00:00:01,910 --> 00:00:22,810

[Music]

2
00:00:31,009 --> 00:00:25,340

thank you

3
00:00:33,650 --> 00:00:31,019

[Music]

4
00:00:36,470 --> 00:00:33,660
welcome back to the channel guys uh for

5
00:00:38,270 --> 00:00:36,480
a special video to cover the recent

6
00:00:41,090 --> 00:00:38,280
incursions and shoot Downs over the US

7
00:00:43,190 --> 00:00:41,100
and Canada I've been covering this over

8
00:00:44,930 --> 00:00:43,200
on my Instagram a lot and I've had an

9
00:00:48,350 --> 00:00:44,940
awful amount of requests to do a video

10
00:00:50,930 --> 00:00:48,360
here on YouTube so uh let's get into it

11
00:00:53,869 --> 00:00:50,940
joining me today for this one is my good

12
00:00:56,389 --> 00:00:53,879
friend former F-16 pilot Chris letto

13
00:00:58,250 --> 00:00:56,399

Chris how are you man great Vinnie hello

14

00:00:59,810 --> 00:00:58,260

mate thank you thank you I appreciate

15

00:01:01,850 --> 00:00:59,820

you I really appreciate you doing this

16

00:01:03,349 --> 00:01:01,860

man I just yeah like I said I've been

17

00:01:04,729 --> 00:01:03,359

asked to cover this and I thought you

18

00:01:06,410 --> 00:01:04,739

know you've been keeping a close eye on

19

00:01:08,570 --> 00:01:06,420

the story as well and so just to get

20

00:01:10,190 --> 00:01:08,580

your your take on it would be would be

21

00:01:12,050 --> 00:01:10,200

amazing

22

00:01:15,410 --> 00:01:12,060

um so I guess the first thing is this

23

00:01:17,450 --> 00:01:15,420

this Chinese spy balloon you know was

24

00:01:20,289 --> 00:01:17,460

the first thing that broke a couple of

25

00:01:22,370 --> 00:01:20,299

weeks ago now and you know we had china

26

00:01:25,070 --> 00:01:22,380

respond saying it was more for

27

00:01:28,609 --> 00:01:25,080

meteorology meteorological purposes do

28

00:01:30,249 --> 00:01:28,619

you buy that story based on the payload

29

00:01:32,810 --> 00:01:30,259

well we haven't gotten so much

30

00:01:35,810 --> 00:01:32,820

information back from the payload last I

31

00:01:38,270 --> 00:01:35,820

heard last night I believe is that uh

32

00:01:40,010 --> 00:01:38,280

the FBI has recovered most of the

33

00:01:40,850 --> 00:01:40,020

electronics they said mostly Electronics

34

00:01:42,050 --> 00:01:40,860

of course it's all going to be

35

00:01:43,609 --> 00:01:42,060

underwater

36

00:01:45,950 --> 00:01:43,619

but I think they'll be able to determine

37

00:01:47,630 --> 00:01:45,960

what you know what it was what the

38

00:01:48,830 --> 00:01:47,640

equipment could actually do but they're

39

00:01:50,630 --> 00:01:48,840

not going to be able to get back any of

40

00:01:52,249 --> 00:01:50,640

the data I think so I think they'll

41

00:01:56,810 --> 00:01:52,259

they'll get enough

42

00:01:59,210 --> 00:01:56,820

and my hunch is that it's gonna be

43

00:02:00,530 --> 00:01:59,220

potentially military use

44

00:02:01,910 --> 00:02:00,540

but we're not going to be able to tell

45

00:02:03,830 --> 00:02:01,920

you know I doubt the Chinese would be

46

00:02:05,149 --> 00:02:03,840

dumb enough even if it was a

47

00:02:07,429 --> 00:02:05,159

surveillance balloon and that's what

48

00:02:09,050 --> 00:02:07,439

they meant it for was to pick up signals

49

00:02:10,910 --> 00:02:09,060

as it's crossing that's what I think is

50

00:02:12,589 --> 00:02:10,920

the most dangerous is if it just has a

51
00:02:15,110 --> 00:02:12,599
receiver on there which I'm sure it does

52
00:02:17,690 --> 00:02:15,120
to receive signals and then it's just

53
00:02:20,150 --> 00:02:17,700
soaking up signals right and then so

54
00:02:22,850 --> 00:02:20,160
China could say that it's just a

55
00:02:24,350 --> 00:02:22,860
scientific balloon well meanwhile maybe

56
00:02:26,630 --> 00:02:24,360
an arm of their

57
00:02:28,309 --> 00:02:26,640
uh of that program right because we've

58
00:02:29,930 --> 00:02:28,319
done that a lot in the look at our CIA

59
00:02:31,070 --> 00:02:29,940
you know of course this stuff's going to

60
00:02:34,309 --> 00:02:31,080
come back and bite Us in the ass right

61
00:02:36,170 --> 00:02:34,319
but RCI is attached onto many programs

62
00:02:38,030 --> 00:02:36,180
that didn't know that they were doing it

63
00:02:40,430 --> 00:02:38,040

you know I have a my friend his dad

64

00:02:42,350 --> 00:02:40,440

worked uh down in South America in some

65

00:02:44,390 --> 00:02:42,360

crazy Farm or whatever

66

00:02:46,550 --> 00:02:44,400

uh he's sea Stoney actually he's the

67

00:02:48,589 --> 00:02:46,560

artist on our UAP society and he found

68

00:02:50,570 --> 00:02:48,599

out later that his dad actually his dad

69

00:02:53,150 --> 00:02:50,580

quit the program because it was led by

70

00:02:54,710 --> 00:02:53,160

CIA the CIA I was actually infiltrated

71

00:02:56,570 --> 00:02:54,720

it

72

00:02:59,210 --> 00:02:56,580

so they'll they're known to actually go

73

00:03:01,190 --> 00:02:59,220

into other programs right as a you know

74

00:03:02,390 --> 00:03:01,200

whatever University Professor or

75

00:03:04,070 --> 00:03:02,400

something

76
00:03:06,170 --> 00:03:04,080
I could see that happening where China

77
00:03:07,850 --> 00:03:06,180
basically there's an element of China in

78
00:03:10,670 --> 00:03:07,860
the you know if it's all government that

79
00:03:12,110 --> 00:03:10,680
has that's using this sees it as an

80
00:03:14,390 --> 00:03:12,120
opportunity to try and get some

81
00:03:15,470 --> 00:03:14,400
intelligence that being said what are

82
00:03:16,670 --> 00:03:15,480
you really going to get you know I think

83
00:03:19,070 --> 00:03:16,680
that's why the Air Force didn't shoot it

84
00:03:20,210 --> 00:03:19,080
down because they're like look they're

85
00:03:21,949 --> 00:03:20,220
not they're going to get nothing from

86
00:03:25,369 --> 00:03:21,959
this you know I mean we

87
00:03:26,750 --> 00:03:25,379
we fly spy planes near China you know

88
00:03:28,250 --> 00:03:26,760

getting much more information we have

89

00:03:29,449 --> 00:03:28,260

satellites flying right over China right

90

00:03:31,670 --> 00:03:29,459

now they have the same thing they have

91

00:03:33,470 --> 00:03:31,680

satellites flying over the U.S as as we

92

00:03:36,649 --> 00:03:33,480

speak all countries do right you can't

93

00:03:38,210 --> 00:03:36,659

stop a satellite from being in orbit

94

00:03:39,890 --> 00:03:38,220

the only the only difference is that's

95

00:03:42,830 --> 00:03:39,900

further away so now that's going to be

96

00:03:45,830 --> 00:03:42,840

at 250 miles is around where your your

97

00:03:48,830 --> 00:03:45,840

low earth orbit is where the ISS is yeah

98

00:03:52,130 --> 00:03:48,840

250 miles and so

99

00:03:54,170 --> 00:03:52,140

that's much further away right but I was

100

00:03:56,030 --> 00:03:54,180

talking to Mark d'antonio I was on an

101
00:03:58,670 --> 00:03:56,040
interview with him this week again crazy

102
00:04:01,850 --> 00:03:58,680
week and he was saying on the Mark Wells

103
00:04:03,770 --> 00:04:01,860
show he was saying that he was a he was

104
00:04:05,570 --> 00:04:03,780
he worked on satellites and a

105
00:04:07,250 --> 00:04:05,580
geosynchronous satellite right that's

106
00:04:08,930 --> 00:04:07,260
hundreds of thousands that's thousands

107
00:04:10,910 --> 00:04:08,940
of miles away yeah

108
00:04:13,309 --> 00:04:10,920
he could read a license plate from

109
00:04:15,170 --> 00:04:13,319
thousands of miles miles away and that's

110
00:04:16,849 --> 00:04:15,180
where the geosynchronous

111
00:04:18,069 --> 00:04:16,859
I'm sorry not geosynchronous satellite

112
00:04:19,909 --> 00:04:18,079
okay so that's the difference so

113
00:04:22,370 --> 00:04:19,919

geosynchronous satellite you're out at

114

00:04:24,110 --> 00:04:22,380

uh 10 000 or thousands of miles I don't

115

00:04:25,430 --> 00:04:24,120

know the exact distance out right but if

116

00:04:26,749 --> 00:04:25,440

you're in the same spot over the over

117

00:04:28,969 --> 00:04:26,759

the earth now you have to be much

118

00:04:30,890 --> 00:04:28,979

further away okay so those satellites

119

00:04:32,570 --> 00:04:30,900

they can't read a license plate that's

120

00:04:34,969 --> 00:04:32,580

correct but the low earth orbits the

121

00:04:36,350 --> 00:04:34,979

ones at 250 miles above they can read a

122

00:04:38,810 --> 00:04:36,360

license plate but they fly over very

123

00:04:41,570 --> 00:04:38,820

fast all right okay they go right over

124

00:04:43,189 --> 00:04:41,580

because you're so close to the Earth

125

00:04:44,930 --> 00:04:43,199

um they go over very quickly that's why

126

00:04:46,310 --> 00:04:44,940

the ISS if you run out to look at it

127

00:04:47,749 --> 00:04:46,320

you'll see it for I don't know less than

128

00:04:49,070 --> 00:04:47,759

a minute I think is what it goes by I

129

00:04:52,310 --> 00:04:49,080

need to actually calculate low earth

130

00:04:54,050 --> 00:04:52,320

orbit you know how fast it goes by

131

00:04:55,249 --> 00:04:54,060

so on those satellites they can read

132

00:04:57,230 --> 00:04:55,259

license plates you know they can

133

00:04:58,730 --> 00:04:57,240

identify you is what Mark dantonio was

134

00:05:00,230 --> 00:04:58,740

saying that kind of you know Enemy of

135

00:05:02,330 --> 00:05:00,240

the State kind of stuff yeah yeah

136

00:05:04,909 --> 00:05:02,340

they're only there for a minute

137

00:05:07,610 --> 00:05:04,919

that

138

00:05:09,650 --> 00:05:07,620

what would be impressive and abundantly

139

00:05:11,450 --> 00:05:09,660

stupid is if China actually threw one of

140

00:05:13,070 --> 00:05:11,460

those systems onto a balloon which they

141

00:05:15,770 --> 00:05:13,080

wouldn't right it's so expensive

