Rich Hoffman Interview
Scientific Coalition for UAP Studies
Live on YouTube
Wednesday July 7th
11.30am PST/2.30pm EST/7.30pm UK

1
00:00:12,629 --> 00:00:10,150
hey guys how's it going

2
00:00:13,509 --> 00:00:12,639
as always thank you so much for being

3
00:00:15,270 --> 00:00:13,519
here

4
00:00:16,790 --> 00:00:15,280
just gonna check everything's in order

5
00:00:18,470 --> 00:00:16,800
because when you go live you never know

6
00:00:22,230 --> 00:00:18,480
what might crop up so

7
00:00:25,029 --> 00:00:22,240
give me two seconds just need to check

8
00:00:25,990 --> 00:00:25,039
i'll get better at this i promise there

9
00:00:28,550 --> 00:00:26,000
we go guys

10
00:00:30,070 --> 00:00:28,560
guys thank you so much for being here

11
00:00:32,150 --> 00:00:30,080
thank you for the continued support

12
00:00:33,910 --> 00:00:32,160
it means the world to me you keep

13
00:00:35,830 --> 00:00:33,920

motivating me to do this

14

00:00:38,069 --> 00:00:35,840

keep doing these interviews put out this

15

00:00:41,190 --> 00:00:38,079

content and because i know it's just as

16

00:00:43,430 --> 00:00:41,200

important to you as it is to me

17

00:00:44,470 --> 00:00:43,440

now this one tonight is one that i've

18

00:00:46,150 --> 00:00:44,480

been looking forward to

19

00:00:48,069 --> 00:00:46,160

and i say tonight because i'm here in

20

00:00:50,549 --> 00:00:48,079

the uk it's 7 30 p.m

21

00:00:51,110 --> 00:00:50,559

so for everyone else around the world

22

00:00:52,950 --> 00:00:51,120

yeah

23

00:00:54,229 --> 00:00:52,960

that's why i say night but let's not

24

00:00:57,029 --> 00:00:54,239

waste any more time

25

00:00:58,709 --> 00:00:57,039

i would like to introduce one of my

26

00:01:00,630 --> 00:00:58,719

favorite people in this subject

27

00:01:03,029 --> 00:01:00,640

um who's been putting in work for so

28

00:01:05,189 --> 00:01:03,039

long now mr rich hoffman

29

00:01:06,070 --> 00:01:05,199

executive board member of the scientific

30

00:01:10,310 --> 00:01:06,080

coalition

31

00:01:12,310 --> 00:01:10,320

for uap studies welcome rich

32

00:01:13,670 --> 00:01:12,320

hey glad to be on board vinnie thank you

33

00:01:15,429 --> 00:01:13,680

for inviting me

34

00:01:17,109 --> 00:01:15,439

it's my absolute pleasure just thank you

35

00:01:20,469 --> 00:01:17,119

so much for giving up your time

36

00:01:24,550 --> 00:01:20,479

and i'm sure you're a busy man

37

00:01:28,310 --> 00:01:26,710

so i've just i've got a few little sort

38

00:01:29,190 --> 00:01:28,320

of questions lined up just to sort of

39

00:01:31,510 --> 00:01:29,200

lead us through the uh

40

00:01:32,710 --> 00:01:31,520

through the chat so i guess the first

41

00:01:34,149 --> 00:01:32,720

thing that

42

00:01:35,670 --> 00:01:34,159

i'd like to know and maybe everyone else

43

00:01:38,149 --> 00:01:35,680

is just give us brief background and

44

00:01:42,230 --> 00:01:38,159

history about about yourself and

45

00:01:45,510 --> 00:01:42,240

and how you got to this this subject

46

00:01:46,069 --> 00:01:45,520

i'll be happy to uh actually i've got 57

47

00:01:48,870 --> 00:01:46,079

years on

48

00:01:49,990 --> 00:01:48,880

uh in on it i started when i was 13

49

00:01:52,630 --> 00:01:50,000

years old

50

00:01:54,149 --> 00:01:52,640

i got started as a result of having to

51

00:01:56,230 --> 00:01:54,159

do a presentation a 10-minute

52

00:01:59,429 --> 00:01:56,240

presentation in a science class

53

00:02:02,630 --> 00:01:59,439

and uh in my eighth grade and i

54

00:02:04,789 --> 00:02:02,640

and i had to put my name next to a topic

55

00:02:06,870 --> 00:02:04,799

and nobody else chose it and i put my

56

00:02:08,790 --> 00:02:06,880

name next to this thing called ufos

57

00:02:10,710 --> 00:02:08,800

didn't even know what it was went up to

58

00:02:12,630 --> 00:02:10,720

my teacher and said well what's a ufo

59

00:02:13,830 --> 00:02:12,640

and he said i identified flying object i

60

00:02:15,750 --> 00:02:13,840

said what is that

61

00:02:17,350 --> 00:02:15,760

he said you ever heard of flying saucers

62

00:02:18,470 --> 00:02:17,360

i said yeah i watched science fiction

63

00:02:20,470 --> 00:02:18,480

show you know so

64

00:02:22,229 --> 00:02:20,480

no problem we'll go do a ten minute

65

00:02:24,309 --> 00:02:22,239

report go do your study and

66

00:02:27,190 --> 00:02:24,319

of course i did a horrible job with it i

67

00:02:30,150 --> 00:02:27,200

got a d on it that's how well

68

00:02:30,949 --> 00:02:30,160

and so i pretty pretty near flunking but

69

00:02:32,869 --> 00:02:30,959

anyway

70

00:02:34,790 --> 00:02:32,879

i couldn't address any of the questions

71

00:02:38,070 --> 00:02:34,800

that my teacher had who was more

72

00:02:40,390 --> 00:02:38,080

well read on this subject uh in

73

00:02:41,910 --> 00:02:40,400

my my topics were like i think the books

74

00:02:43,350 --> 00:02:41,920

that i actually looked at were like my

75

00:02:46,550 --> 00:02:43,360

trip to venus

76

00:02:49,030 --> 00:02:46,560

my saturnian lover you know

77

00:02:50,470 --> 00:02:49,040

you know and so so i you know and i grew

78

00:02:52,550 --> 00:02:50,480

up in dayton ohio

79

00:02:54,229 --> 00:02:52,560

and little did i know a couple days

80

00:02:57,030 --> 00:02:54,239

later after getting my first

81

00:02:59,110 --> 00:02:57,040

actual legitimate book on it uh it was

82

00:02:59,910 --> 00:02:59,120

called the report on unidentified flying

83

00:03:03,030 --> 00:02:59,920

objects

84

00:03:06,149 --> 00:03:03,040

by the head of project blue book

85

00:03:08,790 --> 00:03:06,159

and that was uh when i read that

86

00:03:09,750 --> 00:03:08,800

book i i was like taking it back because

87

00:03:12,869 --> 00:03:09,760

they're talking about

88

00:03:16,149 --> 00:03:12,879

know

89

00:03:17,190 --> 00:03:16,159

firing at them i'm going like wait a

90

00:03:19,830 --> 00:03:17,200

minute you know

91

00:03:22,790 --> 00:03:19,840

and plus it coincided with the uhlani

92

00:03:24,309 --> 00:03:22,800

zamora socorro new mexico case

93

00:03:26,229 --> 00:03:24,319

in which there was the object that

94

00:03:27,990 --> 00:03:26,239

landed and and that was a pretty

95

00:03:32,149 --> 00:03:28,000

well-known case

96

00:03:33,509 --> 00:03:32,159

so it rocked my world and i you know

97

00:03:35,910 --> 00:03:33,519

basically got started

98

00:03:37,750 --> 00:03:35,920

after that and then within i started

99

00:03:40,470 --> 00:03:37,760

giving lectures even around

100

00:03:41,990 --> 00:03:40,480

town uh in dayton ohio and that's where

101
00:03:45,430 --> 00:03:42,000
the project blue book was

102
00:03:46,869 --> 00:03:45,440
and so i became you know pretty much the

103
00:03:49,589 --> 00:03:46,879
go-to guy

104
00:03:50,390 --> 00:03:49,599
uh in the city of dayton anyway and then

105
00:03:53,509 --> 00:03:50,400
suddenly i got

106
00:03:56,470 --> 00:03:53,519
connected up with a mutual ufo network

107
00:03:58,830 --> 00:03:56,480
in uh 19 well actually it was called the

108
00:04:02,630 --> 00:03:58,840
midwest ufo network in

109
00:04:04,869 --> 00:04:02,640
1969 and uh and anyway i became the

110
00:04:05,990 --> 00:04:04,879
state section director for dayton ohio

111
00:04:07,990 --> 00:04:06,000
i was with a number of other

112
00:04:09,750 --> 00:04:08,000
organizations studying the phenomena and

113
00:04:11,509 --> 00:04:09,760

actually investigating cases

114

00:04:13,830 --> 00:04:11,519

right so i've been investigating you

115

00:04:14,229 --> 00:04:13,840

know probably over over a thousand cases

116

00:04:17,909 --> 00:04:14,239

uh

117

00:04:18,469 --> 00:04:17,919

myself and then i over the the period of

118

00:04:21,749 --> 00:04:18,479

you know

119

00:04:22,870 --> 00:04:21,759

the next 57 years i basically have been

120

00:04:26,150 --> 00:04:22,880

the deputy director of

121

00:04:29,189 --> 00:04:26,160

investigations for uh mufon

122

00:04:31,189 --> 00:04:29,199

i was also the director of scientific

123

00:04:33,030 --> 00:04:31,199

projects which was looking at adapting

124

00:04:35,110 --> 00:04:33,040

technology to study

125

00:04:36,909 --> 00:04:35,120

uh and i got involved with them on that

126
00:04:39,990 --> 00:04:36,919
and then about

127
00:04:42,310 --> 00:04:40,000
2017 i decided to leave my positions

128
00:04:44,629 --> 00:04:42,320
with mufon and we we decided to create

129
00:04:46,469 --> 00:04:44,639
an organization called the scu which is

130
00:04:49,189 --> 00:04:46,479
a scientific coalition for uap

131
00:04:50,390 --> 00:04:49,199
studies and the primary focus there was

132
00:04:54,070 --> 00:04:50,400
to be able to get

133
00:04:54,870 --> 00:04:54,080
scientists engaged and and serious

134
00:04:58,150 --> 00:04:54,880
researchers

135
00:05:01,029 --> 00:04:58,160
as a coalition to start doing uh

136
00:05:01,749 --> 00:05:01,039
independent studies uh and really you

137
00:05:04,070 --> 00:05:01,759
know

138
00:05:05,350 --> 00:05:04,080

put science at the forefront because up

139

00:05:06,870 --> 00:05:05,360

to that point

140

00:05:08,550 --> 00:05:06,880

you know a lot of people will collect

141

00:05:11,029 --> 00:05:08,560

ufo reports but they don't

142

00:05:12,150 --> 00:05:11,039

do an analysis of them that we don't you

143

00:05:14,629 --> 00:05:12,160

know

144

00:05:15,590 --> 00:05:14,639

you might have 70 000 cases or 80 000

145

00:05:18,710 --> 00:05:15,600

cases in your

146

00:05:20,150 --> 00:05:18,720

your database with mufon and if you if

147

00:05:21,909 --> 00:05:20,160

you haven't got somebody that's actually

148

00:05:22,870 --> 00:05:21,919

doing an analysis of it then what good

149

00:05:24,469 --> 00:05:22,880

is it right

150

00:05:26,230 --> 00:05:24,479

you don't want to work to put reports

151
00:05:26,550 --> 00:05:26,240
together and investigate them but you

152
00:05:28,870 --> 00:05:26,560
know

153
00:05:30,870 --> 00:05:28,880
hey wait a minute what intelligence can

154
00:05:33,909 --> 00:05:30,880
we get from it so that's kind of where i

155
00:05:36,950 --> 00:05:33,919
we are as as a group now

156
00:05:38,070 --> 00:05:36,960
that's my ufo history okay let me come

157
00:05:39,990 --> 00:05:38,080
back to now my

158
00:05:41,990 --> 00:05:40,000
i'm i'm currently and i've been working

159
00:05:43,430 --> 00:05:42,000
for the past 26 years

160
00:05:45,029 --> 00:05:43,440
for the department of defense in the

161
00:05:47,510 --> 00:05:45,039
army uh i'm

162
00:05:49,110 --> 00:05:47,520
i've been working in everything from

163
00:05:52,710 --> 00:05:49,120

enterprise architecture

164

00:05:53,990 --> 00:05:52,720

i t systems development uh and i've also

165

00:05:57,350 --> 00:05:54,000

been playing roles

166

00:06:00,790 --> 00:05:57,360

in as a systems engineering and analyst

167

00:06:03,430 --> 00:06:00,800

so i work for the army material command

168

00:06:04,390 --> 00:06:03,440

which if you it's kind of an interesting

169

00:06:06,390 --> 00:06:04,400

corollary

170

00:06:07,590 --> 00:06:06,400

the if you take a look at it like i'm

171

00:06:10,469 --> 00:06:07,600

working for the army

172

00:06:11,749 --> 00:06:10,479

organization that was actually the and

173

00:06:16,070 --> 00:06:11,759

the air force

174

00:06:17,830 --> 00:06:16,080

one that housed project blue book

175

00:06:20,230 --> 00:06:17,840

so i'm kind of like the sister

176

00:06:21,670 --> 00:06:20,240

organization if

177

00:06:23,590 --> 00:06:21,680

that's doing that so it's kind of like

178

00:06:24,390 --> 00:06:23,600

you know me going first full circle if

179

00:06:27,510 --> 00:06:24,400

you would

180

00:06:29,270 --> 00:06:27,520

yeah and so because of that and that

181

00:06:30,870 --> 00:06:29,280

connection with the army material

182

00:06:33,110 --> 00:06:30,880

command and stuff like that i got an

183

00:06:36,390 --> 00:06:33,120

appreciation of the military

184

00:06:39,270 --> 00:06:36,400

and the role that it plays uh and

185

00:06:41,110 --> 00:06:39,280

and so i'm i'm kind of like you know i

186

00:06:42,390 --> 00:06:41,120

have an appreciation of that world

187

00:06:44,550 --> 00:06:42,400

i have an appreciation of the

188

00:06:47,270 --> 00:06:44,560

intelligence world and

189

00:06:48,710 --> 00:06:47,280

we're suddenly starting to to create a

190

00:06:51,909 --> 00:06:48,720

like if you would a partnership

191

00:06:53,990 --> 00:06:51,919

with the intelligence piece because uh

192

00:06:55,189 --> 00:06:54,000

they play such a critical role in us

193

00:06:58,230 --> 00:06:55,199

being able to get

194

00:07:00,550 --> 00:06:58,240

uh accurate information and data

195

00:07:01,270 --> 00:07:00,560

that you know that will help us out in

196

00:07:04,550 --> 00:07:01,280

the long run

197

00:07:08,309 --> 00:07:04,560

and so even with the uap

198

00:07:10,950 --> 00:07:08,319

task force report and the subsequent dod

199

00:07:12,629 --> 00:07:10,960

uh document that came out that basically

200

00:07:13,110 --> 00:07:12,639

talks about them putting together an

201
00:07:16,150 --> 00:07:13,120
entire

202
00:07:19,430 --> 00:07:16,160
program now yeah it speaks to

203
00:07:22,629 --> 00:07:19,440
uh being able to use uh everything from

204
00:07:25,189 --> 00:07:22,639
uh measures intelligence to human uh to

205
00:07:27,110 --> 00:07:25,199
sigint which is signals intelligence and

206
00:07:30,150 --> 00:07:27,120
stuff like that and that's all gonna be

207
00:07:32,469 --> 00:07:30,160
great sensory information that we could

208
00:07:33,830 --> 00:07:32,479
now study so i'm excited vinnie but

209
00:07:35,990 --> 00:07:33,840
that's kind of like my background

210
00:07:38,469 --> 00:07:36,000
i've been active like i said for 57

211
00:07:40,710 --> 00:07:38,479
years i love that the

212
00:07:42,550 --> 00:07:40,720
the whole topic i've studied a lot seen

213
00:07:44,950 --> 00:07:42,560

a lot hurt a lot

214

00:07:45,749 --> 00:07:44,960

and uh there you go no that's great

215

00:07:47,909 --> 00:07:45,759

thank you

216

00:07:49,990 --> 00:07:47,919

but before you were saying about 2017

217

00:07:52,150 --> 00:07:50,000

and forming that scu but

218

00:07:53,270 --> 00:07:52,160

in the years maybe even decades leading

219

00:07:54,950 --> 00:07:53,280

up to that in your work in the

220

00:07:56,950 --> 00:07:54,960

scientific field did you always come

221

00:07:58,309 --> 00:07:56,960

across that stigma that taboo that was

222

00:08:01,350 --> 00:07:58,319

associated with

223

00:08:03,510 --> 00:08:01,360

the ufo subject yes and

224

00:08:05,270 --> 00:08:03,520

let me tell you i mean the interesting

225

00:08:07,110 --> 00:08:05,280

thing that i've had is i

226

00:08:08,390 --> 00:08:07,120

think i told you that i started even

227

00:08:10,390 --> 00:08:08,400

lecturing back in

228

00:08:13,029 --> 00:08:10,400

20 i mean when i when i was like 13

229

00:08:15,110 --> 00:08:13,039

years old yeah and uh

230

00:08:16,710 --> 00:08:15,120

you know in a lot of my presentations

231

00:08:17,430 --> 00:08:16,720

and lectures and stuff like that i would

232

00:08:20,070 --> 00:08:17,440

run across

233

00:08:22,230 --> 00:08:20,080

different groups or like i would speak

234

00:08:25,189 --> 00:08:22,240

to churches i would speak it uh

235

