1
00:00:14,120 --> 00:00:11,200

[Music]

2
00:00:16,880 --> 00:00:14,130

good afternoon ladies and gentlemen

3
00:00:18,140 --> 00:00:16,890

welcome to the program I am your host

4
00:00:20,210 --> 00:00:18,150

Chris George

5
00:00:23,269 --> 00:00:20,220

zucker and you have entered the den of

6
00:00:24,349 --> 00:00:23,279

war grab your glasses of scotch although

7
00:00:26,630 --> 00:00:24,359

for some of you from the eastern

8
00:00:27,980 --> 00:00:26,640

hemisphere immersing I should say you're

9
00:00:30,950 --> 00:00:27,990

probably onto beer at this point in the

10
00:00:32,630 --> 00:00:30,960

in the day and put your chair to the

11
00:00:34,940 --> 00:00:32,640

fire because we're gonna learn some cool

12
00:00:37,910 --> 00:00:34,950

[h__\h] tonight courtesy of a personal hero

13
00:00:39,410 --> 00:00:37,920

of mine nuh nuh none other than Brian

14

00:00:42,380 --> 00:00:39,420

Forester we're going to be discussing

15

00:00:44,810 --> 00:00:42,390

the DNA testing of the elongated skulls

16

00:00:49,220 --> 00:00:44,820

of Packer s that he has been working on

17

00:00:51,529 --> 00:00:49,230

with la Mars only for Bob last ball

18

00:00:52,939 --> 00:00:51,539

pretty well since since it has been

19

00:00:56,450 --> 00:00:52,949

really looked at he's been trying to get

20

00:00:59,150 --> 00:00:56,460

these done and there is a huge reveal

21

00:01:01,000 --> 00:00:59,160

that will be done in LA on the 2nd

22

00:01:03,439 --> 00:01:01,010

February and we are the first show

23

00:01:05,990 --> 00:01:03,449

that's going to be able to discuss these

24

00:01:07,969 --> 00:01:06,000

goings ons with him and it's a great

25

00:01:11,420 --> 00:01:07,979

honor and a pleasure to have him on the

26

00:01:13,609 --> 00:01:11,430

show and it is a man with no with no

27

00:01:17,030 --> 00:01:13,619

need for introduction everyone does know

28

00:01:18,609 --> 00:01:17,040

him he is a fantastic personality and

29

00:01:22,700 --> 00:01:18,619

individual and researcher in the field

30

00:01:25,490 --> 00:01:22,710

of alternative history and somebody whom

31

00:01:27,649 --> 00:01:25,500

I believe is one of the most incredible

32

00:01:31,700 --> 00:01:27,659

individuals when it comes to self

33

00:01:34,609 --> 00:01:31,710

American lost civilizations I did want

34

00:01:37,999 --> 00:01:34,619

to be able to mention that this is going

35

00:01:39,560 --> 00:01:38,009

to be a fantastic afternoon for all

36

00:01:41,480 --> 00:01:39,570

those who are going to be joining us if

37

00:01:48,200 --> 00:01:41,490

you are listening to this on iTunes or

38

00:01:50,660 --> 00:01:48,210

on Google radio tuned in or on stitcher

39

00:01:54,530 --> 00:01:50,670

or any of our syndications

40

00:01:56,929 --> 00:01:54,540

such as deprogrammed radio and even I do

41

00:01:59,569 --> 00:01:56,939

believe we're going to be on into the

42

00:02:01,370 --> 00:01:59,579

void sim there there a major publication

43

00:02:03,890 --> 00:02:01,380

of broadcasts so

44

00:02:05,000 --> 00:02:03,900

you can check that out there and if you

45

00:02:07,220 --> 00:02:05,010

are listening in

46

00:02:10,250 --> 00:02:07,230

at that time thank you very much for

47

00:02:12,620 --> 00:02:10,260

joining us now one thing I did want

48

00:02:15,560 --> 00:02:12,630

people to mention is for the show as you

49

00:02:18,560 --> 00:02:15,570

do know it is free to consume but we do

50

00:02:20,840 --> 00:02:18,570

have a very very good cadre of

51
00:02:24,290 --> 00:02:20,850
individuals who donate to the show via

52
00:02:27,520 --> 00:02:24,300
patreon those patrons are the reason why

53
00:02:32,510 --> 00:02:27,530
the show exists and why we can be 100%

54
00:02:34,160 --> 00:02:32,520
sponsor free ad free and 100% listener

55
00:02:35,810 --> 00:02:34,170
supported which essentially means we can

56
00:02:37,700 --> 00:02:35,820
say whatever the hell we want on air

57
00:02:39,440 --> 00:02:37,710
without somebody telling us no you can't

58
00:02:41,390 --> 00:02:39,450
say that no you can't do that no that

59
00:02:44,540 --> 00:02:41,400
point of view is not something that can

60
00:02:47,990 --> 00:02:44,550
be shown and if you have that on air

61
00:02:48,950 --> 00:02:48,000
because it is controversial we will pull

62
00:02:50,930 --> 00:02:48,960
your funding

63
00:02:52,570 --> 00:02:50,940

and we want to make sure that you the

64

00:02:55,040 --> 00:02:52,580

listeners and the viewers out there are

65

00:02:58,010 --> 00:02:55,050

continuously given the most cutting-edge

66

00:02:59,900 --> 00:02:58,020

information available and to a special

67

00:03:02,060 --> 00:02:59,910

thanks goes to our illustrious masters

68

00:03:05,330 --> 00:03:02,070

Jackie Smith and Jack you've across the

69

00:03:07,160 --> 00:03:05,340

pond Pat from Brooklyn to our masters

70

00:03:08,360 --> 00:03:07,170

leave Elton and Ronny Schultz Antonio

71

00:03:11,270 --> 00:03:08,370

Martinez Frederick Johnson chair

72

00:03:14,420 --> 00:03:11,280

Thompson and but mrs. Fox roses Wayne

73

00:03:16,040 --> 00:03:14,430

Joshua Ematic Eleanor Coeur D Nicholas

74

00:03:17,390 --> 00:03:16,050

my cousin thank you very much for

75

00:03:18,020 --> 00:03:17,400

supporting the show it's awesome I'm

76

00:03:20,210 --> 00:03:18,030

glad you like it

77

00:03:22,430 --> 00:03:20,220

create your charles davis dover mayor a

78

00:03:23,930 --> 00:03:22,440

train of marque catalano at the I'll go

79

00:03:25,759 --> 00:03:23,940

borrow Michael Gough Dean John Kendrew

80

00:03:27,680 --> 00:03:25,769

at Anthony Derry Atlanta Koosh avenues

81

00:03:29,930 --> 00:03:27,690

for magical Egypt sentient Christopher

82

00:03:31,460 --> 00:03:29,940

moody and Robin Weebly man that list

83

00:03:35,360 --> 00:03:31,470

gets longer and longer every single week

84

00:03:37,759 --> 00:03:35,370

so Brian thank you very much for joining

85

00:03:39,650 --> 00:03:37,769

us on the program and I see that Koko is

86

00:03:44,180 --> 00:03:39,660

so excited for the show that she wants

87

00:03:46,750 --> 00:03:44,190

to join us as well and you can you know

88

00:03:49,790 --> 00:03:46,760

let's start the set at a very logical

89

00:03:52,280 --> 00:03:49,800

starting point that the pack rest skulls

90

00:03:55,729 --> 00:03:52,290

are and with the elongated skulls are a

91

00:03:58,790 --> 00:03:55,739

fixture within the alternative history

92

00:04:01,100 --> 00:03:58,800

community from anyone who is a believer

93

00:04:04,690 --> 00:04:01,110

in the ancient aliens theory to those

94

00:04:06,830 --> 00:04:04,700

who believe in Atlantis how did these

95

00:04:08,420 --> 00:04:06,840

how did these artifacts first get

96

00:04:11,780 --> 00:04:08,430

discovered

97

00:04:15,050 --> 00:04:11,790

sorry there's a this means music playing

98

00:04:21,020 --> 00:04:15,060

oh ah there we go

99

00:04:22,099 --> 00:04:21,030

sorry oh no I can't hear you okay are

100

00:04:27,469 --> 00:04:22,109

you able to hear me oh there we go

101
00:04:28,999 --> 00:04:27,479
okay okay sorry about that the Packer

102
00:04:31,340 --> 00:04:29,009
asked skulls the elongated skulls

103
00:04:33,050 --> 00:04:31,350
they're they're a have been a fixture in

104
00:04:36,050 --> 00:04:33,060
the alternative history community as

105
00:04:40,279 --> 00:04:36,060
well as from anybody who is interested

106
00:04:42,560 --> 00:04:40,289
in ancient alien theory to even

107
00:04:45,260 --> 00:04:42,570
something just as basic as a logical

108
00:04:48,700 --> 00:04:45,270
basis for Atlantis how did these skulls

109
00:04:52,999 --> 00:04:48,710
first get discovered what what are they

110
00:04:56,960 --> 00:04:53,009
well my discovery of them was I I saw

111
00:04:59,629 --> 00:04:56,970
photographs on TV shows when I would say

112
00:05:01,700 --> 00:04:59,639
you know when I was much younger stating

113
00:05:04,520 --> 00:05:01,710

that they were Nephilim or hybrids or

114

00:05:06,980 --> 00:05:04,530

aliens or whatever but my first physical

115

00:05:10,790 --> 00:05:06,990

encounter was here in practice in Peru

116

00:05:14,330 --> 00:05:10,800

when my friend senior Juan Navarro

117

00:05:15,950 --> 00:05:14,340

he had a or has a little Museum and my

118

00:05:21,399 --> 00:05:15,960

wife and I walked in there one day and

119

00:05:24,800 --> 00:05:21,409

we saw this mummified elongated head and

120

00:05:26,360 --> 00:05:24,810

I was fascinated by it and and he said

121

00:05:27,710 --> 00:05:26,370

oh I have more at home if he'd like me

122

00:05:31,159 --> 00:05:27,720

to bring them to show you and I would

123

00:05:33,469 --> 00:05:31,169

that sounds great and coming from a

124

00:05:36,320 --> 00:05:33,479

biological background I just I was

125

00:05:38,029 --> 00:05:36,330

amazed at the shape because they some of

126

00:05:41,990 --> 00:05:38,039

them appear to be so natural-looking

127

00:05:44,450 --> 00:05:42,000

that I don't and didn't think that there

128

00:05:47,149 --> 00:05:44,460

were examples of head boarding or

129

00:05:49,640 --> 00:05:47,159

cranial deformation and there's almost

130

00:05:51,980 --> 00:05:49,650

no literature whatsoever on the internet

131

00:05:54,620 --> 00:05:51,990

or in academic circles about these

132

00:05:57,050 --> 00:05:54,630

ancient people so that's why I took it

133

00:05:57,589 --> 00:05:57,060

on myself to figure out who these people

134

00:06:01,550 --> 00:05:57,599

were

135

00:06:04,700 --> 00:06:01,560

now the peoples themselves they take a

136

00:06:06,950 --> 00:06:04,710

very that they occupy a very large area

137

00:06:09,560 --> 00:06:06,960

of the planet's surface even though the

138

00:06:13,939 --> 00:06:09,570

land masses themselves may be relatively

139

00:06:16,459 --> 00:06:13,949

small I've been watching your work as

140

00:06:18,140 --> 00:06:16,469

well as multitude of your lectures from

141

00:06:19,870 --> 00:06:18,150

open minds conference for instance

142

00:06:21,940 --> 00:06:19,880

megalith amania

143

00:06:25,810 --> 00:06:21,950

you have mentioned on a few occasions of

144

00:06:28,300 --> 00:06:25,820

the Polynesian triangle now exactly how

145

00:06:31,660 --> 00:06:28,310

does that fit into the the skull mythos

146

00:06:34,210 --> 00:06:31,670

is there a basis of travel that that

147

00:06:37,360 --> 00:06:34,220

people had arrived to the southern

148

00:06:39,600 --> 00:06:37,370

continent from well the curious thing

149

00:06:42,670 --> 00:06:39,610

and again because there's so little

150

00:06:45,430 --> 00:06:42,680

academic material except about the

151
00:06:48,160 --> 00:06:45,440
textiles these people made they almost

152
00:06:50,710 --> 00:06:48,170
no attention to their pet the size of

153
00:06:54,370 --> 00:06:50,720
their heads the fact that the royal

154
00:06:57,070 --> 00:06:54,380
people had had dark red hair not the

155
00:06:58,720 --> 00:06:57,080
black hair of Native Americans I was

156
00:07:01,810 --> 00:06:58,730
also able to find out that they average

157
00:07:05,740 --> 00:07:01,820
5 foot 10 to 6 feet tall which is very

158
00:07:08,740 --> 00:07:05,750
big for an ancient Peruvian and also if

159
00:07:10,660 --> 00:07:08,750
you have darkish red or reddish hair you

160
00:07:13,690 --> 00:07:10,670
tend to have very light skin and

161
00:07:15,930 --> 00:07:13,700
possibly blue or green eyes so those are

162
00:07:18,840 --> 00:07:15,940
characteristics that don't fit in at all

163
00:07:22,720 --> 00:07:18,850

with the standard bearing landbridge

164

00:07:25,600 --> 00:07:22,730

movement of people from siberia and

165

00:07:28,240 --> 00:07:25,610

since i've studied a lot in Polynesia in

166

00:07:31,330 --> 00:07:28,250

hawaii and other places i heard stories

167

00:07:34,390 --> 00:07:31,340

that there were ancient people that had

168

00:07:37,380 --> 00:07:34,400

reddish hair and light skin who were

169

00:07:40,630 --> 00:07:37,390

encountered in new zealand Tahiti and

170

00:07:43,660 --> 00:07:40,640

Hawaii and Easter Island so that's where

171

00:07:45,730 --> 00:07:43,670

the Polynesian triangle comes in so it's

172

00:07:47,320 --> 00:07:45,740

been a process of trying to figure out

173

00:07:51,880 --> 00:07:47,330

that obviously these people didn't

174

00:07:54,490 --> 00:07:51,890

spontaneously evolved on the coast of

175

00:07:56,950 --> 00:07:54,500

Peru from local native people so the

176

00:07:59,590 --> 00:07:56,960

only possibility that I've been able to

177

00:08:01,450 --> 00:07:59,600

come to is that they obviously migrated

178

00:08:03,670 --> 00:08:01,460

from somewhere else and they would have

179

00:08:06,310 --> 00:08:03,680

to at least have gone through Polynesia

180

00:08:09,070 --> 00:08:06,320

in order to get to the the coast of Peru

181

00:08:11,320 --> 00:08:09,080

now the the eddies in the Pacific Ocean

182

00:08:14,590 --> 00:08:11,330

and then the currents have been proven

183

00:08:17,080 --> 00:08:14,600

to have been able to transport boats

184

00:08:20,020 --> 00:08:17,090

over extended period or extended lengths

185

00:08:21,820 --> 00:08:20,030

and distances I know the one of the

186

00:08:24,400 --> 00:08:21,830

prevailing theories has been that they

187

00:08:26,980 --> 00:08:24,410

were island hopping the other one is

188

00:08:28,960 --> 00:08:26,990

that they came down along the coast and

189

00:08:30,879 --> 00:08:28,970

in shallow reed areas which I never

190

