00:00:12,950 --> 00:00:09,400

[Music]

2
00:00:12,960 --> 00:00:17,420

oh

3
00:00:40,310 --> 00:00:24,440

[Music]

4
00:00:46,150 --> 00:00:43,270
hello everybody and welcome back to the

5
00:00:47,590 --> 00:00:46,160
disclosure team youtube channel and this

6
00:00:50,709 --> 00:00:47,600
is a conversation that i've been looking

7
00:00:53,029 --> 00:00:50,719
forward to for some time now um

8
00:00:55,830 --> 00:00:53,039
originally we started out with four

9
00:00:57,830 --> 00:00:55,840
guests unfortunately dr gary nolan

10
00:00:59,590 --> 00:00:57,840
couldn't make it which is fair enough

11
00:01:02,310 --> 00:00:59,600
and then unfortunately today uh kevin

12
00:01:03,029 --> 00:01:02,320
knuth came down um not feeling very well

13
00:01:05,590 --> 00:01:03,039

so

14

00:01:08,310 --> 00:01:05,600

send my best wishes to kevin but um we

15

00:01:11,670 --> 00:01:08,320

do have three gentlemen here for for the

16

00:01:14,390 --> 00:01:11,680

discussion so first of all um

17

00:01:15,910 --> 00:01:14,400

rich hoffman has a ba in organizational

18

00:01:17,670 --> 00:01:15,920

communications from wright state

19

00:01:20,070 --> 00:01:17,680

university he is an information

20

00:01:21,749 --> 00:01:20,080

technology consultant and strategist he

21

00:01:24,149 --> 00:01:21,759

has worked as a defense contractor for

22

00:01:26,950 --> 00:01:24,159

over 20 years working primarily for the

23

00:01:28,310 --> 00:01:26,960

army material command hq with a variety

24

00:01:29,749 --> 00:01:28,320

of companies

25

00:01:32,310 --> 00:01:29,759

currently mr hoffman works as an

26
00:01:34,149 --> 00:01:32,320
enterprise architect at redstone arsenal

27
00:01:36,870 --> 00:01:34,159
and the marshall space flight center in

28
00:01:38,469 --> 00:01:36,880
huntsville alabama he has over 54 years

29
00:01:40,630 --> 00:01:38,479
of experience investigating and

30
00:01:42,870 --> 00:01:40,640
researching the ufo subject

31
00:01:44,789 --> 00:01:42,880
so let me please introduce mr rich

32
00:01:46,950 --> 00:01:44,799
hoffman rich how are you doing

33
00:01:49,990 --> 00:01:46,960
i'm well thanks how are you vinnie

34
00:01:52,310 --> 00:01:50,000
i'm doing very well thank you

35
00:01:54,630 --> 00:01:52,320
next up michael masters received his ba

36
00:01:57,109 --> 00:01:54,640
in anthropology and french in 2000 from

37
00:01:59,030 --> 00:01:57,119
ohio university in athens ohio and

38
00:02:02,149 --> 00:01:59,040

completed his phd at the ohio state

39

00:02:04,149 --> 00:02:02,159

university in columbus in 2009

40

00:02:06,550 --> 00:02:04,159

he has taught biological anthropology

41

00:02:09,270 --> 00:02:06,560

cultural anthropology archaeology

42

00:02:11,270 --> 00:02:09,280

economic anthropology and globalization

43

00:02:14,150 --> 00:02:11,280

sociology and cultural diversity of the

44

00:02:16,550 --> 00:02:14,160

ohio state university

45

00:02:18,630 --> 00:02:16,560

and a number of other places his

46

00:02:21,510 --> 00:02:18,640

research includes investigating hominin

47

00:02:23,430 --> 00:02:21,520

biocultural evolution astrobiology

48

00:02:26,550 --> 00:02:23,440

astronomy and the physics of time as

49

00:02:28,869 --> 00:02:26,560

they relate to the ufo phenomenon please

50

00:02:30,790 --> 00:02:28,879

welcome dr michael massey

51
00:02:32,630 --> 00:02:30,800
michael how are you doing great good to

52
00:02:36,309 --> 00:02:32,640
see you again vinnie thank you very much

53
00:02:38,309 --> 00:02:36,319
always pleasure good to see you too

54
00:02:40,949 --> 00:02:38,319
and finally matthew cedargas received

55
00:02:44,869 --> 00:02:40,959
his ba ms and phd from the university of

56
00:02:47,190 --> 00:02:44,879
chicago in 2005 2006 and 2011

57
00:02:49,350 --> 00:02:47,200
respectively then continued his work in

58
00:02:51,910 --> 00:02:49,360
physics as a postdoctoral scholar at the

59
00:02:54,150 --> 00:02:51,920
university of california davis since

60
00:02:55,670 --> 00:02:54,160
2014 he has been a professor at the

61
00:02:57,990 --> 00:02:55,680
university of albany department of

62
00:03:00,710 --> 00:02:58,000
physics pursuing experimental particle

63
00:03:02,790 --> 00:03:00,720

astrophysics matthew is also a member of

64

00:03:05,430 --> 00:03:02,800

uapx and recently featured in the

65

00:03:07,350 --> 00:03:05,440

documentary a tear in the sky so please

66

00:03:10,070 --> 00:03:07,360

welcome professor matthew chadargus

67

00:03:11,750 --> 00:03:10,080

matthew am i saying your name okay

68

00:03:13,430 --> 00:03:11,760

i guess yeah yeah you did a good job

69

00:03:17,190 --> 00:03:13,440

yeah thank you so much that's been

70

00:03:20,470 --> 00:03:18,949

so thank you gentlemen so much and

71

00:03:21,910 --> 00:03:20,480

matthew thank you because i know this is

72

00:03:24,710 --> 00:03:21,920

very short notes for you and it's really

73

00:03:26,630 --> 00:03:24,720

truly appreciated that's okay

74

00:03:28,630 --> 00:03:26,640

um i'd love to start this conversation

75

00:03:30,309 --> 00:03:28,640

off with a discussion on the recent

76

00:03:31,589 --> 00:03:30,319

congressional hearings that that just

77

00:03:33,430 --> 00:03:31,599

happened so

78

00:03:36,149 --> 00:03:33,440

and let's start with you rich i know

79

00:03:37,190 --> 00:03:36,159

that the scu submitted some questions

80

00:03:40,710 --> 00:03:37,200

for

81

00:03:42,710 --> 00:03:40,720

just go over some of the important

82

00:03:44,309 --> 00:03:42,720

questions that you did submit and the

83

00:03:46,710 --> 00:03:44,319

importance of them

84

00:03:48,149 --> 00:03:46,720

thank you uh

85

00:03:49,670 --> 00:03:48,159

actually i'm not prepared to talk about

86

00:03:51,990 --> 00:03:49,680

the questions

87

00:03:53,589 --> 00:03:52,000

sorry about that i can uh i can go into

88

00:03:55,030 --> 00:03:53,599

the details of how we led up to the

89

00:03:56,470 --> 00:03:55,040

questions

90

00:03:58,949 --> 00:03:56,480

for the most part what we did is we

91

00:04:00,630 --> 00:03:58,959

started off uh like looking and saying

92

00:04:03,350 --> 00:04:00,640

well we need to be able to get something

93

00:04:05,350 --> 00:04:03,360

up there to the hill to basically help

94

00:04:06,470 --> 00:04:05,360

carry on the conversation and also

95

00:04:08,470 --> 00:04:06,480

inform

96

00:04:10,949 --> 00:04:08,480

a lot of the uh the individuals that

97

00:04:12,390 --> 00:04:10,959

would be attending or other congress

98

00:04:15,429 --> 00:04:12,400

congressional leaders

99

00:04:17,830 --> 00:04:15,439

and so we as a group begin drafting some

100

00:04:20,229 --> 00:04:17,840

questions that were relating to

101
00:04:22,550 --> 00:04:20,239
you know the subject of uh that was on

102
00:04:25,510 --> 00:04:22,560
hand and wanting to know more

103
00:04:27,030 --> 00:04:25,520
uh and we basically went through and

104
00:04:29,030 --> 00:04:27,040
pretty much collaborated with a whole

105
00:04:31,110 --> 00:04:29,040
variety of people to go and get those

106
00:04:33,909 --> 00:04:31,120
questions ironed out

107
00:04:36,150 --> 00:04:33,919
uh sadly i'm aware of the fact that uh

108
00:04:37,749 --> 00:04:36,160
having watched that that they weren't

109
00:04:39,350 --> 00:04:37,759
asked

110
00:04:41,990 --> 00:04:39,360
and and they weren't even a lot of them

111
00:04:44,230 --> 00:04:42,000
were not even addressed in the actual

112
00:04:47,830 --> 00:04:44,240
hearing

113
00:04:49,430 --> 00:04:47,840

like many i think i was pretty

114

00:04:51,510 --> 00:04:49,440

disappointed by

115

00:04:53,749 --> 00:04:51,520

just overall what they didn't talk about

116

00:04:54,870 --> 00:04:53,759

and also i was very disappointed that

117

00:04:57,030 --> 00:04:54,880

they didn't

118

00:04:59,749 --> 00:04:57,040

seem to have a good understanding of

119

00:05:00,950 --> 00:04:59,759

even the history of the actual phenomena

120

00:05:02,390 --> 00:05:00,960

itself

121

00:05:04,070 --> 00:05:02,400

when you when you're going in front of

122

00:05:05,749 --> 00:05:04,080

an intelligence committee you would

123

00:05:08,469 --> 00:05:05,759

think that if you mention something

124

00:05:11,189 --> 00:05:08,479

along the lines of the the uh the

125

00:05:13,510 --> 00:05:11,199

nuclear cases that have been well

126

00:05:15,430 --> 00:05:13,520

publicized and are all over the board

127

00:05:17,430 --> 00:05:15,440

that you would certainly expect that

128

00:05:19,350 --> 00:05:17,440

they they would the individuals of a

129

00:05:21,590 --> 00:05:19,360

briefing would be able to mention that

130

00:05:24,870 --> 00:05:21,600

especially since that they're allegedly

131

00:05:29,430 --> 00:05:24,880

the head of uap projects right

132

00:05:31,670 --> 00:05:29,440

and so uh i was very taken back by that

133

00:05:33,590 --> 00:05:31,680

uh not that i expect them to know what

134

00:05:35,270 --> 00:05:33,600

happened before project blue book and

135

00:05:38,230 --> 00:05:35,280

the various projects like sign and

136

00:05:39,990 --> 00:05:38,240

grudge but nevertheless about a nuclear

137

00:05:42,550 --> 00:05:40,000

question you'd expect that that would be

138

00:05:44,310 --> 00:05:42,560

something that they could talk about so

139

00:05:47,270 --> 00:05:44,320

i came away pretty much disappointed i

140

00:05:49,830 --> 00:05:47,280

think a lot of the people that i saw in

141

00:05:52,870 --> 00:05:49,840

not having the questions addressed as

142

00:05:54,310 --> 00:05:52,880

well as also finding out uh

143

00:05:56,070 --> 00:05:54,320

you know just that they didn't cover

144

00:05:57,510 --> 00:05:56,080

that was disappointed

145

00:05:59,830 --> 00:05:57,520

we do have the questions by the way

146

00:06:01,590 --> 00:05:59,840

online so they are available at our

147

00:06:02,550 --> 00:06:01,600

website so you can go up and take a look

148

00:06:05,029 --> 00:06:02,560

at them

149

00:06:07,510 --> 00:06:05,039

um and so i encourage people to do that

150

00:06:09,029 --> 00:06:07,520

at explorespu.org

151
00:06:11,430 --> 00:06:09,039
and i'll just shut up for a minute and

152
00:06:13,270 --> 00:06:11,440
let you ask the other people

153
00:06:15,189 --> 00:06:13,280
no problem thank you okay should i jump

154
00:06:17,110 --> 00:06:15,199
in on that maybe rich could actually

155
00:06:18,710 --> 00:06:17,120
answer this better um

156
00:06:20,629 --> 00:06:18,720
it seems to me

157
00:06:22,469 --> 00:06:20,639
i i've only been researching the ufo

158
00:06:23,270 --> 00:06:22,479
aspect of this

159
00:06:25,670 --> 00:06:23,280
for

160
00:06:27,590 --> 00:06:25,680
probably 10 years compared to rich's 50s

161
00:06:28,870 --> 00:06:27,600
so he might have better insight on this

162
00:06:31,029 --> 00:06:28,880
but it seems to me that from the very

163
00:06:33,029 --> 00:06:31,039

beginning it was the air force that was

164

00:06:36,070 --> 00:06:33,039

involved with all of this and with

165

00:06:37,189 --> 00:06:36,080

ruppel and all the different committees

166

00:06:39,110 --> 00:06:37,199

um

167

00:06:41,510 --> 00:06:39,120

i mean obviously the office of special

168

00:06:44,230 --> 00:06:41,520

investigations is always a name that

169

00:06:46,629 --> 00:06:44,240

comes up in interrogating witnesses

170

00:06:48,230 --> 00:06:46,639

especially military witnesses so where

171

00:06:49,510 --> 00:06:48,240

are they in all of this i haven't seen

172

00:06:52,550 --> 00:06:49,520

them

173

00:06:54,390 --> 00:06:52,560

even make a peep this entire time and it

174

00:06:55,990 --> 00:06:54,400

i guess from from my point of view it

175

00:06:57,430 --> 00:06:56,000

seems that we're not going to get any

176

00:06:59,029 --> 00:06:57,440

meaningful information until they're

177

00:07:00,870 --> 00:06:59,039

involved

178

00:07:02,790 --> 00:07:00,880

i'd be happy to answer that because i do

179

00:07:04,230 --> 00:07:02,800

work in the dod and i can also tell you

180

00:07:07,189 --> 00:07:04,240

about some of the challenges that they

181

00:07:09,189 --> 00:07:07,199

have from a dod context especially and

182

00:07:11,749 --> 00:07:09,199

also working cooperatively and in

183

00:07:14,070 --> 00:07:11,759

conjunction with the ic part of that

184

00:07:16,710 --> 00:07:14,080

you know there's a title 10 and title 50

185

00:07:18,790 --> 00:07:16,720

organizations here uh then you're also

186

00:07:21,029 --> 00:07:18,800

talking about bringing in things like

187

00:07:22,390 --> 00:07:21,039

noaa and nasa

188

00:07:24,870 --> 00:07:22,400

uh and a whole bunch of other

189

00:07:27,270 --> 00:07:24,880

organizations that not i mean a lot of

190

00:07:29,510 --> 00:07:27,280

these organizations have not been

191

00:07:31,189 --> 00:07:29,520

investigating ufos

192

00:07:33,510 --> 00:07:31,199

that's not even a topic that they

193

00:07:35,830 --> 00:07:33,520

address and so

194

00:07:37,749 --> 00:07:35,840

what i picked up from the hearings was a

195

00:07:39,670 --> 00:07:37,759

lack of maturity of their overall

196

00:07:42,070 --> 00:07:39,680

program and processes

197

00:07:44,629 --> 00:07:42,080

so i think that what's happened is that

198

00:07:46,550 --> 00:07:44,639

it's gone from an unfunded

199

00:07:48,629 --> 00:07:46,560

task force that was made up of people

200

00:07:50,869 --> 00:07:48,639

that were working other duties as

201
00:07:53,189 --> 00:07:50,879
assigned that didn't have official

202
00:07:54,790 --> 00:07:53,199
positions and getting resourced

203
00:07:56,150 --> 00:07:54,800
to the point where now what they're

204
00:07:58,469 --> 00:07:56,160
doing is they're trying to get their

205
00:08:01,110 --> 00:07:58,479
structure built up they're also trying

206
00:08:03,589 --> 00:08:01,120
to be able to get cooperation from

207
00:08:05,909 --> 00:08:03,599
government agencies which is not always

208
00:08:08,469 --> 00:08:05,919
easy to do by the way

209
00:08:10,550 --> 00:08:08,479
and to then bring all that stuff

210
00:08:13,270 --> 00:08:10,560
together if you would

211
00:08:14,950 --> 00:08:13,280
into some cohesive like maybe database

212
00:08:16,309 --> 00:08:14,960
or structure where they can actually do

213
00:08:18,230 --> 00:08:16,319

something about it

214

00:08:20,629 --> 00:08:18,240

so you're absolutely right michael that

215

00:08:22,950 --> 00:08:20,639

going back to when i got started it was

216

00:08:24,950 --> 00:08:22,960

project blue book in dayton ohio and

217

00:08:27,270 --> 00:08:24,960

that was an air force project they were

218

00:08:28,869 --> 00:08:27,280

responsible for it at that time yeah

219

00:08:30,710 --> 00:08:28,879

right that wasn't it

220

00:08:32,550 --> 00:08:30,720

yeah right pat that's where i lived i

221

00:08:34,389 --> 00:08:32,560

lived uh just down the street from right

222

00:08:35,909 --> 00:08:34,399

pat in fact i went over to project blue

223

00:08:37,350 --> 00:08:35,919

book when i was still

224

00:08:39,190 --> 00:08:37,360

there uh

225

00:08:41,750 --> 00:08:39,200

so i got to know the parties and the

226

00:08:43,750 --> 00:08:41,760

players in fact i investigated ufo cases

227

00:08:44,550 --> 00:08:43,760

with a blue book officer sitting next to

228

00:08:45,990 --> 00:08:44,560

me

229

00:08:47,910 --> 00:08:46,000

so uh

230

00:08:50,550 --> 00:08:47,920

the point that i'm trying to say is that

231

00:08:52,630 --> 00:08:50,560

that the air force got into it got

232

00:08:54,710 --> 00:08:52,640

started with it they found out that they

233

00:08:56,470 --> 00:08:54,720

were starting to get some good reports

234

00:08:57,829 --> 00:08:56,480

certainly they didn't get every report

235

00:08:59,269 --> 00:08:57,839

because a lot of people don't trust

236

00:09:00,949 --> 00:08:59,279

reporting to the government about

237

00:09:03,190 --> 00:09:00,959

anything right so they they didn't

238

00:09:05,509 --> 00:09:03,200

report and a lot of people will never

239

00:09:07,030 --> 00:09:05,519

report i mean that's just the nature of

240

00:09:09,910 --> 00:09:07,040

the the problem because they don't want

241

00:09:12,070 --> 00:09:09,920

to be crazy or considered nuts or

242

00:09:12,949 --> 00:09:12,080

whatever like that so

243

00:09:14,790 --> 00:09:12,959

again

244

00:09:18,230 --> 00:09:14,800

they went to the air force the air force

245

00:09:19,910 --> 00:09:18,240

did their best with it hypothetically uh

246

00:09:21,829 --> 00:09:19,920

and they only looked at things that they

247

00:09:23,750 --> 00:09:21,839

got from the citizenry they weren't

248

00:09:26,230 --> 00:09:23,760

necessarily focused in on a lot of times

249

00:09:28,550 --> 00:09:26,240

the military well now you've got coming

250

00:09:30,710 --> 00:09:28,560

all this length of time later you

251
00:09:32,470 --> 00:09:30,720
suddenly don't have much engagement in

252
00:09:34,870 --> 00:09:32,480
the air force and you suddenly have the

253
00:09:36,470 --> 00:09:34,880
navy coming up and there were they were

254
00:09:38,550 --> 00:09:36,480
the lead to be able to get this whole

255
00:09:40,310 --> 00:09:38,560
thing going because they were seeing

256
00:09:42,310 --> 00:09:40,320
them all around their their carrier

257
00:09:43,829 --> 00:09:42,320
ships and and the water coming out you

258
00:09:44,630 --> 00:09:43,839
know and all this other stuff and so

259
00:09:46,630 --> 00:09:44,640
that

260
00:09:49,590 --> 00:09:46,640
now they take the lead

261
00:09:51,190 --> 00:09:49,600
uh and you got them now building the

262
00:09:53,829 --> 00:09:51,200
structure if you would

263
00:09:56,070 --> 00:09:53,839

uh and and and so that's what's happened

264

00:09:58,870 --> 00:09:56,080

is it's shifted over and then you have

265

00:10:01,190 --> 00:09:58,880

to also be fair to the the the uap task

266

00:10:03,110 --> 00:10:01,200

force they were they were not looking at

267

00:10:05,269 --> 00:10:03,120

the citizen cases they were looking at

268

00:10:07,430 --> 00:10:05,279

now the military cases right right so

269

00:10:08,949 --> 00:10:07,440

it's the exact opposite of what you had

270

00:10:10,870 --> 00:10:08,959

with the air force

271

00:10:12,550 --> 00:10:10,880

uh in the context of now getting these

272

00:10:15,269 --> 00:10:12,560

reports and looking at all that

273

00:10:16,949 --> 00:10:15,279

scientific data so i believe it's a lack

274

00:10:18,389 --> 00:10:16,959

of maturity they haven't got their

275

00:10:19,990 --> 00:10:18,399

processes in place

276

00:10:23,430 --> 00:10:20,000

they're still not connected to the full

277

00:10:25,509 --> 00:10:23,440

government you know and so consequently

278

00:10:27,190 --> 00:10:25,519

that's what you saw was the fact that

279

00:10:28,790 --> 00:10:27,200

well we can't address those questions we

280

00:10:29,590 --> 00:10:28,800

don't we haven't looked at those you

281

00:10:31,110 --> 00:10:29,600

know

282

00:10:33,430 --> 00:10:31,120

they talk about their cases there's talk

283

00:10:35,990 --> 00:10:33,440

about 144 cases that they looked and

284

00:10:37,829 --> 00:10:36,000

then they went up to 400. now it's a

285

00:10:41,910 --> 00:10:37,839

shift over to the fact that they're

286

00:10:46,069 --> 00:10:43,430

does that help

287

00:10:48,550 --> 00:10:46,079

yeah definitely

288

00:10:50,870 --> 00:10:48,560

could i get it a chance here to voice my

289

00:10:53,829 --> 00:10:50,880

opinion on the uh on the hearing yes so

290

00:10:55,350 --> 00:10:53,839

yeah i i might i might be the only one

291

00:10:57,509 --> 00:10:55,360

who's not as disappointed as everyone

292

00:10:59,190 --> 00:10:57,519

but that's because i use the trick going

293

00:11:02,150 --> 00:10:59,200

into the hearings i use the same trick i

294

00:11:04,470 --> 00:11:02,160

use after star wars episode one phantom

295

00:11:06,630 --> 00:11:04,480

menace which enabled me to enjoy

296

00:11:09,110 --> 00:11:06,640

episodes two and three is i kept my

297

00:11:11,990 --> 00:11:09,120

expectations low expecting to be

298

00:11:14,630 --> 00:11:12,000

disappointed and that's what enabled me

299

00:11:16,949 --> 00:11:14,640

to look at the silver lining i think i

