:49,000

We'll get within a mile.

254

00:17:51,000 --> 00:17:52,000

I hope they shut it off.

255

00:17:53,000 --> 00:17:54,000

Yeah, it's just a little more on.

256

00:17:54,000 --> 00:17:55,000

What would that happen?

257

00:17:56,000 --> 00:17:58,000

I have no idea.

258

00:17:59,000 --> 00:18:01,000

I don't know about you, Governor, but I don't want to find out.

259

00:18:03,000 --> 00:18:08,000

180 towers, spread out over 35 acres.

260

00:18:09,000 --> 00:18:11,000

This is harp.

261

00:18:11,000 --> 00:18:13,000

You think there's anything shady going on down there?

262

00:18:14,000 --> 00:18:15,000

It could be.

263

00:18:15,000 --> 00:18:19,000

The one thing is, is that even the people who work here don't really know a lot about it.

264

00:18:19,000 --> 00:18:22,000

The right hand doesn't seem to know what the left hand is doing.

265

00:18:22,000 --> 00:18:25,000

Well, that's very common in government compartmentalization.

266

00:18:26,000 --> 00:18:27,000

Yeah.

267

00:18:27,000 --> 00:18:31,000

These are the antennas that blast a beam 12 miles wide,

268

00:18:31,000 --> 00:18:34,000

that spreads across the ionosphere, heats it up,

269

00:18:34,000 --> 00:18:38,000

and turns the atmospheric layer into the biggest antenna of all.

270

00:18:38,000 --> 00:18:41,000

Governor, doesn't look that scary from up here.

271

00:18:41,000 --> 00:18:44,000

Yeah, a lot of things stay not much good,

272

00:18:44,000 --> 00:18:48,000

but you can't see what it does anyway that gives off radius frequencies.

273

00:18:48,000 --> 00:18:50,000

You know, how do you see that?

274

00:18:50,000 --> 00:18:51,000

It'd be very scary.

275

00:18:51,000 --> 00:18:54,000

I think we better ask the senior stay up close.

276

00:18:54,000 --> 00:18:56,000

Yeah, I think we should.

277

00:18:56,000 --> 00:19:00,000

The governor orders the chopper down at Harp's front door.

278

00:19:10,000 --> 00:19:15,000

Now you did formally call them to see if we could get a tour of this place.

279

00:19:15,000 --> 00:19:16,000

Absolutely.

280

00:19:16,000 --> 00:19:17,000

And what was the result?

281

00:19:17,000 --> 00:19:18,000

They turned us down.

282

00:19:18,000 --> 00:19:20,000

We tried three different times.

283

00:19:20,000 --> 00:19:24,000

Three times you called here to see if we could get a tour of this place and they turned us flat.

284

00:19:24,000 --> 00:19:29,000

We called this facility, we called the Air Force directly, every time, no.

285

00:19:29,000 --> 00:19:30,000

Stonewall.

286

00:19:30,000 --> 00:19:33,000

They're now at the gates of Harp.

287

00:19:34,000 --> 00:19:36,000

Well, let's see if there's another way we can get in here.

288

00:19:36,000 --> 00:19:38,000

Looks like a call box right here.

289

00:19:45,000 --> 00:19:47,000

They don't want to have to talk to you.

290

00:19:48,000 --> 00:19:49,000

They're up there.

291

00:19:49,000 --> 00:19:50,000

They know we're here.

292

00:19:50,000 --> 00:19:52,000

It's simply they're not going to respond.

293

00:19:52,000 --> 00:19:53,000

Look it.

294

00:19:53,000 --> 00:19:54,000

Now it don't even buzz.

295

00:19:54,000 --> 00:19:56,000

They've shut it down.

296

00:19:59,000 --> 00:20:02,000

Jesse Ventura is happy to wait them out.

297

00:20:10,000 --> 00:20:13,000

Finally, the ones inside give in.

298

00:20:13,000 --> 00:20:17,000

The Harp representative is dressed like a civilian.

299

00:20:17,000 --> 00:20:20,000

He introduces himself as a manager.

300

00:20:20,000 --> 00:20:23,000

He says he does not want his face shown on camera.

301

00:20:23,000 --> 00:20:25,000

And he delivers the message.

302

00:20:25,000 --> 00:20:28,000

Jesse Ventura is not welcome at Harp.

303

00:20:28,000 --> 00:20:33,000

If you as an individual, we're sitting down at the Gakona Lodge.

304

00:20:33,000 --> 00:20:36,000

And we're going to be sitting down at the Gakona Lodge.