142

00:05:17,870 --> 00:05:15,780

it and then we would find it so it

143

00:05:19,490 --> 00:05:17,880

wouldn't make any sense so I don't think

144

00:05:21,650 --> 00:05:19,500

they're really going to get any like

145

00:05:23,150 --> 00:05:21,660

good data you know really accurate

146

00:05:24,529 --> 00:05:23,160

they're not reading anyone's faces from

147

00:05:27,350 --> 00:05:24,539

that spy balloon you know unless they

148

00:05:29,510 --> 00:05:27,360

have a you know 100 million dollar 10 20

149

00:05:31,550 --> 00:05:29,520

million dollar camera on there so

150

00:05:34,070 --> 00:05:31,560

probably it's just soaking up electrons

151

00:05:35,629 --> 00:05:34,080

trying to trying to get get lucky but

152

00:05:37,189 --> 00:05:35,639

yeah I don't think they're getting

153

00:05:38,810 --> 00:05:37,199

anything out of it that's why the the US

154

00:05:40,909 --> 00:05:38,820

Air Force waited so long to shoot it

155

00:05:42,230 --> 00:05:40,919

down okay that's interesting yeah but I

156

00:05:44,210 --> 00:05:42,240

think the initial fear was that because

157

00:05:46,730 --> 00:05:44,220

it appeared over Montana and you know

158

00:05:48,409 --> 00:05:46,740

we've got Malmstrom in the ICBM sites

159

00:05:49,850 --> 00:05:48,419

that that ultimately sparked the fear

160

00:05:51,830 --> 00:05:49,860

that they were monitoring our nuclear

161

00:05:53,150 --> 00:05:51,840

assets but yeah I mean it makes sense

162

00:05:54,770 --> 00:05:53,160

what you said

163

00:05:56,930 --> 00:05:54,780

um and I hope that we do get to learn

164

00:05:58,730 --> 00:05:56,940

more whether they're gonna be

165

00:06:01,010 --> 00:05:58,740

forthcoming with the information if they

166

00:06:02,629 --> 00:06:01,020

do find anything is a different story so

167

00:06:05,570 --> 00:06:02,639

well we did the same thing it's kind of

168

00:06:08,450 --> 00:06:05,580

like um in the 50s we had our own spy

169

00:06:09,950 --> 00:06:08,460

program with balloons so I made a video

170

00:06:13,029 --> 00:06:09,960

about it earlier this week on my channel

171

00:06:15,830 --> 00:06:13,039

on uh on later files but basically

172

00:06:17,390 --> 00:06:15,840

before the the before we went into space

173

00:06:19,610 --> 00:06:17,400

right before Sputnik

174

00:06:21,110 --> 00:06:19,620

uh balloons was the only way I mean you

175

00:06:22,969 --> 00:06:21,120

had Rockets but it would go up and down

176

00:06:24,350 --> 00:06:22,979

so the only way to actually get up there

177

00:06:26,390 --> 00:06:24,360

and stay there

178

00:06:29,330 --> 00:06:26,400

uh any sort of altitudes is with

179

00:06:31,129 --> 00:06:29,340

balloons so so space balloons you know

180

00:06:33,230 --> 00:06:31,139

was kind of the thing before they went

181

00:06:35,150 --> 00:06:33,240

uh on Rockets

182

00:06:39,170 --> 00:06:35,160

and so we had our own programs and we

183

00:06:42,529 --> 00:06:39,180

sent it was like 540 balloons over

184

00:06:45,350 --> 00:06:42,539

over Russia and China and they and the

185

00:06:48,590 --> 00:06:45,360

thing is we only recovered 10 of them

186

00:06:50,150 --> 00:06:48,600

so as far as like an operational it's a

187

00:06:52,309 --> 00:06:50,160

technology people people kind of laugh

188

00:06:55,249 --> 00:06:52,319

about it and make jokes about it but

189

00:06:57,290 --> 00:06:55,259

it's not easy it's not easy to control a

190

00:07:01,189 --> 00:06:57,300

giant buoyant

191

00:07:03,890 --> 00:07:01,199

thing in near space that's a domain we

192

00:07:06,230 --> 00:07:03,900

don't know we don't use it because the

193

00:07:08,689 --> 00:07:06,240

technology hasn't been there until now

194

00:07:10,189 --> 00:07:08,699

until I guess soon right because I've

195

00:07:11,330 --> 00:07:10,199

also heard if you had a material that

196

00:07:13,129 --> 00:07:11,340

was strong enough right these balloons

197

00:07:15,170 --> 00:07:13,139

are made out of this like it's latex so

198

00:07:17,029 --> 00:07:15,180

it's I guess latex is actually a natural

199

00:07:18,770 --> 00:07:17,039

material I just found this out and that

200

00:07:21,050 --> 00:07:18,780

dust you see on it is a talcum powder

201
00:07:22,730 --> 00:07:21,060
yeah that keeps it that keeps it from

202
00:07:25,670 --> 00:07:22,740
sticking to itself so when it when it

203
00:07:27,469 --> 00:07:25,680
expands these amazing expansions right

204
00:07:29,210 --> 00:07:27,479
um it won't pop

205
00:07:30,529 --> 00:07:29,220
but then any little tear in that latex

206
00:07:32,390 --> 00:07:30,539
it'll pop

207
00:07:33,890 --> 00:07:32,400
but imagine if you had a material that

208
00:07:35,809 --> 00:07:33,900
was like made out of Bucky Balls or

209
00:07:37,550 --> 00:07:35,819
something and inside of it you could

210
00:07:38,749 --> 00:07:37,560
suck all the air out and make it a

211
00:07:40,969 --> 00:07:38,759
vacuum

212
00:07:42,710 --> 00:07:40,979
and that thing if it's strong enough you

213
00:07:44,390 --> 00:07:42,720

can make it thin enough so it could be

214

00:07:45,950 --> 00:07:44,400

lighter than air so now you could

215

00:07:47,570 --> 00:07:45,960

actually put you know a permanent

216

00:07:49,370 --> 00:07:47,580

balloon up there not made out of latex

217

00:07:51,050 --> 00:07:49,380

but now it's made out of um

218

00:07:53,390 --> 00:07:51,060

some super material

219

00:07:54,950 --> 00:07:53,400

and then controlling it is is going to

220

00:07:57,589 --> 00:07:54,960

be probably the most difficult thing you

221

00:07:58,969 --> 00:07:57,599

know but maybe there's not big wind

222

00:08:00,170 --> 00:07:58,979

currents up there in the stratus you

223

00:08:02,150 --> 00:08:00,180

know I don't know the stratosphere

224

00:08:05,270 --> 00:08:02,160

weather right I don't know how it works

225

00:08:06,830 --> 00:08:05,280

there uh I don't think anybody knows and

226

00:08:08,210 --> 00:08:06,840

so that that's really kind of cool that

227

00:08:09,589 --> 00:08:08,220

we're getting into that because I really

228

00:08:11,570 --> 00:08:09,599

think spaceballoons is going to be the

229

00:08:13,730 --> 00:08:11,580

future I think people aren't going to go

230

00:08:16,010 --> 00:08:13,740

to space in a rocket you know it's going

231

00:08:17,210 --> 00:08:16,020

to be much too too expensive so like

232

00:08:19,730 --> 00:08:17,220

people like you and me are going to go

233

00:08:20,990 --> 00:08:19,740

to space in in a balloon you know or

234

00:08:22,790 --> 00:08:21,000

near space you know you're going to go

235

00:08:25,309 --> 00:08:22,800

up to 130 000 feet you're going to be in

236

00:08:27,529 --> 00:08:25,319

the block of you know to be black of of

237

00:08:29,210 --> 00:08:27,539

the sky uh maybe you can see the sunset

238

00:08:30,409 --> 00:08:29,220

and then you know you drink some

239

00:08:31,730 --> 00:08:30,419

champagne or something and then you'll

240

00:08:33,290 --> 00:08:31,740

come back down I think that's going to

241

00:08:34,969 --> 00:08:33,300

be next year in the 2030s like people

242

00:08:37,250 --> 00:08:34,979

are going to be doing that so I think

243

00:08:39,649 --> 00:08:37,260

it's a burgeoning Bergeron

244

00:08:40,969 --> 00:08:39,659

uh kind of tech tech field in the

245

00:08:44,209 --> 00:08:40,979

military hasn't been doing it no one's

246

00:08:46,550 --> 00:08:44,219

been doing it so uh China is just

247

00:08:48,470 --> 00:08:46,560

Mass expanding right and so I see them

248

00:08:49,910 --> 00:08:48,480

just kind of following in our footsteps

249

00:08:51,290 --> 00:08:49,920

it's a lot easier to just follow what

250

00:08:52,190 --> 00:08:51,300

other people did than invent your own

251
00:08:53,690 --> 00:08:52,200
new stuff

252
00:08:55,730 --> 00:08:53,700
so I think they're right at that spot

253
00:08:58,009 --> 00:08:55,740
where can they control these balloons

254
00:09:00,710 --> 00:08:58,019
probably not and if you look back we had

255
00:09:02,509 --> 00:09:00,720
the same row back in 57 I think 1957

256
00:09:03,949 --> 00:09:02,519
when the Soviets when they caught all of

257
00:09:06,050 --> 00:09:03,959
our stuff and they found this cameras

258
00:09:07,850 --> 00:09:06,060
these cameras on there they were pissed

259
00:09:10,610 --> 00:09:07,860
so it started kind of a similar row that

260
00:09:12,009 --> 00:09:10,620
we're seeing now yeah absolutely and now

261
00:09:14,150 --> 00:09:12,019
obviously the the

262
00:09:16,070 --> 00:09:14,160
conversation has been really focused on

263
00:09:19,610 --> 00:09:16,080

these three other objects you know that

264

00:09:20,870 --> 00:09:19,620

smaller and what we're being told is

265

00:09:22,550 --> 00:09:20,880

that there's very little known about

266

00:09:25,070 --> 00:09:22,560

them so let's start to start February

267

00:09:27,350 --> 00:09:25,080

the 10th on the free Friday the the

268

00:09:29,150 --> 00:09:27,360

Alaska object was shot down what do we

269

00:09:31,430 --> 00:09:29,160

know about that one

270

00:09:33,710 --> 00:09:31,440

okay excellent yeah if you let me share

271

00:09:35,990 --> 00:09:33,720

my screen I have a map I I built I built

272

00:09:38,690 --> 00:09:36,000

a Google project if people wanna

273

00:09:41,269 --> 00:09:38,700

uh load it I can give you the the link

274

00:09:42,949 --> 00:09:41,279

but basically this is Alaska and I think

275

00:09:44,630 --> 00:09:42,959

I I was actually there for four years

276

00:09:47,990 --> 00:09:44,640

you know I was at this base right here

277

00:09:50,389 --> 00:09:48,000

ielson Air Force Base okay

278

00:09:52,430 --> 00:09:50,399

as an aggressor it's probably my

279

00:09:54,769 --> 00:09:52,440