00:08:34,529 --> 00:08:30,889

thought made much sense

191

00:08:36,940 --> 00:08:34,539

but there seems to have been multiple

192

00:08:40,000 --> 00:08:36,950

landings at or at least possible

193

00:08:43,089 --> 00:08:40,010

landings is it possible they came to

194

00:08:44,620 --> 00:08:43,099

either Bolivia or peru first and then

195

00:08:47,800 --> 00:08:44,630

let's say traveled somewhere else and

196

00:08:49,540 --> 00:08:47,810

then came back at a later time it's

197

00:08:52,590 --> 00:08:49,550

possible the interesting thing is

198

00:08:55,900 --> 00:08:52,600

there's a lady who lives in New Zealand

199

00:08:58,180 --> 00:08:55,910

the native New Zealand people are called

200

00:09:00,819 --> 00:08:58,190

the Maori and they're there a Polynesian

201
00:09:02,939 --> 00:09:00,829
heritage so that means they're you know

202
00:09:08,230 --> 00:09:02,949
in general they're quite stocky dark

203
00:09:10,540 --> 00:09:08,240
skin brown eyes black wavy hair but she

204
00:09:13,389 --> 00:09:10,550
has red hair and it's genetic and so she

205
00:09:17,460 --> 00:09:13,399
had her DNA tested and it turns out that

206
00:09:20,980 --> 00:09:17,470
30 percent of her DNA is Persian so

207
00:09:23,500 --> 00:09:20,990
you're talking about major complications

208
00:09:25,810 --> 00:09:23,510
in migration also we have building

209
00:09:28,810 --> 00:09:25,820
evidence that ancient people traveled

210
00:09:31,660 --> 00:09:28,820
not only to the Pacific coast of South

211
00:09:34,960 --> 00:09:31,670
America but also the the Atlantic side

212
00:09:37,930 --> 00:09:34,970
too and it's it's quite possible that

213
00:09:41,230 --> 00:09:37,940

ancient people both sailed to the coast

214

00:09:44,860 --> 00:09:41,240

of Peru but also sailed up the Amazon

215

00:09:46,600 --> 00:09:44,870

River and got to the into deep deep into

216

00:09:49,090 --> 00:09:46,610

the jungle and then climbed over the

217

00:09:51,759 --> 00:09:49,100

Andes to get into places like Cusco in

218

00:09:54,220 --> 00:09:51,769

Peru so the the story is very complex

219

00:09:57,069 --> 00:09:54,230

and I know that some people will try and

220

00:09:59,740 --> 00:09:57,079

fit the story of the Anunnaki or the

221

00:10:01,870 --> 00:09:59,750

watchers or they will use some type of

222

00:10:03,939 --> 00:10:01,880

other mythology to try and place the

223

00:10:06,300 --> 00:10:03,949

elongated skulls into some type of

224

00:10:08,920 --> 00:10:06,310

paradigm that that makes sense

225

00:10:10,689 --> 00:10:08,930

and I know that you're somewhat of a

226

00:10:13,420 --> 00:10:10,699

researcher and have colleagues that are

227

00:10:15,009 --> 00:10:13,430

researchers of giant mythos as well it's

228

00:10:19,630 --> 00:10:15,019

it's also a guilty pleasure of mine and

229

00:10:22,360 --> 00:10:19,640

there are numerous reports of red hair

230

00:10:24,189 --> 00:10:22,370

giants in North America in the Ohio

231

00:10:27,040 --> 00:10:24,199

Valley on the west coast of the United

232

00:10:29,650 --> 00:10:27,050

States is there any relation between the

233

00:10:33,280 --> 00:10:29,660

two or is this something that is more

234

00:10:35,139 --> 00:10:33,290

like well red hair is you know it's red

235

00:10:37,269 --> 00:10:35,149

hair is a characteristic but it doesn't

236

00:10:40,579 --> 00:10:37,279

necessarily mean that if red hair is

237

00:10:44,179 --> 00:10:40,589

here it has to be the same people there

238

00:10:47,059 --> 00:10:44,189

yeah we aren't sure yet la Marzulli is

239

00:10:49,910 --> 00:10:47,069

doing a lot of work with the Nephilim

240

00:10:51,739 --> 00:10:49,920

and the Giants and humans and Jim Vieira

241

00:10:54,949 --> 00:10:51,749

are doing a lot of work with the Giants

242

00:10:58,129 --> 00:10:54,959

the problem so far is because of the

243

00:11:00,379 --> 00:10:58,139

cover-up in the 19th century of giant

244

00:11:01,840 --> 00:11:00,389

remains that we're found that aren't

245

00:11:05,509 --> 00:11:01,850

probably now in the Smithsonian

246

00:11:08,509 --> 00:11:05,519

warehouses DNA as far as I know has not

247

00:11:11,329 --> 00:11:08,519

been recovered in order to do a

248

00:11:15,410 --> 00:11:11,339

comparison so we are at the beginning

249

00:11:17,150 --> 00:11:15,420

stages of this once they are able to get

250

00:11:19,519 --> 00:11:17,160

jump you know if they can't get giant

251
00:11:21,980 --> 00:11:19,529
DNA then we could do a comparison of the

252
00:11:25,340 --> 00:11:21,990
practice with them and see if there's a

253
00:11:28,699 --> 00:11:25,350
relationship but in general in ancient

254
00:11:32,869 --> 00:11:28,709
history red hair and dark red hair tend

255
00:11:34,850 --> 00:11:32,879
to be science of nobility you find that

256
00:11:37,879 --> 00:11:34,860
in Israel in the Middle East

257
00:11:40,220 --> 00:11:37,889
Ireland Scotland Skanda Scandinavia

258
00:11:45,619 --> 00:11:40,230
etcetera but finding them on the west

259
00:11:47,929 --> 00:11:45,629
coast of Peru 2,000 plus years ago if

260
00:11:53,240 --> 00:11:47,939
nothing else that shatters the idea that

261
00:11:54,949 --> 00:11:53,250
the only migration to Peru came from

262
00:11:58,220 --> 00:11:54,959
people crossing the Bering Land Bridge

263
00:12:00,549 --> 00:11:58,230

and walking their way down thousands of

264

00:12:03,290 --> 00:12:00,559

miles so it's it's it's pretty

265

00:12:05,059 --> 00:12:03,300

earth-shattering evidence and at the

266

00:12:06,889 --> 00:12:05,069

same time it would also potentially be

267

00:12:09,079 --> 00:12:06,899

indicative of the types of architecture

268

00:12:12,049 --> 00:12:09,089

that are found worldwide I know that

269

00:12:13,549 --> 00:12:12,059

let's say in the temple of Osiris or

270

00:12:15,259 --> 00:12:13,559

what's termed the temple of Osiris there

271

00:12:17,150 --> 00:12:15,269

are megalithic blocks which are shaped

272

00:12:19,639 --> 00:12:17,160

together using very similar styles which

273

00:12:23,869 --> 00:12:19,649

are found in Japan and found in and

274

00:12:28,189 --> 00:12:23,879

found in in Peru even so you know seeing

275

00:12:30,319 --> 00:12:28,199

those types of DNA markers in you know

276

00:12:31,490 --> 00:12:30,329

let's say and from the Persian region or

277

00:12:33,860 --> 00:12:31,500

at least that part of the world and

278

00:12:36,319 --> 00:12:33,870

actually also seeing it in Peru is and

279

00:12:38,119 --> 00:12:36,329

seeing the same architecture it lends

280

00:12:39,230 --> 00:12:38,129

somebody to think that it's possible at

281

00:12:41,780 --> 00:12:39,240

least that there is some type of

282

00:12:43,519 --> 00:12:41,790

connection why do you think that there

283

00:12:46,069 --> 00:12:43,529

has been such a pushback from from the

284

00:12:49,059 --> 00:12:46,079

archaeological community at least I know

285

00:12:52,189 --> 00:12:49,069

that there has been less recently I the

286

00:12:54,380 --> 00:12:52,199

main a theory which was the Bering Land

287

00:12:56,870 --> 00:12:54,390

Bridge crossing that is starting to gain

288

00:12:58,280 --> 00:12:56,880

or I should say the alternate theory was

289

00:13:00,440 --> 00:12:58,290

starting to gain more prominence within

290

00:13:02,769 --> 00:13:00,450

within that community but you're still

291

00:13:05,030 --> 00:13:02,779

finding resistance from your perspective

292

00:13:06,829 --> 00:13:05,040

are you still seeing it improve from

293

00:13:08,600 --> 00:13:06,839

from the archaeological community or is

294

00:13:13,699 --> 00:13:08,610

it the same there as it is in the United

295

00:13:16,100 --> 00:13:13,709

States there there actually is very not

296

00:13:17,900 --> 00:13:16,110

a lot of our Kela archaeological

297

00:13:22,069 --> 00:13:17,910

activity that's going on in Peru these

298

00:13:25,819 --> 00:13:22,079

days much less than previously I think

299

00:13:28,430 --> 00:13:25,829

the most important aspect is we've

300

00:13:30,949 --> 00:13:28,440

depended too long on one small group of

301

00:13:33,470 --> 00:13:30,959

people to tell us what the historical

302

00:13:35,360 --> 00:13:33,480

record is as in archaeologists and

303

00:13:38,449 --> 00:13:35,370

anthropologists and so that's why I've

304

00:13:43,610 --> 00:13:38,459

been very active with engineers and

305

00:13:48,560 --> 00:13:43,620

stonemasons and other fields of related

306

00:13:49,579 --> 00:13:48,570

interest engineers people geologists

307

00:13:53,389 --> 00:13:49,589

people like that

308

00:13:56,780 --> 00:13:53,399

and once you get there their statements

309

00:13:59,540 --> 00:13:56,790

then the standard archaeological story

310

00:14:02,300 --> 00:13:59,550

that the dynastic Egyptians built the

311

00:14:04,699 --> 00:14:02,310

Great Pyramid or that the Inka built the

312

00:14:07,100 --> 00:14:04,709

megalithic works in Peru just simply

313

00:14:09,290 --> 00:14:07,110

fall apart because they didn't have any

314

00:14:11,540 --> 00:14:09,300

type of level of technology that could

315

00:14:14,030 --> 00:14:11,550

possibly do this it doesn't matter how

316

00:14:16,880 --> 00:14:14,040

many people they had employed the tools

317

00:14:20,210 --> 00:14:16,890

the tools said they had which is bronze

318

00:14:22,880 --> 00:14:20,220

chisels and stone hammers it doesn't it

319

00:14:26,540 --> 00:14:22,890

just doesn't work anymore and so I think

320

00:14:28,699 --> 00:14:26,550

there's a quietness in academia about

321

00:14:32,030 --> 00:14:28,709

this because the evidence is becoming

322

00:14:34,160 --> 00:14:32,040

completely overwhelming oh I think the

323

00:14:36,829 --> 00:14:34,170

only alternate theory that I've been

324

00:14:39,319 --> 00:14:36,839

able to hear from with regards to stone

325

00:14:41,360 --> 00:14:39,329

tools and chisels or even shaping of

326

00:14:43,370 --> 00:14:41,370

stone was actually from someone who's

327

00:14:48,980 --> 00:14:43,380

considered a renegade archaeologist even

328

00:14:52,670 --> 00:14:48,990

in the Egyptology field which is trying

329

00:14:55,430 --> 00:14:52,680

to member where I heard the story but I

330

00:14:57,620 --> 00:14:55,440

know that's what was mentioned to me was

331

00:14:58,850 --> 00:14:57,630

that okay well instead of saying well it

332

00:15:01,130 --> 00:14:58,860

was shaped over a short period of time

333

00:15:03,019 --> 00:15:01,140

the person postulated well it could have

334

00:15:05,540 --> 00:15:03,029

been done over you know let's say 20 or

335

00:15:07,879 --> 00:15:05,550

30 years that one-one craftsman may have

336

00:15:10,429 --> 00:15:07,889

had you know his entire working life

337

00:15:11,809 --> 00:15:10,439

there's just this one piece which at

338

00:15:13,669 --> 00:15:11,819

least is something that's a little more

339

00:15:15,499 --> 00:15:13,679

credible then no it was done within you

340

00:15:17,629 --> 00:15:15,509

know a couple of weeks with stone saw

341

00:15:20,210 --> 00:15:17,639

and some embracive sand and that's how

342

00:15:23,569 --> 00:15:20,220

they got through it right and even with

343

00:15:26,329 --> 00:15:23,579

some of the work that you found in you

344

00:15:29,349 --> 00:15:26,339

know whether in not mistake it wasn't

345

00:15:32,689 --> 00:15:29,359

Machu Picchu but it would have been in

346

00:15:35,769 --> 00:15:32,699

Egypt where the bore holes within solid

347

00:15:38,869 --> 00:15:35,779

granite and diorite and I think even in

348

00:15:41,960 --> 00:15:38,879

my remembrance of all of all the sites

349

00:15:45,769 --> 00:15:41,970

but these were using very hybrid high

350

00:15:49,609 --> 00:15:45,779

very high vibration boring tools which

351
00:15:51,679 --> 00:15:49,619
you had stated are what are the people's

352
00:15:53,269 --> 00:15:51,689
stories that are that they're saying

353
00:15:54,409 --> 00:15:53,279
that they had gotten here from and do

354
00:15:56,840 --> 00:15:54,419
they account for this type of high

355
00:16:00,859 --> 00:15:56,850
technology or even just basic technology

356
00:16:03,679 --> 00:16:00,869
being around or is there methodology of

357
00:16:08,269 --> 00:16:03,689
saying this is how we got here just

358
00:16:09,259 --> 00:16:08,279
about the journey well the you know

359
00:16:12,439 --> 00:16:09,269
again

360
00:16:15,530 --> 00:16:12,449
the important thing is to take someone

361
00:16:19,119 --> 00:16:15,540
like an engineer we've had mining

362
00:16:21,919 --> 00:16:19,129
engineers from Australia with us who use

363
00:16:24,979 --> 00:16:21,929

drill like hollow core drill bits

364

00:16:26,929 --> 00:16:24,989

embedded with diamond and when they look

365

00:16:29,809 --> 00:16:26,939

at the profile of some of these drill

366

00:16:31,939 --> 00:16:29,819

holes in Egypt they say that's about

367

00:16:34,879 --> 00:16:31,949

five hundred times as efficient as the

368

00:16:37,639 --> 00:16:34,889

tools I use so you're not even talking

369

00:16:38,780 --> 00:16:37,649

modern technology being used in the

370

00:16:41,809 --> 00:16:38,790

distant past you're talking about

371

00:16:44,600 --> 00:16:41,819

technology that we don't even have and

372

00:16:49,220 --> 00:16:44,610

when they use ideas like copper saws

373

00:16:52,129 --> 00:16:49,230

with quartz and as an abrasive again

374

00:16:54,739 --> 00:16:52,139

when you have an engineer or a machinist

375