305

00:20:36,000 --> 00:20:39,000

And we're going to be sitting down at the Gakona Lodge.

306

00:20:39,000 --> 00:20:43,000

And we're going to be sitting down at the Gakona Lodge having a beer.

307

00:20:43,000 --> 00:20:47,000

And he said, hey, you know, I'm in around fishing or whatever.

308

00:20:47,000 --> 00:20:49,000

And I just want to catch some salmon.

309

00:20:49,000 --> 00:20:52,000

And you were asking questions about Harp.

310

00:20:52,000 --> 00:20:56,000

There would be no problem with me saying, Jesse, let's go for a tour of the facility.

311

00:20:56,000 --> 00:21:01,000

However, being associated with the media, that's a different set of rules.

312

00:21:01,000 --> 00:21:05,000

So you're telling me if I got rid of the cameras, you'd take me inside?

313

00:21:05,000 --> 00:21:08,000

I'm saying there's no chance that would happen.

314

00:21:10,000 --> 00:21:15,000

The man suggests the governor come back on the official visiting day.

315

00:21:17,000 --> 00:21:19,000

We went through the proper chance.

316

00:21:19,000 --> 00:21:20,000

We went to the...

317

00:21:20,000 --> 00:21:21,000

But they told you what?

318

00:21:21,000 --> 00:21:24,000

To come back during an open house.

319

00:21:24,000 --> 00:21:25,000

Which is once every two years.

320

00:21:25,000 --> 00:21:26,000

Which is once every two years.

321

00:21:26,000 --> 00:21:28,000

It's hard being a swore of no.

322

00:21:28,000 --> 00:21:29,000

Two years.

323

00:21:29,000 --> 00:21:32,000

Those are close to fighting words.

324

00:21:32,000 --> 00:21:35,000

Do you really need to go through the Air Force?

325

00:21:35,000 --> 00:21:36,000

Well, we did.

326

00:21:36,000 --> 00:21:37,000

We got stonewalled.

327

00:21:37,000 --> 00:21:40,000

And this is strictly a research facility.

328

00:21:40,000 --> 00:21:44,000

Clearly, there's something going on here that they don't want people to know about.

329

00:21:44,000 --> 00:21:47,000

There's a lot of cool science that we do with this facility.

330

00:21:47,000 --> 00:21:48,000

Come on, man. I'm a Navy SEAL.

331

00:21:48,000 --> 00:21:52,000

The military don't do things unless it has a military purpose

332

00:21:52,000 --> 00:21:56,000

and a military purpose is destruction and wage war.

333

00:21:56,000 --> 00:21:57,000

It's a stalemate.

334

00:21:57,000 --> 00:21:59,000

Or is it?

335

00:21:59,000 --> 00:22:03,000

Back up a little bit from the days when we did the country of the infirmity.

336

00:22:04,000 --> 00:22:07,000

When I get denied something, I do the opposite of getting intimidated.

337

00:22:07,000 --> 00:22:08,000

I get angry.

338

00:22:08,000 --> 00:22:11,000

Jesse is about to walk right on through.

339

00:22:11,000 --> 00:22:12,000

When suddenly...

340

00:22:12,000 --> 00:22:14,000

Hold on a second, guys. I got a problem here.

341

00:22:14,000 --> 00:22:16,000

They're after their appearance.

342

00:22:17,000 --> 00:22:20,000

The camera equipment begins to go haywire.

343

00:22:22,000 --> 00:22:25,000

Something is interfering with the audio and video.

344

00:22:26,000 --> 00:22:29,000

This is more than unclassified. That's f***ing...

345

00:22:30,000 --> 00:22:31,000

Coming up...

346

00:22:31,000 --> 00:22:37,000

Jesse finds new mysteries and new conspiracy theories from Harp's neighbors.

347

00:22:37,000 --> 00:22:40,000

He said, we fired that damn thing up up there and we tried it, guys.

348

00:22:40,000 --> 00:22:46,000

Then he finds out that Harp mind control is not as far fetched as it seems.

349

00:22:46,000 --> 00:22:48,000

Crank it up. I want to try it.

350

00:22:59,000 --> 00:23:06,000

Jesse Ventura and his team made it as far as the front gates of the Harp complex in the Alaskan wilderness.

351

00:23:06,000 --> 00:23:10,000

Back up a little bit from the days when we did the country of infirmity.

352

00:23:10,000 --> 00:23:14,000

When I get denied something, I do the opposite of getting intimidated.

353

00:23:14,000 --> 00:23:15,000

I get angry.