300

00:11:18,310 --> 00:11:16,959

found a lot of silver linings actually

301
00:11:23,590 --> 00:11:18,320
um

302
00:11:26,150 --> 00:11:23,600
for example that the 2004 nimitz

303
00:11:28,069 --> 00:11:26,160
encounter still unknown that's

304
00:11:30,389 --> 00:11:28,079
really important because then that means

305
00:11:32,790 --> 00:11:30,399
people like mick west are claiming to be

306
00:11:35,190 --> 00:11:32,800
smarter than entire teams of military

307
00:11:36,870 --> 00:11:35,200
experts and he's got his video to video

308
00:11:39,670 --> 00:11:36,880
like look it was a bug in the camera

309
00:11:40,949 --> 00:11:39,680
this like the us military has admitted

310
00:11:42,710 --> 00:11:40,959
it's still unknown to this day so i

311
00:11:44,949 --> 00:11:42,720
thought that was a key moment

312
00:11:47,750 --> 00:11:44,959
the other key moment was like usos oh we

313
00:11:49,030 --> 00:11:47,760

can't can't talk about multi medium you

314

00:11:50,230 --> 00:11:49,040

know where that's going to be the closed

315

00:11:53,030 --> 00:11:50,240

session i'm like

316

00:11:55,750 --> 00:11:53,040

that is an important clue and that ties

317

00:11:58,470 --> 00:11:55,760

in with why is the navy leading versus

318

00:12:00,550 --> 00:11:58,480

the air force that seems to go hand in

319

00:12:02,870 --> 00:12:00,560

hand the navy is leading and somehow

320

00:12:05,269 --> 00:12:02,880

water is connected i think that there

321

00:12:08,150 --> 00:12:05,279

were important hints and clues there

322

00:12:10,389 --> 00:12:08,160

important silver linings um i am

323

00:12:12,230 --> 00:12:10,399

very grateful to scu that actually a

324

00:12:14,949 --> 00:12:12,240

small frac a small number of the

325

00:12:16,710 --> 00:12:14,959

questions submitted um were ones that i

326

00:12:18,150 --> 00:12:16,720

i i had come up with i think i was at

327

00:12:20,790 --> 00:12:18,160

the right place at the right time on

328

00:12:24,230 --> 00:12:20,800

email chains cause i'm on uapx but also

329

00:12:26,629 --> 00:12:24,240

scu and um and some of them were

330

00:12:28,710 --> 00:12:26,639

accidentally covered

331

00:12:31,910 --> 00:12:28,720

not from us not from our document but

332

00:12:33,670 --> 00:12:31,920

the the the silos for example um the the

333

00:12:35,590 --> 00:12:33,680

missile silos was it was a question i

334

00:12:37,829 --> 00:12:35,600

made sure we we got in there i was

335

00:12:39,350 --> 00:12:37,839

really happy when the one congressman

336

00:12:40,790 --> 00:12:39,360

pushed on that and he's like wait a

337

00:12:42,069 --> 00:12:40,800

second you guys never heard of this how

338

00:12:43,110 --> 00:12:42,079

can you have never heard of this that's

339

00:12:44,790 --> 00:12:43,120

ridiculous

340

00:12:46,790 --> 00:12:44,800

that was a good moment that was a

341

00:12:49,190 --> 00:12:46,800

positive moment rich is right that it's

342

00:12:50,949 --> 00:12:49,200

embarrassing that they wouldn't know but

343

00:12:52,870 --> 00:12:50,959

i'm looking at the positive i'm trying

344

00:12:55,110 --> 00:12:52,880

to focus on the positive the fact that

345

00:12:57,509 --> 00:12:55,120

it got brought up at all

346

00:12:59,670 --> 00:12:57,519

and that the congressman hounded them on

347

00:13:01,750 --> 00:12:59,680

and be like how can you guys not know

348

00:13:03,190 --> 00:13:01,760

this oh no one in authority told us well

349

00:13:05,590 --> 00:13:03,200

i'm an authority i'm telling you to

350

00:13:07,910 --> 00:13:05,600

check this out i think that that wasn't

351

00:13:09,430 --> 00:13:07,920

that was that was that's really good

352

00:13:11,430 --> 00:13:09,440

that that was being hounded and that the

353

00:13:13,350 --> 00:13:11,440

multi-medium that was the other one did

354

00:13:15,430 --> 00:13:13,360

get brought up even though then it was

355

00:13:17,430 --> 00:13:15,440

like shunted to like oh we'll talk about

356

00:13:18,310 --> 00:13:17,440

that in the closed session so there's

357

00:13:20,310 --> 00:13:18,320

certainly there's a lot to be

358

00:13:22,389 --> 00:13:20,320

disappointed about i don't have the the

359

00:13:24,389 --> 00:13:22,399

the 15 50 years of history as rich so i

360

00:13:25,269 --> 00:13:24,399

understand that it's very easy to get

361

00:13:26,790 --> 00:13:25,279

like

362

00:13:28,550 --> 00:13:26,800

um

363

00:13:30,310 --> 00:13:28,560

don't take this the wrong way rich

364

00:13:32,629 --> 00:13:30,320

you know it's easy to get cynical or

365

00:13:34,790 --> 00:13:32,639

jaded but i think i'm young i i'm not

366

00:13:36,389 --> 00:13:34,800

i'm not at that point yet so i actually

367

00:13:39,670 --> 00:13:36,399

wasn't that disappointed with the

368

00:13:41,750 --> 00:13:39,680

hearing i was actually surprised by the

369

00:13:43,430 --> 00:13:41,760

number of admissions that of things that

370

00:13:44,870 --> 00:13:43,440

like yeah we don't know there are things

371

00:13:47,509 --> 00:13:44,880

we still don't know

372

00:13:49,350 --> 00:13:47,519

and and this and that so so yes

373

00:13:51,350 --> 00:13:49,360

my take on it was actually more positive

374

00:13:53,030 --> 00:13:51,360

than anyone else i've talked to so far

375

00:13:55,110 --> 00:13:53,040

in the community

376

00:13:56,550 --> 00:13:55,120

i agree with you a bit there sorry i i

377

00:13:59,350 --> 00:13:56,560

agree with you a bit there because i was

378

00:14:00,629 --> 00:13:59,360

ex i tempered my expectations but i was

379

00:14:02,790 --> 00:14:00,639

surprised to not hear the word

380

00:14:04,230 --> 00:14:02,800

transmedium mentioned once

381

00:14:07,590 --> 00:14:04,240

or something about space-based

382

00:14:10,310 --> 00:14:07,600

geospatial systems or or underwater i i

383

00:14:11,750 --> 00:14:10,320

i can understand that deep conversations

384

00:14:14,629 --> 00:14:11,760

on it have to be have behind closed

385

00:14:16,230 --> 00:14:14,639

doors in the classified area but i was

386

00:14:17,829 --> 00:14:16,240

just it baffled me that i didn't hear

387

00:14:18,550 --> 00:14:17,839

that word once

388

00:14:21,350 --> 00:14:18,560

i think

389

00:14:22,389 --> 00:14:21,360

you're underwater at least

390

00:14:24,710 --> 00:14:22,399

i do

391

00:14:26,230 --> 00:14:24,720

again yeah i agree with you matt i think

392

00:14:28,949 --> 00:14:26,240

that there was like you know there were

393

00:14:30,069 --> 00:14:28,959

definitely positive moments in it i

394

00:14:31,430 --> 00:14:30,079

thought that it was interesting that

395

00:14:33,110 --> 00:14:31,440

while you had the one guy that was

396

00:14:34,629 --> 00:14:33,120

talking the congressman that was talking

397

00:14:36,069 --> 00:14:34,639

and bringing up the fact that he knew

398

00:14:37,670 --> 00:14:36,079

about the nukes and he knew about

399

00:14:39,189 --> 00:14:37,680

everything then you had this other

400

00:14:40,870 --> 00:14:39,199

congressman that's over there sitting in

401
00:14:43,189 --> 00:14:40,880
saying well we should go after ufo

402
00:14:45,509 --> 00:14:43,199
groups and we should basically you know

403
00:14:46,949 --> 00:14:45,519
uh you know go after them and find them

404
00:14:48,310 --> 00:14:46,959
or you know put them in jail or

405
00:14:50,550 --> 00:14:48,320
something like that because they might

406
00:14:52,790 --> 00:14:50,560
be misleading information you know and

407
00:14:55,110 --> 00:14:52,800
i'm thinking like you know wow that's

408
00:14:56,949 --> 00:14:55,120
that's a great you know great idea let's

409
00:14:58,550 --> 00:14:56,959
just go that's the scary part yeah

410
00:14:59,990 --> 00:14:58,560
whatever whatever happened to the first

411
00:15:01,670 --> 00:15:00,000
amendment right this was still a free

412
00:15:03,990 --> 00:15:01,680
country exactly

413
00:15:05,910 --> 00:15:04,000

that definitely was a scary moment which

414

00:15:06,790 --> 00:15:05,920

yeah yeah you're absolutely right i know

415

00:15:10,389 --> 00:15:06,800

yeah

416

00:15:11,990 --> 00:15:10,399

you know coming back to the point where

417

00:15:13,829 --> 00:15:12,000

like you know yeah i've been in it for a

418

00:15:15,990 --> 00:15:13,839

long time i would love to be able to see

419

00:15:18,069 --> 00:15:16,000

a really right uh an appropriate

420

00:15:20,069 --> 00:15:18,079

congressional hearing

421

00:15:21,990 --> 00:15:20,079

even with potentially having witnesses

422

00:15:23,829 --> 00:15:22,000

and things like that like ryan graves or

423

00:15:25,750 --> 00:15:23,839

something like that even talking to the

424

00:15:27,430 --> 00:15:25,760

general public right and that that

425

00:15:29,430 --> 00:15:27,440

wasn't part of that this was these were

426

00:15:30,949 --> 00:15:29,440

two people that were leading a program

427

00:15:33,189 --> 00:15:30,959

that were doing nothing more than just

428

00:15:34,470 --> 00:15:33,199

you know answering what they maybe like

429

00:15:36,629 --> 00:15:34,480

roughly knew

430

00:15:40,310 --> 00:15:36,639

uh and you didn't get a really proper

431

00:15:41,509 --> 00:15:40,320

perspective on the overall ufo or uap

432

00:15:42,710 --> 00:15:41,519

equation

433

00:15:45,189 --> 00:15:42,720

and you know i think that that would

434

00:15:49,030 --> 00:15:45,199

have been more dynamic for the public

435

00:15:51,430 --> 00:15:49,040

uh you know to have had and so

436

00:15:53,189 --> 00:15:51,440

go ahead where was kevin dave

437

00:15:55,269 --> 00:15:53,199

where's kevin dave where was gary verys

438

00:15:57,509 --> 00:15:55,279

where was where was his name

439

00:15:59,670 --> 00:15:57,519

where was alex dietrich like right

440

00:16:01,990 --> 00:15:59,680

where's ryan graves where are the actual

441

00:16:03,189 --> 00:16:02,000

witnesses yeah shouldn't they be before

442

00:16:05,430 --> 00:16:03,199

congress yeah

443

00:16:07,110 --> 00:16:05,440

that that's why my disappointment was

444

00:16:09,670 --> 00:16:07,120

there i mean you know i mean i've been

445

00:16:12,069 --> 00:16:09,680

waiting a long time to hear something of

446

00:16:14,870 --> 00:16:12,079

50 years right from when we had the last

447

00:16:17,749 --> 00:16:14,880

one right that my expectations were that

448

00:16:18,710 --> 00:16:17,759

it was not that significant i would be i

449

00:16:20,550 --> 00:16:18,720

i'm sure that there was going to be

450

00:16:22,870 --> 00:16:20,560

problems but i thought a little bit more

451

00:16:24,629 --> 00:16:22,880

would have been helpful and i just it

452

00:16:27,030 --> 00:16:24,639

didn't happen you know

453

00:16:28,310 --> 00:16:27,040

so anyway that that was why but yeah

454

00:16:30,150 --> 00:16:28,320

you're right there's there's silver

455

00:16:32,470 --> 00:16:30,160

linings in the fact that we're just even

456

00:16:34,949 --> 00:16:32,480

having this conversation

457

00:16:36,470 --> 00:16:34,959

you know yeah

458

00:16:38,230 --> 00:16:36,480

now towards the end of last year when

459

00:16:40,710 --> 00:16:38,240

the uh the gillibrand amendment first

460

00:16:41,509 --> 00:16:40,720

came up it had wording in there that

461

00:16:45,749 --> 00:16:41,519

would

462

00:16:47,509 --> 00:16:45,759

private scientific organizations but

463

00:16:51,350 --> 00:16:47,519

that didn't really make it through to

464

00:16:53,350 --> 00:16:51,360

the ndaa 2022 do you think that there's

465

00:16:55,430 --> 00:16:53,360

over classification or over secrecy

466

00:16:57,350 --> 00:16:55,440

that's stopping the scientific community

467

00:16:59,670 --> 00:16:57,360

from being able to work with the

468

00:17:02,069 --> 00:16:59,680

information and data

469

00:17:03,990 --> 00:17:02,079

uh yes i mean

470

00:17:05,750 --> 00:17:04,000

to be honest with you you heard very

471

00:17:09,510 --> 00:17:05,760

loud and clear about the fact that it's

472

00:17:10,549 --> 00:17:09,520

sources uh tactics and and and you know

473

00:17:14,549 --> 00:17:10,559

the type of

474

00:17:16,829 --> 00:17:14,559

they're using so they don't want to let

475

00:17:18,789 --> 00:17:16,839

on necessarily and share that type of

476
00:17:20,230 --> 00:17:18,799
information but let me put it through

477
00:17:22,549 --> 00:17:20,240
this way

478
00:17:25,350 --> 00:17:22,559
you don't have to have that you can you

479
00:17:27,750 --> 00:17:25,360
can get rid of the edit videos you can

480
00:17:29,510 --> 00:17:27,760
edit this or that and you can still pass

481
00:17:31,350 --> 00:17:29,520
those out to the scientific community

482
00:17:33,190 --> 00:17:31,360
and have it do it like we they did well

483
00:17:36,470 --> 00:17:33,200
like we did with the nimitz you know we

484
00:17:39,270 --> 00:17:36,480
put a 277 page paper together on that

485
00:17:41,029 --> 00:17:39,280
study you know knuth was a part of that

486
00:17:41,990 --> 00:17:41,039
and and robert powell and a whole bunch

487
00:17:44,390 --> 00:17:42,000
of others

488
00:17:46,150 --> 00:17:44,400

and it was actually taken up to the hill

489

00:17:48,950 --> 00:17:46,160

you know we got word that it was passed

490

00:17:50,710 --> 00:17:48,960

up so you can include you know the the

491

00:17:52,470 --> 00:17:50,720

people if you're just willing to like

492

00:17:55,029 --> 00:17:52,480

edit the video take out maybe some of

493

00:17:58,070 --> 00:17:55,039

the sensitive information and have

494

00:18:01,669 --> 00:17:58,080

them or scientists analyze that right

495

00:18:03,029 --> 00:18:01,679

and come up with a legitimate report so

496

00:18:04,470 --> 00:18:03,039

i hope that they can do that and they

497

00:18:06,390 --> 00:18:04,480

can come to grips with that at some

498

00:18:08,870 --> 00:18:06,400

point i mean i think it comes down to

499

00:18:11,029 --> 00:18:08,880

intent as well and how much they want us

500

00:18:13,430 --> 00:18:11,039

to know at any given time how much it

501
00:18:15,590 --> 00:18:13,440
because it can't just all be about

502
00:18:17,430 --> 00:18:15,600
things that are intelligence risks or

503
00:18:19,750 --> 00:18:17,440
they put us at risk with other nations i

504
00:18:21,990 --> 00:18:19,760
mean it seems just just looking at the

505
00:18:23,909 --> 00:18:22,000
draconian history of the way they've

506
00:18:25,750 --> 00:18:23,919
treated the public the scientists

507
00:18:27,110 --> 00:18:25,760
everybody involved in researching this

508
00:18:29,270 --> 00:18:27,120
over the last

509
00:18:31,190 --> 00:18:29,280
70 plus years i mean it's always been

510
00:18:33,750 --> 00:18:31,200
here's a little tidbit to snack on and

511
00:18:35,190 --> 00:18:33,760
then they rip everything away so

512
00:18:37,430 --> 00:18:35,200
it seems like yeah things are different

513
00:18:39,270 --> 00:18:37,440

things are better things are changing

514

00:18:42,390 --> 00:18:39,280

but i don't think you're just gonna get

515

00:18:44,470 --> 00:18:42,400

rid of that long history of of

516

00:18:45,830 --> 00:18:44,480

just leaking out what little bits they

517

00:18:46,789 --> 00:18:45,840

want to i think that's always going to

518

00:18:48,470 --> 00:18:46,799

be there

519

00:18:50,710 --> 00:18:48,480

i will point out that you know i am a

520

00:18:52,870 --> 00:18:50,720

defense contractor i'm contracted to

521

00:18:53,669 --> 00:18:52,880

work with army material command and you

522

00:18:55,110 --> 00:18:53,679

know

523

00:18:56,390 --> 00:18:55,120

the other thing that i'll bring up is

524

00:18:58,310 --> 00:18:56,400

the fact that there's a there's a

525

00:19:01,029 --> 00:18:58,320

tremendous industry out there that they

526

00:19:03,270 --> 00:19:01,039

can also rely on they have their own we

527

00:19:05,909 --> 00:19:03,280

have our own military labs with

528

00:19:07,430 --> 00:19:05,919

scientists and everything else so i mean

529

00:19:09,350 --> 00:19:07,440

you know to be fair

530

00:19:11,350 --> 00:19:09,360

they don't necessarily have to come out

531

00:19:14,070 --> 00:19:11,360

to the general public

532

00:19:16,789 --> 00:19:14,080

uh they've got a tremendous military you

533

00:19:18,630 --> 00:19:16,799

know uh group of scientists and people

534

00:19:21,990 --> 00:19:18,640

like that that they can go within the

535

00:19:23,750 --> 00:19:22,000

organization that do have you know

536

00:19:25,350 --> 00:19:23,760

you know that can seek classified yeah

537

00:19:26,950 --> 00:19:25,360

that's kind of anti-science though

538

00:19:28,630 --> 00:19:26,960

because it's it's about doing the

539

00:19:30,230 --> 00:19:28,640

research and then publishing getting it

540

00:19:31,909 --> 00:19:30,240

out there having other people look at

541

00:19:33,909 --> 00:19:31,919

your data looking at your results and

542

00:19:36,470 --> 00:19:33,919

then trying to repeat it get the same

543

00:19:38,070 --> 00:19:36,480

thing so yeah i mean i understand the

544

00:19:40,230 --> 00:19:38,080

reasons behind it when you interject

545

00:19:42,549 --> 00:19:40,240

intelligence that innately means only

546

00:19:44,789 --> 00:19:42,559

some things can be known but

547

00:19:45,750 --> 00:19:44,799

i don't know it's it flies in the face

548

00:19:47,510 --> 00:19:45,760

of science they have their own

549

00:19:49,190 --> 00:19:47,520

scientists but the scientific community

550

00:19:51,110 --> 00:19:49,200

as a whole is being left out of the

551
00:19:53,909 --> 00:19:51,120
conversation

552
00:19:56,070 --> 00:19:53,919
you're absolutely right i think it's uh

553
00:19:57,590 --> 00:19:56,080
and that's what creates this like

554
00:20:00,470 --> 00:19:57,600
huge chasm

555
00:20:02,390 --> 00:20:00,480
between the two worlds if you would the

556
00:20:04,470 --> 00:20:02,400
n class and that and so if they are

557
00:20:05,750 --> 00:20:04,480
going to try and balance transparency

558
00:20:07,590 --> 00:20:05,760
they they say that they're going to try

559
00:20:10,950 --> 00:20:07,600
to do transparency

560
00:20:13,029 --> 00:20:10,960
a suggestion would be to also allow the

561
00:20:15,270 --> 00:20:13,039
other people the scientists out there to

562
00:20:17,190 --> 00:20:15,280
be able to do something with it and

563
00:20:18,870 --> 00:20:17,200

actually be able to publish it and you

564

00:20:20,470 --> 00:20:18,880

know let's look at the phenomena it's

565

00:20:22,630 --> 00:20:20,480

it's out there right yeah i want to

566

00:20:24,149 --> 00:20:22,640

bring up something that that relevant

567

00:20:26,230 --> 00:20:24,159

here that kevin would say if he were

568

00:20:28,950 --> 00:20:26,240

here which is this is the issue here is

569

00:20:30,870 --> 00:20:28,960

the is the is that there's the tautology

570

00:20:32,230 --> 00:20:30,880

that it can't be broken because of all

571

00:20:34,390 --> 00:20:32,240

this classified data that's the

572

00:20:36,710 --> 00:20:34,400

tautology of scientists are not allowed

573

00:20:38,549 --> 00:20:36,720

to look at ufos why not because there

574

00:20:39,590 --> 00:20:38,559

are no published papers why are there no

575

00:20:41,270 --> 00:20:39,600

published papers because you're not

576

00:20:43,190 --> 00:20:41,280

allowed to look at it it's not so it's

577

00:20:45,909 --> 00:20:43,200

circular we're never going to break out

578

00:20:48,630 --> 00:20:45,919

of that circle until you have some brave

579

00:20:50,470 --> 00:20:48,640

journals and editors that do allow

580

00:20:52,470 --> 00:20:50,480

rigorous work but how's that even going

581

00:20:54,789 --> 00:20:52,480

to start if the juiciest data is still

582

00:20:57,590 --> 00:20:54,799

classified right and we just get the the

583

00:20:58,950 --> 00:20:57,600

lowest quality stuff i i so that's why i

584

00:21:01,110 --> 00:20:58,960

think you know citizen science is going

585

00:21:02,470 --> 00:21:01,120

to be the way to push this is is to use

586

00:21:04,230 --> 00:21:02,480

modern technology

587

00:21:06,630 --> 00:21:04,240

use use the fact that cameras have

588

00:21:09,270 --> 00:21:06,640

gotten so good right the camera in my

589

00:21:11,830 --> 00:21:09,280

pocket right now and my iphone 13 is

