1
00:00:11,910 --> 00:00:08,390

[Music]

2
00:00:11,920 --> 00:00:16,390

oh

3
00:00:38,709 --> 00:00:23,400

[Music]

4
00:00:43,910 --> 00:00:40,869
what is up everybody welcome back to the

5
00:00:45,910 --> 00:00:43,920
channel uh what a day man um obviously

6
00:00:48,069 --> 00:00:45,920
we had the congressional hearings

7
00:00:49,510 --> 00:00:48,079
mixed feelings at the moment

8
00:00:51,270 --> 00:00:49,520
still processing everything that

9
00:00:53,270 --> 00:00:51,280
happened but

10
00:00:54,470 --> 00:00:53,280
uh yeah i'm gonna go away and watch them

11
00:00:56,310 --> 00:00:54,480
again

12
00:00:59,349 --> 00:00:56,320
probably a few times to sort of try and

13
00:01:00,790 --> 00:00:59,359

pick out anything and work with it and

14

00:01:03,110 --> 00:01:00,800

then have some conversations with some

15

00:01:05,350 --> 00:01:03,120

other people about it but uh yeah we'll

16

00:01:07,510 --> 00:01:05,360

get to that um and now another gentleman

17

00:01:09,510 --> 00:01:07,520

also live streamed the hearings today as

18

00:01:11,590 --> 00:01:09,520

my guest today so let's not waste any

19

00:01:13,990 --> 00:01:11,600

more time and bring in mr chris and

20

00:01:15,350 --> 00:01:14,000

later chris how you doing man craving

21

00:01:17,109 --> 00:01:15,360

how's it going man thanks for having me

22

00:01:19,190 --> 00:01:17,119

good hey my pleasure man good just

23

00:01:20,789 --> 00:01:19,200

always good to speak to you man so yeah

24

00:01:22,870 --> 00:01:20,799

let's talk about the hearings before we

25

00:01:25,429 --> 00:01:22,880

jump into it to other things then you

26
00:01:26,870 --> 00:01:25,439
obviously live streamed them as well um

27
00:01:28,390 --> 00:01:26,880
what was the general view that you were

28
00:01:31,910 --> 00:01:28,400
getting from them and also i suppose

29
00:01:33,910 --> 00:01:31,920
your live audience as well

30
00:01:36,149 --> 00:01:33,920
yeah it seemed like you did have

31
00:01:37,990 --> 00:01:36,159
people that were disappointed

32
00:01:40,789 --> 00:01:38,000
you know that was kind of the general a

33
00:01:42,469 --> 00:01:40,799
general impression for sure um but

34
00:01:44,550 --> 00:01:42,479
as far as me i was just happy to see

35
00:01:46,149 --> 00:01:44,560
someone in a congressional seat saying

36
00:01:48,550 --> 00:01:46,159
the word ufo

37
00:01:50,630 --> 00:01:48,560
you know or researching it and he's

38
00:01:52,710 --> 00:01:50,640

he almost didn't laugh you know it was

39

00:01:54,230 --> 00:01:52,720

like almost normal

40

00:01:56,149 --> 00:01:54,240

so

41

00:01:57,749 --> 00:01:56,159

i don't know at least they took it

42

00:01:59,749 --> 00:01:57,759

reasonably serious i think it was

43

00:02:02,469 --> 00:01:59,759

ridiculous like they didn't know who

44

00:02:04,389 --> 00:02:02,479

robert salas was you know he's like

45

00:02:07,830 --> 00:02:04,399

gallagher was like you've never heard of

46

00:02:09,830 --> 00:02:07,840

the maelstrom of uap event you know

47

00:02:10,869 --> 00:02:09,840

yeah that was shocking

48

00:02:16,150 --> 00:02:10,879

yeah

49

00:02:18,470 --> 00:02:16,160

i was happy to see it but i i guess i

50

00:02:19,990 --> 00:02:18,480

wasn't expecting any actual data

51
00:02:23,510 --> 00:02:20,000
yeah of course

52
00:02:25,350 --> 00:02:23,520
they showed two videos um

53
00:02:27,430 --> 00:02:25,360
yeah i guess what yeah i mean i i wrote

54
00:02:28,949 --> 00:02:27,440
down so moultrie what did i notice

55
00:02:31,270 --> 00:02:28,959
moultrie

56
00:02:32,949 --> 00:02:31,280
um you know i rece i i researched him

57
00:02:34,470 --> 00:02:32,959
before when he took over and i you know

58
00:02:35,509 --> 00:02:34,480
i remember back he was the dude that

59
00:02:37,430 --> 00:02:35,519
took over

60
00:02:40,150 --> 00:02:37,440
after snowden

61
00:02:42,070 --> 00:02:40,160
right so snowden made that huge mess

62
00:02:44,150 --> 00:02:42,080
yeah you know he left a huge hole i

63
00:02:45,509 --> 00:02:44,160

think he's hero right obviously

64

00:02:47,110 --> 00:02:45,519

all of his claims have been proven

65

00:02:48,070 --> 00:02:47,120

correct in a federal court of law right

66

00:02:49,750 --> 00:02:48,080

so

67

00:02:51,030 --> 00:02:49,760

as far as i'm concerned he appears

68

00:02:52,630 --> 00:02:51,040

vindicated

69

00:02:54,710 --> 00:02:52,640

um but the the

70

00:02:56,309 --> 00:02:54,720

the hole that he left right moultrie was

71

00:02:58,229 --> 00:02:56,319

brought in to basically fix that up he

72

00:03:01,030 --> 00:02:58,239

was like uh it's like a cleanup guy you

73

00:03:03,030 --> 00:03:01,040

know he's like got the a good reputation

74

00:03:05,190 --> 00:03:03,040

you know he's maybe maybe he has

75

00:03:07,350 --> 00:03:05,200

integrity and he basically

76

00:03:10,309 --> 00:03:07,360

comes in and cleans it up

77

00:03:12,790 --> 00:03:10,319

but in on the same sense

78

00:03:14,869 --> 00:03:12,800

you know snowden is still outlawed right

79

00:03:16,630 --> 00:03:14,879

they still won't let him back

80

00:03:19,589 --> 00:03:16,640

you know he's still

81

00:03:21,270 --> 00:03:19,599

even though everything he said was true

82

00:03:22,710 --> 00:03:21,280

they're like yeah you can't come back

83

00:03:24,149 --> 00:03:22,720

you know and that guy moltree was in

84

00:03:26,710 --> 00:03:24,159

charge of it i think

85

00:03:28,789 --> 00:03:26,720

he didn't solve it right i mean

86

00:03:30,630 --> 00:03:28,799

so i don't know yes strange one

87

00:03:32,789 --> 00:03:30,640

definitely i mean for me personally i

88

00:03:34,710 --> 00:03:32,799

think the questioning started off quite

89

00:03:37,270 --> 00:03:34,720

low bar and then as we went through the

90

00:03:38,949 --> 00:03:37,280

hearings it started picking up base and

91

00:03:40,869 --> 00:03:38,959

i mean i suppose one big standout was

92

00:03:42,630 --> 00:03:40,879

that the wilson davis notes got

93

00:03:45,910 --> 00:03:42,640

mentioned and you know put into the

94

00:03:47,589 --> 00:03:45,920

record which completely threw me off

95

00:03:50,470 --> 00:03:47,599

what did you think

96

00:03:52,789 --> 00:03:50,480

yeah i've i've researched it uh i don't

97

00:03:55,509 --> 00:03:52,799

know for a morning or something recently

98

00:03:57,190 --> 00:03:55,519

uh it's quite interesting to me

99

00:03:58,789 --> 00:03:57,200

but i don't know the final result like

100

00:04:00,710 --> 00:03:58,799

so did eric davis

101
00:04:03,270 --> 00:04:00,720
i heard he said it didn't happen and so

102
00:04:04,949 --> 00:04:03,280
did the admiral so did it

103
00:04:06,949 --> 00:04:04,959
yeah i mean there's been so much talk

104
00:04:09,110 --> 00:04:06,959
and speculation about that over the over

105
00:04:10,710 --> 00:04:09,120
the you know the past year or a few

106
00:04:12,390 --> 00:04:10,720
years even it's just

107
00:04:14,149 --> 00:04:12,400
we're just at a point where we just we

108
00:04:16,310 --> 00:04:14,159
need eric davis to come out and start

109
00:04:18,390 --> 00:04:16,320
talking basically you know i think

110
00:04:19,990 --> 00:04:18,400
even if he if that's now on the record

111
00:04:22,310 --> 00:04:20,000
and and further down the line people get

112
00:04:24,870 --> 00:04:22,320
subpoenaed to to testify before congress

113
00:04:26,830 --> 00:04:24,880

like eric davis i think that's what's

114

00:04:29,510 --> 00:04:26,840

that's what's needed clearly

115

00:04:32,310 --> 00:04:29,520

yeah that would be awesome i get him up

116

00:04:33,990 --> 00:04:32,320

there or the admiral right is he

117

00:04:35,110 --> 00:04:34,000

because i don't know i assume he's still

118

00:04:36,790 --> 00:04:35,120

alive but

119

00:04:39,110 --> 00:04:36,800

um but i wrote down moultrie he didn't

120

00:04:40,710 --> 00:04:39,120

say caa right they're like he was

121

00:04:42,230 --> 00:04:40,720

listing off all these organizations he

122

00:04:43,510 --> 00:04:42,240

works with and i was like listening for

123

00:04:45,830 --> 00:04:43,520

cia and

124

00:04:48,070 --> 00:04:45,840

i didn't hear it so that was interesting

125

00:04:50,390 --> 00:04:48,080

and then scott bray he's deputy director

126

00:04:51,510 --> 00:04:50,400

of the navy

127

00:04:54,070 --> 00:04:51,520

it was interesting there was no air

128

00:04:55,990 --> 00:04:54,080

force there there was no like army

129

00:04:58,310 --> 00:04:56,000

it's just that dude and they said

130

00:04:59,830 --> 00:04:58,320

increased reporting

131

00:05:00,950 --> 00:04:59,840

but then you mentioned they had 400

132

00:05:02,950 --> 00:05:00,960

reports

133

00:05:05,430 --> 00:05:02,960

and i wrote down what time you know time

134

00:05:08,150 --> 00:05:05,440

question mark and he said it goes back

135

00:05:10,469 --> 00:05:08,160

years so it's like so you have 400

136

00:05:13,029 --> 00:05:10,479

reports but i could have 400 reports as

137

00:05:14,310 --> 00:05:13,039

well you know i could go find them

138

00:05:18,070 --> 00:05:14,320

yeah

139

00:05:20,070 --> 00:05:18,080

questions by once when strip about i

140

00:05:22,230 --> 00:05:20,080

think he was leaning towards plasma dr

141

00:05:23,749 --> 00:05:22,240

wenstrup he's asked about like are these

142

00:05:26,870 --> 00:05:23,759

real objects or not and they couldn't

143

00:05:28,150 --> 00:05:26,880

get a clean answer out the guy

144

00:05:29,670 --> 00:05:28,160

and went strip it seems like he's trying

145

00:05:31,110 --> 00:05:29,680

to help him but i feel like he's gonna

146

00:05:32,550 --> 00:05:31,120

be asking a bunch of questions in the

147

00:05:33,990 --> 00:05:32,560

cli behind the doors you know the

148

00:05:35,350 --> 00:05:34,000

classified

149

00:05:39,510 --> 00:05:35,360

yeah

150

00:05:42,150 --> 00:05:39,520

solace he was just blown away he's like

151
00:05:43,350 --> 00:05:42,160
you haven't heard of

152
00:05:46,230 --> 00:05:43,360
solace

153
00:05:49,749 --> 00:05:46,240
um because it's solid i mean he did

154
00:05:51,749 --> 00:05:49,759
how many conferences did he do in dc

155
00:05:52,950 --> 00:05:51,759
well he's been speaking for decades as

156
