

# Avi Loeb & Christiaan van Heijst

## Echo European Congress for UAP Studies and Research

**DISCLOSURE  
TEAM**  
VINCE ADAMS

1  
00:00:04,070 --> 00:00:02,750  
welcome back to the channel guys this is

2  
00:00:06,289 --> 00:00:04,080  
something a little bit different for

3  
00:00:08,750 --> 00:00:06,299  
this channel in it's not just a direct

4  
00:00:10,370 --> 00:00:08,760  
interview I recently announced that I'm

5  
00:00:12,770 --> 00:00:10,380  
going to be the host of The Echo

6  
00:00:15,289 --> 00:00:12,780  
European Congress for UAP studies and

7  
00:00:18,470 --> 00:00:15,299  
research it is a conference being held

8  
00:00:19,550 --> 00:00:18,480  
this November in Paris France and what I

9  
00:00:21,650 --> 00:00:19,560  
thought I'd do is I would thought I

10  
00:00:23,689 --> 00:00:21,660  
would just share the website and show if

11  
00:00:26,509 --> 00:00:23,699  
you're interested where you can get

12  
00:00:28,189 --> 00:00:26,519  
tickets to attend the event so let me

13  
00:00:29,630 --> 00:00:28,199

just bring up the website and then we

14

00:00:32,089 --> 00:00:29,640

can kind of go through it a little bit

15

00:00:34,790 --> 00:00:32,099

following that I do have a short

16

00:00:37,490 --> 00:00:34,800

interview with Professor Avi Loeb and

17

00:00:40,250 --> 00:00:37,500

Christian van Heist who will both be

18

00:00:42,850 --> 00:00:40,260

speaking at the event so bear with me

19

00:00:46,729 --> 00:00:42,860

like I said let me just bring on

20

00:00:48,290 --> 00:00:46,739

this screen here we go

21

00:00:50,450 --> 00:00:48,300

so there we are as you can see this is

22

00:00:52,910 --> 00:00:50,460

the home page for the echo conference

23

00:00:55,549 --> 00:00:52,920

with all the speakers and the host

24

00:00:58,010 --> 00:00:55,559

myself there

25

00:00:59,630 --> 00:00:58,020

I will post the link for this uh below

26

00:01:01,189 --> 00:00:59,640

for you but I'll just quickly read here

27

00:01:02,990 --> 00:01:01,199

the echo Congress will bring together

28

00:01:04,729 --> 00:01:03,000

speakers selected for their specific

29

00:01:07,070 --> 00:01:04,739

themes these guests will speak during

30

00:01:09,830 --> 00:01:07,080

conferences roundtables and for some

31

00:01:11,870 --> 00:01:09,840

video conferences the private event will

32

00:01:14,030 --> 00:01:11,880

also bring together journalists media

33

00:01:16,310 --> 00:01:14,040

managers and editors National and

34

00:01:18,050 --> 00:01:16,320

international live event featuring

35

00:01:20,749 --> 00:01:18,060

International speakers in the field of

36

00:01:22,870 --> 00:01:20,759

UAP and here we have the the sort of

37

00:01:25,670 --> 00:01:22,880

Headliners we have Christopher Mellon

38

00:01:28,929 --> 00:01:25,680

avilobe Jacques valet

39

00:01:31,969 --> 00:01:28,939  
and then we have a selection of French

40

00:01:34,310 --> 00:01:31,979  
ufologists we have

41

00:01:36,770 --> 00:01:34,320  
a former fighter pilot in the French Air

42

00:01:39,649 --> 00:01:36,780  
Force I mentioned Christian van Heist

43

00:01:42,230 --> 00:01:39,659  
the Boeing 747 Captain

44

00:01:45,370 --> 00:01:42,240  
um myself and uh author screenwriter and

45

00:01:47,210 --> 00:01:45,380  
director Dominic feelhol so moving on

46

00:01:49,249 --> 00:01:47,220  
we're just going to go through these

47

00:01:50,870 --> 00:01:49,259  
tabs briefly if you want to check the

48

00:01:53,630 --> 00:01:50,880  
link below you can go and have a better

49

00:01:55,490 --> 00:01:53,640  
look so there's some Echo objectives for

50

00:01:56,870 --> 00:01:55,500  
what they're trying to achieve here and

51  
00:01:58,730 --> 00:01:56,880  
I think this is really important that we

52  
00:02:01,190 --> 00:01:58,740  
have these types of events not just in

53  