590

00:21:14,310 --> 00:21:11,840

like better than you know by orders of

591

00:21:16,549 --> 00:21:14,320

magnitude what existed in like the 1960s

592

00:21:18,310 --> 00:21:16,559

like with the space program so i think

593

00:21:20,950 --> 00:21:18,320

what we need to push citizen science

594

00:21:22,950 --> 00:21:20,960

forward to get data so good that it's

595

00:21:24,390 --> 00:21:22,960

the same quality the government has

596

00:21:26,470 --> 00:21:24,400

because you know civilian sector will be

597

00:21:28,630 --> 00:21:26,480

behind technologically depending you

598

00:21:31,510 --> 00:21:28,640

know on on the type of technology by 20

599

00:21:34,310 --> 00:21:31,520

30 years but that means we are right now

600

00:21:36,789 --> 00:21:34,320

with our our our cameras and our tech

601
00:21:38,789 --> 00:21:36,799
that we have access to as non-government

602
00:21:40,549 --> 00:21:38,799
people is just as good as what they had

603
00:21:41,909 --> 00:21:40,559
decades ago roughly very roughly

604
00:21:43,350 --> 00:21:41,919
speaking

605
00:21:45,190 --> 00:21:43,360
do you think that would force the hand

606
00:21:46,549 --> 00:21:45,200
of the government to say we don't want

607
00:21:47,990 --> 00:21:46,559
to be left behind

608
00:21:49,990 --> 00:21:48,000
oh yes absolutely i think that's the

609
00:21:52,149 --> 00:21:50,000
only way to do it is to come out and

610
00:21:55,029 --> 00:21:52,159
that was our also part of our mission on

611
00:21:56,789 --> 00:21:55,039
uapx is to try to collect eventually

612
00:21:58,070 --> 00:21:56,799
they i'm not saying we have a smoking

613
00:22:00,310 --> 00:21:58,080

gun yet or anything but we're getting

614

00:22:02,149 --> 00:22:00,320

there but to get data that's so good

615

00:22:04,230 --> 00:22:02,159

that the government's like well crap now

616

00:22:06,630 --> 00:22:04,240

they've got equal or better you know

617

00:22:09,510 --> 00:22:06,640

data than we have and so now there's no

618

00:22:10,710 --> 00:22:09,520

longer any point to classifying um a lot

619

00:22:12,710 --> 00:22:10,720

of it

620

00:22:13,669 --> 00:22:12,720

you're spot on yeah that's that's right

621

00:22:15,669 --> 00:22:13,679

i mean

622

00:22:18,390 --> 00:22:15,679

with the with the equipment you all had

623

00:22:19,590 --> 00:22:18,400

and the the advance of technology and

624

00:22:21,430 --> 00:22:19,600

tools that we could get and the

625

00:22:24,230 --> 00:22:21,440

affordability of it

626

00:22:25,990 --> 00:22:24,240

it now lends itself to being able to

627

00:22:27,350 --> 00:22:26,000

have those types of things out there

628

00:22:28,470 --> 00:22:27,360

where you will just collect it on our

629

00:22:30,630 --> 00:22:28,480

own you know

630

00:22:32,549 --> 00:22:30,640

um and you know and we'll do our own

631

00:22:34,390 --> 00:22:32,559

analysis and and i think that that's

632

00:22:35,669 --> 00:22:34,400

very doable

633

00:22:37,110 --> 00:22:35,679

exactly yeah

634

00:22:39,110 --> 00:22:37,120

now matthew you obviously featured

635

00:22:41,029 --> 00:22:39,120

recently in the documentary of tear in

636

00:22:43,270 --> 00:22:41,039

the sky but i think for a lot of people

637

00:22:45,350 --> 00:22:43,280

in the ufo community as researchers they

638

00:22:46,230 --> 00:22:45,360

are really looking forward to the data

639

00:22:51,990 --> 00:22:46,240

and

640

00:22:53,270 --> 00:22:52,000

presented at the uh the se conference um

641

00:22:54,789 --> 00:22:53,280

that's correct soon is there anything

642

00:22:57,270 --> 00:22:54,799

you can tell us about the process and

643

00:22:59,430 --> 00:22:57,280

how it's been going relating to that

644

00:23:01,990 --> 00:22:59,440

that area of the investigation

645

00:23:03,029 --> 00:23:02,000

yes absolutely so thank you we for our

646

00:23:04,630 --> 00:23:03,039

most

647

00:23:06,230 --> 00:23:04,640

interesting potentially interesting

648

00:23:07,110 --> 00:23:06,240

events we talked to

649

00:23:09,270 --> 00:23:07,120

um

650

00:23:12,310 --> 00:23:09,280

camera experts already atmospheric

651

00:23:15,430 --> 00:23:12,320

science experts to look for

652

00:23:18,230 --> 00:23:15,440

and rule in or rule out any mundane or

653

00:23:20,070 --> 00:23:18,240

prosaic explanations basically make mick

654

00:23:22,950 --> 00:23:20,080

west redundant people like him just do

655

00:23:24,950 --> 00:23:22,960

the self skepticism ourselves and and so

656

00:23:27,830 --> 00:23:24,960

that if something really is weird it

657

00:23:30,789 --> 00:23:27,840

really is weird because we double check

658

00:23:32,950 --> 00:23:30,799

triple check and try to be our own worst

659

00:23:34,950 --> 00:23:32,960

critics unfortunately there's always

660

00:23:36,870 --> 00:23:34,960

some some some bias if it's just

661

00:23:39,750 --> 00:23:36,880

internal and that's why as we said

662

00:23:41,269 --> 00:23:39,760

already we we are going to seek

663

00:23:43,350 --> 00:23:41,279

open-minded

664

00:23:46,789 --> 00:23:43,360

journals and editors because science is

665

00:23:48,630 --> 00:23:46,799

not complete without external unbiased

666

00:23:50,470 --> 00:23:48,640

peer review because we could triple

667

00:23:52,310 --> 00:23:50,480

quadruple check everything but there's

668

00:23:55,110 --> 00:23:52,320

still be things that we haven't thought

669

00:23:56,789 --> 00:23:55,120

of yet that does show something we

670

00:23:58,950 --> 00:23:56,799

caught that we thought was anomalous

671

00:24:01,430 --> 00:23:58,960

interesting really does have a prozac

672

00:24:03,990 --> 00:24:01,440

explanation so we've already if you've

673

00:24:05,990 --> 00:24:04,000

watched the youtube roundtable um on

674

00:24:08,070 --> 00:24:06,000

jeremy mcgowan's channel after the movie

675

00:24:09,510 --> 00:24:08,080

you'll see we've already knocked out a

676
00:24:11,909 --> 00:24:09,520
couple things that are in the movie

677
00:24:13,590 --> 00:24:11,919
we're like ah well that turns out to

678
00:24:15,669 --> 00:24:13,600
have a boring explanation that wasn't

679
00:24:18,630 --> 00:24:15,679
weird and so we're trying to knock

680
00:24:20,870 --> 00:24:18,640
things out like that to really whittle

681
00:24:22,310 --> 00:24:20,880
it down to what

682
00:24:25,669 --> 00:24:22,320
was truly

683
00:24:27,909 --> 00:24:25,679
anomalous and doesn't allow for an easy

684
00:24:30,149 --> 00:24:27,919
simple explanation so really i'm i'm

685
00:24:31,269 --> 00:24:30,159
hoping that gives you a glimpse into our

686
00:24:33,110 --> 00:24:31,279
process

687
00:24:34,149 --> 00:24:33,120
yeah absolutely i'm really looking

688
00:24:35,430 --> 00:24:34,159

forward to

689

00:24:37,350 --> 00:24:35,440

to seeing that what comes with the

690

00:24:38,870 --> 00:24:37,360

conference um so let's discuss the

691

00:24:40,549 --> 00:24:38,880

conference rich can you give us kind of

692

00:24:43,029 --> 00:24:40,559

the because i know that is is it in

693

00:24:46,310 --> 00:24:43,039

collaboration with the aiaa

694

00:24:47,669 --> 00:24:46,320

um or ryan graves is well well ryan is

695

00:24:50,310 --> 00:24:47,679

of course is with him and we have a

696

00:24:53,669 --> 00:24:50,320

number of scu people uh even kevin uh

697

00:24:55,350 --> 00:24:53,679

kevin is a part of i believe that that

698

00:24:57,990 --> 00:24:55,360

community of interest i mean he

699

00:25:01,190 --> 00:24:58,000

presented uh but ryan is and then we

700

00:25:03,669 --> 00:25:01,200

also have uh peter reali as on i believe

701
00:25:06,549 --> 00:25:03,679
working with them as well so we are

702
00:25:09,269 --> 00:25:06,559
connected with them uh we're not

703
00:25:12,230 --> 00:25:09,279
partnered with them

704
00:25:13,669 --> 00:25:12,240
we are just members of of of that

705
00:25:15,269 --> 00:25:13,679
community of interest that he's going to

706
00:25:17,110 --> 00:25:15,279
be responsible for

707
00:25:19,430 --> 00:25:17,120
uh i hope i'm looking forward to being

708
00:25:21,830 --> 00:25:19,440
able to have the conversation with ryan

709
00:25:23,269 --> 00:25:21,840
and uh you know at the conference to see

710
00:25:24,950 --> 00:25:23,279
if there's anything that we can do to

711
00:25:27,750 --> 00:25:24,960
help more i guess or something of that

712
00:25:29,990 --> 00:25:27,760
nature uh but anyway uh yeah the

713
00:25:31,669 --> 00:25:30,000

conference is coming up uh in a little

714

00:25:33,830 --> 00:25:31,679

bit less than two weeks in fact it was

715

00:25:34,870 --> 00:25:33,840

yesterday we were two weeks out from

716

00:25:38,070 --> 00:25:34,880

having it

717

00:25:40,149 --> 00:25:38,080

um and it's i'm very excited about it i

718

00:25:41,990 --> 00:25:40,159

i know that you know uh michael

719

00:25:43,669 --> 00:25:42,000

presented a

720

00:25:46,149 --> 00:25:43,679

presented last year we had a virtual

721

00:25:48,630 --> 00:25:46,159

conference uh and they did a fabulous

722

00:25:50,230 --> 00:25:48,640

job it was an excellent conference uh

723

00:25:51,830 --> 00:25:50,240

this year i'm taking on a bigger

724

00:25:53,510 --> 00:25:51,840

challenge

725

00:25:55,669 --> 00:25:53,520

the first year we did it was in person

726

00:25:57,190 --> 00:25:55,679

the second time we did it was like all

727

00:25:59,510 --> 00:25:57,200

you know because of cobit we were all

728

00:26:01,590 --> 00:25:59,520

virtual and now it's a hybrid so i'm

729

00:26:04,630 --> 00:26:01,600

going to be balancing between hybrid

730

00:26:06,470 --> 00:26:04,640

world you know and and virtual world and

731

00:26:08,870 --> 00:26:06,480

so i continue to make it more

732

00:26:10,390 --> 00:26:08,880

challenging to myself i must be uh crazy

733

00:26:13,510 --> 00:26:10,400

but anyway

734

00:26:15,430 --> 00:26:13,520

the one last year was great i thought it

735

00:26:17,269 --> 00:26:15,440

went off without a hitch so

736

00:26:18,149 --> 00:26:17,279

you've got the digital side unlock at

737

00:26:19,909 --> 00:26:18,159

least

738

00:26:21,830 --> 00:26:19,919

yeah i think that you know we're using

739

00:26:23,510 --> 00:26:21,840

the same tool michael so i think it's

740

00:26:24,390 --> 00:26:23,520

gonna be you know again it's like you

741

00:26:26,149 --> 00:26:24,400

know

742

00:26:27,830 --> 00:26:26,159

everybody loved that so the virtual

743

00:26:29,590 --> 00:26:27,840

world it's not just you know just

744

00:26:31,269 --> 00:26:29,600

watching a zoom conference or something

745

00:26:32,630 --> 00:26:31,279

like that it's got a lot more to it you

746

00:26:37,430 --> 00:26:32,640

know

747

00:26:40,070 --> 00:26:37,440

got i actually i only have three seats

748

00:26:42,310 --> 00:26:40,080

left because i'm so you know i've got

749

00:26:44,070 --> 00:26:42,320

i'm excited we have a limited capacity

750

00:26:46,789 --> 00:26:44,080

in the place i've worked out some

751
00:26:48,549 --> 00:26:46,799
incredibly fabulous meals for it uh you

752
00:26:50,230 --> 00:26:48,559
know and suddenly we're getting a lot of

753
00:26:51,750 --> 00:26:50,240
interest from

754
00:26:53,750 --> 00:26:51,760
different media types that also want to

755
00:26:56,149 --> 00:26:53,760
come in and so i've got a little

756
00:26:59,110 --> 00:26:56,159
separate room over there and another uh

757
00:27:00,950 --> 00:26:59,120
nearby uh room that we can have media

758
00:27:02,789 --> 00:27:00,960
interviews and stuff like that but

759
00:27:04,710 --> 00:27:02,799
anyway it's turning out to be great i'm

760
00:27:08,070 --> 00:27:04,720
i'm excited that the the number of the

761
00:27:10,310 --> 00:27:08,080
people we have uh are fabulous i mean

762
00:27:13,190 --> 00:27:10,320
matt uh matt's gonna be in you know dr

763
00:27:15,029 --> 00:27:13,200

knuth we got alexander wendt we have uh

764

00:27:17,269 --> 00:27:15,039

uh we have john alexander that's gonna

765

00:27:19,190 --> 00:27:17,279

be presenting we have a whole host of

766

00:27:21,110 --> 00:27:19,200

people we're gonna be discussing about

767

00:27:22,789 --> 00:27:21,120

the national security implications and

768

00:27:23,590 --> 00:27:22,799

working with science and how do you do

769

00:27:25,110 --> 00:27:23,600

that

770

00:27:27,269 --> 00:27:25,120

uh we're going to be talking about the

771

00:27:29,350 --> 00:27:27,279

su projects that we've got going on

772

00:27:30,870 --> 00:27:29,360

which include a nuke study that we're

773

00:27:33,350 --> 00:27:30,880

going to be talking about

774

00:27:34,549 --> 00:27:33,360

uh yeah and so there's there's a lot of

775

00:27:37,190 --> 00:27:34,559

good stuff that's going to be there we

776

00:27:39,110 --> 00:27:37,200

got three panels and anyway it's it's a

777

00:27:40,470 --> 00:27:39,120

great thing you all if you can join

778

00:27:41,990 --> 00:27:40,480

virtually because i'm going to be

779

00:27:44,230 --> 00:27:42,000

probably just about shutting off the

780

00:27:47,110 --> 00:27:44,240

in-person ticket but it's virtual as

781

00:27:49,430 --> 00:27:47,120

well so uh join in and you can find us

782

00:27:50,870 --> 00:27:49,440

at explorescu.org

783

00:27:52,310 --> 00:27:50,880

and there's a link there that will take

784

00:27:54,230 --> 00:27:52,320

you over to it

785

00:27:56,789 --> 00:27:54,240

thank you fantastic i know thank you i

786

00:27:57,750 --> 00:27:56,799

think it's a very exciting time and but

787

00:27:59,750 --> 00:27:57,760

do you hope that there'll be

788

00:28:02,310 --> 00:27:59,760

conversations had at the conference that

789

00:28:04,950 --> 00:28:02,320

afterwards will lead to new directions

790

00:28:07,190 --> 00:28:04,960

for collaborations and projects and

791

00:28:09,269 --> 00:28:07,200

things like that so it's not just uh

792

00:28:10,710 --> 00:28:09,279

people speaking there is there is stuff

793

00:28:12,389 --> 00:28:10,720

happening as well yeah

794

00:28:14,549 --> 00:28:12,399

there's i mean i've already got like a

795

00:28:16,870 --> 00:28:14,559

number of topics to work with matt on

796

00:28:18,630 --> 00:28:16,880

about it you know we're talking about a

797

00:28:20,470 --> 00:28:18,640

whole host of things you know we we need

798

00:28:21,110 --> 00:28:20,480

to compare notes because actually you

799

00:28:23,830 --> 00:28:21,120

know

800

00:28:25,830 --> 00:28:23,840

we're partnered with uapx and of course

801
00:28:28,149 --> 00:28:25,840
matthew is a part of both organizations

802
00:28:30,630 --> 00:28:28,159
uh but i mean ultimately to see how we

803
00:28:32,310 --> 00:28:30,640
can help with that data that they have

804
00:28:34,470 --> 00:28:32,320
if there's a way for us to help out

805
00:28:36,549 --> 00:28:34,480
we're even on the help out on the peer

806
00:28:38,149 --> 00:28:36,559
review type of aspects there's a whole

807
00:28:39,590 --> 00:28:38,159
host of ways we can do that and so we're

808
00:28:41,909 --> 00:28:39,600
gonna have a conversation at the

809
00:28:43,830 --> 00:28:41,919
conference about that

810
00:28:45,909 --> 00:28:43,840
uh yeah it's gonna be great because yeah

811
00:28:47,990 --> 00:28:45,919
we're we're so as richard said where

812
00:28:49,669 --> 00:28:48,000
uapx is liaising

813
00:28:52,710 --> 00:28:49,679

liaisoning i know the proper way to make

814

00:28:55,750 --> 00:28:52,720

that verb with scu because we have so

815

00:28:58,389 --> 00:28:55,760

much data and such a vast amount of data

816

00:29:00,149 --> 00:28:58,399

we all the uh ambiguities or anomalies

817

00:29:01,909 --> 00:29:00,159

you talk about was from like less than

818

00:29:04,950 --> 00:29:01,919

one percent of the data we have hundreds

819

00:29:07,830 --> 00:29:04,960

of hours especially a flare of infrared

820

00:29:10,310 --> 00:29:07,840

imagery and we need people to go go

821

00:29:12,710 --> 00:29:10,320

through that and so scu is going to help

822

00:29:14,950 --> 00:29:12,720

us classify things you know that's a

823

00:29:16,870 --> 00:29:14,960

bird that's an airplane and and help

824

00:29:18,549 --> 00:29:16,880

narrow down to like oh they're this this

825

00:29:20,950 --> 00:29:18,559

object is not an airplane it doesn't

826

00:29:24,070 --> 00:29:20,960

match you know okay so this we really

827

00:29:25,510 --> 00:29:24,080

look forward to to working with um a uap

828

00:29:27,909 --> 00:29:25,520

x really looks forward looking working

829

00:29:29,830 --> 00:29:27,919

with scu to get through this giant

830

00:29:31,990 --> 00:29:29,840

amount of data we have from just our one

831

00:29:33,909 --> 00:29:32,000

week-long expedition

832

00:29:36,310 --> 00:29:33,919

excellent yeah that's fantastic i think

833

00:29:37,669 --> 00:29:36,320

it's it was really great when i think

834

00:29:39,269 --> 00:29:37,679

you know towards the end of last year

835

00:29:41,269 --> 00:29:39,279

people were really focusing on on the

836

00:29:43,269 --> 00:29:41,279

scientific organizations to really come

837

00:29:45,029 --> 00:29:43,279

through and it seems that it's happening

838

00:29:47,190 --> 00:29:45,039

you know big time at the moment with

839

00:29:49,750 --> 00:29:47,200

with yourself rich in the scu and and

840

00:29:51,269 --> 00:29:49,760

uapx and also the galileo project do

841

00:29:53,029 --> 00:29:51,279

either of your groups

842

00:29:55,990 --> 00:29:53,039

speak or collaborate in any way with

843

00:29:59,029 --> 00:29:56,000

with avi loeb and his team

844

00:30:00,710 --> 00:29:59,039

uh we we i'll speak from the seo side we

845

00:30:03,350 --> 00:30:00,720

do have people that are attending the

846

00:30:05,190 --> 00:30:03,360

meetings uh we also you know like i

847

00:30:07,830 --> 00:30:05,200

think robert powell or some others or

848

00:30:09,909 --> 00:30:07,840

possibly uh they're listed as being

849

00:30:12,149 --> 00:30:09,919

affiliates or there's research

850

00:30:14,389 --> 00:30:12,159

affiliates or some sort of like ta way

851

00:30:16,070 --> 00:30:14,399

of doing that but but we are uh we are

852

00:30:18,310 --> 00:30:16,080

attending meetings and trying to provide

853

00:30:20,710 --> 00:30:18,320

input where where it's you know accepted

854

00:30:22,710 --> 00:30:20,720

and stuff like that uh they they seem to

855

00:30:24,630 --> 00:30:22,720

be wanting to though pretty much stay

856

00:30:26,389 --> 00:30:24,640

within their own community in the

857

00:30:28,870 --> 00:30:26,399

context of

858

00:30:31,190 --> 00:30:28,880

uh you know truly wanting

859

00:30:33,190 --> 00:30:31,200

scientists uh that are out there that

860

00:30:35,110 --> 00:30:33,200

avi maybe knows or something like that

861

00:30:37,350 --> 00:30:35,120

that he's and he's trying to stay away

862

00:30:38,870 --> 00:30:37,360

from also the the maybe any anybody

863

00:30:41,590 --> 00:30:38,880

that's connected with ufos believe it or

864

00:30:43,750 --> 00:30:41,600

not uh but it's pretty much you know

865

00:30:46,149 --> 00:30:43,760

trying to be uh as objective and

866

00:30:47,909 --> 00:30:46,159

scientific as he possibly can

867

00:30:49,430 --> 00:30:47,919

and i understand that you know i mean he

868

00:30:51,029 --> 00:30:49,440

doesn't want to bring in you know the

869

00:30:53,110 --> 00:30:51,039

woo-woo groups or anything of that

870

00:30:54,389 --> 00:30:53,120

nature which might want to be able to be

871

00:30:56,230 --> 00:30:54,399

in that but

872

00:30:58,549 --> 00:30:56,240

anyway it's it's a good relationship and

873

00:30:59,990 --> 00:30:58,559

we are trying to help out

874

00:31:01,350 --> 00:31:00,000

that's great to hear

875

00:31:03,350 --> 00:31:01,360

um i'm not sure what's happening with

876

00:31:04,950 --> 00:31:03,360

michael uh mike if you can hear us it

877

00:31:06,230 --> 00:31:04,960

might be easy just to leave and jump

878

00:31:08,470 --> 00:31:06,240

back in again

879

00:31:10,789 --> 00:31:08,480

um so matthew what about yourselves and

880

00:31:13,440 --> 00:31:10,799

you apx are you uh having conversations

881

00:31:14,710 --> 00:31:13,450

or any work with with professor loeb

882

00:31:15,909 --> 00:31:14,720

[Music]