00:05:54,790 --> 00:05:52,960
well right

157
00:05:58,629 --> 00:05:54,800
or maybe he's talked to congress and but

158
00:06:01,830 --> 00:06:00,150
it just goes to show because we know

159
00:06:03,350 --> 00:06:01,840
that atip were aware of the malmstrom

160
00:06:06,070 --> 00:06:03,360
incident you know so obviously they're

161
00:06:09,430 --> 00:06:06,080
not sharing information down through you

162
00:06:12,950 --> 00:06:09,440
know into the uap task force then into

163
00:06:13,990 --> 00:06:12,960

aoi msg they're just you know it's it's

164

00:06:16,469 --> 00:06:14,000

there's just

165

00:06:18,230 --> 00:06:16,479

no data sharing and i think

166

00:06:19,909 --> 00:06:18,240

it needs to be addressed i think it

167

00:06:21,670 --> 00:06:19,919

probably will be but again it's just

168

00:06:23,510 --> 00:06:21,680

drip slow

169

00:06:25,189 --> 00:06:23,520

progress basically

170

00:06:28,150 --> 00:06:25,199

i guess they showed

171

00:06:29,909 --> 00:06:28,160

well there was the one new video right

172

00:06:32,309 --> 00:06:29,919

that was just hilarious i laughed so

173

00:06:34,790 --> 00:06:32,319

hard were you guys laughing as well

174

00:06:36,950 --> 00:06:34,800

i mean i was like

175

00:06:39,670 --> 00:06:36,960

yeah they just couldn't get any worse

176

00:06:41,670 --> 00:06:39,680

i've actually got a still image

177

00:06:43,189 --> 00:06:41,680

here let me see do you have it can we

178

00:06:45,110 --> 00:06:43,199

look at it to see what it actually looks

179

00:06:47,510 --> 00:06:45,120

like because yeah sure and now i'm just

180

00:06:48,870 --> 00:06:47,520

curious you know like

181

00:06:51,830 --> 00:06:48,880

uh

182

00:06:54,710 --> 00:06:51,840

yeah oh wrong one

183

00:06:57,430 --> 00:06:54,720

so i mean obviously zoom in it's really

184

00:06:58,230 --> 00:06:57,440

blurred that's as far as as it will go

185

00:06:59,830 --> 00:06:58,240

but

186

00:07:01,430 --> 00:06:59,840

i mean it's certainly not the same image

187

00:07:02,950 --> 00:07:01,440

as the batman balloon is it and it

188

00:07:05,830 --> 00:07:02,960

doesn't look like the blimp or the

189

00:07:07,350 --> 00:07:05,840

sphere from the the three mystery wire

190

00:07:08,870 --> 00:07:07,360

so i mean i just

191

00:07:11,350 --> 00:07:08,880

looks like a tic tac

192

00:07:12,790 --> 00:07:11,360

who knows

193

00:07:15,189 --> 00:07:12,800

it looks like those white spheres right

194

00:07:17,589 --> 00:07:15,199

the ones that like uh dave falch he

195

00:07:19,029 --> 00:07:17,599

recorded the jacksonville

196

00:07:20,710 --> 00:07:19,039

uap

197

00:07:22,309 --> 00:07:20,720

yeah i mean

198

00:07:24,390 --> 00:07:22,319

see i've seen some of your videos where

199

00:07:26,469 --> 00:07:24,400

you analyze images and you know

200

00:07:27,589 --> 00:07:26,479

this big bit on the side here you know

201
00:07:29,990 --> 00:07:27,599
it's making me think of the way that

202
00:07:31,670 --> 00:07:30,000
you've done analysis in the past so i

203
00:07:33,749 --> 00:07:31,680
don't know maybe you need to

204
00:07:35,430 --> 00:07:33,759
it looks like shadow you know the light

205
00:07:36,870 --> 00:07:35,440
is basically

206
00:07:37,670 --> 00:07:36,880
i would check where the sun's coming

207
00:07:38,390 --> 00:07:37,680
from

208
00:07:41,029 --> 00:07:38,400
yeah

209
00:07:42,790 --> 00:07:41,039
i would look at the video and if you see

210
00:07:47,270 --> 00:07:42,800
the sun's coming from that left side

211
00:07:50,950 --> 00:07:48,629
it would have to be later in the day

212
00:07:52,309 --> 00:07:50,960
right well where's the horizon

213
00:07:54,469 --> 00:07:52,319

yeah i mean that's

214

00:07:56,390 --> 00:07:54,479

so it's kind of earlier in the day so

215

00:07:57,350 --> 00:07:56,400

yeah that it's probably just the sun

216

00:07:58,790 --> 00:07:57,360

right

217

00:08:00,950 --> 00:07:58,800

like angled

218

00:08:02,309 --> 00:08:00,960

it could be i guess so but it does still

219

00:08:04,790 --> 00:08:02,319

make it

220

00:08:07,110 --> 00:08:04,800

it is a white object

221

00:08:08,710 --> 00:08:07,120

it looks like the tic tac to me or

222

00:08:10,869 --> 00:08:08,720

or a white ball

223

00:08:13,350 --> 00:08:10,879

um

224

00:08:15,110 --> 00:08:13,360

yeah you know it was crazy but if you

225

00:08:17,110 --> 00:08:15,120

look at it too can you go back i think

226
00:08:21,749 --> 00:08:17,120
it is yeah

227
00:08:28,070 --> 00:08:26,230
it's also they talk about the

228
00:08:29,510 --> 00:08:28,080
you know i just did a video recently

229
00:08:32,230 --> 00:08:29,520
this i have another one coming out uh

230
00:08:34,389 --> 00:08:32,240
friday the second part of ryan graves oh

231
00:08:37,589 --> 00:08:34,399
okay cool yeah i saw the first one oh

232
00:08:39,909 --> 00:08:37,599
cool yeah thanks and they do uh the

233
00:08:42,550 --> 00:08:39,919
the cube it's this cube but not inside

234
00:08:44,870 --> 00:08:42,560
of a sphere

235
00:08:45,990 --> 00:08:44,880
so the question is could this be like

236
00:08:48,150 --> 00:08:46,000
the sphere

237
00:08:50,310 --> 00:08:48,160
right but for some reason you can see

238
00:08:51,430 --> 00:08:50,320

the the outer or it's reflecting the

239

00:08:52,949 --> 00:08:51,440

sunlight

240

00:08:54,630 --> 00:08:52,959

you know they mentioned they also

241

00:08:55,829 --> 00:08:54,640

mentioned today's signature management i

242

00:08:58,310 --> 00:08:55,839

think i think there's actually a lot of

243

00:08:59,910 --> 00:08:58,320

good stuff in the in the hearings

244

00:09:01,829 --> 00:08:59,920

yeah it's like the last year's report

245

00:09:03,990 --> 00:09:01,839

where we end up breaking down

246

00:09:05,590 --> 00:09:04,000

pulling little nuggets out but i think

247

00:09:07,910 --> 00:09:05,600

it will like i said it will take a few

248

00:09:10,310 --> 00:09:07,920

watches to find them and really isolate

249

00:09:12,790 --> 00:09:10,320

them from all the

250

00:09:15,110 --> 00:09:12,800

signature management though

251
00:09:17,990 --> 00:09:15,120
signature management is you know keeping

252
00:09:20,790 --> 00:09:18,000
your emissions electronic

253
00:09:22,870 --> 00:09:20,800
or everything right

254
00:09:24,389 --> 00:09:22,880
yeah your your secret buildings have to

255
00:09:25,590 --> 00:09:24,399
be completely shielded all these

256
00:09:26,470 --> 00:09:25,600
different manners

257
00:09:27,590 --> 00:09:26,480
yeah

258
00:09:29,750 --> 00:09:27,600
um so

259
00:09:31,829 --> 00:09:29,760
for this it could be that box or the

260
00:09:33,990 --> 00:09:31,839
cube in a sphere

261
00:09:35,269 --> 00:09:34,000
right if you imagine because ryan graves

262
00:09:37,350 --> 00:09:35,279
the the

263
00:09:39,829 --> 00:09:37,360

they said it was 15 to 30 feet this

264

00:09:43,670 --> 00:09:41,350

uh it seems like it was smaller than

265

00:09:44,550 --> 00:09:43,680

that and closer

266

00:09:47,430 --> 00:09:44,560

all right

267

00:09:49,030 --> 00:09:47,440

but yeah i mean it's definitely weird if

268

00:09:52,150 --> 00:09:49,040

you zoom out too it's up higher right it

269

00:09:56,310 --> 00:09:54,630

that's i can't tell altitude on that

270

00:09:58,150 --> 00:09:56,320

isn't it man yeah there's no clouds or

271

00:10:00,949 --> 00:09:58,160

anything

272

00:10:02,310 --> 00:10:00,959

so yeah oh yeah

273

00:10:04,150 --> 00:10:02,320

um

274

00:10:06,470 --> 00:10:04,160

the sky is pretty blue though pretty

275

00:10:09,829 --> 00:10:08,550

i mean this is your domain man i i i

276

00:10:12,790 --> 00:10:09,839

don't i have that

277

00:10:14,389 --> 00:10:12,800

man i mean that's no batman balloon man

278

00:10:15,509 --> 00:10:14,399

i don't know what that is

279

00:10:16,870 --> 00:10:15,519

you know because we're going to launch a

280

00:10:19,670 --> 00:10:16,880

weather balloon we're launching one on

281

00:10:21,990 --> 00:10:19,680

27th yeah yeah yeah we'll get into that

282

00:10:23,430 --> 00:10:22,000

as well it doesn't just look like a

283

00:10:25,190 --> 00:10:23,440

circle

284

00:10:27,030 --> 00:10:25,200

they don't look like

285

00:10:28,470 --> 00:10:27,040

spherical balls

286

00:10:30,310 --> 00:10:28,480

you know i think we'll show that they

287

00:10:32,069 --> 00:10:30,320

look like a you know a sock that's

288

00:10:33,910 --> 00:10:32,079

filling up or they look like those

289

00:10:38,150 --> 00:10:33,920

tornado things

290

00:10:39,430 --> 00:10:38,160

there's been some uaps back in the past

291

00:10:41,990 --> 00:10:39,440

where

292

00:10:44,230 --> 00:10:42,000

uh people have mentioned tornadoes or

293

00:10:46,949 --> 00:10:44,240

some sort of funnel

294

00:10:50,230 --> 00:10:46,959

right you know that it sort of looks

295

00:10:51,670 --> 00:10:50,240

more like that for your weather balloons

296

00:10:54,310 --> 00:10:51,680

but just like a ball like this just

297

00:10:55,990 --> 00:10:54,320

sitting there like a perfect sphere

298

00:10:57,350 --> 00:10:56,000

i don't know

299

00:10:58,710 --> 00:10:57,360

seems weird

300

00:11:00,470 --> 00:10:58,720

definitely

301
00:11:02,870 --> 00:11:00,480
well maybe you'll have to get the video

302
00:11:04,069 --> 00:11:02,880
and do one of your special analysis on

303
00:11:06,870 --> 00:11:04,079
it and

304
00:11:08,230 --> 00:11:06,880
let us know what you come up with man

305
00:11:10,790 --> 00:11:08,240
yeah that would be yeah we'll get the

306
00:11:13,430 --> 00:11:10,800
video so we have multiple frames

307
00:11:15,110 --> 00:11:13,440
yeah i think i'll be good man so

308
00:11:16,949 --> 00:11:15,120
yeah well you mentioned there the ryan

309
00:11:19,829 --> 00:11:16,959
graves video i mean what did

310
00:11:21,269 --> 00:11:19,839
what was your take away from that aia

311
00:11:24,310 --> 00:11:21,279
talk that he did was there anything that

312
00:11:29,030 --> 00:11:25,910
yeah i mean i well i have the second

313
00:11:31,829 --> 00:11:29,040

part going out uh this friday so tune in

314

00:11:34,150 --> 00:11:31,839

for the final conclusions um

315

00:11:36,230 --> 00:11:34,160

but uh i would say there's a lot of good

316