00:16:56,809 --> 00:16:54,749

with you they they completely discount

376

00:16:59,569 --> 00:16:56,819

that because the problem is that the

377

00:17:02,619 --> 00:16:59,579

courts and is the same material as the

378

00:17:05,569 --> 00:17:02,629

quartz which is inside the granite so

379

00:17:08,000 --> 00:17:05,579

you're trying to cut something with the

380

00:17:09,379 --> 00:17:08,010

same hardness as the stone itself which

381

00:17:13,519 --> 00:17:09,389

means you're not going to move very

382

00:17:16,309 --> 00:17:13,529

quickly at all actually the the two

383

00:17:19,399 --> 00:17:16,319

materials basically neutralize each

384

00:17:20,629 --> 00:17:19,409

other and copper

385

00:17:22,220 --> 00:17:20,639

you know copper is a very soft material

386

00:17:24,110 --> 00:17:22,230

so

387

00:17:26,809 --> 00:17:24,120

the Egyptians up until the eighth

388

00:17:28,700 --> 00:17:26,819

century BC and taking into account that

389

00:17:32,060 --> 00:17:28,710

even Egyptologists believe the Great

390

00:17:34,250 --> 00:17:32,070

Pyramid was built 2500 BC the the

391

00:17:37,910 --> 00:17:34,260

hardest tools they had were bronze

392

00:17:41,030 --> 00:17:37,920

chisels which is about 3.5 out of 10 in

393

00:17:44,330 --> 00:17:41,040

hardness and the Inka never showed any

394

00:17:45,890 --> 00:17:44,340

evolution of tool technology up until

395

00:17:48,710 --> 00:17:45,900

the time of the Spanish which was the

396

00:17:51,850 --> 00:17:48,720

16th century when steel was introduced

397

00:17:54,410 --> 00:17:51,860

so you have these Bronze Age cultures

398

00:17:58,669 --> 00:17:54,420

who could not possibly have done things

399

00:18:01,340 --> 00:17:58,679

like the Osirian in Egypt or the Great

400

00:18:04,850 --> 00:18:01,350

Wall of saqsaywaman in Peru where you

401
00:18:07,160 --> 00:18:04,860
have a hundred and twenty ton blocks so

402
00:18:08,990 --> 00:18:07,170
the more that we research it the more we

403
00:18:11,180 --> 00:18:09,000
bring other experts in from different

404
00:18:15,740 --> 00:18:11,190
parts of the world the more the standard

405
00:18:18,760 --> 00:18:15,750
story is simply collapsing and this

406
00:18:21,410 --> 00:18:18,770
would also coincide with stories of

407
00:18:25,010 --> 00:18:21,420
migration as well if I'm not mistaken

408
00:18:26,480 --> 00:18:25,020
the boats in Lake Titicaca are that

409
00:18:28,190 --> 00:18:26,490
they're constructed with reeds which are

410
00:18:31,360 --> 00:18:28,200
found there as well as only there as

411
00:18:33,320 --> 00:18:31,370
well as in the Isle of Rapa Nui only are

412
00:18:34,580 --> 00:18:33,330
essentially the same construction of

413
00:18:38,150 --> 00:18:34,590

very similar construction to the boats

414

00:18:41,120 --> 00:18:38,160

that were found in in Egypt and which

415

00:18:44,210 --> 00:18:41,130

are still ocean faring so it still goes

416

00:18:46,520 --> 00:18:44,220

to ask okay well is it the same based on

417

00:18:49,790 --> 00:18:46,530

coincidence is the same based on design

418

00:18:51,440 --> 00:18:49,800

and are the levels of technical or is

419

00:18:53,810 --> 00:18:51,450

the construction that the DNA that's

420

00:18:56,210 --> 00:18:53,820

found as well as the craftsmanship that

421

00:18:58,870 --> 00:18:56,220

is still being used today which is found

422

00:19:02,200 --> 00:18:58,880

in both places is there a connection and

423

00:19:05,390 --> 00:19:02,210

you know Illi know we've discussed

424

00:19:08,450 --> 00:19:05,400

certain areas in in Peru and Bolivia but

425

00:19:09,830 --> 00:19:08,460

Rapa Nui seems to be one of the and for

426

00:19:13,460 --> 00:19:09,840

all of these listeners out there Rapa

427

00:19:15,890 --> 00:19:13,470

Nui is the native name for Easter Island

428

00:19:19,460 --> 00:19:15,900

which I know some of even our adepts

429

00:19:23,230 --> 00:19:19,470

have been themselves and the

430

00:19:25,370 --> 00:19:23,240

craftsmanship of the moai statues are

431

00:19:28,250 --> 00:19:25,380

I'm going to say absolutely flat but

432

00:19:30,290 --> 00:19:28,260

absolutely baffling to somebody like

433

00:19:33,210 --> 00:19:30,300

myself especially when you realize that

434

00:19:37,590 --> 00:19:33,220

there is an entire body buried beneath

435

00:19:39,149 --> 00:19:37,600

the beneath the ground and a mutual

436

00:19:41,190 --> 00:19:39,159

acquaintance so far as dr. Robert Schoch

437

00:19:43,529 --> 00:19:41,200

has has done

438

00:19:47,760 --> 00:19:43,539

postulating on the dates there and some

439

00:19:52,289 --> 00:19:47,770

of the dates go back a long time you

440

00:19:53,789 --> 00:19:52,299

know so it can you clarify more on the

441

00:19:55,710 --> 00:19:53,799

dating as well as the peoples that could

442

00:19:57,810 --> 00:19:55,720

have been there and how that can account

443

00:19:59,430 --> 00:19:57,820

for not just something that's let's say

444

00:20:01,320 --> 00:19:59,440

a thousand years old but you know could

445

00:20:04,590 --> 00:20:01,330

be up to twelve thousand eight hundred

446

00:20:07,230 --> 00:20:04,600

and sixty years old or older well yeah

447

00:20:09,870 --> 00:20:07,240

well well one point is that the totora

448

00:20:12,630 --> 00:20:09,880

reed is found in lake titicaca it's also

449

00:20:16,380 --> 00:20:12,640

found up right here like i'm several

450

00:20:18,750 --> 00:20:16,390

hundred feet from a lot of totora reed

451
00:20:21,779 --> 00:20:18,760
so it's found on the coast of peru and

452
00:20:24,120 --> 00:20:21,789
also in Rapa Nui and also when you when

453
00:20:27,090 --> 00:20:24,130
you look at the language you see

454
00:20:30,060 --> 00:20:27,100
interesting things like the little craft

455
00:20:33,899 --> 00:20:30,070
they still make on Rapa Nui which is for

456
00:20:36,000 --> 00:20:33,909
one person is called a pora and the ones

457
00:20:40,950 --> 00:20:36,010
made on the coast of Peru are called a

458
00:20:43,320 --> 00:20:40,960
Torah so likely it's the same thing and

459
00:20:46,799 --> 00:20:43,330
if you have that material on the coast

460
00:20:49,440 --> 00:20:46,809
of Peru you can construct a boat if you

461
00:20:51,840 --> 00:20:49,450
wanted 300 feet long out of Tottori and

462
00:20:54,899 --> 00:20:51,850
you could sail to Rapa Nui which would

463
00:20:58,380 --> 00:20:54,909

be your entry point into the Pacific

464

00:20:59,970 --> 00:20:58,390

Ocean and the rest of the world so as

465

00:21:01,980 --> 00:20:59,980

regards Robert Schoch yeah we were

466

00:21:05,789 --> 00:21:01,990

actually there with him which was great

467

00:21:08,130 --> 00:21:05,799

about four years ago and his great

468

00:21:09,779 --> 00:21:08,140

expertise is weathering of stone that's

469

00:21:13,710 --> 00:21:09,789

why he was able to read eight the Sphinx

470

00:21:16,080 --> 00:21:13,720

so when he we visited probably seven or

471

00:21:17,820 --> 00:21:16,090

eight or ten sites and both he and I

472

00:21:19,289 --> 00:21:17,830

noticed two distinct styles of

473

00:21:23,909 --> 00:21:19,299

construction there was a megalithic

474

00:21:25,260 --> 00:21:23,919

style without any mortar and all of

475

00:21:27,330 --> 00:21:25,270

those sites looked like they were

476
00:21:29,549 --> 00:21:27,340
damaged by some kind of Cataclysm and

477
00:21:32,640 --> 00:21:29,559
then the Polynesian style which is

478
00:21:34,710 --> 00:21:32,650
stacking rocks on top of another as well

479
00:21:37,919 --> 00:21:34,720
as with the moai which are the figures

480
00:21:39,750 --> 00:21:37,929
as you mentioned the head sticking out

481
00:21:41,700 --> 00:21:39,760
of the ground is it's not the whole

482
00:21:44,190 --> 00:21:41,710
sculpture the bodies go all the way down

483
00:21:46,649 --> 00:21:44,200
one of them is about 40 feet tall so he

484
00:21:52,529 --> 00:21:46,659
noticed in terms of weathering and stuff

485
00:21:55,859 --> 00:21:52,539
aisle two very distinct designs these

486
00:21:57,599 --> 00:21:55,869
the smaller ones had flatter noses and

487
00:22:00,539 --> 00:21:57,609
looked like they were Polynesian and

488
00:22:03,060 --> 00:22:00,549

also Polynesian in manufacturing or

489

00:22:06,479 --> 00:22:03,070

construction but then the bigger ones

490

00:22:11,669 --> 00:22:06,489

with the more angular noses more

491

00:22:13,649 --> 00:22:11,679

European style or maybe Asian or Middle

492

00:22:16,109 --> 00:22:13,659

Eastern style noses those were much

493

00:22:18,389 --> 00:22:16,119

bigger and much more finely done and he

494

00:22:20,269 --> 00:22:18,399

had no problem in stating that he

495

00:22:23,669 --> 00:22:20,279

thought some of that work was at least

496

00:22:25,560 --> 00:22:23,679

12,000 years old based on weathering and

497

00:22:27,869 --> 00:22:25,570

at that point in time obviously the sea

498

00:22:32,039 --> 00:22:27,879

level was about 300 to 400 feet lower

499

00:22:35,279 --> 00:22:32,049

than it currently is today and again not

500

00:22:37,769 --> 00:22:35,289

getting to Wu here the idea that the

501
00:22:40,289 --> 00:22:37,779
Central Pacific there well there's a

502
00:22:43,019 --> 00:22:40,299
large chain of islands there with with

503
00:22:44,129 --> 00:22:43,029
water down that low there's a very good

504
00:22:45,389 --> 00:22:44,139
chance that the islands could have been

505
00:22:47,190 --> 00:22:45,399
connected or there could have been a

506
00:22:50,369 --> 00:22:47,200
much larger landmass that was there

507
00:22:54,269 --> 00:22:50,379
which may have attributed for two

508
00:22:55,799 --> 00:22:54,279
stories of MU or even of Atlantis if

509
00:23:00,440 --> 00:22:55,809
that were the case and if you're a

510
00:23:03,089 --> 00:23:00,450
follower of Earth Sciences or of

511
00:23:05,479 --> 00:23:03,099
geological history I know that's

512
00:23:07,879 --> 00:23:05,489
theories based on the work of

513
00:23:11,009 --> 00:23:07,889

researchers such as Graham Hancock or

514

00:23:12,299 --> 00:23:11,019

Randall Carlson have at least gone

515

00:23:13,889 --> 00:23:12,309

through the logical process of saying

516

00:23:15,450 --> 00:23:13,899

okay well this is how during the last

517

00:23:17,159 --> 00:23:15,460

ice age that there could have been land

518

00:23:19,710 --> 00:23:17,169

masses in let's say the middle of the

519

00:23:23,039 --> 00:23:19,720

Atlantic making these stories or at

520

00:23:26,879 --> 00:23:23,049

least the legends of these places

521

00:23:31,229 --> 00:23:26,889

existing but you know one of the legends

522

00:23:32,789 --> 00:23:31,239

that I'm always a at least starting to

523

00:23:35,460 --> 00:23:32,799

look into is the legends of the peoples

524

00:23:37,320 --> 00:23:35,470

of Hawaii and how that there were

525

00:23:39,629 --> 00:23:37,330

individuals that had come during let's

526

00:23:40,950 --> 00:23:39,639

say the 16 or 1400s but there were

527

00:23:42,419 --> 00:23:40,960

peoples that were there then they

528

00:23:44,190 --> 00:23:42,429

claimed to have been there for twenty

529

00:23:47,190 --> 00:23:44,200

five thousand years is that correct that

530

00:23:49,769 --> 00:23:47,200

is absolutely correct when you I lived

531

00:23:53,009 --> 00:23:49,779

on on Maui for two years and so I I had

532

00:23:55,079 --> 00:23:53,019

access to the old Hawaiian auntie's who

533

00:23:57,749 --> 00:23:55,089

are the great storytellers they they

534

00:23:59,980 --> 00:23:57,759

carry the oral tradition there's also a

535

00:24:03,549 --> 00:23:59,990

great book which you can still get go

536

00:24:06,520 --> 00:24:03,559

Tales from the night rainbow and that's

537

00:24:09,549 --> 00:24:06,530

an oral tradition account and so what

538

00:24:12,730 --> 00:24:09,559

they state is that the Tahitians arrived

539

00:24:16,770 --> 00:24:12,740

probably I think in the twelve twelve

540

00:24:19,480 --> 00:24:16,780

hundreds ad and they like you know big

541

00:24:22,540 --> 00:24:19,490

Polynesian people but they encountered a

542

00:24:25,690 --> 00:24:22,550

much more peaceful race there called the

543

00:24:27,370 --> 00:24:25,700

move or it's been altered in modern

544

00:24:29,620 --> 00:24:27,380

times they're called Menehune but the

545

00:24:32,650 --> 00:24:29,630

ancient name is the move as in mula

546

00:24:35,110 --> 00:24:32,660

Moria and they supposedly had been there

547

00:24:37,570 --> 00:24:35,120

for forever and like with a lot of

548

00:24:41,590 --> 00:24:37,580

contact of one culture to another

549

00:24:44,260 --> 00:24:41,600

they were decimated to some degree and

550

00:24:46,390 --> 00:24:44,270

also interbred with the arriving

551

00:24:46,990 --> 00:24:46,400

Tahitians and that's why to this very

552

00:24:49,390 --> 00:24:47,000

day

553

00:24:53,669 --> 00:24:49,400

there are people who live in Hawaii

554

00:24:58,720 --> 00:24:53,679

especially on the island of the cold

555

00:25:02,110 --> 00:24:58,730

Cola Bay and the west coast of Hawaii

556

00:25:05,290 --> 00:25:02,120

who have dark red hair and they trace

557

00:25:08,140 --> 00:25:05,300

their ancestry back to the pre Tahitian

558

00:25:10,840 --> 00:25:08,150

people and how is this a connection to

559

00:25:12,940 --> 00:25:10,850

places like nan Madol which some people

560

00:25:15,220 --> 00:25:12,950

were claiming to have been made within

561

00:25:17,470 --> 00:25:15,230

the last several hundred years but it

562

00:25:19,870 --> 00:25:17,480