00:08:26,070 --> 00:08:25,199

you know it might be like these like

236

00:08:28,629 --> 00:08:26,080

clubs like

237

00:08:29,749 --> 00:08:28,639

rotary optimus clubs and various other

238

00:08:32,469 --> 00:08:29,759

kind of clubs

239

00:08:33,190 --> 00:08:32,479

in and around the united states and so

240

00:08:34,949 --> 00:08:33,200

you know you'd

241

00:08:37,750 --> 00:08:34,959

you'd kind of like see a little bit of a

242

00:08:41,029 --> 00:08:37,760

hesitation to even discuss the topic

243

00:08:43,589 --> 00:08:41,039

or or that type of thing or you know

244

00:08:45,430 --> 00:08:43,599

basically there's a they pooh-pooh it if

245

00:08:47,190 --> 00:08:45,440

you would uh and say that there's

246

00:08:49,350 --> 00:08:47,200

nothing to it this is just all

247

00:08:50,310 --> 00:08:49,360

hui and then i would do my presentation

248

00:08:53,509 --> 00:08:50,320

and be like

249

00:08:55,269 --> 00:08:53,519

wow i didn't realize that

250

00:08:57,110 --> 00:08:55,279

a lot of people are going on the basis

251
00:08:58,710 --> 00:08:57,120
of just you know either what they saw on

252
00:09:01,430 --> 00:08:58,720
television or what they heard

253
00:09:01,829 --> 00:09:01,440
yeah somebody else and they form these

254
00:09:03,829 --> 00:09:01,839
like

255
00:09:06,310 --> 00:09:03,839
opinions that that it's all you know

256
00:09:08,310 --> 00:09:06,320
it's either all legit or it's not legit

257
00:09:10,550 --> 00:09:08,320
but very rarely did they spend any time

258
00:09:10,949 --> 00:09:10,560
studying it or actually looking into it

259
00:09:14,070 --> 00:09:10,959
right

260
00:09:16,230 --> 00:09:14,080
of course and so yeah i mean so

261
00:09:17,269 --> 00:09:16,240
you know consequently you've seen over

262
00:09:20,150 --> 00:09:17,279
the period of uh

263
00:09:21,350 --> 00:09:20,160

of that time you know at least my time

264

00:09:24,230 --> 00:09:21,360

and i'm seeing all

265

00:09:26,310 --> 00:09:24,240

57 years history right where we could

266

00:09:27,430 --> 00:09:26,320

talk about flying saucers back in the in

267

00:09:29,590 --> 00:09:27,440

the early days

268

00:09:30,470 --> 00:09:29,600

because it was an open topic it seemed

269

00:09:32,310 --> 00:09:30,480

and there was an actual

270

00:09:34,310 --> 00:09:32,320

air force project that was studying it

271

00:09:35,350 --> 00:09:34,320

right yeah it's got to be legit and we

272

00:09:37,829 --> 00:09:35,360

can talk about it

273

00:09:38,389 --> 00:09:37,839

yes well then you had the project blue

274

00:09:42,150 --> 00:09:38,399

book

275

00:09:43,990 --> 00:09:42,160

closed in 1969 and then you had the

276

00:09:44,550 --> 00:09:44,000

scientific community coming out saying

277

00:09:48,310 --> 00:09:44,560

it's

278

00:09:51,110 --> 00:09:48,320

anymore just you know let it go

279

00:09:51,829 --> 00:09:51,120

drop it uh it's not worth your time and

280

00:09:53,910 --> 00:09:51,839

they all

281

00:09:55,990 --> 00:09:53,920

and then you had the period of times at

282

00:09:57,750 --> 00:09:56,000

least in the united states where you had

283

00:09:59,430 --> 00:09:57,760

these tabloids would be sitting at your

284

00:10:00,389 --> 00:09:59,440

grocery checkout that would have a

285

00:10:02,069 --> 00:10:00,399

picture of

286

00:10:04,470 --> 00:10:02,079

some president or something like that

287

00:10:06,630 --> 00:10:04,480

holding an alien baby

288

00:10:09,190 --> 00:10:06,640

the whole topic you know and so you know

289

00:10:11,030 --> 00:10:09,200

and that was all a cia push to be able

290

00:10:12,470 --> 00:10:11,040

to get it to make it ludicrous and

291

00:10:15,110 --> 00:10:12,480

things to talk about

292

00:10:16,310 --> 00:10:15,120

yeah and and you know and i'll also say

293

00:10:18,710 --> 00:10:16,320

this vinnie

294

00:10:20,870 --> 00:10:18,720

that the uf if you would if there is

295

00:10:21,509 --> 00:10:20,880

such a thing as a ufo community which is

296

00:10:24,630 --> 00:10:21,519

just so

297

00:10:26,470 --> 00:10:24,640

fractured and fragmented and

298

00:10:28,470 --> 00:10:26,480

it's almost like a different religions

299

00:10:31,269 --> 00:10:28,480

here and there

300

00:10:31,990 --> 00:10:31,279

you know that if you can call it one

301

00:10:33,829 --> 00:10:32,000

community

302

00:10:35,750 --> 00:10:33,839

and it's you know you think that it's

303

00:10:38,790 --> 00:10:35,760

working you know cooperatively

304

00:10:41,110 --> 00:10:38,800

together and it's not and and uh then

305

00:10:43,190 --> 00:10:41,120

you run into the problem where

306

00:10:45,110 --> 00:10:43,200

you know there are these like really

307

00:10:45,990 --> 00:10:45,120

fringe kind of beliefs out there about

308

00:10:48,870 --> 00:10:46,000

the subject

309

00:10:49,910 --> 00:10:48,880

that you know then this other group has

310

00:10:52,310 --> 00:10:49,920

problems with it

311

00:10:53,990 --> 00:10:52,320

and then you see all that and then what

312

00:10:54,550 --> 00:10:54,000

scientists would want to get engaged in

313

00:10:57,350 --> 00:10:54,560

all that

314

00:10:58,389 --> 00:10:57,360

crap of course no absolutely amazing

315

00:11:01,750 --> 00:10:58,399

yeah

316

00:11:03,350 --> 00:11:01,760

so that's why you saw like even in 2017

317

00:11:06,150 --> 00:11:03,360

there was a large number of us

318

00:11:08,150 --> 00:11:06,160

that left mufon because well they

319

00:11:10,470 --> 00:11:08,160

started to get into the the conspiracy

320

00:11:11,670 --> 00:11:10,480

stuff about secret spaceship programs

321

00:11:14,710 --> 00:11:11,680

and all this other

322

00:11:16,710 --> 00:11:14,720

stuff and you know i mean that's fine

323

00:11:17,750 --> 00:11:16,720

and good but that's not where science

324

00:11:19,110 --> 00:11:17,760

wants to play

325

00:11:21,350 --> 00:11:19,120

and we don't want to deal with

326

00:11:23,750 --> 00:11:21,360

conspiracies we want to deal with facts

327

00:11:26,150 --> 00:11:23,760

of course we want to deal with evidence

328

00:11:28,550 --> 00:11:26,160

we want to deal with that type stuff so

329

00:11:29,910 --> 00:11:28,560

we kind of divorced ourselves from even

330

00:11:32,710 --> 00:11:29,920

uh that

331

00:11:34,470 --> 00:11:32,720

and we moved on and that's why we say we

332

00:11:35,509 --> 00:11:34,480

needed to stick together to be able to

333

00:11:38,470 --> 00:11:35,519

have these serious

334

00:11:39,829 --> 00:11:38,480

conversations about you know propulsion

335

00:11:41,269 --> 00:11:39,839

systems what can we

336

00:11:42,949 --> 00:11:41,279

learn from the ufos and their

337

00:11:45,190 --> 00:11:42,959

propulsions and interactions with the

338

00:11:47,030 --> 00:11:45,200

atmosphere

339

00:11:49,829 --> 00:11:47,040

is there any pattern to where they the

340

00:11:52,150 --> 00:11:49,839

uso phenomena happens you know the

341

00:11:54,230 --> 00:11:52,160

the underwater stuff that's going on is

342

00:11:55,829 --> 00:11:54,240

there a pattern to that

343

00:11:58,470 --> 00:11:55,839

and that's the kind of like level of

344

00:12:01,269 --> 00:11:58,480

discussions that we want uh we want to

345

00:12:01,829 --> 00:12:01,279

can we deduce any of the intentions uh

346

00:12:04,629 --> 00:12:01,839

of the

347

00:12:05,590 --> 00:12:04,639

objects that are seen next to nuclear

348

00:12:08,470 --> 00:12:05,600

facilities

349

00:12:10,470 --> 00:12:08,480

do they is there something about the the

350

00:12:11,990 --> 00:12:10,480

timing of that that happens is there

351
00:12:15,030 --> 00:12:12,000
something about the uh

352
00:12:16,949 --> 00:12:15,040
the way that they maneuver or uh maybe

353
00:12:19,190 --> 00:12:16,959
they hold back and watch

354
00:12:21,269 --> 00:12:19,200
uh and so we're trying to like learn the

355
00:12:23,350 --> 00:12:21,279
intentions of that if you would

356
00:12:24,870 --> 00:12:23,360
sure like and so that's where science

357
00:12:27,269 --> 00:12:24,880
wants to be and we want to

358
00:12:29,269 --> 00:12:27,279
we want to forward that understanding

359
00:12:32,150 --> 00:12:29,279
from a scientific nature of these

360
00:12:33,509 --> 00:12:32,160
uh objects no that's great and that's

361
00:12:36,389 --> 00:12:33,519
what i keep saying to people

362
00:12:37,590 --> 00:12:36,399
across my social media platforms is that

363
00:12:40,310 --> 00:12:37,600

i think

364

00:12:42,150 --> 00:12:40,320

so many people were waiting for the june

365

00:12:44,069 --> 00:12:42,160

25th report to come out and there

366

00:12:46,949 --> 00:12:44,079

suddenly be loads of answers but i was

367

00:12:48,470 --> 00:12:46,959

kind of giving out my opinion which was

368

00:12:50,310 --> 00:12:48,480

this isn't going to give us answers it's

369

00:12:52,949 --> 00:12:50,320

going to lead us into a new direction

370

00:12:53,670 --> 00:12:52,959

that is going to be focused on science

371

00:12:54,949 --> 00:12:53,680

yes i think

372

00:12:56,550 --> 00:12:54,959

you know it's going to take a lot more

373

00:12:58,310 --> 00:12:56,560

time but it's definitely got to go down

374

00:13:01,509 --> 00:12:58,320

the scientific um

375

00:13:03,190 --> 00:13:01,519

avenue let's say so um yeah and

376

00:13:04,870 --> 00:13:03,200

i mean you know you know that whole

377

00:13:07,110 --> 00:13:04,880

stigma is what kept

378

00:13:09,269 --> 00:13:07,120

pilots from reporting it navy p

379

00:13:11,430 --> 00:13:09,279

personnel from talking about it

380

00:13:12,790 --> 00:13:11,440

nobody wanted to to discuss it and so

381

00:13:14,870 --> 00:13:12,800

that even that's what i saw

382

00:13:16,150 --> 00:13:14,880

in in my i mean working in the military

383

00:13:17,670 --> 00:13:16,160

right now yeah

384

00:13:20,230 --> 00:13:17,680

the interesting thing about me is if you

385

00:13:21,990 --> 00:13:20,240

go to my my cube where i sit and do my

386

00:13:23,350 --> 00:13:22,000

work and stuff like that it's all decked

387

00:13:25,590 --> 00:13:23,360

out and ufo stuff

388

00:13:27,509 --> 00:13:25,600

and so i got the little i want to

389

00:13:30,710 --> 00:13:27,519

believe poster and everything else

390

00:13:32,629 --> 00:13:30,720

i have it too the funny thing is that

391

00:13:34,870 --> 00:13:32,639

they've always known that i'm i'm

392

00:13:36,550 --> 00:13:34,880

very much into this and and that i treat

393

00:13:39,269 --> 00:13:36,560

it seriously so

394

00:13:41,590 --> 00:13:39,279

i will get conversations privately where

395

00:13:44,949 --> 00:13:41,600

people will come up and tell me their

396

00:13:47,829 --> 00:13:44,959

experiences right right you know and so

397

00:13:49,030 --> 00:13:47,839

they have experiences and they don't and

398

00:13:50,550 --> 00:13:49,040

i remember like

399

00:13:52,790 --> 00:13:50,560

this is kind of a funny thing but in the

400

00:13:54,310 --> 00:13:52,800

70s i actually went to project blue book

401
00:13:56,310 --> 00:13:54,320
area where it was

402
00:13:58,949 --> 00:13:56,320
and the foreign technology division and

403
00:13:59,750 --> 00:13:58,959
i gave up i gave a presentation on ufos

404
00:14:02,150 --> 00:13:59,760
right

405
00:14:03,990 --> 00:14:02,160
and so here i am talking to all these

406
00:14:05,910 --> 00:14:04,000
people that were probably playing in it

407
00:14:07,910 --> 00:14:05,920
from scientific standpoint

408
00:14:09,110 --> 00:14:07,920
and i i i asked him i said well how many

409
00:14:11,670 --> 00:14:09,120
of you have you actually

410
00:14:12,790 --> 00:14:11,680
witnessed one and maybe like one nervous

411
00:14:15,430 --> 00:14:12,800
hand out of the

412
00:14:16,470 --> 00:14:15,440
room and then then what happened you

413
00:14:18,550 --> 00:14:16,480

want to hear something funny

414

00:14:19,670 --> 00:14:18,560

but at the i gave a little intermission

415

00:14:21,430 --> 00:14:19,680

or a break

416

00:14:23,030 --> 00:14:21,440

i was pummeled with everybody walking up

417

00:14:25,110 --> 00:14:23,040

to me telling me their stories

418

00:14:27,110 --> 00:14:25,120

and then they had me like for hours

419

00:14:30,389 --> 00:14:27,120

afterwards telling me their stories

420

00:14:31,990 --> 00:14:30,399

privately right wow so i mean

421

00:14:34,069 --> 00:14:32,000

the fact that we're now looking to be

422

00:14:36,870 --> 00:14:34,079

able to get the navy and all and the air

423

00:14:39,990 --> 00:14:36,880

force to actually do these reports

424

00:14:42,470 --> 00:14:40,000

uh and also the collection of all the

425

00:14:45,430 --> 00:14:42,480

wonderful things like radar the isr

426

00:14:47,189 --> 00:14:45,440

the sensors and all that yeah that's

427

00:14:49,590 --> 00:14:47,199

going to be extremely helpful

428

00:14:50,470 --> 00:14:49,600

uh to be able to now make some sense out

429

00:14:54,310 --> 00:14:50,480

of this

430

00:14:56,069 --> 00:14:54,320

yeah absolutely um and it is it feels

431

00:14:57,110 --> 00:14:56,079

like we're in a new a new step a new

432

00:14:58,710 --> 00:14:57,120

frontier

433

00:15:00,870 --> 00:14:58,720

but it is this is what i say to people

434

00:15:02,629 --> 00:15:00,880

it is quite new i mean the the navy

435

00:15:04,470 --> 00:15:02,639

reporting system's probably only been in

436

00:15:06,629 --> 00:15:04,480

play for a couple of years

437

00:15:08,389 --> 00:15:06,639

so i think we've got a lot to wait and

438

00:15:10,069 --> 00:15:08,399

come from that side of things and i

439

00:15:11,990 --> 00:15:10,079

think probably a lot of the

440

00:15:14,389 --> 00:15:12,000

even the classified report that that we

441

00:15:16,949 --> 00:15:14,399

didn't see is probably only focusing on

442

00:15:18,949 --> 00:15:16,959

a majority of the 144 cases

443

00:15:20,150 --> 00:15:18,959

possibly being in the last couple years

444

00:15:22,870 --> 00:15:20,160

due to those implement

445

00:15:24,470 --> 00:15:22,880

implementations from the navy reporting

446

00:15:26,150 --> 00:15:24,480

system so

447

00:15:27,670 --> 00:15:26,160

but um you were just talking about

448

00:15:29,670 --> 00:15:27,680

speaking to people

449

00:15:32,150 --> 00:15:29,680

about their sightings and stuff but have

450

00:15:33,269 --> 00:15:32,160

you ever had a sighting or an experience

451
00:15:35,030 --> 00:15:33,279
or anything

452
00:15:36,710 --> 00:15:35,040
so i've had experiences obviously when

453
00:15:39,430 --> 00:15:36,720
you go out and do and conduct

454
00:15:40,629 --> 00:15:39,440
investigations uh you know and

455
00:15:41,030 --> 00:15:40,639
especially in the number that i have

456
00:15:43,910 --> 00:15:41,040
done

457
00:15:45,030 --> 00:15:43,920
you know first going out in the fields

458
00:15:47,189 --> 00:15:45,040
walking and seeing

459
00:15:49,430 --> 00:15:47,199
you know the like maybe ground evidence

460
00:15:51,189 --> 00:15:49,440
or something of that nature

461
00:15:53,670 --> 00:15:51,199
something's there i've i've seen a lot

462
00:15:57,430 --> 00:15:53,680
of things that it basically convinced me

463
00:16:00,310 --> 00:15:57,440

that that there's something real uh in

464

00:16:01,910 --> 00:16:00,320

my aha moment was not my own observation

465

00:16:05,189 --> 00:16:01,920

because i really haven't had any

466

00:16:06,870 --> 00:16:05,199