00:11:37,990 --> 00:11:36,240

information in that in that

317

00:11:39,430 --> 00:11:38,000

video that was why i made it actually

318

00:11:41,509 --> 00:11:39,440

was

319

00:11:45,190 --> 00:11:41,519

we kept just talking about the gimbal

320

00:11:47,110 --> 00:11:45,200

rotating or something is it rotating or

321

00:11:48,710 --> 00:11:47,120

is the flare one video is it going

322

00:11:49,990 --> 00:11:48,720

really fast

323

00:11:51,509 --> 00:11:50,000

and

324

00:11:53,110 --> 00:11:51,519

we weren't focusing on all this other

325

00:11:54,150 --> 00:11:53,120

data that was released about the same

326

00:11:55,590 --> 00:11:54,160

topic

327

00:11:57,350 --> 00:11:55,600

yeah you know ryan graves he released

328

00:11:59,990 --> 00:11:57,360

this whole video and he only had 4 000

329

00:12:01,350 --> 00:12:00,000

views or something it was very low

330

00:12:03,750 --> 00:12:01,360

and i was like man we just don't have

331

00:12:05,269 --> 00:12:03,760

any data um but i think people just

332

00:12:06,710 --> 00:12:05,279

weren't aware of it and i went back and

333

00:12:07,990 --> 00:12:06,720

looked as well because i wasn't aware i

334

00:12:09,590 --> 00:12:08,000

guess you know just people aren't

335

00:12:11,430 --> 00:12:09,600

talking about it

336

00:12:12,710 --> 00:12:11,440

and so you're expecting all this new

337

00:12:13,670 --> 00:12:12,720

stuff to come out this new stuff we're

338

00:12:15,430 --> 00:12:13,680

going to have better videos and

339

00:12:16,629 --> 00:12:15,440

everything but he really goes through

340

00:12:18,949 --> 00:12:16,639

all the tactics you know they're

341

00:12:21,350 --> 00:12:18,959

basically they have them flying in a v

342

00:12:23,030 --> 00:12:21,360

yeah like you hear at phoenix lights or

343

00:12:24,790 --> 00:12:23,040

you hear people talking about orbs fine

344

00:12:26,470 --> 00:12:24,800

and v's

345

00:12:28,150 --> 00:12:26,480

and then in the middle it's like that

346

00:12:30,470 --> 00:12:28,160

gimbal object so it has them flying

347

00:12:32,870 --> 00:12:30,480

around basically in a formation but the

348

00:12:34,710 --> 00:12:32,880

gimbal object doesn't fly uh

349

00:12:36,870 --> 00:12:34,720

it just it'll stop and then go back the

350

00:12:38,470 --> 00:12:36,880

opposite direction

351
00:12:39,430 --> 00:12:38,480
and the other objects were smaller when

352
00:12:40,949 --> 00:12:39,440
they're smaller than the gimbal

353
00:12:42,310 --> 00:12:40,959
apparently

354
00:12:45,269 --> 00:12:42,320
i don't know

355
00:12:46,310 --> 00:12:45,279
i didn't get any real size thing he drew

356
00:12:48,310 --> 00:12:46,320
it

357
00:12:51,750 --> 00:12:48,320
bigger on the board

358
00:12:54,470 --> 00:12:53,269
you it doesn't mean they were larger

359
00:12:56,550 --> 00:12:54,480
right because they said well they said

360
00:12:58,629 --> 00:12:56,560
it's 15 to 30 feet

361
00:13:01,110 --> 00:12:58,639
and what i could tell from the gimbal

362
00:13:03,110 --> 00:13:01,120
object if it was like seven miles away

363
00:13:05,110 --> 00:13:03,120

is i think it was like 30 feet across so

364

00:13:06,949 --> 00:13:05,120

it could be the same

365

00:13:08,790 --> 00:13:06,959

that could be what we're seeing

366

00:13:10,949 --> 00:13:08,800

yeah yeah i mean the conversation

367

00:13:12,790 --> 00:13:10,959

the conversation is still ongoing you

368

00:13:15,910 --> 00:13:12,800

see it a lot on twitter with mick weston

369

00:13:17,430 --> 00:13:15,920

and mary marrick is it um

370

00:13:21,590 --> 00:13:17,440

and i think is mick we're still talking

371

00:13:23,269 --> 00:13:21,600

about it being 30 nautical miles away

372

00:13:24,470 --> 00:13:23,279

if i'm right i don't know

373

00:13:28,629 --> 00:13:24,480

it's just

374

00:13:33,670 --> 00:13:31,190

like okay forget the video you know go

375

00:13:35,030 --> 00:13:33,680

look at this other awesome like witness

376

00:13:36,230 --> 00:13:35,040

account you know multiple witness

377

00:13:38,069 --> 00:13:36,240

accounts so what they're talking about

378

00:13:39,430 --> 00:13:38,079

it's multiple witnesses right multiple

379

00:13:41,910 --> 00:13:39,440

pilots again

380

00:13:43,509 --> 00:13:41,920

yeah and you have your visual

381

00:13:45,750 --> 00:13:43,519

um you know they basically say they saw

382

00:13:46,710 --> 00:13:45,760

it visually very close up up close and

383

00:13:49,189 --> 00:13:46,720

it was a

384

00:13:50,710 --> 00:13:49,199

dark gray or black cube

385

00:13:52,629 --> 00:13:50,720

inside of a sphere and the sphere

386

00:13:54,710 --> 00:13:52,639

touched the points

387

00:13:55,990 --> 00:13:54,720

so you know that's pretty good witness

388

00:13:58,310 --> 00:13:56,000

testimony and you're not going to get a

389

00:14:00,069 --> 00:13:58,320

video that just how it happens

390

00:14:01,269 --> 00:14:00,079

on a on a fighter

391

00:14:03,030 --> 00:14:01,279

you know they got pretty lucky just

392

00:14:04,949 --> 00:14:03,040

getting that picture like like they said

393

00:14:06,230 --> 00:14:04,959

you saw how fast it happened you know

394

00:14:09,350 --> 00:14:06,240

yeah

395

00:14:11,350 --> 00:14:09,360

would happen if it's not that big or

396

00:14:13,430 --> 00:14:11,360

you're trying to get close to it

397

00:14:15,189 --> 00:14:13,440

because up high you just

398

00:14:17,670 --> 00:14:15,199

like i was saying before is you have to

399

00:14:19,829 --> 00:14:17,680

be going fast over the ground

400

00:14:22,550 --> 00:14:19,839

to produce enough lift when you're

401
00:14:23,590 --> 00:14:22,560
higher because there's less air

402
00:14:25,350 --> 00:14:23,600
so

403
00:14:27,910 --> 00:14:25,360
i don't know how that makes you have to

404
00:14:29,670 --> 00:14:27,920
go faster up higher to not fall

405
00:14:31,750 --> 00:14:29,680
yeah because there's less air right you

406
00:14:32,790 --> 00:14:31,760
know imagine that it the air is pushing

407
00:14:34,069 --> 00:14:32,800
you up

408
00:14:35,350 --> 00:14:34,079
you know the air is pushing you're like

409
00:14:37,750 --> 00:14:35,360
riding on the air

410
00:14:38,949 --> 00:14:37,760
essentially and then as the air gets

411
00:14:41,590 --> 00:14:38,959
less and less now you have to actually

412
00:14:43,030 --> 00:14:41,600
go faster over the ground so

413
00:14:45,189 --> 00:14:43,040

the higher you go like these things up

414

00:14:47,110 --> 00:14:45,199

at 28 000 feet that's pretty high you

415

00:14:48,710 --> 00:14:47,120

know it's like the top of everest

416

00:14:49,990 --> 00:14:48,720

yeah there's not that much air up there

417

00:14:52,470 --> 00:14:50,000

you know if this thing is just sitting

418

00:14:54,069 --> 00:14:52,480

there that is super super strange and

419

00:14:55,269 --> 00:14:54,079

it's not so easy for our planes to get

420

00:14:56,389 --> 00:14:55,279

there you know your helicopters aren't

421

00:14:58,389 --> 00:14:56,399

going to get there

422

00:15:00,150 --> 00:14:58,399

yeah of course so i don't know it's a

423

00:15:01,030 --> 00:15:00,160

cool video i guess that is a cool video

424

00:15:02,230 --> 00:15:01,040

um

425

00:15:03,590 --> 00:15:02,240

i'm glad they shared it i mean that's

426

00:15:05,590 --> 00:15:03,600

cool right in the halls of congress they

427

00:15:07,590 --> 00:15:05,600

played that video it's pretty badass i

428

00:15:10,150 --> 00:15:07,600

mean i i think most people were

429

00:15:11,509 --> 00:15:10,160

not expecting any videos or or images or

430

00:15:13,910 --> 00:15:11,519

anything today so when he said we're

431

00:15:15,990 --> 00:15:13,920

gonna look at a video i was like okay

432

00:15:18,629 --> 00:15:16,000

but i mean i i i would have hoped for

433

00:15:20,310 --> 00:15:18,639

something better even in the the public

434

00:15:22,230 --> 00:15:20,320

hearings but

435

00:15:25,030 --> 00:15:22,240

yeah they went what was with corbel

436

00:15:26,870 --> 00:15:25,040

corbell jeremy did they

437

00:15:28,550 --> 00:15:26,880

i heard his name or something came up

438

00:15:30,150 --> 00:15:28,560

all right here was mention of amateurs

439

00:15:32,550 --> 00:15:30,160

and i was like who are they talking

440

00:15:33,990 --> 00:15:32,560

about he was mentioned early on with uh

441

00:15:36,150 --> 00:15:34,000

when carson was

442

00:15:37,670 --> 00:15:36,160

just a pretty much opening statement um

443

00:15:38,870 --> 00:15:37,680

but then obviously

444

00:15:42,790 --> 00:15:38,880

they showed the

445

00:15:44,389 --> 00:15:42,800

night vision pyramid video and

446

00:15:46,790 --> 00:15:44,399

pretty much said it was

447

00:15:49,749 --> 00:15:46,800

camera artifacts or an artifact of the

448

00:15:51,269 --> 00:15:49,759

night vision and the slr camera

449

00:15:53,509 --> 00:15:51,279

fair enough i mean

450

00:15:56,949 --> 00:15:53,519

again i'm not technically

451
00:16:03,269 --> 00:16:00,550
well so i know those mvgs right the mg

452
00:16:05,590 --> 00:16:03,279
there's no aperture in the mbgs

453
00:16:07,030 --> 00:16:05,600
it's a phosphorus i wish i had if i can

454
00:16:09,110 --> 00:16:07,040
find it

455
00:16:11,110 --> 00:16:09,120
yeah so basically it's just

456
00:16:12,550 --> 00:16:11,120
there's no aperture like a normal lens

457
00:16:14,389 --> 00:16:12,560
it's a screen

458
00:16:16,230 --> 00:16:14,399
you know it's a video screen

459
00:16:17,670 --> 00:16:16,240
that hits phosphorus it's just

460
00:16:18,790 --> 00:16:17,680
phosphorus grain that's why it's all in

461
00:16:21,430 --> 00:16:18,800
green because it's actually little

462
00:16:25,590 --> 00:16:23,670
impacts on the screen

463
00:16:27,590 --> 00:16:25,600

right so it uh

464

00:16:30,389 --> 00:16:27,600

so there's no aperture

465

00:16:31,910 --> 00:16:30,399

and so if they're videoing right if with

466

00:16:35,430 --> 00:16:31,920

a phone

467

00:16:37,430 --> 00:16:35,440

right i think it was an slr from one

468

00:16:38,870 --> 00:16:37,440

yeah they said slr so let's say it's an

469

00:16:41,189 --> 00:16:38,880

slr

470

00:16:42,629 --> 00:16:41,199

right um your your focus distance is

471

