

Alejandro Rojas

UFO's, Enigma Labs & SCU

**DISCLOSURE
TEAM**

VINCE ADAMS

1
00:00:08,810 --> 00:00:06,490

[Music]

2
00:00:17,230 --> 00:00:08,820

one realizes very quickly we've been

3
00:00:17,240 --> 00:00:25,600

I had access to to all those programs

4
00:00:43,670 --> 00:00:39,889

[Music]

5
00:00:45,709 --> 00:00:43,680

40 feet long no windows no no real wings

6
00:00:47,990 --> 00:00:45,719

or control surfaces no obvious signs of

7
00:00:49,670 --> 00:00:48,000

propulsion and yet this object is

8
00:00:51,960 --> 00:00:49,680

witnessed Now by four separate

9
00:01:01,310 --> 00:00:51,970

individuals in two separate aircraft

10
00:01:03,650 --> 00:01:01,320

[Music]

11
00:01:05,570 --> 00:01:03,660

welcome back guys it's been a couple of

12
00:01:07,250 --> 00:01:05,580

hours since I saw you last thank you so

13
00:01:10,310 --> 00:01:07,260

much to everyone that joined me earlier

14

00:01:12,170 --> 00:01:10,320

for my conversation with Avi Loeb and

15

00:01:14,390 --> 00:01:12,180

for coming and join me for a second time

16

00:01:15,770 --> 00:01:14,400

I'm really excited for this conversation

17

00:01:18,770 --> 00:01:15,780

I've been following this gentleman's

18

00:01:20,030 --> 00:01:18,780

work for many years now so yeah as

19

00:01:22,010 --> 00:01:20,040

always guys if you have any questions

20

00:01:23,990 --> 00:01:22,020

please pop them in capital letters so I

21

00:01:27,170 --> 00:01:24,000

can see them in the live chat please

22

00:01:30,649 --> 00:01:27,180

keep the live chat nice and uh friendly

23

00:01:33,830 --> 00:01:30,659

I appreciate that you always do

24

00:01:36,170 --> 00:01:33,840

um so yeah so Alejandro Rojas is joining

25

00:01:38,870 --> 00:01:36,180

me today he uh has been working in this

26

00:01:41,450 --> 00:01:38,880

subject for many years he uh he runs

27

00:01:43,609 --> 00:01:41,460

open Minds TV he is the head of research

28

00:01:45,109 --> 00:01:43,619

and content at Enigma labs and also a

29

00:01:47,390 --> 00:01:45,119

member of the scientific Coalition for

30

00:01:49,969 --> 00:01:47,400

UAP studies so let's jump straight into

31

00:01:53,330 --> 00:01:49,979

it guys please welcome Alejandra Rojas

32

00:01:56,330 --> 00:01:53,340

Alejandra hello doing great thank you so

33

00:01:58,789 --> 00:01:56,340

much for having me on I noticed uh Solly

34

00:02:00,410 --> 00:01:58,799

here is from Cardiff UK actually I'm in

35

00:02:03,850 --> 00:02:00,420

Phoenix now but I live in Cardiff

36

00:02:06,530 --> 00:02:03,860

California yeah so oh how strange

37

00:02:08,870 --> 00:02:06,540

it's named after Cardiff in the UK

38

00:02:12,470 --> 00:02:08,880

actually oh right okay like twin towns

39

00:02:13,850 --> 00:02:12,480

yeah fantastic well listen 100 thank you

40

00:02:15,470 --> 00:02:13,860

so much for joining me like I said you

41

00:02:16,729 --> 00:02:15,480

know I've been following your work for

42

00:02:18,410 --> 00:02:16,739

many years now

43

00:02:20,150 --> 00:02:18,420

um and I'd just like to know sort of

44

00:02:22,190 --> 00:02:20,160

your background to start us off what got

45

00:02:23,690 --> 00:02:22,200

you interested in UFOs and how it

46

00:02:25,250 --> 00:02:23,700

progressed into sort of being involved

47

00:02:27,350 --> 00:02:25,260

in the community

48

00:02:29,630 --> 00:02:27,360

yeah I would say that you know the

49

00:02:32,449 --> 00:02:29,640

simple story is

50

00:02:34,190 --> 00:02:32,459

um I I always had an interest in science

51
00:02:37,670 --> 00:02:34,200
in fact I wanted to be a rocket

52
00:02:40,250 --> 00:02:37,680
scientist when I went into school uh at

53
00:02:42,589 --> 00:02:40,260
uh CU Boulder actually which they have a

54
00:02:44,390 --> 00:02:42,599
great program and have produced a lot of

55
00:02:46,670 --> 00:02:44,400
astronauts I was hoping to be one at the

56
00:02:48,229 --> 00:02:46,680
time but you know I fell in love with

57
00:02:50,869 --> 00:02:48,239
journalism

58
00:02:53,630 --> 00:02:50,879
um in college and that's what really

59
00:02:55,070 --> 00:02:53,640
hooked me in fact uh I've been kind of

60
00:02:56,030 --> 00:02:55,080
telling it this story this way which is

61
00:02:58,250 --> 00:02:56,040
true

62
00:02:59,809 --> 00:02:58,260
um and it's kind of funnier is that you

63
00:03:02,150 --> 00:02:59,819

know the person who got me into

64

00:03:04,490 --> 00:03:02,160

journalism she was the news director of

65

00:03:06,830 --> 00:03:04,500

the radio station at Mesa State College

66

00:03:08,570 --> 00:03:06,840

which is actually where I also had gone

67

00:03:10,610 --> 00:03:08,580

but

68

00:03:12,530 --> 00:03:10,620

um

69

00:03:13,970 --> 00:03:12,540

uh sorry I got distracted it's always

70

00:03:16,309 --> 00:03:13,980

hard not to look at the commenting

71

00:03:19,550 --> 00:03:16,319

exactly people are so funny but anyway

72

00:03:22,369 --> 00:03:19,560

she had a boyfriend who was really into

73

00:03:24,589 --> 00:03:22,379

UFOs and it was so annoying and I

74

00:03:26,809 --> 00:03:24,599

couldn't stand it and that because he

75

00:03:29,990 --> 00:03:26,819

wouldn't stop but you know I started

76

00:03:31,970 --> 00:03:30,000

listening to him looking into stuff uh

77

00:03:33,530 --> 00:03:31,980

and I just noticed there was a lot of

78

00:03:35,330 --> 00:03:33,540

credible information that wasn't being

79

00:03:37,430 --> 00:03:35,340

covered I watched all the documentaries

80

00:03:39,530 --> 00:03:37,440

but you know he was letting me in on

81

00:03:41,449 --> 00:03:39,540

some of these very credible people that

82

00:03:43,550 --> 00:03:41,459

weren't in these documentaries so I saw

83

00:03:45,530 --> 00:03:43,560

it as a beat you know that I didn't feel

84

00:03:47,690 --> 00:03:45,540

that the media was telling the full

85

00:03:51,830 --> 00:03:47,700

story like they normally would for any

86

00:03:54,410 --> 00:03:51,840

other story I found that curious and to

87

00:03:57,110 --> 00:03:54,420

be honest a bit irrational that uh the

88

00:03:58,610 --> 00:03:57,120

taboo around the topic so I decided to

89

00:04:01,369 --> 00:03:58,620

cover it and of course I was super

90

00:04:03,110 --> 00:04:01,379

skeptical going into it but open-minded

91

00:04:04,789 --> 00:04:03,120

you know my Native American I think

92

00:04:06,710 --> 00:04:04,799

background has really opened me to the

93

00:04:08,630 --> 00:04:06,720

you know lots of different possibilities

94

00:04:10,550 --> 00:04:08,640

of what might be out there and and

95

00:04:13,070 --> 00:04:10,560

keeping an open mind about you know our

96

00:04:16,310 --> 00:04:13,080

reality not only that I think especially

97

00:04:18,170 --> 00:04:16,320

in space science or astrophysics you

98

00:04:20,509 --> 00:04:18,180

know a lot of times we discover things

99

00:04:22,550 --> 00:04:20,519

uh that we never would have imagined

100

00:04:25,189 --> 00:04:22,560

we're out there almost

101
00:04:28,430 --> 00:04:25,199
on a regular basis in fact I would argue

102
00:04:31,610 --> 00:04:28,440
that most Astro physics is like that

103
00:04:34,790 --> 00:04:31,620
um so uh definitely you know realizing

104
00:04:36,770 --> 00:04:34,800
we don't have all the answers so that's

105
00:04:39,590 --> 00:04:36,780
where I started so I started covering it

106
00:04:40,730 --> 00:04:39,600
as a regular journalist I mean um it's

107
00:04:44,030 --> 00:04:40,740
not like I could get a lot of work

108
00:04:48,469 --> 00:04:44,040
writing about UFOs so I started writing

109
00:04:51,290 --> 00:04:48,479
for medium a couple other places uh then

110
00:04:52,790 --> 00:04:51,300
I started you know blockly by the time I

111
00:04:55,969 --> 00:04:52,800
I really it was like a Richard

112
00:04:58,730 --> 00:04:55,979
dreyferson where I you know went in my

113
00:05:01,310 --> 00:04:58,740

room and and I was I've total kind of uh

114

00:05:03,170 --> 00:05:01,320

anti uh social for a period of time

115

00:05:05,510 --> 00:05:03,180

reading every book I could get my hands

116

00:05:07,909 --> 00:05:05,520

on and once I felt I read all the books

117

00:05:10,189 --> 00:05:07,919

I could read I decided to join mufan I

118

00:05:12,950 --> 00:05:10,199

wanted to talk to Witnesses and that

119

00:05:15,710 --> 00:05:12,960

turned into a big huge ride for the next

120

00:05:17,469 --> 00:05:15,720

decade or so where uh you know luckily

121

00:05:21,170 --> 00:05:17,479

the headquarters were out where I lived

122

00:05:23,210 --> 00:05:21,180

So eventually I moved on to helping out

123

00:05:25,550 --> 00:05:23,220

the board of directors

124

00:05:27,650 --> 00:05:25,560

um including being doing PR and being

125

00:05:29,510 --> 00:05:27,660

the official spokesperson for MoveOn for

126

00:05:31,490 --> 00:05:29,520

a period of time uh where because the

127

00:05:33,050 --> 00:05:31,500

media did have a hunger and this is what

128

00:05:34,310 --> 00:05:33,060

I tell people when people talk about the

129

00:05:35,570 --> 00:05:34,320

media

130

00:05:38,749 --> 00:05:35,580

um I feel like I've been really

131

00:05:39,890 --> 00:05:38,759

successful uh at getting to mainstream

132

00:05:46,430 --> 00:05:39,900

media

133

00:05:47,930 --> 00:05:46,440

uh if not above I think you know uh

134

00:05:50,390 --> 00:05:47,940

It's always important to cite your

135

00:05:52,070 --> 00:05:50,400

sources but in this field you have to

136

00:05:54,170 --> 00:05:52,080

make sure the credibility of your

137

00:05:56,930 --> 00:05:54,180

sources are even higher than they would

138

00:06:00,170 --> 00:05:56,940

be for a normal story because of that

139

00:06:01,550 --> 00:06:00,180

taboo around this topic so uh that was

140

00:06:03,710 --> 00:06:01,560

really important and that was one thing

141

00:06:05,570 --> 00:06:03,720

we could offer at mufon was legit

142

00:06:08,210 --> 00:06:05,580

information and that's what the media

143

00:06:10,189 --> 00:06:08,220

wants is if you give them something

144

00:06:11,749 --> 00:06:10,199

that's weird or too Fringe they're going

145

00:06:13,850 --> 00:06:11,759

to make fun of it

146

00:06:15,950 --> 00:06:13,860

um and but think of the position you're

147

00:06:18,290 --> 00:06:15,960

putting this reporter in you know is

148

00:06:20,270 --> 00:06:18,300

this reporter are you asking this

149

00:06:22,270 --> 00:06:20,280

reporter then to kind of substantiate

150

00:06:24,590 --> 00:06:22,280

what you're saying without evidence

151
00:06:28,490 --> 00:06:24,600
however if you have something very

152
00:06:30,350 --> 00:06:28,500
compelling like a former director you

153
00:06:32,570 --> 00:06:30,360
know defense secretary of Canada talking

154
00:06:34,430 --> 00:06:32,580
about this topic or something like that

155
00:06:36,350 --> 00:06:34,440
you know that's newsworthy even if that

156
00:06:38,270 --> 00:06:36,360
person is saying something that's kind

157
00:06:40,790 --> 00:06:38,280
of weird that's a newsworthy story so

158
00:06:43,010 --> 00:06:40,800
understanding the newsworthiness is is

159
00:06:45,290 --> 00:06:43,020
what's really important and people will

160
00:06:47,390 --> 00:06:45,300
cover it as we've seen you know if you

161
00:06:48,890 --> 00:06:47,400
give them something substantial so even

162
00:06:50,809 --> 00:06:48,900
back in the days that I kind of feel

163
00:06:53,510 --> 00:06:50,819

like that where the dark ages of this

164

00:06:55,430 --> 00:06:53,520

field maybe you know late 90s early

165

00:06:57,469 --> 00:06:55,440

2000s

166

00:06:59,330 --> 00:06:57,479

um where people the the media especially

167

00:07:00,650 --> 00:06:59,340

was super skeptical you know they were

168

00:07:04,249 --> 00:07:00,660

still open to really credible

169

00:07:06,110 --> 00:07:04,259

information on the topic so uh that's

170

00:07:08,510 --> 00:07:06,120

what got me into it you know uh in

171

00:07:11,450 --> 00:07:08,520

freelance I did Cover Space and Science

172

00:07:13,309 --> 00:07:11,460

more often that opened a lot of doors to

173

00:07:15,529 --> 00:07:13,319

be able to like talk to some astronauts

174

00:07:19,129 --> 00:07:15,539

and stuff but uh and do lots of NASA

175

00:07:21,529 --> 00:07:19,139

coverage but uh and I I did my best and

176

00:07:24,469 --> 00:07:21,539

I think I I have been successful that

177

00:07:25,850 --> 00:07:24,479

every astronaut not every astronaut now

178

00:07:28,129 --> 00:07:25,860

that I think about it but almost every

179

00:07:30,610 --> 00:07:28,139

astronaut I've interviewed I've been

180

00:07:32,990 --> 00:07:30,620