uh at all and uh but i

467

00:16:09,189 --> 00:16:06,880

i have i'll tell you one in a minute

468

00:16:11,110 --> 00:16:09,199

here but but when you go out and you

469

00:16:12,069 --> 00:16:11,120

actually do an investigation on the case

470

00:16:14,870 --> 00:16:12,079

where there were a lot

471

00:16:16,310 --> 00:16:14,880

ufo activity the night before and this

472

00:16:17,990 --> 00:16:16,320

farmer happens to come out

473

00:16:19,910 --> 00:16:18,000

and looking at his wheat field in the

474

00:16:22,629 --> 00:16:19,920

middle of the wheat field

475

00:16:24,629 --> 00:16:22,639

there's a 70 diameter circular area

476

00:16:27,110 --> 00:16:24,639

where there's no wheat anymore

477

00:16:27,990 --> 00:16:27,120

uh and that he finds that the next

478

00:16:29,829 --> 00:16:28,000

morning

479

00:16:31,509 --> 00:16:29,839

and then we have a team that goes out

480

00:16:35,189 --> 00:16:31,519

and does the analysis of that

481

00:16:37,670 --> 00:16:35,199

in in and we we find in the

482

00:16:38,389 --> 00:16:37,680

if you were in this area and this

483

00:16:41,509 --> 00:16:38,399

there's no

484

00:16:44,310 --> 00:16:41,519

roots uh that are remaining uh

485

00:16:45,030 --> 00:16:44,320

of the wheat and as you there's a

486

00:16:47,910 --> 00:16:45,040

depression

487

00:16:49,350 --> 00:16:47,920

in the center of the wheat crop

488

00:16:50,389 --> 00:16:49,360

indicating that there was like something

489

00:16:53,509 --> 00:16:50,399

that was heavy that was

490

00:16:55,509 --> 00:16:53,519

pressing down on oil and then it

491

00:16:57,829 --> 00:16:55,519

then as you progressively move out in

492

00:16:59,749 --> 00:16:57,839

any direction from that center point

493

00:17:01,269 --> 00:16:59,759

center point when let's say you get out

494

00:17:04,230 --> 00:17:01,279

to about 65

495

00:17:07,029 --> 00:17:04,240

uh you know or like you know might it

496

00:17:09,110 --> 00:17:07,039

might be 65 feet around in that circle

497

00:17:10,710 --> 00:17:09,120

yeah you find that there's a little bit

498

00:17:12,230 --> 00:17:10,720

of the roots that are still remaining

499

00:17:12,949 --> 00:17:12,240

and then maybe a stubble above the

500

00:17:14,470 --> 00:17:12,959

ground

501
00:17:16,470 --> 00:17:14,480
and then you get a bit further out you

502
00:17:18,470 --> 00:17:16,480
see a rotational pattern of the wheat

503
00:17:19,669 --> 00:17:18,480
and then you see puffed wheat around the

504
00:17:22,630 --> 00:17:19,679
entire 70 foot

505
00:17:23,669 --> 00:17:22,640
in diameter area now you're standing in

506
00:17:25,750 --> 00:17:23,679
the middle of this

507
00:17:26,949 --> 00:17:25,760
you get there's microwave radiation

508
00:17:30,470 --> 00:17:26,959
you're detecting

509
00:17:31,350 --> 00:17:30,480
right and you're saying what does that

510
00:17:33,190 --> 00:17:31,360
in the middle

511
00:17:35,270 --> 00:17:33,200
and there's no indication of some heavy

512
00:17:36,789 --> 00:17:35,280
equipment coming in from you know

513
00:17:38,310 --> 00:17:36,799

the rest of the wheat is all still

514

00:17:41,510 --> 00:17:38,320

standing right yeah

515

00:17:43,909 --> 00:17:41,520

so what does that right

516

00:17:45,669 --> 00:17:43,919

and you know how could you even contrive

517

00:17:49,110 --> 00:17:45,679

that you know if i wanted to call it

518

00:17:52,390 --> 00:17:49,120

something like that so to me that's like

519

00:17:55,350 --> 00:17:52,400

an aha moment where i could say yes

520

00:17:56,310 --> 00:17:55,360

there's something to this right sure

521

00:17:59,430 --> 00:17:56,320

that's

522

00:18:01,510 --> 00:17:59,440

my name i've been out on many nights

523

00:18:02,630 --> 00:18:01,520

trying to look for them haven't seen

524

00:18:06,230 --> 00:18:02,640

anything

525

00:18:09,669 --> 00:18:06,240

i did have an experience in october of

526

00:18:11,430 --> 00:18:09,679

2012 uh where i was going into work

527

00:18:13,750 --> 00:18:11,440

one morning and i suddenly started

528

00:18:15,669 --> 00:18:13,760

getting phone calls here in huntsville

529

00:18:17,029 --> 00:18:15,679

about an object that was up in the in

530

00:18:18,950 --> 00:18:17,039

the sky and i i

531

00:18:21,029 --> 00:18:18,960

had them direct me to where it was it

532

00:18:22,310 --> 00:18:21,039

was a very sunny day

533

00:18:24,310 --> 00:18:22,320

and i happened to be looking up in the

534

00:18:26,230 --> 00:18:24,320

sky and and i saw

535

00:18:27,350 --> 00:18:26,240

an object that was up there that was

536

00:18:29,430 --> 00:18:27,360

very bright

537

00:18:31,430 --> 00:18:29,440

and then it would go dark and then would

538

00:18:33,270 --> 00:18:31,440

come back being bright

539

00:18:34,470 --> 00:18:33,280

dark right and kept going through this

540

00:18:36,950 --> 00:18:34,480

kind of thing i kept

541

00:18:37,750 --> 00:18:36,960

what is that you know and it's got a you

542

00:18:40,870 --> 00:18:37,760

know

543

00:18:44,150 --> 00:18:40,880

typical star would be the

544

00:18:47,270 --> 00:18:44,160

serious or some very bright star

545

00:18:48,710 --> 00:18:47,280

right and what was causing it to do that

546

00:18:51,669 --> 00:18:48,720

i couldn't make it out

547

00:18:53,430 --> 00:18:51,679

i then uh when i got to work one of my

548

00:18:55,430 --> 00:18:53,440

colleagues said did you happen to see

549

00:18:57,990 --> 00:18:55,440

the cylinder that took off from

550

00:18:58,950 --> 00:18:58,000

like the uh you know cylindrical object

551
00:19:00,150 --> 00:18:58,960
you know he said

552
00:19:02,150 --> 00:19:00,160
i said no i didn't know it was

553
00:19:04,549 --> 00:19:02,160
cylindrical so

554
00:19:05,909 --> 00:19:04,559
being the fact that i was uh that was i

555
00:19:09,110 --> 00:19:05,919
was the state director

556
00:19:11,029 --> 00:19:09,120
for mufon i started following in the

557
00:19:12,789 --> 00:19:11,039
mufon database

558
00:19:14,710 --> 00:19:12,799
to see if any additional sightings were

559
00:19:17,669 --> 00:19:14,720
coming up of a cylinder right

560
00:19:18,549 --> 00:19:17,679
yeah and so i tracked for the next four

561
00:19:21,669 --> 00:19:18,559
days

562
00:19:22,710 --> 00:19:21,679
a cylinder that moved from huntsville

563
00:19:25,830 --> 00:19:22,720

alabama

564

00:19:28,789 --> 00:19:25,840
up into tennessee up toward the

565

00:19:30,150 --> 00:19:28,799
bristol state la the uh bristol city

566

00:19:32,070 --> 00:19:30,160
area which is a

567

00:19:34,150 --> 00:19:32,080
half of it's in virginia and the other

568

00:19:36,470 --> 00:19:34,160
half is in tennessee

569

00:19:37,190 --> 00:19:36,480
right and then so i followed it up

570

00:19:40,470 --> 00:19:37,200
through uh

571

00:19:42,390 --> 00:19:40,480
virginia and then it into ohio

572

00:19:45,510 --> 00:19:42,400
and you could watch it and it turned out

573

00:19:47,669 --> 00:19:45,520
to be the google loon balloon

574

00:19:49,110 --> 00:19:47,679
it was a they were testing and it was a

575

00:19:51,590 --> 00:19:49,120
steeper project

576
00:19:52,950 --> 00:19:51,600
to be able to test providing internet

577
00:19:55,909 --> 00:19:52,960
using balloons

578
00:19:58,230 --> 00:19:55,919
right and so this was a test that was

579
00:20:00,950 --> 00:19:58,240
being done it was an i guess a nasa

580
00:20:02,710 --> 00:20:00,960
release here where i'm at in huntsville

581
00:20:03,909 --> 00:20:02,720
uh we have the marshall space flight

582
00:20:07,029 --> 00:20:03,919
center and i work at

583
00:20:08,870 --> 00:20:07,039
course redstone arsenal but yeah uh

584
00:20:10,070 --> 00:20:08,880
anyway that was a test flight of that

585
00:20:12,149 --> 00:20:10,080
google and it was secret

586
00:20:14,630 --> 00:20:12,159
so they didn't report it and actually

587
00:20:15,190 --> 00:20:14,640
google was tracking it by ufo reports as

588
00:20:17,430 --> 00:20:15,200

well

589

00:20:18,470 --> 00:20:17,440

you know they were tracking your balloon

590

00:20:21,430 --> 00:20:18,480

so

591

00:20:23,190 --> 00:20:21,440

anyway that's as close as i've come to

592

00:20:24,789 --> 00:20:23,200

my own observation and i couldn't figure

593

00:20:26,789 --> 00:20:24,799

out what it was at first and it took me

594

00:20:29,029 --> 00:20:26,799

a while to be able to investigate it

595

00:20:30,710 --> 00:20:29,039

that was that's yeah i can see why that

596

00:20:31,830 --> 00:20:30,720

would cause quite the uproar across the

597

00:20:33,990 --> 00:20:31,840

community and over

598

00:20:35,750 --> 00:20:34,000

very various nights and stuff there's a

599

00:20:37,029 --> 00:20:35,760

blue that was actually just making its

600

00:20:39,510 --> 00:20:37,039

way through the wind

601
00:20:40,230 --> 00:20:39,520
and made its way up into eventually into

602
00:20:44,789 --> 00:20:40,240
canada where

603
00:20:47,430 --> 00:20:44,799
it came out that's there that's crazy

604
00:20:48,070 --> 00:20:47,440
um moving on let's um this is something

605
00:20:51,510 --> 00:20:48,080
that people

606
00:20:53,190 --> 00:20:51,520
always always ask me about and

607
00:20:54,630 --> 00:20:53,200
uh well there's no easier way to say

608
00:20:58,549 --> 00:20:54,640
than are you aware

609
00:21:01,909 --> 00:20:58,559
of the patterns of salvatore pie

610
00:21:03,669 --> 00:21:01,919
yes and this seems this is why i keep

611
00:21:05,430 --> 00:21:03,679
getting question people saying well they

612
00:21:07,110 --> 00:21:05,440
they exist because this is what they are

613
00:21:10,630 --> 00:21:07,120

and it you know i

614

00:21:13,830 --> 00:21:10,640

obviously it's not as simple as that um

615

00:21:15,190 --> 00:21:13,840

can you expand on it at all just give a

616

00:21:18,390 --> 00:21:15,200

breakdown of what it is

617

00:21:19,590 --> 00:21:18,400

what it means because people jump from

618

00:21:21,350 --> 00:21:19,600

zero to 100

619

00:21:23,029 --> 00:21:21,360

and think they don't see everything in

620

00:21:26,070 --> 00:21:23,039

between

621

00:21:27,430 --> 00:21:26,080

right and so just to let you know i

622

00:21:29,110 --> 00:21:27,440

kind of started when when he first

623

00:21:32,149 --> 00:21:29,120

started coming out i kept like saying

624

00:21:33,190 --> 00:21:32,159

like what is this why why is this coming

625

00:21:36,070 --> 00:21:33,200

out at this time

626

00:21:37,270 --> 00:21:36,080

is this uh is this disinformation is it

627

00:21:40,789 --> 00:21:37,280

being used

628

00:21:43,830 --> 00:21:40,799

to be able to uh you know basically

629

00:21:45,270 --> 00:21:43,840

uh to kinda like if you would to let the

630

00:21:47,190 --> 00:21:45,280

chinese know that we're looking into

631

00:21:51,830 --> 00:21:47,200

something and

632

00:21:55,270 --> 00:21:51,840

that is that a game that's being played

633

00:21:57,270 --> 00:21:55,280

uh and you know and then i actually was

634

00:21:59,029 --> 00:21:57,280

able to confirm because i'm in the dod i

635

00:22:01,990 --> 00:21:59,039

could actually confirm that there was a

636

00:22:03,110 --> 00:22:02,000

this gentleman is legit yeah and he did

637

00:22:05,350 --> 00:22:03,120

work where he was

638

00:22:06,470 --> 00:22:05,360

and all this other stuff so it's like

639

00:22:08,710 --> 00:22:06,480

you know

640

00:22:09,669 --> 00:22:08,720

and then there's a question of did any

641

00:22:12,390 --> 00:22:09,679

of these things

642

00:22:13,190 --> 00:22:12,400

actually pan out in other words if you

643

00:22:15,830 --> 00:22:13,200

do

644

00:22:17,190 --> 00:22:15,840

you can put something together on paper

645

00:22:19,190 --> 00:22:17,200

and it sounds wonderful

646

00:22:20,230 --> 00:22:19,200

but you know doesn't have anything that

647

00:22:22,630 --> 00:22:20,240

and you know that

648

00:22:23,669 --> 00:22:22,640

legitimate to it you know sure yeah and

649

00:22:25,590 --> 00:22:23,679

so you know

650

00:22:28,149 --> 00:22:25,600

we're tests run to see if there was

651
00:22:29,669 --> 00:22:28,159
actually the capability of creating a

652
00:22:31,990 --> 00:22:29,679
piece uh

653
00:22:33,669 --> 00:22:32,000
polarizable vacuum or something like

654
00:22:36,870 --> 00:22:33,679
that around maybe the craft

655
00:22:38,310 --> 00:22:36,880
using uh microwave transmitters and and

656
00:22:40,789 --> 00:22:38,320
all this other type things

657
00:22:43,270 --> 00:22:40,799
and what what i what i deduced was that

658
00:22:46,390 --> 00:22:43,280
apparently these things didn't work out

659
00:22:48,070 --> 00:22:46,400
uh and and the tests were not

660
00:22:49,990 --> 00:22:48,080
conclusive enough to be able to go

661
00:22:53,029 --> 00:22:50,000
forward

662
00:22:55,190 --> 00:22:53,039
and then later on apparently because of

663
00:22:56,230 --> 00:22:55,200

that the navy pretty much just dropped

664

00:22:58,470 --> 00:22:56,240

it and

665

00:22:59,590 --> 00:22:58,480

apparently i think that the the air

666

00:23:01,750 --> 00:22:59,600

force was actually

667

00:23:04,149 --> 00:23:01,760

going to be picking it up to see if they

668

00:23:07,350 --> 00:23:04,159

could do anything further with it

669

00:23:08,870 --> 00:23:07,360

you know uh and god bless them for going

670

00:23:10,710 --> 00:23:08,880

because that's just r d i mean

671

00:23:11,669 --> 00:23:10,720

scientists will show you different kinds

672

00:23:13,990 --> 00:23:11,679

of things

673

00:23:14,870 --> 00:23:14,000

you know and so you know can you

674

00:23:17,029 --> 00:23:14,880

conceivably

675

00:23:19,430 --> 00:23:17,039

get an effect where you'd be able to

676
00:23:21,830 --> 00:23:19,440
actually do those types of things and

677
00:23:23,750 --> 00:23:21,840
what i i've not i haven't followed it

678
00:23:25,510 --> 00:23:23,760
anymore after the fact that they

679
00:23:27,190 --> 00:23:25,520
initially announced that the tests were

680
00:23:30,470 --> 00:23:27,200
pretty much inclusive

681
00:23:33,110 --> 00:23:30,480
right and and didn't pan out as if

682
00:23:34,310 --> 00:23:33,120
if you would so that's pretty much where

683
00:23:36,950 --> 00:23:34,320
i went with it vinnie

684
00:23:38,470 --> 00:23:36,960
but but you know again it goes back to

685
00:23:42,149 --> 00:23:38,480
uh

686
00:23:45,029 --> 00:23:42,159
is one thing

687
00:23:45,990 --> 00:23:45,039
versus actual scientific research that

688
00:23:47,669 --> 00:23:46,000

you might find

689

00:23:49,669 --> 00:23:47,679

in the in the government that would be

690

00:23:52,870 --> 00:23:49,679

highly classified if you would

691

00:23:53,430 --> 00:23:52,880

sure uh and so uh there could have been

692

00:23:57,830 --> 00:23:53,440

a

693

00:24:00,950 --> 00:23:57,840

it i don't know

694

00:24:01,590 --> 00:24:00,960

uh that that that is a strategy that the

695

00:24:03,909 --> 00:24:01,600

dod

696

00:24:04,870 --> 00:24:03,919

probably could use to be able to throw

697

00:24:07,990 --> 00:24:04,880

people off

698

00:24:10,310 --> 00:24:08,000

or other countries uh and you know

699

00:24:11,510 --> 00:24:10,320

and and we already have a problem in the

700

00:24:13,510 --> 00:24:11,520

sense that

701
00:24:14,630 --> 00:24:13,520
we we know that the chinese are stealing

702
00:24:17,269 --> 00:24:14,640
our r d

703
00:24:18,870 --> 00:24:17,279