favorite flying assignment I mean just

280

00:09:56,449 --> 00:09:54,779

amazing out here this is a two mile long

281

00:09:58,430 --> 00:09:56,459

Runway it was made for the the space

282

00:09:59,329 --> 00:09:58,440

shuttle they used it as an alternate

283

00:10:02,269 --> 00:09:59,339

Landing

284

00:10:05,150 --> 00:10:02,279

and if you look at where Alaska is right

285

00:10:07,190 --> 00:10:05,160

let's look at it as we zoom out

286

00:10:09,470 --> 00:10:07,200

this is why Alaska is important I need

287

00:10:11,750 --> 00:10:09,480

to get rid of the clouds I guess

288

00:10:13,850 --> 00:10:11,760

it's what you see here is uh this is the

289

00:10:15,590 --> 00:10:13,860

North Pole right here right yeah

290

00:10:19,430 --> 00:10:15,600

oh we can't see the map okay well let me

291

00:10:23,690 --> 00:10:21,710

this is all Russia going around here and

292

00:10:25,970 --> 00:10:23,700

if you go there now there's Alaska and

293

00:10:27,410 --> 00:10:25,980

then America so from the north if you're

294

00:10:28,250 --> 00:10:27,420

at the North Pole the earth looks very

295

00:10:29,269 --> 00:10:28,260

different

296

00:10:31,250 --> 00:10:29,279

yeah

297

00:10:33,650 --> 00:10:31,260

and that's what we learned is that you

298

00:10:35,030 --> 00:10:33,660

know the war with the war with Russia is

299

00:10:36,410 --> 00:10:35,040

going to happen right here this is where

300

00:10:38,090 --> 00:10:36,420

we I mean we touch Russia we have a

301
00:10:41,329 --> 00:10:38,100
border with Russia essentially right

302
00:10:43,130 --> 00:10:41,339
here in Alaska it's very far people

303
00:10:44,630 --> 00:10:43,140
don't you know if you're not from you

304
00:10:45,829 --> 00:10:44,640
even Americans don't realize how far

305
00:10:48,110 --> 00:10:45,839
this is you know this is like a

306
00:10:50,030 --> 00:10:48,120
four-hour flight like Europe is it fits

307
00:10:51,350 --> 00:10:50,040
right in here wow if you look because

308
00:10:54,350 --> 00:10:51,360
the

309
00:10:56,210 --> 00:10:54,360
this is as as tall as America you know

310
00:10:59,150 --> 00:10:56,220
the state of Alaska fits in right here

311
00:11:01,130 --> 00:10:59,160
so it's a really big area really

312
00:11:02,750 --> 00:11:01,140
um large space there's no people out

313
00:11:04,190 --> 00:11:02,760

there's no roads out here this I mean

314

00:11:06,650 --> 00:11:04,200

this is all you have to fly to this area

315

00:11:08,329 --> 00:11:06,660

of Alaska to get out here so this is out

316

00:11:09,769 --> 00:11:08,339

out in the middle of nowhere and this is

317

00:11:12,230 --> 00:11:09,779

why it's kind of heating up with Alaska

318

00:11:14,630 --> 00:11:12,240

I mean sorry with Russia

319

00:11:16,490 --> 00:11:14,640

is that's our closest point uh and

320

00:11:18,889 --> 00:11:16,500

lately I guess just this past week you

321

00:11:21,769 --> 00:11:18,899

had some uh tu-95 bomber that was

322

00:11:26,350 --> 00:11:21,779

intercepted by f-16s again out of this

323

00:11:31,009 --> 00:11:29,449

space down here

324

00:11:33,110 --> 00:11:31,019

um and so

325

00:11:34,730 --> 00:11:33,120

the the Russians actually there's a

326

00:11:36,590 --> 00:11:34,740

program I can't remember what it's

327

00:11:38,870 --> 00:11:36,600

called it's called um I'd have to look

328

00:11:40,009 --> 00:11:38,880

it up after this friendly Skies or

329

00:11:41,509 --> 00:11:40,019

something like that we have an agreement

330

00:11:43,370 --> 00:11:41,519

with the Russians where they fly their

331

00:11:46,009 --> 00:11:43,380

bombers over our

332

00:11:48,470 --> 00:11:46,019

uh country

333

00:11:50,090 --> 00:11:48,480

um and you know with and we know when

334

00:11:51,829 --> 00:11:50,100

they're coming we set it up obviously we

335

00:11:53,690 --> 00:11:51,839

close all the the secret doors just like

336

00:11:55,730 --> 00:11:53,700

the blue kind of like the balloon flight

337

00:11:56,930 --> 00:11:55,740

you know we know they're coming uh and

338

00:11:58,430 --> 00:11:56,940

then they'll they'll come in I don't

339

00:12:00,350 --> 00:11:58,440

know I doubt that's going on now with

340

00:12:02,210 --> 00:12:00,360

all the recent um

341

00:12:04,730 --> 00:12:02,220

issues in Ukraine but that's what

342

00:12:07,550 --> 00:12:04,740

happens tu-95 came here up to 12

343

00:12:09,170 --> 00:12:07,560

nautical miles right any any country can

344

00:12:11,210 --> 00:12:09,180

fly their planes 12 nautical miles off

345

00:12:12,769 --> 00:12:11,220

your Coast right because that's the

346

00:12:14,930 --> 00:12:12,779

international waters so that guess where

347

00:12:17,690 --> 00:12:14,940

all the spy planes are all right I mean

348

00:12:19,550 --> 00:12:17,700

13 miles off the coast there's you know

349

00:12:20,269 --> 00:12:19,560

it's it's legal

350

00:12:22,490 --> 00:12:20,279

um

351
00:12:24,769 --> 00:12:22,500
so anyway now that's that's to set it up

352
00:12:26,569 --> 00:12:24,779
so this is this is Alaska the f-22s are

353
00:12:28,610 --> 00:12:26,579
down to here the f-35s are here at my

354
00:12:30,350 --> 00:12:28,620
old base at eielson Austin Air Force

355
00:12:31,970 --> 00:12:30,360
Base and then this is that Ice Road

356
00:12:34,550 --> 00:12:31,980
Truckers if you've ever seen that show

357
00:12:36,110 --> 00:12:34,560
yeah Ice Road Truckers this is it man

358
00:12:37,430 --> 00:12:36,120
this is the road it's the road up to

359
00:12:40,130 --> 00:12:37,440
prudo Bay

360
00:12:42,350 --> 00:12:40,140
uh

361
00:12:43,970 --> 00:12:42,360
yeah it's this is it so Ice Road

362
00:12:45,590 --> 00:12:43,980
Truckers

363
00:12:48,769 --> 00:12:45,600

this is the only road to get up there

364

00:12:50,870 --> 00:12:48,779

and so the shoot down from what I

365

00:12:52,910 --> 00:12:50,880

understand is they were tracking North

366

00:12:54,530 --> 00:12:52,920

so again this area like I just mentioned

367

00:12:56,329 --> 00:12:54,540

is really important right because that's

368

00:12:57,470 --> 00:12:56,339

where that's where the Russians would

369

00:13:00,530 --> 00:12:57,480

come from

370

00:13:03,230 --> 00:13:00,540

or yeah anyone else and so um

371

00:13:05,150 --> 00:13:03,240

what they did was is they they lowered

372

00:13:06,290 --> 00:13:05,160

the Clutter right after they shot down

373

00:13:07,730 --> 00:13:06,300

the first balloon there was a lot of

374

00:13:08,990 --> 00:13:07,740

issues what are all these things flying

375

00:13:11,030 --> 00:13:09,000

in our airspace so they lowered the

376

00:13:13,370 --> 00:13:11,040

Clutter on the radar so now they can

377

00:13:15,710 --> 00:13:13,380

pick up a lot smaller objects

378

00:13:17,629 --> 00:13:15,720

and they track something over towards

379

00:13:19,430 --> 00:13:17,639

this area to prude obey and they

380

00:13:21,290 --> 00:13:19,440

launched first they launched f-35s out

381

00:13:23,449 --> 00:13:21,300

of here this was on Saturday I think

382

00:13:24,710 --> 00:13:23,459

Saturday morning and they it's this is

383

00:13:25,730 --> 00:13:24,720

far right you would definitely need a

384

00:13:33,590 --> 00:13:25,740

tanker

385

00:13:36,110 --> 00:13:33,600

so the whole base it you know the basis

386

00:13:36,949 --> 00:13:36,120

of Alaska were oriented towards this I'm

387

00:13:39,290 --> 00:13:36,959

sure

388

00:13:40,870 --> 00:13:39,300

so they had F32 f-35s came up here with

389

00:13:43,910 --> 00:13:40,880

the tanker I'm guessing with a tanker

390

00:13:45,470 --> 00:13:43,920

and they said they tried to identify it

391

00:13:47,090 --> 00:13:45,480

and I guess they couldn't identify it

392

00:13:49,490 --> 00:13:47,100

and one of them

393

00:13:51,470 --> 00:13:49,500

again this is rumor one of the pilots

394

00:13:54,470 --> 00:13:51,480

said that it messed with the sensors on

395

00:13:56,509 --> 00:13:54,480

a F-35 affected his sensors

396

00:13:57,949 --> 00:13:56,519

you know the F-35 is very Advanced

397

00:13:59,090 --> 00:13:57,959

aircraft it knows when you're trying to

398

00:14:00,710 --> 00:13:59,100

mess with it so maybe it could be

399

00:14:01,910 --> 00:14:00,720

telling him that or taking up some

400

00:14:05,030 --> 00:14:01,920

errant signals or something the other

401
00:14:06,590 --> 00:14:05,040
F-35 said there was no issues so

402
00:14:08,449 --> 00:14:06,600
so they didn't have any weapons I'm

403
00:14:10,430 --> 00:14:08,459
guessing or

404
00:14:14,210 --> 00:14:10,440
yeah I mean they're normally training so

405
00:14:16,790 --> 00:14:14,220
they didn't have live weapons the f-22s

406
00:14:18,590 --> 00:14:16,800
um sounds like they were on alert so

407
00:14:20,269 --> 00:14:18,600
they had live weapons

408
00:14:21,230 --> 00:14:20,279
and they came up and they shot this

409
00:14:24,530 --> 00:14:21,240
thing down

410
00:14:25,970 --> 00:14:24,540
um last I heard was It was a cylinder

411
00:14:27,470 --> 00:14:25,980
shaped object but I didn't get a full

412
00:14:29,750 --> 00:14:27,480
identification of it

413
00:14:31,129 --> 00:14:29,760

do you think that's that that's legit do

414

00:14:33,769 --> 00:14:31,139

you think the pilots wouldn't be able to

415

00:14:35,990 --> 00:14:33,779

get good eyes on or or even like gun

416

00:14:40,250 --> 00:14:36,000

camera or flip flare you know would it

417

00:14:44,030 --> 00:14:40,260

would it appear in on those systems

418

00:14:45,650 --> 00:14:44,040

yeah well they shot it so

419

00:14:47,210 --> 00:14:45,660

I listened to I learned a lot of

420

00:14:49,400 --> 00:14:47,220

information just by listening to the

421

00:14:50,030 --> 00:14:49,410

Lake Huron shutdown

422

00:14:50,629 --> 00:14:50,040

[Music]