able to ask what they think about UFOs

181

00:07:34,909 --> 00:07:33,000

including Scott Kelly who's now on the

182

00:07:38,570 --> 00:07:34,919

NASA board sure

183

00:07:40,189 --> 00:07:38,580

um so uh and this is interesting too is

184

00:07:42,469 --> 00:07:40,199

that I typically find because when you

185

00:07:44,689 --> 00:07:42,479

go to these things you know

186

00:07:46,129 --> 00:07:44,699

um you follow the publicist and you

187

00:07:48,890 --> 00:07:46,139

follow their guide

188

00:07:51,230 --> 00:07:48,900

uh guidelines and whenever I ask

189

00:07:54,950 --> 00:07:51,240

publicists even NASA

190

00:07:56,749 --> 00:07:54,960

um certain NASA PR people they love uaps

191

00:07:58,790 --> 00:07:56,759

they they're like you know we nobody's

192

00:08:00,950 --> 00:07:58,800

asked that question or you know we don't

193

00:08:02,689 --> 00:08:00,960

know much about this so they love

194

00:08:04,909 --> 00:08:02,699

hearing that of course the astronauts

195

00:08:08,029 --> 00:08:04,919

themselves are not as eager to talk

196

00:08:10,189 --> 00:08:08,039

about these topics typically but

197

00:08:11,930 --> 00:08:10,199

um you know there is some openness by

198

00:08:14,270 --> 00:08:11,940

the general public which which bleeds

199

00:08:16,490 --> 00:08:14,280

over to you know employees of these

200

00:08:18,350 --> 00:08:16,500

agencies uh and that's a lot of what

201
00:08:19,570 --> 00:08:18,360
we're seeing you know there's the

202
00:08:22,189 --> 00:08:19,580
interest

203
00:08:23,629 --> 00:08:22,199
and a lot of these agencies in the

204
00:08:25,909 --> 00:08:23,639
government it's similar to the interest

205
00:08:29,150 --> 00:08:25,919
in the general public which is about you

206
00:08:29,930 --> 00:08:29,160
know polls show 50 50 split if not you

207
00:08:33,050 --> 00:08:29,940
know

208
00:08:35,029 --> 00:08:33,060
uh these days more towards people having

209
00:08:36,709 --> 00:08:35,039
an interest than not

210
00:08:38,089 --> 00:08:36,719
yeah it's really interesting one thing

211
00:08:40,730 --> 00:08:38,099
you know you mentioned that sort the end

212
00:08:42,589 --> 00:08:40,740
of the 90s early 2000s a big event back

213
00:08:44,029 --> 00:08:42,599

then was the 2001 disclosure project

214

00:08:46,730 --> 00:08:44,039

with Stephen Greer which obviously

215

00:08:48,290 --> 00:08:46,740

wasn't so big for the subjects but then

216

00:08:50,329 --> 00:08:48,300

it feels like it may have simmered down

217

00:08:52,490 --> 00:08:50,339

quite quickly afterwards and then we

218

00:08:54,410 --> 00:08:52,500

have the sort of 2013 citizens hearing

219

00:08:56,990 --> 00:08:54,420

on disclosure so it feels like we've got

220

00:08:59,509 --> 00:08:57,000

you know bumps along the road and you

221

00:09:01,790 --> 00:08:59,519

know all pre-2017 how did that feel that

222

00:09:03,650 --> 00:09:01,800

time did did you see like a moment of

223

00:09:06,170 --> 00:09:03,660

excitement for the for the subject and

224

00:09:10,130 --> 00:09:06,180

and it died down like how was it yeah

225

00:09:12,530 --> 00:09:10,140

yeah I think so I think you're right um

226

00:09:14,870 --> 00:09:12,540

so like 2001

227

00:09:16,670 --> 00:09:14,880

that was really huge for me because like

228

00:09:18,350 --> 00:09:16,680

I said you know I was interested in

229

00:09:20,870 --> 00:09:18,360

these these stories that weren't being

230

00:09:23,269 --> 00:09:20,880

told and you know then Stephen Greer

231

00:09:25,490 --> 00:09:23,279

brings you know all of these very

232

00:09:27,050 --> 00:09:25,500

credible people who just you know are

233

00:09:28,730 --> 00:09:27,060

people the type of people that would be

234

00:09:31,070 --> 00:09:28,740

newsworthy

235

00:09:34,250 --> 00:09:31,080

um on on many topics especially this one

236

00:09:36,410 --> 00:09:34,260

uh there's a packed House of media you

237

00:09:39,650 --> 00:09:36,420

know watching these people talk but I

238

00:09:41,690 --> 00:09:39,660

think CNN did one couple minute piece

239

00:09:44,630 --> 00:09:41,700

um there were only a couple pieces of

240

00:09:46,970 --> 00:09:44,640

media that resulted from that and that

241

00:09:49,490 --> 00:09:46,980

was really shocking to me that was a

242

00:09:51,410 --> 00:09:49,500

huge motivator for me

243

00:09:54,290 --> 00:09:51,420

um to get information out there and it

244

00:09:56,630 --> 00:09:54,300

was also you know um so that that was a

245

00:10:01,550 --> 00:09:56,640

big one certainly

246

00:10:05,030 --> 00:10:01,560

um and then like you said 2013 2013 was

247

00:10:07,310 --> 00:10:05,040

the problem with 2013 and by that time

248

00:10:09,410 --> 00:10:07,320

and a little bit of the problem of 2001

249

00:10:12,170 --> 00:10:09,420

is they still weren't reading the room

250

00:10:16,190 --> 00:10:12,180

when it came to the public and and uh

251
00:10:19,130 --> 00:10:16,200
the media so you know when you mix in

252
00:10:24,170 --> 00:10:19,140
um some very credible established

253
00:10:26,509 --> 00:10:24,180
um you know defense industry people with

254
00:10:29,050 --> 00:10:26,519
um people making really wild claims that

255
00:10:33,590 --> 00:10:29,060
they can't substantiate some of whom

256
00:10:36,290 --> 00:10:33,600
arguably could be debunked you know

257
00:10:38,210 --> 00:10:36,300
um it makes it more difficult for the

258
00:10:41,150 --> 00:10:38,220
media to cover those sort of topics and

259
00:10:43,250 --> 00:10:41,160
and the same with 2013 was similar so I

260
00:10:45,650 --> 00:10:43,260
think that it they demonstrated you know

261
00:10:47,389 --> 00:10:45,660
researchers can be a little more

262
00:10:49,790 --> 00:10:47,399
disciplined I mean if we really want to

263
00:10:51,889 --> 00:10:49,800

get the type of coverage that will be

264

00:10:53,569 --> 00:10:51,899

really effective to the general public I

265

00:10:55,250 --> 00:10:53,579

think both of those

266

00:10:59,630 --> 00:10:55,260

um

267

00:11:01,490 --> 00:10:59,640

a lot of people so I think they were

268

00:11:02,990 --> 00:11:01,500

effective for the population but the

269

00:11:04,850 --> 00:11:03,000

media still didn't kind of pick it up in

270

00:11:07,490 --> 00:11:04,860

the manner I think we were all hoping

271

00:11:10,250 --> 00:11:07,500

and so to your point you know these were

272

00:11:11,210 --> 00:11:10,260

kind of these little moments of

273

00:11:14,930 --> 00:11:11,220

um

274

00:11:16,250 --> 00:11:14,940

of attention you know for me the big

275

00:11:18,110 --> 00:11:16,260

moments of attention were like

276

00:11:20,530 --> 00:11:18,120

Stephenville was a really big one for

277

00:11:23,090 --> 00:11:20,540

mufon at the time you know when we were

278

00:11:24,889 --> 00:11:23,100

investigating that um that was also a

279

00:11:26,870 --> 00:11:24,899

huge one and then Chicago O'Hare was

280

00:11:28,850 --> 00:11:26,880

also a really big one and those are

281

00:11:30,949 --> 00:11:28,860

great cases because those uh you know

282

00:11:33,230 --> 00:11:30,959

we've got a lot of data we've got a lot

283

00:11:36,110 --> 00:11:33,240

of mainstream media involved in fact

284

00:11:38,630 --> 00:11:36,120

both of those events were kind of uh

285

00:11:40,250 --> 00:11:38,640

made big by mainstream media and and

286

00:11:42,350 --> 00:11:40,260

that's what's kind of weird is that you

287

00:11:44,269 --> 00:11:42,360

just we it's always a wait and see what

288

00:11:47,030 --> 00:11:44,279

is a media going to pick up on

289

00:11:49,430 --> 00:11:47,040

is it a good case that we can research

290

00:11:51,889 --> 00:11:49,440

and provide some good data on or is it

291

00:11:53,870 --> 00:11:51,899

something to shy away from uh luckily

292

00:11:55,670 --> 00:11:53,880

you know they jumped on Stephenville and

293

00:11:57,769 --> 00:11:55,680

Chicago O'Hare and there was good

294

00:11:59,810 --> 00:11:57,779

information to share and so those got

295

00:12:01,430 --> 00:11:59,820

those I think were those were the

296

00:12:03,410 --> 00:12:01,440

perfect storm where you have the media

297

00:12:05,990 --> 00:12:03,420

and the public really interested and

298

00:12:08,329 --> 00:12:06,000

they were kind of little uh test runs

299

00:12:11,090 --> 00:12:08,339

for the New York Times which was the big

300

00:12:12,590 --> 00:12:11,100

one of course in 2017. yeah completely

301

00:12:14,870 --> 00:12:12,600

agree it does seem like it was also

302

00:12:16,790 --> 00:12:14,880

leading towards something and when that

303

00:12:19,550 --> 00:12:16,800

happened yeah I guess it did seem like

304

00:12:21,590 --> 00:12:19,560

it changed the change the game a bit and

305

00:12:23,389 --> 00:12:21,600

here we are you know five six years

306

00:12:25,550 --> 00:12:23,399

later so

307

00:12:28,009 --> 00:12:25,560

next up I'd love to talk about Enigma

308

00:12:29,389 --> 00:12:28,019

Labs because this is an Endeavor that

309

00:12:31,190 --> 00:12:29,399

I've been keeping an eye on and I think

310

00:12:32,569 --> 00:12:31,200

it's really fantastic how it's been

311

00:12:33,889 --> 00:12:32,579

launched and that so could you just tell

312

00:12:35,930 --> 00:12:33,899

us a bit of background about how it came

313

00:12:39,470 --> 00:12:35,940

about and its purpose

314

00:12:41,269 --> 00:12:39,480

yeah really uh some people in the tech

315

00:12:46,430 --> 00:12:41,279

industry

316

00:12:49,730 --> 00:12:46,440

um who uh wanted to figure out how to

317

00:12:51,290 --> 00:12:49,740

help how uh you know looking at this

318

00:12:54,410 --> 00:12:51,300

topic

319

00:12:57,170 --> 00:12:54,420

um some of you know uh

320

00:12:59,810 --> 00:12:57,180

what can be done and so talking to

321

00:13:01,310 --> 00:12:59,820

different people they have connections

322

00:13:04,069 --> 00:13:01,320

with

323

00:13:06,710 --> 00:13:04,079

um very intelligently I think discovered

324

00:13:08,870 --> 00:13:06,720

that you know one of the big things and

325

00:13:13,190 --> 00:13:08,880

and you may have heard this I'm sure you

326

00:13:16,009 --> 00:13:13,200

have a lot of us science oriented uh

327

00:13:17,569 --> 00:13:16,019

groups or individuals have been wanting

328

00:13:20,030 --> 00:13:17,579

a database

329

00:13:22,370 --> 00:13:20,040

um you know it's something that a lot of

330

00:13:24,590 --> 00:13:22,380

the seu group The Scientific Coalition

331

00:13:26,389 --> 00:13:24,600

for UAP studies came from mufon

332

00:13:28,790 --> 00:13:26,399

including myself from leadership in

333

00:13:31,370 --> 00:13:28,800

mufant and that's what we were always

334

00:13:33,470 --> 00:13:31,380

that was our major goal but there's

335

00:13:35,569 --> 00:13:33,480

limited resources

336

00:13:38,389 --> 00:13:35,579

um mufon had been getting a lot of

337

00:13:40,129 --> 00:13:38,399

requests from people to kind of to do

338

00:13:41,930 --> 00:13:40,139

the more

339

00:13:45,110 --> 00:13:41,940

um kind of Fringe type of stuff kind of

340

00:13:46,730 --> 00:13:45,120

similar to the disclosure in 2013. and

341

00:13:49,009 --> 00:13:46,740

so which is totally fair that's what the

342

00:13:50,870 --> 00:13:49,019

people wanted and so mufon decided to

343

00:13:52,550 --> 00:13:50,880

kind of open up the topics they were

344

00:13:55,430 --> 00:13:52,560

into

345

00:13:57,470 --> 00:13:55,440

um and so at that time you know a lot of

346

00:14:00,110 --> 00:13:57,480

the seu guys decide well let's focus on

347

00:14:01,670 --> 00:14:00,120

science and so that's kind of how seu

348

00:14:02,269 --> 00:14:01,680

started

349

00:14:04,250 --> 00:14:02,279

um

350

00:14:05,930 --> 00:14:04,260

but everybody's been wanting a database

351

00:14:08,750 --> 00:14:05,940

you hear valet you know was kind of

352

00:14:10,610 --> 00:14:08,760

working on a database the atip team uh

353

00:14:13,670 --> 00:14:10,620

to the stars

354

00:14:16,370 --> 00:14:13,680

um everybody so uh it was it's really

355

00:14:18,769 --> 00:14:16,380

smart that they were they chose that to

356

00:14:20,449 --> 00:14:18,779

hone in on and then luckily I was

357

00:14:22,490 --> 00:14:20,459

brought in and

358

00:14:24,170 --> 00:14:22,500

able to kind of introduce them to the

359

00:14:26,690 --> 00:14:24,180

scientific Community

360

00:14:30,350 --> 00:14:26,700

um and get us really embedded so now we

361

00:14:33,129 --> 00:14:30,360

uh regularly talk with uh a lot of the

362

00:14:35,690 --> 00:14:33,139

scientific Community uh

363

00:14:37,790 --> 00:14:35,700