354

00:23:15,000 --> 00:23:22,000

The standoff was reaching a boiling point when some unknown force played havoc with their crew's video and audio gear.

355

00:23:22,000 --> 00:23:24,000

Hold on a second, guys. I got a problem here.

356

00:23:24,000 --> 00:23:25,000

They're after their appearance.

357

00:23:25,000 --> 00:23:27,000

This is more than unclassified. That's f***ing...

358

00:23:29,000 --> 00:23:32,000

Jesse refused to give up, but the fight was futile.

359

00:23:33,000 --> 00:23:42,000

I'll tell you, the more I learn about Harp, the more knowledge I gain about it, the more sinister this place seems to be getting.

360

00:23:42,000 --> 00:23:48,000

It's not going the other way. It's going that way, towards sinister, not against it.

361

00:23:49,000 --> 00:23:57,000

The other thing that bugs me about this, you notice there were double security gates there, not one but two.

362

00:23:57,000 --> 00:24:00,000

And it's out in the middle of nowhere, Alaska.

363

00:24:00,000 --> 00:24:04,000

And it's an unclassified research facility.

364

00:24:04,000 --> 00:24:07,000

And it has that type of security, huh?

365

00:24:07,000 --> 00:24:09,000

That's interesting.

366

00:24:10,000 --> 00:24:17,000

While the governor, Braverman, announced that he would be the first to enter the Alaskan wilderness,

367

00:24:17,000 --> 00:24:20,000

Governor, Braverman and Alex plan their next move,

368

00:24:20,000 --> 00:24:25,000

another member of the team has come up with a major find in another corner of the country.

369

00:24:28,000 --> 00:24:32,000

June is in Texas, chasing the intriguing story of Harp's inventor,

370

00:24:32,000 --> 00:24:35,000

a man who became a leading critic of the Harp project.

371

00:24:36,000 --> 00:24:42,000

Bernard Eastland died two years ago, but his son Robert is alive and talking.

372

00:24:43,000 --> 00:24:57,000

Back in about 1983, my father was working on a number of ideas, including the use of the gas to create a missile shield for the United States in case of Soviet attacks.

373

00:24:57,000 --> 00:25:03,000

And so when your father first designed it, it was really in terms of defense, am I right?

374

00:25:03,000 --> 00:25:09,000

It was at the height of the Cold War, 1983, 1984, Ronald Reagan in the White House.

375

00:25:09,000 --> 00:25:20,000

The project my father was working on was everything from communications with submarines to ground penetrating radar over the horizon radar,

376

00:25:20,000 --> 00:25:25,000

knocking out satellite communications, a missile defense shield.

377

00:25:26,000 --> 00:25:29,000

And then there's everyone's favorite, weather control.

378

00:25:30,000 --> 00:25:35,000

The idea was by heating up the atmosphere, you could move the jet stream,

379

00:25:35,000 --> 00:25:42,000

bringing rain to places or taking rain away from places that were possibly receiving too much rain.

380

00:25:43,000 --> 00:25:47,000

Robert says his father never intended for Harp to be used as an offensive weapon.

381

00:25:48,000 --> 00:25:53,000

It would have been for good. You have Ethiopia, no rain, let's bring rain to Ethiopia.

382

00:25:53,000 --> 00:25:57,000

You have too much rain flooding in one place, it looks, perturb the jet stream,

383

00:25:57,000 --> 00:26:01,000

and see if we can halt whatever weather cycles occurring.

384

00:26:01,000 --> 00:26:03,000

So he was very proud of it in the invention.

385

00:26:03,000 --> 00:26:04,000

He was very proud.

386

00:26:05,000 --> 00:26:09,000

But then the military saw the potential and bought up the plans.

387

00:26:10,000 --> 00:26:15,000

Your father did feel that the military were maybe going too far, which is why he left.

388

00:26:15,000 --> 00:26:22,000

Well, I mean, so here he is, he's trying to come up with something to defend the United States and better mankind,

389

00:26:22,000 --> 00:26:28,000

and they're saying, well, maybe now we have a weapon, basically a weapon that can be used.

390

00:26:34,000 --> 00:26:40,000

Back in Alaska, Jesse Ventura heads into the wilderness to seek out the people who live in Harp's shadow.

391

00:26:42,000 --> 00:26:45,000

First up is the village of Glen Allen.

392

00:26:46,000 --> 00:26:54,000

Harp helps fund its community college, but even here, 30 miles away, no one's really sure what goes on at Harp.

393

00:26:54,000 --> 00:26:57,000

Could this be a weapon of some sort?