00:02:03,230 --> 00:02:01,200  
the US but in Europe as well it helps to

54  
00:02:05,990 --> 00:02:03,240  
kind of spread the word and show that

55  
00:02:07,969 --> 00:02:06,000  
this subject is being taken seriously

56  
00:02:10,130 --> 00:02:07,979  
so there's some more information you

57  
00:02:11,330 --> 00:02:10,140  
have the the general schedule of the

58  
00:02:13,250 --> 00:02:11,340  
speakers

59  
00:02:15,710 --> 00:02:13,260  
the Consortium just sort of explains

60  
00:02:17,449 --> 00:02:15,720  
about bringing researchers together

61  
00:02:19,250 --> 00:02:17,459  
and then finally if you were interested

62  
00:02:21,589 --> 00:02:19,260  
you can go and book your tickets now a

63  
00:02:23,630 --> 00:02:21,599

regular pass is currently 130 Euros

64

00:02:26,809 --> 00:02:23,640

that's for the first month after that it

65

00:02:28,369 --> 00:02:26,819

goes up to 150 Euros that's a sort of

66

00:02:29,990 --> 00:02:28,379

special offer but then there are

67

00:02:31,790 --> 00:02:30,000

different levels as you can see there

68

00:02:35,690 --> 00:02:31,800

going up then they all offer you kind of

69

00:02:37,850 --> 00:02:35,700

extras within the the package that you

70

00:02:40,790 --> 00:02:37,860

that you decide you want if you're going

71

00:02:43,250 --> 00:02:40,800

I know conferences are certainly not for

72

00:02:45,530 --> 00:02:43,260

everyone and I personally enjoy going to

73

00:02:47,690 --> 00:02:45,540

conferences not necessarily just to hear

74

00:02:49,369 --> 00:02:47,700

the speakers but also the networking

75

00:02:51,949 --> 00:02:49,379

I've found in the last couple of years

76  
00:02:53,690 --> 00:02:51,959  
from attending various conferences that

77  
00:02:55,670 --> 00:02:53,700  
I've met some very interesting people

78  
00:02:58,910 --> 00:02:55,680  
and formed some some really interesting

79  
00:03:00,710 --> 00:02:58,920  
connections just by attending so like I

80  
00:03:03,770 --> 00:03:00,720  
said I know it's not for everyone but

81  
00:03:05,990 --> 00:03:03,780  
there we are so right now I'm going to

82  
00:03:08,570 --> 00:03:06,000  
switch to the small short brief

83  
00:03:11,149 --> 00:03:08,580  
interview that I recorded with Avi Loeb

84  
00:03:13,910 --> 00:03:11,159  
and Christian van Heist enjoy

85  
00:03:16,130 --> 00:03:13,920  
so guys thank you so much for being here

86  
00:03:18,050 --> 00:03:16,140  
um I wanted to start off Avi by asking

87  
00:03:20,030 --> 00:03:18,060  
you what your thoughts are on events

88  
00:03:22,610 --> 00:03:20,040

such as this when it's specifically

89

00:03:25,430 --> 00:03:22,620

focusing on the scientific research

90

00:03:28,369 --> 00:03:25,440

aspect of the phenomena

91

00:03:30,470 --> 00:03:28,379

yeah I do think that the reports so far

92

00:03:32,690 --> 00:03:30,480

are quite intriguing and that's why I'm

93

00:03:36,470 --> 00:03:32,700

engaged with the Galileo project in

94

00:03:39,589 --> 00:03:36,480

monitoring the sky 24 7 in the infrared

95

00:03:42,670 --> 00:03:39,599

Optical radio and audio and we want to

96

00:03:45,110 --> 00:03:42,680

bring it to the realm of scientific

97

00:03:47,270 --> 00:03:45,120

mainstream in the sense of collecting

98

00:03:50,089 --> 00:03:47,280

data with instruments that we have full

99

00:03:51,949 --> 00:03:50,099

control over that we calibrate and that

100

00:03:54,710 --> 00:03:51,959

we can analyze with artificial

101  
00:03:56,449 --> 00:03:54,720  
intelligence software and that's where

102  
00:03:59,630 --> 00:03:56,459  
we are headed we already have an

103  
00:04:03,350 --> 00:03:59,640  
operating Observatory I do think that

104  
00:04:08,270 --> 00:04:03,360  
the existing data from past reports in

105  
00:04:10,850 --> 00:04:08,280  
the public domain is not conclusive and