anyway uh and suddenly that you know

704
00:24:19,190 --> 00:24:18,880
that's that explains why you suddenly

705
00:24:21,350 --> 00:24:19,200
see

706
00:24:24,149 --> 00:24:21,360
an american design for a drone suddenly

707
00:24:26,549 --> 00:24:24,159
being over the chinese inventory

708
00:24:28,470 --> 00:24:26,559
so uh we do have adversaries that are

709
00:24:29,110 --> 00:24:28,480
trying to ping us from a cyber security

710
00:24:32,310 --> 00:24:29,120
standpoint

711
00:24:32,630 --> 00:24:32,320
all the time and and we do know that

712
00:24:39,830 --> 00:24:32,640
that

713
00:24:41,590 --> 00:24:39,840

thing the reason why

714

00:24:43,029 --> 00:24:41,600

again where i asked about the the pi

715

00:24:44,710 --> 00:24:43,039

patterns is because

716

00:24:47,029 --> 00:24:44,720

i think too many people see a pattern

717

00:24:49,669 --> 00:24:47,039

and they they just see it as

718

00:24:51,430 --> 00:24:49,679

it's real it exists yeah and it's flying

719

00:24:54,630 --> 00:24:51,440

above our heads and that's it

720

00:24:56,310 --> 00:24:54,640

you know i've seen it oh man

721

00:24:58,149 --> 00:24:56,320

and i don't want to be the one to try

722

00:24:59,830 --> 00:24:58,159

and burst their bubble because they're

723

00:25:03,269 --> 00:24:59,840

so sure fire that a pattern

724

00:25:04,630 --> 00:25:03,279

means we have it and it's good to hear

725

00:25:06,470 --> 00:25:04,640

it from somebody

726

00:25:08,549 --> 00:25:06,480

you know who is it more probably more in

727

00:25:11,029 --> 00:25:08,559

the know than i am let's say

728

00:25:12,549 --> 00:25:11,039

if you go into the actual trademark or

729

00:25:12,789 --> 00:25:12,559

the patent and trademark office you'll

730

00:25:15,750 --> 00:25:12,799

see

731

00:25:17,750 --> 00:25:15,760

all kinds of designs over the history of

732

00:25:21,190 --> 00:25:17,760

people that have submitted patents for

733

00:25:21,909 --> 00:25:21,200

all kinds of wild crazy designs of ufos

734

00:25:24,630 --> 00:25:21,919

i mean

735

00:25:25,190 --> 00:25:24,640

or or things that will be anti-gravity

736

00:25:26,870 --> 00:25:25,200

or whatever

737

00:25:28,470 --> 00:25:26,880

but again if you don't put it on the

738

00:25:29,430 --> 00:25:28,480

drawing board and you actually test it

739

00:25:31,269 --> 00:25:29,440

and conducts

740

00:25:32,870 --> 00:25:31,279

you know i mean then it it just falls

741

00:25:34,070 --> 00:25:32,880

out absolutely

742

00:25:35,990 --> 00:25:34,080

i know that's the thing there's been

743

00:25:37,029 --> 00:25:36,000

triangles and all sorts of weird and

744

00:25:38,950 --> 00:25:37,039

wonderful craft

745

00:25:40,390 --> 00:25:38,960

yes that just keep cropping up across

746

00:25:42,230 --> 00:25:40,400

social media with people going

747

00:25:43,590 --> 00:25:42,240

i've we found it we you know it's it's

748

00:25:46,710 --> 00:25:43,600

the government

749

00:25:49,110 --> 00:25:46,720

like no it really doesn't mean that

750

00:25:50,549 --> 00:25:49,120

but yeah anyway thank you for clarifying

751

00:25:51,669 --> 00:25:50,559

that so i'm just trying to get my notes

752

00:25:54,149 --> 00:25:51,679

up i think the

753

00:25:56,549 --> 00:25:54,159

one of the big things that um i've been

754

00:25:58,549 --> 00:25:56,559

very interested in is obviously the 2004

755

00:26:00,630 --> 00:25:58,559

nimitz case and of course

756

00:26:01,909 --> 00:26:00,640

the scu paper is one of the most

757

00:26:04,310 --> 00:26:01,919

in-depth studies

758

00:26:05,909 --> 00:26:04,320

analysis using all sorts of science

759

00:26:07,110 --> 00:26:05,919

mathematics and everything

760

00:26:08,950 --> 00:26:07,120

are you able to talk us through the

761

00:26:10,549 --> 00:26:08,960

process from when you first started

762

00:26:11,029 --> 00:26:10,559

looking at the case to how it came

763

00:26:13,029 --> 00:26:11,039

through

764

00:26:14,470 --> 00:26:13,039

all the way to that that paper being

765

00:26:17,830 --> 00:26:14,480

released

766

00:26:20,230 --> 00:26:17,840

i'd be glad to uh robert powell was

767

00:26:22,870 --> 00:26:20,240

the the first one uh to be able to get

768

00:26:26,149 --> 00:26:22,880

engaged he had seen apparently or

769

00:26:28,630 --> 00:26:26,159

somehow notice that article by paco

770

00:26:29,269 --> 00:26:28,640

chichiri i'm not sure if i'm saying that

771

00:26:32,630 --> 00:26:29,279

right but

772

00:26:35,830 --> 00:26:32,640

sounds okay paco had written an article

773

00:26:38,070 --> 00:26:35,840

and and then as he started uh robert

774

00:26:41,190 --> 00:26:38,080

powell started to dive into it

775

00:26:43,110 --> 00:26:41,200

uh he started to get more information

776

00:26:45,430 --> 00:26:43,120

that it might be a legitimate

777

00:26:46,549 --> 00:26:45,440

kind of like incident and something that

778

00:26:49,830 --> 00:26:46,559

we could we could

779

00:26:53,110 --> 00:26:49,840

start to look into so hats off to

780

00:26:55,669 --> 00:26:53,120

robert for his uh is his initial push

781

00:26:56,630 --> 00:26:55,679

into getting that information absolutely

782

00:26:59,430 --> 00:26:56,640

doing that

783

00:27:00,710 --> 00:26:59,440

and then what that did was it you know

784

00:27:03,510 --> 00:27:00,720

started to lead into

785

00:27:04,789 --> 00:27:03,520

also doing other kinds of what they call

786

00:27:06,630 --> 00:27:04,799

foia requests

787

00:27:07,990 --> 00:27:06,640

to be able to get additional information

788

00:27:10,390 --> 00:27:08,000

and so uh

789

00:27:11,110 --> 00:27:10,400

robert was actually doing a whole lot of

790

00:27:13,990 --> 00:27:11,120

those

791

00:27:14,870 --> 00:27:14,000

requests to be able to get more data and

792

00:27:17,430 --> 00:27:14,880

uh

793

00:27:18,230 --> 00:27:17,440

then a number of us we started to form a

794

00:27:20,470 --> 00:27:18,240

team

795

00:27:22,549 --> 00:27:20,480

to where we started to look into it from

796

00:27:25,750 --> 00:27:22,559

our different perspectives and so

797

00:27:27,990 --> 00:27:25,760

like i i started helping in in a certain

798

00:27:30,070 --> 00:27:28,000

context to be able to go out and get

799

00:27:32,710 --> 00:27:30,080

like dod related kind of information

800

00:27:34,630 --> 00:27:32,720

because of my connection that way

801
00:27:36,710 --> 00:27:34,640
i started to help put some of the

802
00:27:40,789 --> 00:27:36,720
information together about the

803
00:27:43,669 --> 00:27:40,799
you know the vfa 41 the the black aces

804
00:27:46,070 --> 00:27:43,679
and some other kinds of information uh i

805
00:27:46,630 --> 00:27:46,080
also started to engage people on social

806
00:27:49,110 --> 00:27:46,640
media

807
00:27:50,789 --> 00:27:49,120
we happen to find a princeton believe it

808
00:27:53,990 --> 00:27:50,799
or not facebook page

809
00:27:55,190 --> 00:27:54,000
and uh and we made connections uh early

810
00:27:58,230 --> 00:27:55,200
on with that

811
00:27:58,870 --> 00:27:58,240
and and then got a hold of kevin day and

812
00:28:01,830 --> 00:27:58,880
then

813
00:28:03,590 --> 00:28:01,840

kevin day was a the senior officer

814

00:28:06,230 --> 00:28:03,600

aboard the uh the princeton

815

00:28:07,269 --> 00:28:06,240

was able to help then connect us to gary

816

00:28:10,149 --> 00:28:07,279

voorhees

817

00:28:11,350 --> 00:28:10,159

to jason turner and a whole bunch of

818

00:28:15,029 --> 00:28:11,360

other people

819

00:28:17,750 --> 00:28:15,039

uh and then we also then there's overall

820

00:28:18,710 --> 00:28:17,760

18 people that we interviewed for that

821

00:28:21,990 --> 00:28:18,720

report

822

00:28:26,149 --> 00:28:22,000

uh we actually got lieutenant commander

823

00:28:29,029 --> 00:28:26,159

slate uh to an interview

824

00:28:30,870 --> 00:28:29,039

and that was the first time that i mean

825

00:28:32,470 --> 00:28:30,880

that basically anybody had even they

826

00:28:34,149 --> 00:28:32,480

didn't even know about him until we put

827

00:28:35,590 --> 00:28:34,159

that report together yeah i've actually

828

00:28:37,190 --> 00:28:35,600

got a couple of questions about that

829

00:28:38,630 --> 00:28:37,200

statement that slate put out maybe we'll

830

00:28:41,269 --> 00:28:38,640

get to that after you yeah

831

00:28:42,870 --> 00:28:41,279

but i mean so in our interviews with

832

00:28:44,870 --> 00:28:42,880

these people and we recorded the

833

00:28:46,710 --> 00:28:44,880

interviews uh and we were able to get a

834

00:28:49,830 --> 00:28:46,720

lot of good details

835

00:28:51,990 --> 00:28:49,840

about the the overall incident of course

836

00:28:53,190 --> 00:28:52,000

uh commander fraber was you know being

837

00:28:56,549 --> 00:28:53,200

open about his

838

00:28:59,029 --> 00:28:56,559

uh his encounter and what he experienced

839

00:29:00,470 --> 00:28:59,039

yeah we could add that into it and then

840

00:29:03,190 --> 00:29:00,480

uh you had

841

00:29:04,230 --> 00:29:03,200

obviously like later on underwood it

842

00:29:07,510 --> 00:29:04,240

became known

843

00:29:10,230 --> 00:29:07,520

uh and you had uh you know kirth

844

00:29:12,789 --> 00:29:10,240

on the the marine side who was actually

845

00:29:16,149 --> 00:29:12,799

engaging in the red blue exercise

846

00:29:16,549 --> 00:29:16,159

he was he was and so he had originally

847

00:29:18,230 --> 00:29:16,559

seen

848

00:29:20,549 --> 00:29:18,240

the the bubbles in the water from an

849

00:29:22,470 --> 00:29:20,559

object that was underneath it he didn't

850

00:29:24,630 --> 00:29:22,480

see the tic tac but he actually saw

851
00:29:26,630 --> 00:29:24,640
some object below the water yeah and

852
00:29:28,149 --> 00:29:26,640
that was before fraver and that had been

853
00:29:29,909 --> 00:29:28,159
triangulated out that way isn't it he

854
00:29:32,710 --> 00:29:29,919
was the first to see anything

855
00:29:34,710 --> 00:29:32,720
yes he was he was the initial uh party

856
00:29:37,510 --> 00:29:34,720
to be able to say that he saw this

857
00:29:39,269 --> 00:29:37,520
this uh object uh so you have all these

858
00:29:40,070 --> 00:29:39,279
different parties and players aboard

859
00:29:42,070 --> 00:29:40,080
these ships

860
00:29:44,070 --> 00:29:42,080
and then you had later on you know you

861
00:29:47,110 --> 00:29:44,080
actually had the uh the hawkkeye

862
00:29:48,549 --> 00:29:47,120
uh the people that were talking uh we

863
00:29:50,470 --> 00:29:48,559

were trying to find out

864

00:29:52,389 --> 00:29:50,480

from that standpoint because they're you

865

00:29:54,549 --> 00:29:52,399

know the when the navy

866

00:29:56,310 --> 00:29:54,559

when the navy does it's like they dock

867

00:29:57,669 --> 00:29:56,320

and then they get all this new equipment

868

00:30:00,310 --> 00:29:57,679

and then they take it out for these

869

00:30:02,230 --> 00:30:00,320

training exercises and tests

870

00:30:03,430 --> 00:30:02,240

they go through these different stages

871

00:30:06,310 --> 00:30:03,440

uh various

872

00:30:07,110 --> 00:30:06,320

uh ships and things like that are are

873

00:30:09,909 --> 00:30:07,120

with them

874

00:30:10,549 --> 00:30:09,919

and we weren't sure at the point uh we

875

00:30:14,230 --> 00:30:10,559

were

876

00:30:16,549 --> 00:30:14,240

about that this happened in

877

00:30:17,830 --> 00:30:16,559

uh we came to later learned that you

878

00:30:20,310 --> 00:30:17,840

know two of the

879

00:30:22,310 --> 00:30:20,320

these ships were not anywhere near them

880

00:30:25,269 --> 00:30:22,320

that they were actually at ports

881

00:30:25,669 --> 00:30:25,279

uh and so it wasn't the complete carrier

882

00:30:28,789 --> 00:30:25,679

group

883

00:30:30,789 --> 00:30:28,799

that was the same and so that's

884

00:30:31,909 --> 00:30:30,799

that was another thing we learned over a

885

00:30:34,230 --> 00:30:31,919

period time

886

00:30:35,990 --> 00:30:34,240

to say like you know hey is the hicks

887

00:30:39,510 --> 00:30:36,000

was the hicks there was chaffey

888

00:30:40,070 --> 00:30:39,520

there uh and so again you know no they

889

00:30:42,389 --> 00:30:40,080

weren't

890

00:30:43,430 --> 00:30:42,399

at this particular time they were uh

891

00:30:45,830 --> 00:30:43,440

they were

892

00:30:47,590 --> 00:30:45,840

i guess ports uh and then they came

893

00:30:49,110 --> 00:30:47,600

later on to be able to join what they

894

00:30:52,230 --> 00:30:49,120

call the com2x

895

00:30:54,549 --> 00:30:52,240

exercise uh but anyway so

896

00:30:56,149 --> 00:30:54,559

you know we we learned that and then we

897

00:30:59,590 --> 00:30:56,159

then what we did

898

00:31:01,190 --> 00:30:59,600

was try to take and pull a team together

899

00:31:03,269 --> 00:31:01,200

to be able to look at uh

900

00:31:05,990 --> 00:31:03,279

at multiple ways you can determine

901
00:31:08,230 --> 00:31:06,000
things like acceleration of the object

902
00:31:09,110 --> 00:31:08,240
uh in other words where what were the

903
00:31:11,750 --> 00:31:09,120
instances where

904
00:31:12,310 --> 00:31:11,760
acceleration could be determined well

905
00:31:16,870 --> 00:31:12,320
you know

906
00:31:19,590 --> 00:31:16,880
about the fact that the

907
00:31:21,669 --> 00:31:19,600
that he had measured uh that the objects

908
00:31:25,029 --> 00:31:21,679
dropped from like a 20 000

909
00:31:26,389 --> 00:31:25,039
feet altitude down to sea level

910
00:31:28,149 --> 00:31:26,399
and at first that a lot of that

911
00:31:30,149 --> 00:31:28,159
information was confusing because it

912
00:31:31,350 --> 00:31:30,159
you know the object was initially at 80

913
00:31:33,590 --> 00:31:31,360

000 feet

914

00:31:34,870 --> 00:31:33,600

it dropped down to twenty eight thousand

915

00:31:36,710 --> 00:31:34,880

or twenty thousand feet

916

00:31:38,870 --> 00:31:36,720

that's right you know and then there was

917

00:31:42,149 --> 00:31:38,880

a twenty thousand foot two

918

00:31:46,070 --> 00:31:42,159

uh ocean or sea level you know

919

00:31:48,230 --> 00:31:46,080

uh and so there was a lot of you know

920

00:31:49,830 --> 00:31:48,240

confusion about that but anyway we we

921

00:31:50,470 --> 00:31:49,840

took the analysis where we said well

922

00:31:53,110 --> 00:31:50,480

wait a minute

923

00:31:54,070 --> 00:31:53,120

okay he says it dropped from 28 000 feet

924

00:31:56,310 --> 00:31:54,080

uh to

925

00:31:57,430 --> 00:31:56,320

the sea level in point seven eight

926
00:31:59,509 --> 00:31:57,440
seconds so that's

927
00:32:00,630 --> 00:31:59,519
like you know not even one second right

928
00:32:03,029 --> 00:32:00,640
sure so

929
00:32:04,230 --> 00:32:03,039
if we took an object that was comparable

930
00:32:07,669 --> 00:32:04,240
to the size

931
00:32:09,350 --> 00:32:07,679
and possibly the weight of the of the

932
00:32:11,430 --> 00:32:09,360
tic-tac

933
00:32:12,549 --> 00:32:11,440
then that would be probably equivalent

934
00:32:16,149 --> 00:32:12,559
of an f-18

935
00:32:18,710 --> 00:32:16,159
so let's go the mass of an f18

936
00:32:20,870 --> 00:32:18,720
and let's compute compare that right and

937
00:32:23,909 --> 00:32:20,880
then you have a problem that if in

938
00:32:26,149 --> 00:32:23,919

0.78 seconds think about it when we

939

00:32:28,630 --> 00:32:26,159