423

00:14:52,189 --> 00:14:50,639

um

424

00:14:53,930 --> 00:14:52,199

let me come back to that question don't

425

00:14:55,550 --> 00:14:53,940

forget that question sure no but no no

426

00:14:58,189 --> 00:14:55,560

worries yeah so we'll come back to that

427

00:14:59,750 --> 00:14:58,199

but you know did they see it and would

428

00:15:02,090 --> 00:14:59,760

it be difficult

429

00:15:04,370 --> 00:15:02,100

yeah there's definitely issues with that

430

00:15:06,590 --> 00:15:04,380

um so then that same day okay they

431

00:15:09,050 --> 00:15:06,600

tracked another object

432

00:15:11,269 --> 00:15:09,060

I'm flowing down in this area flowing

433

00:15:12,769 --> 00:15:11,279

East and interesting for me is all these

434

00:15:14,689 --> 00:15:12,779

objects are flowing to the east with the

435

00:15:16,970 --> 00:15:14,699

weather so when I initially heard that

436

00:15:19,129 --> 00:15:16,980

with the wind I was I kind of just feel

437

00:15:21,290 --> 00:15:19,139

like they're balloons you know okay that

438

00:15:23,329 --> 00:15:21,300

was my initial impression is or this is

439

00:15:25,009 --> 00:15:23,339

clutter maybe it is something a device

440

00:15:26,569 --> 00:15:25,019

that people have thrown up to pretend to

441

00:15:27,889 --> 00:15:26,579

be a balloon you know even even the

442

00:15:30,230 --> 00:15:27,899

Chinese like I said they can throw up a

443

00:15:32,509 --> 00:15:30,240

spy balloon but it's just a normal

444

00:15:33,710 --> 00:15:32,519

science surveillance fan maybe it is and

445

00:15:35,569 --> 00:15:33,720

maybe the people that send it up think

446

00:15:38,689 --> 00:15:35,579

it is it doesn't mean that it hasn't

447

00:15:41,990 --> 00:15:38,699

been uh also taken over I guess or used

448

00:15:44,689 --> 00:15:42,000

by the uh intelligence agencies so the

449

00:15:46,850 --> 00:15:44,699

second one um this is the third shoot

450

00:15:48,110 --> 00:15:46,860

down right so later in the day they

451

00:15:50,629 --> 00:15:48,120

shoot that one down they track this

452

00:15:52,250 --> 00:15:50,639

subject they launched f-22s again and

453

00:15:54,230 --> 00:15:52,260

they shoot this down this time in Canada

454

00:15:56,210 --> 00:15:54,240

right so this is the Canadian border

455

00:15:58,250 --> 00:15:56,220

right here

456

00:15:59,930 --> 00:15:58,260

so they had to talk Biden had to call

457

00:16:01,069 --> 00:15:59,940

Trudeau prime minister Trudeau and say

458

00:16:02,930 --> 00:16:01,079

hey can we shoot this thing down because

459

00:16:05,210 --> 00:16:02,940

it's going into Canada

460

00:16:06,769 --> 00:16:05,220

right and then I think the Canadian

461

00:16:10,790 --> 00:16:06,779

f-18s came out

462

00:16:12,350 --> 00:16:10,800

yeah my guess is again again having live

463

00:16:14,509 --> 00:16:12,360

weapons not normal right this is the

464

00:16:16,430 --> 00:16:14,519

first time any any the US has shot

465

00:16:17,870 --> 00:16:16,440

anything down around the US I couldn't

466

00:16:19,189 --> 00:16:17,880

believe that I thought I heard that

467

00:16:20,569 --> 00:16:19,199

statement I was like surely that can't

468

00:16:22,370 --> 00:16:20,579

be correct

469

00:16:23,810 --> 00:16:22,380

um but that's correct you know so we

470

00:16:25,790 --> 00:16:23,820

never had live weapon you know it was

471

00:16:28,310 --> 00:16:25,800

training weapons essentially

472

00:16:30,470 --> 00:16:28,320

live weapons impart a lot of a lot more

473

00:16:32,569 --> 00:16:30,480

issues but the alert Birds the the

474

00:16:34,189 --> 00:16:32,579

planes that are on alert to defend again

475

00:16:35,269 --> 00:16:34,199

the country they'll have live weapons or

476
00:16:36,530 --> 00:16:35,279
if you have enough time you can make

477
00:16:38,569 --> 00:16:36,540
live weapons

478
00:16:40,189 --> 00:16:38,579
they shot this one down

479
00:16:42,470 --> 00:16:40,199
um initially it was a cylindrical object

480
00:16:45,410 --> 00:16:42,480
but then I heard

481
00:16:46,730 --> 00:16:45,420
uh I read that it was a small metallic

482
00:16:48,530 --> 00:16:46,740
balloon

483
00:16:52,189 --> 00:16:48,540
that's what came out

484
00:16:54,110 --> 00:16:52,199
um about the size of a small car was it

485
00:16:57,170 --> 00:16:54,120
is that that one

486
00:16:58,610 --> 00:16:57,180
uh that's the there's so much data right

487
00:17:00,230 --> 00:16:58,620
from all these different news articles

488
00:17:02,629 --> 00:17:00,240

everyone's writing news art like

489

00:17:04,610 --> 00:17:02,639

literally every every place out there is

490

00:17:07,189 --> 00:17:04,620

writing news articles I think they were

491

00:17:09,409 --> 00:17:07,199

all three of of these so this one this

492

00:17:11,090 --> 00:17:09,419

one and the the fourth one here I'll

493

00:17:13,309 --> 00:17:11,100

talk about yeah

494

00:17:14,329 --> 00:17:13,319

um are small from what I believe smaller

495

00:17:16,250 --> 00:17:14,339

than a car

496

00:17:18,230 --> 00:17:16,260

so this one

497

00:17:21,530 --> 00:17:18,240

this is a

498

00:17:23,510 --> 00:17:21,540

again flew across initially on Saturday

499

00:17:26,030 --> 00:17:23,520

I believe it was picked up out here

500

00:17:28,549 --> 00:17:26,040

right um or near Montana and then they

501
00:17:31,190 --> 00:17:28,559
launched the Portland f8 they launched

502
00:17:33,049 --> 00:17:31,200
15 f-15s out of Portland is what I read

503
00:17:36,409 --> 00:17:33,059
again who knows if all the writing is

504
00:17:38,810 --> 00:17:36,419
correct but 15. to get over here again

505
00:17:40,130 --> 00:17:38,820
with Tinker operations to try and find

506
00:17:41,930 --> 00:17:40,140
this thing they couldn't I guess or

507
00:17:43,909 --> 00:17:41,940
identify it but I heard that may be an

508
00:17:45,490 --> 00:17:43,919
interesting engagement this F-15

509
00:17:49,250 --> 00:17:45,500
engagement I heard it may be interesting

510
00:17:50,810 --> 00:17:49,260
they lost it though so then it keeps

511
00:17:53,510 --> 00:17:50,820
going travels across they pick it up

512
00:17:55,430 --> 00:17:53,520
again they believe it's the same object

513
00:17:58,130 --> 00:17:55,440

um and then they they end up shooting it

514

00:17:59,990 --> 00:17:58,140

down over Lake Huron I can't say that

515

00:18:03,529 --> 00:18:00,000

correctly apparently all the Americans

516

00:18:06,289 --> 00:18:03,539

correct like Huron here on how would you

517

00:18:09,289 --> 00:18:06,299

pronounce this uh like Huron okay you

518

00:18:12,350 --> 00:18:10,909

um yep so then they shoot it down here

519

00:18:14,390 --> 00:18:12,360

and and there they get a good

520

00:18:18,650 --> 00:18:14,400

identification on in in this engagement

521

00:18:20,390 --> 00:18:18,660

over Lake Huron and the over Florida the

522

00:18:22,789 --> 00:18:20,400

original the first Chinese balloon

523

00:18:24,470 --> 00:18:22,799

takedown they were transmitting on open

524

00:18:26,690 --> 00:18:24,480

source so they didn't have their radios

525

00:18:29,570 --> 00:18:26,700

encrypted again you're not in a war zone

526

00:18:31,310 --> 00:18:29,580

area you know you're back over the U.S

527

00:18:33,169 --> 00:18:31,320

you're you're at home it's pretty

528

00:18:35,930 --> 00:18:33,179

relaxed so we picked up all the

529

00:18:37,730 --> 00:18:35,940

communications so I did a I did a video

530

00:18:40,370 --> 00:18:37,740

just listening to the communications on

531

00:18:41,750 --> 00:18:40,380

this and in that video they talk yeah

532

00:18:43,610 --> 00:18:41,760