394

00:26:57,000 --> 00:27:00,000

Well, I've certainly heard some of that as well.

395

00:27:00,000 --> 00:27:04,000

Of course, if it's military, it's got military applications. I have no doubt about that.

396

00:27:04,000 --> 00:27:08,000

It's funded, it's a big project, it's cost a lot of money.

397

00:27:09,000 --> 00:27:12,000

Do you think they're being totally forthcoming with you?

398

00:27:12,000 --> 00:27:15,000

Meaning the scientists and the people that work up there, I do.

399

00:27:15,000 --> 00:27:17,000

Well, no, not necessarily them. No, I mean...

400

00:27:17,000 --> 00:27:19,000

The military application?

401

00:27:19,000 --> 00:27:22,000

Yeah, the military application and Harp in general.

402

00:27:22,000 --> 00:27:26,000

Do you think that they're being fully above board with the locals?

403

00:27:26,000 --> 00:27:29,000

I think that it's a mystery.

404

00:27:31,000 --> 00:27:35,000

Jesse moves on toward the village that's Harp's closest neighbor.

405

00:27:35,000 --> 00:27:41,000

He's been warned that folks there don't like strangers, so he hired a private eye from Anchorage.

406

00:27:41,000 --> 00:27:44,000

She went on ahead for some advanced recon.

407

00:27:48,000 --> 00:27:53,000

The private eye does not want her face seen by anyone connected to Harp.

408

00:27:53,000 --> 00:27:56,000

She says she fears harassment or worse.

409

00:27:56,000 --> 00:27:58,000

Thanks for meeting me here.

410

00:27:58,000 --> 00:27:59,000

No problem.

411

00:27:59,000 --> 00:28:00,000

What do you got for me?

412

00:28:00,000 --> 00:28:04,000

There's definitely some things that are going on there in relation to Harp.

413

00:28:04,000 --> 00:28:06,000

Really? Tell me more.

414

00:28:06,000 --> 00:28:10,000

You know, everybody was friendly and everybody was talkative until you brought up the topic of Harp

415

00:28:10,000 --> 00:28:13,000

and then their personality changed, their demeanor changed.

416

00:28:13,000 --> 00:28:14,000

Really?

417

00:28:14,000 --> 00:28:21,000

I've gone to villages all over the state of Alaska and never, never has it been this eerie, I guess you could say.

418

00:28:21,000 --> 00:28:23,000

It was an eerie feeling there.

419

00:28:23,000 --> 00:28:25,000

Something we definitely need to look into then.

420

00:28:28,000 --> 00:28:32,000

Well, the PI gave us the list, now let's hope people will talk to us.

421

00:28:32,000 --> 00:28:34,000

Private investigators said they would.

422

00:28:34,000 --> 00:28:38,000

Yeah, well, that could be a different story once Cam is on it.

423

00:28:40,000 --> 00:28:46,000

The governor and his advisor arrive in Gokona, population 215.

424

00:28:46,000 --> 00:28:50,000

People willing to talk about Harp? Zero.

425

00:28:50,000 --> 00:28:53,000

We're sure not being very successful, are we?

426

00:28:53,000 --> 00:28:56,000

But persistence pays off.

427

00:28:56,000 --> 00:28:59,000

Okay, I found some people there inside and we'll talk about Harp.

428

00:28:59,000 --> 00:29:00,000

For real?

429

00:29:00,000 --> 00:29:01,000

Yeah.

430

00:29:01,000 --> 00:29:03,000

Handcuff them so they can't get away.

431

00:29:03,000 --> 00:29:04,000

Let's go.

432

00:29:09,000 --> 00:29:13,000

Jesse meets the one person who's bound to know everyone's business.

433

00:29:13,000 --> 00:29:17,000

She runs the coffee shop and trading post.

434

00:29:17,000 --> 00:29:19,000

Now you've been here since the beginning.

435

00:29:19,000 --> 00:29:21,000

What do you think they're doing down there?

436

00:29:21,000 --> 00:29:24,000

They tell us we're doing research on Harp.

437

00:29:24,000 --> 00:29:26,000

We're up here studying the northern lights.

438

00:29:26,000 --> 00:29:29,000

You know, studying the northern lights for 25 years, come on.

439

00:29:31,000 --> 00:29:33,000

So you're very suspicious of this place?

440

00:29:33,000 --> 00:29:34,000

Oh, of course.

441

00:29:34,000 --> 00:29:39,000

I mean, if it was studying the northern lights, they'd be very, very upfront.