you know that are into this topic that

364

00:14:39,590 --> 00:14:37,800

are researching UAP

365

00:14:41,750 --> 00:14:39,600

um the reason we've done that is because

366

00:14:43,610 --> 00:14:41,760

that's what that's the whole that's the

367

00:14:46,790 --> 00:14:43,620

big point of the tool I mean there's

368

00:14:48,889 --> 00:14:46,800

there's two things and we want the uh to

369

00:14:52,850 --> 00:14:48,899

share with the public so the public can

370

00:14:55,550 --> 00:14:52,860

have access to information can uh submit

371

00:14:57,410 --> 00:14:55,560

sightings look up sightings

372

00:14:59,810 --> 00:14:57,420

um so that the public has a place to go

373

00:15:02,030 --> 00:14:59,820

but then all of that data of course we

374

00:15:03,889 --> 00:15:02,040

want to get to researchers because uh

375

00:15:06,530 --> 00:15:03,899

all of us you know who have been in this

376

00:15:09,769 --> 00:15:06,540

topic feel that that's an excellent way

377

00:15:12,470 --> 00:15:09,779

to be able to make some really uh great

378

00:15:14,329 --> 00:15:12,480

discoveries and in fact at the seu you

379

00:15:17,990 --> 00:15:14,339

know we've been doing that um it took us

380

00:15:19,790 --> 00:15:18,000

a long time to manually scrub that data

381

00:15:22,490 --> 00:15:19,800

to find the really good cases to start

382

00:15:24,110 --> 00:15:22,500

to do some analysis on and we've got a

383

00:15:27,769 --> 00:15:24,120

couple projects going on right now if

384

00:15:29,930 --> 00:15:27,779

you go to explore scu.org you can go

385

00:15:31,250 --> 00:15:29,940

look at our last couple of newsletters I

386

00:15:33,829 --> 00:15:31,260

would highly recommend that and you can

387

00:15:35,030 --> 00:15:33,839

see some of the progress on some of

388

00:15:37,009 --> 00:15:35,040

those projects and some really

389

00:15:39,350 --> 00:15:37,019

interesting information

390

00:15:41,629 --> 00:15:39,360

but uh you know with Enigma Labs we're

391

00:15:44,150 --> 00:15:41,639

going to be able to greatly speed up the

392

00:15:45,949 --> 00:15:44,160

process of uh you know mechanically

393

00:15:48,290 --> 00:15:45,959

scoring cases to find out where the good

394

00:15:50,449 --> 00:15:48,300

cases are so researchers can have good

395

00:15:52,610 --> 00:15:50,459

batches of cases that they can then

396

00:15:55,490 --> 00:15:52,620

investigate and research for whatever

397

00:15:57,410 --> 00:15:55,500

they're doing and you know it's it's a

398

00:15:59,509 --> 00:15:57,420

citizen science thing too everyone will

399

00:16:02,389 --> 00:15:59,519

have at their fingertips finally you

400

00:16:03,949 --> 00:16:02,399

know these tools to be able to do their

401
00:16:07,670 --> 00:16:03,959
own research and make some discoveries

402
00:16:09,710 --> 00:16:07,680
so super super excited about it uh We've

403
00:16:11,210 --> 00:16:09,720
you know we're launching things slowly

404
00:16:13,910 --> 00:16:11,220
yeah

405
00:16:15,889 --> 00:16:13,920
um and you know the especially the

406
00:16:18,110 --> 00:16:15,899
researcher tools will probably be more

407
00:16:19,910 --> 00:16:18,120
towards the the back end of of our of

408
00:16:22,009 --> 00:16:19,920
our launch but

409
00:16:23,629 --> 00:16:22,019
um you know right now we have uh

410
00:16:26,569 --> 00:16:23,639
something I've been working on which is

411
00:16:29,509 --> 00:16:26,579
commissioning a lot of great writers to

412
00:16:31,610 --> 00:16:29,519
write pieces about UAP cases and people

413
00:16:34,629 --> 00:16:31,620

and individuals to give people a

414

00:16:36,949 --> 00:16:34,639

background so if you go to our website

415

00:16:39,170 --> 00:16:36,959

enigmabooks.io and look at the library

416

00:16:41,090 --> 00:16:39,180

you're going to see dozens and dozens of

417

00:16:44,870 --> 00:16:41,100

Articles

418

00:16:48,590 --> 00:16:44,880

um well researched and cited uh on a lot

419

00:16:50,990 --> 00:16:48,600

of great cases new and old

420

00:16:52,129 --> 00:16:51,000

um yeah and and that's a new blog that

421

00:16:54,110 --> 00:16:52,139

we just put up and that's the other

422

00:16:56,569 --> 00:16:54,120

thing I'm working on is a Blog so we're

423

00:16:58,910 --> 00:16:56,579

gonna have some regular blog articles

424

00:17:00,829 --> 00:16:58,920

coming out where we are sharing

425

00:17:03,650 --> 00:17:00,839

information that we're Gathering but

426

00:17:05,689 --> 00:17:03,660

also you know giving you our thoughts or

427

00:17:07,789 --> 00:17:05,699

ideas on other things so for example

428

00:17:10,189 --> 00:17:07,799

completely transparent in fact if you

429

00:17:12,530 --> 00:17:10,199

slow scroll down a little bit the last

430

00:17:15,409 --> 00:17:12,540

blog was transparency for data privacy

431

00:17:17,689 --> 00:17:15,419

for the people what that means is most

432

00:17:20,030 --> 00:17:17,699

of our our individuals in our

433

00:17:22,370 --> 00:17:20,040

organization don't share their name they

434

00:17:25,610 --> 00:17:22,380

want to remain anonymous um right and

435

00:17:28,250 --> 00:17:25,620

people you know we've seus similar

436

00:17:29,930 --> 00:17:28,260

because the taboo still exists you know

437

00:17:32,090 --> 00:17:29,940

and so

438

00:17:33,950 --> 00:17:32,100

um unfortunately but uh I always make

439

00:17:36,289 --> 00:17:33,960

this argument when people

440

00:17:38,270 --> 00:17:36,299

um have said well you know I thought

441

00:17:41,029 --> 00:17:38,280

everything's about transparency it is

442

00:17:43,789 --> 00:17:41,039

and and we're transparent with the data

443

00:17:46,010 --> 00:17:43,799

and what I mean by that is that with the

444

00:17:48,650 --> 00:17:46,020

blog we're going to be sharing like all

445

00:17:51,169 --> 00:17:48,660

of the sausage making details so you'll

446

00:17:53,330 --> 00:17:51,179

be able to see how that scoring Works

447

00:17:55,070 --> 00:17:53,340

um you know the scoring right now we we

448

00:17:56,390 --> 00:17:55,080

are very transparent with the scientific

449

00:17:58,310 --> 00:17:56,400

Community because we're asking their

450

00:17:59,510 --> 00:17:58,320

input what do you guys think of this you

451
00:18:00,950 --> 00:17:59,520
know what do you think should be tweaked

452
00:18:02,690 --> 00:18:00,960
or changed

453
00:18:04,669 --> 00:18:02,700
um and we want to make sure that it's

454
00:18:07,310 --> 00:18:04,679
fully transparent because researchers

455
00:18:09,049 --> 00:18:07,320
need to understand every minute detail

456
00:18:10,669 --> 00:18:09,059
about the data and how the data is

457
00:18:12,590 --> 00:18:10,679
gathered if they're going to write a

458
00:18:15,289 --> 00:18:12,600
paper because they have to justify that

459
00:18:17,390 --> 00:18:15,299
or or speak to that

460
00:18:19,190 --> 00:18:17,400
um so it's incumbent upon us to be

461
00:18:20,750 --> 00:18:19,200
transparent on all of those things so

462
00:18:22,010 --> 00:18:20,760
it's going to be fun because we're going

463
00:18:24,230 --> 00:18:22,020

to be starting to have these

464

00:18:26,930 --> 00:18:24,240

conversations in the research community

465

00:18:28,549 --> 00:18:26,940

that really haven't happened yet but are

466

00:18:30,650 --> 00:18:28,559

really important conversations where

467

00:18:32,029 --> 00:18:30,660

we'll be able to talk about you know all

468

00:18:34,070 --> 00:18:32,039

of this stuff how do we do this how do

469

00:18:36,529 --> 00:18:34,080

we square that how do we analyze this

470

00:18:38,930 --> 00:18:36,539

how do we figure that or this out let

471

00:18:40,850 --> 00:18:38,940

alone being able to discuss and debate

472

00:18:43,310 --> 00:18:40,860

the findings that people have which I'm

473

00:18:44,570 --> 00:18:43,320

extremely excited about yeah that is

474

00:18:46,970 --> 00:18:44,580

exciting I'm just going to bring that

475

00:18:48,590 --> 00:18:46,980

back up because I want people all the

476

00:18:50,630 --> 00:18:48,600

links for everything we discuss are in

477

00:18:52,789 --> 00:18:50,640

the description below but I want people

478

00:18:55,190 --> 00:18:52,799

to go check out the blogs but this piece

479

00:18:57,289 --> 00:18:55,200

I I just came across it today and read

480

00:18:59,450 --> 00:18:57,299

it it's fascinating you know it gives

481

00:19:00,830 --> 00:18:59,460

details on the sightings and you've got

482

00:19:03,770 --> 00:19:00,840

a video with

483

00:19:06,230 --> 00:19:03,780

the anomaly or anomalies from two

484

00:19:07,850 --> 00:19:06,240

Vantage points and and this is great and

485

00:19:10,130 --> 00:19:07,860

then you know you mentioned that people

486

00:19:12,890 --> 00:19:10,140

can submit sightings it's a really easy

487

00:19:14,870 --> 00:19:12,900

interface to give details

488

00:19:17,630 --> 00:19:14,880

um on your sighting with an option to

489

00:19:19,070 --> 00:19:17,640

add videos and images if needs be which

490

00:19:21,409 --> 00:19:19,080

I think is just really good to have a

491

00:19:23,870 --> 00:19:21,419

really user-friendly tool like that so

492

00:19:25,850 --> 00:19:23,880

that's really good um what I was going

493

00:19:27,409 --> 00:19:25,860

to ask about oh it's just my mind's just

494

00:19:30,289 --> 00:19:27,419

gone sorry it's been a long day it's

495

00:19:32,510 --> 00:19:30,299

been a long day no problem I worked it

496

00:19:34,610 --> 00:19:32,520

out how is it you know you get all these

497

00:19:36,289 --> 00:19:34,620

sightings coming in from the public how

498

00:19:37,909 --> 00:19:36,299

do you determine like which ones you're

499

00:19:39,529 --> 00:19:37,919

going to research over others is it like

500

00:19:41,570 --> 00:19:39,539

a process of people sitting down and

501
00:19:44,510 --> 00:19:41,580
that's a great point so we're not

502
00:19:46,669 --> 00:19:44,520
necessarily the research group

503
00:19:48,890 --> 00:19:46,679
um we will be providing data as we run

504
00:19:51,710 --> 00:19:48,900
across it and findings as we run across

505
00:19:53,750 --> 00:19:51,720
it but our focus is not so much the

506
00:19:55,549 --> 00:19:53,760
research it's more of the Gathering of

507
00:19:59,330 --> 00:19:55,559
the sightings and then getting that

508
00:20:00,610 --> 00:19:59,340
output uh getting that data into our

509
00:20:04,850 --> 00:20:00,620
databases

510
00:20:07,430 --> 00:20:04,860
we're doing also is we're working with a

511
00:20:11,150 --> 00:20:07,440
lot of UFO researchers around the world

512
00:20:14,270 --> 00:20:11,160
to acquire new databases uh We've we've

513
00:20:17,390 --> 00:20:14,280

developed technology where we can take a

514

00:20:19,669 --> 00:20:17,400

letter a report and scan that and get

515

00:20:22,430 --> 00:20:19,679

all the data out of it and get it into

516

00:20:24,950 --> 00:20:22,440

the database so we're kind of that Tech

517

00:20:26,810 --> 00:20:24,960

side to get everything into the database

518

00:20:29,270 --> 00:20:26,820

for people to use and then work on those

519

00:20:30,909 --> 00:20:29,280

tools and ingesting and everything to to

520

00:20:33,409 --> 00:20:30,919

make that data available for everybody

521

00:20:34,789 --> 00:20:33,419

so we're kind of like the providing the

522

00:20:37,490 --> 00:20:34,799

tools

523

00:20:38,930 --> 00:20:37,500

um essentially for for researchers uh

524

00:20:40,430 --> 00:20:38,940

and then the researchers are doing the

525

00:20:42,110 --> 00:20:40,440

work and we hope to create a community

526

00:20:45,470 --> 00:20:42,120

where researchers can share their

527

00:20:46,970 --> 00:20:45,480

findings and hopefully you know work

528

00:20:49,310 --> 00:20:46,980

with especially some of these UFO

529

00:20:51,470 --> 00:20:49,320

researchers that we work with who are um

530

00:20:53,990 --> 00:20:51,480

you know very scientific minded and very

531

00:20:55,970 --> 00:20:54,000

accomplished in their fields so they can

532

00:20:57,169 --> 00:20:55,980

also troubleshoot that data because

533

00:20:59,270 --> 00:20:57,179

that's kind of like what we do at SCE

534

00:21:01,070 --> 00:20:59,280

you you know yeah um and that's what's

535

00:21:03,529 --> 00:21:01,080

that's kind of the scientific process

536

00:21:05,870 --> 00:21:03,539

which can be difficult and I know a lot

537

00:21:08,390 --> 00:21:05,880

of people in the UFO world can sometimes

538

00:21:10,250 --> 00:21:08,400

have struggle with it because you know

539

00:21:12,409 --> 00:21:10,260

the idea of the scientific process is

540

00:21:15,169 --> 00:21:12,419