00:16:44,470 --> 00:16:42,639

gonna be like the same you know it's

472

00:16:46,550 --> 00:16:44,480

just a screen it's like you're videoing

473

00:16:48,550 --> 00:16:46,560

a normal screen

474

00:16:49,590 --> 00:16:48,560

so i'm just curious how it would bogey

475

00:16:51,269 --> 00:16:49,600

out like that

476

00:16:53,509 --> 00:16:51,279

yeah i think this is another one of

477

00:16:55,110 --> 00:16:53,519

those conversations that isn't over yet

478

00:16:56,790 --> 00:16:55,120

even after what was shown today i think

479

00:16:59,110 --> 00:16:56,800

it'll just continue

480

00:17:01,509 --> 00:16:59,120

was that a longer video it seemed longer

481

00:17:04,870 --> 00:17:01,519

i haven't looked at it but i don't think

482

00:17:06,630 --> 00:17:04,880

so no i think it was the standard one

483

00:17:08,949 --> 00:17:06,640

that we've seen

484

00:17:11,590 --> 00:17:08,959

seen before i'm pretty sure

485

00:17:13,590 --> 00:17:11,600

i i i don't know i kind of haven't

486

00:17:15,669 --> 00:17:13,600

focused on that video for since last

487

00:17:17,750 --> 00:17:15,679

year now because

488

00:17:19,429 --> 00:17:17,760

you know it was difficult i haven't

489

00:17:20,630 --> 00:17:19,439

either it's also on the other side of

490

00:17:25,990 --> 00:17:20,640

the

491

00:17:27,270 --> 00:17:26,000

you know mentally or something

492

00:17:28,309 --> 00:17:27,280

yeah that was the west coast one but

493

00:17:30,310 --> 00:17:28,319

then he did say obviously in the

494

00:17:31,750 --> 00:17:30,320

hearings that they'd got that image that

495

00:17:33,430 --> 00:17:31,760

they showed afterwards which was an east

496

00:17:34,950 --> 00:17:33,440

coast image so they'd seen it on both

497

00:17:36,230 --> 00:17:34,960

coasts and

498

00:17:38,789 --> 00:17:36,240

yeah

499

00:17:40,150 --> 00:17:38,799

i guess they're just trying to

500

00:17:42,950 --> 00:17:40,160

we'll see

501
00:17:44,310 --> 00:17:42,960
um now listen let's get into what one

502
00:17:47,110 --> 00:17:44,320
thing i really wanted to speak to about

503
00:17:48,470 --> 00:17:47,120
is uap society this is your new venture

504
00:17:50,070 --> 00:17:48,480
well i mean i think it's been building

505
00:17:52,390 --> 00:17:50,080
up for some time but

506
00:17:53,669 --> 00:17:52,400
can you give us the kind of breakdown of

507
00:17:56,070 --> 00:17:53,679
of it so

508
00:17:57,669 --> 00:17:56,080
what made you want to do it what it is

509
00:17:59,270 --> 00:17:57,679
how it was set up you know all the kind

510
00:18:01,750 --> 00:17:59,280
of

511
00:18:04,470 --> 00:18:01,760
everything about it basically yeah

512
00:18:06,150 --> 00:18:04,480
uap society

513
00:18:09,190 --> 00:18:06,160

basically i just

514

00:18:10,789 --> 00:18:09,200

love the nft web 3 technology you know

515

00:18:12,870 --> 00:18:10,799

when i first started my youtube channel

516

00:18:14,549 --> 00:18:12,880

it wasn't about uaps

517

00:18:16,710 --> 00:18:14,559

it was about

518

00:18:18,310 --> 00:18:16,720

you know i wanted to do like future tech

519

00:18:20,870 --> 00:18:18,320

you know and i and i found these five

520

00:18:22,870 --> 00:18:20,880

main breakthrough technologies

521

00:18:25,669 --> 00:18:22,880

um that are happening right now

522

00:18:27,830 --> 00:18:25,679

and blockchain was is one of them

523

00:18:29,590 --> 00:18:27,840

um and so i think that

524

00:18:31,110 --> 00:18:29,600

i just got interested in it and for that

525

00:18:33,590 --> 00:18:31,120

reason

526

00:18:36,950 --> 00:18:33,600

and then when i i fell into the uap

527

00:18:38,070 --> 00:18:36,960

rabbit hole last uh last may really you

528

00:18:39,830 --> 00:18:38,080

know with the whole report i couldn't

529

00:18:41,909 --> 00:18:39,840

believe it was true i've

530

00:18:43,350 --> 00:18:41,919

changed my whole views on it on many

531

00:18:44,470 --> 00:18:43,360

things in life

532

00:18:45,590 --> 00:18:44,480

in general

533

00:18:47,909 --> 00:18:45,600

and

534

00:18:48,950 --> 00:18:47,919

but what i found is that just the

535

00:18:51,430 --> 00:18:48,960

the

536

00:18:53,110 --> 00:18:51,440

nfts or web 3

537

00:18:54,310 --> 00:18:53,120

is such a perfect

538

00:18:57,430 --> 00:18:54,320

solution

539

00:18:58,870 --> 00:18:57,440

to our information embargo that we're

540

00:19:01,350 --> 00:18:58,880

basically under you know if you look at

541

00:19:03,830 --> 00:19:01,360

it i mean we're basically not being told

542

00:19:06,070 --> 00:19:03,840

information by the gatekeepers

543

00:19:07,270 --> 00:19:06,080

yeah you know whether it's academia you

544

00:19:09,190 --> 00:19:07,280

know or

545

00:19:12,310 --> 00:19:09,200

or it's the contractors military

546

00:19:13,990 --> 00:19:12,320

industrial complex or the governments

547

00:19:15,669 --> 00:19:14,000

no one's able to find the data and when

548

00:19:17,190 --> 00:19:15,679

you try and ask for

549

00:19:19,270 --> 00:19:17,200

you know well what have you done what

550

00:19:20,950 --> 00:19:19,280

are you looking for

551
00:19:23,029 --> 00:19:20,960
no one has an answer right no one wants

552
00:19:24,470 --> 00:19:23,039
to share that's really it just comes out

553
00:19:26,630 --> 00:19:24,480
no one wants to share right everyone

554
00:19:28,310 --> 00:19:26,640
wants wants your information

555
00:19:31,029 --> 00:19:28,320
everyone wants to know

556
00:19:32,630 --> 00:19:31,039
but then no one wants to share

557
00:19:35,029 --> 00:19:32,640
ultimately so

558
00:19:38,230 --> 00:19:35,039
the whole point of uap society is

559
00:19:40,390 --> 00:19:38,240
everyone pitches in everyone chips in

560
00:19:42,150 --> 00:19:40,400
decentralized way

561
00:19:43,909 --> 00:19:42,160
but all the information has to come out

562
00:19:46,310 --> 00:19:43,919
open source

563
00:19:48,390 --> 00:19:46,320

okay and so basically you just pick the

564

00:19:50,070 --> 00:19:48,400

long mission and the mission at the end

565

00:19:52,789 --> 00:19:50,080

is is to

566

00:19:55,029 --> 00:19:52,799

propel the transition of the world to a

567

00:19:57,190 --> 00:19:55,039

better understanding of the uap

568

00:19:59,430 --> 00:19:57,200

phenomena right and for the betterment

569

00:20:00,870 --> 00:19:59,440

of of people in the world

570

00:20:04,070 --> 00:20:00,880

it's kind of so that's that is the

571

00:20:06,470 --> 00:20:04,080

mission and i think it's worthwhile

572

00:20:07,990 --> 00:20:06,480

um to pursue and and

573

00:20:09,909 --> 00:20:08,000

that's why i'm doing it like full steam

574

00:20:11,430 --> 00:20:09,919

you know put basically all in

575

00:20:14,390 --> 00:20:11,440

because i think it's you just have one

576
00:20:15,510 --> 00:20:14,400
of those rare opportunities to

577
00:20:18,789 --> 00:20:15,520
shape

578
00:20:20,310 --> 00:20:18,799
basically how the future can be written

579
00:20:21,750 --> 00:20:20,320
um because i went to yeah i've been to

580
00:20:23,510 --> 00:20:21,760
two conferences now and it's just

581
00:20:25,750 --> 00:20:23,520
starting now

582
00:20:28,710 --> 00:20:25,760
so how does that play tie in with the

583
00:20:30,950 --> 00:20:28,720
scientific community then where i mean

584
00:20:33,990 --> 00:20:30,960
the funds from the the blockchain and

585
00:20:35,350 --> 00:20:34,000
your company how does that

586
00:20:37,110 --> 00:20:35,360
how does that get to the scientific

587
00:20:39,430 --> 00:20:37,120
community and what do they do and how

588
00:20:41,270 --> 00:20:39,440

does it feed back is it is it just the

589

00:20:43,350 --> 00:20:41,280

people that invest or is it then open

590

00:20:45,510 --> 00:20:43,360

source to to the public after you know

591

00:20:48,390 --> 00:20:45,520

the the the data

592

00:20:50,230 --> 00:20:48,400

yeah so basically it just starts on um

593

00:20:51,830 --> 00:20:50,240

it starts on the discord can i just

594

00:20:53,830 --> 00:20:51,840

share it i think it'll be easy just to

595

00:20:56,070 --> 00:20:53,840

show sure yeah absolutely yeah what it

596

00:20:58,390 --> 00:20:56,080

is you know because it's it's web three

597

00:21:00,070 --> 00:20:58,400

right this is web3

598

00:21:02,549 --> 00:21:00,080

i mean i've heard the term banded about

599

00:21:05,029 --> 00:21:02,559

a lot recently but you know

600

00:21:07,909 --> 00:21:05,039

i have no idea what it is

601
00:21:09,270 --> 00:21:07,919
web 1.0 is basically just dial up you

602
00:21:10,710 --> 00:21:09,280
know you go to web pages you get

603
00:21:12,789 --> 00:21:10,720
information

604
00:21:15,029 --> 00:21:12,799
web 2.0 is what you and i are doing

605
00:21:17,830 --> 00:21:15,039
right now right i go to an app you go to

606
00:21:19,750 --> 00:21:17,840
your app or communicating and then all

607
00:21:21,510 --> 00:21:19,760
these people can participate you know

608
00:21:23,510 --> 00:21:21,520
it's but it's through a shared

609
00:21:25,270 --> 00:21:23,520
centralized server

610
00:21:28,149 --> 00:21:25,280
through through youtube and another

611
00:21:29,430 --> 00:21:28,159
company stream yard right yeah um so

612
00:21:31,190 --> 00:21:29,440
basically

613
00:21:32,789 --> 00:21:31,200

the next layer of the internet is going

614

00:21:34,549 --> 00:21:32,799

to be through all these decentralized

615

00:21:37,430 --> 00:21:34,559

societies

616

00:21:40,230 --> 00:21:37,440

um and let me show you

617

00:21:42,149 --> 00:21:40,240

i have it here yeah you ready to go yeah

618

00:21:44,870 --> 00:21:42,159

yeah so you can hit it so this is

619

00:21:47,350 --> 00:21:44,880

basically the uap

620

00:21:52,630 --> 00:21:47,360

discord

621

00:21:54,710 --> 00:21:52,640

just um software it's like another

622

00:21:56,950 --> 00:21:54,720

social network but it's it's more

623

00:21:58,390 --> 00:21:56,960

powerful right we have listening area

624

00:22:00,549 --> 00:21:58,400

you know you can there's people talking

625

00:22:02,390 --> 00:22:00,559

in here right now you know i can join in

626
00:22:03,770 --> 00:22:02,400
just talk with them

627
00:22:05,510 --> 00:22:03,780
we can add in different um

628
00:22:07,430 --> 00:22:05,520
[Music]