883

00:31:17,430 --> 00:31:15,919

um

884

00:31:19,350 --> 00:31:17,440

well it's a bit difficult like rich said

885

00:31:21,669 --> 00:31:19,360

they really want to forge

886

00:31:24,870 --> 00:31:21,679

avi really wants to forge his own path

887

00:31:26,470 --> 00:31:24,880

um so we we take we we want to we have a

888

00:31:29,110 --> 00:31:26,480

different approach though on new apx as

889

00:31:31,590 --> 00:31:29,120

we just said liaisoning scu um the

890

00:31:33,350 --> 00:31:31,600

philosophy on that that i've told rich

891

00:31:36,070 --> 00:31:33,360

in the past my own personal philosophy

892

00:31:37,669 --> 00:31:36,080

is we have way too many groups um

893

00:31:40,149 --> 00:31:37,679

there's like an alphabet soup of

894

00:31:43,430 --> 00:31:40,159

acronyms right we've got like gp and

895

00:31:47,509 --> 00:31:43,440

uapx and scu and kufos and mufon and

896

00:31:49,110 --> 00:31:47,519

skyhub and tg2p and all this i i i

897

00:31:51,990 --> 00:31:49,120

envision that i hope someday we can

898

00:31:54,710 --> 00:31:52,000

consolidate to a much smaller number of

899

00:31:57,590 --> 00:31:54,720

groups and pool our resources pool our

900

00:31:58,389 --> 00:31:57,600

resources together because i think that

901
00:32:00,310 --> 00:31:58,399
um

902
00:32:02,710 --> 00:32:00,320
it it that that's the best way to make

903
00:32:04,470 --> 00:32:02,720
progress because i worry that sometimes

904
00:32:06,630 --> 00:32:04,480
we all have different pieces of the

905
00:32:09,110 --> 00:32:06,640
puzzle but if we don't play with the

906
00:32:11,110 --> 00:32:09,120
other people and bring our puzzle pieces

907
00:32:14,230 --> 00:32:11,120
and put them on the table then we're

908
00:32:16,149 --> 00:32:14,240
really going to have a tough time

909
00:32:18,789 --> 00:32:16,159
making progress i think it's extremely

910
00:32:20,950 --> 00:32:18,799
important um to collaborate and and work

911
00:32:22,710 --> 00:32:20,960
together i'd like to make a point on

912
00:32:25,669 --> 00:32:22,720
that because i think that when we

913
00:32:26,950 --> 00:32:25,679

initially formed uh scu we saw this as a

914

00:32:32,950 --> 00:32:26,960

coalition

915

00:32:34,389 --> 00:32:32,960

matter whether you're a part of any

916

00:32:35,669 --> 00:32:34,399

other group

917

00:32:37,430 --> 00:32:35,679

it it's about the fact that we're

918

00:32:38,549 --> 00:32:37,440

getting together and having a discussion

919

00:32:41,590 --> 00:32:38,559

together

920

00:32:43,669 --> 00:32:41,600

and that's new that's where and it's all

921

00:32:46,710 --> 00:32:43,679

disciplines and all views should be

922

00:32:48,630 --> 00:32:46,720

brought together right so i mean uh you

923

00:32:50,789 --> 00:32:48,640

know it's not like we have any answers

924

00:32:52,630 --> 00:32:50,799

to this whether it be you know

925

00:32:54,070 --> 00:32:52,640

extraterrestrial source or whether it be

926
00:32:56,310 --> 00:32:54,080
time travel or whether it be any

927
00:32:58,070 --> 00:32:56,320
anything else which nobody knows right

928
00:33:00,230 --> 00:32:58,080
so let's all have a com you know a

929
00:33:02,950 --> 00:33:00,240
combined discussion about this and see

930
00:33:05,430 --> 00:33:02,960
if we can you know use our coalition to

931
00:33:07,029 --> 00:33:05,440
be able to help have those conversations

932
00:33:08,950 --> 00:33:07,039
communicate with each other bump into

933
00:33:10,710 --> 00:33:08,960
each other and have scientists get you

934
00:33:12,549 --> 00:33:10,720
know researchers and stuff like that

935
00:33:14,630 --> 00:33:12,559
talk about what they've done so that's

936
00:33:16,149 --> 00:33:14,640
that's where we're trying to be we're

937
00:33:18,149 --> 00:33:16,159
i i don't care whether you're a part of

938
00:33:19,590 --> 00:33:18,159

another organization

939

00:33:21,590 --> 00:33:19,600

that's if you want to do that that's

940

00:33:23,430 --> 00:33:21,600

great but

941

00:33:24,789 --> 00:33:23,440

let's

942

00:33:27,509 --> 00:33:24,799

i agree with matt i think that's

943

00:33:29,269 --> 00:33:27,519

important um do you see the seo as being

944

00:33:31,509 --> 00:33:29,279

that like the place where everyone can

945

00:33:34,149 --> 00:33:31,519

come together because i feel it's it's

946

00:33:36,789 --> 00:33:34,159

definitely already doing that uh and it

947

00:33:39,190 --> 00:33:36,799

still has room to grow

948

00:33:41,110 --> 00:33:39,200

yeah absolutely that's why um

949

00:33:43,750 --> 00:33:41,120

i'm i'm still a member scum that was

950

00:33:47,190 --> 00:33:43,760

doing uapx because they serve different

951

00:33:49,029 --> 00:33:47,200

purposes and i i do i do wish galileo

952

00:33:51,509 --> 00:33:49,039

project was at the scu conference

953

00:33:53,669 --> 00:33:51,519

because um see that the thing is we do

954

00:33:56,149 --> 00:33:53,679

need to we do need to talk to each other

955

00:33:57,029 --> 00:33:56,159

and scu really is this wonderful

956

00:34:02,950 --> 00:33:57,039

um

957

00:34:04,710 --> 00:34:02,960

individuals and groups together

958

00:34:06,389 --> 00:34:04,720

i'm thrilled the fact that we have like

959

00:34:09,190 --> 00:34:06,399

people from japan

960

00:34:11,030 --> 00:34:09,200

that are coming we have people that are

961

00:34:13,349 --> 00:34:11,040

part of

962

00:34:15,349 --> 00:34:13,359

the isa you know the european space

963

00:34:18,470 --> 00:34:15,359

agency that are coming or are going to

964

00:34:19,909 --> 00:34:18,480

be attending and so i mean again we're

965

00:34:21,750 --> 00:34:19,919

starting to see that there's a footprint

966

00:34:24,310 --> 00:34:21,760

of a whole variety of disciplines and

967

00:34:25,750 --> 00:34:24,320

organizations and people that are that

968

00:34:27,270 --> 00:34:25,760

are treating it seriously that are

969

00:34:28,389 --> 00:34:27,280

actually now wanting to come together

970

00:34:29,669 --> 00:34:28,399

and i'm going to be attending this

971

00:34:31,829 --> 00:34:29,679

meeting by the way

972

00:34:34,710 --> 00:34:31,839

i'm the attendants we're getting i think

973

00:34:36,230 --> 00:34:34,720

when you look at the actual probably

974

00:34:37,669 --> 00:34:36,240

their capabilities and the types of

975

00:34:39,270 --> 00:34:37,679

things that they bring to the table it's

976

00:34:41,589 --> 00:34:39,280

it's very exciting

977

00:34:43,270 --> 00:34:41,599

uh so it's happening

978

00:34:45,109 --> 00:34:43,280

yeah it's very refreshing to hear the

979

00:34:46,950 --> 00:34:45,119

all the collaborative efforts coming

980

00:34:49,349 --> 00:34:46,960

together and not being competitive with

981

00:34:51,270 --> 00:34:49,359

each other and then especially with

982

00:34:53,829 --> 00:34:51,280

overseas organizations as well that's

983

00:34:55,510 --> 00:34:53,839

that's absolutely fantastic now when you

984

00:34:57,349 --> 00:34:55,520

do have these conversations as

985

00:34:59,589 --> 00:34:57,359

scientists and and you're talking about

986

00:35:01,190 --> 00:34:59,599

the data that's been collected

987

00:35:03,589 --> 00:35:01,200

does it ever get to that point where the

988

00:35:05,670 --> 00:35:03,599

conversations become speculative and you

989

00:35:07,750 --> 00:35:05,680

go back over maybe what these things

990

00:35:10,470 --> 00:35:07,760

could possibly be you know does that

991

00:35:11,670 --> 00:35:10,480

conversation still happen of course

992

00:35:13,430 --> 00:35:11,680

yeah absolutely

993

00:35:15,670 --> 00:35:13,440

michael and i are always we'll go back

994

00:35:17,430 --> 00:35:15,680

and forth on because time travel is one

995

00:35:19,430 --> 00:35:17,440

of my favorite topics i'll be like wow

996

00:35:21,589 --> 00:35:19,440

you know it's almost impossible to be

997

00:35:23,270 --> 00:35:21,599

really hard so now we of course we have

998

00:35:25,270 --> 00:35:23,280

the do we these fun speculative

999

00:35:27,190 --> 00:35:25,280

conversations and that's part of what

1000

00:35:29,589 --> 00:35:27,200

makes the this conference that rich

1001
00:35:31,190 --> 00:35:29,599
always works so hard on annually uh

1002
00:35:33,589 --> 00:35:31,200
putting together with with it with the

1003
00:35:36,550 --> 00:35:33,599
board i see what was so wonderful is

1004
00:35:38,950 --> 00:35:36,560
it's a safe space where you can also

1005
00:35:41,910 --> 00:35:38,960
exchange some of the speculative ideas

1006
00:35:45,190 --> 00:35:41,920
without be without fear of being labeled

1007
00:35:46,550 --> 00:35:45,200
uh crazy so that's absolutely part of it

1008
00:35:48,550 --> 00:35:46,560
yeah i think it's also important to

1009
00:35:51,109 --> 00:35:48,560
point out though that that it's not just

1010
00:35:52,230 --> 00:35:51,119
to say what these things are who they

1011
00:35:53,589 --> 00:35:52,240
are where they're coming from when

1012
00:35:55,349 --> 00:35:53,599
they're coming from it is innately

1013
00:35:57,430 --> 00:35:55,359

speculative and we have to be careful

1014

00:35:59,190 --> 00:35:57,440

using that word because we can make

1015

00:36:00,950 --> 00:35:59,200

observations of what these things are

1016

00:36:02,710 --> 00:36:00,960

doing we can look at their flight

1017

00:36:04,710 --> 00:36:02,720

characteristics we can look at the blue

1018

00:36:06,550 --> 00:36:04,720

shift how put off talked about this a

1019

00:36:07,750 --> 00:36:06,560

lot in last year's conference where he's

1020

00:36:09,670 --> 00:36:07,760

talking about

1021

00:36:11,270 --> 00:36:09,680

how they can they can

1022

00:36:12,710 --> 00:36:11,280

blue shift light they can speed up and

1023

00:36:14,710 --> 00:36:12,720

slow down time they have these

1024

00:36:16,870 --> 00:36:14,720

characteristics that we can observe and

1025

00:36:18,230 --> 00:36:16,880

and make logical inferences about why

1026

00:36:19,829 --> 00:36:18,240

they're doing that what they're doing

1027

00:36:22,310 --> 00:36:19,839

how they're doing it and use that

1028

00:36:25,030 --> 00:36:22,320

observational data to make informed

1029

00:36:27,510 --> 00:36:25,040

guesses about other aspects of the

1030

00:36:29,030 --> 00:36:27,520

origin so so i think we we still need to

1031

00:36:31,750 --> 00:36:29,040

connect the dots especially if they are

1032

00:36:33,910 --> 00:36:31,760

from time we're not just making

1033

00:36:35,589 --> 00:36:33,920

speculative guesses about when they come

1034

00:36:36,710 --> 00:36:35,599

from or how they're traveling through

1035

00:36:38,390 --> 00:36:36,720

time but we're observing the

1036

00:36:41,109 --> 00:36:38,400

characteristics of these craft and the

1037

00:36:42,710 --> 00:36:41,119

beans and then using that to

1038

00:36:44,550 --> 00:36:42,720

what i try to use as an abductive

1039

00:36:46,230 --> 00:36:44,560

approach find logic to the best

1040

00:36:47,349 --> 00:36:46,240

inference the best on way of

1041

00:36:48,550 --> 00:36:47,359

understanding with the fewest

1042

00:36:50,870 --> 00:36:48,560

assumptions

1043

00:36:52,069 --> 00:36:50,880

um and and yeah there are ways to

1044

00:36:54,790 --> 00:36:52,079

speculate and things that are

1045

00:36:57,030 --> 00:36:54,800

speculative but i think we need to be

1046

00:36:59,109 --> 00:36:57,040

careful in saying when we start talking

1047

00:37:00,790 --> 00:36:59,119

about their origins it's not innately

1048

00:37:03,030 --> 00:37:00,800

speculative it doesn't mean we're

1049

00:37:04,870 --> 00:37:03,040

speculating we can still

1050

00:37:06,790 --> 00:37:04,880

uh garner information from what's

1051

00:37:09,109 --> 00:37:06,800

observed in an observational study

1052

00:37:10,950 --> 00:37:09,119

context it's not the same type of data

1053

00:37:13,430 --> 00:37:10,960

that we get from one observer going out

1054

00:37:15,430 --> 00:37:13,440

and seeing like sitting

1055

00:37:17,670 --> 00:37:15,440

and watching and in the house and that

1056

00:37:19,109 --> 00:37:17,680

house than that house so it's that it's

1057

00:37:21,109 --> 00:37:19,119

a different type of evidence than what

1058

00:37:23,109 --> 00:37:21,119

we're used to but it's it's still

1059

00:37:25,109 --> 00:37:23,119

eyewitness testimony and we should take

1060

00:37:26,790 --> 00:37:25,119

those seriously as well i mean it's not

1061

00:37:28,870 --> 00:37:26,800

just the cockpit videos anymore we got

1062

00:37:30,630 --> 00:37:28,880

to look at the whole phenomenon

1063

00:37:32,630 --> 00:37:30,640

i agree with michael that you know

1064

00:37:35,270 --> 00:37:32,640

speculative doesn't necessarily mean

1065

00:37:37,230 --> 00:37:35,280

untestable as a scientist i think all

1066

00:37:39,109 --> 00:37:37,240

these hypotheses are testable

1067

00:37:41,670 --> 00:37:39,119

extraterrestrial time travel doesn't

1068

00:37:45,349 --> 00:37:41,680

matter they all make predictions on the

1069

00:37:47,190 --> 00:37:45,359

properties of the objects etc and and

1070

00:37:49,349 --> 00:37:47,200

not perfectly of course this is

1071

00:37:51,349 --> 00:37:49,359

difficult because reproducibility is

1072

00:37:52,710 --> 00:37:51,359

hard right you got to be lucky right

1073

00:37:55,990 --> 00:37:52,720

this isn't something you can do in the

1074

00:37:58,630 --> 00:37:56,000

lab it's an observational a science um

1075

00:38:00,870 --> 00:37:58,640

just astronomy and cosmology where like

1076

00:38:03,270 --> 00:38:00,880

you only have one universe to study and

1077

00:38:05,430 --> 00:38:03,280

so similarly you have to get lucky but i

1078

00:38:08,390 --> 00:38:05,440

do think you can you can while being

1079

00:38:10,870 --> 00:38:08,400

speculative you can still tether your

1080

00:38:12,710 --> 00:38:10,880

speculation to particular hypotheses

1081

00:38:14,310 --> 00:38:12,720

that you can try to prove or disprove so

1082

00:38:16,069 --> 00:38:14,320

i absolutely agree with michael in fact

1083

00:38:17,910 --> 00:38:16,079

his mentioning of the blue shift that's

1084

00:38:20,069 --> 00:38:17,920

one of the reasons why we brought some

1085

00:38:22,230 --> 00:38:20,079

of the equipment we did on uapx and it

1086

00:38:24,710 --> 00:38:22,240

really helped us hit the jackpot to find

1087

00:38:26,390 --> 00:38:24,720

strange anomalies because we listened we

1088

00:38:29,030 --> 00:38:26,400

listened at the last scu conference

1089

00:38:31,510 --> 00:38:29,040

which was as rich said online fully due

1090

00:38:33,670 --> 00:38:31,520

to the pandemic but we listened to hal

1091

00:38:35,430 --> 00:38:33,680

put off eric davis we listened to

1092

00:38:37,270 --> 00:38:35,440

michael we listened to others and we got

1093

00:38:39,030 --> 00:38:37,280

ideas okay we're going to bring such and

1094

00:38:41,109 --> 00:38:39,040

such equipment we're going to do it this

1095

00:38:44,550 --> 00:38:41,119

way because this is how we can test

1096

00:38:46,150 --> 00:38:44,560

these ideas so we've already had the um

1097

00:38:49,030 --> 00:38:46,160

the discussions at the seou conferences

1098

00:38:51,510 --> 00:38:49,040

have borne incredible fruit already by

1099

00:38:53,030 --> 00:38:51,520

pointing us the direction to go and what

1100

00:38:55,190 --> 00:38:53,040

kind of data do we want to take that

1101

00:38:57,109 --> 00:38:55,200

will increase that will go beyond as

1102

00:38:59,910 --> 00:38:57,119

michael said go beyond eyewitness

1103

00:39:01,750 --> 00:38:59,920

testimony and camera images how can we

1104

00:39:03,510 --> 00:39:01,760

do even better than that

1105

00:39:04,790 --> 00:39:03,520

yeah absolutely and and you know it's

1106

00:39:06,710 --> 00:39:04,800

funny because

1107

00:39:09,510 --> 00:39:06,720

we we can't necessarily apply the same

1108

00:39:11,990 --> 00:39:09,520

standards of evidence that we've used in

1109

00:39:14,710 --> 00:39:12,000

science for for decades and there's

1110

00:39:15,750 --> 00:39:14,720

like rich was saying too uh when when we

1111

00:39:17,910 --> 00:39:15,760

come together we have these

1112

00:39:19,829 --> 00:39:17,920

conversations and then things come out

1113

00:39:22,310 --> 00:39:19,839

of that and you make networks you meet

1114

00:39:24,230 --> 00:39:22,320

people you make new collaborative

1115

00:39:26,310 --> 00:39:24,240

connections with people and

1116

00:39:28,150 --> 00:39:26,320

and it's so different from the past

1117

00:39:30,310 --> 00:39:28,160

because when people were trying to do

1118

00:39:32,069 --> 00:39:30,320

this before is the invisible college the

1119

00:39:33,510 --> 00:39:32,079

jacques vale it's jaylen heineck and

1120

00:39:35,990 --> 00:39:33,520

they had to do it behind closed doors

1121

00:39:38,710 --> 00:39:36,000

but now we can openly talk about this

1122

00:39:41,670 --> 00:39:38,720

with each other and then

1123

00:39:43,990 --> 00:39:41,680

not have to fear you know dream ridicule

1124

00:39:45,829 --> 00:39:44,000

retribution from our institutions for

1125

00:39:47,030 --> 00:39:45,839

the most part though there are there are

1126

00:39:49,829 --> 00:39:47,040

exceptions

1127

00:39:50,870 --> 00:39:49,839

um so it's it's an incredible time i

1128

00:39:52,710 --> 00:39:50,880

think where we can have these

1129

00:39:54,670 --> 00:39:52,720

conversations openly and learn from each

1130

00:39:56,550 --> 00:39:54,680

other especially coming together

1131

00:39:58,870 --> 00:39:56,560

interdisciplinary i mean i think it's

1132

00:40:00,870 --> 00:39:58,880

gonna take that we can't understand

1133

00:40:03,030 --> 00:40:00,880

a complex and mysterious phenomenon like

1134

00:40:05,030 --> 00:40:03,040

this from one scientific discipline or

1135

00:40:07,030 --> 00:40:05,040

one viewpoint it's gonna take all of us

1136

00:40:08,710 --> 00:40:07,040

just throwing everything in there like

1137

00:40:12,150 --> 00:40:08,720

matt said putting the puzzles on the

1138

00:40:13,829 --> 00:40:12,160

table and seeing what fits together

1139

00:40:17,270 --> 00:40:13,839

yeah and

1140

00:40:18,950 --> 00:40:17,280

to uh michael's point as well uh the

1141

00:40:19,910 --> 00:40:18,960

you know i mean it's not like you we all

1142

00:40:22,309 --> 00:40:19,920

have to

1143

00:40:24,150 --> 00:40:22,319

have the same opinion or even view on

1144

00:40:27,750 --> 00:40:24,160

this just the fact that we're sharing it

1145

00:40:30,230 --> 00:40:27,760

is is very important uh alexander wendt

1146

00:40:31,750 --> 00:40:30,240

is going to be doing a uh presentation

1147

00:40:33,510 --> 00:40:31,760

that would be

1148

00:40:35,349 --> 00:40:33,520

maybe many people would probably say is

1149

00:40:36,950 --> 00:40:35,359

a little bit counter to the typical

1150

00:40:39,109 --> 00:40:36,960

thinking uh he's going to be talking

1151
00:40:41,190 --> 00:40:39,119
about the fact that you know is actually

1152
00:40:43,670 --> 00:40:41,200
contact real it's almost like the michio

1153
00:40:46,309 --> 00:40:43,680
kaku perspective where it's it's like

1154
00:40:48,710 --> 00:40:46,319
you know it do we really want to let the

1155
00:40:50,710 --> 00:40:48,720
people out there know that we're here

1156
00:40:52,069 --> 00:40:50,720
do we expect them to be all friendly and

1157
00:40:54,309 --> 00:40:52,079
like e.t

1158
00:40:55,990 --> 00:40:54,319
you know do we really want that and so

1159
00:40:58,470 --> 00:40:56,000
he's going to be talking about well is

1160
00:41:01,349 --> 00:40:58,480
actually exploring ufos and and doing

1161
00:41:03,109 --> 00:41:01,359
scientific study is that really a good

1162
00:41:04,790 --> 00:41:03,119
thing for us

1163
00:41:06,870 --> 00:41:04,800

and you know i

1164

00:41:08,630 --> 00:41:06,880

so it's gonna be a different perspective

1165

00:41:10,630 --> 00:41:08,640

and we need to hear that right to

1166

00:41:12,790 --> 00:41:10,640

balance our views balance our

1167

00:41:14,550 --> 00:41:12,800

perspectives and so what we've tried to

1168

00:41:16,390 --> 00:41:14,560

do with the present the present

1169

00:41:18,870 --> 00:41:16,400

presenters we've had at conferences is

1170

00:41:20,550 --> 00:41:18,880

try to get a mix of different views and

1171

00:41:22,790 --> 00:41:20,560

have that come together so that we can

1172

00:41:24,230 --> 00:41:22,800

all have a conversation about it and you

1173

00:41:25,910 --> 00:41:24,240

know you know

1174

00:41:28,309 --> 00:41:25,920

some you know

1175

00:41:30,230 --> 00:41:28,319

matthew talked about you know dark dark

1176

00:41:32,069 --> 00:41:30,240

energy and and how that that wow that

1177

00:41:33,430 --> 00:41:32,079

just opened up doors for me in terms of

1178

00:41:34,870 --> 00:41:33,440

thinking like well that could be you

1179

00:41:36,870 --> 00:41:34,880

know potentially how that they're using

1180

00:41:39,510 --> 00:41:36,880

it right it's great let's go check into

1181

00:41:41,589 --> 00:41:39,520

that you know and and hearing about time

1182

00:41:43,750 --> 00:41:41,599

travel in the context of you know the

1183

00:41:45,910 --> 00:41:43,760

study that michael masters has done

1184

00:41:47,829 --> 00:41:45,920

in the context of just looking at while

1185

00:41:49,589 --> 00:41:47,839

the beings that are described

1186

00:41:51,829 --> 00:41:49,599

are bipedal they're they're very much

1187

00:41:53,910 --> 00:41:51,839

like us to arms to you know all this

1188

00:41:56,390 --> 00:41:53,920

other stuff wow that's an interesting

1189

00:41:58,230 --> 00:41:56,400

perspective like you know are they human

1190

00:42:00,950 --> 00:41:58,240

you know and so you start to have those

1191

00:42:02,550 --> 00:42:00,960

kind of like perspectives that that you

1192

00:42:04,710 --> 00:42:02,560

maybe you want to go off on and think

1193

00:42:05,430 --> 00:42:04,720

about yeah and a little bit differently

1194

00:42:06,790 --> 00:42:05,440

right

1195

00:42:09,750 --> 00:42:06,800

and of course we

1196

00:42:12,309 --> 00:42:09,760

so it's good i think it's important also

1197

00:42:14,390 --> 00:42:12,319

um i have to stress that and my

1198

00:42:16,550 --> 00:42:14,400

colleague kevin who just wrote

1199

00:42:18,390 --> 00:42:16,560

um a medium essay about this that's

1200

00:42:21,510 --> 00:42:18,400

getting a lot of reads is that is

1201
00:42:22,710 --> 00:42:21,520
humility is so important i think you

1202
00:42:24,390 --> 00:42:22,720
like you said rich different

1203
00:42:26,950 --> 00:42:24,400
perspectives i think we have to let the

1204
00:42:29,349 --> 00:42:26,960
truth and facts speak for themselves i

1205
00:42:31,270 --> 00:42:29,359
don't care if it's extraterrestrials i

1206
00:42:32,870 --> 00:42:31,280
don't care if michael's right and time

1207
00:42:34,390 --> 00:42:32,880
travels for the future that'd be great

1208
00:42:36,309 --> 00:42:34,400
because then that means that probably

1209
00:42:37,750 --> 00:42:36,319
means we survived you know the nuclear

1210
00:42:40,710 --> 00:42:37,760
war putin's about to start you know

1211
00:42:41,829 --> 00:42:40,720
that's good news and so like i i i as a

1212
00:42:45,030 --> 00:42:41,839
scientist

1213
00:42:47,990 --> 00:42:45,040

i want to be proven wrong with my ideas

1214

00:42:50,870 --> 00:42:48,000

because that keeps me honest and so i

1215

00:42:52,790 --> 00:42:50,880

don't care if the vast majority are

1216

00:42:54,710 --> 00:42:52,800

atmospheric phenomena and are not you

1217

00:42:56,710 --> 00:42:54,720

know intelligent crap

1218

00:42:58,950 --> 00:42:56,720