you come up with an idea you write an

541

00:21:17,390 --> 00:21:15,179

argument as to why I'm right

542

00:21:19,310 --> 00:21:17,400

um and then people beat it up and you

543

00:21:20,630 --> 00:21:19,320

should have beat it up yourself and in

544

00:21:23,630 --> 00:21:20,640

fact in your paper you should have

545

00:21:26,029 --> 00:21:23,640

here's where I may be wrong yeah

546

00:21:28,130 --> 00:21:26,039

um and then you know you send it out

547

00:21:29,690 --> 00:21:28,140

people beat it up and the whole point is

548

00:21:33,649 --> 00:21:29,700

you know

549

00:21:36,649 --> 00:21:33,659

um to have some good data as output and

550

00:21:39,590 --> 00:21:36,659

I think that we've seen that um there

551
00:21:44,029 --> 00:21:39,600
are Skeptics who are always skeptical

552
00:21:46,130 --> 00:21:44,039
um of cases even very strong ones but I

553
00:21:49,549 --> 00:21:46,140
think what we've seen is you know for

554
00:21:51,649 --> 00:21:49,559
example at seu uh the Navy case the

555
00:21:54,409 --> 00:21:51,659
Aguadilla case some of the cases we've

556
00:21:56,750 --> 00:21:54,419
got papers on are very strong does

557
00:22:00,289 --> 00:21:56,760
everybody agree with us no

558
00:22:02,810 --> 00:22:00,299
but the vast majority do and the vast

559
00:22:04,549 --> 00:22:02,820
majority if not all yeah I would say

560
00:22:07,669 --> 00:22:04,559
I'll stick with right now the vast

561
00:22:10,669 --> 00:22:07,679
majority of scientists agree as well and

562
00:22:12,529 --> 00:22:10,679
it is a a consensus sort of thing yeah

563
00:22:15,110 --> 00:22:12,539

so we feel pretty comfortable with those

564

00:22:17,570 --> 00:22:15,120

those pieces that they're strong and we

565

00:22:19,669 --> 00:22:17,580

do have a consensus from the scientific

566

00:22:22,070 --> 00:22:19,679

community that that we were on the right

567

00:22:24,289 --> 00:22:22,080

track with those papers and we have been

568

00:22:27,110 --> 00:22:24,299

able to demonstrate some anomalous

569

00:22:29,330 --> 00:22:27,120

Behavior yeah and I think you know the

570

00:22:30,890 --> 00:22:29,340

subject's been crying out for to be

571

00:22:33,470 --> 00:22:30,900

taken seriously by the scientific

572

00:22:35,210 --> 00:22:33,480

community so I think the more we see of

573

00:22:37,970 --> 00:22:35,220

that it's you know it's it's nothing but

574

00:22:39,830 --> 00:22:37,980

good going forward so you know it's

575

00:22:40,490 --> 00:22:39,840

really good to see

576

00:22:42,470 --> 00:22:40,500

um

577

00:22:43,850 --> 00:22:42,480

I'm all over the shop tonight and my

578

00:22:46,070 --> 00:22:43,860

apologies

579

00:22:47,330 --> 00:22:46,080

so yeah you mentioned seu again you know

580

00:22:48,770 --> 00:22:47,340

great bunch of people you know I've

581

00:22:51,470 --> 00:22:48,780

spoken to Rich Hoffman a couple of times

582

00:22:53,470 --> 00:22:51,480

fantastic organization and yeah I think

583

00:22:55,610 --> 00:22:53,480

the work they do is fantastic and

584

00:22:56,810 --> 00:22:55,620

obviously you're a part of that is there

585

00:22:58,370 --> 00:22:56,820

anything they're working on that you can

586

00:23:01,010 --> 00:22:58,380

tell us about at the moment that we

587

00:23:02,270 --> 00:23:01,020

might have to look forward to yeah I

588

00:23:05,570 --> 00:23:02,280

think

589

00:23:07,850 --> 00:23:05,580

the to look forward to one of the great

590

00:23:11,029 --> 00:23:07,860

things that we've been working on and in

591

00:23:12,230 --> 00:23:11,039

fact after I end here which now that I

592

00:23:14,630 --> 00:23:12,240

think about it we'll have to end

593

00:23:17,930 --> 00:23:14,640

somewhat sharp but uh after I end here

594

00:23:19,970 --> 00:23:17,940

we're gonna I'll join them for a meeting

595

00:23:23,210 --> 00:23:19,980

um but a lot of what we've been doing is

596

00:23:25,370 --> 00:23:23,220

behind the scenes networking and that's

597

00:23:27,230 --> 00:23:25,380

been a lot of fun and actually really

598

00:23:29,330 --> 00:23:27,240

rewarding

599

00:23:31,549 --> 00:23:29,340

um of course I work on the public uh

600

00:23:33,230 --> 00:23:31,559

education or public relations side of

601
00:23:35,210 --> 00:23:33,240
things and um

602
00:23:37,430 --> 00:23:35,220
and I would say we've had a little bit

603
00:23:39,649 --> 00:23:37,440
of input or output but not a ton of

604
00:23:41,570 --> 00:23:39,659
output in the the last few months which

605
00:23:43,909 --> 00:23:41,580
which hopefully we'll get more here soon

606
00:23:47,210 --> 00:23:43,919
but that's because we've been especially

607
00:23:49,909 --> 00:23:47,220
you know before and since our conference

608
00:23:52,250 --> 00:23:49,919
uh we've been networking bringing people

609
00:23:54,529 --> 00:23:52,260
together and you know what got out that

610
00:23:57,169 --> 00:23:54,539
at our conference we had space for us

611
00:23:59,750 --> 00:23:57,179
there we had several government agencies

612
00:24:01,010 --> 00:23:59,760
represented there mingling and working

613
00:24:04,370 --> 00:24:01,020

with

614

00:24:06,590 --> 00:24:04,380

um you know the the UFO researchers uh

615

00:24:08,810 --> 00:24:06,600

and of course the UAP researchers

616

00:24:12,710 --> 00:24:08,820

themselves I mean a lot of our

617

00:24:15,590 --> 00:24:12,720

organization are people uh scientists or

618

00:24:18,350 --> 00:24:15,600

Engineers who regularly work with the

619

00:24:21,350 --> 00:24:18,360

government and uh even ASAP some of our

620

00:24:23,690 --> 00:24:21,360

members were part of OSAP so uh the

621

00:24:26,029 --> 00:24:23,700

government uh you know research group

622

00:24:30,529 --> 00:24:26,039

people like Eric Davis who's fairly

623

00:24:31,909 --> 00:24:30,539

active in seu and so um that's what

624

00:24:33,710 --> 00:24:31,919

we've been doing a lot of networking

625

00:24:36,350 --> 00:24:33,720

bringing people together and and that's

626
00:24:38,870 --> 00:24:36,360
been extremely rewarding

627
00:24:41,149 --> 00:24:38,880
um and educating people who are getting

628
00:24:43,250 --> 00:24:41,159
involved with this so it's been great I

629
00:24:45,230 --> 00:24:43,260
think the fruits of the efforts are that

630
00:24:46,669 --> 00:24:45,240
I think we've been able to really help

631
00:24:48,770 --> 00:24:46,679
get

632
00:24:50,870 --> 00:24:48,780
um people informed and bring people

633
00:24:52,490 --> 00:24:50,880
together who are going to help

634
00:24:54,890 --> 00:24:52,500
um these agencies and these different

635
00:24:57,350 --> 00:24:54,900
groups that are getting involved we've

636
00:24:59,690 --> 00:24:57,360
been very open with uapx and with

637
00:25:02,690 --> 00:24:59,700
Galileo they've been coming to us

638
00:25:04,789 --> 00:25:02,700

because they want papers they want help

639

00:25:07,010 --> 00:25:04,799

um and so and we've been offering that

640

00:25:08,450 --> 00:25:07,020

where we can so I think we've been a

641

00:25:11,149 --> 00:25:08,460

really important part of making this

642

00:25:13,789 --> 00:25:11,159

cohesive scientific UAP research kind of

643

00:25:15,230 --> 00:25:13,799

community which is extremely needed

644

00:25:17,210 --> 00:25:15,240

right now because that's where

645

00:25:19,789 --> 00:25:17,220

government agencies are looking to to

646

00:25:21,350 --> 00:25:19,799

help them figure out what to do yeah it

647

00:25:23,390 --> 00:25:21,360

does it just brings credibility to the

648

00:25:24,710 --> 00:25:23,400

subject like I said it's what we need I

649

00:25:26,810 --> 00:25:24,720

just wanted to highlight two more things

650

00:25:28,310 --> 00:25:26,820

sorry just real quick we do have some

651

00:25:30,110 --> 00:25:28,320

papers that we are working on that

652

00:25:32,690 --> 00:25:30,120

people can go look at uh we'll be

653

00:25:34,850 --> 00:25:32,700

updating this website soon where people

654

00:25:36,769 --> 00:25:34,860

will be able to see the projects we're

655

00:25:39,649 --> 00:25:36,779

working on more

656

00:25:42,230 --> 00:25:39,659

um easily but we're working like we have

657

00:25:43,669 --> 00:25:42,240

a Uso project we have a types and shapes

658

00:25:44,930 --> 00:25:43,679

project where we're taking that data

659

00:25:47,090 --> 00:25:44,940

that I was talking about earlier and

660

00:25:50,149 --> 00:25:47,100

doing some analysis

661

00:25:52,789 --> 00:25:50,159

um and uh you know even at Enigma Labs

662

00:25:54,230 --> 00:25:52,799

we're we're really partnered up with seu

663

00:25:56,149 --> 00:25:54,240

to help on some of those

664

00:25:57,769 --> 00:25:56,159

that's incredible yeah I just wanted to

665

00:26:00,289 --> 00:25:57,779

highlight this question regarding Enigma

666

00:26:02,450 --> 00:26:00,299

that I missed it's Echoes In Lo-Fi

667

00:26:04,549 --> 00:26:02,460

says are people involved in the armed

668

00:26:06,470 --> 00:26:04,559

forces encouraged to use enigma and if

669

00:26:08,690 --> 00:26:06,480

so a member level could be helpful for

670

00:26:10,490 --> 00:26:08,700

example normal citizen level one

671

00:26:12,710 --> 00:26:10,500

um Services employees level two is that

672

00:26:15,169 --> 00:26:12,720

something you've discussed or considered

673

00:26:19,010 --> 00:26:15,179

uh we definitely want people in the

674

00:26:21,590 --> 00:26:19,020

armed forces uh to use the app so yeah

675

00:26:23,210 --> 00:26:21,600

great question in fact right now we are

676

00:26:25,789 --> 00:26:23,220

really looking for people to submit

677

00:26:27,950 --> 00:26:25,799

sightings so if any of you have had a

678

00:26:29,690 --> 00:26:27,960

sighting please go to our website uh and

679

00:26:31,610 --> 00:26:29,700

take a minute and submit that sighting

680

00:26:33,590 --> 00:26:31,620

it's extremely helpful for us because

681

00:26:37,730 --> 00:26:33,600

right now we're you know we're teaching

682

00:26:39,769 --> 00:26:37,740

the machines and we are testing and

683

00:26:42,049 --> 00:26:39,779

troubleshooting all of that

684

00:26:45,350 --> 00:26:42,059

um and the reason this gets to the

685

00:26:47,570 --> 00:26:45,360

question is that you know our system is

686

00:26:48,470 --> 00:26:47,580

able to identify

687

00:26:50,690 --> 00:26:48,480

um

688

00:26:52,010 --> 00:26:50,700

people who are in the armed forces so

689

00:26:55,549 --> 00:26:52,020

for example which is a little different

690

00:26:57,169 --> 00:26:55,559

from other forms that you'll see is we

691

00:26:58,730 --> 00:26:57,179

do ask give us a little bit of

692

00:27:00,769 --> 00:26:58,740

information about the witness or

693

00:27:03,769 --> 00:27:00,779

Witnesses

694

00:27:05,990 --> 00:27:03,779

um and so we can tag things like that

695

00:27:08,390 --> 00:27:06,000

um so that those can be searchable right

696

00:27:10,669 --> 00:27:08,400

because of course to this person's point

697

00:27:13,250 --> 00:27:10,679

you know those are important it'd be

698

00:27:14,870 --> 00:27:13,260

important to be able to pull out you

699

00:27:16,610 --> 00:27:14,880

know I specifically want to see military

700

00:27:18,590 --> 00:27:16,620

cases

701
00:27:20,510 --> 00:27:18,600
um like the gossap was doing so yeah

702
00:27:22,669 --> 00:27:20,520
that could be pulled out

703
00:27:24,529 --> 00:27:22,679
um and in fact you'll see in our library

704
00:27:27,110 --> 00:27:24,539
most of the cases that we've written

705
00:27:30,169 --> 00:27:27,120
about our military cases because what I

706
00:27:32,390 --> 00:27:30,179
want to lay down there is the really the

707
00:27:36,110 --> 00:27:32,400
best stuff you know

708
00:27:38,029 --> 00:27:36,120
um so some people have you know that

709
00:27:40,190 --> 00:27:38,039
you'll see that in there that what

710
00:27:42,169 --> 00:27:40,200
you're looking at if it's military law

711
00:27:44,210 --> 00:27:42,179
enforcement heavy is because you know

712
00:27:46,010 --> 00:27:44,220
what we're trying to do is show that

713
00:27:47,750 --> 00:27:46,020

this is the stuff that's been you know

714

00:27:49,250 --> 00:27:47,760

making people scratch their heads this

715

00:27:51,830 --> 00:27:49,260

is the reason come Congress is so

716

00:27:54,110 --> 00:27:51,840

interested is because of this history of

717

00:27:56,690 --> 00:27:54,120

good cases that are out there by uh

718

00:27:58,190 --> 00:27:56,700

credible people yeah I know it's just

719

00:27:59,990 --> 00:27:58,200

here in the comments star aquatic says

720

00:28:01,549 --> 00:28:00,000

yeah I see not straightforward to make a

721