we accelerate to a certain speed and

940

00:32:30,950 --> 00:32:28,640

then we have to break of course

941

00:32:32,070 --> 00:32:30,960

no okay so there's is it a parabolic

942

00:32:32,549 --> 00:32:32,080

kind of curve that we're going to be

943

00:32:35,509 --> 00:32:32,559

doing

944

00:32:35,990 --> 00:32:35,519

or is it an instantaneous up down uh you

945

00:32:38,070 --> 00:32:36,000

know and

946

00:32:39,750 --> 00:32:38,080

so we tried to like figure that is it

947

00:32:41,590 --> 00:32:39,760

you know how is that acceleration and

948

00:32:44,630 --> 00:32:41,600

deceleration happening

949

00:32:47,750 --> 00:32:44,640

uh and then if you applied the uh

950

00:32:49,110 --> 00:32:47,760

again a similar weight of an f-18 is

951
00:32:51,750 --> 00:32:49,120
being that

952
00:32:53,590 --> 00:32:51,760
used what would that give you in terms

953
00:32:55,430 --> 00:32:53,600
of its kinetic power

954
00:32:57,029 --> 00:32:55,440
output what would it give you in terms

955
00:32:58,470 --> 00:32:57,039
of its acceleration

956
00:33:00,549 --> 00:32:58,480
what would give you in terms of the

957
00:33:03,669 --> 00:33:00,559
velocity and so

958
00:33:05,110 --> 00:33:03,679
we we then computed it and we also did a

959
00:33:07,830 --> 00:33:05,120
another computation

960
00:33:08,389 --> 00:33:07,840
we said what happens if it's six seconds

961
00:33:12,470 --> 00:33:08,399
not

962
00:33:15,590 --> 00:33:12,480
looked at it from

963
00:33:18,149 --> 00:33:15,600

six seconds and what would it be

964

00:33:20,230 --> 00:33:18,159

and then even in six seconds it's way

965

00:33:22,950 --> 00:33:20,240

beyond

966

00:33:23,990 --> 00:33:22,960

it would survive the the the object

967

00:33:25,430 --> 00:33:24,000

would break apart

968

00:33:27,350 --> 00:33:25,440

if it you know if you think about the

969

00:33:30,470 --> 00:33:27,360

materials that we have

970

00:33:32,230 --> 00:33:30,480

yeah like an f-18 at that speed it would

971

00:33:33,750 --> 00:33:32,240

disintegrate you know and then if you

972

00:33:34,710 --> 00:33:33,760

had a pilot in it he'd be a puddle on

973

00:33:37,430 --> 00:33:34,720

the bottom of the floor

974

00:33:39,350 --> 00:33:37,440

right you know i mean you're talking

975

00:33:41,830 --> 00:33:39,360

about speeds in excess of

976
00:33:43,350 --> 00:33:41,840
anything that we typically know of and

977
00:33:45,750 --> 00:33:43,360
at the same time

978
00:33:47,029 --> 00:33:45,760
you don't have any sonic boom you have

979
00:33:50,070 --> 00:33:47,039
the kinetic power

980
00:33:52,630 --> 00:33:50,080
output equivalent to like the hoover dam

981
00:33:53,110 --> 00:33:52,640
yeah you've got uh you know you've got

982
00:33:54,710 --> 00:33:53,120
uh

983
00:33:56,310 --> 00:33:54,720
speeds in excess of like you know a

984
00:33:59,909 --> 00:33:56,320
hundred thousand

985
00:34:01,669 --> 00:33:59,919
possibly uh miles per uh per hour or a

986
00:34:03,590 --> 00:34:01,679
kilo

987
00:34:05,110 --> 00:34:03,600
you know so i mean what i'm trying to

988
00:34:06,870 --> 00:34:05,120

say is that i can't remember exact

989

00:34:09,030 --> 00:34:06,880

measures but it's in our report

990

00:34:11,190 --> 00:34:09,040

but i mean you get this tremendous

991

00:34:11,829 --> 00:34:11,200

amount of speed acceleration and stuff

992

00:34:16,550 --> 00:34:11,839

that

993

00:34:18,149 --> 00:34:16,560

it it's like the inertial forces and the

994

00:34:21,190 --> 00:34:18,159

g-forces so

995

00:34:21,750 --> 00:34:21,200

yeah so now and what we did is we did it

996

00:34:23,829 --> 00:34:21,760

for

997

00:34:25,430 --> 00:34:23,839

like that experience but then there was

998

00:34:26,629 --> 00:34:25,440

another time you could measure it and

999

00:34:29,349 --> 00:34:26,639

that was when it

1000

00:34:29,990 --> 00:34:29,359

left fravor and went to the cap point

1001
00:34:32,230 --> 00:34:30,000
right

1002
00:34:33,190 --> 00:34:32,240
so now we actually measured the speed

1003
00:34:35,190 --> 00:34:33,200
again

1004
00:34:36,550 --> 00:34:35,200
at that point until going to the cap

1005
00:34:38,629 --> 00:34:36,560
point and stopping

1006
00:34:39,990 --> 00:34:38,639
well how long did that take and how many

1007
00:34:42,629 --> 00:34:40,000
miles was it

1008
00:34:43,589 --> 00:34:42,639
but can you and then again it exceeded

1009
00:34:48,389 --> 00:34:43,599
anything that we

1010
00:34:51,589 --> 00:34:48,399
we've got and by a lot quite a lot

1011
00:34:54,310 --> 00:34:51,599
that was taken by uh you know underwood

1012
00:34:54,950 --> 00:34:54,320
uh in the the next group that was taking

1013
00:34:56,950 --> 00:34:54,960

off

1014

00:34:58,390 --> 00:34:56,960

yeah and you take a look at the video

1015

00:35:00,950 --> 00:34:58,400

which is uh you know

1016

00:35:01,990 --> 00:35:00,960

it switches between thermal and you know

1017

00:35:05,109 --> 00:35:02,000

uh the regular

1018

00:35:06,870 --> 00:35:05,119

visible range but i mean you can then

1019

00:35:08,230 --> 00:35:06,880

take a look at that and we were able to

1020

00:35:12,150 --> 00:35:08,240

measure the speed there

1021

00:35:13,990 --> 00:35:12,160

and again you know the again the speed

1022

00:35:15,430 --> 00:35:14,000

would have been in excess of anything

1023

00:35:18,470 --> 00:35:15,440

that we've got so

1024

00:35:20,150 --> 00:35:18,480

you've got three different types of

1025

00:35:21,910 --> 00:35:20,160

measurements so i mean three different

1026

00:35:24,069 --> 00:35:21,920

parts of that whole encounter

1027

00:35:25,750 --> 00:35:24,079

that it is it's exceeding anything that

1028

00:35:28,829 --> 00:35:25,760

we've got in our inventory

1029

00:35:29,990 --> 00:35:28,839

absolutely yeah absolutely and i think

1030

00:35:31,589 --> 00:35:30,000

what

1031

00:35:33,109 --> 00:35:31,599

there's always people out there on

1032

00:35:35,109 --> 00:35:33,119

social media and things like that who

1033

00:35:36,790 --> 00:35:35,119

want to really break it down and

1034

00:35:38,630 --> 00:35:36,800

try and debunk it and all that kind of

1035

00:35:40,069 --> 00:35:38,640

stuff and i think what's been really

1036

00:35:43,510 --> 00:35:40,079

showing especially in the last couple of

1037

00:35:45,349 --> 00:35:43,520

days is a statement that jim slate made

1038

00:35:47,589 --> 00:35:45,359

and it puts his time scale within a kind

1039

00:35:49,109 --> 00:35:47,599

of half an hour period

1040

00:35:50,069 --> 00:35:49,119

but then you think about fraver who's

1041

00:35:51,430 --> 00:35:50,079

kind of always talked about a

1042

00:35:52,950 --> 00:35:51,440

five-minute period

1043

00:35:54,310 --> 00:35:52,960

and then recently you've had alex

1044

00:35:56,390 --> 00:35:54,320

dietrich who's come out talking about a

1045

00:35:56,950 --> 00:35:56,400

10-second period so everyone's jumping

1046

00:35:59,030 --> 00:35:56,960

on this

1047

00:36:01,270 --> 00:35:59,040

well what is it ten seconds five minutes

1048

00:36:02,550 --> 00:36:01,280

longer you know

1049

00:36:04,310 --> 00:36:02,560

is there anything you can say to that

1050

00:36:06,069 --> 00:36:04,320

because i think what we all really do

1051

00:36:07,589 --> 00:36:06,079

know is that time is

1052

00:36:09,430 --> 00:36:07,599

different to everyone and the way that

1053

00:36:12,550 --> 00:36:09,440

they perceive it and everything and

1054

00:36:14,870 --> 00:36:12,560

how vital is that to the investigation

1055

00:36:15,750 --> 00:36:14,880

well again you know i think that uh you

1056

00:36:17,670 --> 00:36:15,760

know

1057

00:36:19,190 --> 00:36:17,680

it's vital that you get accurate facts

1058

00:36:20,950 --> 00:36:19,200

but that's been a very

1059

00:36:22,550 --> 00:36:20,960

much the same problem that you'll run

1060

00:36:25,990 --> 00:36:22,560

across with human

1061

00:36:27,990 --> 00:36:26,000

uh you know anecdotal testimonies yeah

1062

00:36:29,109 --> 00:36:28,000

when i investigated cases of multiple

1063

00:36:32,310 --> 00:36:29,119

witnesses

1064

00:36:33,349 --> 00:36:32,320

uh over the period of my 57 years and

1065

00:36:35,030 --> 00:36:33,359

stuff like that

1066

00:36:37,030 --> 00:36:35,040

you'll always get variants from

1067

00:36:38,950 --> 00:36:37,040

different people i mean

1068

00:36:40,230 --> 00:36:38,960

some people hear better than others some

1069

00:36:43,829 --> 00:36:40,240

people will have better

1070

00:36:45,510 --> 00:36:43,839

visual acuity than others some people

1071

00:36:47,750 --> 00:36:45,520

uh you know can have better

1072

00:36:48,230 --> 00:36:47,760

recollections of times and things like

1073

00:36:50,150 --> 00:36:48,240

that

1074

00:36:52,630 --> 00:36:50,160

and you are talking about an incident

1075

00:36:54,950 --> 00:36:52,640

that occurred you know in 2004

1076
00:36:57,109 --> 00:36:54,960
yeah which is a long time ago right so

1077
00:37:00,630 --> 00:36:57,119
our memory becomes an issue

1078
00:37:01,190 --> 00:37:00,640
in that whole thing and so that's why

1079
00:37:05,109 --> 00:37:01,200
you know

1080
00:37:07,270 --> 00:37:05,119
it's great

1081
00:37:08,230 --> 00:37:07,280
it was a great encounter it's a lot of

1082
00:37:10,150 --> 00:37:08,240
good information

1083
00:37:12,950 --> 00:37:10,160
and this is why scientists tend to want

1084
00:37:16,150 --> 00:37:12,960
to hang around scientific data

1085
00:37:19,190 --> 00:37:16,160
as opposed to human testimony sure

1086
00:37:21,990 --> 00:37:19,200
because human testimony is indeed

1087
00:37:25,109 --> 00:37:22,000
fallible yeah it changes over time it

1088
00:37:29,990 --> 00:37:28,550

exactly i mean so you know we understand

1089

00:37:33,109 --> 00:37:30,000

that that's going to happen

1090

00:37:35,190 --> 00:37:33,119

uh you know that's why you see people on

1091

00:37:35,589 --> 00:37:35,200

death row being released because guess

1092

00:37:37,750 --> 00:37:35,599

what

1093

00:37:39,190 --> 00:37:37,760

you know it wasn't that person after all

1094

00:37:41,589 --> 00:37:39,200

that's on death row

1095

00:37:43,190 --> 00:37:41,599

and we now have evidence like dna that

1096

00:37:44,950 --> 00:37:43,200

comes forward and we can say that no

1097

00:37:47,109 --> 00:37:44,960

that wasn't the individual and

1098

00:37:48,710 --> 00:37:47,119

your memory was long that you know all

1099

00:37:51,589 --> 00:37:48,720

that stuff like that so

1100

00:37:53,190 --> 00:37:51,599

so we have to factor that in uh and we

1101
00:37:53,510 --> 00:37:53,200
try to do that on the nimitz but it's

1102
00:37:56,790 --> 00:37:53,520
still

1103
00:37:59,430 --> 00:37:56,800
a lot of

1104
00:38:01,190 --> 00:37:59,440
great you know evidence if you would

1105
00:38:02,550 --> 00:38:01,200
that helps to support that something

1106
00:38:05,349 --> 00:38:02,560
highly unusual

1107
00:38:06,150 --> 00:38:05,359
did take place and it was definitely an

1108
00:38:08,470 --> 00:38:06,160
object

1109
00:38:10,310 --> 00:38:08,480
whether it was five minutes whether it

1110
00:38:13,270 --> 00:38:10,320
was a few seconds

1111
00:38:15,030 --> 00:38:13,280
uh or something of that nature uh it's

1112
00:38:16,870 --> 00:38:15,040
still an incredible encounter and it

1113
00:38:18,790 --> 00:38:16,880

again it shows

1114

00:38:20,470 --> 00:38:18,800

the same kind of characteristics that

1115

00:38:22,870 --> 00:38:20,480

you have of objects back

1116

00:38:23,910 --> 00:38:22,880

in the even in the early 50s and and the

1117

00:38:26,310 --> 00:38:23,920

late 40s

1118

00:38:27,109 --> 00:38:26,320

you've always had the objects that

1119

00:38:29,589 --> 00:38:27,119

performing

1120

00:38:31,430 --> 00:38:29,599

uh you know like lou elizondo likes to

1121

00:38:33,589 --> 00:38:31,440

talk about the five observables

1122

00:38:35,750 --> 00:38:33,599

sure well that they were performing like

1123

00:38:37,910 --> 00:38:35,760

that back in the 50s you know i mean

1124

00:38:39,430 --> 00:38:37,920

you could stop on a dime you can make 90

1125

00:38:41,910 --> 00:38:39,440

degree turns you don't you know

1126

00:38:43,910 --> 00:38:41,920

break any sound barriers you seem to go

1127

00:38:46,150 --> 00:38:43,920

uh you know you don't heat up

1128

00:38:47,510 --> 00:38:46,160

uh you know going through our atmosphere

1129

00:38:48,790 --> 00:38:47,520

like everything else going at those

1130

00:38:51,750 --> 00:38:48,800

speeds would

1131

00:38:52,950 --> 00:38:51,760

create absolutely yeah yeah you'd see

1132

00:38:54,550 --> 00:38:52,960

that on the flea cameras as well

1133

00:38:56,630 --> 00:38:54,560

wouldn't you yeah red hot white

1134

00:38:59,109 --> 00:38:56,640

sorry black hot white hot it would show

1135

00:39:00,870 --> 00:38:59,119

up it would show up and you you would

1136

00:39:03,349 --> 00:39:00,880

see that kind of like thing

1137

00:39:04,630 --> 00:39:03,359

uh plus you you know you you have

1138

00:39:07,109 --> 00:39:04,640

typical descriptions

1139

00:39:08,310 --> 00:39:07,119

of of objects that don't have any kind

1140

00:39:10,310 --> 00:39:08,320

of like

1141

00:39:12,710 --> 00:39:10,320

there are no wings that are helping to

1142

00:39:14,150 --> 00:39:12,720

keep it up there's no propulsion system

1143

00:39:15,030 --> 00:39:14,160

that's helping to drive the thing

1144

00:39:18,310 --> 00:39:15,040

forward

1145

00:39:20,150 --> 00:39:18,320

uh you know and so what is it and

1146

00:39:22,390 --> 00:39:20,160

that's been consistent all along with

1147

00:39:24,550 --> 00:39:22,400

this phenomenon absolutely no

1148

00:39:25,990 --> 00:39:24,560

thank you so much for that and i think

1149

00:39:27,829 --> 00:39:26,000

you know

1150

00:39:30,390 --> 00:39:27,839

it what you've just said is is kind of

1151

00:39:31,750 --> 00:39:30,400

what where i was at with it but it just

1152

00:39:33,190 --> 00:39:31,760

it's when other people come to me with

1153

00:39:35,030 --> 00:39:33,200

other explanations and they have all

1154

00:39:37,910 --> 00:39:35,040

these things and i'm like well listen

1155

00:39:39,589 --> 00:39:37,920

i always send them to the scu paper and

1156

00:39:41,990 --> 00:39:39,599

take it take a look there that's that's

1157

00:39:43,349 --> 00:39:42,000

look it's there just have a look it's

1158

00:39:47,030 --> 00:39:43,359

it's not

1159

00:39:48,790 --> 00:39:47,040

someone who's just spent a day

1160

00:39:50,550 --> 00:39:48,800

looking into it this is a proper you

1161

00:39:54,390 --> 00:39:50,560

know

1162

00:39:56,069 --> 00:39:54,400

to two years before

1163

00:39:58,870 --> 00:39:56,079

writing these papers it's not like it

1164

00:40:00,630 --> 00:39:58,880

was done overnight

1165

00:40:02,870 --> 00:40:00,640

a lot of people don't understand that

1166

00:40:04,550 --> 00:40:02,880

that it takes that much time and

1167

00:40:05,990 --> 00:40:04,560

their expectations are you're gonna you

1168

00:40:08,230 --> 00:40:06,000

know here's a case

1169

00:40:10,069 --> 00:40:08,240

and like you know a week later you're

1170

00:40:13,270 --> 00:40:10,079

expected to get all those scientific

1171

00:40:14,790 --> 00:40:13,280

you know explanations oh no you take a

1172

00:40:16,950 --> 00:40:14,800

long time studying this

1173

00:40:18,309 --> 00:40:16,960