still doesn't account for the Giants

563

00:25:22,450 --> 00:25:19,880

multi-ton basalt rocks being you know

564

00:25:24,010 --> 00:25:22,460

taken across open water to a remote

565

00:25:27,430 --> 00:25:24,020

location - all of a sudden build this

566

00:25:30,610 --> 00:25:27,440

magical city yeah that's well that's a

567

00:25:33,040 --> 00:25:30,620

great point and again when you when we

568

00:25:34,450 --> 00:25:33,050

have the tour's part of it part of the

569

00:25:37,180 --> 00:25:34,460

function of the tours of course is to

570

00:25:39,130 --> 00:25:37,190

make money but what what I love more is

571

00:25:42,330 --> 00:25:39,140

getting people of expertise to come with

572

00:25:45,790 --> 00:25:42,340

me so we've had shipwrights with us and

573

00:25:48,310 --> 00:25:45,800

you when you explain the story the

574

00:25:48,850 --> 00:25:48,320

standard stories are well the Egyptian

575

00:25:52,090 --> 00:25:48,860

obelisk

576
00:25:55,150 --> 00:25:52,100
carried down the Nile on giant you know

577
00:25:57,250 --> 00:25:55,160
reed boats or the stones of puma punku

578
00:26:00,340 --> 00:25:57,260
were brought across lake titicaca by

579
00:26:02,169 --> 00:26:00,350
people who made reed boats they just

580
00:26:05,049 --> 00:26:02,179
break out laughing because they say you

581
00:26:07,720 --> 00:26:05,059
can't build something that can carry 40

582
00:26:11,380 --> 00:26:07,730
or 100 tons without sinking out of reeds

583
00:26:12,760 --> 00:26:11,390
it's ridiculous so I maybe I just lost

584
00:26:15,310 --> 00:26:12,770
the train of thought there but

585
00:26:18,340 --> 00:26:15,320
another point I did want to make is you

586
00:26:20,380 --> 00:26:18,350
were talking about the it's scientific

587
00:26:23,350 --> 00:26:20,390
fact now that 12,000 years ago the

588
00:26:26,470 --> 00:26:23,360

entire oceans of the world were 300 feet

589

00:26:28,060 --> 00:26:26,480

lower than they are today and so when

590

00:26:32,650 --> 00:26:28,070

you look at a topographical map of

591

00:26:33,610 --> 00:26:32,660

Hawaii the island of Lanai coleauxv a

592

00:26:37,630 --> 00:26:33,620

mola

593

00:26:39,250 --> 00:26:37,640

yeah well all of the islands basically

594

00:26:44,740 --> 00:26:39,260

would have been connected to each other

595

00:26:47,830 --> 00:26:44,750

except maybe Big Island but that 12,000

596

00:26:50,280 --> 00:26:47,840

years ago would be a big landmass and so

597

00:26:56,320 --> 00:26:50,290

I think that's where the MU reference is

598

00:26:59,080 --> 00:26:56,330

I think Hawaii was actually mu and some

599

00:27:01,960 --> 00:26:59,090

of the Hawaiian elders have told me that

600

00:27:03,940 --> 00:27:01,970

they you know we don't believe this idea

601
00:27:06,340 --> 00:27:03,950
that the Tahitians came here and they

602
00:27:09,580 --> 00:27:06,350
were solely our ancestors we're the ones

603
00:27:12,450 --> 00:27:09,590
who went there for Hearst so again going

604
00:27:15,790 --> 00:27:12,460
back to your your statement of

605
00:27:19,360 --> 00:27:15,800
inhabitation on the Hawaiian Islands

606
00:27:21,160 --> 00:27:19,370
possibly 25,000 plus years ago and how

607
00:27:23,520 --> 00:27:21,170
does this connect to let's say the the

608
00:27:27,340 --> 00:27:23,530
pakoras people or the the via courier

609
00:27:29,620 --> 00:27:27,350
coaches where the viewer or Asha said

610
00:27:33,100 --> 00:27:29,630
the Viracocha because that word can can

611
00:27:36,400 --> 00:27:33,110
be used as as a term for Viracocha

612
00:27:38,950 --> 00:27:36,410
himself or his his followers so it is

613
00:27:41,290 --> 00:27:38,960

there is their connection between the

614

00:27:43,630 --> 00:27:41,300

the para caste people and the Viera

615

00:27:46,770 --> 00:27:43,640

coach or are these potentially two

616

00:27:48,840 --> 00:27:46,780

completely distinct groups or peoples

617

00:27:52,290 --> 00:27:48,850

that's really hard to know the important

618

00:27:54,120 --> 00:27:52,300

point and again this comes from learning

619

00:27:56,790 --> 00:27:54,130

from local not like the best thing is

620

00:27:59,730 --> 00:27:56,800

local knowledge it's not from some

621

00:28:02,580 --> 00:27:59,740

academic test text of supposition blah

622

00:28:06,930 --> 00:28:02,590

blah blah but viracocha is the name of

623

00:28:10,500 --> 00:28:06,940

the Creator God so Viracocha was wasn't

624

00:28:13,380 --> 00:28:10,510

is maybe an invisible deity but he sent

625

00:28:15,060 --> 00:28:13,390

his children called the Veera Kochan or

626

00:28:17,820 --> 00:28:15,070

the winter coach and to be great

627

00:28:19,170 --> 00:28:17,830

teachers and the little that's known

628

00:28:22,020 --> 00:28:19,180

about them now is that they were

629

00:28:25,110 --> 00:28:22,030

supposedly very tall they came from a

630

00:28:28,500 --> 00:28:25,120

very distant land where I believe where

631

00:28:30,330 --> 00:28:28,510

the Sun said it's either they came from

632

00:28:33,060 --> 00:28:30,340

the land where the Sun sets or the land

633

00:28:35,520 --> 00:28:33,070

where the Sun rises and they were

634

00:28:38,400 --> 00:28:35,530

supposedly light-skinned very tall very

635

00:28:41,460 --> 00:28:38,410

intelligent and they spent a limited

636

00:28:43,730 --> 00:28:41,470

time with the local people of Peru in

637

00:28:46,320 --> 00:28:43,740

order to educate them in regards

638

00:28:50,160 --> 00:28:46,330

agriculture metallurgy you know all the

639

00:28:53,430 --> 00:28:50,170

sciences and arts and they departed from

640

00:28:56,070 --> 00:28:53,440

the north coast of Peru where the border

641

00:28:58,890 --> 00:28:56,080

with Ecuador is but another interesting

642

00:29:02,250 --> 00:28:58,900

twist is very culture means the foam of

643

00:29:04,860 --> 00:29:02,260

the sea and supposedly the story is they

644

00:29:07,950 --> 00:29:04,870

left and left behind the foam of the sea

645

00:29:10,650 --> 00:29:07,960

but another twist on the story is that

646

00:29:13,620 --> 00:29:10,660

when they arrived they said we come from

647

00:29:17,880 --> 00:29:13,630

the foam of the sea may be hinting that

648

00:29:20,550 --> 00:29:17,890

their landmass had sunk and knowing that

649

00:29:25,410 --> 00:29:20,560

that even the imagery of the Viracocha

650

00:29:27,270 --> 00:29:25,420

is seen throughout South America I'm not

651

00:29:30,210 --> 00:29:27,280

sure if you're familiar with Richard

652

00:29:32,910 --> 00:29:30,220

Casares work he's he's found the you

653

00:29:37,320 --> 00:29:32,920

know he's found the same imagery of the

654

00:29:39,000 --> 00:29:37,330

very kocha or even Quetzalcoatl all the

655

00:29:44,610 --> 00:29:39,010

routes you know all throughout the

656

00:29:46,290 --> 00:29:44,620

adriatic the the not the adriatic i'm

657

00:29:49,230 --> 00:29:46,300

croatian so i always go to the adriatic

658

00:29:51,120 --> 00:29:49,240

as the mean as the main seat there I can

659

00:29:54,360 --> 00:29:51,130

understand why I spent a month in

660

00:29:59,320 --> 00:29:54,370

Dubrovnik and loved the weather the food

661

00:30:01,340 --> 00:29:59,330

the women all of the above

662

00:30:05,570 --> 00:30:01,350

thank goodness my wife does not listen

663

00:30:10,970 --> 00:30:05,580

or watch this show we're not going back

664

00:30:13,220 --> 00:30:10,980

home with this imagery being seen

665

00:30:14,539 --> 00:30:13,230

throughout there I'm going to touch her

666

00:30:16,070 --> 00:30:14,549

and go back to Taipei just because every

667

00:30:17,930 --> 00:30:16,080

single time we say that everyone takes a

668

00:30:20,779 --> 00:30:17,940

shot at some point then when I mess up a

669

00:30:22,669 --> 00:30:20,789

name so thankfully that I have to give I

670

00:30:25,090 --> 00:30:22,679

have to give the the people just you

671

00:30:28,310 --> 00:30:25,100

know a little bit of a taste today

672

00:30:31,580 --> 00:30:28,320

the hand signals around the Buried

673

00:30:34,190 --> 00:30:31,590

statues of easter island where it's it's

674

00:30:38,029 --> 00:30:34,200

situated around the navel that same

675

00:30:41,299 --> 00:30:38,039

style of placement around the navel is

676

00:30:44,149 --> 00:30:41,309

seen at Gobekli tapping right as well

677

00:30:45,950 --> 00:30:44,159

and I'm going to use it as somewhat of a

678

00:30:48,980 --> 00:30:45,960

transition into the the next subject

679

00:30:51,139 --> 00:30:48,990

matter which is the testing of the

680

00:30:53,690 --> 00:30:51,149

skulls which I know helps is something

681

00:30:55,159 --> 00:30:53,700

that and being able to link back to that

682

00:30:59,360 --> 00:30:55,169

statement as well which is pretty cool

683

00:31:01,789 --> 00:30:59,370

um with the current connection to the

684

00:31:04,010 --> 00:31:01,799

Native peoples the testings that you've

685

00:31:05,930 --> 00:31:04,020

performed beforehand I know that there

686

00:31:08,149 --> 00:31:05,940

were were two sets of testings one is

687

00:31:10,519 --> 00:31:08,159

being announced on the second and you've

688

00:31:12,110 --> 00:31:10,529

done one which you recently released and

689

00:31:13,549 --> 00:31:12,120

you you sent me the the video this

690

00:31:17,139 --> 00:31:13,559

afternoon I'm just gonna try and see if

691

00:31:20,299 --> 00:31:17,149

I can bring that up but that was from

692

00:31:25,370 --> 00:31:20,309

callings of yours which had documented

693

00:31:26,990 --> 00:31:25,380

the entire process so what what did you

694

00:31:29,450 --> 00:31:27,000

find as far as a connection to the

695

00:31:32,960 --> 00:31:29,460

current peoples that are there and is

696

00:31:37,730 --> 00:31:32,970

there a like were you surprised by the

697

00:31:40,820 --> 00:31:37,740

the first set of testing yeah I was

698

00:31:44,350 --> 00:31:40,830

we-well Marzulli and I and and the

699

00:31:46,130 --> 00:31:44,360

others involved in those tests

700

00:31:48,500 --> 00:31:46,140

unfortunately there were only four

701
00:31:51,680 --> 00:31:48,510
samples because just because of

702
00:31:55,960 --> 00:31:51,690
circumstances but the the DNA results

703
00:32:00,860 --> 00:31:55,970
came from hair and the hair was

704
00:32:03,200 --> 00:32:00,870
sterilized as in as in all the surface

705
00:32:05,779 --> 00:32:03,210
was was cleaned like it was a kind of

706
00:32:08,360 --> 00:32:05,789
detergent or acetone or something that

707
00:32:10,370 --> 00:32:08,370
was used in in the professional lab in

708
00:32:11,650 --> 00:32:10,380
order to remove any bacteria any

709
00:32:14,000 --> 00:32:11,660
fingerprints

710
00:32:15,500 --> 00:32:14,010
anybody breathing on the samples or

711
00:32:17,780 --> 00:32:15,510
anything like that so there's no way

712
00:32:20,540 --> 00:32:17,790
there was any contamination but the

713
00:32:24,220 --> 00:32:20,550

results that showed up were not Native

714

00:32:30,130 --> 00:32:24,230

American in all four samples whatsoever

715

00:32:34,160 --> 00:32:30,140

one of the results was u2e 1 which is

716

00:32:36,230 --> 00:32:34,170

Scandinavia and then another was h1

717

00:32:38,840 --> 00:32:36,240

which is the Middle East and Eastern

718

00:32:41,240 --> 00:32:38,850

Europe and the other one was h2 be l

719

00:32:44,140 --> 00:32:41,250

think which again is that same kind of

720

00:32:46,730 --> 00:32:44,150

area so those three samples showed no

721

00:32:48,920 --> 00:32:46,740

Native American characteristics or

722

00:32:52,190 --> 00:32:48,930

haplogroups whatsoever and so that's why

723

00:32:54,110 --> 00:32:52,200

the release will be doing on February

724

00:32:56,690 --> 00:32:54,120

2nd is very impossible because there l

725

00:32:58,820 --> 00:32:56,700

think or is very important because there

726

00:33:01,670 --> 00:32:58,830

I think there was something like 30 or

727

00:33:03,080 --> 00:33:01,680

40 samples belly Marzulli won't tell me

728

00:33:05,060 --> 00:33:03,090

because he knows I'll blab it all over

729

00:33:07,820 --> 00:33:05,070

the internet beforehand but he he's

730

00:33:09,890 --> 00:33:07,830

hinted to me that the the sample size is

731

00:33:12,920 --> 00:33:09,900

at least 10 times of what we did before

732

00:33:16,370 --> 00:33:12,930

and the results are showing the same

733

00:33:20,210 --> 00:33:16,380

kind of patterns we also I'm also going

734

00:33:22,820 --> 00:33:20,220

to presenting some blood type data which

735

00:33:27,470 --> 00:33:22,830

I was recently given and that again

736

00:33:29,590 --> 00:33:27,480

indicates non not 100% Native American

737

00:33:33,470 --> 00:33:29,600

because all people

738

00:33:34,820 --> 00:33:33,480

pre-columbian from Mexico all the way

739

00:33:39,380 --> 00:33:34,830

down to the southern tip of South

740

00:33:41,690 --> 00:33:39,390

America were 100% type O and that again

741

00:33:44,510 --> 00:33:41,700

goes with the theory of crossing the

742

00:33:46,790 --> 00:33:44,520

Bering Land Bridge and walking through

743

00:33:49,040 --> 00:33:46,800

Canada than the United States and Mexico

744

00:33:51,050 --> 00:33:49,050

and through Central America to get to

745

00:33:54,470 --> 00:33:51,060

South America but the the results from

746

00:33:56,570 --> 00:33:54,480

these two studies are that if nothing

747

00:33:59,450 --> 00:33:56,580

else these ancient practice people were

748

00:34:02,810 --> 00:33:59,460