wherever the truth leads us wherever the

1219

00:43:01,430 --> 00:42:58,960

facts lead us is what's important and

1220

00:43:03,270 --> 00:43:01,440

that's why and it's totally okay for

1221

00:43:05,349 --> 00:43:03,280

everyone to have their favorite pet

1222

00:43:07,190 --> 00:43:05,359

hypothesis extra dimensional

1223

00:43:10,390 --> 00:43:07,200

interdimensional extra stress that's

1224

00:43:13,510 --> 00:43:10,400

fine as long as we're not married to it

1225

00:43:15,349 --> 00:43:13,520

when the facts say otherwise that's yeah

1226

00:43:17,430 --> 00:43:15,359

and it's hard you see it in academia as

1227

00:43:19,349 --> 00:43:17,440

well i mean in paleoanthropology

1228

00:43:22,150 --> 00:43:19,359

especially there's so much

1229

00:43:24,069 --> 00:43:22,160

debate and and infighting about whether

1230

00:43:25,750 --> 00:43:24,079

this should be a new species or whether

1231

00:43:27,030 --> 00:43:25,760

it's morphologically similar enough to

1232

00:43:28,950 --> 00:43:27,040

these that we should group it in with

1233

00:43:31,589 --> 00:43:28,960

those and we've been going at it for

1234

00:43:33,750 --> 00:43:31,599

decades about these little nuances and

1235

00:43:36,069 --> 00:43:33,760

things and and you see dogma you see

1236

00:43:37,750 --> 00:43:36,079

people adhering to this ideology that

1237

00:43:40,390 --> 00:43:37,760

they embrace and they think is right no

1238

00:43:42,309 --> 00:43:40,400

matter what i mean but i think the ufo

1239

00:43:44,870 --> 00:43:42,319

community and especially in science it's

1240

00:43:46,870 --> 00:43:44,880

more ripe for that same type of thing

1241

00:43:49,270 --> 00:43:46,880

because there's so many unknowns it's

1242

00:43:51,109 --> 00:43:49,280

easy to jump on something and look for

1243

00:43:53,990 --> 00:43:51,119

you know things that back it up

1244

00:43:57,270 --> 00:43:54,000

confirmation by selection bias but i i

1245

00:44:00,069 --> 00:43:57,280

think as scientists if if we're really

1246

00:44:03,030 --> 00:44:00,079

focused on learning what this is we need

1247

00:44:04,390 --> 00:44:03,040

to recognize any of those biases and get

1248

00:44:06,309 --> 00:44:04,400

rid of those leave them at the door and

1249

00:44:08,550 --> 00:44:06,319

just open our minds to whatever this

1250

00:44:09,829 --> 00:44:08,560

might be

1251

00:44:12,069 --> 00:44:09,839

yeah absolutely

1252

00:44:13,190 --> 00:44:12,079

the technology advances that we're going

1253

00:44:14,790 --> 00:44:13,200

through our guy i think are going to

1254

00:44:16,950 --> 00:44:14,800

help us because that's going to give us

1255

00:44:19,030 --> 00:44:16,960

some other you know and we've just so

1256

00:44:21,589 --> 00:44:19,040

badly needed that i go back to my early

1257

00:44:23,990 --> 00:44:21,599

days uh even with the project blue book

1258

00:44:25,270 --> 00:44:24,000

you know and all that whole time period

1259

00:44:26,790 --> 00:44:25,280

you know i didn't even have something

1260

00:44:28,309 --> 00:44:26,800

like a tape recorder that i could go out

1261

00:44:29,910 --> 00:44:28,319

with at that time that was before that

1262

00:44:31,829 --> 00:44:29,920

you know i was going out i was going out

1263

00:44:33,750 --> 00:44:31,839

and investigating cases where people i

1264

00:44:35,670 --> 00:44:33,760

had to hand them a piece of paper and

1265

00:44:38,150 --> 00:44:35,680

and you know colored crayon or something

1266

00:44:40,950 --> 00:44:38,160

like that and say draw your picture of

1267

00:44:43,190 --> 00:44:40,960

what you saw right you know i mean

1268

00:44:45,589 --> 00:44:43,200

that's the kind of tools that i had back

1269

00:44:47,270 --> 00:44:45,599

when i was doing investigations right

1270

00:44:49,349 --> 00:44:47,280

and you think about that in the context

1271

00:44:51,030 --> 00:44:49,359

of well did the air force maybe have

1272

00:44:52,470 --> 00:44:51,040

that because they sent out investigators

1273

00:44:54,470 --> 00:44:52,480

like me that were sitting there doing

1274

00:44:55,829 --> 00:44:54,480

the same thing and then maybe had a form

1275

00:44:56,550 --> 00:44:55,839

and that's all they did they filled it

1276

00:44:58,870 --> 00:44:56,560

out

1277

00:45:00,630 --> 00:44:58,880

but now we've moved over to a completely

1278

00:45:02,950 --> 00:45:00,640

you know where we've got multi-sensory

1279

00:45:05,589 --> 00:45:02,960

kinds of data all different types of

1280

00:45:07,510 --> 00:45:05,599

data that we can use technology tools

1281

00:45:09,750 --> 00:45:07,520

that are now going to give science a

1282

00:45:12,550 --> 00:45:09,760

little bit more information than this

1283

00:45:13,990 --> 00:45:12,560

crude drawing with a crayon right you

1284

00:45:16,390 --> 00:45:14,000

know i mean

1285

00:45:18,069 --> 00:45:16,400

and so you know i'm excited about the

1286

00:45:20,470 --> 00:45:18,079

time that we're in right now and i'm

1287

00:45:22,069 --> 00:45:20,480

thinking that man the potential here is

1288

00:45:23,589 --> 00:45:22,079

that we're going to have maybe answers

1289

00:45:25,430 --> 00:45:23,599

within

1290

00:45:27,190 --> 00:45:25,440

i don't know if in my lifetime but maybe

1291

00:45:29,190 --> 00:45:27,200

within maybe a couple decades or

1292

00:45:30,950 --> 00:45:29,200

something anyway

1293

00:45:32,790 --> 00:45:30,960

yeah that'd be awesome

1294

00:45:34,790 --> 00:45:32,800

uh am i right in saying rich that in the

1295

00:45:37,270 --> 00:45:34,800

last few months the seo opened up the

1296

00:45:40,470 --> 00:45:37,280

reporting uh system through through the

1297

00:45:41,510 --> 00:45:40,480

seou website for public sightings and

1298

00:45:42,790 --> 00:45:41,520

things

1299

00:45:44,390 --> 00:45:42,800

yeah so

1300

00:45:46,790 --> 00:45:44,400

let me let me

1301
00:45:48,470 --> 00:45:46,800
talk about that for a second we do have

1302
00:45:51,190 --> 00:45:48,480
a group of people that we're looking to

1303
00:45:54,470 --> 00:45:51,200
do investigations with we're not looking

1304
00:45:56,309 --> 00:45:54,480
to do though uh you know mufon's job

1305
00:45:58,550 --> 00:45:56,319
we're not trying to replace what mufon

1306
00:46:01,190 --> 00:45:58,560
does or anything of that nature

1307
00:46:05,190 --> 00:46:01,200
we don't we're we're looking for the the

1308
00:46:07,430 --> 00:46:05,200
reports with critical credible data or

1309
00:46:10,390 --> 00:46:07,440
information or or some of the better

1310
00:46:12,150 --> 00:46:10,400
cases if you would sure do the ones that

1311
00:46:14,470 --> 00:46:12,160
we can pass off the science that would

1312
00:46:16,790 --> 00:46:14,480
be helpful so in other words if you've

1313
00:46:18,390 --> 00:46:16,800

got like let's say you've got like a

1314

00:46:20,309 --> 00:46:18,400

sighting that was in a given area and

1315

00:46:22,309 --> 00:46:20,319

you've got three people who took video

1316

00:46:24,550 --> 00:46:22,319

of it from different angles you might be

1317

00:46:26,630 --> 00:46:24,560

able to triangulate where that's at you

1318

00:46:28,630 --> 00:46:26,640

know or if they had some other kinds of

1319

00:46:30,230 --> 00:46:28,640

tools like air traffic controllers maybe

1320

00:46:32,470 --> 00:46:30,240

in the area might have also witnessed it

1321

00:46:35,430 --> 00:46:32,480

right and they picked it up on radar so

1322

00:46:38,069 --> 00:46:35,440

you could add to that some actual

1323

00:46:40,390 --> 00:46:38,079

data you know and start to look at it

1324

00:46:44,230 --> 00:46:40,400

again that we can go with as opposed to

1325

00:46:47,190 --> 00:46:44,240

just an anecdotal you know story that

1326
00:46:49,510 --> 00:46:47,200
somebody's coming up with which you know

1327
00:46:52,309 --> 00:46:49,520
is hard to be able to determine truth

1328
00:46:53,910 --> 00:46:52,319
and fact from that right because humans

1329
00:46:57,910 --> 00:46:53,920
are fallible

1330
00:46:59,510 --> 00:46:57,920
as even as observers you know and so

1331
00:47:02,470 --> 00:46:59,520
that's what we're looking for and that's

1332
00:47:05,990 --> 00:47:02,480
the kind of reports that we want to get

1333
00:47:07,990 --> 00:47:06,000
not the you know i i took a picture and

1334
00:47:09,750 --> 00:47:08,000
there's a i pointed it toward the sun

1335
00:47:12,069 --> 00:47:09,760
and i have a little blue orb down there

1336
00:47:15,109 --> 00:47:12,079
which is basically a lens reflection

1337
00:47:18,470 --> 00:47:16,390
now um

1338
00:47:20,470 --> 00:47:18,480

i think uh a conversation that's uh that

1339

00:47:22,710 --> 00:47:20,480

always crops up though that i certainly

1340

00:47:24,790 --> 00:47:22,720

see a lot but we don't necessarily get a

1341

00:47:27,109 --> 00:47:24,800

lot of information on is

1342

00:47:28,790 --> 00:47:27,119

materials meta materials and things like

1343

00:47:30,710 --> 00:47:28,800

that we know people like gary nolan

1344

00:47:32,870 --> 00:47:30,720

speak about it and we know in the past

1345

00:47:35,109 --> 00:47:32,880

jacques vallee has as well but

1346

00:47:37,510 --> 00:47:35,119

do gentlemen have any conversations

1347

00:47:39,349 --> 00:47:37,520

information or does that conversation

1348

00:47:41,910 --> 00:47:39,359

come up more in the scientific community

1349

00:47:44,069 --> 00:47:41,920

than maybe in the public realm

1350

00:47:45,829 --> 00:47:44,079

well the that would be you know if we

1351

00:47:47,589 --> 00:47:45,839

had materials that we could test and

1352

00:47:50,069 --> 00:47:47,599

show have you know for example an

1353

00:47:52,230 --> 00:47:50,079

isotopic content that's not that's not

1354

00:47:54,549 --> 00:47:52,240

terrestrial that's really that's a huge

1355

00:47:56,790 --> 00:47:54,559

smoking gun you always hear about these

1356

00:47:58,390 --> 00:47:56,800

claims but the thing is

1357

00:48:00,230 --> 00:47:58,400

is it's um

1358

00:48:02,710 --> 00:48:00,240

again not seeing anything published i

1359

00:48:04,549 --> 00:48:02,720

think gary noland though and and many of

1360

00:48:06,470 --> 00:48:04,559

uh is working hard on this as well as

1361

00:48:08,870 --> 00:48:06,480

jack vale and others really look forward

1362

00:48:11,270 --> 00:48:08,880

to some results that are really solid

1363

00:48:14,710 --> 00:48:11,280

that say here's a piece of here's some

1364

00:48:18,230 --> 00:48:14,720

piece of some stuff and either it has um

1365

00:48:20,710 --> 00:48:18,240

isotopic content that doesn't match uh

1366

00:48:22,230 --> 00:48:20,720

doesn't match the earth moon system or

1367

00:48:25,109 --> 00:48:22,240

and slash or

1368

00:48:26,950 --> 00:48:25,119

it's got like materials manufactured to

1369

00:48:29,349 --> 00:48:26,960

scale smaller than we can you know on

1370

00:48:31,270 --> 00:48:29,359

some sort of for nanoscale that we find

1371

00:48:33,430 --> 00:48:31,280

that's that's really the smoking gun i

1372

00:48:35,190 --> 00:48:33,440

was really disappointed during the

1373

00:48:38,950 --> 00:48:35,200

hearing this dude came up and they're

1374

00:48:41,910 --> 00:48:39,910

well

1375

00:48:42,950 --> 00:48:41,920

i hope that's wrong

1376

00:48:44,549 --> 00:48:42,960

because that would be that would be

1377

00:48:46,630 --> 00:48:44,559

great at the same time i've always been

1378

00:48:48,390 --> 00:48:46,640

really really skeptical about wreckage

1379

00:48:51,750 --> 00:48:48,400

because the way um

1380

00:48:53,190 --> 00:48:51,760

actually uh um a a a friend of mine bob

1381

00:48:54,470 --> 00:48:53,200

put it is um

1382

00:48:57,270 --> 00:48:54,480

if they're so advanced why are they

1383

00:48:58,790 --> 00:48:57,280

always crashing so it's kind of bizarre

1384

00:49:01,109 --> 00:48:58,800

to think about the possibility of

1385

00:49:03,030 --> 00:49:01,119

wreckage because if they're so advanced

1386

00:49:04,390 --> 00:49:03,040

that shouldn't be happening but i'm

1387

00:49:06,390 --> 00:49:04,400

definitely open to the possibility

1388

00:49:08,390 --> 00:49:06,400

especially because that's way better

1389

00:49:10,549 --> 00:49:08,400

than even than even multiple sensors

1390

00:49:13,109 --> 00:49:10,559

like rich said like radar and stuff

1391

00:49:15,430 --> 00:49:13,119

if i have a hunk of material i can test

1392

00:49:17,829 --> 00:49:15,440

in the lab and prove it's not of this

1393

00:49:20,309 --> 00:49:17,839

earth with current technology that's it

1394

00:49:23,750 --> 00:49:20,319

that's game over that shuts up every

1395

00:49:26,230 --> 00:49:23,760

skeptic debunker that's the gat is it

1396

00:49:29,109 --> 00:49:26,240

that's the holy grail so i'm open to the

1397

00:49:31,510 --> 00:49:29,119

possibility and i would love

1398

00:49:32,790 --> 00:49:31,520

love it if we had something like that

1399

00:49:34,870 --> 00:49:32,800

yeah

1400

00:49:36,710 --> 00:49:34,880

i think that the uh in the in the

1401
00:49:38,470 --> 00:49:36,720
context of the military world let me

1402
00:49:40,470 --> 00:49:38,480
just speak for that because you know

1403
00:49:42,549 --> 00:49:40,480
basically what happens in a lot of the

1404
00:49:44,870 --> 00:49:42,559
cases of any material or anything that

1405
00:49:47,109 --> 00:49:44,880
falls out of the sky it does go into the

1406
00:49:49,109 --> 00:49:47,119
military world and the military world

1407
00:49:51,349 --> 00:49:49,119
has specific routes that it passes

1408
00:49:53,430 --> 00:49:51,359
things to so like for example here in

1409
00:49:55,190 --> 00:49:53,440
huntsville we have a mystic missile and

1410
00:49:57,750 --> 00:49:55,200
space intelligence center

1411
00:49:59,030 --> 00:49:57,760
so if you get a gun from the iraqis or

1412
00:50:00,230 --> 00:49:59,040
something like that guess where it's

1413
00:50:01,589 --> 00:50:00,240

going to go it's going to go here you're

1414

00:50:03,430 --> 00:50:01,599

going to have scientists that are up

1415

00:50:05,430 --> 00:50:03,440

there doing a re-engineering of it and

1416

00:50:07,910 --> 00:50:05,440

it'll stay within the military world as

1417

00:50:09,910 --> 00:50:07,920

to michael's point earlier about the

1418

00:50:11,510 --> 00:50:09,920

fact that this somehow stays in the

1419

00:50:14,710 --> 00:50:11,520

military world and doesn't get out to

1420

00:50:16,470 --> 00:50:14,720

the scientific world so uh i think i'll

1421

00:50:18,150 --> 00:50:16,480

point to the fact that there's

1422

00:50:20,309 --> 00:50:18,160

you know there's been reports like on

1423

00:50:23,349 --> 00:50:20,319

the scale of about 200 crashes that have

1424

00:50:24,950 --> 00:50:23,359

happened over throughout the world uh i

1425

00:50:27,190 --> 00:50:24,960

worked with

1426

00:50:29,270 --> 00:50:27,200

len springfield on and he was working on

1427

00:50:30,549 --> 00:50:29,280

these crash retrieval types of things

1428

00:50:32,549 --> 00:50:30,559

but

1429

00:50:35,109 --> 00:50:32,559

what i'm going to say to you is that

1430

00:50:37,990 --> 00:50:35,119

anything that that the military does fit

1431

00:50:40,069 --> 00:50:38,000

or picks up is within the military and

1432

00:50:41,589 --> 00:50:40,079

then it's classified beyond anything

1433

00:50:44,230 --> 00:50:41,599

you've ever known

1434

00:50:46,549 --> 00:50:44,240

and you'll never know about it right so

1435

00:50:49,030 --> 00:50:46,559

it's quite feasible that within the

1436

00:50:50,710 --> 00:50:49,040

realm of the military then it's been

1437

00:50:53,349 --> 00:50:50,720

documented that they've been out at many

1438

00:50:56,549 --> 00:50:53,359

sites the kecksburg crash that took

1439

00:50:59,510 --> 00:50:56,559

place with military right allegedly

1440

00:51:01,349 --> 00:50:59,520

roswell was all picked up and

1441

00:51:04,069 --> 00:51:01,359

by military right

1442

00:51:06,870 --> 00:51:04,079

so i think that that could potentially

1443

00:51:10,069 --> 00:51:06,880

exist within the military world

1444

00:51:11,910 --> 00:51:10,079

it's not necessarily as known to us and

1445

00:51:12,950 --> 00:51:11,920

i'm thrilled with the fact that gary

1446

00:51:15,589 --> 00:51:12,960

nolan

1447

00:51:16,950 --> 00:51:15,599

at least has some material from

1448

00:51:19,030 --> 00:51:16,960

somewhere

1449

00:51:20,790 --> 00:51:19,040

that he can work with but the problems

1450

00:51:23,270 --> 00:51:20,800

we have with material

1451
00:51:26,470 --> 00:51:23,280
is that we don't know necessarily the

1452
00:51:29,349 --> 00:51:26,480
chain of custody and where it came from

1453
00:51:31,510 --> 00:51:29,359
and those types of things lead into

1454
00:51:32,549 --> 00:51:31,520
problems for scientific research and

1455
00:51:34,309 --> 00:51:32,559
study

1456
00:51:36,309 --> 00:51:34,319
because if you don't have that that

1457
00:51:37,910 --> 00:51:36,319
chain of evidence or where it was passed

1458
00:51:39,910 --> 00:51:37,920
or where it came from

1459
00:51:40,710 --> 00:51:39,920
then you know who's to say where it's

1460
00:51:42,150 --> 00:51:40,720
from

1461
00:51:44,069 --> 00:51:42,160
and that's always going to be a question

1462
00:51:45,589 --> 00:51:44,079
mark with the rest of the world in terms

1463
00:51:46,630 --> 00:51:45,599

of trying to figure out

1464

00:51:51,990 --> 00:51:46,640

you know

1465

00:51:53,670 --> 00:51:52,000

does doesn't have any uh unearthly types

1466

00:51:55,030 --> 00:51:53,680

of material

1467

00:51:56,710 --> 00:51:55,040

uh

1468

00:51:59,990 --> 00:51:56,720

types of situations

1469

00:52:01,510 --> 00:52:00,000

we do have within seu besides the fact

1470

00:52:03,990 --> 00:52:01,520

that you know that there's people like

1471

00:52:06,549 --> 00:52:04,000

you know gary nolan out there but we do

1472

00:52:08,950 --> 00:52:06,559

have other people who have done lab work

1473

00:52:10,950 --> 00:52:08,960

uh the delphos kansas case for example

1474

00:52:11,750 --> 00:52:10,960

the soil samples that were taken from

1475

00:52:13,990 --> 00:52:11,760

that

1476

00:52:15,750 --> 00:52:14,000

were analyzed by phyllis buttinger and a

1477

00:52:18,150 --> 00:52:15,760

number of people that actually are in

1478

00:52:20,549 --> 00:52:18,160

scu and they did a tremendous amount of

1479

00:52:22,870 --> 00:52:20,559

work on those types of debris those

1480

00:52:24,549 --> 00:52:22,880

these effects if you would which showed

1481

00:52:26,870 --> 00:52:24,559

that there was definitely something that

1482

00:52:29,270 --> 00:52:26,880

was very profound there right

1483

00:52:32,390 --> 00:52:29,280

uh so we can get that type of

1484

00:52:34,710 --> 00:52:32,400

information uh from at least some of the

1485

00:52:37,670 --> 00:52:34,720

effects to the soil and we need to keep

1486

00:52:39,990 --> 00:52:37,680

having that and that's areas where we as

1487

00:52:41,109 --> 00:52:40,000

a organization are continuing to strive

1488

00:52:43,270 --> 00:52:41,119

to improve

1489

00:52:45,190 --> 00:52:43,280

how we do that get labs on board where

1490

00:52:46,630 --> 00:52:45,200

we're going to send things over and that

1491

00:52:48,790 --> 00:52:46,640

type of thing

1492

00:52:50,309 --> 00:52:48,800

excellent yeah yeah so sometimes it

1493

00:52:52,309 --> 00:52:50,319

doesn't have to be the actual materials

1494

00:52:55,109 --> 00:52:52,319

it could be traces

1495

00:52:55,990 --> 00:52:55,119

uh or or radiation or things like that

1496

00:52:58,069 --> 00:52:56,000

that can

1497

00:52:59,510 --> 00:52:58,079

yes yeah i think yeah i mean i might

1498

00:53:00,950 --> 00:52:59,520

personally probably forget that and all

1499

00:53:02,390 --> 00:53:00,960

you can think about is a solid or

1500

00:53:04,549 --> 00:53:02,400

something but yeah

1501
00:53:06,470 --> 00:53:04,559
you know a biological sample would be

1502
00:53:08,870 --> 00:53:06,480
great too i'd love to have like an

1503
00:53:10,630 --> 00:53:08,880
alien's leg or something i mean i even

1504
00:53:12,470 --> 00:53:10,640
take a toe i don't

1505
00:53:14,790 --> 00:53:12,480
i just give me something man it's always

1506
00:53:18,710 --> 00:53:14,800
about these materials that come from the

1507
00:53:20,150 --> 00:53:18,720
ship but that yeah i'd i'd be over the

1508
00:53:21,910 --> 00:53:20,160
the moon if there was some sort of

1509
00:53:23,990 --> 00:53:21,920
biological sample

1510
00:53:26,150 --> 00:53:24,000
what's amazing to me is that you know

1511
00:53:28,309 --> 00:53:26,160
don't they have dna i mean it seemed

1512
00:53:29,910 --> 00:53:28,319
like you would find dna trace evidence

1513
00:53:32,309 --> 00:53:29,920

somewhere where they were walking around

1514

00:53:33,990 --> 00:53:32,319

some sort of skin sample or something

1515

00:53:35,910 --> 00:53:34,000

yeah i mean we haven't been looking for

1516

00:53:37,430 --> 00:53:35,920

it though either we don't treat it like

1517

00:53:39,670 --> 00:53:37,440

a crime scene

1518

00:53:41,349 --> 00:53:39,680

exactly if we did yeah if we treated it

1519

00:53:42,790 --> 00:53:41,359

like a forensic crime scene maybe we'd

1520

00:53:44,150 --> 00:53:42,800

find i mean they seemingly don't have

1521

00:53:46,069 --> 00:53:44,160

hair at least

1522

00:53:49,030 --> 00:53:46,079

yeah the majority of them but yeah there

1523

00:53:50,069 --> 00:53:49,040

might be something else and

1524

00:53:51,750 --> 00:53:50,079

that's the thing we just need to change

1525

00:53:53,750 --> 00:53:51,760

the way we conceptualize this and change

1526

00:53:56,549 --> 00:53:53,760

the way we conceptualize evidence and

1527

00:53:58,390 --> 00:53:56,559

look for things that you know fit fit

1528

00:54:00,630 --> 00:53:58,400

the description of of abductions or

1529

00:54:02,710 --> 00:54:00,640

close encounters or sightings and then

1530

00:54:04,950 --> 00:54:02,720

try to see maybe what else we could get

1531

00:54:06,150 --> 00:54:04,960

from it um yeah that's a great idea i'm

1532

00:54:07,910 --> 00:54:06,160

gonna i'm gonna go into the next

1533

00:54:10,309 --> 00:54:07,920

abduction with some rubber gloves and

1534

00:54:12,309 --> 00:54:10,319

some tweezers and try to find something

1535

00:54:14,309 --> 00:54:12,319

yeah well mr cackle always says you get

1536

00:54:16,309 --> 00:54:14,319

abducted steal something i think you

1537

00:54:17,750 --> 00:54:16,319

forgot the fact that people get stripped

1538

00:54:19,589 --> 00:54:17,760

naked though there's nothing yeah and

1539

00:54:21,030 --> 00:54:19,599

tony of the us boys tried to steal a

1540

00:54:22,710 --> 00:54:21,040

clock when he was abducted and they

1541

00:54:24,630 --> 00:54:22,720

caught him and got all pissed off about

1542

00:54:26,790 --> 00:54:24,640

it yeah yeah

1543

00:54:28,790 --> 00:54:26,800

the clock yeah i said he tried to steal

1544

00:54:31,349 --> 00:54:28,800

what what he assumed was a clock

1545

00:54:33,829 --> 00:54:31,359

that had like the the all the little

1546

00:54:36,230 --> 00:54:33,839

dashes were in the same places

1547

00:54:38,069 --> 00:54:36,240

i always get a kick out of the the the

1548

00:54:39,589 --> 00:54:38,079

the cases there that where they're in

1549

00:54:41,750 --> 00:54:39,599

their bed and they're somehow like

1550

00:54:43,349 --> 00:54:41,760

moving through walls you know it's like

1551
00:54:45,030 --> 00:54:43,359
well i wonder if they came back with a

1552
00:54:45,830 --> 00:54:45,040
cloth would they be able to get that

1553
00:54:50,549 --> 00:54:45,840
through the wall

1554
00:54:52,150 --> 00:54:50,559
[Laughter]