from every angle you know it's actually

1174

00:40:19,030 --> 00:40:18,319

yeah and it's not just one person

1175

00:40:20,710 --> 00:40:19,040

looking at it

1176

00:40:22,710 --> 00:40:20,720

yeah i'm sure you're doing it as a group

1177

00:40:24,550 --> 00:40:22,720

and you know you've got great minds

1178

00:40:27,109 --> 00:40:24,560

looking into it so um

1179

00:40:29,270 --> 00:40:27,119

nah great um i'm not going to keep you

1180

00:40:30,870 --> 00:40:29,280

too much longer but one case that i

1181

00:40:32,710 --> 00:40:30,880

really wanted to speak to you about and

1182

00:40:36,150 --> 00:40:32,720

it's one of my favorite cases

1183

00:40:38,470 --> 00:40:36,160

is the 2013 aguadilla puerto rico case

1184

00:40:39,910 --> 00:40:38,480

i feel it does not get enough coverage

1185

00:40:42,950 --> 00:40:39,920

recognition or anything

1186

00:40:44,550 --> 00:40:42,960

in the ufo community as a whole um and

1187

00:40:46,710 --> 00:40:44,560

too many people

1188

00:40:48,790 --> 00:40:46,720

in my opinion just shoot it down

1189

00:40:50,550 --> 00:40:48,800

straight away as a balloon or a chinese

1190

00:40:53,589 --> 00:40:50,560

lantern

1191

00:40:54,309 --> 00:40:53,599

can you talk about how you became aware

1192

00:40:55,829 --> 00:40:54,319

of the case

1193

00:40:58,150 --> 00:40:55,839

started studying it to the point where

1194

00:40:58,870 --> 00:40:58,160

you then put out again another great

1195

00:41:02,550 --> 00:40:58,880

paper

1196

00:41:03,190 --> 00:41:02,560

on such an important case yeah i'm i'm

1197

00:41:06,390 --> 00:41:03,200

glad

1198

00:41:07,990 --> 00:41:06,400

that we are seeing this this particular

1199

00:41:10,790 --> 00:41:08,000

case coming forward uh

1200

00:41:12,710 --> 00:41:10,800

i think it it has been pretty much

1201

00:41:13,109 --> 00:41:12,720

low-key it was not really discussed a

1202

00:41:16,550 --> 00:41:13,119

lot

1203

00:41:18,390 --> 00:41:16,560

uh you know and and i'm complete we're

1204

00:41:20,470 --> 00:41:18,400

completely aware of all these

1205

00:41:22,390 --> 00:41:20,480

alternate hypotheses that people put

1206

00:41:23,190 --> 00:41:22,400

together uh and want to assemble for

1207

00:41:25,910 --> 00:41:23,200

that and

1208

00:41:28,309 --> 00:41:25,920

let me speak to that as well so how how

1209

00:41:31,190 --> 00:41:28,319

did we become involved in it well

1210

00:41:32,470 --> 00:41:31,200

what happened was that one of us uh

1211

00:41:34,790 --> 00:41:32,480

morgan bell

1212

00:41:35,589 --> 00:41:34,800

uh who is a part of su and one of the

1213

00:41:38,309 --> 00:41:35,599

founding

1214

00:41:40,390 --> 00:41:38,319

board officers like i am and uh robert

1215

00:41:43,829 --> 00:41:40,400

powell and two other gentlemen

1216

00:41:47,430 --> 00:41:43,839

uh we he he was the state director

1217

00:41:50,790 --> 00:41:47,440

uh also of mufon in florida

1218

00:41:54,230 --> 00:41:50,800

and one of his contacts

1219

00:41:56,870 --> 00:41:54,240

apparently got wind of this uh through

1220

00:41:57,990 --> 00:41:56,880

a pilot that was located in miami

1221

00:42:02,069 --> 00:41:58,000

florida

1222

00:42:04,790 --> 00:42:02,079

he was uh this was a also a a

1223

00:42:05,349 --> 00:42:04,800

customs and border protection pilot

1224

00:42:08,710 --> 00:42:05,359

right

1225

00:42:11,190 --> 00:42:08,720

and apparently this pilot in miami

1226

00:42:11,750 --> 00:42:11,200

got it from the actual pilot who was

1227

00:42:15,190 --> 00:42:11,760

actually

1228

00:42:15,990 --> 00:42:15,200

located in in puerto rico sure so i'm

1229

00:42:18,150 --> 00:42:16,000

we're taught now

1230

00:42:19,109 --> 00:42:18,160

talking to this pilot who was a friend

1231

00:42:22,150 --> 00:42:19,119

of

1232

00:42:25,589 --> 00:42:22,160

and the the big push by the pilot

1233

00:42:28,390 --> 00:42:25,599

in uh in puerto rico was he didn't

1234

00:42:29,670 --> 00:42:28,400

he wanted this to be studied because he

1235

00:42:31,750 --> 00:42:29,680

didn't know what it was

1236

00:42:33,670 --> 00:42:31,760

and he wanted to be treated

1237

00:42:35,589 --> 00:42:33,680

scientifically if you would

1238

00:42:36,950 --> 00:42:35,599

and he knew that he couldn't get it they

1239

00:42:38,870 --> 00:42:36,960

had already attempted to take it up

1240

00:42:40,550 --> 00:42:38,880

through the the borderland uh the

1241

00:42:42,150 --> 00:42:40,560

homeland security chain and they didn't

1242

00:42:44,710 --> 00:42:42,160

want anything to do with it

1243

00:42:46,630 --> 00:42:44,720

also they also they also took the video

1244

00:42:47,829 --> 00:42:46,640

over to air force intelligence

1245

00:42:49,990 --> 00:42:47,839

and they said well we don't do that

1246

00:42:51,750 --> 00:42:50,000

stuff anymore and we're not interested

1247

00:42:53,430 --> 00:42:51,760

and we're going like wow you're not

1248

00:42:57,910 --> 00:42:53,440

interested in that okay

1249

00:43:01,510 --> 00:42:57,920

okay so our our job was to first off i'd

1250

00:43:04,550 --> 00:43:01,520

authenticate that it was legitimately a

1251

00:43:07,030 --> 00:43:04,560

a cbp plane that was actually

1252

00:43:08,710 --> 00:43:07,040

and it's a legit video okay right yeah

1253

00:43:10,470 --> 00:43:08,720

in this day and age you have to do that

1254

00:43:12,230 --> 00:43:10,480

you know check to authenticate it and

1255

00:43:16,069 --> 00:43:12,240

make sure that it's accurate

1256

00:43:17,990 --> 00:43:16,079

so what happened was that again morgan

1257

00:43:19,589 --> 00:43:18,000

actually went and met with a pilot and

1258

00:43:22,470 --> 00:43:19,599

was able to uh

1259

00:43:23,109 --> 00:43:22,480

you know get the uh the video released

1260

00:43:26,790 --> 00:43:23,119

and

1261

00:43:28,870 --> 00:43:26,800

then

1262

00:43:30,950 --> 00:43:28,880

what we did is you know created a team

1263

00:43:32,069 --> 00:43:30,960

of us to be a five people to be able to

1264

00:43:33,990 --> 00:43:32,079

go and to start like

1265

00:43:35,670 --> 00:43:34,000

breaking it down studying it and various

1266

00:43:37,349 --> 00:43:35,680

other things and so we

1267

00:43:39,030 --> 00:43:37,359

you know again robert powell started

1268

00:43:40,710 --> 00:43:39,040

going after the foias to be able to

1269

00:43:42,950 --> 00:43:40,720

confirm that number one

1270

00:43:44,309 --> 00:43:42,960

was there an aircraft that was in the

1271

00:43:46,950 --> 00:43:44,319

area we also

1272

00:43:48,470 --> 00:43:46,960

had radar data that we were collecting

1273

00:43:52,069 --> 00:43:48,480

from the faa

1274

00:43:53,750 --> 00:43:52,079

so and the faa we could look at the

1275

00:43:56,790 --> 00:43:53,760

actual identification of the

1276

00:43:59,430 --> 00:43:56,800

aircraft as it comes on the radar

1277

00:43:59,990 --> 00:43:59,440

and you can confirm that it was it was

1278

00:44:03,030 --> 00:44:00,000

definitely

1279

00:44:05,109 --> 00:44:03,040

a cbp plane uh

1280

00:44:06,470 --> 00:44:05,119

registered plane and then we were able

1281

00:44:09,670 --> 00:44:06,480

to get its complete

1282

00:44:11,030 --> 00:44:09,680

movement pattern and little didn't we

1283

00:44:12,950 --> 00:44:11,040

know but you know we went after

1284

00:44:13,510 --> 00:44:12,960

additional radar data and we were able

1285

00:44:15,589 --> 00:44:13,520

to get

1286

00:44:16,950 --> 00:44:15,599

the the fact that prior just prior to

1287

00:44:20,390 --> 00:44:16,960

that we got

1288

00:44:21,990 --> 00:44:20,400

over 50 hits of an object that was doing

1289

00:44:25,190 --> 00:44:22,000

incredible maneuvers

1290

00:44:25,910 --> 00:44:25,200

just off that coastline in that area and

1291

00:44:28,390 --> 00:44:25,920

so

1292

00:44:30,390 --> 00:44:28,400

you know i mean it was making incredible

1293

00:44:32,390 --> 00:44:30,400

uh you know mind-boggling

1294

00:44:33,670 --> 00:44:32,400

perky jerky felt like the kickback you

1295

00:44:36,790 --> 00:44:33,680

know was you know sure

1296

00:44:39,589 --> 00:44:36,800

yeah kind of emotions out in the water

1297

00:44:40,230 --> 00:44:39,599

uh just prior to that and then suddenly

1298

00:44:42,470 --> 00:44:40,240

it goes

1299

00:44:43,910 --> 00:44:42,480

off and you don't see that anymore they

1300

00:44:46,630 --> 00:44:43,920

don't track it anymore

1301
00:44:48,150 --> 00:44:46,640
and then you have right then this object

1302
00:44:50,790 --> 00:44:48,160
coming in toward

1303
00:44:52,950 --> 00:44:50,800
the uh the airport okay and that's the

1304
00:44:55,030 --> 00:44:52,960
rafael hernandez airport

1305
00:44:56,710 --> 00:44:55,040
and so now you can say well maybe

1306
00:44:58,870 --> 00:44:56,720
there's a connection between that object

1307
00:45:01,430 --> 00:44:58,880
that's doing this incredible minot

1308
00:45:02,309 --> 00:45:01,440
movers and the tic tac-like motions now

1309
00:45:05,510 --> 00:45:02,319
that's potentially

1310
00:45:09,030 --> 00:45:05,520
coming toward and so you have this

1311
00:45:11,109 --> 00:45:09,040
uh this uh cut this cbp it's a dash

1312
00:45:12,710 --> 00:45:11,119
eight aircraft that's taking off

1313
00:45:14,150 --> 00:45:12,720

it's late at night it's nine o'clock in

1314

00:45:17,829 --> 00:45:14,160

the evening on

1315

00:45:19,829 --> 00:45:17,839

uh april 25th uh

1316

00:45:20,950 --> 00:45:19,839

so it's nighttime there's a full moon

1317

00:45:23,829 --> 00:45:20,960

out uh

1318

00:45:25,109 --> 00:45:23,839

it's kind of 80 degrees at night and

1319

00:45:25,589 --> 00:45:25,119

they're taking off to go on their

1320

00:45:28,790 --> 00:45:25,599

regular

1321

00:45:30,550 --> 00:45:28,800

routine mission uh of looking for drug

1322

00:45:32,390 --> 00:45:30,560

smugglers and various other kinds of

1323

00:45:35,270 --> 00:45:32,400

things that come into puerto rico

1324

00:45:37,109 --> 00:45:35,280

and it's when they when they take off

1325

00:45:38,309 --> 00:45:37,119

and they were cleared for the takeoff

1326

00:45:40,309 --> 00:45:38,319

that they're looking up and they're

1327

00:45:42,630 --> 00:45:40,319

seeing a light that's coming

1328

00:45:44,069 --> 00:45:42,640

in from the water and there's they're

1329

00:45:45,670 --> 00:45:44,079

immediately like concerned like

1330

00:45:47,270 --> 00:45:45,680

that's where they're going to be heading

1331

00:45:49,190 --> 00:45:47,280

so they can't have

1332

00:45:50,550 --> 00:45:49,200

air traffic control i said we thought

1333

00:45:51,190 --> 00:45:50,560

you were you know we were you were

1334

00:45:54,069 --> 00:45:51,200

cleared

1335

00:45:54,710 --> 00:45:54,079

to take off but here's this object and

1336

00:45:56,790 --> 00:45:54,720

you know

1337

00:45:59,430 --> 00:45:56,800

and sure enough they're looking at it

1338

00:46:01,510 --> 00:45:59,440

and saying well we see the light too

1339

00:46:03,349 --> 00:46:01,520

right so now you've got this lighted

1340

00:46:07,109 --> 00:46:03,359

object right

1341

00:46:10,710 --> 00:46:07,119

well uh they go now doing a circle

1342

00:46:12,390 --> 00:46:10,720

around the object once and they

1343

00:46:14,550 --> 00:46:12,400

almost come back to the point where they

1344

00:46:17,270 --> 00:46:14,560

are they they took off of the

1345

00:46:18,150 --> 00:46:17,280

the runway right so they made one

1346

00:46:20,870 --> 00:46:18,160

complete circle

1347

00:46:23,910 --> 00:46:20,880

watching this object and guess what the

1348

00:46:27,349 --> 00:46:23,920

light then suddenly goes off

1349

00:46:28,309 --> 00:46:27,359

now okay the light goes off and it's

1350

00:46:30,630 --> 00:46:28,319

that point

1351
00:46:31,990 --> 00:46:30,640
where they start the video clip and they

1352
00:46:34,710 --> 00:46:32,000
the the pilot

1353
00:46:36,069 --> 00:46:34,720
contacts the uh they have two people in

1354
00:46:37,349 --> 00:46:36,079
the back of the airport there's actually

1355
00:46:39,670 --> 00:46:37,359
a four passengers

1356
00:46:41,829 --> 00:46:39,680
uh uh aboard the dash eight you know the

1357
00:46:43,349 --> 00:46:41,839
pilot the co-pilot and you have a radar

1358
00:46:45,990 --> 00:46:43,359
guy and you also have

1359
00:46:47,750 --> 00:46:46,000
a thermal imaging camera operator right

1360
00:46:50,470 --> 00:46:47,760
so the thermal imaging

1361
00:46:52,069 --> 00:46:50,480
camera operator turns on his equipment

1362
00:46:55,349 --> 00:46:52,079
and he starts to now track

1363
00:46:56,950 --> 00:46:55,359

this object uh using the thermal camera

1364

00:46:59,030 --> 00:46:56,960

which makes it look like daylight

1365

00:47:00,550 --> 00:46:59,040

so he's able to track it and he's moving

1366

00:47:03,109 --> 00:47:00,560

the camera around

1367

00:47:05,190 --> 00:47:03,119

trying to follow it as they now circle

1368

00:47:08,710 --> 00:47:05,200

around again

1369

00:47:10,710 --> 00:47:08,720

and but they don't do a complete circle

1370

00:47:12,230 --> 00:47:10,720

and what i'm trying to get at is a lot

1371

00:47:14,630 --> 00:47:12,240

of people think that well

1372

00:47:15,990 --> 00:47:14,640

you know there's a parabolic of you know

1373

00:47:19,270 --> 00:47:16,000

the parallax effect

1374

00:47:21,270 --> 00:47:19,280

that if you're going and you're if i

1375

00:47:21,990 --> 00:47:21,280

had you positioned there and i go around

1376

00:47:25,270 --> 00:47:22,000

you

1377

00:47:27,990 --> 00:47:25,280

right and we

1378

00:47:28,549 --> 00:47:28,000

we took that into effect in the context

1379

00:47:31,270 --> 00:47:28,559

of

1380

00:47:32,309 --> 00:47:31,280

you know the object and knowing that

1381

00:47:35,670 --> 00:47:32,319

wait a minute

1382

00:47:36,549 --> 00:47:35,680

uh do we have any they didn't turn on

1383

00:47:39,190 --> 00:47:36,559

the laser

1384

00:47:40,790 --> 00:47:39,200

target illuminator aboard the west cam

1385

00:47:42,950 --> 00:47:40,800

camera it's not a flear

1386

00:47:44,390 --> 00:47:42,960

it's a west cam camera a thermal imaging

1387

00:47:46,790 --> 00:47:44,400

camera right

1388

00:47:48,230 --> 00:47:46,800

it's a competitor to flare flare is a

1389

00:47:50,549 --> 00:47:48,240

company by the way yes

1390

00:47:53,030 --> 00:47:50,559

not a you know it's like me talking and

1391

00:47:54,069 --> 00:47:53,040

say well did you use xerox to make uh

1392

00:48:01,829 --> 00:47:54,079

you know

1393

00:48:03,750 --> 00:48:01,839

flare it's not a flare it's westcam

1394

00:48:06,069 --> 00:48:03,760

camera made by I3

1395

00:48:06,950 --> 00:48:06,079

right it's a thermal imaging camera but

1396

00:48:10,230 --> 00:48:06,960

anyway so

1397

00:48:12,309 --> 00:48:10,240

they track it now they go around partly

1398

00:48:13,910 --> 00:48:12,319

but then what happens is that they see

1399

00:48:16,790 --> 00:48:13,920

the the object is now

1400

00:48:18,069 --> 00:48:16,800

apparently like going in the water and

1401

00:48:19,589 --> 00:48:18,079

at that point it

1402

00:48:21,589 --> 00:48:19,599

you know i'll tell you that in a second

1403

00:48:23,030 --> 00:48:21,599

it comes up out of the water and does

1404

00:48:26,309 --> 00:48:23,040

some interesting things but

1405

00:48:28,309 --> 00:48:26,319

they're now heading south east they've