a very complicated ethnic mix of people

749

00:34:04,750 --> 00:34:02,820

from different parts of the world 1,500

750

00:34:08,450 --> 00:34:04,760

years before Columbus discovered America

751
00:34:09,980 --> 00:34:08,460
and with you had a very large team and I

752
00:34:14,020 --> 00:34:09,990
know that the watching the video that

753
00:34:18,320 --> 00:34:16,880
reverence and awe because you had

754
00:34:22,190 --> 00:34:18,330
mention that the team just started to

755
00:34:23,630 --> 00:34:22,200
grow and start to gain just steam with

756
00:34:25,159 --> 00:34:23,640
the amount of expertise that was brought

757
00:34:25,380 --> 00:34:25,169
on such as well you there was yourself

758
00:34:28,490 --> 00:34:25,390
there

759
00:34:31,050 --> 00:34:28,500
dr. Leir Marzulli I know that

760
00:34:32,880 --> 00:34:31,060
monochromes Alice was also involved you

761
00:34:34,470 --> 00:34:32,890
had several individuals one of them was

762
00:34:36,270 --> 00:34:34,480
actually a forensic expert that you

763
00:34:39,090 --> 00:34:36,280

brought on which bagged and tagged

764

00:34:41,880 --> 00:34:39,100

everything as if for a crime scene to

765

00:34:44,490 --> 00:34:41,890

make sure that there was no that there

766

00:34:46,620 --> 00:34:44,500

was no contamination of the samples in

767

00:34:48,390 --> 00:34:46,630

which exactly and it to me that that

768

00:34:50,730 --> 00:34:48,400

shows a level of transparency initial

769

00:34:52,560 --> 00:34:50,740

ever level of credibility that we may

770

00:34:54,840 --> 00:34:52,570

not necessarily see in the alternative

771

00:34:57,750 --> 00:34:54,850

history field and in certain areas and

772

00:34:58,950 --> 00:34:57,760

you know I will mentioned thee that

773

00:35:00,510 --> 00:34:58,960

there was a mummy that was in the news

774

00:35:03,780 --> 00:35:00,520

recently which I'm not going to name

775

00:35:06,480 --> 00:35:03,790

where from where are the results and the

776
00:35:07,860 --> 00:35:06,490
scientific analysis of may not have been

777
00:35:11,820 --> 00:35:07,870
is up front is what you're doing here

778
00:35:14,160 --> 00:35:11,830
and I know that there are individuals

779
00:35:15,390 --> 00:35:14,170
and when I was talking about with

780
00:35:17,490 --> 00:35:15,400
certain friends of mine that we were

781
00:35:19,080 --> 00:35:17,500
doing this show or and I'd mentioned it

782
00:35:21,000 --> 00:35:19,090
and some of them have pay attention to

783
00:35:24,710 --> 00:35:21,010
what I'm doing and some people

784
00:35:28,620 --> 00:35:26,820
answer and they say well it's not aliens

785
00:35:31,220 --> 00:35:28,630
well why does it have to be aliens why

786
00:35:34,260 --> 00:35:31,230
cannot can it can't it be a branch of

787
00:35:35,310 --> 00:35:34,270
you know non Homo sapiens sapiens and in

788
00:35:37,650 --> 00:35:35,320

the line that we haven't discovered yet

789

00:35:39,990 --> 00:35:37,660

why can't we have very intelligent and

790

00:35:42,630 --> 00:35:40,000

and people of ingenuity from ancient

791

00:35:44,100 --> 00:35:42,640

times and from even deep antiquity that

792

00:35:47,510 --> 00:35:44,110

we may not have discovered or known

793

00:35:50,400 --> 00:35:47,520

about yet well that's a great point and

794

00:35:54,900 --> 00:35:50,410

it's with the discovery of Neanderthal

795

00:35:59,100 --> 00:35:54,910

and cro-magnon and florensis from

796

00:36:00,990 --> 00:35:59,110

Indonesia and the Denisovans what it

797

00:36:04,320 --> 00:36:01,000

shows us is that homo sapiens sapiens

798

00:36:09,300 --> 00:36:04,330

are is a very nasty species of being and

799

00:36:11,550 --> 00:36:09,310

any anybody who has any territory has a

800

00:36:14,130 --> 00:36:11,560

tendency to lose the territory and lose

801
00:36:16,080 --> 00:36:14,140
their lives so that's the theory what

802
00:36:19,830 --> 00:36:16,090
we're working on it's quite clear that

803
00:36:22,310 --> 00:36:19,840
the little florensis people of Indonesia

804
00:36:25,250 --> 00:36:22,320
were wiped out by Homo sapiens sapiens

805
00:36:28,260 --> 00:36:25,260
probably Neanderthal was as well

806
00:36:29,760 --> 00:36:28,270
Denisovans probably as well so it is

807
00:36:30,900 --> 00:36:29,770
quite possible and that's why the

808
00:36:33,060 --> 00:36:30,910
results are going to be quite

809
00:36:34,980 --> 00:36:33,070
fascinating with the team of experts we

810
00:36:38,120 --> 00:36:34,990
have I think there eight of us giving

811
00:36:41,450 --> 00:36:38,130
talks on February 2nd

812
00:36:44,420 --> 00:36:41,460
to see the possibility that maybe the

813
00:36:46,789 --> 00:36:44,430

practice were a subspecies of humanity

814

00:36:49,519 --> 00:36:46,799

that had to escape their territory

815

00:36:51,740 --> 00:36:49,529

because they were under attack naturally

816

00:36:53,809 --> 00:36:51,750

if you if you're able to and close to

817

00:36:56,930 --> 00:36:53,819

the ocean you leave by some kind of boat

818

00:36:58,970 --> 00:36:56,940

to get away and then you wander until

819

00:37:01,160 --> 00:36:58,980

you can find a new homeland and that's

820

00:37:03,440 --> 00:37:01,170

that's the theory I'm working on and

821

00:37:06,339 --> 00:37:03,450

have been for two or three years and was

822

00:37:09,049 --> 00:37:06,349

that they were outcasts and they had to

823

00:37:10,700 --> 00:37:09,059

re-establish themselves when they found

824

00:37:12,650 --> 00:37:10,710

the coast of Peru here there was

825

00:37:15,049 --> 00:37:12,660

basically nobody living here so it was

826
00:37:18,339 --> 00:37:15,059
perfect for them and for some reason the

827
00:37:21,499 --> 00:37:18,349
piranhas were absolute experts at desert

828
00:37:23,240 --> 00:37:21,509
agriculture so in some ways I think

829
00:37:25,880 --> 00:37:23,250
that's a connection to the Middle East

830
00:37:28,730 --> 00:37:25,890
because we have thousands of date-palms

831
00:37:32,359 --> 00:37:28,740
that nobody could explain where they

832
00:37:34,759 --> 00:37:32,369
came from they produce 50 to 100 pounds

833
00:37:38,809 --> 00:37:34,769
of dates each the dates drop on the

834
00:37:41,299 --> 00:37:38,819
ground and rot nobody collects them so

835
00:37:43,460 --> 00:37:41,309
the standard stories that the Spanish

836
00:37:45,410 --> 00:37:43,470
brought them but there's no historical

837
00:37:48,620 --> 00:37:45,420
record of anybody ever using them for

838
00:37:50,749 --> 00:37:48,630

anything but dates to a Middle Eastern

839

00:37:54,410 --> 00:37:50,759

society and the date palm is an

840

00:37:56,720 --> 00:37:54,420

incredibly sacred complicated useful

841

00:37:59,240 --> 00:37:56,730

plant I have family that live in the

842

00:38:00,980 --> 00:37:59,250

Algarve and I spent a week up there when

843

00:38:04,819 --> 00:38:00,990

I actually I brought my wife there to

844

00:38:08,120 --> 00:38:04,829

propose to her and my friend had a date

845

00:38:09,319 --> 00:38:08,130

tree in his garden and we would

846

00:38:10,370 --> 00:38:09,329

regularly in the morning just go out and

847

00:38:12,980 --> 00:38:10,380

collect the dates that were there and

848

00:38:15,349 --> 00:38:12,990

use it for breakfast so the fact that

849

00:38:17,359 --> 00:38:15,359

these aren't being collected it's it's

850

00:38:18,950 --> 00:38:17,369

it doesn't seem to nest your what you're

851

00:38:20,509 --> 00:38:18,960

indicating doesn't seem to have it

852

00:38:22,789 --> 00:38:20,519

necessarily within ingrained within

853

00:38:24,170 --> 00:38:22,799

their culture or with them the tradition

854

00:38:25,880 --> 00:38:24,180

to say okay well you've got dates here

855

00:38:29,140 --> 00:38:25,890

let's eat them it's more of a nuisance

856

00:38:32,240 --> 00:38:29,150

not necessarily of food so yeah yeah

857

00:38:34,599 --> 00:38:32,250

again it's that's a historical mystery

858

00:38:36,710 --> 00:38:34,609

that I'm trying to and it's only one

859

00:38:38,599 --> 00:38:36,720

characteristic of these ancient people

860

00:38:42,170 --> 00:38:38,609

that is is very fascinating they were

861

00:38:45,680 --> 00:38:42,180

also incredible masters of making very

862

00:38:46,880 --> 00:38:45,690

thin pottery as if made on a potter's

863

00:38:49,819 --> 00:38:46,890

wheel

864

00:38:50,809 --> 00:38:49,829

no no Mesoamerican people is supposed to

865

00:38:52,729 --> 00:38:50,819

have ever known

866

00:38:54,829 --> 00:38:52,739

potter's wheel the potter's wheel was

867

00:38:57,499 --> 00:38:54,839

invented in the Middle East they also

868

00:38:59,900 --> 00:38:57,509

knew how to tie dye which you know is

869

00:39:03,589 --> 00:38:59,910

something which doesn't fit in the Royal

870

00:39:05,479 --> 00:39:03,599

people lived in underground houses and I

871

00:39:08,390 --> 00:39:05,489

think the reasoning for that is that it

872

00:39:11,359 --> 00:39:08,400

it reigns half an inch of year or half

873

00:39:13,609 --> 00:39:11,369

an inch a year in Caracas and so I

874

00:39:15,829 --> 00:39:13,619

honestly think they had lighter skin and

875

00:39:18,499 --> 00:39:15,839

had to live underground in order to keep

876

00:39:21,140 --> 00:39:18,509

from being burnt on a daily basis but

877

00:39:23,659 --> 00:39:21,150

they the other anomalies just keep going

878

00:39:25,999 --> 00:39:23,669

on and on and on and there's no academic

879

00:39:28,519 --> 00:39:26,009

I know of that's actually looking at

880

00:39:30,469 --> 00:39:28,529

this stuff well you're you're the only

881

00:39:34,400 --> 00:39:30,479

one year that you were the main face of

882

00:39:36,739 --> 00:39:34,410

the South American would assume the

883

00:39:40,249 --> 00:39:36,749

South American mystery our cultural

884

00:39:43,130 --> 00:39:40,259

mystery which is unfortunately a lot of

885

00:39:45,829 --> 00:39:43,140

it had been wiped out based on the

886

00:39:48,559 --> 00:39:45,839

Spanish conquistadors drama in South

887

00:39:50,769 --> 00:39:48,569

America so I know that with the the Maya

888

00:39:55,279 --> 00:39:50,779

a lot of their history was actually

889

00:39:56,809 --> 00:39:55,289

written down while the Holocaust and to

890

00:39:59,409 --> 00:39:56,819

be honest it was a Holocaust with with

891

00:40:01,909 --> 00:39:59,419

millions of people upon that were

892

00:40:03,099 --> 00:40:01,919

devastated by by their coming to this

893

00:40:04,909 --> 00:40:03,109

continent

894

00:40:06,739 --> 00:40:04,919

that it was actually written down

895

00:40:08,599 --> 00:40:06,749

afterwards through the oral tradition

896

00:40:11,569 --> 00:40:08,609

because it had to be otherwise we

897

00:40:13,819 --> 00:40:11,579

wouldn't have known anything so even

898

00:40:19,249 --> 00:40:13,829

with the oral traditions that are there

899

00:40:22,039 --> 00:40:19,259

now what oral traditions are the locals

900

00:40:25,459 --> 00:40:22,049

saying about the skulls themselves and

901
00:40:28,020 --> 00:40:25,469
how did you get permission to actually

902
00:40:31,830 --> 00:40:28,030
examine them

903
00:40:34,890 --> 00:40:31,840
well the great thing is that because I

904
00:40:36,600 --> 00:40:34,900
was fascinated by the skulls after my

905
00:40:39,720 --> 00:40:36,610
first trip to practice we were only

906
00:40:41,640 --> 00:40:39,730
there for three days I think and the

907
00:40:43,500 --> 00:40:41,650
weather here is just so wonderful that

908
00:40:46,440 --> 00:40:43,510
my wife and I after a period of time

909
00:40:48,270 --> 00:40:46,450
decided that Lima sucks is a place to

910
00:40:50,340 --> 00:40:48,280
live because it's a population of 11

911
00:40:52,740 --> 00:40:50,350
million people it's just you know it's

912
00:40:54,870 --> 00:40:52,750
quite awful most of it some nice

913
00:40:56,640 --> 00:40:54,880

neighborhoods but we decided well why

914

00:40:59,760 --> 00:40:56,650

don't we spend more time in practice and

915

00:41:03,150 --> 00:40:59,770

then I became the assistant director of

916

00:41:06,150 --> 00:41:03,160

the museum senior Juan Navarro and I

917

00:41:08,690 --> 00:41:06,160

would constantly go out in the field

918

00:41:12,030 --> 00:41:08,700

because he had been studying this stuff

919

00:41:14,880 --> 00:41:12,040

for more than 40 years and he knew every

920

00:41:16,950 --> 00:41:14,890

location of every practice settlement so

921

00:41:20,670 --> 00:41:16,960

over the course of about seven years we

922

00:41:23,220 --> 00:41:20,680

visited every single site in some cases

923

00:41:28,230 --> 00:41:23,230

we found some artifacts for the museum

924

00:41:32,040 --> 00:41:28,240

but yeah it's just because because I I'm

925

00:41:35,310 --> 00:41:32,050

as curious as a cat and because they're

926
00:41:38,070 --> 00:41:35,320
almost is no literature whatsoever about

927
00:41:40,320 --> 00:41:38,080
these people I just decided well maybe I

928
00:41:42,000 --> 00:41:40,330
can figure out you know what's going on

929
00:41:44,520 --> 00:41:42,010
with this and then through connecting

930
00:41:46,500 --> 00:41:44,530
with la Marzulli who was able to get

931
00:41:48,630 --> 00:41:46,510
someone to donate a hundred thousand

932
00:41:51,900 --> 00:41:48,640
dollars to do the DNA test date you know

933
00:41:53,640 --> 00:41:51,910
on and on it goes that you know that's

934
00:41:57,270 --> 00:41:53,650
who we're in the position we're in

935
00:42:00,570 --> 00:41:57,280
because we're we have access to great

936
00:42:01,950 --> 00:42:00,580