442

00:29:39,000 --> 00:29:43,000

They'd be telling people all the time what they're doing, what they're finding.

443

00:29:43,000 --> 00:29:45,000

I, as an American, resent being treated.

444

00:29:45,000 --> 00:29:47,000

It's my money that's funding it.

445

00:29:47,000 --> 00:29:48,000

You're damn right, I agree.

446

00:29:48,000 --> 00:29:51,000

And if it's defense, tell us it's for defense.

447

00:29:51,000 --> 00:29:52,000

Now be truthful with us.

448

00:29:52,000 --> 00:29:53,000

Sure.

449

00:29:53,000 --> 00:29:54,000

We're not stupid.

450

00:29:54,000 --> 00:29:59,000

We've tried to talk to a lot of the people around here about Harp and they just clam up.

451

00:29:59,000 --> 00:30:00,000

They don't want to talk.

452

00:30:00,000 --> 00:30:02,000

Why do you think that is?

453

00:30:02,000 --> 00:30:06,000

Well, I think people live out here because they're real private.

454

00:30:06,000 --> 00:30:13,000

And there was that rumor about mind control a few years ago and I think people are real nervous and they don't...

455

00:30:13,000 --> 00:30:14,000

It's a big government entity.

456

00:30:14,000 --> 00:30:16,000

They don't want to cross them.

457

00:30:17,000 --> 00:30:23,000

Everyone else in Gakona decides to stay behind closed doors while the strangers are in town.

458

00:30:23,000 --> 00:30:26,000

Everyone but one man.

459

00:30:26,000 --> 00:30:31,000

My personal feeling, I think it's one of the most top secret strangers in the United States government.

460

00:30:31,000 --> 00:30:32,000

Really?

461

00:30:32,000 --> 00:30:35,000

Fred has lived in Gakona for more than 40 years.

462

00:30:35,000 --> 00:30:37,000

Harp?

463

00:30:37,000 --> 00:30:39,000

He helped pave the way.

464

00:30:39,000 --> 00:30:44,000

So you were here and you've watched this entire whole Harp thing take place?

465

00:30:44,000 --> 00:30:48,000

I worked on building the first road, worked on part of the building and I was working on it.

466

00:30:48,000 --> 00:30:50,000

First they were setting up a coal generator.

467

00:30:50,000 --> 00:30:52,000

And I plowed snow up there.

468

00:30:52,000 --> 00:30:56,000

I got a snow plumb and I plowed snow, I think, for three or four winters.

469

00:30:56,000 --> 00:31:00,000

When I first started plowing snow, they didn't have any security cameras or nothing.

470

00:31:00,000 --> 00:31:03,000

I'd go up there and I'd be the only guy on the plantation.

471

00:31:06,000 --> 00:31:11,000

But then as time went on, I got more security, more security and more stricter and more stricter.

472

00:31:11,000 --> 00:31:16,000

Why would they add more security if it was just the simple thing that they initially said they were doing?

473

00:31:16,000 --> 00:31:21,000

I've always thought that that facility had the capability of mind control.

474

00:31:23,000 --> 00:31:26,000

Have you ever heard of that mind control that the Russians use under prisoners?

475

00:31:26,000 --> 00:31:27,000

Yeah.

476

00:31:27,000 --> 00:31:32,000

They set out a certain frequency to make people act the way they want.

477

00:31:32,000 --> 00:31:36,000

They can make them docile or they make them schizophrenic or whatever.

478

00:31:36,000 --> 00:31:41,000

That's the mind control that I think they have the capability up there.

479

00:31:41,000 --> 00:31:44,000

Really? Interesting.

480

00:31:44,000 --> 00:31:48,000

There used to be a restaurant café over here, a restaurant hotel over here.

481

00:31:48,000 --> 00:31:53,000

I was sitting in there one morning having a cup of coffee and there were four guys sitting at a booth over there.

482

00:31:53,000 --> 00:31:57,000

I could hear them talking and they were talking about mind control.

483

00:31:57,000 --> 00:32:02,000

Three of them got up and left and the fourth guy came over there to get his coffee cup filled up.

484

00:32:02,000 --> 00:32:07,000

They said, I'm not eavesdropping but I couldn't help hearing you guys talk about mind control.

485

00:32:07,000 --> 00:32:12,000

He sat down there and told me, oh yeah, mind control. I've been in this field for 12 years.

486

00:32:12,000 --> 00:32:15,000

He was out here and spent about a month up at Hart.