1555
00:54:54,150 --> 00:54:52,160
yeah no there was a there was a woman

1556
00:54:56,069 --> 00:54:54,160
amy rylance in australia who was

1557
00:54:57,750 --> 00:54:56,079
abducted through a window and she was

1558
00:54:59,190 --> 00:54:57,760
being carried out her friend petra saw

1559
00:55:01,190 --> 00:54:59,200
her being carried out the window with

1560
00:55:02,950 --> 00:55:01,200
the contents of the coffee table

1561
00:55:04,710 --> 00:55:02,960
petra went through the window and all

1562
00:55:07,109 --> 00:55:04,720
the contents of the coffee table fell to

1563
00:55:08,789 --> 00:55:07,119

the floor well there we go kind of kind

1564

00:55:10,789 --> 00:55:08,799

of indicates maybe you can't take the

1565

00:55:12,309 --> 00:55:10,799

other stuff too i mean nobody knows how

1566

00:55:13,109 --> 00:55:12,319

the hell they do this in the first place

1567

00:55:14,710 --> 00:55:13,119

like

1568

00:55:16,390 --> 00:55:14,720

people go through

1569

00:55:18,309 --> 00:55:16,400

solid matter but

1570

00:55:19,910 --> 00:55:18,319

um yeah that might be some indication

1571

00:55:22,470 --> 00:55:19,920

that you can't necessarily take things

1572

00:55:28,230 --> 00:55:25,510

now michael just theoretically if

1573

00:55:30,789 --> 00:55:28,240

if we found one of these time travelers

1574

00:55:33,030 --> 00:55:30,799

to be or look exactly like we do as

1575

00:55:34,630 --> 00:55:33,040

human would that surprise you would you

1576

00:55:37,270 --> 00:55:34,640

have expected them to have evolved and

1577

00:55:40,069 --> 00:55:37,280

looked to look different

1578

00:55:41,910 --> 00:55:40,079

no in fact in my new book uh they i

1579

00:55:43,750 --> 00:55:41,920

think it's

1580

00:55:45,270 --> 00:55:43,760

probably in about a week and a half i

1581

00:55:47,910 --> 00:55:45,280

think it'll publish but the first two

1582

00:55:50,950 --> 00:55:47,920

case studies the first one in particular

1583

00:55:54,230 --> 00:55:50,960

it's an entirely modern human looking

1584

00:55:56,230 --> 00:55:54,240

individual he spoke vocally um

1585

00:55:58,470 --> 00:55:56,240

wore the one piece bodysuit came out of

1586

00:56:00,549 --> 00:55:58,480

the same silvery metallic craft it was

1587

00:56:02,390 --> 00:56:00,559

it was actually right here in montana uh

1588

00:56:04,390 --> 00:56:02,400

joan byrd talks about it

1589

00:56:07,589 --> 00:56:04,400

in more detail in her book monta montana

1590

00:56:09,190 --> 00:56:07,599

ufos but he he was getting water out of

1591

00:56:10,950 --> 00:56:09,200

the sluice stream there was a miner up

1592

00:56:12,870 --> 00:56:10,960

there who heard the the low buzzing

1593

00:56:14,630 --> 00:56:12,880

sound went around the corner was like oh

1594

00:56:16,870 --> 00:56:14,640

it's this guy walks out says can we take

1595

00:56:18,470 --> 00:56:16,880

some water we extract the hydrogen as

1596

00:56:21,270 --> 00:56:18,480

our fuel source gives them a tour of the

1597

00:56:23,510 --> 00:56:21,280

ship he writes uh senator john glenn

1598

00:56:25,670 --> 00:56:23,520

former astronaut about this with great

1599

00:56:27,349 --> 00:56:25,680

detail about everything he learned about

1600

00:56:29,109 --> 00:56:27,359

the inner workings the mechanics of this

1601
00:56:31,030 --> 00:56:29,119
ship which he didn't have a full grasp

1602
00:56:31,910 --> 00:56:31,040
on as a a minor

1603
00:56:34,870 --> 00:56:31,920
um

1604
00:56:36,549 --> 00:56:34,880
but no it indicated to me and many other

1605
00:56:39,589 --> 00:56:36,559
cases i've come across like this in

1606
00:56:41,430 --> 00:56:39,599
researching this new work is that

1607
00:56:44,150 --> 00:56:41,440
if they are time travelers and i'll put

1608
00:56:45,750 --> 00:56:44,160
that out there as if this is the case it

1609
00:56:47,670 --> 00:56:45,760
indicates that we're going to be doing

1610
00:56:49,109 --> 00:56:47,680
it much sooner than i previously thought

1611
00:56:51,589 --> 00:56:49,119
when i wrote the first book it mostly

1612
00:56:53,670 --> 00:56:51,599
focused on the grays and the derived

1613
00:56:55,430 --> 00:56:53,680

synapomorphic characteristics where they

1614

00:56:57,270 --> 00:56:55,440

have the bigger heads smaller face

1615

00:56:59,510 --> 00:56:57,280

bigger eyes all these traits we'd expect

1616

00:57:01,190 --> 00:56:59,520

to see tens of thousands of years in the

1617

00:57:02,789 --> 00:57:01,200

future but then you have these cases

1618

00:57:05,349 --> 00:57:02,799

where it's an entirely

1619

00:57:07,270 --> 00:57:05,359

modern looking person just like us so i

1620

00:57:09,030 --> 00:57:07,280

don't know i've kind of kind of revised

1621

00:57:10,950 --> 00:57:09,040

my understanding of

1622

00:57:12,789 --> 00:57:10,960

this or at least the way i conceptualize

1623

00:57:14,309 --> 00:57:12,799

it where it's not just a prediction

1624

00:57:16,230 --> 00:57:14,319

about our long-term

1625

00:57:18,230 --> 00:57:16,240

uh evolutionary not just physical but

1626
00:57:20,470 --> 00:57:18,240
cultural and technological evolution but

1627
00:57:22,630 --> 00:57:20,480
it may actually occur sooner than sooner

1628
00:57:24,710 --> 00:57:22,640
than later i just wish someone this

1629
00:57:26,230 --> 00:57:24,720
would happen again in the smartphone era

1630
00:57:29,109 --> 00:57:26,240
i want something like so here's the

1631
00:57:30,950 --> 00:57:29,119
spaceship and like yeah i know we that's

1632
00:57:33,510 --> 00:57:30,960
really what we need because otherwise

1633
00:57:35,349 --> 00:57:33,520
there will always be a way to say it was

1634
00:57:37,030 --> 00:57:35,359
imagined it never happened yeah

1635
00:57:39,030 --> 00:57:37,040
absolutely yeah and i and i talk about

1636
00:57:40,390 --> 00:57:39,040
that a lot in the book you know what how

1637
00:57:43,829 --> 00:57:40,400
do we

1638
00:57:46,150 --> 00:57:43,839

there's things that can be corroborated

1639

00:57:48,150 --> 00:57:46,160

for instance amy ryland's been taken out

1640

00:57:49,750 --> 00:57:48,160

the window that was seen by her friend

1641

00:57:52,230 --> 00:57:49,760

and she there were three different

1642

00:57:54,069 --> 00:57:52,240

jurisdictions involved the she was taken

1643

00:57:56,950 --> 00:57:54,079

to a hospital so you have all of the

1644

00:57:59,030 --> 00:57:56,960

doctors and the nurses report so we we

1645

00:58:01,109 --> 00:57:59,040

can find ways to substantiate certain

1646

00:58:02,950 --> 00:58:01,119

things but yeah and that i've always

1647

00:58:04,390 --> 00:58:02,960

said that the abduction aspect is a more

1648

00:58:05,829 --> 00:58:04,400

tan

1649

00:58:09,270 --> 00:58:05,839

us

1650

00:58:10,950 --> 00:58:09,280

thrown out we should be considering it

1651

00:58:12,710 --> 00:58:10,960

as well and especially if we see

1652

00:58:14,549 --> 00:58:12,720

consistent patterns across all of these

1653

00:58:16,789 --> 00:58:14,559

cases we should take that into

1654

00:58:18,870 --> 00:58:16,799

consideration and and use that to try to

1655

00:58:21,670 --> 00:58:18,880

get as much information as we can with

1656

00:58:23,430 --> 00:58:21,680

with the overtly stated caveat that it's

1657

00:58:26,870 --> 00:58:23,440

never going to be

1658

00:58:28,549 --> 00:58:26,880

as reliable as many other forms of data

1659

00:58:30,150 --> 00:58:28,559

yeah no i'm not saying throw it out i've

1660

00:58:33,670 --> 00:58:30,160

said this to rich many times people

1661

00:58:36,230 --> 00:58:33,680

laugh whenever i say this and uh i i i

1662

00:58:37,910 --> 00:58:36,240

many people claim to be repeat abductees

1663

00:58:40,710 --> 00:58:37,920

experiencers

1664

00:58:43,349 --> 00:58:40,720

great we should like totally wire up

1665

00:58:45,670 --> 00:58:43,359

their bedroom with like every possible

1666

00:58:47,349 --> 00:58:45,680

camera imaginable and i all i've ever

1667

00:58:48,470 --> 00:58:47,359

heard when i've said that is like oh hal

1668

00:58:50,390 --> 00:58:48,480

put off already did that and the

1669

00:58:51,829 --> 00:58:50,400

following happened i'm like um can you

1670

00:58:54,069 --> 00:58:51,839

show me that on paper that's just

1671

00:58:55,510 --> 00:58:54,079

hearsay prove it to me i'm absolutely

1672

00:58:57,910 --> 00:58:55,520

not saying throw it out i would want to

1673

00:58:59,670 --> 00:58:57,920

study the crap out of it if i had time

1674

00:59:02,069 --> 00:58:59,680

and money and people willing i would

1675

00:59:04,150 --> 00:59:02,079

have so many cameras of different types

1676

00:59:06,069 --> 00:59:04,160

in that bedroom we would know one way or

1677

00:59:08,470 --> 00:59:06,079

another right away whether it's in the

1678

00:59:10,630 --> 00:59:08,480

head or if it's a real abduction and

1679

00:59:12,950 --> 00:59:10,640

again i don't buy the like oh well hal

1680

00:59:14,870 --> 00:59:12,960

tried that and it didn't work prove it

1681

00:59:16,870 --> 00:59:14,880

show me next time i see hal i hope he

1682

00:59:18,950 --> 00:59:16,880

comes to you and be like where did you

1683

00:59:20,549 --> 00:59:18,960

publish that how like it's not good

1684

00:59:23,589 --> 00:59:20,559

enough to say like oh i tried it it

1685

00:59:24,870 --> 00:59:23,599

didn't work that's not good enough

1686

00:59:26,630 --> 00:59:24,880

yeah yeah

1687

00:59:28,390 --> 00:59:26,640

and that's what i was saying like if if

1688

00:59:30,230 --> 00:59:28,400

i could be the observer or any trained

1689

00:59:32,150 --> 00:59:30,240

observer that went from place to place

1690

00:59:33,990 --> 00:59:32,160

we could use that observational data but

1691

00:59:36,470 --> 00:59:34,000

it's coming from different people with

1692

00:59:38,710 --> 00:59:36,480

their own fuzzy memories their own

1693

00:59:40,710 --> 00:59:38,720

way of conceptualizing things their own

1694

00:59:42,150 --> 00:59:40,720

belief systems that come into play but

1695

00:59:43,430 --> 00:59:42,160

but like what you said too if we could

1696

00:59:45,109 --> 00:59:43,440

have the sensors if we could have

1697

00:59:47,270 --> 00:59:45,119

cameras if we could have anything that's

1698

00:59:49,349 --> 00:59:47,280

checking for electromagnetic anomalies

1699

00:59:51,430 --> 00:59:49,359

have that in that place where some

1700

00:59:54,789 --> 00:59:51,440

sometimes these people claim to be taken

1701
00:59:57,750 --> 00:59:54,799
upwards 50 to 60 times throughout the

1702
00:59:59,670 --> 00:59:57,760
course of you know 15 20 years so

1703
01:00:02,630 --> 00:59:59,680
clearly you

1704
01:00:04,630 --> 01:00:02,640
yeah absolutely or even just one data

1705
01:00:07,030 --> 01:00:04,640
point where you can capture that on

1706
01:00:09,349 --> 01:00:07,040
video or whatever is happening and it

1707
01:00:10,309 --> 01:00:09,359
would be phenomenal yeah now what i've

1708
01:00:12,069 --> 01:00:10,319
heard is

1709
01:00:14,309 --> 01:00:12,079
allegedly again this was not proven to

1710
01:00:16,789 --> 01:00:14,319
me oh when we've tried to do it then the

1711
01:00:19,190 --> 01:00:16,799
abduction stop and i'm like yeah that

1712
01:00:21,190 --> 01:00:19,200
that that's very smelly that's very

1713
01:00:22,470 --> 01:00:21,200

fishy to me yeah okay

1714

01:00:23,589 --> 01:00:22,480

so i

1715

01:00:25,829 --> 01:00:23,599

yeah

1716

01:00:28,069 --> 01:00:25,839

i'll just share with you that that i

1717

01:00:29,990 --> 01:00:28,079

know mufon apparently it tried that as

1718

01:00:32,069 --> 01:00:30,000

well where they had uh devices that they

1719

01:00:33,750 --> 01:00:32,079

were putting in the rooms and of course

1720

01:00:35,430 --> 01:00:33,760

it's like like everything else it's like

1721

01:00:36,870 --> 01:00:35,440

you know how do you predict when these

1722

01:00:38,870 --> 01:00:36,880

things and then think about the sheer

1723

01:00:40,630 --> 01:00:38,880

volume of data you're collecting

1724

01:00:42,309 --> 01:00:40,640

you know in terms of just every day i'm

1725

01:00:43,990 --> 01:00:42,319

recording my bedroom when i go to bed at

1726

01:00:45,589 --> 01:00:44,000

night or something of that nature over

1727

01:00:48,870 --> 01:00:45,599

like a period of years then they come

1728

01:00:50,789 --> 01:00:48,880

back but uh anyway uh you know there's

1729

01:00:52,950 --> 01:00:50,799

challenges with it but you know i agree

1730

01:00:55,030 --> 01:00:52,960

with you if you if you have like

1731

01:00:56,789 --> 01:00:55,040

it's pretty logical you know go where

1732

01:00:58,549 --> 01:00:56,799

the objects and the

1733

01:01:01,270 --> 01:00:58,559

tend to go right if you're going to do a

1734

01:01:02,710 --> 01:01:01,280

study we'll hang around a nuke site

1735

01:01:05,349 --> 01:01:02,720

if you're going to do it you know go to

1736

01:01:07,030 --> 01:01:05,359

an abduction you know and and basically

1737

01:01:09,270 --> 01:01:07,040

you know set up as much as you can to be

1738

01:01:10,630 --> 01:01:09,280

able to do something with it right and

1739

01:01:12,870 --> 01:01:10,640

so exactly

1740

01:01:14,309 --> 01:01:12,880

yeah two convenient spots the thing i

1741

01:01:16,870 --> 01:01:14,319

want to come back to was just want to

1742

01:01:19,589 --> 01:01:16,880

mention that you know going back to the

1743

01:01:22,069 --> 01:01:19,599

humanoid uh the human being the the

1744

01:01:23,990 --> 01:01:22,079

alien if you would so to speak

1745

01:01:25,670 --> 01:01:24,000

let me clarify that in the early days of

1746

01:01:27,109 --> 01:01:25,680

ufology when i was running around doing

1747

01:01:29,109 --> 01:01:27,119

all these studies and things like that

1748

01:01:30,710 --> 01:01:29,119

back in the 50s and everything else you

1749

01:01:32,309 --> 01:01:30,720

know some of them look like us some of

1750

01:01:34,230 --> 01:01:32,319

them didn't look like us some are like

1751

01:01:36,390 --> 01:01:34,240

the the kelly hopkinsville or the little

1752

01:01:38,789 --> 01:01:36,400

robot a little robot types of things

1753

01:01:40,549 --> 01:01:38,799

you've got creatures like a mummy if you

1754

01:01:43,510 --> 01:01:40,559

would that that charlie hickson and

1755

01:01:45,829 --> 01:01:43,520

calvin parker saw on cat and pascagoula

1756

01:01:47,589 --> 01:01:45,839

it was a giant robot i think it was a

1757

01:01:49,430 --> 01:01:47,599

robot yeah they abducted them sort of

1758

01:01:50,630 --> 01:01:49,440

maybe like a robot or something like

1759

01:01:52,710 --> 01:01:50,640

that

1760

01:01:55,029 --> 01:01:52,720

and then you have all these other types

1761

01:01:56,150 --> 01:01:55,039

of beings that are seen in around the

1762

01:01:58,549 --> 01:01:56,160

world that

1763

01:01:59,910 --> 01:01:58,559

that are kind of like very unique or

1764

01:02:02,230 --> 01:01:59,920

have characteristics some were like

1765

01:02:06,470 --> 01:02:02,240

little dwarves uh if you take a look at

1766

01:02:08,309 --> 01:02:06,480

the the tom reed uh i think in matt read

1767

01:02:10,390 --> 01:02:08,319

uh cases up

1768

01:02:12,470 --> 01:02:10,400

uh you'll you'll see that that in that

1769

01:02:14,230 --> 01:02:12,480

case where there was actually some like

1770

01:02:16,230 --> 01:02:14,240

physical trace evidence that was also

1771

01:02:18,309 --> 01:02:16,240

supporting it that these are looking

1772

01:02:20,789 --> 01:02:18,319

like more like the typical

1773

01:02:23,349 --> 01:02:20,799

reptilians they didn't have an

1774

01:02:26,789 --> 01:02:23,359

appearance very much like at all like

1775

01:02:28,069 --> 01:02:26,799

with uh human uh but anyway i guess what

1776

01:02:31,349 --> 01:02:28,079

i'm trying to get at is that there's all

1777

01:02:34,549 --> 01:02:31,359

these variations of beings that make you

1778

01:02:37,349 --> 01:02:34,559

like tend to like wonder like well what

1779

01:02:39,430 --> 01:02:37,359

are we a zoo i mean is this is this a

1780

01:02:41,589 --> 01:02:39,440

visitation this is the natural park

1781

01:02:43,349 --> 01:02:41,599

where i come to do it and they're coming

1782

01:02:45,589 --> 01:02:43,359

from multiple sources

1783

01:02:47,829 --> 01:02:45,599

uh you know is it not just from the

1784

01:02:48,870 --> 01:02:47,839

future is it from somewhere else where

1785

01:02:51,910 --> 01:02:48,880

there's

1786

01:02:54,630 --> 01:02:51,920

so is any one hypothesis necessarily

1787

01:02:57,829 --> 01:02:54,640

proven no there's multiple hypotheses

1788

01:02:59,829 --> 01:02:57,839

and maybe it's many origins

1789

01:03:01,270 --> 01:02:59,839

i guess is what i'm trying to get at but

1790

01:03:02,789 --> 01:03:01,280

it just seems that there's all these

1791

01:03:04,870 --> 01:03:02,799

variations but

1792

01:03:07,190 --> 01:03:04,880

when you look at the actual object

1793

01:03:09,190 --> 01:03:07,200

maneuverability like the ufo or

1794

01:03:11,430 --> 01:03:09,200

something how it maneuvers

1795

01:03:14,789 --> 01:03:11,440

that remains kind of consistent with all

1796

01:03:17,029 --> 01:03:14,799

of them regardless of the size

1797

01:03:19,829 --> 01:03:17,039

you can have a an object that's reported

1798

01:03:21,349 --> 01:03:19,839

the size of a grapefruit that's hovering

1799

01:03:23,430 --> 01:03:21,359

and then shoots off at an incredible

1800

01:03:25,589 --> 01:03:23,440

rate of speed at the same time you can

1801
01:03:27,430 --> 01:03:25,599
have something that's huge like the

1802
01:03:29,750 --> 01:03:27,440
alaskan uh

1803
01:03:31,670 --> 01:03:29,760
sighting where it's also doing a very

1804
01:03:34,069 --> 01:03:31,680
kind of similar motion or something of

1805
01:03:36,390 --> 01:03:34,079
that nature so and they all typically

1806
01:03:38,789 --> 01:03:36,400
that's pretty consistent so how do you

1807
01:03:40,549 --> 01:03:38,799
explain the different in terms of the

1808
01:03:42,390 --> 01:03:40,559
beings

1809
01:03:44,630 --> 01:03:42,400
well i'd like to point out real quick

1810
01:03:46,630 --> 01:03:44,640
that and and there's always problems

1811
01:03:48,470 --> 01:03:46,640
with survey data but the dr edgar

1812
01:03:50,390 --> 01:03:48,480
mitchell foundation free study did a

1813
01:03:52,549 --> 01:03:50,400

massive and it's continuing they're up

1814

01:03:55,430 --> 01:03:52,559

to over five thousand

1815

01:03:57,510 --> 01:03:55,440

uh abductees and contactees but they

1816

01:03:59,430 --> 01:03:57,520

they showed statistically at least in

1817

01:04:01,829 --> 01:03:59,440

analyzing what people report that those

1818

01:04:03,750 --> 01:04:01,839

who witness these beings the majority

1819

01:04:05,910 --> 01:04:03,760

were described as human

1820

01:04:08,390 --> 01:04:05,920

not not just humanoid or human-like but

1821

01:04:10,470 --> 01:04:08,400

human exactly like us after that was the

1822

01:04:12,549 --> 01:04:10,480

short graze and then the tall graze and

1823

01:04:14,309 --> 01:04:12,559

only about five percent of all of these

1824

01:04:16,390 --> 01:04:14,319

abductees reported seen something like a

1825

01:04:18,710 --> 01:04:16,400

reptilian or a mantid or some sort of

1826

01:04:20,870 --> 01:04:18,720

insect so i mean if if we can consider

1827

01:04:22,950 --> 01:04:20,880

survey data in this in in a survey of

1828

01:04:25,109 --> 01:04:22,960

abductees and again it's a little more

1829

01:04:27,029 --> 01:04:25,119

tenuous because of their experiences and

1830

01:04:29,029 --> 01:04:27,039

how they remember it but the fact that

1831

01:04:30,470 --> 01:04:29,039

the majority are described as human

1832

01:04:32,950 --> 01:04:30,480

despite you're always going to have

1833

01:04:35,430 --> 01:04:32,960

outliers in any data set and it almost

1834

01:04:38,069 --> 01:04:35,440

seems like these mothman dogman type

1835

01:04:39,670 --> 01:04:38,079

creatures are very very rare examples

1836

01:04:41,829 --> 01:04:39,680

which could be attributed to something

1837

01:04:44,549 --> 01:04:41,839

entirely different but and the ones seen

1838

01:04:46,630 --> 01:04:44,559

in association with the craft especially

1839

01:04:47,990 --> 01:04:46,640

are almost ubiquitously described as

1840

01:04:50,470 --> 01:04:48,000

human so i think there is more

1841

01:04:52,470 --> 01:04:50,480

consistency in the craft and the beans

1842

01:04:56,390 --> 01:04:52,480

than than maybe what what you're giving

1843

01:04:59,589 --> 01:04:56,400

it credit for how uh so prior to the

1844

01:05:01,510 --> 01:04:59,599

betty and barney hill case

1845

01:05:04,549 --> 01:05:01,520

i rarely have ever heard anything that

1846

01:05:07,029 --> 01:05:04,559

looked like the the grays at all

1847

01:05:09,349 --> 01:05:07,039

described in any case that i went to or

1848

01:05:11,430 --> 01:05:09,359

any case that i ever read

1849

01:05:13,990 --> 01:05:11,440

yeah antonio vs boas was kind of a

1850

01:05:15,829 --> 01:05:14,000

hybrid yeah it was okay

1851

01:05:18,630 --> 01:05:15,839

right yeah that's that's the one case

1852

01:05:20,309 --> 01:05:18,640

that's prior that kind of sticks out but

1853

01:05:22,710 --> 01:05:20,319

but my point is i guess i'm trying to

1854

01:05:24,470 --> 01:05:22,720

say is that it's seem like you know and

1855

01:05:26,150 --> 01:05:24,480

this is part of how myth creations

1856

01:05:28,230 --> 01:05:26,160

happen

1857

01:05:30,069 --> 01:05:28,240

you know people see something they watch

1858

01:05:32,470 --> 01:05:30,079

something and then it becomes part of

1859

01:05:35,029 --> 01:05:32,480

the culture to where that they see them

1860

01:05:37,190 --> 01:05:35,039

too how much has that come into play and

1861

01:05:40,309 --> 01:05:37,200

all these cases generally showing that

1862

01:05:41,750 --> 01:05:40,319

type of thing from like about 1961 going

1863

01:05:43,670 --> 01:05:41,760

on

1864

01:05:45,349 --> 01:05:43,680

and so i guess what i'm trying to get at

1865

01:05:47,829 --> 01:05:45,359

is you know if i

1866

01:05:50,549 --> 01:05:47,839

have a great case like betty and barney

1867

01:05:52,710 --> 01:05:50,559

hill seeing these things how much does

1868

01:05:54,470 --> 01:05:52,720

that plant into the consciousness mind

1869

01:05:55,829 --> 01:05:54,480

that these are necessarily the same

1870

01:05:57,430 --> 01:05:55,839

things and i'm going to report it that

1871

01:06:00,150 --> 01:05:57,440

way yeah and that's one of the main

1872

01:06:02,710 --> 01:06:00,160

reasons i tried to get pre-1947 pre

1873

01:06:04,549 --> 01:06:02,720

betty and barney hill cases because yeah

1874

01:06:08,230 --> 01:06:04,559

you have a collective consciousness that

1875

01:06:10,710 --> 01:06:08,240

can be affected by these things and and

1876

01:06:11,670 --> 01:06:10,720

i address the psychosocial hypothesis

1877

01:06:13,670 --> 01:06:11,680

with the fact that we try to

1878

01:06:15,349 --> 01:06:13,680

anthropomorphize things it's natural for

1879

01:06:17,430 --> 01:06:15,359

us to do that are we imposing a human

1880

01:06:19,109 --> 01:06:17,440

form on these things because we're human

1881

01:06:21,270 --> 01:06:19,119

and it's understandable to us regardless

1882

01:06:22,630 --> 01:06:21,280

of where or when they come from so we

1883

01:06:24,630 --> 01:06:22,640

definitely have to acknowledge that and

1884

01:06:26,069 --> 01:06:24,640

it's what i keep coming back to is what

1885

01:06:28,309 --> 01:06:26,079

is evidence how

1886

01:06:30,230 --> 01:06:28,319

how can we understand these things and

1887

01:06:31,670 --> 01:06:30,240

we've just dismissed it for so long but

1888

01:06:33,670 --> 01:06:31,680

all these people are having such

1889

01:06:35,990 --> 01:06:33,680

consistent experiences

1890

01:06:37,910 --> 01:06:36,000

and i i didn't select any case for any

1891

01:06:40,150 --> 01:06:37,920

one particular reason i was just diving

1892

01:06:42,069 --> 01:06:40,160

in to find the most vetted the most the

1893

01:06:43,910 --> 01:06:42,079

ones that have like travis walton where

1894

01:06:44,950 --> 01:06:43,920

people saw him taken he's gone the

1895

01:06:46,630 --> 01:06:44,960

police

1896

01:06:48,390 --> 01:06:46,640

come up they're looking where we can

1897

01:06:49,589 --> 01:06:48,400

look at these facts associated with the

1898

01:06:52,069 --> 01:06:49,599

disappearance and understand how

1899

01:06:53,670 --> 01:06:52,079

anomalous it is but then also focus on

1900

01:06:55,109 --> 01:06:53,680

the way it happened what he described

1901

01:06:57,510 --> 01:06:55,119

seeing what other people described

1902

01:06:59,109 --> 01:06:57,520

seeing and and try to put together this

1903

01:07:02,309 --> 01:06:59,119

this massive

1904

01:07:03,589 --> 01:07:02,319

uh amount of observational data that we

1905

01:07:05,349 --> 01:07:03,599

can then go through and look for

1906

01:07:07,109 --> 01:07:05,359

patterns in because there are patterns

1907

01:07:09,109 --> 01:07:07,119

there's so much consistency across these

1908

01:07:10,349 --> 01:07:09,119

accounts regardless of when they happen

1909

01:07:12,390 --> 01:07:10,359

post

1910

01:07:14,470 --> 01:07:12,400

1947 pre

1911

01:07:16,549 --> 01:07:14,480

betty and barney hill there's so much

1912

01:07:18,069 --> 01:07:16,559

consistency and i think i think it needs

1913

01:07:19,750 --> 01:07:18,079

to be a part of the conversation to be

1914

01:07:20,950 --> 01:07:19,760

honest

1915

01:07:22,549 --> 01:07:20,960

excuse me

1916

01:07:24,069 --> 01:07:22,559

yeah i thought that you know like for me

1917

01:07:25,670 --> 01:07:24,079

it was always when i got started with

1918

01:07:26,789 --> 01:07:25,680

this whole thing it's like it was always

1919

01:07:28,630 --> 01:07:26,799

curious to

1920

01:07:30,630 --> 01:07:28,640

to hear that other countries were

1921

01:07:33,430 --> 01:07:30,640

reporting the same things you know and

1922

01:07:35,430 --> 01:07:33,440

so like you know uh you had the reverend

1923

01:07:37,270 --> 01:07:35,440

gill and papua new guinea that was

1924

01:07:39,829 --> 01:07:37,280

talking about seeing an object and even

1925

01:07:41,990 --> 01:07:39,839

waving at beings and they waved back on

1926

01:07:43,910 --> 01:07:42,000

the crap right so animations of that are

1927

01:07:44,789 --> 01:07:43,920

hilarious too or he's way back with this

1928

01:07:47,190 --> 01:07:44,799

guy

1929

01:07:49,270 --> 01:07:47,200

yeah exactly you know but i i thought it

1930

01:07:51,589 --> 01:07:49,280

was interesting in the context that for

1931

01:07:54,150 --> 01:07:51,599

me it just it told me that that look

1932

01:07:57,029 --> 01:07:54,160

it's just not a us phenomena it's it

1933

01:07:58,549 --> 01:07:57,039

goes beyond the us it's in other places

1934

01:08:00,870 --> 01:07:58,559

and there seems to be this inherent

1935

01:08:02,950 --> 01:08:00,880

consistency even with people who don't

1936

01:08:04,549 --> 01:08:02,960

have tvs can't watch the science fiction

1937

01:08:06,630 --> 01:08:04,559

shows that i'm doing and this is a

1938

01:08:09,349 --> 01:08:06,640

tribal area and they're describing the

1939

01:08:11,270 --> 01:08:09,359

same type of thing right so absolutely

1940

01:08:13,990 --> 01:08:11,280

yeah i recently went on a two-week trip

1941

01:08:15,750 --> 01:08:14,000

to zimbabwe

1942

01:08:17,430 --> 01:08:15,760

yeah we did an investigation in colombia

1943

01:08:18,789 --> 01:08:17,440

recently and it was it's ingrained in

1944

01:08:20,470 --> 01:08:18,799

the society

1945

01:08:22,309 --> 01:08:20,480

everybody wants to talk about ufos

1946

01:08:24,149 --> 01:08:22,319

there's murals and pictures everywhere

1947

01:08:26,390 --> 01:08:24,159

it's just completely different out there

1948

01:08:27,910 --> 01:08:26,400

so it's funny how it does in certain

1949

01:08:30,709 --> 01:08:27,920

cultures and countries and things it's

1950

01:08:33,030 --> 01:08:30,719

just it's the norm there's no stigma

1951

01:08:34,789 --> 01:08:33,040

there's no taboo um

1952

01:08:36,870 --> 01:08:34,799

so so yeah um

1953

01:08:38,950 --> 01:08:36,880

one question that really i i keep seeing

1954

01:08:41,269 --> 01:08:38,960

this statement from people that and it

1955

01:08:42,789 --> 01:08:41,279

seems to it bothers me a bit and that is

1956

01:08:45,349 --> 01:08:42,799

if they were a threat

1957

01:08:47,430 --> 01:08:45,359

they would have done something by now

1958

01:08:49,110 --> 01:08:47,440

which i i disagree with

1959

01:08:51,269 --> 01:08:49,120

because that's just us humanizing it

1960

01:08:52,630 --> 01:08:51,279

well they've been around for a long time

1961

01:08:54,149 --> 01:08:52,640

you know something would have happened

1962

01:08:55,829 --> 01:08:54,159

what do you guys think about a statement

1963

01:08:57,430 --> 01:08:55,839

like that

1964

01:08:58,630 --> 01:08:57,440

what is a long time

1965

01:09:00,950 --> 01:08:58,640

exactly so

1966

01:09:03,669 --> 01:09:00,960

if if you look at um

1967

01:09:06,309 --> 01:09:03,679

my colleague professor kevin knuth's

1968

01:09:10,070 --> 01:09:06,319

talk from scu i don't remember which one

1969

01:09:11,030 --> 01:09:10,080

1919 or 2020 hybrid or 21 but

1970

01:09:13,430 --> 01:09:11,040

um

1971

01:09:15,430 --> 01:09:13,440

relativistic time dilation means

1972

01:09:17,189 --> 01:09:15,440

that um if you've got

1973

01:09:18,309 --> 01:09:17,199

beings that can travel at relativistic

1974

01:09:22,070 --> 01:09:18,319

speeds

1975

01:09:24,229 --> 01:09:22,080

it could have been a few months ago that

1976

01:09:26,709 --> 01:09:24,239

they were in you know watching the map

1977

01:09:29,590 --> 01:09:26,719

you know watching the the woolly mammoth

1978

01:09:31,189 --> 01:09:29,600

you know and then the stone age and then

1979

01:09:33,189 --> 01:09:31,199

it could or it could it could even be

1980

01:09:35,189 --> 01:09:33,199

five minutes so when people talking

1981

01:09:36,789 --> 01:09:35,199

about being you know visited by beings

1982

01:09:39,349 --> 01:09:36,799

the scary thing is

1983

01:09:42,149 --> 01:09:39,359

it could be the same ones because of

1984

01:09:44,229 --> 01:09:42,159

relativistic time dilation so the

1985

01:09:47,349 --> 01:09:44,239

what does that mean oh but we've been

1986

01:09:48,550 --> 01:09:47,359

seeing them a long time that would be

1987

01:09:50,470 --> 01:09:48,560

like saying

1988

01:09:53,030 --> 01:09:50,480

so i'm i am partially agreeing with you

1989

01:09:55,189 --> 01:09:53,040

i want to be optimistic and positive but

1990

01:09:56,950 --> 01:09:55,199

your point is very valid because that

1991

01:09:59,189 --> 01:09:56,960

would be like the ants saying well those

1992

01:10:01,270 --> 01:09:59,199

boot didn't that boot didn't crush me

1993

01:10:03,110 --> 01:10:01,280

the last 10 times or 100 times that boot

1994

01:10:05,510 --> 01:10:03,120

walk by that means that boot will never

1995

01:10:06,790 --> 01:10:05,520

crush me oh crap and then i'm an answer

1996

01:10:10,070 --> 01:10:06,800

not even squish

1997

01:10:12,149 --> 01:10:10,080

so so i i yeah i i think that

1998

01:10:14,470 --> 01:10:12,159

that might be even though like i said i

1999

01:10:16,870 --> 01:10:14,480

tend to be more positive and optimistic

2000

01:10:18,630 --> 01:10:16,880

i also think we shouldn't be naive

2001
01:10:20,310 --> 01:10:18,640
right look at what stephen hawking said

2002
01:10:22,390 --> 01:10:20,320
for example about you know how things

2003
01:10:23,910 --> 01:10:22,400
didn't go too well for the aztecs and

2004
01:10:25,510 --> 01:10:23,920
the mayans and things like that these

2005
01:10:28,310 --> 01:10:25,520
are valid

2006
01:10:30,870 --> 01:10:28,320
considerations definitely valid points

2007
01:10:34,070 --> 01:10:30,880
we should not be comfy cozy

2008
01:10:35,990 --> 01:10:34,080
um and and naive

2009
01:10:38,550 --> 01:10:36,000
let me give you another

2010
01:10:40,870 --> 01:10:38,560
reframe on on that too because i it

2011
01:10:43,350 --> 01:10:40,880
might be uh you know just to

2012
01:10:45,189 --> 01:10:43,360
argue that a little bit um if you take a

2013
01:10:46,630 --> 01:10:45,199

look at the clarisse incident in in

2014

01:10:48,630 --> 01:10:46,640

brazil

2015

01:10:50,310 --> 01:10:48,640

would you describe that as and though

2016

01:10:52,070 --> 01:10:50,320

these people were being like attacked by

2017

01:10:55,030 --> 01:10:52,080

these things would you say that that's

2018

01:10:55,830 --> 01:10:55,040

necessarily friendly i mean and so i

2019

01:10:57,590 --> 01:10:55,840

mean

2020

01:10:58,630 --> 01:10:57,600

part of what we say is you know they're

2021

01:11:00,229 --> 01:10:58,640

not going to hurt us they're not going

2022

01:11:01,590 --> 01:11:00,239

to do that well these people would say

2023

01:11:03,189 --> 01:11:01,600

that definitely that they're out to hurt

2024

01:11:05,510 --> 01:11:03,199

us right i mean because that's that's

2025

01:11:07,189 --> 01:11:05,520

their experience right whatever that was

2026

01:11:08,790 --> 01:11:07,199

that was going on but why is it black

2027

01:11:10,470 --> 01:11:08,800

and white it's like you were earlier you

2028

01:11:12,070 --> 01:11:10,480

were saying how there could be if there

2029

01:11:13,350 --> 01:11:12,080

are intelligent races if they exist

2030

01:11:14,950 --> 01:11:13,360

there could be different species there

2031

01:11:16,550 --> 01:11:14,960

could be and

2032

01:11:18,550 --> 01:11:16,560

travis taylor gave a talk on this at the

2033

01:11:20,709 --> 01:11:18,560

very first conference right in 2019.