00:28:03,230 --> 00:28:01,559

report then it is absolutely

722

00:28:04,909 --> 00:28:03,240

straightforward as we as we showed on

723

00:28:06,769 --> 00:28:04,919

the screen it's a very user-friendly

724

00:28:08,570 --> 00:28:06,779

I'll bring it back up one more time but

725

00:28:10,850 --> 00:28:08,580

it's a very user-friendly interface you

726

00:28:13,310 --> 00:28:10,860

literally pop in where you saw the

727

00:28:14,750 --> 00:28:13,320

sighting when some details about it

728

00:28:18,350 --> 00:28:14,760

upload

729

00:28:21,169 --> 00:28:18,360

a video or image how many witnesses boom

730

00:28:22,549 --> 00:28:21,179

you know it really is that simple yeah

731

00:28:24,950 --> 00:28:22,559

we made it really

732

00:28:27,710 --> 00:28:24,960

I like this feature too

733

00:28:30,769 --> 00:28:27,720

um where we made it very simple in that

734

00:28:32,570 --> 00:28:30,779

we have one screen and then we asked you

735

00:28:34,909 --> 00:28:32,580

want to put in more information if you

736

00:28:37,430 --> 00:28:34,919

do it goes to a second screen oh right

737

00:28:39,890 --> 00:28:37,440

okay you know some people don't want to

738

00:28:41,330 --> 00:28:39,900

take a bunch of time

739

00:28:42,950 --> 00:28:41,340

um they just want to take a short amount

740

00:28:44,690 --> 00:28:42,960

of time so that first page is at least

741

00:28:46,370 --> 00:28:44,700

give us this

742

00:28:48,710 --> 00:28:46,380

um if if you have some more time give us

743

00:28:50,269 --> 00:28:48,720

some more if not thank you for for your

744

00:28:51,169 --> 00:28:50,279

contribution

745

00:28:53,149 --> 00:28:51,179

um and

746

00:28:55,370 --> 00:28:53,159

yeah so we've kept it very very simple

747

00:28:56,570 --> 00:28:55,380

very easy for people and you can remain

748

00:29:00,110 --> 00:28:56,580

anonymous

749

00:29:03,529 --> 00:29:00,120

um yeah there's a check there and uh

750

00:29:06,110 --> 00:29:03,539

then your data is not ported you know

751
00:29:07,130 --> 00:29:06,120
and it you can remain anonymous yeah I

752
00:29:08,510 --> 00:29:07,140
think that's really good because I think

753
00:29:10,610 --> 00:29:08,520
some people may just in the initial

754
00:29:12,769 --> 00:29:10,620
phase just want to get the sighting

755
00:29:15,590 --> 00:29:12,779
reported and not go into so much detail

756
00:29:17,149 --> 00:29:15,600
but maybe they can do a later date so I

757
00:29:18,710 --> 00:29:17,159
think that's really good

758
00:29:20,149 --> 00:29:18,720
um now one thing another another thing

759
00:29:21,830 --> 00:29:20,159
that I really wanted to talk about was

760
00:29:23,149 --> 00:29:21,840
the international UFO Congress that

761
00:29:24,649 --> 00:29:23,159
you're involved with so if you could

762
00:29:26,570 --> 00:29:24,659
just talk us a bit about that that'd be

763
00:29:29,510 --> 00:29:26,580

great thank you yeah so the

764

00:29:31,130 --> 00:29:29,520

international UFO Congress

765

00:29:33,710 --> 00:29:31,140

um well I used to help the previous

766

00:29:35,570 --> 00:29:33,720

owner the Browns who owned it since uh

767

00:29:37,850 --> 00:29:35,580

for a very long time

768

00:29:39,529 --> 00:29:37,860

um and they held it out in Laughlin I

769

00:29:42,470 --> 00:29:39,539

knew them and actually one of the things

770

00:29:44,269 --> 00:29:42,480

that I did with mufon in Colorado when I

771

00:29:46,850 --> 00:29:44,279

joined was uh help them with their doing

772

00:29:49,250 --> 00:29:46,860

conference and we were trained

773

00:29:51,289 --> 00:29:49,260

to do it by the international UFO

774

00:29:53,269 --> 00:29:51,299

Congress people they they were local to

775

00:29:54,950 --> 00:29:53,279

Colorado that's how I got to know them

776

00:29:57,049 --> 00:29:54,960

they trained us how to do conferences

777

00:29:59,149 --> 00:29:57,059

and then we did like the next five in

778

00:30:00,409 --> 00:29:59,159

Colorado because we really got it down

779

00:30:02,269 --> 00:30:00,419

pretty well

780

00:30:04,850 --> 00:30:02,279

um and then we started helping Roswell

781

00:30:06,409 --> 00:30:04,860

and then I in particular that first they

782

00:30:08,570 --> 00:30:06,419

called mufan and said hey will you guys

783

00:30:11,990 --> 00:30:08,580

help us with our conference so we said

784

00:30:13,730 --> 00:30:12,000

sure I helped them out the next year you

785

00:30:15,230 --> 00:30:13,740

know move on was kind of like well I'm

786

00:30:16,850 --> 00:30:15,240

not sure it's worth the time and I said

787

00:30:18,529 --> 00:30:16,860

well if you guys don't mind I'll do it

788

00:30:19,909 --> 00:30:18,539

just myself because they're a great

789

00:30:21,830 --> 00:30:19,919

group of people I like working with them

790

00:30:23,810 --> 00:30:21,840

they're like sure so I helped them out

791

00:30:25,730 --> 00:30:23,820

individually

792

00:30:27,350 --> 00:30:25,740

um and you know helped out the Congress

793

00:30:29,029 --> 00:30:27,360

because they were they helped us with

794

00:30:31,549 --> 00:30:29,039

doing the move on conferences and

795

00:30:35,090 --> 00:30:31,559

they're great people so

796

00:30:37,070 --> 00:30:35,100

um then you know this gentleman uh too

797

00:30:39,470 --> 00:30:37,080

was independently wealthy decided he

798

00:30:41,750 --> 00:30:39,480

wanted to make a website

799

00:30:43,909 --> 00:30:41,760

um Jason MccLellan one of my colleagues

800

00:30:47,510 --> 00:30:43,919

was already working for him John Rayo

801
00:30:49,370 --> 00:30:47,520
with open minds and so yeah he was like

802
00:30:52,130 --> 00:30:49,380
you know I'm gonna figure out the the

803
00:30:53,990 --> 00:30:52,140
UAP mystery and start this company in

804
00:30:55,490 --> 00:30:54,000
and that was his hobby he didn't care

805
00:30:57,950 --> 00:30:55,500
about making money he was making money

806
00:31:00,590 --> 00:30:57,960
off his other company so we hired a few

807
00:31:03,230 --> 00:31:00,600
of us including myself to run the and he

808
00:31:04,970 --> 00:31:03,240
bought the international qfo Congress so

809
00:31:06,289 --> 00:31:04,980
with open minds we ran it for a few

810
00:31:08,389 --> 00:31:06,299
years until

811
00:31:11,269 --> 00:31:08,399
finally open mind she's kind of ended it

812
00:31:14,930 --> 00:31:11,279
was expensive to to do everything he was

813
00:31:16,310 --> 00:31:14,940

doing and my girlfriend then uh bought

814

00:31:17,870 --> 00:31:16,320

my significant under bought the

815

00:31:19,430 --> 00:31:17,880

conference so I didn't get away from it

816

00:31:21,230 --> 00:31:19,440

and and

817

00:31:24,169 --> 00:31:21,240

which is funny because the conference is

818

00:31:25,909 --> 00:31:24,179

certainly more populous I kind of say I

819

00:31:27,889 --> 00:31:25,919

mean what we used to try to do is

820

00:31:29,750 --> 00:31:27,899

represent all of the different topics in

821

00:31:33,409 --> 00:31:29,760

the field

822

00:31:35,570 --> 00:31:33,419

um uh and not you know put our own

823

00:31:37,430 --> 00:31:35,580

interpretations on there just uh make

824

00:31:39,830 --> 00:31:37,440

sure that we didn't have charlatans or

825

00:31:41,450 --> 00:31:39,840

people who were serious about whatever

826

00:31:42,950 --> 00:31:41,460

it is they were researching and then

827

00:31:44,149 --> 00:31:42,960

what people in the field were interested

828

00:31:49,370 --> 00:31:44,159

in

829

00:31:50,930 --> 00:31:49,380

than than I'm typically known for that I

830

00:31:54,110 --> 00:31:50,940

work on

831

00:31:55,970 --> 00:31:54,120

um even to this date so um so it's kind

832

00:31:58,130 --> 00:31:55,980

of interesting that way but at the same

833

00:31:59,630 --> 00:31:58,140

time you know a lot of those people are

834

00:32:01,909 --> 00:31:59,640

my friends a lot of those people like

835

00:32:03,769 --> 00:32:01,919

let's say David Childress who Ancient

836

00:32:06,649 --> 00:32:03,779

Aliens he's a friend of mine he lives in

837

00:32:09,470 --> 00:32:06,659

in the Phoenix area and um we may not

838

00:32:11,149 --> 00:32:09,480

Giorgio uh used to go to the Congress

839

00:32:13,190 --> 00:32:11,159

the international UFO Congress for a

840

00:32:15,649 --> 00:32:13,200

long time and so a lot of these guys

841

00:32:17,930 --> 00:32:15,659

even if it's not you know my expertise

842

00:32:21,889 --> 00:32:17,940

or area of Interest they're still good

843

00:32:23,389 --> 00:32:21,899

friends and and and so I think just a

844

00:32:25,730 --> 00:32:23,399

lot of people especially in UFO Twitter

845

00:32:27,590 --> 00:32:25,740

I think that's important to say and I do

846

00:32:30,350 --> 00:32:27,600

say that a lot and it's not that I'm

847

00:32:33,529 --> 00:32:30,360

name dropping it's that I'm trying to

848

00:32:36,529 --> 00:32:33,539

say people with different opinions can

849

00:32:38,269 --> 00:32:36,539

be friends and can get along and hang

850

00:32:42,110 --> 00:32:38,279

out and have a good time with each other

851

00:32:43,010 --> 00:32:42,120

and debate the topic or

852

00:32:45,409 --> 00:32:43,020

um

853

00:32:47,570 --> 00:32:45,419

and and you know because so much you see

854

00:32:48,769 --> 00:32:47,580

online these divisions where it's like

855

00:32:49,970 --> 00:32:48,779

you've got to be in this camp but you

856

00:32:51,289 --> 00:32:49,980

got to be in that camp you don't have to

857

00:32:53,810 --> 00:32:51,299

be in any Camp

858

00:32:55,490 --> 00:32:53,820

um you can be yourself as an individual

859

00:32:57,590 --> 00:32:55,500

and have your own sense of opinions and

860

00:32:59,330 --> 00:32:57,600

ideas and still get along with people

861

00:33:01,250 --> 00:32:59,340

who have different sets of opinions and

862

00:33:04,549 --> 00:33:01,260

ideas and I think that's just really

863

00:33:06,470 --> 00:33:04,559

really important as far as a concept

864

00:33:09,230 --> 00:33:06,480

um and especially right now because that

865

00:33:10,669 --> 00:33:09,240

professionalism is is really what people

866

00:33:12,950 --> 00:33:10,679

are looking for that's what the media

867

00:33:14,930 --> 00:33:12,960

looks for that's what these agencies are

868

00:33:17,210 --> 00:33:14,940

trying to get involved are looking for

869

00:33:19,130 --> 00:33:17,220

that you know is a level of

870

00:33:20,690 --> 00:33:19,140

professionalism where everyone can work

871

00:33:22,970 --> 00:33:20,700

together well

872

00:33:24,769 --> 00:33:22,980

um and so I think that's important and

873

00:33:26,990 --> 00:33:24,779

that's an important aspect of Congress

874

00:33:29,090 --> 00:33:27,000

but this year was great

875

00:33:31,310 --> 00:33:29,100

this year we had a couple Movie Makers

876

00:33:32,930 --> 00:33:31,320

again friends

877

00:33:35,330 --> 00:33:32,940

um but it's kind of weird I'll get to

878

00:33:37,909 --> 00:33:35,340

this in just a second actually I want to

879

00:33:40,310 --> 00:33:37,919

circle around to that that topic but um

880

00:33:42,350 --> 00:33:40,320

you know James Fox showing his moment of

881

00:33:44,870 --> 00:33:42,360

contact for the first time not

882

00:33:47,509 --> 00:33:44,880

technically the premiere uh the premiere

883

00:33:49,370 --> 00:33:47,519

was the day after the conference but you

884

00:33:51,110 --> 00:33:49,380

know he snuck it in there so he could

885

00:33:53,630 --> 00:33:51,120

show our audiences

886

00:33:55,789 --> 00:33:53,640

um also we had Randy Nickerson there uh

887

00:33:58,610 --> 00:33:55,799

showing his film The aerial phenomenon

888

00:34:01,250 --> 00:33:58,620

and um speaking to it and then uh some

889

00:34:02,269 --> 00:34:01,260

of the witnesses from that case in that

890

00:34:04,190 --> 00:34:02,279

film

891

00:34:07,250 --> 00:34:04,200

um also I think that people haven't

892

00:34:10,550 --> 00:34:07,260

heard from ever we had an interview with

893

00:34:12,589 --> 00:34:10,560

uh we had of course Bryce zable who's

894

00:34:15,290 --> 00:34:12,599

doing his podcast need to know that

895

00:34:16,970 --> 00:34:15,300

everybody is so excited about

896

00:34:19,550 --> 00:34:16,980

um but uh

897

00:34:21,889 --> 00:34:19,560

Micah Hanks from the debrief who I think

898

00:34:23,990 --> 00:34:21,899

is amazing uh the debrief is such an

899

00:34:26,329 --> 00:34:24,000

incredible website we're lucky to have

900

00:34:28,669 --> 00:34:26,339

it and those guys do some incredible

901
00:34:30,530 --> 00:34:28,679
work uh Mike has helped us out some of

902
00:34:31,790 --> 00:34:30,540