487

00:32:17,000 --> 00:32:23,000

I think they try to brainwash the people. I don't know if they do it every year but several times they've had these open houses.

488

00:32:23,000 --> 00:32:29,000

They let people go up there and they give them a cup of coffee and then they're talking to everybody that goes up and gets a coffee and cookie.

489

00:32:29,000 --> 00:32:33,000

Oh yeah, Hart's okay. I think that's all this is small thing.

490

00:32:37,000 --> 00:32:43,000

I'll tell you one other thing that happened. I was just down here at the local bar having a beer one night.

491

00:32:43,000 --> 00:32:48,000

I think it was 10 or a dozen electricians come out there and was going to be there for two weeks.

492

00:32:48,000 --> 00:32:53,000

That one guy came in and I don't remember his name now but I recognized him and said, hey man, what's going on?

493

00:32:53,000 --> 00:32:56,000

We fired that damn thing up up there and we fried a guy.

494

00:32:56,000 --> 00:32:58,000

What do you mean, what is fried a guy?

495

00:32:58,000 --> 00:33:01,000

I mean they turned the antenna on and the guy was underneath and they killed it.

496

00:33:07,000 --> 00:33:08,000

Still ahead.

497

00:33:10,000 --> 00:33:14,000

Jesse meets the man who knows more about Hart than anyone in Alaska.

498

00:33:14,000 --> 00:33:16,000

Dr. Begashite Pazoo.

499

00:33:16,000 --> 00:33:20,000

Then he gets sapped with Hart style mind control.

500

00:33:22,000 --> 00:33:24,000

Wow, it seemed like right here.

501

00:33:26,000 --> 00:33:28,000

I'm going to go get him.

502

00:33:39,000 --> 00:33:43,000

Well, we're out here in the wilder lands of Alaska.

503

00:33:45,000 --> 00:33:50,000

We're going to meet a Dr. Begash who seems to know a great deal about Hart.

504

00:33:50,000 --> 00:33:52,000

He's kind of made it his life's ambition.

505

00:33:52,000 --> 00:33:59,000

He has a second career or whatever and this guy is probably the biggest authority on Hart that we're ever going to find.

506

00:34:02,000 --> 00:34:04,000

Let's go talk to Dr. Begash.

507

00:34:04,000 --> 00:34:05,000

Find out what he knows.

508

00:34:10,000 --> 00:34:11,000

Governor Ventura.

509

00:34:11,000 --> 00:34:13,000

Dr. Begashite Pazoo.

510

00:34:13,000 --> 00:34:14,000

Yes indeed, come on in.

511

00:34:14,000 --> 00:34:16,000

Thank you, appreciate it.

512

00:34:17,000 --> 00:34:28,000

Dr. Nick Begash is a prominent Alaskan, a well respected author and activist, son of a U.S. Congressman, brother of U.S. Senator Mark Begash.

513

00:34:28,000 --> 00:34:32,000

He's been studying and investigating Hart for the past 15 years.

514

00:34:32,000 --> 00:34:40,000

Now I'm going to be honest, you know up until about two weeks ago I'd never even heard of Hart when I find it a bit disturbing.

515

00:34:40,000 --> 00:34:42,000

Let's get to the nitty-gritty on this.

516

00:34:43,000 --> 00:34:48,000

What type of offensive weapon does Hart have the potential to be?

517

00:34:48,000 --> 00:34:50,000

This is kind of grade eight, what does it do?

518

00:34:50,000 --> 00:34:51,000

Because there's a lot of different things.

519

00:34:51,000 --> 00:34:57,000

Not only can they manipulate weather but the idea of knocking aircraft out of the sky and leaving no residual damage.

520

00:34:57,000 --> 00:35:00,000

I mean you could wage wars and nobody would ever know it.

521

00:35:00,000 --> 00:35:02,000

If you crank it high enough, you can burn this.

522

00:35:02,000 --> 00:35:07,000

Wait, so you're saying that if they crank this up, they could literally knock airplanes out of the air?

523

00:35:07,000 --> 00:35:08,000

That's correct.

524

00:35:08,000 --> 00:35:10,000

You could also use it to knock out a satellite.

525

00:35:10,000 --> 00:35:18,000

Now think about that. You have plausible deniability, the satellite goes down, all your communications go down, your ability to conduct commerce goes down.

526

00:35:18,000 --> 00:35:20,000

These are things that Hart can do.

527

00:35:20,000 --> 00:35:21,000

And we're not alone anymore.

528

00:35:21,000 --> 00:35:27,000

Chinese are pursuing this technology, Russians are pursuing this technology, and others are pursuing this technology today.