2034

01:11:21,510 --> 01:11:20,719

travis taylor's point was what if

2035

01:11:23,510 --> 01:11:21,520

they're

2036

01:11:25,669 --> 01:11:23,520

what if it's random and 50

2037

01:11:27,830 --> 01:11:25,679

evil and 50 percent bad if their

2038

01:11:30,870 --> 01:11:27,840

intelligence is out there i think that's

2039

01:11:34,310 --> 01:11:30,880

a very fair point is why do we have to

2040

01:11:36,709 --> 01:11:34,320

assume that technological superiority

2041

01:11:39,510 --> 01:11:36,719

automatically means moral moral

2042

01:11:40,390 --> 01:11:39,520

superiority and i i don't think that's

2043

01:11:41,990 --> 01:11:40,400

the case

2044

01:11:44,470 --> 01:11:42,000

just look at humanity with nuclear

2045

01:11:46,870 --> 01:11:44,480

weapons i really don't think i think

2046

01:11:48,709 --> 01:11:46,880

that one can be technologically superior

2047

01:11:50,470 --> 01:11:48,719

but still evil but i don't think it's

2048

01:11:51,669 --> 01:11:50,480

black and white because we could be

2049

01:11:55,030 --> 01:11:51,679

different dealing with different

2050

01:11:57,030 --> 01:11:55,040

phenomena we could even if the eth

2051

01:11:59,189 --> 01:11:57,040

hypothesis is true could be different

2052

01:12:01,189 --> 01:11:59,199

species i mean there's there's many

2053

01:12:02,790 --> 01:12:01,199

explanations there i guess that that's

2054

01:12:04,630 --> 01:12:02,800

that was that's why i was going to go

2055

01:12:06,390 --> 01:12:04,640

with my point i would say just merely

2056

01:12:08,709 --> 01:12:06,400

pointing out the fact to the people in

2057

01:12:10,709 --> 01:12:08,719

in brazil who experienced that their

2058

01:12:12,390 --> 01:12:10,719

perspective was that this was evil what

2059

01:12:14,310 --> 01:12:12,400

about the people that are being picked

2060

01:12:16,550 --> 01:12:14,320

up uh you know allegedly for the

2061

01:12:18,149 --> 01:12:16,560

abduction cases stuff like that and

2062

01:12:20,229 --> 01:12:18,159

being you know checked on would you say

2063

01:12:21,750 --> 01:12:20,239

that that's a very friendly thing that

2064

01:12:23,430 --> 01:12:21,760

you know going against your will and

2065

01:12:26,149 --> 01:12:23,440

taking and dragging you out of your home

2066

01:12:28,870 --> 01:12:26,159

and suddenly putting and allegedly doing

2067

01:12:33,590 --> 01:12:31,750

so if that's going again though if we

2068

01:12:37,910 --> 01:12:33,600

you know it is if we if

2069

01:12:42,229 --> 01:12:40,070

yeah yeah

2070

01:12:44,310 --> 01:12:42,239

if we can if we can trust the survey

2071

01:12:46,790 --> 01:12:44,320

data from from the free study the dr

2072

01:12:48,709 --> 01:12:46,800

edgar mitchell foundation study 85

2073

01:12:50,870 --> 01:12:48,719

of those who have an abduction

2074

01:12:52,630 --> 01:12:50,880

experience

2075

01:12:53,750 --> 01:12:52,640

stated that it was either benign or

2076

01:12:55,590 --> 01:12:53,760

positive

2077

01:12:57,430 --> 01:12:55,600

uh if the ones that they were

2078

01:12:59,350 --> 01:12:57,440

interacting with were more human-like it

2079

01:13:01,189 --> 01:12:59,360

was only five percent that said they had

2080

01:13:02,790 --> 01:13:01,199

a negative experience so that that might

2081

01:13:04,229 --> 01:13:02,800

come back to your point too about there

2082

01:13:06,470 --> 01:13:04,239

being different types different

2083

01:13:09,030 --> 01:13:06,480

varieties whatever you want to call them

2084

01:13:10,709 --> 01:13:09,040

um who maybe don't have

2085

01:13:13,750 --> 01:13:10,719

of that same connectors for whatever

2086

01:13:15,270 --> 01:13:13,760

reason i'm not necessarily

2087

01:13:17,750 --> 01:13:15,280

just saying if they're us from elect

2088

01:13:19,669 --> 01:13:17,760

more humanity being shown from ones that

2089

01:13:21,510 --> 01:13:19,679

are more like us especially if we evolve

2090

01:13:23,270 --> 01:13:21,520

our consciousness if we evolve our sense

2091

01:13:24,390 --> 01:13:23,280

of empathy which i think is a very

2092

01:13:26,310 --> 01:13:24,400

commonly reported thing in these

2093

01:13:28,070 --> 01:13:26,320

abduction accounts as they feel a deep

2094

01:13:29,669 --> 01:13:28,080

sense of love and empathy even though

2095

01:13:31,750 --> 01:13:29,679

they're being probed in their rectums

2096

01:13:33,430 --> 01:13:31,760

and having you know eggs and sperm

2097

01:13:35,270 --> 01:13:33,440

extracted which is a very invasive

2098

01:13:37,270 --> 01:13:35,280

procedure it's it's a kidnapping it's

2099

01:13:39,510 --> 01:13:37,280

rape in some cases there's ethical

2100

01:13:41,350 --> 01:13:39,520

issues involved with this but people

2101
01:13:43,270 --> 01:13:41,360
still come away with it more often than

2102
01:13:44,709 --> 01:13:43,280
not feeling like they're contributing to

2103
01:13:46,390 --> 01:13:44,719
something bigger than themselves they're

2104
01:13:47,510 --> 01:13:46,400
contributing to some greater good that

2105
01:13:49,669 --> 01:13:47,520
they feel

2106
01:13:51,110 --> 01:13:49,679
uh almost proud to be a part of in many

2107
01:13:52,470 --> 01:13:51,120
cases and it kind of comes down to the

2108
01:13:54,149 --> 01:13:52,480
difference between a contactee and an

2109
01:13:55,669 --> 01:13:54,159
abductee at that point

2110
01:13:57,990 --> 01:13:55,679
but but i think it's important to

2111
01:13:59,669 --> 01:13:58,000
acknowledge those cases where you do

2112
01:14:01,990 --> 01:13:59,679
have and especially statistically if we

2113
01:14:03,830 --> 01:14:02,000

can trust the survey data where the

2114

01:14:06,790 --> 01:14:03,840

statistics show that people are

2115

01:14:08,310 --> 01:14:06,800

genuinely okay with or really enjoy

2116

01:14:10,550 --> 01:14:08,320

their experiences whitley strieber is

2117

01:14:12,630 --> 01:14:10,560

one of the best examples he came to

2118

01:14:17,750 --> 01:14:12,640

crave this interaction with these people

2119

01:14:22,550 --> 01:14:19,750

yeah and i i think i don't know if i

2120

01:14:24,229 --> 01:14:22,560

caught it like but like again activating

2121

01:14:25,830 --> 01:14:24,239

missiles or deactivating missiles that

2122

01:14:28,470 --> 01:14:25,840

you know is that good bad

2123

01:14:30,390 --> 01:14:28,480

do we really know uh and then there's

2124

01:14:32,950 --> 01:14:30,400

the problem also the fact that there are

2125

01:14:34,630 --> 01:14:32,960

these phenomena that uh you know like

2126
01:14:36,870 --> 01:14:34,640
you know for example

2127
01:14:39,270 --> 01:14:36,880
on the military side anyway we have to

2128
01:14:40,709 --> 01:14:39,280
look at defense and we have to perceive

2129
01:14:41,990 --> 01:14:40,719
it being a threat because we don't

2130
01:14:43,350 --> 01:14:42,000
understand what it is and where it's

2131
01:14:45,350 --> 01:14:43,360
from and everything else and what it's

2132
01:14:46,229 --> 01:14:45,360
doing we don't know what its intent is

2133
01:14:48,550 --> 01:14:46,239
right

2134
01:14:50,630 --> 01:14:48,560
so when you have these drones that are

2135
01:14:51,669 --> 01:14:50,640
plaguing these ships these military

2136
01:14:53,350 --> 01:14:51,679
ships

2137
01:14:55,030 --> 01:14:53,360
and you know they're they're spending

2138
01:14:57,750 --> 01:14:55,040

time and following them and everything

2139

01:15:01,030 --> 01:14:57,760

else you know is that a threat or is

2140

01:15:03,110 --> 01:15:01,040

that not a threat and you know is and do

2141

01:15:05,030 --> 01:15:03,120

we really know what the origin is is

2142

01:15:06,390 --> 01:15:05,040

that really the russians or the chinese

2143

01:15:08,310 --> 01:15:06,400

that are doing something and they've

2144

01:15:10,550 --> 01:15:08,320

just advanced the technology

2145

01:15:12,070 --> 01:15:10,560

so you know from a military standpoint

2146

01:15:14,950 --> 01:15:12,080

in the defense standpoint you have to

2147

01:15:17,270 --> 01:15:14,960

treat it as being a critical threat

2148

01:15:19,750 --> 01:15:17,280

and then determine from your analysis or

2149

01:15:22,470 --> 01:15:19,760

you know whatever that it is whether it

2150

01:15:25,189 --> 01:15:22,480

could be potentially uh this was maybe a

2151

01:15:28,550 --> 01:15:25,199

uap or this is really a drone from

2152

01:15:30,550 --> 01:15:28,560

another country right so uh it's one of

2153

01:15:32,070 --> 01:15:30,560

those like things you have to consider

2154

01:15:33,830 --> 01:15:32,080

and look at it you know from that

2155

01:15:35,830 --> 01:15:33,840

standpoint as well right well the drone

2156

01:15:37,590 --> 01:15:35,840

from the other country thinks so this

2157

01:15:39,350 --> 01:15:37,600

really irks me and this will be

2158

01:15:40,709 --> 01:15:39,360

something you probably notice about the

2159

01:15:43,030 --> 01:15:40,719

this you'll probably agree with me rich

2160

01:15:46,790 --> 01:15:43,040

about the the hearing is we want to

2161

01:15:49,270 --> 01:15:46,800

pretend ours no cases before 2004 right

2162

01:15:50,870 --> 01:15:49,280

and and i i i don't want to get into a

2163

01:15:52,709 --> 01:15:50,880

rabbit hole of what the motive could be

2164

01:15:54,950 --> 01:15:52,719

for that but i wanted to point out that

2165

01:15:56,709 --> 01:15:54,960

in the movie a tear in the sky there's a

2166

01:15:59,750 --> 01:15:56,719

scene where i'm sitting with travis and

2167

01:16:02,630 --> 01:15:59,760

kevin and talking and i point out

2168

01:16:03,910 --> 01:16:02,640

that there are there there were these um

2169

01:16:04,950 --> 01:16:03,920

you'll probably notice documents you

2170

01:16:07,030 --> 01:16:04,960

know i'm talking about this was in the

2171

01:16:09,669 --> 01:16:07,040

history channel show on identify talking

2172

01:16:11,669 --> 01:16:09,679

about flying white butane tanks in the

2173

01:16:13,669 --> 01:16:11,679

1940s 50s

2174

01:16:15,750 --> 01:16:13,679

ah that sounds a lot like a tic tac to

2175

01:16:17,590 --> 01:16:15,760

me a 40 foot white butane tank that

2176

01:16:20,310 --> 01:16:17,600

sounds like exactly the same thing

2177

01:16:22,310 --> 01:16:20,320

almost and that and let's see in russia

2178

01:16:25,270 --> 01:16:22,320

and china let's see russia

2179

01:16:27,430 --> 01:16:25,280

just was recovering from world war ii

2180

01:16:29,990 --> 01:16:27,440

china was recovering from his world war

2181

01:16:31,750 --> 01:16:30,000

ii and a civil war communist nationalist

2182

01:16:33,990 --> 01:16:31,760

oh but i'm sure they had you know

2183

01:16:35,510 --> 01:16:34,000

breakthrough attack in you know why why

2184

01:16:38,550 --> 01:16:35,520

didn't they use it against the nazis in

2185

01:16:41,350 --> 01:16:38,560

japanese so like the absurdity of the oh

2186

01:16:43,189 --> 01:16:41,360

it's russia china if that's true why the

2187

01:16:47,189 --> 01:16:43,199

hell are there cases from the 40s and

2188

01:16:48,950 --> 01:16:47,199

50s describing what sounds like um the

2189

01:16:50,870 --> 01:16:48,960

nimitz encounter you know how do you

2190

01:16:53,030 --> 01:16:50,880

explain that how do you how does that i

2191

01:16:55,430 --> 01:16:53,040

can yeah let me do a counter argument

2192

01:16:56,470 --> 01:16:55,440

with you okay if there's any truth to a

2193

01:17:00,229 --> 01:16:56,480

crash

2194

01:17:01,750 --> 01:17:00,239

and other countries have had them

2195

01:17:03,430 --> 01:17:01,760

then there's no reason why they couldn't

2196

01:17:05,270 --> 01:17:03,440

have had a breakthrough technology in

2197

01:17:07,590 --> 01:17:05,280

terms of re uh you know using the

2198

01:17:08,709 --> 01:17:07,600

material that they got from the crash or

2199

01:17:10,950 --> 01:17:08,719

doing something like that with

2200

01:17:13,189 --> 01:17:10,960

re-engineering it so they might not be

2201
01:17:15,430 --> 01:17:13,199
going on a full-scale tic deck but maybe

2202
01:17:16,470 --> 01:17:15,440
they're using some of this as drones

2203
01:17:18,709 --> 01:17:16,480
technology

2204
01:17:20,950 --> 01:17:18,719
and by the way you know

2205
01:17:23,189 --> 01:17:20,960
i'm right now in the process and i have

2206
01:17:24,950 --> 01:17:23,199
a project of the army where i'm putting

2207
01:17:27,590 --> 01:17:24,960
in uh we're putting in at the army

2208
01:17:30,229 --> 01:17:27,600
material command and throughout the dod

2209
01:17:31,990 --> 01:17:30,239
drone killing devices and we have we're

2210
01:17:34,470 --> 01:17:32,000
putting in and spending a lot of money

2211
01:17:37,030 --> 01:17:34,480
at all of our installations our ranges

2212
01:17:39,430 --> 01:17:37,040
and all of our maybe like the ships to

2213
01:17:42,070 --> 01:17:39,440

be able to do that because we know that

2214

01:17:44,630 --> 01:17:42,080

drones are advancing in terms of their

2215

01:17:47,430 --> 01:17:44,640

technical understanding and abilities uh

2216

01:17:49,189 --> 01:17:47,440

across the world and

2217

01:17:51,830 --> 01:17:49,199

so i'm just going to say that we have to

2218

01:17:53,750 --> 01:17:51,840

play you have to determine which is

2219

01:17:55,750 --> 01:17:53,760

which is that really the the russian

2220

01:17:57,910 --> 01:17:55,760

drone and and not

2221

01:17:59,110 --> 01:17:57,920

i'm not talking about tic tacs yeah no i

2222

01:18:00,229 --> 01:17:59,120

know what you mean but look i'm

2223

01:18:01,990 --> 01:18:00,239

skeptical in the whole reverse

2224

01:18:03,990 --> 01:18:02,000

engineering angle that ties into we're

2225

01:18:05,910 --> 01:18:04,000

talking about earlier in my opinion if

2226

01:18:08,630 --> 01:18:05,920

we have stuff and like i said i'm not at

2227

01:18:10,470 --> 01:18:08,640

all convinced we have stuff if we do

2228

01:18:12,229 --> 01:18:10,480

we don't have the faintest idea how to

2229

01:18:13,830 --> 01:18:12,239

reverse engineer it it would be like

2230

01:18:16,950 --> 01:18:13,840

giving a laptop

2231

01:18:19,270 --> 01:18:16,960

to michael faraday in the 1890s the one

2232

01:18:20,870 --> 01:18:19,280

of the most brilliant scientists or you

2233

01:18:22,709 --> 01:18:20,880

know james clerk maxwell you know

2234

01:18:24,630 --> 01:18:22,719

maxwell's equations and be like hey

2235

01:18:26,149 --> 01:18:24,640

figure this out they wouldn't have they

2236

01:18:27,669 --> 01:18:26,159

could spend the rest of their lives on

2237

01:18:30,070 --> 01:18:27,679

it after the battery died they would

2238

01:18:30,950 --> 01:18:30,080

have no idea and to corroborate what i'm

2239

01:18:32,950 --> 01:18:30,960

saying

2240

01:18:34,229 --> 01:18:32,960

kevin has talked to i don't know if it

2241

01:18:36,229 --> 01:18:34,239

was a private conversation so i won't

2242

01:18:39,030 --> 01:18:36,239

say he who he talked to but famous

2243

01:18:41,030 --> 01:18:39,040

person at seu kevin confronted someone

2244

01:18:43,110 --> 01:18:41,040

on this who is alleged to be working

2245

01:18:45,030 --> 01:18:43,120

with parts and be like oh you know i

2246

01:18:46,550 --> 01:18:45,040

think what if this part is that part

2247

01:18:48,950 --> 01:18:46,560

this is the computer and this is the

2248

01:18:50,550 --> 01:18:48,960

navigation and this in this scientist

2249

01:18:52,149 --> 01:18:50,560

said to kevin

2250

01:18:54,149 --> 01:18:52,159

kevin we wouldn't even know the

2251
01:18:56,149 --> 01:18:54,159
difference between the the navigational

2252
01:18:57,990 --> 01:18:56,159
computer and a sandwich

2253
01:18:59,590 --> 01:18:58,000
and so this was even admitted by the

2254
01:19:00,870 --> 01:18:59,600
people who claimed to be reverse

2255
01:19:02,149 --> 01:19:00,880
engineering for the government even

2256
01:19:04,709 --> 01:19:02,159
admitted that

2257
01:19:07,669 --> 01:19:04,719
to uh to to have to kevin knew saying

2258
01:19:10,390 --> 01:19:07,679
yeah it's we have no clue

2259
01:19:12,550 --> 01:19:10,400
no clue like i said laptop imagine

2260
01:19:15,030 --> 01:19:12,560
michael faraday with a laptop hell

2261
01:19:17,910 --> 01:19:15,040
imagine albert einstein with an iphone

2262
01:19:20,390 --> 01:19:17,920
he would never figure it out ever i

2263
01:19:22,149 --> 01:19:20,400

claim even if he had a team of people he

2264

01:19:24,550 --> 01:19:22,159

would never figure out how in a high one

2265

01:19:26,550 --> 01:19:24,560

iphone works before he would die

2266

01:19:28,550 --> 01:19:26,560

that's that's where we're at i think if

2267

01:19:30,470 --> 01:19:28,560

we have anything if we have something

2268

01:19:32,229 --> 01:19:30,480

well i think it's hopeless i beg to

2269

01:19:33,830 --> 01:19:32,239

differ but anyway you're right i hope

2270

01:19:36,390 --> 01:19:33,840

you're right that's okay

2271

01:19:39,510 --> 01:19:36,400

that's okay uh you know i mean i just i

2272

01:19:43,189 --> 01:19:40,950

i missed part of the conversation

2273

01:19:45,110 --> 01:19:43,199

because my internet's absolute garbage

2274

01:19:46,630 --> 01:19:45,120

but my understands you're talking about

2275

01:19:48,229 --> 01:19:46,640

if something crashed how would we

2276

01:19:50,630 --> 01:19:48,239

reverse engineer it without the

2277

01:19:52,149 --> 01:19:50,640

technology or knowledge to figure it out

2278

01:19:53,590 --> 01:19:52,159

it would be hopeless

2279

01:19:55,270 --> 01:19:53,600

more optimistic i think i agree with

2280

01:19:57,430 --> 01:19:55,280

both of you

2281

01:19:59,350 --> 01:19:57,440

say roswell happened and it's a highly

2282

01:20:02,310 --> 01:19:59,360

sophisticated craft

2283

01:20:04,070 --> 01:20:02,320

but i mean at 1947 we would have no idea

2284

01:20:06,790 --> 01:20:04,080

what any of it was how it worked but by

2285

01:20:08,229 --> 01:20:06,800

now with some 70 years to figure it out

2286

01:20:10,310 --> 01:20:08,239

i mean couldn't we be at a place where

2287

01:20:12,149 --> 01:20:10,320

now we're implementing that technology

2288

01:20:14,149 --> 01:20:12,159

and using some of its basic

2289

01:20:16,310 --> 01:20:14,159

elements at least in the present no but

2290

01:20:18,629 --> 01:20:16,320

my point was that wasn't possible in the

2291

01:20:20,229 --> 01:20:18,639

late 40s though i was

2292

01:20:22,070 --> 01:20:20,239

discussing with rich the the thing about

2293

01:20:24,229 --> 01:20:22,080

the flying white butane tanks that

2294

01:20:25,750 --> 01:20:24,239

people saw in the 40s and i'm saying

2295

01:20:27,030 --> 01:20:25,760

that there's no way

2296

01:20:29,110 --> 01:20:27,040

we could have reverse engineered

2297

01:20:31,110 --> 01:20:29,120

something that fast and that was my

2298

01:20:33,430 --> 01:20:31,120

point no decades that i will give you

2299

01:20:35,510 --> 01:20:33,440

and i'll give rich that point is is when

2300

01:20:37,590 --> 01:20:35,520

i was saying now it's impossible what i

2301

01:20:40,149 --> 01:20:37,600

meant is you're not going to like take

2302

01:20:42,470 --> 01:20:40,159

two or even five years and figure it out

2303

01:20:44,149 --> 01:20:42,480

it's going to take decades of the best

2304

01:20:46,070 --> 01:20:44,159

and brightest minds it's going to take

2305

01:20:48,310 --> 01:20:46,080

and there's so much back in antiquity

2306

01:20:51,750 --> 01:20:48,320

too i mean jacques vale's book wonder in

2307

01:20:53,669 --> 01:20:51,760

the sky and so many richard stutters too

2308

01:20:55,430 --> 01:20:53,679

traced all of these cases back thousands

2309

01:20:57,270 --> 01:20:55,440

of years which is the same thing you

2310

01:20:59,510 --> 01:20:57,280

know and i like matthew's point too

2311

01:21:01,510 --> 01:20:59,520

about the relativist relativistic time

2312

01:21:03,110 --> 01:21:01,520

dilation thing i talk about that a lot

2313

01:21:04,709 --> 01:21:03,120

in my new book and how they this it

2314

01:21:06,390 --> 01:21:04,719

could be the same beings being perceived

2315

01:21:08,070 --> 01:21:06,400

in different ways by these different

2316

01:21:09,910 --> 01:21:08,080

groups who as you go back farther in

2317

01:21:11,510 --> 01:21:09,920

time or more primitive have

2318

01:21:13,270 --> 01:21:11,520

fewer things they can compare it to to

2319

01:21:14,470 --> 01:21:13,280

understand it but as we get more evolved

2320

01:21:16,550 --> 01:21:14,480

and we start to have more of these

2321

01:21:19,910 --> 01:21:16,560

technologies ourselves we can start to

2322

01:21:22,550 --> 01:21:19,920

put it in in more comprehensible terms

2323

01:21:24,709 --> 01:21:22,560

yeah and and to my my point was that not

2324

01:21:26,950 --> 01:21:24,719

necessarily that i'm expecting that the

2325

01:21:28,709 --> 01:21:26,960

the drone is necessarily you know

2326

01:21:31,110 --> 01:21:28,719

something that was built back and from

2327

01:21:32,870 --> 01:21:31,120

roswell or whatever but my my point was

2328

01:21:34,870 --> 01:21:32,880

that the materials

2329

01:21:36,470 --> 01:21:34,880

might give unique properties or

2330

01:21:37,990 --> 01:21:36,480

something of that nature that you can

2331

01:21:40,229 --> 01:21:38,000

figure out and you might be able to

2332

01:21:42,550 --> 01:21:40,239

utilize that and there's also the belief

2333

01:21:45,270 --> 01:21:42,560

that for example nitinol or shape memory

2334

01:21:47,350 --> 01:21:45,280

alloys did come from going to patel

2335

01:21:49,430 --> 01:21:47,360

memorial institute which actually was

2336

01:21:51,270 --> 01:21:49,440

contracted with blue book

2337

01:21:53,189 --> 01:21:51,280

that would have had maybe the roswell

2338

01:21:54,790 --> 01:21:53,199

materials passed off to it and maybe

2339

01:21:57,270 --> 01:21:54,800

that's helping

2340

01:21:59,750 --> 01:21:57,280

to be able to push us ahead with that

2341

01:22:01,110 --> 01:21:59,760

particular shape memory alloy so i guess

2342

01:22:03,110 --> 01:22:01,120

what i'm trying to say is and that's not

2343

01:22:04,629 --> 01:22:03,120

necessarily figuring out the craft but

2344

01:22:06,550 --> 01:22:04,639

it's you figuring out how you can

2345

01:22:08,470 --> 01:22:06,560

utilize the materials

2346

01:22:10,310 --> 01:22:08,480

in the engineering no you may be right

2347

01:22:12,470 --> 01:22:10,320

rich i'm open to that possibility and

2348

01:22:14,950 --> 01:22:12,480

that's that's what i was trying to say i

2349

01:22:17,110 --> 01:22:14,960

was not necessarily saying that that

2350

01:22:20,470 --> 01:22:17,120

they're we have figured it out and we're

2351

01:22:22,229 --> 01:22:20,480

flying them i i'm saying that materials

2352

01:22:24,229 --> 01:22:22,239

or something of that nature could be

2353

01:22:27,270 --> 01:22:24,239

actually reutilized and we're starting

2354

01:22:29,030 --> 01:22:27,280

to see some of that happen from previous

2355

01:22:30,790 --> 01:22:29,040

crashes well