629
00:22:09,190 --> 00:22:07,440
uh different coding okay you can just

630
00:22:11,190 --> 00:22:09,200
add different codes

631
00:22:13,830 --> 00:22:11,200
as well there's help there's video so

632
00:22:16,230 --> 00:22:13,840
it's just a very powerful

633
00:22:18,310 --> 00:22:16,240
network social network app if you will

634
00:22:19,830 --> 00:22:18,320
right so this is like the front end if

635
00:22:22,230 --> 00:22:19,840
you will so

636
00:22:24,870 --> 00:22:22,240
this is where the discord community

637
00:22:27,350 --> 00:22:24,880
we would come up with research proposals

638
00:22:29,750 --> 00:22:27,360

right so decide proposals

639

00:22:32,390 --> 00:22:29,760

okay if you have access to this channel

640

00:22:35,350 --> 00:22:32,400

because for whatever reason we determine

641

00:22:37,270 --> 00:22:35,360

now you can put in different proposals

642

00:22:39,110 --> 00:22:37,280

that you will do in the future so you

643

00:22:43,830 --> 00:22:39,120

say you know vinnie

644

00:22:46,630 --> 00:22:43,840

uap disclosure team uh uk so the the uk

645

00:22:49,750 --> 00:22:46,640

uh uap group is going to band together

646

00:22:52,390 --> 00:22:49,760

we will put up you know three sky 360

647

00:22:53,990 --> 00:22:52,400

systems we'll build them it'll cost

648

00:22:56,789 --> 00:22:54,000

fifteen thousand dollars you know we'll

649

00:22:58,230 --> 00:22:56,799

be done in six months or whatever in

650

00:22:59,270 --> 00:22:58,240

this area we're going to cover these

651
00:23:01,430 --> 00:22:59,280
areas

652
00:23:03,669 --> 00:23:01,440
right so the community now what you can

653
00:23:05,830 --> 00:23:03,679
do is you can just vote right i know it

654
00:23:08,789 --> 00:23:05,840
sounds ridiculous but this is it you can

655
00:23:10,390 --> 00:23:08,799
vote right where okay this is you can

656
00:23:12,230 --> 00:23:10,400
only vote once and this will be like

657
00:23:13,270 --> 00:23:12,240
yeah i want this proposal

658
00:23:14,549 --> 00:23:13,280
okay

659
00:23:16,310 --> 00:23:14,559
does that make sense

660
00:23:18,630 --> 00:23:16,320
it does yeah i mean it's it's it's

661
00:23:21,029 --> 00:23:18,640
baffling but it does make sense yeah

662
00:23:22,789 --> 00:23:21,039
it's definitely yeah but now that sits

663
00:23:25,270 --> 00:23:22,799

in there right and everyone can see it

664

00:23:27,190 --> 00:23:25,280

um and so what i can do then is

665

00:23:28,870 --> 00:23:27,200

people can percolate it they can they

666

00:23:30,470 --> 00:23:28,880

can put it off to the side as a thread

667

00:23:32,470 --> 00:23:30,480

they can communicate they can work

668

00:23:33,909 --> 00:23:32,480

together as groups

669

00:23:35,990 --> 00:23:33,919

so what we have you know we have a

670

00:23:38,549 --> 00:23:36,000

general nuts and bolts right so these

671

00:23:40,390 --> 00:23:38,559

guys are going to be looking more into

672

00:23:42,630 --> 00:23:40,400

you know the harder core stuff you know

673

00:23:44,070 --> 00:23:42,640

what can we do what kind of proposals

674

00:23:46,549 --> 00:23:44,080

can we do

675

00:23:48,710 --> 00:23:46,559

what about just uap journal stuff i mean

676
00:23:50,070 --> 00:23:48,720
the goal is just to get more information

677
00:23:52,870 --> 00:23:50,080
you can get a lot of information just

678
00:23:53,590 --> 00:23:52,880
freely you know this way you can find it

679
00:23:55,510 --> 00:23:53,600
uh

680
00:23:56,870 --> 00:23:55,520
choosing what's good and what's not um

681
00:23:58,070 --> 00:23:56,880
and then we try to make it fun right

682
00:23:59,110 --> 00:23:58,080
because we want to have people come in

683
00:24:01,590 --> 00:23:59,120
here

684
00:24:03,029 --> 00:24:01,600
sure um so this is really the this is

685
00:24:04,470 --> 00:24:03,039
the discord

686
00:24:06,230 --> 00:24:04,480
uh

687
00:24:08,390 --> 00:24:06,240
but what it is really what holds the

688
00:24:10,070 --> 00:24:08,400

whole community together is the actual

689

00:24:12,390 --> 00:24:10,080

nfts

690

00:24:15,110 --> 00:24:12,400

is is the nft technology because it it's

691

00:24:18,070 --> 00:24:15,120

just verifiable right if this say say we

692

00:24:19,590 --> 00:24:18,080

sell we're gonna sell 10 042 of these

693

00:24:21,990 --> 00:24:19,600

nfts right

694

00:24:24,549 --> 00:24:22,000

so say we sell them all across the world

695

00:24:27,110 --> 00:24:24,559

because they can sell anywhere you know

696

00:24:29,269 --> 00:24:27,120

across the world

697

00:24:31,029 --> 00:24:29,279

but now let's say that we

698

00:24:33,430 --> 00:24:31,039

fund some research proposals we set up

699

00:24:35,750 --> 00:24:33,440

this discord and everything and then

700

00:24:38,710 --> 00:24:35,760

the us government decides that discord

701
00:24:40,950 --> 00:24:38,720
is illegal and they remove it right and

702
00:24:43,190 --> 00:24:40,960
they put me in jail or you know kill me

703
00:24:44,470 --> 00:24:43,200
or something

704
00:24:48,549 --> 00:24:44,480
so

705
00:24:51,190 --> 00:24:48,559
another discord and says okay let's

706
00:24:54,870 --> 00:24:51,200
verify the nfts and now everyone just

707
00:24:57,190 --> 00:24:54,880
verifies their nfts and it continues

708
00:25:00,149 --> 00:24:57,200
you continue the mission right

709
00:25:02,390 --> 00:25:00,159
nfts are they're unkillable um you know

710
00:25:04,310 --> 00:25:02,400
you can lose the wallet you can

711
00:25:06,149 --> 00:25:04,320
you can lose the address to your wallet

712
00:25:07,590 --> 00:25:06,159
or your code you know and then it'll be

713
00:25:09,510 --> 00:25:07,600

stuck

714

00:25:10,870 --> 00:25:09,520

but it can't be killed you know the as

715

00:25:11,990 --> 00:25:10,880

long as the ethereum blockchain is

716

00:25:14,070 --> 00:25:12,000

running

717

00:25:15,590 --> 00:25:14,080

so that so the nft's is the it's the

718

00:25:17,590 --> 00:25:15,600

it's the actual

719

00:25:18,789 --> 00:25:17,600

core community the

720

00:25:20,630 --> 00:25:18,799

live for it will live forever

721

00:25:22,710 --> 00:25:20,640

essentially if as long as the coding is

722

00:25:24,470 --> 00:25:22,720

working somewhere

723

00:25:26,390 --> 00:25:24,480

so where does the so with these

724

00:25:30,149 --> 00:25:26,400

proposals how does it get to the point

725

00:25:32,710 --> 00:25:30,159

of being you know actually worked on

726

00:25:34,789 --> 00:25:32,720

yeah so that is the whole

727

00:25:36,710 --> 00:25:34,799

that's the next step right

728

00:25:37,990 --> 00:25:36,720

so the first year will be just us

729

00:25:42,710 --> 00:25:38,000

selecting

730

00:25:45,110 --> 00:25:42,720

right so that's why we just picked it

731

00:25:47,190 --> 00:25:45,120

um but after that let me see if i can

732

00:25:49,110 --> 00:25:47,200

find this

733

00:25:52,710 --> 00:25:49,120

and i've been told by again you know

734

00:25:55,029 --> 00:25:52,720

some marketing people not to mention

735

00:25:57,110 --> 00:25:55,039

not to mention but whatever i i want to

736

00:25:58,149 --> 00:25:57,120

tell you guys just in case

737

00:26:00,230 --> 00:25:58,159

whatever

738

00:26:00,950 --> 00:26:00,240

um this is just one idea from a from a

739

00:26:03,430 --> 00:26:00,960

guy

740

00:26:05,269 --> 00:26:03,440

camera super smart kid he wrote me um i

741

00:26:06,549 --> 00:26:05,279

hope hopefully i can share this i don't

742

00:26:08,470 --> 00:26:06,559

get in trouble

743

00:26:11,430 --> 00:26:08,480

but basically it's it's his idea to

744

00:26:13,430 --> 00:26:11,440

create it to create a dow

745

00:26:16,310 --> 00:26:13,440

and let me just show you

746

00:26:19,029 --> 00:26:16,320

the general idea here

747

00:26:23,510 --> 00:26:19,039

is a proposal pipeline like you asked

748

00:26:25,269 --> 00:26:23,520

ah okay cool oh sorry and then i lost it

749

00:26:26,149 --> 00:26:25,279

um

750

00:26:29,029 --> 00:26:26,159

so

751

00:26:31,269 --> 00:26:29,039

the general idea right is step one dow

752

00:26:32,950 --> 00:26:31,279

members they post in proposals

753

00:26:34,549 --> 00:26:32,960

on the discord right

754

00:26:36,630 --> 00:26:34,559

the community engages in discord

755

00:26:39,590 --> 00:26:36,640

regarding the proposal if it's decided

756

00:26:42,070 --> 00:26:39,600

you know to be non-viable get rid of it

757

00:26:44,230 --> 00:26:42,080

okay if we like it we send it on okay

758

00:26:46,230 --> 00:26:44,240

then a formal proposal is drafted with

759

00:26:48,230 --> 00:26:46,240

the core contributors and or operations

760

00:26:50,149 --> 00:26:48,240

working group so this will be the people

761

00:26:53,110 --> 00:26:50,159

who have the nfts

762

00:26:55,909 --> 00:26:53,120

okay right so because who do you want

763

00:26:56,789 --> 00:26:55,919

making the end decisions ultimately

764

00:26:58,870 --> 00:26:56,799

um

765

00:27:01,190 --> 00:26:58,880

you know i think we want we want to pick

766

00:27:03,909 --> 00:27:01,200

good research proposals but then i want

767

00:27:05,430 --> 00:27:03,919

people with the most uh invested

768

00:27:07,029 --> 00:27:05,440

interest you know people who have

769

00:27:08,950 --> 00:27:07,039

invested their time

770

00:27:10,390 --> 00:27:08,960

and money to make the final decisions

771

00:27:12,070 --> 00:27:10,400

because i think they'll

772

00:27:13,029 --> 00:27:12,080

it's got to be profitable at the end of

773

00:27:15,190 --> 00:27:13,039

the day if

774

00:27:17,350 --> 00:27:15,200

if it's profitable it can't be stopped

775

00:27:18,870 --> 00:27:17,360

if it's decentralized and profitable

776

00:27:20,789 --> 00:27:18,880

nothing can stop it

777

00:27:22,549 --> 00:27:20,799

and do the profits they'd go back in for

778

00:27:25,990 --> 00:27:22,559

more proposals in that future down the

779

00:27:28,070 --> 00:27:26,000

line exactly yep so what happens is

780

00:27:30,470 --> 00:27:28,080

where is the next there's one more

781

00:27:32,389 --> 00:27:30,480

little drawing let me find it sorry

782

00:27:34,149 --> 00:27:32,399

this one okay

783

00:27:36,630 --> 00:27:34,159

all right so we're minting ours on

784

00:27:38,630 --> 00:27:36,640

ethereum right okay yeah so if you have

785

00:27:40,950 --> 00:27:38,640

one of these every time one of our nfts

786

00:27:42,950 --> 00:27:40,960

is traded you know bought or sold

787

00:27:44,630 --> 00:27:42,960

seven percent automatically goes back to

788

00:27:46,870 --> 00:27:44,640

the original account which is the

789

00:27:50,070 --> 00:27:46,880

trading account yep this is the power of

790

00:27:51,909 --> 00:27:50,080

nfts is no matter what uh whenever it's

791

00:27:54,470 --> 00:27:51,919

sold it's written into the contract it

792

00:27:56,310 --> 00:27:54,480

just slices off seven percent

793

00:27:59,430 --> 00:27:56,320

so anytime it's bought or sold at that

794

00:28:00,549 --> 00:27:59,440

price seven percent um what we want to

795

00:28:03,350 --> 00:28:00,559

do is

796

00:28:07,110 --> 00:28:03,360

convert it into another token

797

00:28:09,269 --> 00:28:07,120

like a uap token or a dsi token on a

798

00:28:12,549 --> 00:28:09,279

cheaper chain because ethereum costs a

799

00:28:14,070 --> 00:28:12,559

lot it's like the it's the gold of

800

00:28:15,750 --> 00:28:14,080

it's the base layer you know if you

801
00:28:17,590 --> 00:28:15,760
think of it as land

802
00:28:19,190 --> 00:28:17,600
ethereum is your your base most

803
00:28:20,870 --> 00:28:19,200
expensive layer right to interact with

804
00:28:21,830 --> 00:28:20,880
that layer it costs a lot of money you

805
00:28:23,990 --> 00:28:21,840
know

806
00:28:26,470 --> 00:28:24,000
but you burn it in it's the most secure

807
00:28:28,310 --> 00:28:26,480
i would argue most secure um turing

808
00:28:30,149 --> 00:28:28,320
complete you know bitcoin's your most

809
00:28:32,630 --> 00:28:30,159
secure but you can't do anything with it

810
00:28:34,549 --> 00:28:32,640
um ethereum you can code smart contracts

811
00:28:37,269 --> 00:28:34,559
what we're talking about so it'll print

812
00:28:38,950 --> 00:28:37,279
each one of your nfts will receive three

813
00:28:40,230 --> 00:28:38,960

and a half percent hopefully and then

814

00:28:42,230 --> 00:28:40,240

the other three and a half percent will

815

00:28:43,190 --> 00:28:42,240

go into this fund

816

00:28:45,909 --> 00:28:43,200

right

817

00:28:46,870 --> 00:28:45,919

and then we will use these uap tokens uh

818

00:28:49,590 --> 00:28:46,880

to

819

00:28:51,430 --> 00:28:49,600

basically do all of the governance

820

00:28:54,149 --> 00:28:51,440

and dow members will choose

821

00:28:56,389 --> 00:28:54,159

which research proposals will be funded

822

00:28:59,190 --> 00:28:56,399

so they'll be funded and then if they do

823

00:29:00,950 --> 00:28:59,200

well right say say vinnie and uk uap

824

00:29:01,990 --> 00:29:00,960

deliver right you build your three

825

00:29:03,990 --> 00:29:02,000

systems

826
00:29:05,750 --> 00:29:04,000
um in six months everything and you say

827
00:29:07,590 --> 00:29:05,760
okay we're gonna do it again

828
00:29:10,950 --> 00:29:07,600
then you'll get re you know you'll

829
00:29:12,789 --> 00:29:10,960
probably get it again you know okay

830
00:29:13,909 --> 00:29:12,799
that's how that's helpful man

831
00:29:16,710 --> 00:29:13,919
yeah i'm getting it i'm getting there

832
00:29:20,230 --> 00:29:18,789
that's the basic but we don't have to

833
00:29:22,470 --> 00:29:20,240
all we have to do now what's what's