those Library articles are his actually

903
00:34:35,450 --> 00:34:31,800
all right

904
00:34:36,589 --> 00:34:35,460
um a great writer and researcher

905
00:34:38,570 --> 00:34:36,599
um

906
00:34:41,270 --> 00:34:38,580
so yeah we had a lot of really great

907
00:34:43,970 --> 00:34:41,280
stuff and then David Marler uh which was

908
00:34:46,190 --> 00:34:43,980
really important too you know how to

909
00:34:49,010 --> 00:34:46,200
talk and then he officially announced

910
00:34:51,950 --> 00:34:49,020
his latest effort which is his National

911
00:34:54,109 --> 00:34:51,960
UFO archives Center

912
00:34:57,589 --> 00:34:54,119
um where he's got you know the biggest

913
00:34:59,870 --> 00:34:57,599

collection of data and it's growing

914

00:35:02,210 --> 00:34:59,880

um as far as the database Archive of

915

00:35:02,870 --> 00:35:02,220

materials and we're working with him

916

00:35:10,010 --> 00:35:02,880

um

917

00:35:12,050 --> 00:35:10,020

so so yeah really great event but uh

918

00:35:14,150 --> 00:35:12,060

it's kind of funny and this is why I'm

919

00:35:15,530 --> 00:35:14,160

circling around is because a lot of the

920

00:35:17,990 --> 00:35:15,540

people we had there to people like the

921

00:35:19,430 --> 00:35:18,000

nickerson's or the The Foxes or the

922

00:35:22,370 --> 00:35:19,440

marlers

923

00:35:24,290 --> 00:35:22,380

you know we have known and as a

924

00:35:26,150 --> 00:35:24,300

community you know having worked

925

00:35:29,089 --> 00:35:26,160

together for the last couple of decades

926

00:35:31,849 --> 00:35:29,099

it's like family you know me and Bryce

927

00:35:33,829 --> 00:35:31,859

Bryce and I you know have definitely had

928

00:35:36,170 --> 00:35:33,839

some phone calls where we've kind of

929

00:35:39,589 --> 00:35:36,180

disagreed about things

930

00:35:40,849 --> 00:35:39,599

um marlar and I not so much but

931

00:35:43,190 --> 00:35:40,859

um

932

00:35:45,050 --> 00:35:43,200

you know all of these people we've you

933

00:35:46,910 --> 00:35:45,060

know Randy there's this time where he's

934

00:35:48,050 --> 00:35:46,920

really tense at a conference and where I

935

00:35:49,670 --> 00:35:48,060

was trying to help him out and it was

936

00:35:53,750 --> 00:35:49,680

and I guess what I mean is you have

937

00:35:55,430 --> 00:35:53,760

these these uh such long histories yeah

938

00:35:57,589 --> 00:35:55,440

and that you have these moments of

939

00:35:59,329 --> 00:35:57,599

trauma and drama that you live through

940

00:36:00,829 --> 00:35:59,339

together

941

00:36:03,470 --> 00:36:00,839

um and that's what really makes it feel

942

00:36:06,349 --> 00:36:03,480

like a family where we're just so close

943

00:36:08,569 --> 00:36:06,359

and it it really is kind of funny these

944

00:36:10,609 --> 00:36:08,579

days too because when you know sometimes

945

00:36:12,370 --> 00:36:10,619

on UFO Twitter or something when you

946

00:36:14,990 --> 00:36:12,380

have these different camps people try to

947

00:36:16,670 --> 00:36:15,000

set each other set people against each

948

00:36:19,130 --> 00:36:16,680

other saying you know well this person

949

00:36:20,569 --> 00:36:19,140

to that and this person said that

950

00:36:22,550 --> 00:36:20,579

um or like with Eric Davis a lot of

951
00:36:24,050 --> 00:36:22,560
people are saying hey you know you sound

952
00:36:26,510 --> 00:36:24,060
like you're being

953
00:36:28,550 --> 00:36:26,520
you know you're not on team Eric Davis

954
00:36:29,990 --> 00:36:28,560
which of course I am I love the guy I

955
00:36:32,690 --> 00:36:30,000
know him

956
00:36:34,430 --> 00:36:32,700
um and uh you know I people don't

957
00:36:37,910 --> 00:36:34,440
realize that you know these

958
00:36:41,329 --> 00:36:37,920
relationships we have are solid and they

959
00:36:43,970 --> 00:36:41,339
go back quite a way so you're not really

960
00:36:46,849 --> 00:36:43,980
gonna get in between us you know we're

961
00:36:48,230 --> 00:36:46,859
yeah we go back quite a way so we're

962
00:36:51,170 --> 00:36:48,240
always going to be talking and working

963
00:36:53,450 --> 00:36:51,180

together and and friends and colleagues

964

00:36:55,849 --> 00:36:53,460

and um again it all comes back to you

965

00:36:58,790 --> 00:36:55,859

know working together well despite

966

00:37:00,349 --> 00:36:58,800

having differences yeah that's great to

967

00:37:02,089 --> 00:37:00,359

hear um we mentioned we had a chat

968

00:37:03,050 --> 00:37:02,099

before we came on just saying that you

969

00:37:04,730 --> 00:37:03,060

know the one thing I found with

970

00:37:07,370 --> 00:37:04,740

confidence is is the connections that

971

00:37:08,870 --> 00:37:07,380

you make with people you know you may

972

00:37:11,329 --> 00:37:08,880

not be there to see every single speaker

973

00:37:12,650 --> 00:37:11,339

because it might be a part of the topic

974

00:37:14,569 --> 00:37:12,660

that you're not interested in and that's

975

00:37:16,310 --> 00:37:14,579

fine but those little bits in between

976
00:37:18,710 --> 00:37:16,320
the speakers where everyone's gathered

977
00:37:21,230 --> 00:37:18,720
and talking are just incredible so yeah

978
00:37:22,790 --> 00:37:21,240
you know I see conferences getting a bad

979
00:37:23,990 --> 00:37:22,800
rep sometimes people saying well it's

980
00:37:26,270 --> 00:37:24,000
just the same people saying the same

981
00:37:28,970 --> 00:37:26,280
same thing year in year out but

982
00:37:30,710 --> 00:37:28,980
it's go to them it's not the case in my

983
00:37:33,290 --> 00:37:30,720
opinion you know some sometimes maybe

984
00:37:35,930 --> 00:37:33,300
but you know I think that it has its

985
00:37:37,730 --> 00:37:35,940
value certainly so yeah and and that is

986
00:37:39,710 --> 00:37:37,740
rare there are some people I'd admit

987
00:37:43,310 --> 00:37:39,720
let's say like Stanton Friedman who was

988
00:37:45,230 --> 00:37:43,320

uh he was an anomaly he was the one guy

989

00:37:47,089 --> 00:37:45,240

where we would have a survey every year

990

00:37:48,589 --> 00:37:47,099

we would be like you know we shouldn't

991

00:37:50,630 --> 00:37:48,599

bring Stan again because he's someone

992

00:37:52,250 --> 00:37:50,640

that we brought every year but we would

993

00:37:54,109 --> 00:37:52,260

have a survey and we would even have

994

00:37:55,849 --> 00:37:54,119

people coming up why do you have Stanton

995

00:37:57,829 --> 00:37:55,859

again he said the same thing he said for

996

00:37:59,270 --> 00:37:57,839

the last 10 years and we would always

997

00:38:01,190 --> 00:37:59,280

tell them it's because at the end of the

998

00:38:03,650 --> 00:38:01,200

conference we have a survey and who's

999

00:38:05,569 --> 00:38:03,660

the top of the list everybody wants to

1000

00:38:07,730 --> 00:38:05,579

see Stan Friedman so we invite him every

1001

00:38:09,829 --> 00:38:07,740

year same with Travis Walton everybody

1002

00:38:11,870 --> 00:38:09,839

wants to hear what they have to say even

1003

00:38:14,510 --> 00:38:11,880

if it's the same thing every year

1004

00:38:16,250 --> 00:38:14,520

so we listen to the people so there are

1005

00:38:19,550 --> 00:38:16,260

instances of that but typically other

1006

00:38:21,770 --> 00:38:19,560

than those couple rare anomalies

1007

00:38:23,630 --> 00:38:21,780

um we make it a point to bring new

1008

00:38:25,310 --> 00:38:23,640

people who are bringing new research and

1009

00:38:27,530 --> 00:38:25,320

I've never been the only one to choose

1010

00:38:29,089 --> 00:38:27,540

the speakers but um and even now I've

1011

00:38:31,730 --> 00:38:29,099

been so busy I didn't get to have as

1012

00:38:34,490 --> 00:38:31,740

much of an input but um you know even

1013

00:38:36,470 --> 00:38:34,500

now with Karen uh who runs it she uh has

1014

00:38:39,349 --> 00:38:36,480

that same commitment is to look for

1015

00:38:41,089 --> 00:38:39,359

people doing different new research that

1016

00:38:43,010 --> 00:38:41,099

um even if it's someone who spoke last

1017

00:38:44,270 --> 00:38:43,020

year if it's something I think she's

1018

00:38:46,370 --> 00:38:44,280

very adamant it's got to be something

1019

00:38:48,410 --> 00:38:46,380

new and different and we have David

1020

00:38:49,730 --> 00:38:48,420

Marler quite a bit but you'll notice he

1021

00:38:51,470 --> 00:38:49,740

did a completely different talk than

1022

00:38:53,450 --> 00:38:51,480

he's ever done before this time

1023

00:38:56,210 --> 00:38:53,460

yeah he's an encyclopedia that man

1024

00:38:57,950 --> 00:38:56,220

fantastic yes he's amazing

1025

00:38:58,970 --> 00:38:57,960

um I'm quite conscious of the time see I

1026

00:39:00,290 --> 00:38:58,980

know you've got this meeting I just

1027

00:39:02,270 --> 00:39:00,300

wondered before we leave a couple of

1028

00:39:03,890 --> 00:39:02,280

topics I'd love to talk uh your opinion

1029

00:39:05,630 --> 00:39:03,900

on the upcoming NASA study about

1030

00:39:07,970 --> 00:39:05,640

potentially doing some further work next

1031

00:39:10,790 --> 00:39:07,980

year what are your thoughts on that

1032

00:39:13,370 --> 00:39:10,800

I'm extremely excited about the NASA

1033

00:39:14,930 --> 00:39:13,380

study I think that it's kind of the most

1034

00:39:18,770 --> 00:39:14,940

important

1035

00:39:20,630 --> 00:39:18,780

it's science you know the great thing

1036

00:39:23,270 --> 00:39:20,640

about science is that is it's it's

1037

00:39:24,130 --> 00:39:23,280

nature is transparent

1038

00:39:27,050 --> 00:39:24,140

um

1039

00:39:28,790 --> 00:39:27,060

science to be done right needs to be

1040

00:39:31,310 --> 00:39:28,800

transparent

1041

00:39:32,870 --> 00:39:31,320

Eric Davis you know had even mentioned

1042

00:39:35,210 --> 00:39:32,880

who's because he's got experience

1043

00:39:37,550 --> 00:39:35,220

working on special access programs or

1044

00:39:40,130 --> 00:39:37,560

black projects and he talks about how

1045

00:39:42,410 --> 00:39:40,140

doing science is really hard it's good

1046

00:39:44,030 --> 00:39:42,420

to do Engineering in other words build a

1047

00:39:46,490 --> 00:39:44,040

plane where all the research has been

1048

00:39:48,589 --> 00:39:46,500

done but doing any type of research is

1049

00:39:51,650 --> 00:39:48,599

really hard in that you know everybody

1050

00:39:53,990 --> 00:39:51,660

has to be read in and with most research

1051
00:39:55,430 --> 00:39:54,000
you need you never know what scientific

1052
00:39:57,829 --> 00:39:55,440
discipline you're going to need to pull

1053
00:39:59,569 --> 00:39:57,839
from but if he wants to consult with

1054
00:40:01,130 --> 00:39:59,579
someone who's an expert in a field he

1055
00:40:03,829 --> 00:40:01,140
found out that he needs more information

1056
00:40:07,069 --> 00:40:03,839
on you know it might take it's going to

1057
00:40:09,410 --> 00:40:07,079
take months and tens of thousands of

1058
00:40:11,990 --> 00:40:09,420
dollars to get that person read into the

1059
00:40:13,250 --> 00:40:12,000
project and once they're read into the

1060
00:40:15,050 --> 00:40:13,260
project and that whole thing has

1061
00:40:16,910 --> 00:40:15,060
happened you know to have your two-hour

1062
00:40:18,410 --> 00:40:16,920
meeting to figure out what you need and

1063
00:40:20,690 --> 00:40:18,420

then you're done

1064

00:40:22,430 --> 00:40:20,700

um let alone is it hard for the

1065

00:40:23,990 --> 00:40:22,440

scientists in the program but also the

1066

00:40:25,310 --> 00:40:24,000

scientists outside the program are like

1067

00:40:27,470 --> 00:40:25,320

I don't want to go through that sorry

1068

00:40:30,050 --> 00:40:27,480

I'd like to help but I don't got the

1069

00:40:32,270 --> 00:40:30,060

time to do all this so it makes it

1070

00:40:35,030 --> 00:40:32,280

really hard whereas you know especially

1071

00:40:38,329 --> 00:40:35,040

with NASA the science they do is is very

1072

00:40:39,890 --> 00:40:38,339

transparent it's very rigorous extremely

1073

00:40:44,270 --> 00:40:39,900

rigorous

1074

00:40:46,970 --> 00:40:44,280

when it comes to Triple checking

1075

00:40:49,849 --> 00:40:46,980

everything before they make a statement

1076

00:40:53,329 --> 00:40:49,859

um an example would be I think the uh

1077

00:40:55,270 --> 00:40:53,339

European Space Agency had uh you know

1078

00:40:58,550 --> 00:40:55,280

announced that there was evidence of

1079

00:41:00,890 --> 00:40:58,560

traces of water on Mars a year before

1080

00:41:02,870 --> 00:41:00,900

NASA did it's not that NASA didn't have

1081

00:41:04,970 --> 00:41:02,880