106  
00:04:13,429 --> 00:04:10,860  
that is why the US government under the

107  
00:04:16,310 --> 00:04:13,439  
office of Aero is looking more carefully

108  
00:04:18,349 --> 00:04:16,320  
into past reports but the way to resolve

109  
00:04:21,229 --> 00:04:18,359  
the nature of the objects that are being

110  
00:04:22,250 --> 00:04:21,239  
seen is by collecting better data in the

111  
00:04:24,770 --> 00:04:22,260  
future

112  
00:04:27,290 --> 00:04:24,780  
absolutely and Christian since going

113  
00:04:29,330 --> 00:04:27,300

public with your story here on this

114

00:04:31,550 --> 00:04:29,340

channel you've since appeared on Ryan

115

00:04:33,950 --> 00:04:31,560

Grave's merged podcast and the Richard

116

00:04:35,870 --> 00:04:33,960

Dolan show so some really big platforms

117

00:04:38,629 --> 00:04:35,880

so I just wanted to ask how things have

118

00:04:42,469 --> 00:04:38,639

been for you since then and now that you

119

00:04:44,990 --> 00:04:42,479

know you're here in the UAP subjects and

120

00:04:47,870 --> 00:04:45,000

Community yeah well it's it's been quite

121

00:04:51,230 --> 00:04:47,880

a ride honestly and surprisingly I have

122

00:04:53,150 --> 00:04:51,240

not received any negative feedback uh I

123

00:04:55,129 --> 00:04:53,160

was kind of hesitant especially because

124

00:04:57,110 --> 00:04:55,139

it was I'm one of the first commercial

125

00:04:59,749 --> 00:04:57,120

pilots basically come forward with my

126

00:05:02,030 --> 00:04:59,759

story uh mostly anecdotal only one

127

00:05:04,249 --> 00:05:02,040

picture to show and only stories so I

128

00:05:07,070 --> 00:05:04,259

was expecting a lot of backlash but

129

00:05:09,590 --> 00:05:07,080

um no actually the feedback was

130

00:05:11,150 --> 00:05:09,600

extremely positive I got so many invites

131

00:05:13,370 --> 00:05:11,160

for the podcaster if you as you just

132

00:05:16,850 --> 00:05:13,380

mentioned I'm also working together now

133

00:05:19,730 --> 00:05:16,860

with Enigma labs and they are basically

134

00:05:22,189 --> 00:05:19,740

um yeah trying to to come up with a with

135

00:05:24,830 --> 00:05:22,199

a way to just gather data gather data

136

00:05:27,350 --> 00:05:24,840

from sightings from especially credible

137

00:05:29,390 --> 00:05:27,360

observers Etc and after collecting the

138

00:05:31,790 --> 00:05:29,400

data we're hopefully just starting

139

00:05:34,249 --> 00:05:31,800

analyzing it and almost like the Galileo

140

00:05:36,650 --> 00:05:34,259

project uh taking the subject serious

141

00:05:38,150 --> 00:05:36,660

and yeah getting rid of the stigma and

142

00:05:40,790 --> 00:05:38,160

that's really uh some of the really

143

00:05:42,650 --> 00:05:40,800

positive stuff that that happens and on

144

00:05:45,290 --> 00:05:42,660

a side note which is very interesting as

145

00:05:48,110 --> 00:05:45,300

well is that a lot of Pilots have

146

00:05:50,390 --> 00:05:48,120

approached me uh both in person and my

147

00:05:53,689 --> 00:05:50,400

email and they desperately wanted to

148

00:05:55,370 --> 00:05:53,699

share their own experiences and

149

00:05:56,749 --> 00:05:55,380

um it's it's a huge honor to hear those

150

00:05:58,850 --> 00:05:56,759

stories especially because some of them

151  
00:06:00,710 --> 00:05:58,860  
are really impactful and even emotional

152  
00:06:03,469 --> 00:06:00,720  
for some Pilots both positive and

153  
00:06:05,210 --> 00:06:03,479  
negative and uh basically just a couple

154  
00:06:06,830 --> 00:06:05,220  
of days ago I decided that I'm probably

155  
00:06:08,230 --> 00:06:06,840  
going to start a new website where

156  
00:06:11,930 --> 00:06:08,240  
Pilots can

157  
00:06:15,290 --> 00:06:11,940  
share their experiences with me and

158  
00:06:18,050 --> 00:06:15,300  