834
00:29:23,909 --> 00:29:22,480
amazing is nfts are they're the base

835
00:29:24,789 --> 00:29:23,919
layer the land

836
00:29:27,110 --> 00:29:24,799
yeah

837
00:29:29,350 --> 00:29:27,120
and so we can build and we plan to build

838
00:29:31,350 --> 00:29:29,360

on top of it right so the next year but

839

00:29:33,430 --> 00:29:31,360

we need money to actually code this you

840

00:29:35,430 --> 00:29:33,440

know we need um we need to pay the

841

00:29:37,669 --> 00:29:35,440

freelancers who are currently working

842

00:29:40,230 --> 00:29:37,679

this as a side job we need to pay them

843

00:29:42,310 --> 00:29:40,240

full time for just a few months and then

844

00:29:45,590 --> 00:29:42,320

they can do it you know but

845

00:29:47,029 --> 00:29:45,600

it just we need actual work or you need

846

00:29:48,710 --> 00:29:47,039

more work done than you can do on the

847

00:29:50,870 --> 00:29:48,720

weekends in your side time you know we

848

00:29:52,870 --> 00:29:50,880

need to dedicate it and for that cash

849

00:29:54,950 --> 00:29:52,880

really helps you know it does help

850

00:29:57,750 --> 00:29:54,960

so i think

851
00:30:00,070 --> 00:29:57,760
if if we sell to even our base

852
00:30:01,669 --> 00:30:00,080
the base goal you know 0.1 ether is what

853
00:30:02,950 --> 00:30:01,679
we want to sell these things at or what

854
00:30:03,909 --> 00:30:02,960
we're selling them at

855
00:30:06,310 --> 00:30:03,919
right okay

856
00:30:08,710 --> 00:30:06,320
if we sell out we can basically do all

857
00:30:10,870 --> 00:30:08,720
of our research objectives which will be

858
00:30:13,510 --> 00:30:10,880
the sky 360 cameras

859
00:30:14,950 --> 00:30:13,520
and uh hopefully up to 20 hope maybe

860
00:30:16,149 --> 00:30:14,960
more systems but we still need to

861
00:30:18,470 --> 00:30:16,159
develop

862
00:30:20,310 --> 00:30:18,480
the software and hardware

863
00:30:22,789 --> 00:30:20,320

um and the satellite as well so we can

864

00:30:25,190 --> 00:30:22,799

launch a satellite i believe so that's

865

00:30:28,149 --> 00:30:25,200

cool and so do the initial investors do

866

00:30:30,470 --> 00:30:28,159

they profit out of this as well

867

00:30:32,470 --> 00:30:30,480

yeah so we're basically

868

00:30:35,029 --> 00:30:32,480

we're launching we're selling these

869

00:30:37,350 --> 00:30:35,039

there's 42 of these i'll mention it now

870

00:30:39,269 --> 00:30:37,360

starting tomorrow i think

871

00:30:41,990 --> 00:30:39,279

this is actually the art it's made with

872

00:30:47,269 --> 00:30:44,310

that's a two

873

00:30:49,830 --> 00:30:48,470

so

874

00:30:52,870 --> 00:30:49,840

that's incredible yeah that's that's

875

00:30:54,310 --> 00:30:52,880

cool it's it's so good um

876

00:30:59,110 --> 00:30:54,320

it's so good

877

00:31:00,389 --> 00:30:59,120

guys are gonna it's i love it

878

00:31:02,470 --> 00:31:00,399

well i mean

879

00:31:03,750 --> 00:31:02,480

it does look good and i'm intrigued to

880

00:31:06,470 --> 00:31:03,760

learn more

881

00:31:08,950 --> 00:31:06,480

they're all so different um

882

00:31:11,110 --> 00:31:08,960

yeah colin's an amazing artist this is

883

00:31:12,870 --> 00:31:11,120

all done with uh neural nets like he

884

00:31:16,389 --> 00:31:12,880

adds in these little like neural nets

885

00:31:19,190 --> 00:31:16,399

that add these crazy uh textures

886

00:31:21,669 --> 00:31:19,200

at the end um it's all done with word

887

00:31:23,190 --> 00:31:21,679

prompts into these ai tools

888

00:31:25,110 --> 00:31:23,200

so he just has like thousands and

889

00:31:26,789 --> 00:31:25,120

thousands of like strings of words he

890

00:31:27,909 --> 00:31:26,799

just like can rattle off these crazy

891

00:31:29,269 --> 00:31:27,919

words

892

00:31:32,789 --> 00:31:29,279

aurelian

893

00:31:38,710 --> 00:31:36,070

so good 10 042 man so it's

894

00:31:40,230 --> 00:31:38,720

it's it it's quite the project i'm very

895

00:31:41,509 --> 00:31:40,240

excited to get the art i'm just excited

896

00:31:44,070 --> 00:31:41,519

to get it out there you know to really

897

00:31:45,990 --> 00:31:44,080

get it going but we need to do it

898

00:31:47,990 --> 00:31:46,000

it needs to sell out right away you know

899

00:31:49,990 --> 00:31:48,000

um if they sell it right away it's just

900

00:31:51,430 --> 00:31:50,000

so much more momentum going into the

901
00:31:52,870 --> 00:31:51,440
other markets

902
00:31:53,909 --> 00:31:52,880
because point one eth is just the

903
00:31:55,909 --> 00:31:53,919
beginning

904
00:31:57,830 --> 00:31:55,919
um you know these pr this project

905
00:31:59,430 --> 00:31:57,840
actually delivers value that it can

906
00:32:03,269 --> 00:31:59,440
there's other projects that have gone to

907
00:32:07,110 --> 00:32:04,950
if you're providing value back in right

908
00:32:08,789 --> 00:32:07,120
if you're actually providing value like

909
00:32:11,590 --> 00:32:08,799
i mentioned it's an asset it's on the

910
00:32:13,669 --> 00:32:11,600
base ethereum blockchain the art is

911
00:32:16,870 --> 00:32:13,679
going to be sweet so

912
00:32:18,389 --> 00:32:16,880
it could as long as it returns value

913
00:32:20,549 --> 00:32:18,399

you know utility

914

00:32:21,669 --> 00:32:20,559

information is going to be valuable

915

00:32:25,029 --> 00:32:21,679

right that's what we're really going

916

00:32:27,269 --> 00:32:25,039

after is data we want open source data

917

00:32:29,909 --> 00:32:27,279

and we want unidentified

918

00:32:31,830 --> 00:32:29,919

area or unidentified phenomena

919

00:32:34,230 --> 00:32:31,840

right well to find unidentified

920

00:32:36,470 --> 00:32:34,240

phenomena or videos and photos of it you

921

00:32:38,310 --> 00:32:36,480

need to identify it as everything or not

922

00:32:40,470 --> 00:32:38,320

everything else right you got to be able

923

00:32:43,110 --> 00:32:40,480

to throw out everything else

924

00:32:45,190 --> 00:32:43,120

you got to say okay that's that's a bird

925

00:32:46,389 --> 00:32:45,200

uh that's a plane you know that's a

926
00:32:48,389 --> 00:32:46,399
satellite

927
00:32:49,509 --> 00:32:48,399
that's a meteor

928
00:32:51,430 --> 00:32:49,519
um

929
00:32:54,149 --> 00:32:51,440
that's a tide

930
00:32:58,389 --> 00:32:54,159
that's a weather pattern

931
00:33:00,070 --> 00:32:58,399
those are insects um different crops

932
00:33:01,750 --> 00:33:00,080
right so but everything i mentioned

933
00:33:03,990 --> 00:33:01,760
right there right

934
00:33:05,509 --> 00:33:04,000
you can use for data

935
00:33:07,909 --> 00:33:05,519
everything so

936
00:33:10,470 --> 00:33:07,919
you can my bird migrations

937
00:33:12,710 --> 00:33:10,480
um meteors alone or is a huge industry

938
00:33:14,870 --> 00:33:12,720

meteors alone is a huge industry because

939

00:33:17,430 --> 00:33:14,880

one gram for a meteor an actual meteor

940

00:33:20,149 --> 00:33:17,440

from space is like two thousand pounds

941

00:33:21,590 --> 00:33:20,159

it's two thousand dollars a a gram

942

00:33:23,909 --> 00:33:21,600

so they can be two to three hundred

943

00:33:27,029 --> 00:33:23,919

thousand dollars per for a kilo a 10

944

00:33:29,110 --> 00:33:27,039

kilogram sized uh meteor

945

00:33:30,310 --> 00:33:29,120

plus we can use it for space hunting

946

00:33:31,990 --> 00:33:30,320

right so

947

00:33:34,549 --> 00:33:32,000

we can just delay the information for a

948

00:33:37,830 --> 00:33:34,559

couple weeks or a week right

949

00:33:40,149 --> 00:33:37,840

but it's i mean info data is not data is

950

00:33:41,990 --> 00:33:40,159

power right or at least it'll be money

951
00:33:43,110 --> 00:33:42,000
information is is that's why they don't

952
00:33:44,470 --> 00:33:43,120
want to share it right because as soon

953
00:33:46,470 --> 00:33:44,480
as someone shares their information with

954
00:33:49,430 --> 00:33:46,480
you they gave up their power over it you

955
00:33:51,590 --> 00:33:49,440
know they gave up their luck on it their

956
00:33:53,029 --> 00:33:51,600
their uh investment

957
00:33:54,070 --> 00:33:53,039
you know so that's why they don't want

958
00:33:55,269 --> 00:33:54,080
to share

959
00:33:57,430 --> 00:33:55,279
because if they tell you then you're

960
00:33:59,750 --> 00:33:57,440
just going to use their information to

961
00:34:01,110 --> 00:33:59,760
to get there first right and they can't

962
00:34:03,350 --> 00:34:01,120
have that right

963
00:34:05,909 --> 00:34:03,360

but we don't care that's what we

964

00:34:09,030 --> 00:34:05,919

get there first you know um we're gonna

965

00:34:10,869 --> 00:34:09,040

try harder than you uh but

966

00:34:13,190 --> 00:34:10,879

like i'm not gonna you know if people

967

00:34:15,109 --> 00:34:13,200

want to work that's the whole point is

968

00:34:16,310 --> 00:34:15,119

come and collab that's the whole point

969

00:34:17,589 --> 00:34:16,320

yeah

970

00:34:19,829 --> 00:34:17,599

you have to share

971

00:34:22,230 --> 00:34:19,839

yeah i've got a couple of questions here

972

00:34:24,629 --> 00:34:22,240

um first of all john hunsey thank you

973

00:34:27,109 --> 00:34:24,639

for the 10 pounds he says will lots of

974

00:34:29,190 --> 00:34:27,119

cameras capture detailed images of uap

975

00:34:31,430 --> 00:34:29,200

and other irrefutable evidence that they

976
00:34:33,349 --> 00:34:31,440
are extraterrestrial or will it produce

977
00:34:35,829 --> 00:34:33,359
more grainy pictures of dots and lights

978
00:34:37,669 --> 00:34:35,839
in the sky

979
00:34:39,510 --> 00:34:37,679
what are your thoughts

980
00:34:41,990 --> 00:34:39,520
well i think

981
00:34:44,389 --> 00:34:42,000
looking serves a valuable purpose

982
00:34:45,909 --> 00:34:44,399
um because if we if we look with better

983
00:34:48,790 --> 00:34:45,919
cameras

984
00:34:50,790 --> 00:34:48,800
and better technology and we look

985
00:34:52,310 --> 00:34:50,800
everywhere and we still just see grainy

986
00:34:54,550 --> 00:34:52,320
pictures of dots and lights in the sky

987
00:34:57,910 --> 00:34:54,560
then i would say that's pretty weird

988
00:35:02,870 --> 00:35:00,470

then we got to look at

989

00:35:05,030 --> 00:35:02,880

kind of deeper issues going on you know

990

00:35:06,630 --> 00:35:05,040

yeah but that's still a data point

991

00:35:08,150 --> 00:35:06,640

still a data point

992

00:35:09,750 --> 00:35:08,160

you know if you go and look somewhere

993

00:35:11,670 --> 00:35:09,760

and you don't see anything

994

00:35:13,430 --> 00:35:11,680

but you looked correctly

995

00:35:21,109 --> 00:35:13,440

that's the data point it's good that's

996

00:35:25,349 --> 00:35:23,829

uh important proposal for chris allsap

997

00:35:27,030 --> 00:35:25,359

used government funds to update and

998

00:35:29,910 --> 00:35:27,040

correlate all government and mufon

999

00:35:31,750 --> 00:35:29,920

databases but were never able to develop

1000

00:35:34,550 --> 00:35:31,760

ai analysis program

1001

00:35:35,990 --> 00:35:34,560

big opportunity

1002

00:35:37,829 --> 00:35:36,000

there you go that could be one of your

1003

00:35:40,069 --> 00:35:37,839

proposals

1004

00:35:42,950 --> 00:35:40,079

well we do have one now uh paul heineck

1005

00:35:45,030 --> 00:35:42,960

he he's an ambassador for the program

1006

00:35:48,710 --> 00:35:45,040

and he's big into crypto as well

1007

00:35:50,310 --> 00:35:48,720

okay uh yeah jay on helen heineck's son

1008

00:35:52,390 --> 00:35:50,320

it was cool he came on because he said

1009

00:35:54,470 --> 00:35:52,400

his dad started the invisible college

1010

00:35:57,589 --> 00:35:54,480

with the jack valley

1011

00:35:59,990 --> 00:35:57,599

so this will be like the visible college

1012

00:36:02,710 --> 00:36:00,000

you can be anonymous on it actually but

1013

00:36:03,750 --> 00:36:02,720

either way it's uh more transparent

1014

00:36:05,109 --> 00:36:03,760

yeah

1015

00:36:07,349 --> 00:36:05,119

the idea

1016

00:36:08,470 --> 00:36:07,359

is to put it on a decentralized file

1017

00:36:09,670 --> 00:36:08,480

storage

1018

00:36:12,630 --> 00:36:09,680

so

1019

00:36:15,030 --> 00:36:12,640

a decentralized file database

1020

00:36:18,550 --> 00:36:15,040

so it's you know basically like torrent

1021

00:36:19,510 --> 00:36:18,560

so very difficult to to destroy

1022

00:36:21,349 --> 00:36:19,520

um

1023

00:36:23,430 --> 00:36:21,359

and then the idea is we'd have it

1024

00:36:25,430 --> 00:36:23,440

accessible for everybody

1025

00:36:26,390 --> 00:36:25,440

you know it's so annoying you go to like

1026

00:36:27,510 --> 00:36:26,400

read some

1027

00:36:30,950 --> 00:36:27,520

they keep

1028

00:36:32,470 --> 00:36:30,960

paper [h__h] right like you know i'm

1029

00:36:34,230 --> 00:36:32,480

not going to support it unless it's in a

1030

00:36:35,829 --> 00:36:34,240

peer-reviewed paper and all this stuff

1031

00:36:38,069 --> 00:36:35,839

but then you go and try and read said

1032

00:36:39,270 --> 00:36:38,079

peer-reviewed papers and a lot of them

1033

00:36:42,790 --> 00:36:39,280

are just locked behind all these

1034

00:36:45,109 --> 00:36:42,800

paywalls yep you know all these uh

1035

00:36:47,030 --> 00:36:45,119

all these uh different uh academic

1036

00:36:48,550 --> 00:36:47,040

paywalls maybe you can read the abstract

1037

00:36:49,829 --> 00:36:48,560

but you can't get the full the full

1038

00:36:50,200 --> 00:36:49,839

paper

1039

00:36:51,430 --> 00:36:50,210

um

1040

00:36:53,270 --> 00:36:51,440

[Music]