you can hear clearly them talking about

533

00:18:45,169 --> 00:18:43,620

how difficult it is to see this thing

534

00:18:46,789 --> 00:18:45,179

and to shoot

535

00:18:47,990 --> 00:18:46,799

and particularly it's difficult to see

536

00:18:49,970 --> 00:18:48,000

with your eyes

537

00:18:51,770 --> 00:18:49,980

so they're able to pick it up The Radars

538

00:18:53,210 --> 00:18:51,780

pick it up right so whatever radar they

539

00:18:55,730 --> 00:18:53,220

they made more sensitive out here is

540

00:18:57,650 --> 00:18:55,740

able to pick this thing up

541

00:18:58,970 --> 00:18:57,660

and it's transmitting it to the fighters

542

00:19:00,950 --> 00:18:58,980

and then the fighters are able to lock

543

00:19:03,470 --> 00:19:00,960

it with their radar they say there I

544

00:19:04,730 --> 00:19:03,480

have radar contact or I lost it and the

545

00:19:06,770 --> 00:19:04,740

targeting pod

546

00:19:08,990 --> 00:19:06,780

so the tardy pod that same thing you see

547

00:19:10,789 --> 00:19:09,000

in uh the Gimbal and the go fast videos

548

00:19:12,110 --> 00:19:10,799

you know that's what they'll see and you

549

00:19:15,470 --> 00:19:12,120

can hear them describe it in there he

550

00:19:17,690 --> 00:19:15,480

described it as a container right so a

551
00:19:22,430 --> 00:19:17,700
square shape with strings hanging down

552
00:19:23,630 --> 00:19:22,440
okay it's black and black hot and he

553
00:19:25,490 --> 00:19:23,640
said it's about the size of a

554
00:19:27,250 --> 00:19:25,500
four-wheeler

555
00:19:30,110 --> 00:19:27,260
so

556
00:19:32,630 --> 00:19:30,120
based on that they they can see it with

557
00:19:34,430 --> 00:19:32,640
their systems they can shoot at it right

558
00:19:36,950 --> 00:19:34,440
because he said the other systems can

559
00:19:40,549 --> 00:19:36,960
see it right the the targeting pot can

560
00:19:42,710 --> 00:19:40,559
see it and the missile can see it

561
00:19:44,270 --> 00:19:42,720
but it's going so slow

562
00:19:46,730 --> 00:19:44,280
that in order to shoot it with the

563
00:19:49,070 --> 00:19:46,740

cannon the cannon is our 20 millimeter

564

00:19:51,529 --> 00:19:49,080

cannon that we have sure amazing weapon

565

00:19:53,090 --> 00:19:51,539

but in order to shoot it with that you

566

00:19:54,950 --> 00:19:53,100

have to get within range and within

567

00:19:57,650 --> 00:19:54,960

range on the gun is about a mile and a

568

00:19:59,570 --> 00:19:57,660

half okay which seems far you're like oh

569

00:20:01,310 --> 00:19:59,580

that's pretty far away I'm not but in

570

00:20:03,110 --> 00:20:01,320

fighter in fighter speeds it's not far

571

00:20:05,750 --> 00:20:03,120

at all it's very close actually because

572

00:20:07,490 --> 00:20:05,760

you know if you're going normal fighter

573

00:20:11,029 --> 00:20:07,500

speeds right normal fighter speeds is

574

00:20:13,549 --> 00:20:11,039

like 400 knots sure you know if I it's

575

00:20:15,049 --> 00:20:13,559

I guess in this situation I you can fly

576

00:20:16,669 --> 00:20:15,059

slower because there's no real danger

577

00:20:18,470 --> 00:20:16,679

right the biggest danger to this is them

578

00:20:20,270 --> 00:20:18,480

hitting it them running into it or it

579

00:20:21,710 --> 00:20:20,280

being you know has a bomb on it or

580

00:20:24,529 --> 00:20:21,720

something right

581

00:20:25,970 --> 00:20:24,539

um so them running into it is the

582

00:20:28,250 --> 00:20:25,980

biggest danger if it goes down one of

583

00:20:30,529 --> 00:20:28,260

your engines you will crash okay the

584

00:20:34,010 --> 00:20:30,539

plane will crash right and and I guess

585

00:20:35,990 --> 00:20:34,020

people also don't don't realize that so

586

00:20:38,450 --> 00:20:36,000

using the guns very dangerous in these

587

00:20:39,770 --> 00:20:38,460

situations because they can't see it and

588

00:20:41,990 --> 00:20:39,780

in order to shoot something with the gun

589

00:20:44,210 --> 00:20:42,000

at least the way it works in the F-16 I

590

00:20:46,190 --> 00:20:44,220

don't know actually it must work the

591

00:20:48,049 --> 00:20:46,200

same in the other Fighters

592

00:20:50,270 --> 00:20:48,059

um you have to actually see the target

593

00:20:52,370 --> 00:20:50,280

and then shoot it now it the radar lock

594

00:20:53,810 --> 00:20:52,380

will help you right you'll get a little

595

00:20:56,150 --> 00:20:53,820

circle over it you'll get a little

596

00:20:57,890 --> 00:20:56,160

circle but you still have to put your

597

00:20:59,630 --> 00:20:57,900

little the the death dot we call it the

598

00:21:01,370 --> 00:20:59,640

death dot it's a radar calculated uh

599

00:21:03,470 --> 00:21:01,380

gunpoint you still have to put it right

600

00:21:05,270 --> 00:21:03,480

over the target if you can't see it

601
00:21:07,549 --> 00:21:05,280
you know then you can't shoot it

602
00:21:09,289 --> 00:21:07,559
so I've never heard of that it's

603
00:21:10,430 --> 00:21:09,299
happening before you know normally if

604
00:21:11,690 --> 00:21:10,440
something's

605
00:21:13,370 --> 00:21:11,700
normally it's big enough you can

606
00:21:14,870 --> 00:21:13,380
identify it yeah but now we're getting

607
00:21:16,610 --> 00:21:14,880
into Microtech you're talking about

608
00:21:18,710 --> 00:21:16,620
micro drones

609
00:21:20,450 --> 00:21:18,720
you know can these f-16s could they even

610
00:21:23,270 --> 00:21:20,460
what if this was a drone

611
00:21:24,890 --> 00:21:23,280
you know a long-term drone that

612
00:21:26,450 --> 00:21:24,900
you know it's difficult for them to

613
00:21:28,130 --> 00:21:26,460

engage with it to be fair though they

614

00:21:30,049 --> 00:21:28,140

did shoot it right they shot it they but

615

00:21:33,110 --> 00:21:30,059

it took two missiles that so that the

616

00:21:35,270 --> 00:21:33,120

first missile uh missed

617

00:21:37,610 --> 00:21:35,280

uh or for some reason and I have a

618

00:21:38,450 --> 00:21:37,620

little video to show if my guess as to

619

00:21:43,130 --> 00:21:38,460

why

620

00:21:48,470 --> 00:21:46,370

I think you just need to switch to tab

621

00:21:49,909 --> 00:21:48,480

you want me to show it yeah go for it

622

00:21:54,230 --> 00:21:49,919

okay

623

00:21:55,850 --> 00:21:54,240

channel on why the first missile I think

624

00:21:58,310 --> 00:21:55,860

missed okay I don't know but here it is

625

00:22:00,230 --> 00:21:58,320

16 jet involved in the shoot down over

626

00:22:01,850 --> 00:22:00,240

Lake Huron missed its first shot

627

00:22:04,789 --> 00:22:01,860

according to Fox News a second

628

00:22:08,029 --> 00:22:04,799

Sidewinder hit the mysterious craft the

629

00:22:10,909 --> 00:22:08,039

air intercept missile 9x is 9 feet 11

630

00:22:13,010 --> 00:22:10,919

inches long five inches in diameter and

631

00:22:14,950 --> 00:22:13,020

uses an infrared proximity for use

632

00:22:18,169 --> 00:22:14,960

basically a flashlight sends out

633

00:22:20,690 --> 00:22:18,179

infrared light and then receives it most

634

00:22:22,909 --> 00:22:20,700

likely the target was just too small to

635

00:22:25,549 --> 00:22:22,919

reflect adequate light didn't fuse so

636

00:22:27,649 --> 00:22:25,559

the first missile missed the Ear Force

637

00:22:29,510 --> 00:22:27,659

F-16 simulation

638

00:22:31,430 --> 00:22:29,520

yeah so that's my guess as to why it

639

00:22:33,830 --> 00:22:31,440

missed is uh

640

00:22:36,830 --> 00:22:33,840

basically it's just small it didn't fuse

641

00:22:39,110 --> 00:22:36,840

so the muscles have to fuse or it has to

642