1406

00:48:30,309 --> 00:48:28,319

they've gone off on a southwest they're

1407

00:48:31,910 --> 00:48:30,319

not doing this circle anymore right

1408

00:48:33,750 --> 00:48:31,920

and it's at that point you know when

1409

00:48:36,150 --> 00:48:33,760

it's doing that you can start to make

1410

00:48:38,549 --> 00:48:36,160

out the actual speed of the object

1411

00:48:39,829 --> 00:48:38,559

because you have some reference points

1412

00:48:43,670 --> 00:48:39,839

for example we see

1413

00:48:47,270 --> 00:48:43,680

when we did we broke it into 7027 frames

1414

00:48:51,030 --> 00:48:47,280

and looked at individual frames of that

1415

00:48:52,950 --> 00:48:51,040

and we looked at each pixel in the frame

1416

00:48:54,790 --> 00:48:52,960

and we were breaking it down by each

1417

00:48:55,670 --> 00:48:54,800

pixel each little cell of that

1418

00:48:57,910 --> 00:48:55,680

photograph

1419

00:48:59,750 --> 00:48:57,920

if you would that frame yeah and and you

1420

00:49:00,870 --> 00:48:59,760

could make out that it goes behind a

1421

00:49:03,030 --> 00:49:00,880

telephone pole

1422

00:49:04,549 --> 00:49:03,040

well that gave you a references in terms

1423

00:49:07,349 --> 00:49:04,559

of its distance

1424

00:49:09,030 --> 00:49:07,359

and it also gives you a reference point

1425

00:49:10,950 --> 00:49:09,040

for its size

1426

00:49:12,790 --> 00:49:10,960

so then we can estimate that it was size

1427

00:49:14,069 --> 00:49:12,800

roughly three to five feet in diameter

1428

00:49:16,790 --> 00:49:14,079

at least the thermal

1429

00:49:18,309 --> 00:49:16,800

aspect of that yes you know you have to

1430

00:49:20,150 --> 00:49:18,319

keep that in mind you're not looking at

1431

00:49:23,270 --> 00:49:20,160

a visible target you're looking at

1432

00:49:26,390 --> 00:49:23,280

heat yeah and so in this case

1433

00:49:29,030 --> 00:49:26,400

in the video when it's black it's hot

1434

00:49:30,230 --> 00:49:29,040

it's hotter than what it would be white

1435

00:49:32,710 --> 00:49:30,240

so

1436

00:49:34,390 --> 00:49:32,720

looking at thermal images which gives

1437

00:49:35,030 --> 00:49:34,400

you thermal contrast the difference

1438

00:49:37,589 --> 00:49:35,040

between

1439

00:49:39,990 --> 00:49:37,599

and it measures up to 1 100 of the

1440

00:49:42,150 --> 00:49:40,000

degree difference

1441

00:49:43,030 --> 00:49:42,160

in terms of a color range that goes from

1442

00:49:45,030 --> 00:49:43,040

like white

1443

00:49:46,470 --> 00:49:45,040

up to black and all the shades of gray

1444

00:49:48,790 --> 00:49:46,480

in between yeah

1445

00:49:50,390 --> 00:49:48,800

so we did that kind of like level of

1446

00:49:51,030 --> 00:49:50,400

scrutiny on this thing looking at

1447

00:49:53,109 --> 00:49:51,040

individual

1448

00:49:55,190 --> 00:49:53,119

pixels and the colors to be able to come

1449

00:49:57,670 --> 00:49:55,200

up with the the actual

1450

00:49:59,750 --> 00:49:57,680

computation of the temperature of it and

1451

00:50:01,030 --> 00:49:59,760

we came up to it it's roughly 104

1452

00:50:02,710 --> 00:50:01,040

degrees temperature

1453

00:50:04,790 --> 00:50:02,720

not all the time but at different points

1454

00:50:08,069 --> 00:50:04,800

of the the video we're going to

1455

00:50:09,589 --> 00:50:08,079

really get black and uh and then we

1456

00:50:10,790 --> 00:50:09,599

could track the speed of the object

1457

00:50:13,589 --> 00:50:10,800

which was roughly

1458

00:50:15,589 --> 00:50:13,599

you know about 80 to 85 miles an hour

1459

00:50:17,589 --> 00:50:15,599

and you also see it going into the water

1460

00:50:19,589 --> 00:50:17,599

at about 100 miles an hour

1461

00:50:21,270 --> 00:50:19,599

and then moves underneath the water it's

1462

00:50:23,430 --> 00:50:21,280

still about roughly 80

1463

00:50:25,030 --> 00:50:23,440

miles per hour but it slows down to

1464

00:50:27,510 --> 00:50:25,040

about 40 miles per hour

1465

00:50:28,950 --> 00:50:27,520

it comes up out of the water and you see

1466

00:50:30,309 --> 00:50:28,960

even when it was underneath the water

1467

00:50:31,910 --> 00:50:30,319

you see that this like

1468

00:50:34,230 --> 00:50:31,920

indication of it moving through the

1469

00:50:35,910 --> 00:50:34,240

water yeah it's like a white kind of

1470

00:50:38,309 --> 00:50:35,920

like thing and that

1471

00:50:39,190 --> 00:50:38,319

comes up we called it a bernoulli hump

1472

00:50:41,910 --> 00:50:39,200

because

1473

00:50:42,390 --> 00:50:41,920

if you have some water displaced it

1474

00:50:44,790 --> 00:50:42,400

actually

1475

00:50:46,309 --> 00:50:44,800

uh makes the water a little bit the

1476

00:50:49,270 --> 00:50:46,319

temperature will change

1477

00:50:50,150 --> 00:50:49,280

and and so it gets cooler as it's thrown

1478

00:50:52,630 --> 00:50:50,160

up

1479

00:50:54,549 --> 00:50:52,640

and so you see that happening the cooler

1480

00:50:56,150 --> 00:50:54,559

you also saw a splash which we could

1481

00:50:57,750 --> 00:50:56,160

look at the individual pictures

1482

00:50:59,349 --> 00:50:57,760

so we know that we know that it went

1483

00:51:00,230 --> 00:50:59,359

into the water it actually created a

1484

00:51:02,870 --> 00:51:00,240

splash

1485

00:51:04,309 --> 00:51:02,880

wow and then you also see it kind of

1486

00:51:05,270 --> 00:51:04,319

like moving up and then it comes out of

1487

00:51:07,430 --> 00:51:05,280

the water

1488

00:51:09,430 --> 00:51:07,440

and then you see it get really really

1489

00:51:10,549 --> 00:51:09,440

black the the temperature gets really

1490

00:51:13,349 --> 00:51:10,559

really hot

1491

00:51:13,829 --> 00:51:13,359

if you would hotter than you know normal

1492

00:51:16,870 --> 00:51:13,839

yeah

1493

00:51:19,750 --> 00:51:16,880

what it had been and then suddenly it

1494

00:51:20,950 --> 00:51:19,760

it you see it split into two identical

1495

00:51:23,030 --> 00:51:20,960

objects

1496

00:51:24,309 --> 00:51:23,040

uh which would indicate that it's you

1497

00:51:26,790 --> 00:51:24,319

know it's a separate

1498

00:51:28,230 --> 00:51:26,800

thermal signature right yeah you know so

1499

00:51:28,870 --> 00:51:28,240

i mean it's another object that's the

1500

00:51:31,270 --> 00:51:28,880

same

1501
00:51:32,230 --> 00:51:31,280
and then it goes off and one goes like

1502
00:51:34,309 --> 00:51:32,240
underneath the water

1503
00:51:35,910 --> 00:51:34,319
and then the other one hangs up a little

1504
00:51:37,430 --> 00:51:35,920
bit and you see it go in the water and

1505
00:51:38,309 --> 00:51:37,440
then you see the camera like looking

1506
00:51:41,190 --> 00:51:38,319
around and

1507
00:51:43,030 --> 00:51:41,200
by this time that that customs and

1508
00:51:43,750 --> 00:51:43,040
border protection plane is like nine

1509
00:51:46,630 --> 00:51:43,760
miles

1510
00:51:47,589 --> 00:51:46,640
you know down south looking at the

1511
00:51:49,670 --> 00:51:47,599
object

1512
00:51:51,750 --> 00:51:49,680
wow and it's not going in a circle

1513
00:51:53,670 --> 00:51:51,760

around it at all

1514

00:51:55,589 --> 00:51:53,680

so you don't have the parallax effect

1515

00:51:56,790 --> 00:51:55,599

and we we did everything from looking at

1516

00:51:59,270 --> 00:51:56,800

the wind speeds

1517

00:52:01,190 --> 00:51:59,280

at the altitude that it was uh on that

1518

00:52:02,549 --> 00:52:01,200

particular day it was about like 18

1519

00:52:05,430 --> 00:52:02,559

miles an hour

1520

00:52:07,109 --> 00:52:05,440

uh it was heading toward the uh the west

1521

00:52:10,390 --> 00:52:07,119

and we could compute that

1522

00:52:12,950 --> 00:52:10,400

uh and so vinnie let me tell you we

1523

00:52:14,870 --> 00:52:12,960

we did all this for two years i mean we

1524

00:52:17,750 --> 00:52:14,880

studied every aspect of weather

1525

00:52:18,230 --> 00:52:17,760

the radar the the whole thing seven

1526
00:52:21,670 --> 00:52:18,240
thousand

1527
00:52:24,710 --> 00:52:21,680
twenty sevens you know uh things and

1528
00:52:27,430 --> 00:52:24,720
we couldn't come up with an explanation

1529
00:52:28,790 --> 00:52:27,440
it's it we eliminated the parallax and

1530
00:52:30,069 --> 00:52:28,800
here's the other part of the problem a

1531
00:52:32,390 --> 00:52:30,079
lot of people like to like

1532
00:52:33,589 --> 00:52:32,400
want to make and say it's a blue and the

1533
00:52:35,349 --> 00:52:33,599
black was just

1534
00:52:37,910 --> 00:52:35,359
hanging up there above that little

1535
00:52:40,870 --> 00:52:37,920
airport well first off

1536
00:52:42,870 --> 00:52:40,880
what it's not a mylar balloon because we

1537
00:52:45,829 --> 00:52:42,880
compared it to we actually had

1538
00:52:46,710 --> 00:52:45,839

another west cam camera and we did tests

1539

00:52:49,030 --> 00:52:46,720

of taking

1540

00:52:49,990 --> 00:52:49,040

using that same camera of a mylar

1541

00:52:52,390 --> 00:52:50,000

balloon

1542

00:52:54,470 --> 00:52:52,400

wow and it doesn't match the thermal

1543

00:52:56,069 --> 00:52:54,480

signature doesn't match at all

1544

00:52:58,829 --> 00:52:56,079

and that's what a lot of people will

1545

00:53:00,069 --> 00:52:58,839

just go after and say it's uh it's

1546

00:53:01,750 --> 00:53:00,079

parallax

1547

00:53:04,069 --> 00:53:01,760

and then they want to prove that point

1548

00:53:05,990 --> 00:53:04,079

right yes we're stupid we didn't

1549

00:53:06,710 --> 00:53:06,000

consider parallax we did consider

1550

00:53:10,069 --> 00:53:06,720

parallax

1551
00:53:11,589 --> 00:53:10,079
sure of course we also considered mylar

1552
00:53:13,270 --> 00:53:11,599
balloons that's why we had a thermal

1553
00:53:15,349 --> 00:53:13,280
camera taking a look at that

1554
00:53:17,510 --> 00:53:15,359
and we looked at the wind speed and the

1555
00:53:20,710 --> 00:53:17,520
problem is that a lot of people will say

1556
00:53:23,270 --> 00:53:20,720
here's the aircraft right and then

1557
00:53:23,829 --> 00:53:23,280
you have the object that is being

1558
00:53:26,230 --> 00:53:23,839
somewhere

1559
00:53:27,670 --> 00:53:26,240
between that and the ground because if

1560
00:53:29,190 --> 00:53:27,680
you look at the metadata that's

1561
00:53:31,670 --> 00:53:29,200
associated with that

1562
00:53:32,790 --> 00:53:31,680
the actual reticule is actually

1563
00:53:35,910 --> 00:53:32,800

capturing the

1564

00:53:39,270 --> 00:53:35,920

the location of the ground it points to

1565

00:53:42,390 --> 00:53:39,280

so somewhere along from that aircraft

1566

00:53:45,910 --> 00:53:42,400

down to the ground is where that object

1567

00:53:47,750 --> 00:53:45,920

actually is and if if i place it down

1568

00:53:49,990 --> 00:53:47,760

at the end

1569

00:53:51,670 --> 00:53:50,000

and say that i'm doing parallax then it

1570

00:53:53,589 --> 00:53:51,680

means it's not moving at all

1571

00:53:55,030 --> 00:53:53,599

and basically i ain't going around it

1572

00:53:57,270 --> 00:53:55,040

right

1573

00:53:59,030 --> 00:53:57,280

but if i move that and say that it's a

1574

00:54:01,430 --> 00:53:59,040

little bit closer

1575

00:54:02,069 --> 00:54:01,440

than uh the ground or something of that

1576
00:54:03,750 --> 00:54:02,079
nature

1577
00:54:05,270 --> 00:54:03,760
then i'm saying that well wait a minute

1578
00:54:05,910 --> 00:54:05,280
it might have a different pattern and

1579
00:54:09,990 --> 00:54:05,920
we've

1580
00:54:11,990 --> 00:54:10,000
have you actually take a look at our

1581
00:54:13,829 --> 00:54:12,000
our where we project that this thing

1582
00:54:15,589 --> 00:54:13,839
went and and the pilots and everybody

1583
00:54:19,030 --> 00:54:15,599
seemed to think that it went

1584
00:54:21,829 --> 00:54:19,040
and uh and so

1585
00:54:22,470 --> 00:54:21,839
no they position it always at this point

1586
00:54:25,030 --> 00:54:22,480
a little

1587
00:54:26,710 --> 00:54:25,040
point and say that it didn't move you

1588
00:54:29,750 --> 00:54:26,720

know hardly at all

1589

00:54:33,589 --> 00:54:29,760

of course and they they don't look at

1590

00:54:35,270 --> 00:54:33,599

mylar balloons in thermal

1591

00:54:37,270 --> 00:54:35,280

and neither do they consider that the

1592

00:54:38,390 --> 00:54:37,280

pilot said and the control tower said it

1593

00:54:41,510 --> 00:54:38,400

had a light

1594

00:54:42,309 --> 00:54:41,520

that went out of course and neither do

1595

00:54:44,150 --> 00:54:42,319

they consider

1596

00:54:47,910 --> 00:54:44,160

the fact that there were 50 hits of

1597

00:54:49,510 --> 00:54:47,920

radar just off the coastline

1598

00:54:51,750 --> 00:54:49,520

i mean that's what kind of really gets

1599

00:54:53,670 --> 00:54:51,760

me as well but have those radar data

1600

00:54:55,910 --> 00:54:53,680

points been made public at all

1601
00:54:57,670 --> 00:54:55,920
yes we we actually published it i mean

1602
00:55:00,069 --> 00:54:57,680
we have the radar data we've we've

1603
00:55:01,670 --> 00:55:00,079
actually published it in our paper uh we

1604
00:55:02,230 --> 00:55:01,680
can provide it to anybody that wants it

1605
00:55:03,829 --> 00:55:02,240
but i mean

1606
00:55:06,069 --> 00:55:03,839
again that's that's what i'm trying to

1607
00:55:08,150 --> 00:55:06,079
get at is like nobody bothers to do the

1608
00:55:10,150 --> 00:55:08,160
complete homework on the case

1609
00:55:11,750 --> 00:55:10,160
they go after it's a balloon and i'm

1610
00:55:13,030 --> 00:55:11,760
gonna put it it's a balloon

1611
00:55:15,030 --> 00:55:13,040
yeah and they eradicate some of the

1612
00:55:16,230 --> 00:55:15,040
vital information to fit their narrative

1613
00:55:21,109 --> 00:55:16,240

that's what i see

1614

00:55:23,190 --> 00:55:21,119

yeah there you go

1615

00:55:25,270 --> 00:55:23,200

that's great thank you i'm going to just

1616

00:55:26,470 --> 00:55:25,280

just hold you for one more question

1617

00:55:28,870 --> 00:55:26,480

and i'm not sure if you can tell me

1618

00:55:31,030 --> 00:55:28,880

about it um i recently

1619

00:55:33,190 --> 00:55:31,040

i mean i say recently i saw this talk

1620

00:55:35,270 --> 00:55:33,200

you did back in 2019 about

1621

00:55:36,710 --> 00:55:35,280

a couple of cases that we've not heard

1622

00:55:38,549 --> 00:55:36,720

much about and this is the uss

1623

00:55:41,030 --> 00:55:38,559

bainbridge in the uss boxer

1624

00:55:42,710 --> 00:55:41,040

are you able to talk about those cases

1625

00:55:44,630 --> 00:55:42,720

at all so

1626
00:55:47,190 --> 00:55:44,640
lou was the one that told me about those

1627
00:55:50,309 --> 00:55:47,200
okay this is i mean all right okay

1628
00:55:50,950 --> 00:55:50,319
he was the guy right so lou told me

1629
00:55:53,270 --> 00:55:50,960
about them

1630
00:55:54,069 --> 00:55:53,280
in when we were at 2019 and he was our

1631
00:55:57,670 --> 00:55:54,079
guest speaker

1632
00:55:59,430 --> 00:55:57,680
our keynote at the seo conference and we

1633
00:56:00,710 --> 00:55:59,440
you know i we told him you know in fact

1634
00:56:03,990 --> 00:56:00,720
i told him i said did

1635
00:56:05,030 --> 00:56:04,000
out of curiosity did aa tip uh bothered

1636
00:56:08,549 --> 00:56:05,040
to look at all

1637
00:56:11,670 --> 00:56:08,559
at the aguadilla case and he said

1638
00:56:13,670 --> 00:56:11,680