1041

00:36:54,630 --> 00:36:53,280

so i would say let's put it all in one

1042

00:36:57,270 --> 00:36:54,640

location that

1043

00:36:59,349 --> 00:36:57,280

that's an easy perfect kind of project

1044

00:37:00,950 --> 00:36:59,359

first project we can do you know

1045

00:37:02,630 --> 00:37:00,960

um maybe the hardest part is probably

1046

00:37:05,190 --> 00:37:02,640

just getting the data to be honest like

1047

00:37:06,870 --> 00:37:05,200

what what you want to put on there

1048

00:37:08,230 --> 00:37:06,880

yeah that's fair enough i mean i'm just

1049

00:37:09,829 --> 00:37:08,240

just gonna highlight this comment even

1050

00:37:11,109 --> 00:37:09,839

though it's not a great one logan i

1051
00:37:12,550 --> 00:37:11,119
don't think this is coming from you but

1052
00:37:15,030 --> 00:37:12,560
he's just saying that people are already

1053
00:37:17,109 --> 00:37:15,040
doing shows about how chris is running a

1054
00:37:18,470 --> 00:37:17,119
scam here i've speak to chris before and

1055
00:37:19,510 --> 00:37:18,480
i've heard things and if people just

1056
00:37:20,710 --> 00:37:19,520
don't know what they're talking about

1057
00:37:23,190 --> 00:37:20,720
they haven't looked into it and they

1058
00:37:25,270 --> 00:37:23,200
probably like me don't understand

1059
00:37:28,710 --> 00:37:25,280
the processes behind it all the web 3

1060
00:37:34,950 --> 00:37:32,390
you're never going to play not a scam

1061
00:37:36,230 --> 00:37:34,960
i hope it's not i'll be really i'll be

1062
00:37:37,510 --> 00:37:36,240
more disciplined than anybody don't

1063
00:37:38,870 --> 00:37:37,520

worry

1064

00:37:40,470 --> 00:37:38,880

um

1065

00:37:42,630 --> 00:37:40,480

no i mean uh

1066

00:37:44,470 --> 00:37:42,640

everything we're saying is legit i

1067

00:37:46,069 --> 00:37:44,480

mean

1068

00:37:48,710 --> 00:37:46,079

we're gonna pay ourselves right it's

1069

00:37:50,630 --> 00:37:48,720

gonna be profitable it's

1070

00:37:52,310 --> 00:37:50,640

so i mean we are going to make money but

1071

00:37:54,150 --> 00:37:52,320

if we're making money then it means

1072

00:37:57,030 --> 00:37:54,160

everyone else is

1073

00:37:59,109 --> 00:37:57,040

is also making money and

1074

00:38:00,630 --> 00:37:59,119

more importantly we're actually getting

1075

00:38:02,550 --> 00:38:00,640

results or some sort of data we're

1076
00:38:05,030 --> 00:38:02,560
getting some movement you know because

1077
00:38:07,990 --> 00:38:05,040
my hope is like like gary nolan right he

1078
00:38:09,190 --> 00:38:08,000
does amazing science he knows exactly

1079
00:38:10,950 --> 00:38:09,200
what to look at

1080
00:38:12,710 --> 00:38:10,960
yeah but he's he's paying out of his own

1081
00:38:15,030 --> 00:38:12,720
pocket

1082
00:38:16,630 --> 00:38:15,040
so i would i would love to see

1083
00:38:19,829 --> 00:38:16,640
you know gary nolan just putting in a

1084
00:38:21,510 --> 00:38:19,839
proposal saying like i will study this

1085
00:38:23,750 --> 00:38:21,520
i'll write a report about it or kevin

1086
00:38:25,270 --> 00:38:23,760
knows you know he has to go back and do

1087
00:38:27,430 --> 00:38:25,280
his albany work or something like

1088
00:38:29,109 --> 00:38:27,440

there's always funding required

1089

00:38:32,310 --> 00:38:29,119

sure if we're like hey

1090

00:38:33,750 --> 00:38:32,320

kevin go go research this we'll pay you

1091

00:38:35,589 --> 00:38:33,760

however much

1092

00:38:37,270 --> 00:38:35,599

well he would put in the proposal right

1093

00:38:38,710 --> 00:38:37,280

yeah you know whatever 10 grand i can

1094

00:38:40,870 --> 00:38:38,720

take three months off or whatever he

1095

00:38:42,390 --> 00:38:40,880

does and then you know write all this

1096

00:38:44,069 --> 00:38:42,400

stuff she says

1097

00:38:46,470 --> 00:38:44,079

throwing it out there

1098

00:38:48,310 --> 00:38:46,480

and then he could go and do the research

1099

00:38:50,310 --> 00:38:48,320

on his own and write a paper

1100

00:38:52,870 --> 00:38:50,320

sure you know and then we would share it

1101
00:38:54,310 --> 00:38:52,880
and then put it on to some decentralized

1102
00:38:56,630 --> 00:38:54,320
file storage

1103
00:38:57,750 --> 00:38:56,640
and then everybody can access it

1104
00:38:59,109 --> 00:38:57,760
there you go

1105
00:39:00,950 --> 00:38:59,119
yeah yeah

1106
00:39:03,270 --> 00:39:00,960
so yeah let people do their

1107
00:39:05,270 --> 00:39:03,280
shows their negativity you know

1108
00:39:07,430 --> 00:39:05,280
we'll focus on positivity and doing

1109
00:39:10,790 --> 00:39:07,440
doing work

1110
00:39:12,550 --> 00:39:10,800
but you know man you know publicity

1111
00:39:14,470 --> 00:39:12,560
the negative publicity seems to move the

1112
00:39:16,069 --> 00:39:14,480
needle just as much if not more than the

1113
00:39:18,390 --> 00:39:16,079

positive you know

1114

00:39:20,390 --> 00:39:18,400

it seems like the more like if i'm like

1115

00:39:22,470 --> 00:39:20,400

more in a curled up and like things are

1116

00:39:24,230 --> 00:39:22,480

getting thrown at me the numbers go up

1117

00:39:27,190 --> 00:39:24,240

faster you know it's like

1118

00:39:28,950 --> 00:39:27,200

sure people love to see the

1119

00:39:30,630 --> 00:39:28,960

you know i guess there's no such thing

1120

00:39:33,349 --> 00:39:30,640

as bad publicity right

1121

00:39:34,550 --> 00:39:33,359

yeah absolutely now let's uh let's talk

1122

00:39:36,870 --> 00:39:34,560

about this balloon launch that you've

1123

00:39:38,870 --> 00:39:36,880

got coming up um and what what what it's

1124

00:39:40,390 --> 00:39:38,880

for and and all that

1125

00:39:43,430 --> 00:39:40,400

be really good to hear

1126
00:39:44,870 --> 00:39:43,440
yeah excellent yes so 27 may alexei

1127
00:39:46,950 --> 00:39:44,880
nowitzki

1128
00:39:49,109 --> 00:39:46,960
i've been you know working with him for

1129
00:39:51,670 --> 00:39:49,119
a year now just we have i like talking

1130
00:39:53,829 --> 00:39:51,680
to him we're friends i love his theory

1131
00:39:55,750 --> 00:39:53,839
well he showed me this picture from

1132
00:39:57,750 --> 00:39:55,760
space that he had you know he has it in

1133
00:39:58,790 --> 00:39:57,760
his little uh did he show you he may

1134
00:40:01,270 --> 00:39:58,800
have shown you

1135
00:40:02,950 --> 00:40:01,280
no i've not seen it

1136
00:40:04,230 --> 00:40:02,960
he's probably here no he's got this

1137
00:40:05,829 --> 00:40:04,240
picture in a little frame you know of

1138
00:40:07,190 --> 00:40:05,839

him from space i was like man where'd

1139

00:40:08,710 --> 00:40:07,200

you get that you know he explained the

1140

00:40:10,790 --> 00:40:08,720

space balloon thing that was over a year

1141

00:40:13,109 --> 00:40:10,800

ago

1142

00:40:14,790 --> 00:40:13,119

and then basically came up that no he

1143

00:40:16,950 --> 00:40:14,800

could actually do this

1144

00:40:18,309 --> 00:40:16,960

um and we could

1145

00:40:20,470 --> 00:40:18,319

we could launch it you know we could

1146

00:40:21,510 --> 00:40:20,480

launch this space balloon

1147

00:40:23,990 --> 00:40:21,520

and

1148

00:40:27,109 --> 00:40:24,000

it seems like it would be an amazing

1149

00:40:29,589 --> 00:40:27,119

opportunity just to

1150

00:40:31,109 --> 00:40:29,599

launch uap society so it brings eyes in

1151

00:40:32,710 --> 00:40:31,119

people are excited about it you know

1152

00:40:34,790 --> 00:40:32,720

that's what i when i mentioned we could

1153

00:40:36,069 --> 00:40:34,800

maybe do this when i pitched it to

1154

00:40:37,349 --> 00:40:36,079

david and liz

1155

00:40:38,230 --> 00:40:37,359

like they were really excited about it

1156

00:40:40,710 --> 00:40:38,240

you know it seems like people are

1157

00:40:42,870 --> 00:40:40,720

excited about it um and yeah i think

1158

00:40:43,990 --> 00:40:42,880

it's gonna be cool so it's it's a

1159

00:40:46,150 --> 00:40:44,000

weather balloon we're working with

1160

00:40:47,270 --> 00:40:46,160

stratoflights they're a german company

1161

00:40:49,510 --> 00:40:47,280

um and

1162

00:40:51,829 --> 00:40:49,520

they say let's say we could have built

1163

00:40:53,510 --> 00:40:51,839

it on a short timeline but this is they

1164

00:40:56,470 --> 00:40:53,520

have like a kit that you can just put

1165

00:40:58,870 --> 00:40:56,480

together and we modify it so we modify

1166

00:41:00,870 --> 00:40:58,880

it with our own stuff so we'll have a a

1167

00:41:03,270 --> 00:41:00,880

live streaming cell phone a cell phone

1168

00:41:05,190 --> 00:41:03,280

can you know basically an iphone yeah

1169

00:41:06,870 --> 00:41:05,200

that'll say through in there uh we're

1170

00:41:08,150 --> 00:41:06,880

gonna have a camera pointing up which i

1171

00:41:10,550 --> 00:41:08,160

think is gonna be awesome because the

1172

00:41:11,990 --> 00:41:10,560

balloon actually starts at it's like

1173

00:41:14,790 --> 00:41:12,000

four feet across

1174

00:41:16,950 --> 00:41:14,800

but then it has 5 000 liters of helium

1175

00:41:20,790 --> 00:41:16,960

in it it's pumped in right so when it

1176

00:41:23,270 --> 00:41:20,800

blows up at 120 000 feet it's uh 36 feet

1177

00:41:26,550 --> 00:41:23,280

across so 12 meters

1178

00:41:28,230 --> 00:41:26,560

12 meters across man it's big and then i

1179

00:41:29,510 --> 00:41:28,240

heard when it blows up it's not like a

1180

00:41:30,390 --> 00:41:29,520

little party balloon or something it's

1181

00:41:32,950 --> 00:41:30,400

like

1182

00:41:34,550 --> 00:41:32,960

you know wow so i guess normally they

1183

00:41:36,150 --> 00:41:34,560

don't point a camera up but we're

1184

00:41:37,589 --> 00:41:36,160

putting a camera

1185

00:41:41,990 --> 00:41:37,599

um

1186

00:41:43,270 --> 00:41:42,000

we're adding in as much science as we

1187

00:41:44,230 --> 00:41:43,280

can

1188

00:41:46,829 --> 00:41:44,240

um

1189

00:41:49,589 --> 00:41:46,839

so jim uh

1190

00:41:51,270 --> 00:41:49,599

signal he's basically gonna be there and

1191

00:41:53,670 --> 00:41:51,280

he's doing the sign he does uh the

1192

00:41:55,829 --> 00:41:53,680

science on skinwalker ranch he's been on

1193

00:41:58,390 --> 00:41:55,839

uh two or three seasons or two or three

1194

00:41:59,910 --> 00:41:58,400

episodes of skinwalker ranch and he sets

1195

00:42:00,870 --> 00:41:59,920

up these little science stations that

1196

00:42:03,750 --> 00:42:00,880

measure

1197

00:42:06,069 --> 00:42:03,760

uh 500 megahertz up to six gigahertz

1198

00:42:07,829 --> 00:42:06,079

right so we can put that in and they

1199

00:42:09,829 --> 00:42:07,839

also have he has a you know temperature

1200

00:42:11,349 --> 00:42:09,839

humidity we have all the standard basic

1201
00:42:13,109 --> 00:42:11,359
sensors in there

1202
00:42:14,069 --> 00:42:13,119
wow so you're gonna get data coming back

1203
00:42:16,870 --> 00:42:14,079
as well

1204
00:42:18,470 --> 00:42:16,880
yeah exactly that's awesome because all

1205
00:42:20,309 --> 00:42:18,480
these other projects

1206
00:42:21,670 --> 00:42:20,319
you know they they spend just cash on

1207
00:42:22,470 --> 00:42:21,680
marketing right they're just going to

1208
00:42:28,309 --> 00:42:22,480
pay

1209
00:42:29,829 --> 00:42:28,319
share your your project you know that's

1210
00:42:33,270 --> 00:42:29,839
basically and i was like i don't want to

1211
00:42:35,510 --> 00:42:33,280
do that you know um i love like tesla i

1212
00:42:37,030 --> 00:42:35,520
love musk's whole game plan you know he

1213
00:42:38,230 --> 00:42:37,040

just focuses everything on on the

1214

00:42:40,150 --> 00:42:38,240

product you know just

1215

00:42:42,069 --> 00:42:40,160

just focus on the product so i was like

1216

00:42:44,790 --> 00:42:42,079

we want more science

1217

00:42:46,630 --> 00:42:44,800

um i love seeing things blow up i think

1218

00:42:49,270 --> 00:42:46,640

everyone can agree

1219

00:42:50,950 --> 00:42:49,280

you know and we're getting space time um

1220

00:42:52,069 --> 00:42:50,960

because we do like we want to do a

1221

00:42:54,630 --> 00:42:52,079

satellite we want to get into the

1222

00:42:56,950 --> 00:42:54,640

atmosphere into space and

1223