um maybe anonymously or maybe openly so

159  
00:06:19,969 --> 00:06:18,060  
I can just start Gathering uh uh yeah

160  
00:06:21,890 --> 00:06:19,979  
the stories and who knows where it will

161  
00:06:23,930 --> 00:06:21,900  
lead to if for now it's just idea to to

162  
00:06:25,850 --> 00:06:23,940  
start start this this website and just

163  
00:06:27,110 --> 00:06:25,860

invite Pilots to to share their stories

164

00:06:30,529 --> 00:06:27,120

especially if they don't want to come

165

00:06:31,909 --> 00:06:30,539

forward publicly in podcasts Etc so

166

00:06:33,710 --> 00:06:31,919

um yeah basically our first interview

167

00:06:35,450 --> 00:06:33,720

from a couple of months ago it triggered

168

00:06:38,570 --> 00:06:35,460

uh something something really beautiful

169

00:06:41,270 --> 00:06:38,580

and I can't wait to see where it's going

170

00:06:43,010 --> 00:06:41,280

fantastic that's amazing to hear now Avi

171

00:06:44,689 --> 00:06:43,020

with uh with a few months yet to go

172

00:06:46,850 --> 00:06:44,699

until the end of the year with the this

173

00:06:48,529 --> 00:06:46,860

conference that we are all appearing at

174

00:06:50,870 --> 00:06:48,539

I just wanted to know if you were hoping

175

00:06:53,450 --> 00:06:50,880

to show any or share any results from

176

00:06:55,909 --> 00:06:53,460

the Galileo project at the event yeah

177

00:06:59,570 --> 00:06:55,919

that is our goal we are currently

178

00:07:01,309 --> 00:06:59,580

collecting data we are analyzing it and

179

00:07:03,890 --> 00:07:01,319

hopefully by the time of the conference

180

00:07:07,249 --> 00:07:03,900

we have results to show scientific

181

00:07:10,189 --> 00:07:07,259

results I have an issue with anecdotal

182

00:07:12,890 --> 00:07:10,199

reports and relying on what people say

183

00:07:16,370 --> 00:07:12,900

they saw because we all know that during

184

00:07:19,010 --> 00:07:16,380

the soccer World Cup you know FIFA

185

00:07:21,409 --> 00:07:19,020

decided to rely on an automated system

186

00:07:24,290 --> 00:07:21,419

of video cameras not to rely on the

187

00:07:27,290 --> 00:07:24,300

players on the on the core the soccer

188

00:07:29,689 --> 00:07:27,300

core uh in telling whether there was an

189

00:07:31,610 --> 00:07:29,699

offside that's not a reliable method you

190

00:07:33,350 --> 00:07:31,620

can't ask Spectators to tell you whether

191

00:07:36,050 --> 00:07:33,360

there was an offside because they have

192

00:07:39,170 --> 00:07:36,060

some other impressions of what happened

193

00:07:41,150 --> 00:07:39,180

so as much as I would like to build live

194

00:07:43,189 --> 00:07:41,160

and analyze what people are telling me

195

00:07:46,070 --> 00:07:43,199

that's not the path forward because

196

00:07:48,110 --> 00:07:46,080

people can say a lot of things and that

197

00:07:50,330 --> 00:07:48,120

would not hold up scientifically

198

00:07:52,210 --> 00:07:50,340

speaking and the best way to proceed is

199

00:07:55,070 --> 00:07:52,220

not by going and interviewing and

200

00:07:56,809 --> 00:07:55,080

documenting what people say that's not

201  
00:07:57,950 --> 00:07:56,819  
the way to tell whether there was an

202  
00:08:00,529 --> 00:07:57,960  
offside

203  
00:08:02,029 --> 00:08:00,539  
the way to tell is actually by

204  
00:08:03,170 --> 00:08:02,039  
documenting what happened with

205  
00:08:05,749 --> 00:08:03,180  
instruments

206  
00:08:07,430 --> 00:08:05,759  
and analyzing the data and making it

207  
00:08:09,650 --> 00:08:07,440  
open to the public

208  
00:08:11,089 --> 00:08:09,660  
and so that is the goal of the Galileo

209  
00:08:14,150 --> 00:08:11,099  
project and I should emphasize that

210  
00:08:16,790 --> 00:08:14,160  
there is no other project that comes to

211  
00:08:18,050 --> 00:08:16,800  