00:22:40,789 --> 00:22:39,120

spear it yeah and these missiles are

643

00:22:43,130 --> 00:22:40,799

very good actually you know I think your

644

00:22:44,990 --> 00:22:43,140

modern missiles can easily spear targets

645

00:22:47,149 --> 00:22:45,000

based on just how capable they are but

646

00:22:48,890 --> 00:22:47,159

if that thing's so small right it's not

647

00:22:50,870 --> 00:22:48,900

going to spear it like the Spy balloon

648

00:22:52,370 --> 00:22:50,880

they speared you know I didn't see a

649

00:22:53,930 --> 00:22:52,380

frag explosion I think I believe they

650

00:22:55,130 --> 00:22:53,940

took out the exploding part of that

651
00:22:57,409 --> 00:22:55,140
missile

652
00:22:59,149 --> 00:22:57,419
all right okay yeah if you're just going

653
00:23:01,370 --> 00:22:59,159
to shoot it if this thing is just the

654
00:23:03,590 --> 00:23:01,380
size of a four-wheeler and you shoot a

655
00:23:05,450 --> 00:23:03,600
missile at it it the missile needs to

656
00:23:07,549 --> 00:23:05,460
fuse off of it to explode it needs to

657
00:23:08,990 --> 00:23:07,559
know to explode and and I think my guess

658
00:23:10,549 --> 00:23:09,000
is it just didn't or there's some other

659
00:23:13,010 --> 00:23:10,559
malfunction you know I wasn't there

660
00:23:15,169 --> 00:23:13,020
obviously this is just a guess but if

661
00:23:17,330 --> 00:23:15,179
everything worked as it's supposed to

662
00:23:20,210 --> 00:23:17,340
then I think it's just not designed to

663
00:23:22,490 --> 00:23:20,220

shoot down balloons or balloon sized

664

00:23:25,610 --> 00:23:22,500

targets right okay

665

00:23:30,830 --> 00:23:28,909

so yeah it's strange isn't it I mean

666

00:23:32,810 --> 00:23:30,840

there's been so much talk on social

667

00:23:37,190 --> 00:23:32,820

media about you know this generally

668

00:23:38,870 --> 00:23:37,200

could be you know UAP from elsewhere I

669

00:23:41,090 --> 00:23:38,880

mean I've certainly have not gone that

670

00:23:42,830 --> 00:23:41,100

far with my my thing my beliefs let's

671

00:23:45,470 --> 00:23:42,840

say but there just doesn't seem to be

672

00:23:46,789 --> 00:23:45,480

something doesn't add up and uh and I

673

00:23:49,310 --> 00:23:46,799

think that's what's thrown up all the

674

00:23:51,230 --> 00:23:49,320

the controversy so you know we had Biden

675

00:23:54,590 --> 00:23:51,240

speaking on it yesterday without giving

676

00:23:56,810 --> 00:23:54,600

us any any new information we've got

677

00:23:58,909 --> 00:23:56,820

um Marco Rubio and Kirsten gillibrand

678

00:24:01,250 --> 00:23:58,919

really pushing for more funding for the

679

00:24:02,330 --> 00:24:01,260

arrow office and I think you know with

680

00:24:04,669 --> 00:24:02,340

all that

681

00:24:05,990 --> 00:24:04,679

connecting to the UFO subject it's just

682

00:24:07,850 --> 00:24:06,000

people are thinking you know it's

683

00:24:09,710 --> 00:24:07,860

Project Blue beam and all these weird

684

00:24:10,789 --> 00:24:09,720

and wonderful conspiracies and it's just

685

00:24:14,750 --> 00:24:10,799

become

686

00:24:16,490 --> 00:24:14,760

probably should be so

687

00:24:17,990 --> 00:24:16,500

one thing that I did notice this morning

688

00:24:21,049 --> 00:24:18,000

I'm just going to share my screen is we

689

00:24:23,149 --> 00:24:21,059

got this article about a hobby Club

690

00:24:24,470 --> 00:24:23,159

having a missing balloon feared shot

691

00:24:26,210 --> 00:24:24,480

down

692

00:24:27,230 --> 00:24:26,220

I mean look at the size of that thing I

693

00:24:29,450 --> 00:24:27,240

mean if this is what they're talking

694

00:24:31,490 --> 00:24:29,460

about how could that really fit with

695

00:24:33,409 --> 00:24:31,500

with the descriptions of what you know

696

00:24:35,149 --> 00:24:33,419

that we do know is that these things

697

00:24:37,070 --> 00:24:35,159

were small possibly the size of a small

698

00:24:39,049 --> 00:24:37,080

car something doesn't really add up

699

00:24:40,730 --> 00:24:39,059

there what do you think

700

00:24:41,450 --> 00:24:40,740

no that's exactly what it would look

701
00:24:43,850 --> 00:24:41,460
like

702
00:24:45,169 --> 00:24:43,860
oh really yeah yeah

703
00:24:47,630 --> 00:24:45,179
okay so you gotta remember you're

704
00:24:49,669 --> 00:24:47,640
looking at infrared

705
00:24:51,409 --> 00:24:49,679
um

706
00:24:52,789 --> 00:24:51,419
yeah but I surely that wouldn't give out

707
00:24:58,070 --> 00:24:52,799
a signature with it like a heat

708
00:25:01,549 --> 00:24:59,990
yeah the temperature is the same you're

709
00:25:03,950 --> 00:25:01,559
right because um

710
00:25:06,350 --> 00:25:03,960
under infrared if you remember back the

711
00:25:07,669 --> 00:25:06,360
uh the rubber duck remember the rubber

712
00:25:12,169 --> 00:25:07,679
duck yeah

713
00:25:16,130 --> 00:25:12,179

yeah that was huge yeah and on that one

714

00:25:18,289 --> 00:25:16,140

it was a latex balloon

715

00:25:19,669 --> 00:25:18,299

if you remember and and it the

716

00:25:21,289 --> 00:25:19,679

temperature on the inside was the same

717

00:25:23,690 --> 00:25:21,299

as the outside

718

00:25:26,029 --> 00:25:23,700

right so it was invisible

719

00:25:27,830 --> 00:25:26,039

to the infrared to the to the targeting

720

00:25:30,169 --> 00:25:27,840

pod I think that's what we ended up

721

00:25:31,070 --> 00:25:30,179

that's what we did or seemed like the

722

00:25:33,649 --> 00:25:31,080

most

723

00:25:35,269 --> 00:25:33,659

uh possible explanation

724

00:25:36,649 --> 00:25:35,279

so I think you're right if if the

725

00:25:38,930 --> 00:25:36,659

temperature on the inside is the same as

726

00:25:40,850 --> 00:25:38,940

the outside of that latex

727

00:25:44,510 --> 00:25:40,860

materials can be very difficult to see

728

00:25:47,690 --> 00:25:44,520

uh in a infrared targeting pot but they

729

00:25:49,789 --> 00:25:47,700

see it you know they're seeing them um

730

00:25:52,610 --> 00:25:49,799

so I mean this is this is still so many

731

00:25:56,450 --> 00:25:52,620

confusing things that don't add up

732

00:25:58,250 --> 00:25:56,460

for me I'm I'm happy you know

733

00:26:00,289 --> 00:25:58,260

I think it's great

734

00:26:02,330 --> 00:26:00,299

I just want to say that because it's

735

00:26:05,029 --> 00:26:02,340

just showing that they had just no clue

736

00:26:07,250 --> 00:26:05,039

about uaps you know uh yeah

737

00:26:08,930 --> 00:26:07,260

you know I through I don't have like

738

00:26:11,210 --> 00:26:08,940

direct contacts with generals really

739

00:26:14,029 --> 00:26:11,220

any more you know but I have friends that

740

00:26:15,769 --> 00:26:14,039

you know and I think the generals don't

741

00:26:19,190 --> 00:26:15,779

even know about I mean couldn't Define

742

00:26:21,350 --> 00:26:19,200

UAP I asked through a three-star General

743

00:26:24,169 --> 00:26:21,360

to one of my one of my friends

744

00:26:25,430 --> 00:26:24,179

and never hadn't heard of it you know

745

00:26:27,409 --> 00:26:25,440

that's a three-star General in the Air

746

00:26:29,330 --> 00:26:27,419

Force wow so I think they just don't

747

00:26:31,130 --> 00:26:29,340

know about it I I you know I think we

748

00:26:34,130 --> 00:26:31,140

live in this world where we're talking

749

00:26:35,269 --> 00:26:34,140

UFO uaps every every day every week and

750

00:26:36,250 --> 00:26:35,279

so we're like of course yeah it's

751

00:26:38,690 --> 00:26:36,260

obvious

752

00:26:40,250 --> 00:26:38,700

I think it's still just not mainstream

753

00:26:42,289 --> 00:26:40,260