people like like Elie Marzulli and also

937
00:42:06,330 --> 00:42:01,960
the local people who still remember

938
00:42:08,190 --> 00:42:06,340

certain aspects of the history so it's

939

00:42:10,440 --> 00:42:08,200

like weaving an ancient story back

940

00:42:13,620 --> 00:42:10,450

together again in the field it's it's a

941

00:42:15,450 --> 00:42:13,630

lot of fun for me in I know that I watch

942

00:42:18,030 --> 00:42:15,460

the video and the video was just

943

00:42:20,460 --> 00:42:18,040

released about an hour before you and I

944

00:42:22,380 --> 00:42:20,470

connected on skype writing can you give

945

00:42:23,970 --> 00:42:22,390

me a brief rundown of the process that

946

00:42:26,180 --> 00:42:23,980

you used to at least the song the

947

00:42:30,000 --> 00:42:26,190

scientific process that you used to

948

00:42:31,290 --> 00:42:30,010

document the the analysis okay well

949

00:42:34,790 --> 00:42:31,300

that's a great point because then

950

00:42:38,730 --> 00:42:34,800

there's been almost zero carbon-14

951
00:42:42,030 --> 00:42:38,740
testing of artifacts of the Baracus

952
00:42:48,150 --> 00:42:42,040
Peru doesn't have great forensic stuff

953
00:42:51,690 --> 00:42:48,160
now that is Bolivia so what happened was

954
00:42:53,970 --> 00:42:51,700
with the initial samples for samples

955
00:42:55,950 --> 00:42:53,980
that we had tested and that was by

956
00:42:57,930 --> 00:42:55,960
permission from senior Juan who owns a

957
00:43:01,830 --> 00:42:57,940
private Museum which is a private

958
00:43:04,470 --> 00:43:01,840
collection then that GRU drew worldwide

959
00:43:06,330 --> 00:43:04,480
attention and so we decided well four

960
00:43:09,750 --> 00:43:06,340
samples is not a good sample size we

961
00:43:11,700 --> 00:43:09,760
need like 50 30 40 50 or something so we

962
00:43:15,000 --> 00:43:11,710
contacted the Ministry of Culture of

963
00:43:18,780 --> 00:43:15,010

Peru and said that we wanted to do some

964

00:43:24,060 --> 00:43:18,790

DNA studies we would finance the whole

965

00:43:26,760 --> 00:43:24,070

thing and so dr. Ruben Soto accepted our

966

00:43:28,770 --> 00:43:26,770

offer I asked him two simple questions I

967

00:43:30,330 --> 00:43:28,780

said do you know where the practice came

968

00:43:33,810 --> 00:43:30,340

from and do you know why they had red

969

00:43:35,910 --> 00:43:33,820

hair and he said no I said well if we do

970

00:43:38,280 --> 00:43:35,920

scientific analysis we can find out for

971

00:43:41,670 --> 00:43:38,290

you you can be in charge of the study

972

00:43:44,130 --> 00:43:41,680

and so he said okay and so he he

973

00:43:46,710 --> 00:43:44,140

actually is in charge of the DNA testing

974

00:43:48,810 --> 00:43:46,720

process so it's a Peruvian working for

975

00:43:52,500 --> 00:43:48,820

the Peruvian government and the results

976
00:43:55,350 --> 00:43:52,510
go to the Peruvian government after the

977
00:43:58,650 --> 00:43:55,360
release of the on February the 2nd so

978
00:44:01,830 --> 00:43:58,660
after a 30 month process of paperwork we

979
00:44:04,200 --> 00:44:01,840
got permission to take samples and so la

980
00:44:07,820 --> 00:44:04,210
and his forensic crew and film crew came

981
00:44:11,190 --> 00:44:07,830
down and they took samples from multiple

982
00:44:13,160 --> 00:44:11,200
skulls in the iike regional Museum and

983
00:44:15,420 --> 00:44:13,170
also the little Caracas

984
00:44:18,690 --> 00:44:15,430
excuse me private Museum of Senor

985
00:44:21,090 --> 00:44:18,700
Navarro and took them back and submitted

986
00:44:22,980 --> 00:44:21,100
them to two laboratories two of the top

987
00:44:28,260 --> 00:44:22,990
of the top ten in the world one in

988
00:44:29,880 --> 00:44:28,270

Canada and one in California and so it's

989

00:44:32,640 --> 00:44:29,890

been it's you know it's been a process

990

00:44:34,530 --> 00:44:32,650

of a lot of money a lot of retesting

991

00:44:36,600 --> 00:44:34,540

because some of the samples were so

992

00:44:40,020 --> 00:44:36,610

badly degraded they had to enhance them

993

00:44:42,150 --> 00:44:40,030

which cost a lot more money but that's

994

00:44:45,980 --> 00:44:42,160

why we're very happy to announce that we

995

00:44:50,520 --> 00:44:45,990

have sufficient data now for a global

996

00:44:52,529 --> 00:44:50,530

release on February the second and so

997

00:44:57,390 --> 00:44:52,539

that's why the six-minute video

998

00:44:59,370 --> 00:44:57,400

it's like the initial teaser for giving

999

00:45:02,120 --> 00:44:59,380

people an indication of what's coming

1000

00:45:05,099 --> 00:45:02,130

now the interesting thing that I found

1001
00:45:07,349 --> 00:45:05,109
and a minor to say it's interesting the

1002
00:45:11,339 --> 00:45:07,359
noble thing that I found is that

1003
00:45:13,650 --> 00:45:11,349
admission to this symposium it's free

1004
00:45:17,849 --> 00:45:13,660
you're you're not charging anybody to

1005
00:45:19,259 --> 00:45:17,859
actually see these results and again

1006
00:45:20,729 --> 00:45:19,269
Friday for every the second so everyone

1007
00:45:23,699 --> 00:45:20,739
can cut out of work early on the Pacific

1008
00:45:25,439 --> 00:45:23,709
coast 1:00 p.m. to 5:00 p.m. and that's

1009
00:45:27,929 --> 00:45:25,449
at the Marriott's in Los Angeles

1010
00:45:30,900 --> 00:45:27,939
actually the Los Angeles Airport 580

1011
00:45:32,189 --> 00:45:30,910
yeah so I've been there I think or at

1012
00:45:34,620 --> 00:45:32,199
least I've been nearby I've I've gone

1013
00:45:37,979 --> 00:45:34,630

from one you know from one Airport to

1014

00:45:39,239 --> 00:45:37,989

the other to to Bradley a love LA the

1015

00:45:41,099 --> 00:45:39,249

the weather is fantastic

1016

00:45:46,049 --> 00:45:41,109

especially coming from you know a place

1017

00:45:47,400 --> 00:45:46,059

where it's -46 sometimes oh you well

1018

00:45:49,259 --> 00:45:47,410

you're out from the west coast like you

1019

00:45:51,719 --> 00:45:49,269

grew up in BC I'm not sure if you've

1020

00:45:57,229 --> 00:45:51,729

ever been to Ottawa before it's oh yes I

1021

00:45:59,579 --> 00:45:57,239

have much my sister who lives there oh

1022

00:46:03,449 --> 00:45:59,589

well then you know exactly how bloody

1023

00:46:04,739 --> 00:46:03,459

hard I can get out next next time you're

1024

00:46:06,179 --> 00:46:04,749

down I'll make sure I can get you Tim's

1025

00:46:10,019 --> 00:46:06,189

so to be able to acclimate you to the

1026

00:46:13,289 --> 00:46:10,029

weather well that's why Canadians are

1027

00:46:15,299 --> 00:46:13,299

tough people well and you know the tough

1028

00:46:17,159 --> 00:46:15,309

people who ask tough questions and I'm

1029

00:46:19,890 --> 00:46:17,169

very grateful at you that you are taking

1030

00:46:22,559 --> 00:46:19,900

the time this afternoon normally we'd be

1031

00:46:23,969 --> 00:46:22,569

able to to ask some questions of the

1032

00:46:27,689 --> 00:46:23,979

audience obviously since this is

1033

00:46:29,429 --> 00:46:27,699

pre-recorded I am I have people who are

1034

00:46:30,569 --> 00:46:29,439

absolutely flabbergasting to like a Kris

1035

00:46:34,199 --> 00:46:30,579

we know you're gonna answer all the good

1036

00:46:36,120 --> 00:46:34,209

ones so for anybody who is you know if

1037

00:46:38,159 --> 00:46:36,130

I'm getting some in I'm still waiting

1038

00:46:40,439 --> 00:46:38,169

for a couple so I'm gonna be able to

1039

00:46:42,329 --> 00:46:40,449

circle back to that one aspect which I

1040

00:46:45,059 --> 00:46:42,339

touched on earlier which was the

1041

00:46:47,699 --> 00:46:45,069

connection between Rapa Nui and angle

1042

00:46:51,509 --> 00:46:47,709

BEC we tap a what when when you first

1043

00:46:53,189 --> 00:46:51,519

saw the saw the designs of the stones

1044

00:46:54,959 --> 00:46:53,199

that go back at f/8 and so that they're

1045

00:46:56,759 --> 00:46:54,969

at anthropomorphic and saw the hand

1046

00:46:59,309 --> 00:46:56,769

placement what was you the first thing

1047

00:47:02,219 --> 00:46:59,319

that went through your mind the

1048

00:47:06,149 --> 00:47:02,229

indication to me is that they're they're

1049

00:47:08,099 --> 00:47:06,159

referencing the source quite often in in

1050

00:47:10,650 --> 00:47:08,109

play

1051
00:47:13,740 --> 00:47:10,660
for example the name of cuzco means the

1052
00:47:16,650 --> 00:47:13,750
navel of the world robbing newest proper

1053
00:47:19,650 --> 00:47:16,660
translation which is Tepito taihen OA

1054
00:47:23,609 --> 00:47:19,660
means the navel of the world meaning

1055
00:47:26,160 --> 00:47:23,619
that that was where the culture evolved

1056
00:47:28,320 --> 00:47:26,170
from or that that was the central focus

1057
00:47:33,390 --> 00:47:28,330
of the culture so that was my initial

1058
00:47:36,000 --> 00:47:33,400
impression is that just like us our

1059
00:47:39,120 --> 00:47:36,010
navel was connected you know Norman

1060
00:47:42,450 --> 00:47:39,130
that's where we come out of mom you know

1061
00:47:44,609 --> 00:47:42,460
connected that I think that's Timmy is

1062
00:47:47,579 --> 00:47:44,619
the cultural reference that they're

1063
00:47:48,660 --> 00:47:47,589

referring to and this is going to it I

1064

00:47:50,849 --> 00:47:48,670

know it's like it's a very short

1065

00:47:53,010 --> 00:47:50,859

question for a very complicated answer

1066

00:47:55,230 --> 00:47:53,020

possibly but do you think that there is

1067

00:47:58,740 --> 00:47:55,240

a connection between gobekli tepe and

1068

00:48:00,900 --> 00:47:58,750

Easter Island no the problem is that I

1069

00:48:03,089 --> 00:48:00,910

haven't been yet to gobekli tepe they

1070

00:48:05,370 --> 00:48:03,099

shut it down about six months ago and

1071

00:48:07,560 --> 00:48:05,380

they put a roof on it and supposedly

1072

00:48:10,650 --> 00:48:07,570

it's opening up again soon and and Isis

1073

00:48:13,740 --> 00:48:10,660

was pretty close you know to it but

1074

00:48:16,530 --> 00:48:13,750

within the next couple of years through

1075

00:48:18,390 --> 00:48:16,540

patricia are we on in egypt of the Kim

1076

00:48:20,220 --> 00:48:18,400

at school I think I think we're gonna

1077

00:48:25,440 --> 00:48:20,230

organize the tour there which would be

1078

00:48:27,540 --> 00:48:25,450

great but because I I I tend not to try

1079

00:48:29,250 --> 00:48:27,550

to discuss places I've never been to

1080

00:48:31,140 --> 00:48:29,260

because the difference between looking

1081

00:48:35,310 --> 00:48:31,150

at a picture or video or reading a book

1082

00:48:38,339 --> 00:48:35,320

and being there in real life is like

1083

00:48:41,970 --> 00:48:38,349

completely different so I'm gonna have

1084

00:48:44,760 --> 00:48:41,980

to wait to before I can make any kind of

1085

00:48:47,849 --> 00:48:44,770

comparison and that would go to your

1086

00:48:50,370 --> 00:48:47,859

credibility as a researcher without

1087

00:48:52,680 --> 00:48:50,380

making any wild speculation I know that

1088

00:48:56,960 --> 00:48:52,690

at least and again I've never been to

1089

00:48:58,859 --> 00:48:56,970

either place myself I know that there is

1090

00:49:05,000 --> 00:48:58,869

I'm trying to remember the name of the

1091

00:49:08,670 --> 00:49:05,010

lost civilization from the subcontinent

1092

00:49:12,580 --> 00:49:08,680

slipping through my mind I can't believe this in

1093

00:49:16,260 --> 00:49:12,590

from India the

1094

00:49:19,750 --> 00:49:16,270

Indus Valley Civilisation oh there were

1095

00:49:21,160 --> 00:49:19,760

indications from certain individuals

1096

00:49:22,780 --> 00:49:21,170

that I knew and I'm I'm trying to remember

1097

00:49:24,190 --> 00:49:22,790

if it was layered Scranton himself or

1098

00:49:27,220 --> 00:49:24,200

was somebody else who had actually told

1099

00:49:29,670 --> 00:49:27,230

me who knew layered it I think it was

1100

00:49:33,790 --> 00:49:29,680

actually John Michael John Michael Greer

1101

00:49:37,330 --> 00:49:33,800

who is a alternative history researcher

1102

00:49:39,100 --> 00:49:37,340

he's also kind of one of the world's if

1103

00:49:41,770 --> 00:49:39,110

you need to know about esoteric

1104

00:49:44,230 --> 00:49:41,780

symbolism you ask him oh he's a druid

1105

00:49:46,330 --> 00:49:44,240

you know he's a former Arch Druid he's a

1106

00:49:47,920 --> 00:49:46,340

32nd degree freemason he you know this

1107

00:49:49,750 --> 00:49:47,930

is stuff he's been doing for 20 years

1108

00:49:51,490 --> 00:49:49,760

now and he had indicated that the

1109

00:49:53,100 --> 00:49:51,500

language that is found in the Indus

1110

00:49:57,820 --> 00:49:53,110

Valley actually may have a connection to

1111

00:49:59,560 --> 00:49:57,830

the rongorongo script in Easter Island

1112

00:50:01,090 --> 00:49:59,570

and I'm not sure if this is something

1113

00:50:03,340 --> 00:50:01,100

you've looked into yourself because

1114

00:50:06,630 --> 00:50:03,350

you've spoken on the script extensively

1115

00:50:10,240 --> 00:50:06,640

yourself no what have you seen as far as

1116

00:50:11,950 --> 00:50:10,250

similarities to other scripts and have

1117

00:50:13,990 --> 00:50:11,960

you been told what they actually say

1118

00:50:17,170 --> 00:50:14,000

have you asked very nicely and gently

1119

00:50:19,840 --> 00:50:17,180

who to the native peoples of the area

1120

00:50:23,170 --> 00:50:19,850