2356

01:22:32,390 --> 01:22:30,800

i can give you a story that actually

2357

01:22:33,990 --> 01:22:32,400

corroborates what you just said that's a

2358

01:22:36,790 --> 01:22:34,000

really good point that that i had

2359

01:22:38,629 --> 01:22:36,800

forgotten myself even actually

2360

01:22:39,830 --> 01:22:38,639

i just remembered that once when i was

2361

01:22:42,310 --> 01:22:39,840

um

2362

01:22:44,149 --> 01:22:42,320

i i remember watching unsolved mysteries

2363

01:22:47,270 --> 01:22:44,159

and you know there was the robert stack

2364

01:22:48,790 --> 01:22:47,280

and talking about the roswell crash and

2365

01:22:50,870 --> 01:22:48,800

then they were showing like people

2366

01:22:53,669 --> 01:22:50,880

describing the materials and i was like

2367

01:22:55,510 --> 01:22:53,679

ah well that's that's that's that's

2368

01:22:58,149 --> 01:22:55,520

boring that's just aluminized mylar i

2369

01:22:59,910 --> 01:22:58,159

use that as a grad student but then i

2370

01:23:02,550 --> 01:22:59,920

googled it and i realized aluminized

2371

01:23:04,790 --> 01:23:02,560

mylar had not been invented yet and

2372

01:23:06,870 --> 01:23:04,800

similarly teflon and other description

2373

01:23:08,709 --> 01:23:06,880

materials where originally i was very

2374

01:23:11,110 --> 01:23:08,719

very extra skeptical i was like yeah but

2375

01:23:13,270 --> 01:23:11,120

that's just aluminized mylar and teflon

2376

01:23:15,669 --> 01:23:13,280

but then i googled it and i'm like uh

2377

01:23:17,750 --> 01:23:15,679

wait that wasn't invented until 10 years

2378

01:23:19,430 --> 01:23:17,760

after that right so

2379

01:23:21,430 --> 01:23:19,440

then i started the question

2380

01:23:23,350 --> 01:23:21,440

question question that so yeah no that

2381

01:23:25,350 --> 01:23:23,360

that's that is a valid point i was

2382

01:23:27,510 --> 01:23:25,360

saying that but figuring it all out and

2383

01:23:29,110 --> 01:23:27,520

like flying drones around yeah i am very

2384

01:23:31,669 --> 01:23:29,120

skeptical would be able to do that

2385

01:23:33,830 --> 01:23:31,679

easily not without decades of hard work

2386

01:23:35,590 --> 01:23:33,840

yeah and my point about the the drone

2387

01:23:38,070 --> 01:23:35,600

thing was literally that just that the

2388

01:23:39,750 --> 01:23:38,080

military has to treat it both from a

2389

01:23:42,310 --> 01:23:39,760

standpoint of it's potentially

2390

01:23:43,270 --> 01:23:42,320

earth-based or it might be something

2391

01:23:46,070 --> 01:23:43,280

else

2392

01:23:47,990 --> 01:23:46,080

i'll point out to you that uh that i

2393

01:23:49,990 --> 01:23:48,000

heard recently it's it's been all over

2394

01:23:51,590 --> 01:23:50,000

the news about about the fact that they

2395

01:23:55,669 --> 01:23:51,600

tried to use these drone killing

2396

01:23:57,510 --> 01:23:55,679

technologies on one and it didn't work

2397

01:23:59,350 --> 01:23:57,520

so uh obviously it might have been

2398

01:24:00,709 --> 01:23:59,360

utilizing some other kind of technology

2399

01:24:03,110 --> 01:24:00,719

other than what we think that a drone

2400

01:24:05,669 --> 01:24:03,120

should be but you know my point is that

2401
01:24:07,030 --> 01:24:05,679
you still have to from a defense posture

2402
01:24:09,030 --> 01:24:07,040
you still have to look at it as a

2403
01:24:11,270 --> 01:24:09,040
potential threat and you don't know

2404
01:24:13,910 --> 01:24:11,280
where it's from and that's why you see

2405
01:24:15,669 --> 01:24:13,920
these things as being uh

2406
01:24:17,030 --> 01:24:15,679
in the hearing they claim that the green

2407
01:24:18,950 --> 01:24:17,040
triangles well they're not green you

2408
01:24:20,470 --> 01:24:18,960
know what i mean night vision oh we've

2409
01:24:23,830 --> 01:24:20,480
we've solved that one

2410
01:24:26,070 --> 01:24:23,840
um okay so was that russia china

2411
01:24:27,830 --> 01:24:26,080
tell us what the hell so yeah that was

2412
01:24:30,470 --> 01:24:27,840
that was intriguing they're like oh we

2413
01:24:31,590 --> 01:24:30,480

figured that one out um okay great can

2414

01:24:32,790 --> 01:24:31,600

you tell us

2415

01:24:34,550 --> 01:24:32,800

yeah

2416

01:24:37,669 --> 01:24:34,560

well i can help you out with that

2417

01:24:39,750 --> 01:24:37,679

because i actually studied that myself

2418

01:24:42,470 --> 01:24:39,760

so what you had is a situation where an

2419

01:24:45,110 --> 01:24:42,480

individual's got like a you know gen one

2420

01:24:47,430 --> 01:24:45,120

type of night vision kind of like lens

2421

01:24:49,189 --> 01:24:47,440

it doesn't have the means of recording

2422

01:24:52,149 --> 01:24:49,199

so he holds up his

2423

01:24:54,870 --> 01:24:52,159

slr camera oh no no that aspect i know

2424

01:24:56,870 --> 01:24:54,880

we did that on uapx all right no no no i

2425

01:24:58,870 --> 01:24:56,880

get the triangle is fake it's with

2426
01:25:01,030 --> 01:24:58,880
filtering dave mason already explained

2427
01:25:04,229 --> 01:25:01,040
that he figured that out the aperture

2428
01:25:06,870 --> 01:25:04,239
was a creates a bokeh effect yeah that i

2429
01:25:09,910 --> 01:25:06,880
got but what are they what are they but

2430
01:25:11,910 --> 01:25:09,920
the blink rate also from the lights was

2431
01:25:14,550 --> 01:25:11,920
phil it was exactly what we have as a

2432
01:25:16,870 --> 01:25:14,560
standard for navigation lights it was

2433
01:25:20,149 --> 01:25:16,880
blinking at the rate

2434
01:25:21,910 --> 01:25:20,159
that you have for other aircraft so

2435
01:25:23,990 --> 01:25:21,920
who's were they then

2436
01:25:26,310 --> 01:25:24,000
well again the origin you wouldn't be

2437
01:25:27,910 --> 01:25:26,320
able to determine right and that's why

2438
01:25:29,750 --> 01:25:27,920

we're concerned about it because we're

2439

01:25:31,350 --> 01:25:29,760

saying like we don't know could a

2440

01:25:33,110 --> 01:25:31,360

submarine have been over there and

2441

01:25:34,950 --> 01:25:33,120

launched drones and they're testing it

2442

01:25:38,149 --> 01:25:34,960

on our people and then they're under

2443

01:25:40,390 --> 01:25:38,159

water and it comes back or is it was it

2444

01:25:42,550 --> 01:25:40,400

launched from space or something of that

2445

01:25:44,470 --> 01:25:42,560

nature dropped from an aircraft

2446

01:25:46,870 --> 01:25:44,480

people are doing a mill i mean groups

2447

01:25:48,709 --> 01:25:46,880

are testing military swarm technology

2448

01:25:49,910 --> 01:25:48,719

they've got other kinds of fuel systems

2449

01:25:51,830 --> 01:25:49,920

on these things

2450

01:25:53,590 --> 01:25:51,840

and so you have to understand that you

2451
01:25:55,270 --> 01:25:53,600
know i used to think well i've got a

2452
01:25:57,030 --> 01:25:55,280
drone i fly it out here but i have a

2453
01:25:59,030 --> 01:25:57,040
battery on it right well these things

2454
01:26:00,709 --> 01:25:59,040
are you've got fuel on them

2455
01:26:02,629 --> 01:26:00,719
and they could stay up for long times

2456
01:26:04,229 --> 01:26:02,639
and shoot up but incredible and and so

2457
01:26:06,310 --> 01:26:04,239
that's what we're talking about we have

2458
01:26:08,950 --> 01:26:06,320
to like understand that drone technology

2459
01:26:11,830 --> 01:26:08,960
is way advanced and we're putting

2460
01:26:13,750 --> 01:26:11,840
together across the world all different

2461
01:26:16,229 --> 01:26:13,760
kinds of drones with all kinds of

2462
01:26:18,149 --> 01:26:16,239
capabilities that have in themselves

2463
01:26:20,070 --> 01:26:18,159

that can do jamming they can do a whole

2464

01:26:22,149 --> 01:26:20,080

variety of things that the objects

2465

01:26:25,189 --> 01:26:22,159

allegedly are doing as well so we have

2466

01:26:27,189 --> 01:26:25,199

to now discern between those

2467

01:26:29,030 --> 01:26:27,199

uh you you to point out to me some

2468

01:26:31,350 --> 01:26:29,040

country either us or russia or china

2469

01:26:32,950 --> 01:26:31,360

that can pull a few hundred g

2470

01:26:34,310 --> 01:26:32,960

several tens of thousands of miles an

2471

01:26:36,149 --> 01:26:34,320

hour

2472

01:26:38,870 --> 01:26:36,159

like i said before it's not going to

2473

01:26:41,590 --> 01:26:38,880

explain the tic tac okay yeah yeah yeah

2474

01:26:43,110 --> 01:26:41,600

i got you you know i mean that

2475

01:26:45,110 --> 01:26:43,120

so you're you might have a mixture of

2476
01:26:47,669 --> 01:26:45,120
both you know and it's we just have to

2477
01:26:49,110 --> 01:26:47,679
know right yeah yeah

2478
01:26:50,709 --> 01:26:49,120
well listen gentlemen we're getting

2479
01:26:52,790 --> 01:26:50,719
closing in on the hour and a half mark

2480
01:26:54,470 --> 01:26:52,800
so before we go if you can each just

2481
01:26:55,750 --> 01:26:54,480
give us a little bit of what's going on

2482
01:26:57,189 --> 01:26:55,760
for you next obviously which we

2483
01:26:59,189 --> 01:26:57,199
discussed about the conference but

2484
01:27:00,550 --> 01:26:59,199
anything else you're working on and

2485
01:27:02,470 --> 01:27:00,560
all your links will be in the the

2486
01:27:04,070 --> 01:27:02,480
description below but yeah if you could

2487
01:27:05,350 --> 01:27:04,080
just give us that little bit of info

2488
01:27:07,110 --> 01:27:05,360

before we say goodbye that would be

2489

01:27:08,229 --> 01:27:07,120

great thank you

2490

01:27:10,070 --> 01:27:08,239

well i mean

2491

01:27:10,870 --> 01:27:10,080

yeah my life's eaten up by conference in

2492

01:27:12,629 --> 01:27:10,880

fact

2493

01:27:15,510 --> 01:27:12,639

you know that that whole thing is every

2494

01:27:17,189 --> 01:27:15,520

day i mean matthew probably can tell you

2495

01:27:20,149 --> 01:27:17,199

michael can tell you that these things

2496

01:27:22,229 --> 01:27:20,159

are pretty complex so my life is my life

2497

01:27:23,910 --> 01:27:22,239

is what that's why i didn't know about

2498

01:27:25,830 --> 01:27:23,920

the answers the questions that we were

2499

01:27:28,229 --> 01:27:25,840

asking to because i haven't had time to

2500

01:27:30,470 --> 01:27:28,239

deal with that right so to be that to be

2501
01:27:32,470 --> 01:27:30,480
fair i'm i'm glad that i was able to

2502
01:27:33,189 --> 01:27:32,480
share with you what i could about it but

2503
01:27:35,270 --> 01:27:33,199
uh

2504
01:27:37,510 --> 01:27:35,280
that's where i'm at right now my life is

2505
01:27:39,189 --> 01:27:37,520
all conference so i'll pass over to

2506
01:27:46,550 --> 01:27:39,199
matthew or somebody else to be able to

2507
01:27:50,470 --> 01:27:48,149
well we've got well like i said earlier

2508
01:27:52,709 --> 01:27:50,480
we got a ton of data to go through

2509
01:27:55,270 --> 01:27:52,719
that we want to share with scu and lo

2510
01:27:58,470 --> 01:27:55,280
the long game is we want to be able to

2511
01:28:00,070 --> 01:27:58,480
get break the cycle of their almost no

2512
01:28:02,390 --> 01:28:00,080
publications there are exceptions as you

2513
01:28:03,350 --> 01:28:02,400

mentioned rich there's um the paper that

2514

01:28:05,830 --> 01:28:03,360

kevin

2515

01:28:08,390 --> 01:28:05,840

um peter really robert powell got in in

2516

01:28:09,990 --> 01:28:08,400

a journal in entropy those are more the

2517

01:28:11,990 --> 01:28:10,000

exception than the rule i can probably

2518

01:28:13,669 --> 01:28:12,000

count on the fingers of you i'm sure

2519

01:28:15,510 --> 01:28:13,679

you're familiar with all of them i've

2520

01:28:17,270 --> 01:28:15,520

seen like russia this is a russian one

2521

01:28:20,470 --> 01:28:17,280

and stuff i can count on the fingers of

2522

01:28:23,270 --> 01:28:20,480

one hand the number of papers on ufos

2523

01:28:25,430 --> 01:28:23,280

and uap published in real

2524

01:28:28,229 --> 01:28:25,440

journals like high quality high impact

2525

01:28:30,070 --> 01:28:28,239

factor scientific journals it's like

2526

01:28:32,629 --> 01:28:30,080

maybe a second hand i don't think i need

2527

01:28:34,390 --> 01:28:32,639

the second hand yet though and so i i

2528

01:28:36,550 --> 01:28:34,400

think that we want to break through that

2529

01:28:37,990 --> 01:28:36,560

stigma more and that taboo because

2530

01:28:39,990 --> 01:28:38,000

everyone's talking about oh the stigma

2531

01:28:42,229 --> 01:28:40,000

is gone i know it's not it's definitely

2532

01:28:45,189 --> 01:28:42,239

reduced it's mitigated and i'm glad they

2533

01:28:47,830 --> 01:28:45,199

brought this up at the hearing but again

2534

01:28:49,910 --> 01:28:47,840

mitigation is not the same thing as

2535

01:28:53,270 --> 01:28:49,920

elimination there's still plenty of

2536

01:28:53,990 --> 01:28:53,280

stigma in taboo and so we know on uapx

2537

01:28:58,790 --> 01:28:54,000

as

2538

01:29:00,950 --> 01:28:58,800

uphill battle to get anything published

2539

01:29:03,350 --> 01:29:00,960

because people will be like oh ufos and

2540

01:29:04,149 --> 01:29:03,360

laugh at us and so but that's the long

2541

01:29:07,110 --> 01:29:04,159

game

2542

01:29:09,510 --> 01:29:07,120

is to publish actual papers saying

2543

01:29:12,070 --> 01:29:09,520

here's some atmospheric anomaly you know

2544

01:29:13,990 --> 01:29:12,080

we've we've found so so that's really

2545

01:29:15,830 --> 01:29:14,000

where we're focused right now although i

2546

01:29:17,350 --> 01:29:15,840

have to confess

2547

01:29:19,430 --> 01:29:17,360

you know it's really a side job because

2548

01:29:21,830 --> 01:29:19,440

my day job is to look for dark matter

2549

01:29:23,189 --> 01:29:21,840

and i'm paid to do that and so

2550

01:29:26,229 --> 01:29:23,199

unfortunately

2551

01:29:28,149 --> 01:29:26,239

i can only do uap stuff in my free time

2552

01:29:30,070 --> 01:29:28,159

which i put in air quotes because i have

2553

01:29:32,390 --> 01:29:30,080

none because i have four children

2554

01:29:33,830 --> 01:29:32,400

also but but re and and really this year

2555

01:29:35,510 --> 01:29:33,840

the dark matter experiment that i've

2556

01:29:37,430 --> 01:29:35,520

been working on probably over 10 years

2557

01:29:39,750 --> 01:29:37,440

largest one the world is turning on has

2558

01:29:41,990 --> 01:29:39,760

already turned on and so i've really got

2559

01:29:44,149 --> 01:29:42,000

to focus on the mainstream my mainstream

2560

01:29:45,669 --> 01:29:44,159

scientific effort um that's another

2561

01:29:47,430 --> 01:29:45,679

reason why we need more people when

2562

01:29:49,750 --> 01:29:47,440

we're bringing people to help

2563

01:29:51,990 --> 01:29:49,760

look through the uapx data so i mean if

2564

01:29:53,750 --> 01:29:52,000

you wanted a near future summary for me

2565

01:29:55,110 --> 01:29:53,760

there you have it that's pretty looking

2566

01:29:57,110 --> 01:29:55,120

forward to the conference really looking

2567

01:29:59,590 --> 01:29:57,120

forward to seeing rich in person and

2568

01:30:01,669 --> 01:29:59,600

everybody else i'm really really great

2569

01:30:03,189 --> 01:30:01,679

to see people to see people in person

2570

01:30:05,189 --> 01:30:03,199

again looking forward to the conference

2571

01:30:07,590 --> 01:30:05,199

and i really we really hope that our

2572

01:30:09,669 --> 01:30:07,600

talk that kevin and i and christopher

2573

01:30:11,750 --> 01:30:09,679

altman will be giving will really blow

2574

01:30:14,149 --> 01:30:11,760

you away we hope

2575

01:30:18,830 --> 01:30:14,159

i'm sure it will uh so michael before we

2576

01:30:24,229 --> 01:30:21,270

on yeah i see you just hit the 90 minute

2577

01:30:26,390 --> 01:30:24,239

mark so i'll try to keep it short but

2578

01:30:29,189 --> 01:30:26,400

much like rich uh my life has been

2579

01:30:31,669 --> 01:30:29,199

consumed by one thing and one thing only

2580

01:30:33,350 --> 01:30:31,679

um i've been putting in 14 16 hour days

2581

01:30:35,590 --> 01:30:33,360

trying to get this book finished get the

2582

01:30:38,070 --> 01:30:35,600

audio book recorded um but it's almost

2583

01:30:40,950 --> 01:30:38,080

done i think it'll be out june 1st in

2584

01:30:42,709 --> 01:30:40,960

all three formats ebook paperback and

2585

01:30:44,470 --> 01:30:42,719

audiobook i know i'm excited too it's

2586

01:30:46,390 --> 01:30:44,480

it's it's different than the first one

2587

01:30:48,390 --> 01:30:46,400

it really goes deep into the abduction

2588

01:30:50,709 --> 01:30:48,400

aspect sort of a john mackien approach

2589

01:30:53,350 --> 01:30:50,719

to some extent and um you know

2590

01:30:56,229 --> 01:30:53,360

cautiously examines the abduction and

2591

01:30:58,390 --> 01:30:56,239

contact he aspect of the phenomenon i've

2592

01:31:00,470 --> 01:30:58,400

met so many experiencers over the last

2593

01:31:02,390 --> 01:31:00,480

three years and it's just amazing to me

2594

01:31:04,870 --> 01:31:02,400

the consistency across their reports and

2595

01:31:07,830 --> 01:31:04,880

what happened to them by who what type

2596

01:31:10,070 --> 01:31:07,840

of ship what type of experience they had

2597

01:31:12,149 --> 01:31:10,080

so i'm just trying to look for patterns

2598

01:31:13,669 --> 01:31:12,159

across these cases and it's been a

2599

01:31:15,430 --> 01:31:13,679

tremendously

2600

01:31:16,950 --> 01:31:15,440

fun thing to research i mean it's

2601
01:31:19,030 --> 01:31:16,960
something i didn't really have much of a

2602
01:31:21,110 --> 01:31:19,040
background in uh when researching my

2603
01:31:22,149 --> 01:31:21,120
first book and i felt that was kind of a

2604
01:31:24,390 --> 01:31:22,159
flaw

2605
01:31:26,310 --> 01:31:24,400
in that research but um it's been really

2606
01:31:28,950 --> 01:31:26,320
fascinating to look at this and and it's

2607
01:31:30,390 --> 01:31:28,960
kind of been i feel fortunate because it

2608
01:31:33,750 --> 01:31:30,400
it's been the thing i've been

2609
01:31:35,669 --> 01:31:33,760
researching uh my my university lets me

2610
01:31:37,669 --> 01:31:35,679
do this they um

2611
01:31:39,910 --> 01:31:37,679
actually i won a research award this

2612
01:31:43,669 --> 01:31:39,920
week for excellence in research and

2613
01:31:45,990 --> 01:31:43,679

scholarship and all i've been doing

2614

01:31:48,229 --> 01:31:46,000

wow they gave me an award for ufo

2615

01:31:49,030 --> 01:31:48,239

research so it's great i mean talk about

2616

01:31:49,830 --> 01:31:49,040

this

2617

01:31:51,669 --> 01:31:49,840

yeah

2618

01:31:53,750 --> 01:31:51,679

where are you i want to join your

2619

01:31:55,110 --> 01:31:53,760

university yeah well it's great it's one

2620

01:31:56,950 --> 01:31:55,120

of the top science and engineering

2621

01:31:58,950 --> 01:31:56,960

schools in the pacific northwest it's

2622

01:32:00,550 --> 01:31:58,960

montana technological

2623

01:32:02,229 --> 01:32:00,560

university and i yeah i've got great

2624

01:32:04,070 --> 01:32:02,239

respect for my administrators my

2625

01:32:05,830 --> 01:32:04,080

colleagues they've been so supportive

2626

01:32:07,669 --> 01:32:05,840

with all of this and

2627

01:32:09,590 --> 01:32:07,679

uh i mean i i might be the exception to

2628

01:32:11,430 --> 01:32:09,600

the rule but it's it's still been good

2629

01:32:12,709 --> 01:32:11,440

to see i wanted to just tell people that

2630

01:32:14,629 --> 01:32:12,719

you know not to brag about my little

2631

01:32:16,550 --> 01:32:14,639

award but to let them know that it warms

2632

01:32:18,390 --> 01:32:16,560

my heart to hear you yeah it's it's

2633

01:32:20,709 --> 01:32:18,400

changing this stigma is changing and you

2634

01:32:23,110 --> 01:32:20,719

can work in a place and talk about ufos

2635

01:32:24,790 --> 01:32:23,120

openly where your administrators and

2636

01:32:26,950 --> 01:32:24,800

your colleagues are supportive so i just

2637

01:32:28,629 --> 01:32:26,960

wanted to get that out there but

2638

01:32:30,550 --> 01:32:28,639

i should say our universe our university

2639

01:32:32,870 --> 01:32:30,560

is supportive too but not that kind of

2640

01:32:34,709 --> 01:32:32,880

level of support of like my goodness

2641

01:32:38,149 --> 01:32:34,719

i'm i'm thrilled to hear that i hope

2642

01:32:39,990 --> 01:32:38,159

yeah i was too and i i yeah i think you

2643

01:32:41,910 --> 01:32:40,000

know my dean sent me an email on tuesday

2644

01:32:43,669 --> 01:32:41,920

and i said thank you she said you're

2645

01:32:45,830 --> 01:32:43,679

incredibly deserving of this and i was

2646

01:32:48,390 --> 01:32:45,840

like wow what is happening

2647

01:32:49,590 --> 01:32:48,400

what world am i living in now

2648

01:32:52,149 --> 01:32:49,600

that's amazing

2649

01:32:53,669 --> 01:32:52,159

congratulations yeah um well listen

2650

01:32:55,830 --> 01:32:53,679

gentlemen i'm just going to give a quick

2651
01:32:57,910 --> 01:32:55,840
shout out to uh to r r and jimmy the

2652
01:32:59,590 --> 01:32:57,920
earthling they gave us a little donation

2653
01:33:01,750 --> 01:32:59,600
during the live stream so thank you to

2654
01:33:03,430 --> 01:33:01,760
those guys but also to everybody that's

2655
01:33:05,110 --> 01:33:03,440
been having a really great conversation

2656
01:33:06,950 --> 01:33:05,120
in the live chat tonight i'm sorry we

2657
01:33:08,709 --> 01:33:06,960
didn't get to focus on you as much as

2658
01:33:11,189 --> 01:33:08,719
maybe we like to but it was a

2659
01:33:13,350 --> 01:33:11,199
conversation that i didn't want to break

2660
01:33:15,910 --> 01:33:13,360
um it was flowing it's exactly what i

2661
01:33:18,470 --> 01:33:15,920
wanted gentlemen thank you so much it

2662
01:33:20,470 --> 01:33:18,480
was an honor to speak to you all um for

2663
01:33:23,590 --> 01:33:20,480

everybody watching i'm gonna be back on

2664

01:33:25,990 --> 01:33:23,600

tuesday for 30 minutes with gary nolan

2665

01:33:28,070 --> 01:33:26,000

he has gladly offered me a half an hour

2666

01:33:29,750 --> 01:33:28,080

to speak with him so follow me on my

2667

01:33:31,910 --> 01:33:29,760

socials you can check out all the times

2668

01:33:33,350 --> 01:33:31,920

there but one more time gentlemen thank

2669

01:33:35,030 --> 01:33:33,360

you so much i wish you nothing but the

2670

01:33:37,189 --> 01:33:35,040

best in everything you're doing at the

2671

01:33:39,510 --> 01:33:37,199

moment i will certainly be tuning in

2672

01:33:42,149 --> 01:33:39,520

where i can and promoting anything i can

2673

01:33:43,669 --> 01:33:42,159

so once again thank you so much

2674

01:33:45,189 --> 01:33:43,679

thank you vinnie always great talking to

2675

01:33:46,790 --> 01:33:45,199

you yeah thank you very much i

2676

01:33:49,830 --> 01:33:46,800

appreciate it thank you

2677

01:33:51,830 --> 01:33:49,840

uh on that everyone will say goodbye bye

2678

01:33:53,189 --> 01:33:51,840

cheerio bye-bye