you know we think it's mainstream but

754

00:26:44,930 --> 00:26:42,299

it's really not I've been surprised at

755

00:26:46,430 --> 00:26:44,940

the the reverse so when I talk to people

756

00:26:47,690 --> 00:26:46,440

in the UFO Community you know like

757

00:26:49,130 --> 00:26:47,700

Martin Willis he's like I don't think

758

00:26:50,510 --> 00:26:49,140

they're balloons you know Chris Mellon's

759

00:26:51,350 --> 00:26:50,520

like I mean Martin Willis said I think

760

00:26:53,330 --> 00:26:51,360

they're balloons I don't think they're

761

00:26:55,789 --> 00:26:53,340

UFOs

762

00:26:56,870 --> 00:26:55,799

um Chris Mellon is basically saying

763

00:26:59,090 --> 00:26:56,880

these are all

764

00:27:00,649 --> 00:26:59,100

most likely balloons you know you're

765

00:27:02,029 --> 00:27:00,659

saying initially I thought the valence

766

00:27:04,970 --> 00:27:02,039

it's just funny we don't think they're

767

00:27:07,669 --> 00:27:04,980

UFOs but the but then when I go to

768

00:27:09,470 --> 00:27:07,679

there's some uh Max afterminer he's

769

00:27:11,090 --> 00:27:09,480

another YouTuber I haven't worked for

770

00:27:12,289 --> 00:27:11,100

them all he doesn't answer my my emails

771

00:27:14,090 --> 00:27:12,299

or anything

772

00:27:16,610 --> 00:27:14,100

um but now he's talking about that they

773

00:27:19,730 --> 00:27:16,620

are UFOs right even so it's like

774

00:27:22,390 --> 00:27:19,740

mainstream is saying they're UFOs and

775

00:27:25,190 --> 00:27:22,400

we're all like no no these aren't

776

00:27:26,330 --> 00:27:25,200

it's just it's so funny and then

777

00:27:27,710 --> 00:27:26,340

everyone's like what do you think what

778

00:27:28,970 --> 00:27:27,720

do you think and I don't want to I don't

779

00:27:30,769 --> 00:27:28,980

know I feel bad being like no it's

780

00:27:32,630 --> 00:27:30,779

probably a balloon man I mean it'd be

781

00:27:34,610 --> 00:27:32,640

great but like do you really think we

782

00:27:36,890 --> 00:27:34,620

could have shot down the Tic Tac of any

783

00:27:38,630 --> 00:27:36,900

time you look at the Foo Fighters I mean

784

00:27:40,130 --> 00:27:38,640

they shot machine guns from like 50 feet

785

00:27:43,490 --> 00:27:40,140

away and Foo Fighters it just went right

786

00:27:45,350 --> 00:27:43,500

into them you know it was like um

787

00:27:47,330 --> 00:27:45,360

I don't know it would just be a very

788

00:27:49,669 --> 00:27:47,340

different uh

789

00:27:52,010 --> 00:27:49,679

kind of uh engagement so I yeah I would

790

00:27:54,110 --> 00:27:52,020

be very surprised if these were uaps

791

00:27:56,269 --> 00:27:54,120

obviously you know and I don't think

792

00:27:58,549 --> 00:27:56,279

they would even tell us maybe if they

793

00:28:00,710 --> 00:27:58,559

found it in Canada maybe the Canadians

794

00:28:03,110 --> 00:28:00,720

are have the Integrity that internally

795

00:28:04,909 --> 00:28:03,120

they just have to tell the world but I

796

00:28:07,130 --> 00:28:04,919

think we probably wouldn't find out uh

797

00:28:08,810 --> 00:28:07,140

wouldn't find out anyway but either way

798

00:28:11,269 --> 00:28:08,820

I'm very happy that they're just talking

799

00:28:12,710 --> 00:28:11,279

about uaps yeah and you look like the

800

00:28:14,750 --> 00:28:12,720

president so he gets up there and he's

801
00:28:16,130 --> 00:28:14,760
like we're standing up another task

802
00:28:19,330 --> 00:28:16,140
force

803
00:28:24,230 --> 00:28:19,340
it's like no macaroni's like no no

804
00:28:28,070 --> 00:28:24,240
that's what we made we had the AMS St AO

805
00:28:30,830 --> 00:28:28,080
aimsog we had the UAP task force we had

806
00:28:32,870 --> 00:28:30,840
something else in term we have the NASA

807
00:28:35,149 --> 00:28:32,880
task force you know we don't need any

808
00:28:37,310 --> 00:28:35,159
more damn task force man we have plenty

809
00:28:39,590 --> 00:28:37,320
of task force and they settled on it

810
00:28:40,970 --> 00:28:39,600
they settled on a great one Arrow it has

811
00:28:42,470 --> 00:28:40,980
a good name although it has office in

812
00:28:44,930 --> 00:28:42,480
the end so I don't know how you just

813
00:28:46,970 --> 00:28:44,940

have to refer to it as the arrow

814

00:28:49,310 --> 00:28:46,980

but it's still great I mean just go to

815

00:28:50,870 --> 00:28:49,320

Arrow so hopefully when I saw Marco

816

00:28:52,909 --> 00:28:50,880

Rubio's comment I was like yes you know

817

00:28:54,409 --> 00:28:52,919

he's he's so good because he he was

818

00:28:55,850 --> 00:28:54,419

saying that look we've this is no

819

00:28:57,590 --> 00:28:55,860

different from what we normally see like

820

00:28:59,210 --> 00:28:57,600

we see this all the time I've looked at

821

00:29:00,970 --> 00:28:59,220

hundreds of reports like this it's just

822

00:29:03,289 --> 00:29:00,980

they're not even looking

823

00:29:05,570 --> 00:29:03,299

you know around the US so now I think

824

00:29:07,190 --> 00:29:05,580

they'll be looking and he Chris Chris

825

00:29:09,649 --> 00:29:07,200

melon especially just hammered the Air

826

00:29:12,470 --> 00:29:09,659

Force he says the Air Force is just

827

00:29:13,610 --> 00:29:12,480

literally being hostile to request to

828

00:29:16,669 --> 00:29:13,620

try and find out what these things are

829

00:29:18,049 --> 00:29:16,679

and so the the Air Force you just see

830

00:29:19,610 --> 00:29:18,059

that Air Force General up there just

831

00:29:21,289 --> 00:29:19,620

getting pummeled with questions you know

832

00:29:23,029 --> 00:29:21,299

and so all those all those times when

833

00:29:24,529 --> 00:29:23,039

they're like UAP you know this is an

834

00:29:26,029 --> 00:29:24,539

important I need to go bomb people in

835

00:29:27,889 --> 00:29:26,039

Afghanistan you know it's like well

836

00:29:30,230 --> 00:29:27,899

maybe this is important you know maybe

837

00:29:32,269 --> 00:29:30,240

we should stop bombing people overseas

838

00:29:35,090 --> 00:29:32,279

that we don't even know right and maybe

839

00:29:37,970 --> 00:29:35,100

we should like use that and look look

840

00:29:39,889 --> 00:29:37,980

around in our own environment look at

841

00:29:42,169 --> 00:29:39,899

our own Universe figure out what's going

842

00:29:44,149 --> 00:29:42,179

on on our own Shores you know what

843

00:29:45,289 --> 00:29:44,159

I don't know I think it's uaps I see

844

00:29:47,510 --> 00:29:45,299

this as a great

845

00:29:51,529 --> 00:29:47,520

opportunity to collaborate right because

846

00:29:53,570 --> 00:29:51,539

let's say we can convince the world that

847

00:29:55,010 --> 00:29:53,580

that there there's things we don't know

848

00:29:56,810 --> 00:29:55,020

about the universe

849

00:29:59,750 --> 00:29:56,820

and we could actually just instead of

850

00:30:02,690 --> 00:29:59,760

fighting for limited resources here

851

00:30:05,029 --> 00:30:02,700

we could collaborate to find unlimited

852

00:30:06,769 --> 00:30:05,039

resources out in the universe right I

853

00:30:09,169 --> 00:30:06,779

mean I'm pretty sure we're not resource

854

00:30:12,169 --> 00:30:09,179

limited we're hit by the sun billions of

855

00:30:13,730 --> 00:30:12,179

tons of how much energy every day like

856

00:30:16,190 --> 00:30:13,740

we have we have plenty of energy the

857

00:30:18,049 --> 00:30:16,200

biggest problem right now on Earth is us

858

00:30:20,090 --> 00:30:18,059

is humans not being able to work

859

00:30:23,389 --> 00:30:20,100

together and I just I don't know I think

860