what those what that script actually may

1121

00:50:28,030 --> 00:50:23,180

mean as far as I know none of them know

1122

00:50:30,820 --> 00:50:28,040

what it means and visiting Rapa Nui

1123

00:50:33,010 --> 00:50:30,830

it's fascinating because again those

1124

00:50:34,510 --> 00:50:33,020

that know stuff if you can get them in

1125

00:50:37,450 --> 00:50:34,520

your confidence they tell you the most

1126

00:50:40,060 --> 00:50:37,460

amazing stop the you know stuff no

1127

00:50:41,710 --> 00:50:40,070

archaeology archaeologist has ever as

1128

00:50:44,620 --> 00:50:41,720

far as they know interviewed any of the

1129

00:50:46,540 --> 00:50:44,630

native people of the island so that

1130

00:50:51,180 --> 00:50:46,550

that's pissed off the people of Rapa Nui

1131

00:50:54,520 --> 00:50:51,190

but if you do look at the symbolism

1132

00:50:56,860 --> 00:50:54,530

rongorongo looks really similar to that

1133

00:50:59,800 --> 00:50:56,870

at the Indus Valley and then again when

1134

00:51:03,790 --> 00:50:59,810

you get into the idea that when von

1135

00:51:07,150 --> 00:51:03,800

Roggeveen arrived in on the island who

1136

00:51:09,070 --> 00:51:07,160

named it Easter Island he his or one of

1137

00:51:12,100 --> 00:51:09,080

his crew members descriptions of the

1138

00:51:14,740 --> 00:51:12,110

people was there are tall people and

1139

00:51:17,080 --> 00:51:14,750

short people dark-skinned people and

1140

00:51:19,330 --> 00:51:17,090

light-skinned people black haired people

1141

00:51:22,660 --> 00:51:19,340

red haired people and blonde haired

1142

00:51:24,910 --> 00:51:22,670

people so the original inhabitants of

1143

00:51:26,350 --> 00:51:24,920

that area obviously were very a very

1144

00:51:28,270 --> 00:51:26,360

complex mix and

1145

00:51:29,710 --> 00:51:28,280

if they weren't just the Polynesians

1146

00:51:32,800 --> 00:51:29,720

there was somebody else was there or

1147

00:51:36,670 --> 00:51:32,810

others and so again when you have that

1148

00:51:38,950 --> 00:51:36,680

connection with with Persia and people

1149

00:51:41,710 --> 00:51:38,960

from Easter Island or sorry from New

1150

00:51:43,630 --> 00:51:41,720

Zealand then I think it's very possible

1151

00:51:47,860 --> 00:51:43,640

that ancient people from the Indus

1152

00:51:51,610 --> 00:51:47,870

Valley somehow made it into Polynesia

1153

00:51:53,980 --> 00:51:51,620

and wound up on Easter Island maybe as a

1154

00:51:57,250 --> 00:51:53,990

refuge and I think they brought their

1155

00:52:01,090 --> 00:51:57,260

script with them but then they may have

1156

00:52:02,350 --> 00:52:01,100

died off and then the the symbolism or

1157

00:52:05,230 --> 00:52:02,360

meeting meaning could have either

1158

00:52:07,300 --> 00:52:05,240

changed or been reinterpreted but I do

1159

00:52:10,570 --> 00:52:07,310

think there was a connection too often

1160

00:52:13,630 --> 00:52:10,580

people say well there's you know there's

1161

00:52:15,400 --> 00:52:13,640

a symbol of a snake in England and

1162

00:52:17,500 --> 00:52:15,410

there's a symbol of a snake in India

1163

00:52:19,630 --> 00:52:17,510

they must be connected it's like there's

1164

00:52:21,340 --> 00:52:19,640

too much of that going on but I think

1165

00:52:23,410 --> 00:52:21,350

the Indus Valley connection is quite

1166

00:52:26,920 --> 00:52:23,420

plausible and one of the questions I'm

1167

00:52:29,230 --> 00:52:26,930

receiving is with regards to something

1168

00:52:31,120 --> 00:52:29,240

that you may have presented at one point

1169

00:52:35,010 --> 00:52:31,130

or another in in the past and this was

1170

00:52:39,820 --> 00:52:35,020

with regards to the very kocha symbolism

1171

00:52:41,830 --> 00:52:39,830

specifically the Jaguar style tiers

1172

00:52:44,410 --> 00:52:41,840

which some people have said represents

1173

00:52:46,390 --> 00:52:44,420

crying for lost land I know that you

1174

00:52:47,440 --> 00:52:46,400

believe that to be something or at least

1175

00:52:48,520 --> 00:52:47,450

at one point to believe that to be

1176
00:52:51,130 --> 00:52:48,530
something different how have you looked

1177
00:52:53,760 --> 00:52:51,140
into that yourself and have you come to

1178
00:52:58,020 --> 00:52:53,770
a more clear answer on that

1179
00:53:00,090 --> 00:52:58,030
yeah that actually the symbolism at puma

1180
00:53:04,100 --> 00:53:00,100
punku and tiwanaku which is where you

1181
00:53:07,020 --> 00:53:04,110
find most of the symbols of Viracocha

1182
00:53:11,580 --> 00:53:07,030
most of them are so badly eroded that

1183
00:53:13,290 --> 00:53:11,590
it's difficult to make out the you know

1184
00:53:17,340 --> 00:53:13,300
specifically what you're looking at

1185
00:53:19,859 --> 00:53:17,350
those those appeared actually in the few

1186
00:53:22,020 --> 00:53:19,869
decent pieces of sculpture that still

1187
00:53:24,900 --> 00:53:22,030
exists that are in half good shape

1188
00:53:27,600 --> 00:53:24,910

because of the climate the age etc they

1189

00:53:30,570 --> 00:53:27,610

appear to be the shape the eyes appear

1190

00:53:33,450 --> 00:53:30,580

to be the shape of Pumas heads and then

1191

00:53:37,170 --> 00:53:33,460

you see those dots coming down whether

1192

00:53:40,440 --> 00:53:37,180

the dots are tears or not I'm not sure

1193

00:53:43,440 --> 00:53:40,450

David Childress believes that it's very

1194

00:53:46,380 --> 00:53:43,450

kocha weeping for the lost red land

1195

00:53:50,010 --> 00:53:46,390

which could be either Atlantis or or Moo

1196

00:53:53,670 --> 00:53:50,020

but for me I'm not not quite sure yet

1197

00:53:56,210 --> 00:53:53,680

and I I know that there is some

1198

00:54:00,660 --> 00:53:56,220

symbolism in Egypt which has signified

1199

00:54:02,510 --> 00:54:00,670

you know elongated skulls and the actual

1200

00:54:07,260 --> 00:54:02,520

mummies themselves didn't necessarily

1201
00:54:08,430 --> 00:54:07,270
show the same form of the head what are

1202
00:54:09,780 --> 00:54:08,440
some of the indications that you found

1203
00:54:11,970 --> 00:54:09,790
from from your own analysis and from

1204
00:54:13,859 --> 00:54:11,980
documenting the the elongated skulls

1205
00:54:18,300 --> 00:54:13,869
that differentiate themselves from our

1206
00:54:19,290 --> 00:54:18,310
own you mean the ones in Paris in

1207
00:54:22,170 --> 00:54:19,300
Baracus yes

1208
00:54:25,109 --> 00:54:22,180
yeah well the the the depiction of

1209
00:54:27,810 --> 00:54:25,119
elongated heads in eating the Amarna

1210
00:54:30,510 --> 00:54:27,820
period which of course is Akhenaten he

1211
00:54:31,950 --> 00:54:30,520
was very he was very much an adept at

1212
00:54:34,260 --> 00:54:31,960
ancient knowledge so I think he was

1213
00:54:36,450 --> 00:54:34,270

doing that to say this is where we come

1214

00:54:38,340 --> 00:54:36,460

from not not that I look like that but

1215

00:54:40,680 --> 00:54:38,350

this is where we come from

1216

00:54:43,130 --> 00:54:40,690

of course his mummy has never been found

1217

00:54:46,859 --> 00:54:43,140

Nefertiti's that has never been found

1218

00:54:48,810 --> 00:54:46,869

but the physical characteristics which

1219

00:54:52,140 --> 00:54:48,820

are fat are fascinating among the

1220

00:54:54,930 --> 00:54:52,150

percentage of baracus which appear to be

1221

00:54:58,830 --> 00:54:54,940

natural-looking are that there is no

1222

00:55:01,530 --> 00:54:58,840

suture line here like we all have a

1223

00:55:04,590 --> 00:55:01,540

suture across this way and coming back

1224

00:55:08,190 --> 00:55:04,600

that way in in a t-shape this suture is

1225

00:55:13,570 --> 00:55:08,200

not there so that has

1226

00:55:15,490 --> 00:55:13,580

that's been a fascination to 30-plus

1227

00:55:18,190 --> 00:55:15,500

doctors that I physically shown them to

1228

00:55:21,550 --> 00:55:18,200

here in from the US and Canada and

1229

00:55:24,190 --> 00:55:21,560

Europe etc another aspect is that the

1230

00:55:27,730 --> 00:55:24,200

the eye sockets are 50% larger than

1231

00:55:30,100 --> 00:55:27,740

normal and also the foramen magnum which

1232

00:55:33,430 --> 00:55:30,110

is where your vertebral column is final

1233

00:55:38,320 --> 00:55:33,440

cord go through in the bottom of your of

1234

00:55:42,010 --> 00:55:38,330

your skull it's so far back that that is

1235

00:55:47,230 --> 00:55:42,020

a genetic difference and that could or I

1236

00:55:50,020 --> 00:55:47,240

think obviously is why or nature did

1237

00:55:52,990 --> 00:55:50,030

that because the skulls have a tendency

1238

00:55:55,450 --> 00:55:53,000

to be conehead shaped and would tend to

1239

00:55:59,070 --> 00:55:55,460

pivot backwards and so in order in order

1240

00:56:01,870 --> 00:55:59,080

to compensate for that nature made the

1241

00:56:04,270 --> 00:56:01,880

that hole in the bottom of the skulls of

1242

00:56:06,670 --> 00:56:04,280

the piranhas farther back there are also

1243

00:56:08,740 --> 00:56:06,680

two holes in the back of the skull which

1244

00:56:11,140 --> 00:56:08,750

are called foramen and that's where

1245

00:56:14,020 --> 00:56:11,150

blood and nerve flow would come out in

1246

00:56:15,820 --> 00:56:14,030

order to feed the upper part of the

1247

00:56:17,620 --> 00:56:15,830

skull and there are other

1248

00:56:22,000 --> 00:56:17,630

characteristics which are going to be

1249

00:56:24,160 --> 00:56:22,010

discussed during the the conference on

1250

00:56:28,630 --> 00:56:24,170

February the second by other other

1251
00:56:31,720 --> 00:56:28,640
experts supposedly there are nervous

1252
00:56:33,190 --> 00:56:31,730
system differences on the face which

1253
00:56:34,810 --> 00:56:33,200
would indicate that their facial

1254
00:56:36,820 --> 00:56:34,820
expressions were not the same as ours

1255
00:56:39,040 --> 00:56:36,830
like they couldn't they couldn't smile

1256
00:56:41,530 --> 00:56:39,050
and frown they didn't have the same

1257
00:56:44,650 --> 00:56:41,540
range of facial expressions that we have

1258
00:56:46,960 --> 00:56:44,660
which sounds kind of like an alien

1259
00:56:50,260 --> 00:56:46,970
characteristic to me from watching a lot

1260
00:56:51,760 --> 00:56:50,270
of B movies but there are yeah there are

1261
00:56:53,170 --> 00:56:51,770
a number of subtleties also there are

1262
00:56:56,500 --> 00:56:53,180
little bones in the back of the head

1263
00:56:58,690 --> 00:56:56,510

which only the Royal Inca supposedly had

1264

00:57:02,410 --> 00:56:58,700

and so that could be a genetic

1265

00:57:04,660 --> 00:57:02,420

connection with the Inca - and the early

1266

00:57:08,760 --> 00:57:04,670

accounts of the Inca are that they were

1267

00:57:11,530 --> 00:57:08,770

a royal family of people with red hair

1268

00:57:14,050 --> 00:57:11,540

so well that's one interesting part

1269

00:57:17,410 --> 00:57:14,060

about the Inca because people tend to

1270

00:57:18,640 --> 00:57:17,420

think that the Inca were the entire that

1271

00:57:20,740 --> 00:57:18,650

was the name of the entire civilization

1272

00:57:21,480 --> 00:57:20,750

and all the people that were there when

1273

00:57:23,280 --> 00:57:21,490

in fact it

1274

00:57:24,630 --> 00:57:23,290

supposed to have been referred to the

1275

00:57:26,040 --> 00:57:24,640

the inca were supposed to be referred to

1276

00:57:27,930 --> 00:57:26,050

the royal family or the royal line is

1277

00:57:31,530 --> 00:57:27,940

that correct yeah that's right it was

1278

00:57:34,560 --> 00:57:31,540

only the royal bloodline so and their

1279

00:57:36,720 --> 00:57:34,570

origins archeologists will tell you they

1280

00:57:38,640 --> 00:57:36,730

don't know exactly where they came from

1281

00:57:42,510 --> 00:57:38,650

there's some history in Lake Titicaca

1282

00:57:44,609 --> 00:57:42,520

but it's not a hundred percent but also

1283

00:57:45,650 --> 00:57:44,619

the the Inca the royal Inca had

1284

00:57:49,560 --> 00:57:45,660

elongated heads

1285

00:57:52,470 --> 00:57:49,570

I've seen the skulls so yeah the Inca

1286

00:57:54,720 --> 00:57:52,480

themselves were a population of at the

1287

00:57:58,590 --> 00:57:54,730

peak of maybe a thousand people who had

1288

00:58:00,859 --> 00:57:58,600

all the high positions as in the the the

1289

00:58:04,200 --> 00:58:00,869

high Inca who was the the ruler then the

1290

00:58:05,970 --> 00:58:04,210

the high priest was an Inca and the the

1291

00:58:11,160 --> 00:58:05,980

general or the highest in the military

1292

00:58:15,080 --> 00:58:11,170

was a was an Inca and the general

1293

00:58:19,350 --> 00:58:15,090

population of 15 million people were of

1294

00:58:21,660 --> 00:58:19,360

many different cultures and genetic

1295

00:58:23,460 --> 00:58:21,670

backgrounds but now this will be a good

1296

00:58:25,200 --> 00:58:23,470

question for and I think it may may have

1297

00:58:27,890 --> 00:58:25,210

been one that I don't think you have

1298

00:58:31,320 --> 00:58:27,900

been asked at any conference so far

1299

00:58:33,060 --> 00:58:31,330

knowing the difference between a an

1300

00:58:35,250 --> 00:58:33,070

actual elongated skull and one that had

1301
00:58:36,570 --> 00:58:35,260
head bindings and if you have you been

1302
00:58:39,359 --> 00:58:36,580
able to differentiate between the

1303
00:58:43,859 --> 00:58:39,369
classes and if so have you found a

1304
00:58:46,770 --> 00:58:43,869