529

00:35:31,000 --> 00:35:35,000

We got possible weather manipulation through the whole world.

530

00:35:35,000 --> 00:35:36,000

Right.

531

00:35:36,000 --> 00:35:39,000

Now could it cause hurricanes and earthquakes?

532

00:35:39,000 --> 00:35:42,000

Well, that's very possible. Many scientists believe this.

533

00:35:46,000 --> 00:35:52,000

What you're saying to me, like if we wanted to attack someone, we could actually, with heart, attack them with the weather?

534

00:35:52,000 --> 00:36:01,000

Right. And there's actually a treaty that goes back to 1977 that the US and the Soviets and 60 other countries signed saying we wouldn't use what they called environmental manipulation,

535

00:36:01,000 --> 00:36:05,000

which was things like creating tidal waves, earthquake, weather modifications as weapons of war.

536

00:36:05,000 --> 00:36:11,000

Then what you're saying to me, point blank, is we quite potentially could be violating the treaty?

537

00:36:11,000 --> 00:36:16,000

Well, the rule is you can do whatever you want domestically. That's the way the treaty reads.

538

00:36:17,000 --> 00:36:25,000

All that may be dangerous enough, but Nick Beggage says he's most worried about Hart's ability to interfere with your mind.

539

00:36:25,000 --> 00:36:30,000

Obviously they deny it, but what we produced was their own documents.

540

00:36:30,000 --> 00:36:36,000

You know, these are Air Force, Navy, military documents that actually lay this out.

541

00:36:36,000 --> 00:36:38,000

It's their own words, not our words.

542

00:36:38,000 --> 00:36:43,000

You know, doctor, what you're saying to me is scary.

543

00:36:43,000 --> 00:36:46,000

I mean, it's as simple as that.

544

00:36:46,000 --> 00:36:47,000

Yeah, it is.

545

00:36:47,000 --> 00:36:55,000

I mean, you're talking about something that can be done with mind control to where you can affect people's minds and they don't even know it.

546

00:36:55,000 --> 00:36:56,000

That's correct.

547

00:36:56,000 --> 00:36:58,000

And this is masses of people.

548

00:36:58,000 --> 00:36:59,000

Right.

549

00:36:59,000 --> 00:37:08,000

They can do it at a level where you could be walking down the street and you could get infiltrated with these sound waves and you wouldn't even know that they were hitting you.

550

00:37:08,000 --> 00:37:10,000

That's right. And there's two different ways.

551

00:37:10,000 --> 00:37:18,000

One would be transferring voice information and the other would be just affecting you on an emotional level, which is much simpler, which is easily accomplished by Hart.

552

00:37:18,000 --> 00:37:22,000

The human body and the mind is able to pick a signal out.

553

00:37:22,000 --> 00:37:25,000

Like going through the radio station, you're dialing through the station, you get all the static.

554

00:37:25,000 --> 00:37:30,000

As soon as you get resonance, harmony between the transmitter and receiver, you get a nice clear signal.

555

00:37:30,000 --> 00:37:38,000

The same is true in terms of the human chemistry, in terms of our chemistry, our cell structure, body organs, or the brain.

556

00:37:38,000 --> 00:37:46,000

Jesse Ventura has his doubts that the harp antennas can broadcast radio waves that influence people's thoughts.

557

00:37:46,000 --> 00:37:49,000

But Nick Vagage is prepared for the skeptics.

558

00:37:49,000 --> 00:37:59,000

Now this is a device that Friends of Mine in Germany designed and we had demonstrated in the European Parliament an open hearing, a cruder version, but it made our point.

559

00:37:59,000 --> 00:38:13,000

This is a standard CD player and what these are is piezoelectric transducers and in simple language, they carry a signal that can enter the nervous system so that you can get that proverbial voice in the head.

560

00:38:13,000 --> 00:38:24,000

And so by activating this, placing these electrodes on the surface of the skin, blocking the ears tightly, you'll hear the music just as if your ears were playing it, but the ears have nothing to do with it.

561

00:38:24,000 --> 00:38:28,000

The eighth cranial nerve, the part that connects to the brain, has nothing to do with it.

562

00:38:28,000 --> 00:38:30,000

Is that working right now?

563

00:38:30,000 --> 00:38:31,000

Yeah, we can get it cranked up here.

564

00:38:31,000 --> 00:38:33,000

Crank it up, I want to try it.

565

00:38:33,000 --> 00:38:40,000

So in other words, I can touch this to my neck and hear it without my ears hearing it and no one else in the room will hear it.