yes they did and i said well that was

1639

00:56:17,190 --> 00:56:13,680

interesting he said you know and then

1640

00:56:19,030 --> 00:56:17,200

we told him uh you know basically uh

1641

00:56:20,710 --> 00:56:19,040

can you can you help us i mean we've

1642

00:56:22,549 --> 00:56:20,720

done the nimitz report now

1643

00:56:24,150 --> 00:56:22,559

yeah what's the next target that we

1644

00:56:26,870 --> 00:56:24,160

ought to go after

1645

00:56:29,109 --> 00:56:26,880

and and he told us he said well there is

1646

00:56:31,589 --> 00:56:29,119

the bainbridge and then the boxer

1647

00:56:33,510 --> 00:56:31,599

uh incidents and i said well okay we

1648

00:56:35,430 --> 00:56:33,520

need to like look and see if we can get

1649

00:56:36,549 --> 00:56:35,440

any kind of information on them the

1650

00:56:38,789 --> 00:56:36,559

challenge that we had

1651
00:56:39,589 --> 00:56:38,799
was that you know with the exception of

1652
00:56:41,990 --> 00:56:39,599
the nimitz

1653
00:56:42,950 --> 00:56:42,000
crew coming forward we weren't able to

1654
00:56:44,950 --> 00:56:42,960
get any of these

1655
00:56:46,230 --> 00:56:44,960
people to come forward to talk about

1656
00:56:48,069 --> 00:56:46,240
those incidents

1657
00:56:49,750 --> 00:56:48,079
and that's that's what we really had to

1658
00:56:51,349 --> 00:56:49,760
rely on

1659
00:56:53,430 --> 00:56:51,359
could we get anybody that would come

1660
00:56:55,510 --> 00:56:53,440
forward with any kind of

1661
00:56:56,630 --> 00:56:55,520
supportive evidence if you would of

1662
00:56:58,150 --> 00:56:56,640
course and

1663
00:57:00,710 --> 00:56:58,160

and the problem is we couldn't get

1664

00:57:01,030 --> 00:57:00,720

anybody right of course that was before

1665

00:57:03,270 --> 00:57:01,040

they

1666

00:57:04,549 --> 00:57:03,280

had this whole like reporting if you

1667

00:57:08,470 --> 00:57:04,559

would of these cases

1668

00:57:11,670 --> 00:57:08,480

of course and so uh officially

1669

00:57:13,349 --> 00:57:11,680

and so we we didn't get any uh anybody

1670

00:57:15,030 --> 00:57:13,359

that was willing to come forward so we

1671

00:57:17,349 --> 00:57:15,040

pretty much just dropped it

1672

00:57:18,950 --> 00:57:17,359

uh we're still interested i'd love to be

1673

00:57:20,069 --> 00:57:18,960

able to get somebody to talk about those

1674

00:57:21,349 --> 00:57:20,079

incidents

1675

00:57:22,789 --> 00:57:21,359

are you made aware of what they looked

1676

00:57:24,950 --> 00:57:22,799

like the craft that were involved were

1677

00:57:26,309 --> 00:57:24,960

they tic tacs were they drone shaped was

1678

00:57:29,910 --> 00:57:26,319

it relate you know similar to the

1679

00:57:33,510 --> 00:57:29,920

omaha or no and and let me also

1680

00:57:36,710 --> 00:57:33,520

clarify that uh that you know

1681

00:57:37,030 --> 00:57:36,720

it's been through leaks if you would of

1682

00:57:38,870 --> 00:57:37,040

uh

1683

00:57:41,510 --> 00:57:38,880

like even with the omaha incidents of

1684

00:57:45,510 --> 00:57:41,520

these

1685

00:57:47,430 --> 00:57:45,520

and and i'll be honest with you

1686

00:57:49,270 --> 00:57:47,440

i don't i don't agree with moving them

1687

00:57:50,870 --> 00:57:49,280

through journalists i agree with

1688

00:57:52,950 --> 00:57:50,880

them going being scientifically

1689

00:57:55,349 --> 00:57:52,960
scrutinized first absolutely yeah

1690

00:57:57,990 --> 00:57:55,359
uh and then you come out with a

1691

00:57:59,990 --> 00:57:58,000
journalist making statements right so

1692

00:58:01,430 --> 00:58:00,000
you know the fact that corbella and nap

1693

00:58:02,630 --> 00:58:01,440
want to be able to promote it without

1694

00:58:05,670 --> 00:58:02,640
scientific study

1695

00:58:07,430 --> 00:58:05,680
i i don't agree with i mean in their

1696

00:58:08,789 --> 00:58:07,440
defense slightly in their defense they

1697

00:58:11,109 --> 00:58:08,799
do say that they have given

1698

00:58:13,349 --> 00:58:11,119
these bits of data to various people to

1699

00:58:14,950 --> 00:58:13,359
analyze behind the scenes they've not

1700

00:58:16,390 --> 00:58:14,960
given out names or anything but they're

1701
00:58:17,589 --> 00:58:16,400
they're saying that they are doing their

1702
00:58:19,829 --> 00:58:17,599
due diligence

1703
00:58:21,670 --> 00:58:19,839
do you feel that they're not i mean it's

1704
00:58:24,630 --> 00:58:21,680
a grey area isn't it

1705
00:58:25,829 --> 00:58:24,640
let's put it this way uh scu as you when

1706
00:58:27,829 --> 00:58:25,839
we get something

1707
00:58:29,670 --> 00:58:27,839
we're gonna do our our best to be able

1708
00:58:31,109 --> 00:58:29,680
to analyze it and study it and a lot of

1709
00:58:32,390 --> 00:58:31,119
us have been in this phenomena for a

1710
00:58:35,109 --> 00:58:32,400
very long time

1711
00:58:35,990 --> 00:58:35,119
sure i don't know who they're going to

1712
00:58:38,470 --> 00:58:36,000
are they are

1713
00:58:40,390 --> 00:58:38,480

they doing peer reviews are they we did

1714

00:58:42,789 --> 00:58:40,400

a peer review on the aguadilla case

1715

00:58:44,069 --> 00:58:42,799

that we studied we went to the we

1716

00:58:45,750 --> 00:58:44,079

couldn't find anybody in the united

1717

00:58:46,470 --> 00:58:45,760

states to do it so we went over to the

1718

00:58:52,390 --> 00:58:46,480

french

1719

00:58:53,349 --> 00:58:52,400

team were the ones that helped us out uh

1720

00:58:55,030 --> 00:58:53,359

but

1721

00:58:56,390 --> 00:58:55,040

we're now putting in a peer review

1722

00:58:59,589 --> 00:58:56,400

process and doing it

1723

00:59:00,470 --> 00:58:59,599

ourselves because ultimately uh that

1724

00:59:03,430 --> 00:59:00,480

needs to happen

1725

00:59:04,789 --> 00:59:03,440

but again you know me telling you that i

1726

00:59:06,390 --> 00:59:04,799

gave it to somebody and then that

1727

00:59:07,109 --> 00:59:06,400

somebody looked at it you know do you

1728

00:59:08,950 --> 00:59:07,119

know who they are

1729

00:59:10,390 --> 00:59:08,960

did they like the level of work that

1730

00:59:12,069 --> 00:59:10,400

they did we're

1731

00:59:13,829 --> 00:59:12,079

we're completely transparent about what

1732

00:59:16,390 --> 00:59:13,839

we do yeah oh i mean

1733

00:59:18,549 --> 00:59:16,400

and so who is this non-transparent

1734

00:59:21,829 --> 00:59:18,559

entity that you sent this thing to

1735

00:59:24,309 --> 00:59:21,839

uh and what we see the report

1736

00:59:25,910 --> 00:59:24,319

uh let me you know as you very well know

1737

00:59:26,549 --> 00:59:25,920

if we believed everything that somebody

1738

00:59:28,230 --> 00:59:26,559

says

1739

00:59:29,829 --> 00:59:28,240

without any kind of like evidence to

1740

00:59:31,670 --> 00:59:29,839

support or back it up

1741

00:59:33,030 --> 00:59:31,680

then it's just you know hearsay or it's

1742

00:59:33,829 --> 00:59:33,040

just you know i'm what am i going to

1743

00:59:35,270 --> 00:59:33,839

take your

1744

00:59:37,510 --> 00:59:35,280

you know and believe what you have to

1745

00:59:38,630 --> 00:59:37,520

say uh so

1746

00:59:39,829 --> 00:59:38,640

that's what they're wanting you to do

1747

00:59:40,870 --> 00:59:39,839

and i don't think that that's the right

1748

00:59:44,870 --> 00:59:40,880

way to do it

1749

00:59:47,030 --> 00:59:44,880

no i i completely agree and it

1750

00:59:48,630 --> 00:59:47,040

it's never been made known any of jeremy

1751

00:59:50,069 --> 00:59:48,640

corbell sources who's looked at these

1752

00:59:51,829 --> 00:59:50,079

bits of data so of course a lot of

1753

00:59:54,069 --> 00:59:51,839

people have a lot of skepticism and a

1754

00:59:55,430 --> 00:59:54,079

lot of questions but is this kind of

1755

00:59:57,109 --> 00:59:55,440

is this something you would have looked

1756

00:59:59,030 --> 00:59:57,119

at if jeremy had come to you with these

1757

01:00:00,870 --> 00:59:59,040

cases before making them and that

1758

01:00:02,630 --> 01:00:00,880

there you go jeremy if you ever watch

1759

01:00:06,710 --> 01:00:02,640

this what are you doing

1760

01:00:08,630 --> 01:00:06,720

go and speak to rich in the scu come on

1761

01:00:09,829 --> 01:00:08,640

yeah we would be happy to look into it i

1762

01:00:11,910 --> 01:00:09,839

mean it's you know

1763

01:00:14,870 --> 01:00:11,920

we do look at we want to look at any of

1764

01:00:15,829 --> 01:00:14,880

these things like the uh navy incidents

1765

01:00:17,270 --> 01:00:15,839

or something like that

1766

01:00:19,750 --> 01:00:17,280

we'd like to have been able to have

1767

01:00:21,109 --> 01:00:19,760

received even the the radar data if

1768

01:00:22,789 --> 01:00:21,119

anything like that

1769

01:00:24,390 --> 01:00:22,799

yeah that's that's what we're writing to

1770

01:00:25,589 --> 01:00:24,400

the congress and all congressional

1771

01:00:28,789 --> 01:00:25,599

leaders about

1772

01:00:31,030 --> 01:00:28,799

uh even that they were uapf we were

1773

01:00:33,750 --> 01:00:31,040

looking at them to be able to say

1774

01:00:34,390 --> 01:00:33,760

and also the uh the ssci the you know

1775

01:00:36,150 --> 01:00:34,400

the

1776

01:00:37,910 --> 01:00:36,160

senate select committee we wanted to be

1777

01:00:39,670 --> 01:00:37,920

able to say that you know put this

1778

01:00:42,710 --> 01:00:39,680

it's time for this stuff to come out to

1779

01:00:45,510 --> 01:00:42,720

academia and scientists hold the study

1780

01:00:46,470 --> 01:00:45,520

and to help corroborate or validate or

1781

01:00:49,030 --> 01:00:46,480

whatever

1782

01:00:50,150 --> 01:00:49,040

and we're we're extremely available we

1783

01:00:52,150 --> 01:00:50,160

want to do that

1784

01:00:53,990 --> 01:00:52,160

yeah and didn't you contact them back in

1785

01:00:55,349 --> 01:00:54,000

something like 2018 as well to really

1786

01:00:57,430 --> 01:00:55,359

kind of try and push this out into the

1787

01:00:58,950 --> 01:00:57,440

scientific community

1788

01:01:00,710 --> 01:00:58,960

have you been in contact with them since

1789

01:01:02,789 --> 01:01:00,720

then or in constant communication or

1790

01:01:04,390 --> 01:01:02,799

have they just kind of

1791

01:01:07,750 --> 01:01:04,400

not really given you much since then i

1792

01:01:10,390 --> 01:01:07,760

mean is it a positive outlook from them

1793

01:01:12,390 --> 01:01:10,400

well let's put it this way we are we're

1794

01:01:14,710 --> 01:01:12,400

definitely having conversations

1795

01:01:15,750 --> 01:01:14,720

and we are we are trying to be able to

1796

01:01:18,390 --> 01:01:15,760

forge that

1797

01:01:20,150 --> 01:01:18,400

we have a director of national security

1798

01:01:22,470 --> 01:01:20,160

on board with seo

1799

01:01:23,349 --> 01:01:22,480

we've also got we've got a security

1800

01:01:25,109 --> 01:01:23,359

advisor

1801
01:01:26,710 --> 01:01:25,119
and we're we're basically trying to push

1802
01:01:28,710 --> 01:01:26,720
that envelope to be able to help

1803
01:01:30,630 --> 01:01:28,720
uh get that out and i think that there's

1804
01:01:34,069 --> 01:01:30,640
a possibility that we will be able to

1805
01:01:35,990 --> 01:01:34,079
to do that um so hopefully that

1806
01:01:38,069 --> 01:01:36,000
we're going to break some ground we got

1807
01:01:41,589 --> 01:01:38,079
lots of great studies going on

1808
01:01:43,430 --> 01:01:41,599
uh right now that will be helpful uh

1809
01:01:45,910 --> 01:01:43,440
and so we're looking at propulsion in

1810
01:01:47,270 --> 01:01:45,920
the atmosphere atmospheric effects

1811
01:01:50,069 --> 01:01:47,280
we're looking at a whole bunch of things

1812
01:01:53,190 --> 01:01:50,079
that would be of interest uh

1813
01:01:55,349 --> 01:01:53,200

uh to a lot of people yeah including the

1814

01:01:56,789 --> 01:01:55,359

the study that's going on right now so

1815

01:01:58,150 --> 01:01:56,799

we are looking to be able to figure out

1816

01:02:00,549 --> 01:01:58,160

how we can play

1817

01:02:02,230 --> 01:02:00,559

uh and uh there's a number of us that

1818

01:02:05,589 --> 01:02:02,240

work in dod so we can sign

1819

01:02:07,190 --> 01:02:05,599

ndas or whatever is needed to be able to

1820

01:02:10,870 --> 01:02:07,200

help get that out but

1821

01:02:12,870 --> 01:02:10,880

um scu likes to also like publish and be

1822

01:02:14,549 --> 01:02:12,880

transparent so we're looking to balance

1823

01:02:16,470 --> 01:02:14,559

how can we help that out at the same

1824

01:02:18,549 --> 01:02:16,480

time be transparent you know

1825

01:02:19,589 --> 01:02:18,559

absolutely no that's great thank you so

1826

01:02:20,870 --> 01:02:19,599

much listen

1827

01:02:22,069 --> 01:02:20,880

rich thank you it's been a pleasure i'm

1828

01:02:23,589 --> 01:02:22,079

not going to keep you any longer because

1829

01:02:25,109 --> 01:02:23,599

like i said i know

1830

01:02:26,549 --> 01:02:25,119

your time is super valuable and you've

1831

01:02:27,670 --> 01:02:26,559

given me an hour and i could not have

1832

01:02:29,829 --> 01:02:27,680

asked for any longer i'm

1833

01:02:31,430 --> 01:02:29,839

so thankful to you i would love to speak

1834

01:02:32,870 --> 01:02:31,440

to you i don't know six months down the

1835

01:02:33,430 --> 01:02:32,880

line see where we're at with everything

1836

01:02:36,069 --> 01:02:33,440

as this

1837

01:02:36,710 --> 01:02:36,079

subject continues to evolve but for now

1838

01:02:38,390 --> 01:02:36,720

rich

1839

01:02:39,829 --> 01:02:38,400

thank you so much for joining me and

1840

01:02:41,670 --> 01:02:39,839

answering my questions it means the

1841

01:02:43,029 --> 01:02:41,680

world to me so thank you so much

1842

01:02:44,789 --> 01:02:43,039

well thanks for the invite vinnie and

1843

01:02:46,150 --> 01:02:44,799

best of luck to you and keep up the

1844

01:02:49,029 --> 01:02:46,160

great work that you're doing

1845

01:02:49,430 --> 01:02:49,039

thank you i'll try thank you so much all

1846

01:02:52,710 --> 01:02:49,440

right

1847

01:02:55,910 --> 01:02:52,720

that's good okay thank you rich

1848

01:03:00,309 --> 01:02:55,920

bye-bye guys

1849

01:03:02,150 --> 01:03:00,319

well wow wow i am

1850

01:03:03,589 --> 01:03:02,160

i'm so vibing off of that right now i

1851

01:03:07,270 --> 01:03:03,599

cannot tell you how much

1852

01:03:08,710 --> 01:03:07,280

um yeah uh guys thank you ever so much

1853

01:03:10,870 --> 01:03:08,720

for watching as always

1854

01:03:12,230 --> 01:03:10,880

i am gonna go and just wind down and

1855

01:03:14,870 --> 01:03:12,240

take all that on board

1856

01:03:15,670 --> 01:03:14,880

and um yeah what a great great

1857

01:03:17,190 --> 01:03:15,680

conversation

1858

01:03:18,870 --> 01:03:17,200

thank you all for being here for

1859

01:03:20,470 --> 01:03:18,880

everybody that's watched it live and for

1860

01:03:22,309 --> 01:03:20,480

everybody that sees it in the future

1861

01:03:23,750 --> 01:03:22,319

i'm trying to do my best to ask these

1862

01:03:25,990 --> 01:03:23,760

people the right questions

1863

01:03:27,829 --> 01:03:26,000

get some answers and just try and have a

1864

01:03:30,549 --> 01:03:27,839

positive view on where we are with this

1865

01:03:32,470 --> 01:03:30,559

subject moving forward so