00:30:26,510 --> 00:30:23,399

uaps is a great angle it's bipartisan

861

00:30:28,970 --> 00:30:26,520

it's science related and educating about

862

00:30:30,649 --> 00:30:28,980

the universe we could really just glob

863

00:30:32,269 --> 00:30:30,659

onto that like we wouldn't have to be a

864

00:30:34,730 --> 00:30:32,279

warring culture

865

00:30:36,190 --> 00:30:34,740

despite what everyone says you know so

866

00:30:41,029 --> 00:30:36,200

yeah absolutely

867

00:30:42,889 --> 00:30:41,039

you know I was getting certain comments

868

00:30:44,330 --> 00:30:42,899

on social media going oh this this guy's

869

00:30:46,850 --> 00:30:44,340

posting these because he genuinely

870

00:30:48,769 --> 00:30:46,860

thinks it's UFOs and I I had to put out

871

00:30:51,710 --> 00:30:48,779

a statement saying I don't think it's

872

00:30:53,690 --> 00:30:51,720

UFOs I'm covering this because it shows

873

00:30:55,789 --> 00:30:53,700

it's interesting to see how the

874

00:30:57,470 --> 00:30:55,799

mainstream is all over it it's

875

00:31:00,169 --> 00:30:57,480

interesting to see the public reaction

876

00:31:01,789 --> 00:31:00,179

and the UFO community's reaction and the

877

00:31:03,649 --> 00:31:01,799

fact that there's very little stigma

878

00:31:05,389 --> 00:31:03,659

that everyone's talking about UAP to

879

00:31:07,490 --> 00:31:05,399

some degree and I think that's a

880

00:31:09,230 --> 00:31:07,500

brilliant way to kind of push this to

881

00:31:11,690 --> 00:31:09,240

people that may not be used to talking

882

00:31:13,490 --> 00:31:11,700

about UFOs and things like that so you

883

00:31:15,169 --> 00:31:13,500

know I think that was really I had to

884

00:31:16,970 --> 00:31:15,179

make that statement I did not think it

885

00:31:18,649 --> 00:31:16,980

was UFOs it was you know something else

886

00:31:22,630 --> 00:31:18,659

more prosaic

887

00:31:26,269 --> 00:31:22,640

crazy I'm just and I am

888

00:31:27,649 --> 00:31:26,279

surprised by the the balloon Tech you

889

00:31:29,810 --> 00:31:27,659

know because we launched balloons last

890

00:31:32,330 --> 00:31:29,820

year you remember for UAP Society yeah

891

00:31:34,850 --> 00:31:32,340

yeah and I I got so many questions man

892

00:31:36,950 --> 00:31:34,860

everybody is like why balloons why it's

893

00:31:39,889 --> 00:31:36,960

just a waste of money

894

00:31:41,149 --> 00:31:39,899

um and it you know to be honest it does

895

00:31:42,950 --> 00:31:41,159

cost a lot to send up these balloons

896

00:31:44,810 --> 00:31:42,960

right getting them back is difficult

897

00:31:47,090 --> 00:31:44,820

even if you get back if you're able to

898

00:31:48,889 --> 00:31:47,100

find the payload yeah

899

00:31:52,190 --> 00:31:48,899

um you can get back you still lose like

900

00:31:54,529 --> 00:31:52,200

the helium and stuff um so it is cheap

901
00:31:55,789 --> 00:31:54,539
but I don't know I just feel Vindicated

902
00:31:57,950 --> 00:31:55,799
seeing all these balloons in the news

903
00:31:59,750 --> 00:31:57,960
you know and I actually have we've

904
00:32:01,490 --> 00:31:59,760
launched balloons so I know actually

905
00:32:03,350 --> 00:32:01,500
what they would be like and the reason

906
00:32:05,149 --> 00:32:03,360
is because that was the primary uh

907
00:32:06,110 --> 00:32:05,159
mundane explanation you know one reason

908
00:32:08,930 --> 00:32:06,120
was

909
00:32:11,389 --> 00:32:08,940
like go fast I can't argue

910
00:32:13,730 --> 00:32:11,399
that it's not a balloon right it's

911
00:32:14,810 --> 00:32:13,740
impossible with only one Viewpoint

912
00:32:17,149 --> 00:32:14,820
um

913
00:32:19,549 --> 00:32:17,159

but now having actually launched a

914

00:32:20,750 --> 00:32:19,559

balloon I'm like man I don't know it if

915

00:32:22,610 --> 00:32:20,760

that is a balloon you know so I don't

916

00:32:24,409 --> 00:32:22,620

know I I feel Vindicated I guess for the

917

00:32:25,250 --> 00:32:24,419

UAP community in general just for us

918

00:32:26,750 --> 00:32:25,260

that

919

00:32:28,190 --> 00:32:26,760

like we've been talking about this stuff

920

00:32:29,630 --> 00:32:28,200

for for years

921

00:32:30,830 --> 00:32:29,640

um Chris mellon's been pushing it you

922

00:32:33,289 --> 00:32:30,840

know his new article I'm going to cover

923

00:32:36,049 --> 00:32:33,299

it tonight on a live stream I'm gonna do

924

00:32:37,669 --> 00:32:36,059

just really explains it very well that

925

00:32:39,110 --> 00:32:37,679

these things have been going on and it's

926
00:32:40,669 --> 00:32:39,120
like finally like we have some general

927
00:32:43,070 --> 00:32:40,679
awareness

928
00:32:45,230 --> 00:32:43,080
from uh from the public at least in the

929
00:32:47,330 --> 00:32:45,240
US you know this is going on absolutely

930
00:32:49,310 --> 00:32:47,340
man well I mean I think this story is

931
00:32:51,230 --> 00:32:49,320
not over yet with these objects I think

932
00:32:53,630 --> 00:32:51,240
it will continue to see how it plays out

933
00:32:55,970 --> 00:32:53,640
whether we learn much more as the

934
00:32:58,250 --> 00:32:55,980
general public I'm not really

935
00:33:00,590 --> 00:32:58,260
not optimistic about it but it's

936
00:33:02,330 --> 00:33:00,600
interesting and uh yeah listen Chris I I

937
00:33:04,850 --> 00:33:02,340
appreciate you joining me and talking

938
00:33:07,610 --> 00:33:04,860

about it um I know you're a busy man so

939

00:33:09,710 --> 00:33:07,620

yeah thank you so much man yeah thank

940

00:33:12,649 --> 00:33:09,720

you thank you Vinnie I they one last

941

00:33:14,090 --> 00:33:12,659

point is they do have all the video you

942

00:33:16,970 --> 00:33:14,100

know we know we they have the targeting

943

00:33:19,610 --> 00:33:16,980

part video okay of these objects and

944

00:33:20,810 --> 00:33:19,620

like Marco Ruby said he said 95 of

945

00:33:22,130 --> 00:33:20,820

everything in that room is not

946

00:33:24,230 --> 00:33:22,140

classified you know we can share that

947

00:33:25,669 --> 00:33:24,240

with the with the public so if there's

948

00:33:26,870 --> 00:33:25,679

any Americans listening

949

00:33:28,549 --> 00:33:26,880

um you know you can talk to your

950

00:33:30,830 --> 00:33:28,559

congressman and ask them

951
00:33:32,930 --> 00:33:30,840
to share the information so that's

952
00:33:34,610 --> 00:33:32,940
that's what I would I would propose is

953
00:33:36,590 --> 00:33:34,620
that we push to try and get this

954
00:33:38,630 --> 00:33:36,600
information released

955
00:33:40,850 --> 00:33:38,640
yeah I mean those videos if we saw them

956
00:33:43,190 --> 00:33:40,860
then we kind of puts the story to bed to

957
00:33:45,110 --> 00:33:43,200
a degree uh so yeah if it's a balloon

958
00:33:47,149 --> 00:33:45,120
just release it you know and

959
00:33:49,490 --> 00:33:47,159
yeah absolutely they did they showed the

960
00:33:51,110 --> 00:33:49,500
first one the China spy balloon you know

961
00:33:53,690 --> 00:33:51,120
so yeah why not

962
00:33:55,730 --> 00:33:53,700
we shall see but again thank you so much

963
00:33:58,009 --> 00:33:55,740

buddy and uh all your links are in the

964

00:33:59,570 --> 00:33:58,019

description below if anyone is

965

00:34:01,070 --> 00:33:59,580

have their head buried in the sand and

966

00:34:03,049 --> 00:34:01,080

not seen Chris's Channel and the UAP

967

00:34:05,389 --> 00:34:03,059

Society Channel go and check them out in

968

00:34:07,370 --> 00:34:05,399

the description Chris enjoy your weekend

969

00:34:09,349 --> 00:34:07,380

and your week and we'll catch up soon