larger number of bound heads in the

1305
00:58:48,270 --> 00:58:46,780
lower classes within that culture versus

1306
00:58:50,180 --> 00:58:48,280
the actual elongated skulls which were

1307
00:58:54,359 --> 00:58:50,190
supposed to have in the ruling class

1308
00:58:56,070 --> 00:58:54,369
well no all at least on in the practice

1309
00:58:58,890 --> 00:58:56,080
culture here the only people with

1310
00:59:02,090 --> 00:58:58,900
elongated heads were the nobility like

1311
00:59:05,370 --> 00:59:02,100
the chief II class yeah the Chiefs the

1312
00:59:07,440 --> 00:59:05,380
religious or spiritual leaders etc the

1313
00:59:11,460 --> 00:59:07,450

commoners are all normal-looking because

1314

00:59:13,740 --> 00:59:11,470

I've seen numerous graves of common

1315

00:59:16,170 --> 00:59:13,750

people in this area as compared to the

1316

00:59:20,070 --> 00:59:16,180

royal cemeteries where only the

1317

00:59:21,990 --> 00:59:20,080

elongated skull people were buried but

1318

00:59:24,540 --> 00:59:22,000

you know it depends the interesting

1319

00:59:26,430 --> 00:59:24,550

thing is at the last stages of the

1320

00:59:27,930 --> 00:59:26,440

practice culture that's when we have the

1321

00:59:30,330 --> 00:59:27,940

introduction of what are called the

1322

00:59:32,190 --> 00:59:30,340

Nazca people famous for the lines and

1323

00:59:34,040 --> 00:59:32,200

geoglyphs but they were normal-looking

1324

00:59:36,980 --> 00:59:34,050

people so my the theory on

1325

00:59:39,980 --> 00:59:36,990

now is that the Nazca invaded and wiped

1326
00:59:42,560 --> 00:59:39,990
out the royal class people because the

1327
00:59:46,640 --> 00:59:42,570
red hair disappears when you get into

1328
00:59:49,310 --> 00:59:46,650
the Nazca period the the tallness

1329
00:59:51,470 --> 00:59:49,320
disappears and the red yeah the red hair

1330
00:59:53,690 --> 00:59:51,480
the long gated skulls and the tonus

1331
00:59:57,020 --> 00:59:53,700
disappear as you get into the Nazca

1332
00:59:59,720 --> 00:59:57,030
culture and also their textiles and

1333
01:00:03,530 --> 00:59:59,730
ceramics are inferior to so that

1334
01:00:07,010 --> 01:00:03,540
indicates to me genocide with this also

1335
01:00:09,380 --> 01:00:07,020
account for why the Nazca lines may have

1336
01:00:13,040 --> 01:00:09,390
been done after the or list what you

1337
01:00:15,890 --> 01:00:13,050
would termed a homing beacon which seems

1338
01:00:18,560 --> 01:00:15,900

to have been one of the larger geoglyphs

1339

01:00:20,360 --> 01:00:18,570

on that side of the continent which is

1340

01:00:23,030 --> 01:00:20,370

essentially the the same as the Southern

1341

01:00:25,100 --> 01:00:23,040

Cross but a mirror image of it was was

1342

01:00:27,470 --> 01:00:25,110

that made before the Nazca lines if by

1343

01:00:28,850 --> 01:00:27,480

this line of thinking or were they made

1344

01:00:29,840 --> 01:00:28,860

around the same time and then they came

1345

01:00:32,180 --> 01:00:29,850

in and wiped them out

1346

01:00:36,410 --> 01:00:32,190

no that's a great point there but the

1347

01:00:39,740 --> 01:00:36,420

Nazca figures the lines and the

1348

01:00:42,850 --> 01:00:39,750

geoglyphs were made over the course of a

1349

01:00:47,570 --> 01:00:42,860

thousand years so they were started in

1350

01:00:50,390 --> 01:00:47,580

500 BCE by the Caracas they made the the

1351

01:00:52,940 --> 01:00:50,400

candelabra which is 500 feet tall they

1352

01:00:55,730 --> 01:00:52,950

also made the astronaut which is the one

1353

01:00:58,340 --> 01:00:55,740

waving in the sky and they made more

1354

01:01:00,350 --> 01:00:58,350

than a thousand geoglyphs in between

1355

01:01:03,980 --> 01:01:00,360

practice and Nazca that most people have

1356

01:01:07,130 --> 01:01:03,990

never heard of then you have about 30 or

1357

01:01:09,260 --> 01:01:07,140

so of the famous ones aside from the

1358

01:01:14,180 --> 01:01:09,270

astronaut that were made by the Nazca

1359

01:01:16,640 --> 01:01:14,190

people between 100 and 680 okay well

1360

01:01:18,650 --> 01:01:16,650

thank you very much I'm just making our

1361

01:01:20,090 --> 01:01:18,660

last round of are there any questions

1362

01:01:26,420 --> 01:01:20,100

you want me to ask well I've got you on

1363

01:01:28,820 --> 01:01:26,430

the line to you to our adepts and I'm so

1364

01:01:30,490 --> 01:01:28,830

at Lee who just joined us late he says

1365

01:01:33,080 --> 01:01:30,500

sorry I'm late

1366

01:01:34,250 --> 01:01:33,090

so if anybody does have any questions

1367

01:01:38,230 --> 01:01:34,260

you want to be able to ask I can ask

1368

01:01:40,940 --> 01:01:38,240

Brian now and while those are going on

1369

01:01:42,890 --> 01:01:40,950

to questions I do have which is and with

1370

01:01:44,690 --> 01:01:42,900

which isn't with regards to your tours

1371

01:01:46,470 --> 01:01:44,700

how do people sign up to them how does

1372

01:01:49,170 --> 01:01:46,480

somebody get involved

1373

01:01:51,990 --> 01:01:49,180

and if somebody's not in LA cuz trust me

1374

01:01:56,040 --> 01:01:52,000

I looked into it I can't be there how do

1375

01:02:00,630 --> 01:01:56,050

i how do we watch well it turns out the

1376

01:02:04,620 --> 01:02:00,640

tour's my my website of which 95% of the

1377

01:02:06,330 --> 01:02:04,630

content is free information I'd like to

1378

01:02:09,780 --> 01:02:06,340

change it from its well what it's called

1379

01:02:11,400 --> 01:02:09,790

as hidden Inca tours calm I'd like to

1380

01:02:13,470 --> 01:02:11,410

change the name because unless if it has

1381

01:02:14,730 --> 01:02:13,480

to do with tourists anymore but it's

1382

01:02:16,530 --> 01:02:14,740

difficult to change the name of a

1383

01:02:18,840 --> 01:02:16,540

website when it's been ingrained in

1384

01:02:22,140 --> 01:02:18,850

people's heads so that that's where you

1385

01:02:24,570 --> 01:02:22,150

find the tours that we do we're actually

1386

01:02:26,190 --> 01:02:24,580

going to Easter Island in October so

1387

01:02:30,090 --> 01:02:26,200

people if they want to conjoin up for

1388

01:02:32,220 --> 01:02:30,100

that for a week but that's that's where

1389

01:02:34,530 --> 01:02:32,230

the tours are located but as I said 95%

1390

01:02:37,620 --> 01:02:34,540

of the content is videos and articles

1391

01:02:41,160 --> 01:02:37,630

and interviews like this etc that are

1392

01:02:43,800 --> 01:02:41,170

100% free and then I forget what the

1393

01:02:46,710 --> 01:02:43,810

second half of the question was which

1394

01:02:48,780 --> 01:02:46,720

would be the the symposium on the second

1395

01:02:54,060 --> 01:02:48,790

is there a way for those who are not in

1396

01:02:57,260 --> 01:02:54,070

LA to view this live la Marzulli looked

1397

01:03:00,420 --> 01:02:57,270

into that and it it just wasn't feasible

1398

01:03:03,990 --> 01:03:00,430

to do a live broadcast of it

1399

01:03:06,420 --> 01:03:04,000

unfortunately so we're going to be doing

1400

01:03:09,000 --> 01:03:06,430

it in a conference room and the whole

1401

01:03:12,600 --> 01:03:09,010

thing is going to be filmed by Richard

1402

01:03:14,490 --> 01:03:12,610

Shaw I believe who's the director master

1403

01:03:16,920 --> 01:03:14,500

cameraman of the Watchers series that he

1404

01:03:19,800 --> 01:03:16,930

and la Marzulli did and so they're going

1405

01:03:24,870 --> 01:03:19,810

to produce a DVD that will be available

1406

01:03:27,930 --> 01:03:24,880

to the general public and it won't it it

1407

01:03:29,670 --> 01:03:27,940

won't be very expensive but we have to

1408

01:03:32,010 --> 01:03:29,680

charge a fee for it because the DNA

1409

01:03:36,420 --> 01:03:32,020

testing cost more than a hundred

1410

01:03:39,840 --> 01:03:36,430

thousand dollars so I will be posting on

1411

01:03:42,870 --> 01:03:39,850

my website more and more information as

1412

01:03:46,130 --> 01:03:42,880

regards the results as I said earlier I

1413

01:03:49,170 --> 01:03:46,140

haven't seen them the results yet

1414

01:03:51,060 --> 01:03:49,180

because I'm very I'm very bad at

1415

01:03:53,250 --> 01:03:51,070

releasing free information to the public

1416

01:03:58,200 --> 01:03:53,260

and some people don't that I work with

1417

01:04:00,240 --> 01:03:58,210

don't like that but the yeah the results

1418

01:04:02,790 --> 01:04:00,250

should be or will be very fast

1419

01:04:05,970 --> 01:04:02,800

that's why la is making a big big deal

1420

01:04:07,830 --> 01:04:05,980

out of this and then we're also hoping

1421

01:04:11,730 --> 01:04:07,840

to sell enough DVDs to be able to

1422

01:04:15,540 --> 01:04:11,740

conduct a dick here in Paris because

1423

01:04:17,550 --> 01:04:15,550

we've located the 10 acre area where the

1424

01:04:19,950 --> 01:04:17,560

largest elongated skulls in the world

1425

01:04:22,170 --> 01:04:19,960

have been found and so we're hoping to

1426

01:04:25,740 --> 01:04:22,180

do a dig with the Ministry of Culture of

1427

01:04:29,070 --> 01:04:25,750

Peru with our head archaeologist here

1428

01:04:31,380 --> 01:04:29,080

being the man in charge of that brunt of

1429

01:04:34,380 --> 01:04:31,390

procedure and what one of our

1430

01:04:36,150 --> 01:04:34,390

illustrious masters is asking me what's

1431

01:04:39,240 --> 01:04:36,160

the cranial volume of the elongated

1432

01:04:42,720 --> 01:04:39,250

skulls compared to a regular normal

1433

01:04:44,250 --> 01:04:42,730

skull well we're going to have to do a

1434

01:04:46,890 --> 01:04:44,260

lot more measurements of those that's

1435

01:04:48,930 --> 01:04:46,900

why I'm hoping to get access to the the

1436

01:04:52,230 --> 01:04:48,940

collection in the eco regional Museum

1437

01:04:53,940 --> 01:04:52,240

because the Baracus museum has 40 45

1438

01:04:57,390 --> 01:04:53,950

skulls of different sizes and shapes

1439

01:04:59,610 --> 01:04:57,400

some are our natural most of them are

1440

01:05:03,900 --> 01:04:59,620

cranial deformation but we have found

1441

01:05:06,740 --> 01:05:03,910

anomalies of as much as 25 to 30% larger

1442

01:05:10,290 --> 01:05:06,750

cranial volume in the practice skulls

1443

01:05:12,150 --> 01:05:10,300

but if we're able to access our third

1444

01:05:15,210 --> 01:05:12,160

collection I think we might find even

1445

01:05:18,420 --> 01:05:15,220

greater differences okay I think I am

1446

01:05:20,300 --> 01:05:18,430

getting one one more question in here

1447

01:05:23,070 --> 01:05:20,310

and I do apologize there was we always

1448

01:05:26,460 --> 01:05:23,080

seem to get the flood at the end as they

1449

01:05:27,540 --> 01:05:26,470

say but while I'm looking for a few

1450

01:05:30,750 --> 01:05:27,550

because I'm getting them through several

1451
01:05:32,040 --> 01:05:30,760
different communications aspects want

1452
01:05:34,200 --> 01:05:32,050
one of our listeners is asking your

1453
01:05:35,370 --> 01:05:34,210
opinion on Tom DeLonge in his to the

1454
01:05:37,380 --> 01:05:35,380
stars Academy I know it's not

1455
01:05:39,090 --> 01:05:37,390
necessarily your field of research but

1456
01:05:41,640 --> 01:05:39,100
have you heard of it and what do you

1457
01:05:47,030 --> 01:05:41,650
think no I've actually never heard of

1458
01:05:50,510 --> 01:05:47,040
that oh okay well then Leo for that

1459
01:05:54,540 --> 01:05:50,520
sorry yeah

1460
01:05:56,610 --> 01:05:54,550
see I've got just now just now okay I

1461
01:05:58,440 --> 01:05:56,620
know that you're we're going a little

1462
01:05:59,580 --> 01:05:58,450
bit over on the time and I did want to

1463
01:06:01,980 --> 01:05:59,590

thank you very much I know you're a very

1464

01:06:03,390 --> 01:06:01,990

busy guy especially with all the

1465

01:06:06,090 --> 01:06:03,400

planning that you have and packing can

1466

01:06:08,340 --> 01:06:06,100

take a while with your travels that are

1467

01:06:09,660 --> 01:06:08,350

coming up so I did want to thank you

1468

01:06:11,970 --> 01:06:09,670

very much for your time

1469

01:06:13,799 --> 01:06:11,980

while we sign off and again if you just

1470

01:06:16,829 --> 01:06:13,809

want to weight off just just a

1471

01:06:20,579 --> 01:06:16,839

your moments while I play us out as it

1472

01:06:22,739 --> 01:06:20,589

were with some good music and what I

1473

01:06:26,519 --> 01:06:22,749

probably haven't played in a while let's

1474

01:06:30,539 --> 01:06:26,529

see this is usually I do four listen

1475

01:06:33,300 --> 01:06:30,549

just what we're scattered knowledge for

1476

01:06:38,820 --> 01:06:35,790

oh here's a good one this is a actually

1477

01:06:41,970 --> 01:06:38,830

from a group called Lobo Lobo and it's

1478

01:06:46,350 --> 01:06:41,980

what was in my head use that as Kevin

1479

01:06:47,490 --> 01:06:46,360

appropriate outro music ladies and

1480

01:06:49,200 --> 01:06:47,500

gentlemen this has been Chris George

1481

01:06:51,780 --> 01:06:49,210

Zuger and Bryan Forrester this is the

1482

01:06:52,500 --> 01:06:51,790

den of lore this will be released to the

1483

01:06:55,680 --> 01:06:52,510

general public

1484

01:06:58,890 --> 01:06:55,690

next week and as this is the pre record

1485

01:07:00,530 --> 01:06:58,900

thank you for our adepts for joining us

1486

01:07:05,980 --> 01:07:00,540

and asking that lovely questions of

1487

01:07:10,190 --> 01:07:05,990

Bryan I will see you guys this Friday

1488

01:07:30,340 --> 01:07:26,380

[Music]