the same data it's that they were triple

1082

00:41:06,950 --> 00:41:04,980

checking everything to make sure before

1083

00:41:08,870 --> 00:41:06,960

they came on board to say yeah we think

1084

00:41:10,849 --> 00:41:08,880

there there's traces of water of course

1085

00:41:13,490 --> 00:41:10,859

now that's a given but that was pretty

1086

00:41:14,630 --> 00:41:13,500

controversial statement back then

1087

00:41:17,089 --> 00:41:14,640

um

1088

00:41:18,650 --> 00:41:17,099

so uh the transparency I think is what

1089

00:41:22,370 --> 00:41:18,660

is what's going to be really really

1090

00:41:25,069 --> 00:41:22,380

important uh and the science because

1091

00:41:28,250 --> 00:41:25,079

that's what we're going to get answers

1092

00:41:30,290 --> 00:41:28,260

um they don't have to you know be

1093

00:41:32,210 --> 00:41:30,300

worried about classified uh the

1094

00:41:34,130 --> 00:41:32,220

classified world so much they they're

1095

00:41:36,650 --> 00:41:34,140

just worried about the science the

1096

00:41:39,290 --> 00:41:36,660

aviation the air safety uh people forget

1097

00:41:40,670 --> 00:41:39,300

that air safety is something NASA it

1098

00:41:43,609 --> 00:41:40,680

also

1099

00:41:45,589 --> 00:41:43,619

um it works on which is important

1100

00:41:48,710 --> 00:41:45,599

because people like Ryan Graves who is

1101
00:41:51,950 --> 00:41:48,720
one of the jet fighter Witnesses

1102
00:41:53,470 --> 00:41:51,960
um on the Theodore Roosevelt he's been a

1103
00:41:57,230 --> 00:41:53,480
big Advocate and he's working with the

1104
00:41:59,569 --> 00:41:57,240
aiaa and

1105
00:42:01,730 --> 00:41:59,579
his main thing is air safety that you

1106
00:42:04,130 --> 00:42:01,740
know we're up there and these things are

1107
00:42:06,710 --> 00:42:04,140
zooming by us or we're we have had near

1108
00:42:09,349 --> 00:42:06,720
misses with these things we really need

1109
00:42:11,329 --> 00:42:09,359
to get a handle on at least you know

1110
00:42:13,190 --> 00:42:11,339
observing and trying to figure out what

1111
00:42:15,470 --> 00:42:13,200
they are for an air safety issue

1112
00:42:17,569 --> 00:42:15,480
especially for you know his fellow jet

1113
00:42:19,190 --> 00:42:17,579

fighter pilot so

1114

00:42:22,250 --> 00:42:19,200

um so that's an important aspect and

1115

00:42:25,310 --> 00:42:22,260

then of course the uh trans Medium as

1116

00:42:28,609 --> 00:42:25,320

far as uh anything from

1117

00:42:31,370 --> 00:42:28,619

leaving the atmosphere or returning into

1118

00:42:33,230 --> 00:42:31,380

the atmosphere because and the reason

1119

00:42:34,790 --> 00:42:33,240

that's extremely important is that you

1120

00:42:37,609 --> 00:42:34,800

know we've got lots of different types

1121

00:42:40,609 --> 00:42:37,619

of propulsion we use to Traverse inside

1122

00:42:43,190 --> 00:42:40,619

the atmosphere to fly around but we

1123

00:42:45,349 --> 00:42:43,200

don't have many technologies that we use

1124

00:42:47,750 --> 00:42:45,359

just Rockets essentially to leave and

1125

00:42:49,849 --> 00:42:47,760

then re-enter the atmosphere sure so if

1126

00:42:52,190 --> 00:42:49,859

we're observing something using some

1127

00:42:54,109 --> 00:42:52,200

sort of Novel technology that's you know

1128

00:42:55,550 --> 00:42:54,119

going to be very important data and and

1129

00:42:58,010 --> 00:42:55,560

it's interesting because people like

1130

00:42:59,990 --> 00:42:58,020

Chris Mellon have alluded to the

1131

00:43:02,630 --> 00:43:00,000

potential of that sort of data being out

1132

00:43:05,630 --> 00:43:02,640

there so that would be interesting

1133

00:43:07,910 --> 00:43:05,640

um to find out uh so you know I'm really

1134

00:43:09,530 --> 00:43:07,920

excited about NASA's involvement I think

1135

00:43:11,390 --> 00:43:09,540

that it seems like they're taking it

1136

00:43:13,910 --> 00:43:11,400

very seriously

1137

00:43:16,010 --> 00:43:13,920

um you know what they really had it

1138

00:43:18,829 --> 00:43:16,020

appears it's kind of an exploratory

1139

00:43:21,170 --> 00:43:18,839

group should we do this

1140

00:43:23,089 --> 00:43:21,180

um those people were seem to be

1141

00:43:25,250 --> 00:43:23,099

convinced that yeah let's create a

1142

00:43:27,589 --> 00:43:25,260

bigger group to look at this even harder

1143

00:43:29,870 --> 00:43:27,599

and so now they have a larger group of

1144

00:43:31,970 --> 00:43:29,880

individuals who are getting together to

1145

00:43:33,410 --> 00:43:31,980

kind of figure out okay what do we do in

1146

00:43:35,990 --> 00:43:33,420

this space if there's something for us

1147

00:43:37,790 --> 00:43:36,000

to do and that's where they're at so I

1148

00:43:40,970 --> 00:43:37,800

would say you know now is a great time

1149

00:43:42,470 --> 00:43:40,980

to encourage NASA it has to have but

1150

00:43:44,870 --> 00:43:42,480

yeah you know

1151
00:43:46,550 --> 00:43:44,880
that we need your expertise we need your

1152
00:43:49,730 --> 00:43:46,560
help with this topic it's worth it

1153
00:43:51,170 --> 00:43:49,740
because the public is interested uh

1154
00:43:54,410 --> 00:43:51,180
they're a government organization that's

1155
00:43:55,790 --> 00:43:54,420
who they work for uh and that you know

1156
00:43:57,950 --> 00:43:55,800
there are real concerns here when it

1157
00:44:01,670 --> 00:43:57,960
comes to air safety so

1158
00:44:04,250 --> 00:44:01,680
um you know and NASA's yeah I I'm a huge

1159
00:44:05,210 --> 00:44:04,260
NASA fan so I'm very excited about their

1160
00:44:06,410 --> 00:44:05,220
involvement

1161
00:44:08,270 --> 00:44:06,420
but what would you say to the people

1162
00:44:10,069 --> 00:44:08,280
that you know NASA does get a bad rep

1163
00:44:13,130 --> 00:44:10,079

and has done for a few decades has been

1164

00:44:14,990 --> 00:44:13,140

you know they know about the UFO subject

1165

00:44:16,550 --> 00:44:15,000

they've been sitting on videos and

1166

00:44:18,650 --> 00:44:16,560

airbrushing this and that over the

1167

00:44:19,849 --> 00:44:18,660

decade so how would you sort of convince

1168

00:44:21,470 --> 00:44:19,859

someone that oh no this is different

1169

00:44:23,690 --> 00:44:21,480

this time is there a way that you can

1170

00:44:25,130 --> 00:44:23,700

kind of do that well I don't know that I

1171

00:44:27,170 --> 00:44:25,140

would convince a lot of those people

1172

00:44:29,569 --> 00:44:27,180

because some of those people are

1173

00:44:31,069 --> 00:44:29,579

convinced of things that there isn't a

1174

00:44:33,530 --> 00:44:31,079

lot of evidence that it's occurred so

1175

00:44:36,770 --> 00:44:33,540

they're going on faith um and so you're

1176
00:44:42,470 --> 00:44:36,780
never gonna well it's gonna be difficult

1177
00:44:43,550 --> 00:44:42,480
um to to gain those people's trusts so

1178
00:44:46,609 --> 00:44:43,560
um you know that is going to be

1179
00:44:48,770 --> 00:44:46,619
difficult I I think that that

1180
00:44:50,329 --> 00:44:48,780
just doing good work is always what's

1181
00:44:52,730 --> 00:44:50,339
most important

1182
00:44:55,130 --> 00:44:52,740
um I know even you know with Enigma or

1183
00:44:56,750 --> 00:44:55,140
SCU we certainly have people that are

1184
00:44:58,910 --> 00:44:56,760
skeptical

1185
00:45:00,890 --> 00:44:58,920
um and all you can do is is do just like

1186
00:45:04,550 --> 00:45:00,900
we've said we're going to do which we've

1187
00:45:10,130 --> 00:45:04,560
done is you know be transparent uh be

1188
00:45:12,230 --> 00:45:10,140

open work hard uh be professional and

1189

00:45:14,390 --> 00:45:12,240

um I think those with that combination

1190

00:45:16,250 --> 00:45:14,400

of things uh that's how you win people

1191

00:45:18,650 --> 00:45:16,260

over and and one thing that I've learned

1192

00:45:21,890 --> 00:45:18,660

from working with NASA is their Ultra

1193

00:45:23,630 --> 00:45:21,900

professional I mean they are their

1194

00:45:28,309 --> 00:45:23,640

pleasure to work with

1195

00:45:30,650 --> 00:45:28,319

um from the pr to the the engineers to

1196

00:45:32,150 --> 00:45:30,660

everyone at Nasa is a dream to work with

1197

00:45:33,410 --> 00:45:32,160

they're there because they're on a

1198

00:45:34,609 --> 00:45:33,420

shared Mission

1199

00:45:36,950 --> 00:45:34,619

um it's almost like you're talking to

1200

00:45:38,930 --> 00:45:36,960

military because they've got a shared

1201

00:45:41,930 --> 00:45:38,940

goal they understand their

1202

00:45:44,990 --> 00:45:41,940

responsibility and that the taxpayer is

1203

00:45:45,829 --> 00:45:45,000

who you know their boss and

1204

00:45:48,770 --> 00:45:45,839

um

1205

00:45:50,930 --> 00:45:48,780

uh they're just great people so I think

1206

00:45:52,190 --> 00:45:50,940

that they're they're honest and and

1207

00:45:53,690 --> 00:45:52,200

genuine

1208

00:45:55,069 --> 00:45:53,700

um and and for their skeptical which

1209

00:45:57,290 --> 00:45:55,079

some of them aren't they'll be honest

1210

00:45:59,150 --> 00:45:57,300

and genuine about that as well and so

1211

00:45:59,809 --> 00:45:59,160

it'll be our job to

1212

00:46:03,050 --> 00:45:59,819

um

1213

00:46:05,329 --> 00:46:03,060

you know show them data that is worth

1214

00:46:06,829 --> 00:46:05,339

looking into yeah I agree and I think

1215

00:46:09,530 --> 00:46:06,839

it's a case as well let's just wait and

1216

00:46:12,170 --> 00:46:09,540

see you know we can pass judgment now or

1217

00:46:13,490 --> 00:46:12,180

we can slander them here and there but

1218

00:46:14,809 --> 00:46:13,500

let's just wait and that's kind of what

1219

00:46:17,089 --> 00:46:14,819

I tell people let's give them a chance

1220

00:46:18,349 --> 00:46:17,099

and if if nothing comes of it so be it

1221

00:46:20,870 --> 00:46:18,359

you know if you want to tell me I Told

1222

00:46:23,630 --> 00:46:20,880

You So if that makes you feel better go

1223

00:46:26,210 --> 00:46:23,640

for it yeah and I think that

1224

00:46:28,730 --> 00:46:26,220

part of the problem too is is a

1225

00:46:31,430 --> 00:46:28,740

communication problem that we can all

1226

00:46:33,890 --> 00:46:31,440

help with which is you know a lot of

1227

00:46:36,829 --> 00:46:33,900

these guys who have been getting some

1228

00:46:39,349 --> 00:46:36,839

criticism from the UFO Community

1229

00:46:41,210 --> 00:46:39,359

um by being skeptical

1230

00:46:43,190 --> 00:46:41,220

um first of all skepticism is is

1231

00:46:45,530 --> 00:46:43,200

important in science you have to be

1232

00:46:46,790 --> 00:46:45,540

skeptical of your own findings

1233

00:46:51,109 --> 00:46:46,800

um so that's something to keep in mind

1234

00:46:54,170 --> 00:46:51,119

second of all is there is a

1235

00:46:57,170 --> 00:46:54,180

a communication gap so in other words

1236

00:46:59,150 --> 00:46:57,180

uh there's the term UFO which kind of

1237

00:47:01,010 --> 00:46:59,160

got co-opted to mean alien spacecraft

1238

00:47:02,569 --> 00:47:01,020

that's not what it means that's not what

1239

00:47:05,210 --> 00:47:02,579

the Air Force meant for it that's not

1240

00:47:06,950 --> 00:47:05,220

what I've ever uh defined the and and

1241

00:47:08,870 --> 00:47:06,960

it's not the official definition it's

1242

00:47:11,450 --> 00:47:08,880

unidentified we don't know what the root

1243

00:47:13,849 --> 00:47:11,460

of it is same with UAP but that baggage

1244

00:47:15,230 --> 00:47:13,859

seems to have moved across so when you

1245

00:47:17,030 --> 00:47:15,240

hear some of these scientists they're

1246

00:47:19,069 --> 00:47:17,040

they're like you know I don't know that

1247

00:47:21,230 --> 00:47:19,079

there are aliens I'm not sure I want to

1248

00:47:22,849 --> 00:47:21,240

do any alien hunting

1249

00:47:25,370 --> 00:47:22,859

um but what they're doing is

1250

00:47:27,349 --> 00:47:25,380

misunderstanding those same people are

1251
00:47:28,609 --> 00:47:27,359
also saying though however if we're

1252
00:47:30,109 --> 00:47:28,619
going to look at what some of these

1253
00:47:31,250 --> 00:47:30,119
things might be because they might be

1254
00:47:33,230 --> 00:47:31,260
you know things that we haven't

1255
00:47:36,230 --> 00:47:33,240
discovered before I'm all for that I'm

1256
00:47:37,790 --> 00:47:36,240
all for the scientist of uh researching

1257
00:47:39,589 --> 00:47:37,800
things that we haven't identified yet

1258
00:47:42,410 --> 00:47:39,599
which is exactly what they're being

1259
00:47:45,910 --> 00:47:42,420
asked to do so they are on board for

1260