00:42:58,870 --> 00:42:56,960

um and try and get more data plus it's

1224

00:43:00,390 --> 00:42:58,880

just cooler like

1225

00:43:01,829 --> 00:43:00,400

yeah that's the whole space launch man

1226

00:43:04,309 --> 00:43:01,839

that's that's the balloon launch

1227

00:43:06,069 --> 00:43:04,319

superpower that's awesome man um so

1228

00:43:08,230 --> 00:43:06,079

where can people will people be able to

1229

00:43:10,710 --> 00:43:08,240

watch that live on your youtube channel

1230

00:43:13,510 --> 00:43:10,720

exactly yep so it'll start noon pacific

1231

00:43:14,390 --> 00:43:13,520

time on next friday

1232

00:43:16,390 --> 00:43:14,400

luis

1233

00:43:18,550 --> 00:43:16,400

jimenez is hosting it

1234

00:43:20,390 --> 00:43:18,560

okay cool cool i mean for anyone

1235

00:43:21,750 --> 00:43:20,400

watching now make sure i'm sure most of

1236

00:43:23,589 --> 00:43:21,760

you are already subscribed to chris's

1237

00:43:25,270 --> 00:43:23,599

channel but yeah i'm sure you can find

1238

00:43:27,030 --> 00:43:25,280

all the information there i'll be

1239

00:43:29,589 --> 00:43:27,040

sharing it across all of my my stuff as

1240

00:43:30,790 --> 00:43:29,599

well so i'm sure people will find it but

1241

00:43:31,990 --> 00:43:30,800

you've got another balloon launch am i

1242

00:43:34,069 --> 00:43:32,000

right and saying you've got a second one

1243

00:43:35,190 --> 00:43:34,079

planned as well

1244

00:43:36,870 --> 00:43:35,200

yes

1245

00:43:39,270 --> 00:43:36,880

we have the main space balloon launch

1246

00:43:40,950 --> 00:43:39,280

planned in in july that was the original

1247

00:43:42,630 --> 00:43:40,960

basic plan was to raise the money from

1248

00:43:45,589 --> 00:43:42,640

the sale

1249

00:43:47,589 --> 00:43:45,599

but we were able to just push it forward

1250

00:43:49,109 --> 00:43:47,599

instead of paying money on marketing pay

1251

00:43:50,950 --> 00:43:49,119

it on balloon launches

1252

00:43:53,670 --> 00:43:50,960

the second one will have sky 360

1253

00:43:55,750 --> 00:43:53,680

representation so the idea is to to put

1254

00:43:58,630 --> 00:43:55,760

their camera system

1255

00:44:00,870 --> 00:43:58,640

um into the into the balloon

1256

00:44:02,630 --> 00:44:00,880

wow wow and and really it's to and again

1257

00:44:04,550 --> 00:44:02,640

it's to drive their development you know

1258

00:44:05,750 --> 00:44:04,560

they're again a volunteer organization

1259

00:44:07,990 --> 00:44:05,760

these guys are they've been working

1260

00:44:09,030 --> 00:44:08,000

their asses off every sunday they're in

1261

00:44:11,030 --> 00:44:09,040

there

1262

00:44:13,030 --> 00:44:11,040

on the discord at like you know three in

1263

00:44:14,710 --> 00:44:13,040

the afternoon just just hammering

1264

00:44:16,069 --> 00:44:14,720

they're just grinding

1265

00:44:18,870 --> 00:44:16,079

um and they don't you know they don't

1266

00:44:20,230 --> 00:44:18,880

get paid they're just volunteers

1267

00:44:22,630 --> 00:44:20,240

so anyway

1268

00:44:24,630 --> 00:44:22,640

to drive them harder yeah we want but we

1269

00:44:26,550 --> 00:44:24,640

need a solution right we need a product

1270

00:44:30,550 --> 00:44:26,560

so it's also to motivate them you know

1271

00:44:33,030 --> 00:44:30,560

to to yeah get out there to to to get

1272

00:44:34,870 --> 00:44:33,040

the systems built and

1273

00:44:36,390 --> 00:44:34,880

and to get we need eyes on right we need

1274

00:44:37,990 --> 00:44:36,400

engineers we need scientists they

1275

00:44:40,150 --> 00:44:38,000

sky360.org

1276

00:44:42,470 --> 00:44:40,160

you know they need that um

1277

00:44:43,349 --> 00:44:42,480

and it's hard to integrate people so not

1278

00:44:45,190 --> 00:44:43,359

you know

1279

00:44:47,670 --> 00:44:45,200

out of we've sent hundreds of people

1280

00:44:48,470 --> 00:44:47,680

there which is which is good right

1281

00:44:51,030 --> 00:44:48,480

but

1282

00:44:52,309 --> 00:44:51,040

one you know only two or three are able

1283

00:44:54,630 --> 00:44:52,319

to stick

1284

00:44:56,309 --> 00:44:54,640

you know to really make a difference

1285

00:44:57,829 --> 00:44:56,319

seriously which is which is fine which

1286

00:44:59,030 --> 00:44:57,839

is good but we we need those two to

1287

00:45:00,870 --> 00:44:59,040

three people

1288

00:45:03,190 --> 00:45:00,880

um so we need those constant people so

1289

00:45:05,190 --> 00:45:03,200

you know i would ask people to go check

1290

00:45:06,550 --> 00:45:05,200

out sky360.org if you're interested in

1291

00:45:08,470 --> 00:45:06,560

like building these systems or build it

1292

00:45:10,309 --> 00:45:08,480

working on these camera developments uh

1293

00:45:13,750 --> 00:45:10,319

or ai really one of the biggest sticking

1294

00:45:15,270 --> 00:45:13,760

points going to be ai on the main sky

1295

00:45:16,470 --> 00:45:15,280

yeah so if you're interested in that go

1296

00:45:18,150 --> 00:45:16,480

check it out you're probably not going

1297

00:45:20,550 --> 00:45:18,160

to fit in right immediately but you'll

1298

00:45:22,870 --> 00:45:20,560

learn something 100 so you'll definitely

1299

00:45:24,550 --> 00:45:22,880

learn something um

1300

00:45:27,190 --> 00:45:24,560

yeah which i that's why i like i like

1301

00:45:28,230 --> 00:45:27,200

action like going and doing stuff um

1302

00:45:29,829 --> 00:45:28,240

because you're going to find out you

1303

00:45:31,349 --> 00:45:29,839

know we'll find out what a weather

1304

00:45:32,870 --> 00:45:31,359

balloon looks like so now they can't

1305

00:45:33,990 --> 00:45:32,880

just say

1306

00:45:35,829 --> 00:45:34,000

the kid always say it's a weather

1307

00:45:37,270 --> 00:45:35,839

balloon you know it'll be like ah you

1308

00:45:39,349 --> 00:45:37,280

know like

1309

00:45:41,109 --> 00:45:39,359

i've seen a few weather balloons uh

1310

00:45:43,510 --> 00:45:41,119

because we've launched we'll we'll have

1311

00:45:46,950 --> 00:45:43,520

launched uh four of them by then you

1312

00:45:47,990 --> 00:45:46,960

know yeah so we'll have experience um

1313

00:45:49,829 --> 00:45:48,000

yeah

1314

00:45:51,750 --> 00:45:49,839

that's awesome man i can't wait to watch

1315

00:45:53,510 --> 00:45:51,760

i'm sure a lot of people are excited

1316

00:45:55,910 --> 00:45:53,520

i think it'll work i hope it will it's

1317

00:45:58,309 --> 00:45:55,920

gonna be gonna try

1318

00:45:59,990 --> 00:45:58,319

you're used to live tv i just i just i

1319

00:46:01,510 --> 00:46:00,000

don't do that much i did it today it was

1320

00:46:02,630 --> 00:46:01,520

it was super fun though it was really

1321

00:46:04,950 --> 00:46:02,640

fun

1322

00:46:06,309 --> 00:46:04,960

yeah that was good um listen before

1323

00:46:08,150 --> 00:46:06,319

before i let you go i just wanted to ask

1324

00:46:09,829 --> 00:46:08,160

if you've got any other ufo cases that

1325

00:46:11,910 --> 00:46:09,839

you're working on whether it be making a

1326

00:46:14,069 --> 00:46:11,920

video because i think since we last

1327

00:46:15,990 --> 00:46:14,079

spoke um you've done quite a few and i

1328

00:46:18,150 --> 00:46:16,000

noted down gulf breeze because that case

1329

00:46:19,270 --> 00:46:18,160

has always fascinated me so have you got

1330

00:46:20,870 --> 00:46:19,280

any others that you're working on at the

1331

00:46:23,829 --> 00:46:20,880

moment

1332

00:46:24,870 --> 00:46:23,839

i mean the main one was uh the ryan

1333

00:46:27,270 --> 00:46:24,880

graves

1334

00:46:29,349 --> 00:46:27,280

okay the uap that was the main one off

1335

00:46:31,430 --> 00:46:29,359

the east coast

1336

00:46:34,550 --> 00:46:31,440

actually no i've

1337

00:46:35,990 --> 00:46:34,560

the next week i'm considering another

1338

00:46:38,150 --> 00:46:36,000

larger organism

1339

00:46:39,510 --> 00:46:38,160

add-on

1340

00:46:41,510 --> 00:46:39,520

additional theory i don't know if it's

1341

00:46:42,870 --> 00:46:41,520

the right time for it but

1342

00:46:44,710 --> 00:46:42,880

i can only make video actually i just

1343

00:46:46,309 --> 00:46:44,720

make videos when i when they come into

1344

00:46:48,150 --> 00:46:46,319

my brain i can get the motivation to

1345

00:46:51,109 --> 00:46:48,160

make it you know it's it's hard making

1346

00:46:53,270 --> 00:46:51,119

making content you know of course

1347

00:46:56,550 --> 00:46:53,280

but i have some ideas for the

1348

00:46:58,550 --> 00:46:56,560

uh the next level or

1349

00:47:00,710 --> 00:46:58,560

of the larger organism dealing with

1350

00:47:02,470 --> 00:47:00,720

entropy time

1351

00:47:03,990 --> 00:47:02,480

i don't know it's crazy stuff i tried to

1352

00:47:05,990 --> 00:47:04,000

i almost i was meeting up with kurt

1353

00:47:08,150 --> 00:47:06,000

jeiman gal we tried three times to meet

1354

00:47:10,230 --> 00:47:08,160

up and uh just didn't work but

1355

00:47:11,030 --> 00:47:10,240

i'll just uh just do it on my own on my

1356

00:47:12,230 --> 00:47:11,040

own

1357

00:47:13,829 --> 00:47:12,240

do it man

1358

00:47:15,030 --> 00:47:13,839

that's what i keep i try and meet up

1359

00:47:16,550 --> 00:47:15,040

with people and they don't show up and

1360

00:47:18,470 --> 00:47:16,560

i'm like all right i'll just do it on my

1361

00:47:20,069 --> 00:47:18,480

own you know kurt's a busy man i've

1362

00:47:21,589 --> 00:47:20,079

spoken to him a few times and like we

1363

00:47:23,030 --> 00:47:21,599

always try and plan interviews and stuff

1364

00:47:25,349 --> 00:47:23,040

and it never happens he's just like busy

1365

00:47:27,510 --> 00:47:25,359

busy busy so i fully understand that man

1366

00:47:28,710 --> 00:47:27,520

totally i totally get it i totally get

1367

00:47:30,630 --> 00:47:28,720

it yeah

1368

00:47:32,950 --> 00:47:30,640

well listen uh chris thank you so much

1369

00:47:34,470 --> 00:47:32,960

man i'm like i said before i'm gonna you

1370

00:47:36,549 --> 00:47:34,480

know be putting out all the information

1371

00:47:38,790 --> 00:47:36,559

about uap society as well

1372

00:47:40,870 --> 00:47:38,800

uh i just can't wait till what 10 days

1373

00:47:43,510 --> 00:47:40,880

away from the from the launch i can't

1374

00:47:45,190 --> 00:47:43,520

believe it yeah

1375

00:47:46,630 --> 00:47:45,200

yeah good

1376

00:47:48,309 --> 00:47:46,640

yep

1377

00:47:49,910 --> 00:47:48,319

um i think i've missed some links from

1378

00:47:51,109 --> 00:47:49,920

the description below this video at the

1379

00:47:52,470 --> 00:47:51,119

moment but they will be added in

1380

00:47:54,069 --> 00:47:52,480

straight after the show

1381

00:47:56,069 --> 00:47:54,079

but yeah thank you so much again my

1382

00:47:57,990 --> 00:47:56,079

friend um i wish you all the best and i

1383

00:47:59,589 --> 00:47:58,000

always enjoy chatting to you man so yeah

1384

00:48:01,430 --> 00:47:59,599

thank you very much excellent thanks

1385

00:48:03,349 --> 00:48:01,440

everybody for being here yeah everyone

1386

00:48:05,670 --> 00:48:03,359

in the live chat guys thank you so much

1387

00:48:07,990 --> 00:48:05,680

um i'm gonna be back on saturday for my

1388

00:48:11,270 --> 00:48:08,000

science panel so i've got

1389

00:48:13,270 --> 00:48:11,280

gary nolan kevin knuth uh michael

1390

00:48:14,390 --> 00:48:13,280

masters and rich hoffman joining me for

1391

00:48:30,630 --> 00:48:14,400

a

1392

00:48:32,710 --> 00:48:30,640

hey

1393

00:48:34,710 --> 00:48:32,720

it's a lot of trying trust me a lot of

1394

00:48:37,510 --> 00:48:34,720

emails a lot of that a lot of a lot of

1395

00:48:38,870 --> 00:48:37,520

work but yeah so yeah um everything all

1396

00:48:40,549 --> 00:48:38,880

the links were available across all my

1397

00:48:42,309 --> 00:48:40,559

social medias people always find a way

1398

00:48:44,870 --> 00:48:42,319

of finding my stuff so yeah i'm not

1399

00:48:46,790 --> 00:48:44,880

gonna spit it all out here guys everyone

1400

00:48:47,990 --> 00:48:46,800

thank you so much for listening watching

1401

00:48:49,910 --> 00:48:48,000

and all that and yeah we'll see you