566

00:38:40,000 --> 00:38:41,000

That is correct.

567

00:38:41,000 --> 00:38:44,000

I want you to block your ears really tightly so you can't hear it.

568

00:38:47,000 --> 00:38:53,000

Still ahead, Harp invades Jesse Ventura's brain. The incredible conclusion.

569

00:38:54,000 --> 00:38:55,000

Wow.

570

00:38:55,000 --> 00:38:56,000

Wow.

571

00:39:08,000 --> 00:39:12,000

I want you to block your ears really tightly so you can't hear it.

572

00:39:13,000 --> 00:39:28,000

Jesse Ventura was skeptical about claims that the Harp antennas in remote Alaska have the power to control people's minds, including yours and his.

573

00:39:28,000 --> 00:39:35,000

Now, Dr. Nick Beggage is showing him how the Harp transmitter can send a signal directly to his brain.

574

00:39:35,000 --> 00:39:36,000

Wow.

575

00:39:36,000 --> 00:39:37,000

So what did you hear?

576

00:39:37,000 --> 00:39:46,000

Well, I heard music, but it's strange because I listened to try to figure out where the music was

coming from and it seemed like right here.

577

00:39:46,000 --> 00:39:51,000

It sounded like I was hearing it almost through the top of my head or my forehead.

578

00:39:55,000 --> 00:40:05,000

With Harp, when you start to look at this signal, not just transferring sound information, but just to affect the brain with emotional state changes, is so easily accomplished.

579

00:40:06,000 --> 00:40:07,000

So we got mind control?

580

00:40:07,000 --> 00:40:21,000

Absolutely. In fact, if you go back historically, back to the 1960s when all of this work really started, the idea of mind control experiments, one of the guys that the New York Times reported was one of those experimental subjects was a unabomber.

581

00:40:21,000 --> 00:40:31,000

If you remember, he attacked people who were involved in technology when I was at the result of the experiment because the U.S. military admits over 8,000 servicemen alone were used in these experiments.

582

00:40:32,000 --> 00:40:42,000

This technology wrote to be simple. You can get the components off the shelf. You just have to have the technical knowledge to understand how to dial it in.

583

00:40:42,000 --> 00:40:51,000

Just like dialing in that radio station we were talking about, in between it's static, but when you get resonance between that transmitter and receiver, things start to happen.

584

00:40:51,000 --> 00:40:56,000

And in the earth, things start to happen. Where you already have something unstable, you can trigger that earthquake.

585

00:40:56,000 --> 00:41:02,000

Terrorists possess technology, so it could create earthquakes, volcanic eruptions, modify weather.

586

00:41:02,000 --> 00:41:03,000

Terrorists?

587

00:41:03,000 --> 00:41:13,000

Terrorists. It's not just about weather modification. These guys can knock aircraft out of the sky, they can disable satellites, knock them literally into neutral where they can't even work.

588

00:41:13,000 --> 00:41:25,000

This is the kind of thing that you can wage war without even knowing the war has been waged. Covert war is not something that's new to this country, but with this technological twist it throws a whole new flavor on all of us.

589

00:41:25,000 --> 00:41:30,000

So in layman's terms you're almost talking about an invisible death ray?

590

00:41:30,000 --> 00:41:38,000

Actually the guy who originated the death ray concept was a guy named Nikola Tesla. He's a guy that developed an AC current that runs all of our households today.

591

00:41:38,000 --> 00:41:49,000

But he had a concept on the death ray that was presented to the government just before World War II. Those papers are cited in Bernard Eastland's patents. This is the death ray.

592

00:41:49,000 --> 00:42:08,000

Jesse Ventura and his team head home from Alaska. The things they saw, the people they met, the information they gathered, leave them convinced that harp is much more than the government would have us believe.

593

00:42:19,000 --> 00:42:32,000

I went into this investigation knowing full well that our military keeps secrets, but in the case of harp they're playing with fire. It's one thing to build a missile defense system. It's another to interfere with nature.

594

00:42:32,000 --> 00:42:46,000

We saw how easy it is to move clouds around, to trigger storms, floods, eco-terrorism, and I learned that radio waves really can get inside your head. They got inside mine.

595

00:42:46,000 --> 00:43:00,000

Bottom line, I went up to the gates of the harp facility and they wouldn't let me in. An operation that's run by the Navy doesn't shut out a former Navy SEAL unless they've got something to hide.

596

00:43:00,000 --> 00:43:04,000

I'm Jesse Ventura. This is Conspiracy Theory.