00:47:48,770 --> 00:47:45,920
what the task at hand is it's just a a

1261
00:47:50,809 --> 00:47:48,780
semantics thing you know UAP does not

1262
00:47:53,150 --> 00:47:50,819
equal aliens and we've got to make sure

1263
00:47:54,829 --> 00:47:53,160

and educate people on that when we're

1264

00:47:57,829 --> 00:47:54,839

interviewed when we're talking anyone

1265

00:48:00,470 --> 00:47:57,839

and you know UAP does not equal aliens

1266

00:48:03,230 --> 00:48:00,480

it's one potential answer of many many

1267

00:48:04,370 --> 00:48:03,240

potential answers yeah and one thing I

1268

00:48:06,109 --> 00:48:04,380

always try and think about as well is

1269

00:48:09,170 --> 00:48:06,119

that people say NASA knows this well

1270

00:48:10,970 --> 00:48:09,180

NASA is thousands of employees so you

1271

00:48:12,710 --> 00:48:10,980

know if you look at people 20 30 40

1272

00:48:14,270 --> 00:48:12,720

years ago who may have had some

1273

00:48:17,089 --> 00:48:14,280

information or seen some data doesn't

1274

00:48:19,490 --> 00:48:17,099

mean that people on this study have any

1275

00:48:20,990 --> 00:48:19,500

access or knowledge of that and it's the

1276

00:48:23,150 --> 00:48:21,000

same I find when people say the

1277

00:48:25,190 --> 00:48:23,160

government knows well the government is

1278

00:48:26,930 --> 00:48:25,200

millions I think of employees when you

1279

00:48:29,150 --> 00:48:26,940

look from the you know from the

1280

00:48:30,770 --> 00:48:29,160

government a great Point that's a really

1281

00:48:34,490 --> 00:48:30,780

good point and I have just not run

1282

00:48:36,530 --> 00:48:34,500

across evident of uh strong evidence be

1283

00:48:38,750 --> 00:48:36,540

Beyond hearsay that that sort of thing

1284

00:48:40,670 --> 00:48:38,760

is being hidden

1285

00:48:42,589 --> 00:48:40,680

um you know we heard from the most

1286

00:48:45,470 --> 00:48:42,599

convincing person at the UFO Congress

1287

00:48:47,390 --> 00:48:45,480

which I was a good video where we had uh

1288

00:48:48,890 --> 00:48:47,400

of course he spoke at the Congress and

1289

00:48:51,290 --> 00:48:48,900

then we had Lee Spiegel interview him

1290

00:48:53,750 --> 00:48:51,300

for the Huffington Post where this Dr

1291

00:48:55,970 --> 00:48:53,760

Hoover who worked in astrobiology with

1292

00:48:57,410 --> 00:48:55,980

NASA uh said you know he did believe

1293

00:48:59,450 --> 00:48:57,420

there was some evidence that was

1294

00:49:02,210 --> 00:48:59,460

destroyed but he explained the details

1295

00:49:04,790 --> 00:49:02,220

and it wasn't that it was some sort of

1296

00:49:07,250 --> 00:49:04,800

malicious destruction

1297

00:49:09,410 --> 00:49:07,260

um it was essentially you know there was

1298

00:49:11,030 --> 00:49:09,420

a scientist who was kind of stubborn who

1299

00:49:13,190 --> 00:49:11,040

was saying I this is not the evidence

1300

00:49:16,190 --> 00:49:13,200

you think it is I've already had to turn

1301
00:49:18,290 --> 00:49:16,200
shown it's not what you think it is and

1302
00:49:21,589 --> 00:49:18,300
just wanted the issue off the topic so

1303
00:49:22,910 --> 00:49:21,599
it was one individual who you know I'm

1304
00:49:24,470 --> 00:49:22,920
not sure if that was the best thing to

1305
00:49:26,930 --> 00:49:24,480
do but um

1306
00:49:30,050 --> 00:49:26,940
if that's different from what a lot of

1307
00:49:32,510 --> 00:49:30,060
people think is going on yeah yeah so my

1308
00:49:36,170 --> 00:49:32,520
final question before I let you go is um

1309
00:49:37,370 --> 00:49:36,180
we are overdue a UAP report

1310
00:49:40,430 --> 00:49:37,380
I just wondered if you had any

1311
00:49:42,770 --> 00:49:40,440
expectations any guesses on whether it

1312
00:49:44,390 --> 00:49:42,780
would be a nothing burger or we might

1313
00:49:46,490 --> 00:49:44,400

get some tidbits of information any

1314

00:49:49,430 --> 00:49:46,500

anything you're thinking about

1315

00:49:52,849 --> 00:49:49,440

I think that a lot of people in the UFO

1316

00:49:57,849 --> 00:49:52,859

Community might not be excited

1317

00:50:00,050 --> 00:49:57,859

um but it and I gauge that because to me

1318

00:50:03,170 --> 00:50:00,060

any of this information that's coming

1319

00:50:03,730 --> 00:50:03,180

out right now is really important

1320

00:50:08,089 --> 00:50:03,740

um

1321

00:50:10,970 --> 00:50:08,099

and I was not necessarily A detractor of

1322

00:50:14,089 --> 00:50:10,980

the last report

1323

00:50:17,690 --> 00:50:14,099

um you know I I and it's great that we

1324

00:50:19,670 --> 00:50:17,700

heard that Dr Travis Taylor who of

1325

00:50:22,550 --> 00:50:19,680

course is on the TV show the skinwalker

1326
00:50:25,190 --> 00:50:22,560
but he's also spoken at seu even before

1327
00:50:27,589 --> 00:50:25,200
the television show he's a scientist

1328
00:50:30,050 --> 00:50:27,599
who's been on R Raider radar who we've

1329
00:50:34,130 --> 00:50:30,060
worked with for years because he's

1330
00:50:35,990 --> 00:50:34,140
extremely credentialed and intelligent

1331
00:50:38,329 --> 00:50:36,000
um he was much more skeptical a few

1332
00:50:40,490 --> 00:50:38,339
years ago than he is now because he

1333
00:50:43,010 --> 00:50:40,500
feels that he's experienced some some

1334
00:50:44,390 --> 00:50:43,020
strange things you know at Skinwalker

1335
00:50:47,030 --> 00:50:44,400
that he can't explain that he's trying

1336
00:50:49,190 --> 00:50:47,040
to explain scientifically and I don't

1337
00:50:52,370 --> 00:50:49,200
believe he's a liar or a hoaxer at all I

1338
00:50:54,530 --> 00:50:52,380

think that it's not good for I don't

1339

00:50:57,410 --> 00:50:54,540

think he wanted to run across anything

1340

00:51:00,049 --> 00:50:57,420

anomalous it just happened and he's

1341

00:51:01,970 --> 00:51:00,059

honest because I don't think that it's

1342

00:51:03,650 --> 00:51:01,980

something he feels that he was going to

1343

00:51:05,210 --> 00:51:03,660

run across or

1344

00:51:07,970 --> 00:51:05,220

um and it's probably caused him some

1345

00:51:09,290 --> 00:51:07,980

headache it seems like it has so he

1346

00:51:11,390 --> 00:51:09,300

wrote that report and I think he

1347

00:51:13,069 --> 00:51:11,400

genuinely probably did his best to

1348

00:51:14,809 --> 00:51:13,079

gather information and write that report

1349

00:51:16,670 --> 00:51:14,819

I believe that

1350

00:51:20,450 --> 00:51:16,680

um and it was interesting in that we had

1351

00:51:22,670 --> 00:51:20,460

144 cases 99 of which can't be explained

1352

00:51:25,130 --> 00:51:22,680

so when it comes to the new report of

1353

00:51:26,510 --> 00:51:25,140

course we've had some alleged leaks who

1354

00:51:27,349 --> 00:51:26,520

knows

1355

00:51:29,390 --> 00:51:27,359

um

1356

00:51:31,730 --> 00:51:29,400

you know how close these people are have

1357

00:51:32,930 --> 00:51:31,740

been to the report but I I mean what

1358

00:51:35,030 --> 00:51:32,940

I've read are kind of two

1359

00:51:37,670 --> 00:51:35,040

interpretations of the same kind of

1360

00:51:39,650 --> 00:51:37,680

information which is half glass half you

1361

00:51:41,930 --> 00:51:39,660

know glass half full glass half empty

1362

00:51:44,030 --> 00:51:41,940

sure one side is saying well it turns

1363

00:51:47,630 --> 00:51:44,040

out we're able to explain most of these

1364

00:51:49,970 --> 00:51:47,640

away no surprise so are we you know and

1365

00:51:53,030 --> 00:51:49,980

the the general public

1366

00:51:56,030 --> 00:51:53,040

um and so a lot of it turns out just to

1367

00:51:57,589 --> 00:51:56,040

be X Y and Z whereas the flip side of

1368

00:51:59,870 --> 00:51:57,599

that which we heard in the Daily Mail

1369

00:52:02,450 --> 00:51:59,880

was more like wow after we investigated

1370

00:52:04,069 --> 00:52:02,460

there's still a lot of these we still

1371

00:52:06,230 --> 00:52:04,079

can't explain

1372

00:52:07,849 --> 00:52:06,240

um which I think is a more interesting

1373

00:52:09,349 --> 00:52:07,859

um story of course for those of us

1374

00:52:11,510 --> 00:52:09,359

interested in this topic and still

1375

00:52:14,930 --> 00:52:11,520

justifies further research and

1376

00:52:17,030 --> 00:52:14,940

investigation so I to me that's kind of

1377

00:52:20,030 --> 00:52:17,040

exciting uh that we are going to hear

1378

00:52:23,870 --> 00:52:20,040

there's a good group of of cases that

1379

00:52:26,390 --> 00:52:23,880

they can't explain and I hope uh that

1380

00:52:28,970 --> 00:52:26,400

we're going to be provided some details

1381

00:52:32,089 --> 00:52:28,980

about these sightings because you know

1382

00:52:36,170 --> 00:52:32,099

in the Daily Mail especially there were

1383

00:52:38,030 --> 00:52:36,180

details shared that if those details are

1384

00:52:39,770 --> 00:52:38,040

in the report are going to be extremely

1385

00:52:42,230 --> 00:52:39,780

compelling

1386

00:52:44,150 --> 00:52:42,240

um and really some some incredible cases

1387

00:52:47,510 --> 00:52:44,160

if the details aren't in the reports

1388

00:52:50,030 --> 00:52:47,520

then um uh you know it will be less

1389

00:52:51,530 --> 00:52:50,040

exciting but I still you know to me I

1390

00:52:54,230 --> 00:52:51,540

think this is what the people miss when

1391

00:52:56,450 --> 00:52:54,240

that first report came out and the

1392

00:52:59,210 --> 00:52:56,460

general public is seeing the military

1393

00:53:00,770 --> 00:52:59,220

saying we can't explain 140 plus cases

1394

00:53:05,150 --> 00:53:00,780

and

1395

00:53:07,549 --> 00:53:05,160

something that we we are not you know

1396

00:53:09,829 --> 00:53:07,559

joking about that are a serious concern

1397

00:53:12,950 --> 00:53:09,839

that we have to pay attention to that's

1398

00:53:15,049 --> 00:53:12,960

a huge message you know and and I know

1399

00:53:16,370 --> 00:53:15,059

for a fact from working with someone in

1400

00:53:20,390 --> 00:53:16,380

the mainstream that that's very

1401
00:53:22,370 --> 00:53:20,400
convincing it's very mind-blowing to a

1402
00:53:23,930 --> 00:53:22,380
lot of the public to those of us in this

1403
00:53:25,609 --> 00:53:23,940
field who have been following it's no

1404
00:53:27,230 --> 00:53:25,619
big deal in fact lots of people are like

1405
00:53:28,910 --> 00:53:27,240
that's boring we knew that well the

1406
00:53:31,370 --> 00:53:28,920
general public did not know that so

1407
00:53:33,770 --> 00:53:31,380
that's just you you know and in my

1408
00:53:35,930 --> 00:53:33,780
research for example I've been pinging

1409
00:53:37,910 --> 00:53:35,940
the Air Force on a regular basis when

1410
00:53:39,710 --> 00:53:37,920
I'm writing articles and always given

1411
00:53:42,290 --> 00:53:39,720
the same report we haven't had any

1412
00:53:43,790 --> 00:53:42,300
concerns since 1969.

1413
00:53:45,170 --> 00:53:43,800

um you know to finally hear them

1414

00:53:47,630 --> 00:53:45,180

admitting

1415

00:53:50,930 --> 00:53:47,640

um to what we've been reporting you know

1416

00:53:53,150 --> 00:53:50,940

with evidence for so long is is hugely

1417

00:53:55,010 --> 00:53:53,160

validating so

1418

00:53:58,250 --> 00:53:55,020

um I have more of a positive view on

1419

00:54:00,950 --> 00:53:58,260

these reports and I I would be surprised

1420

00:54:03,230 --> 00:54:00,960

if there's not something really kind of

1421

00:54:06,770 --> 00:54:03,240

mind bending especially for the general

1422

00:54:09,290 --> 00:54:06,780

public in this report that there might

1423

00:54:11,329 --> 00:54:09,300

not be anything that gets the UFO feel

1424

00:54:12,589 --> 00:54:11,339

extremely excited but I I think there'll

1425

00:54:15,589 --> 00:54:12,599

be stuff that'll get the scientific

1426
00:54:16,609 --> 00:54:15,599
Community talking which is which is very

1427
00:54:18,530 --> 00:54:16,619
important

1428
00:54:19,970 --> 00:54:18,540
yeah completely agree well listen

1429
00:54:21,589 --> 00:54:19,980
Alejandra it's been an absolute pleasure

1430
00:54:24,349 --> 00:54:21,599
to speak to you I really do appreciate

1431
00:54:25,910 --> 00:54:24,359
you giving the time to me today uh to

1432
00:54:27,410 --> 00:54:25,920
everyone in the live chat thank you for

1433
00:54:29,089 --> 00:54:27,420
for being here as well I'm going to be

1434
00:54:30,890 --> 00:54:29,099
back well I'm going to say I can't say

1435
00:54:32,390 --> 00:54:30,900
when it's when the report drops I will

1436
00:54:34,309 --> 00:54:32,400
be going live with Christopher sharp to

1437
00:54:35,930 --> 00:54:34,319
cover that but for now everybody thank