that conclusion all the other projects

212  
00:08:21,230 --> 00:08:18,060  
are talking about what people

213  
00:08:23,629 --> 00:08:21,240

experienced going back in time asking

214

00:08:26,089 --> 00:08:23,639

people what did you see and so forth

215

00:08:27,830 --> 00:08:26,099

talking about it that's not the way to

216

00:08:30,290 --> 00:08:27,840

make scientific progress the way to make

217

00:08:34,190 --> 00:08:30,300

scientific progress is to get new data

218

00:08:37,029 --> 00:08:34,200

of the highest quality not anecdotal by

219

00:08:39,709 --> 00:08:37,039

systematic survey of the sky

220

00:08:42,290 --> 00:08:39,719

systematically monitoring the sky in

221

00:08:45,410 --> 00:08:42,300

many locations analyzing all of this

222

00:08:46,970 --> 00:08:45,420

data not by chance seeing something that

223

00:08:48,889 --> 00:08:46,980

you didn't expect and then talking about

224

00:08:51,350 --> 00:08:48,899

it forever that's not the way to make

225

00:08:53,150 --> 00:08:51,360

progress because if you saw something by

226

00:08:55,009 --> 00:08:53,160

chance and you didn't document it with

227

00:08:56,810 --> 00:08:55,019

the best instruments you can't really

228

00:08:59,090 --> 00:08:56,820

make much of it

229

00:09:00,889 --> 00:08:59,100

and the way to proceed is therefore

230

00:09:03,470 --> 00:09:00,899

scientifically and the Galileo project

231

00:09:06,470 --> 00:09:03,480

is the only entity which is doing that

232

00:09:07,310 --> 00:09:06,480

right now no other organization is doing

233

00:09:09,730 --> 00:09:07,320

that

234

00:09:12,590 --> 00:09:09,740

the second thing we are doing is also

235

00:09:14,329 --> 00:09:12,600

examining Interstellar objects these are

236

00:09:17,150 --> 00:09:14,339

objects that came from outside the solar

237

00:09:19,730 --> 00:09:17,160

system there were documented by

238

00:09:21,590 --> 00:09:19,740

astronomical data and by the US

239

00:09:23,329 --> 00:09:21,600

government these are Interstellar

240

00:09:26,090 --> 00:09:23,339

meteors that we discovered with my

241

00:09:28,730 --> 00:09:26,100

student Amir siraj and they are also

242

00:09:31,130 --> 00:09:28,740

Interstellar objects like discovered by

243

00:09:33,829 --> 00:09:31,140

telescope in Hawaii five-stars and and

244

00:09:36,650 --> 00:09:33,839

we are currently planning an expedition

245

00:09:38,690 --> 00:09:36,660

to the Pacific Ocean uh a few months

246

00:09:41,210 --> 00:09:38,700

before the conference and we'll

247

00:09:43,490 --> 00:09:41,220

hopefully find some relics of this first

248

00:09:46,730 --> 00:09:43,500

Interstellar meteor that appear to be

249

00:09:49,910 --> 00:09:46,740

tougher than iron tougher than all the

250

00:09:53,930 --> 00:09:49,920

other space rocks ever recorded in the

251  
00:09:56,630 --> 00:09:53,940  
NASA CME OS catalog so here I'm talking

252  
00:09:58,490 --> 00:09:56,640  
about scientific quality data implying

253  
00:10:01,630 --> 00:09:58,500  
that objects from outside the solar

254  
00:10:04,550 --> 00:10:01,640  
system appear to be unusual unfamiliar

255  
00:10:06,410 --> 00:10:04,560  
and hopefully we'll find something in

256  
00:10:08,750 --> 00:10:06,420  
the Pacific Ocean and I'll be delighted

257  
00:10:12,050 --> 00:10:08,760  
to share it with your audience

258  
00:10:14,389 --> 00:10:12,060  
fantastic yes absolutely I think the

259  
00:10:17,090 --> 00:10:14,399  
majority of the UFO Community is

260  
00:10:18,470 --> 00:10:17,100  
extremely excited with the the planned

261  
00:10:20,570 --> 00:10:18,480  
projects that you have going forward

262  
00:10:22,430 --> 00:10:20,580  
this year so we'll be delighted to hear

263  
00:10:24,889 --> 00:10:22,440

of any updates that you can give us as

264

00:10:26,630 --> 00:10:24,899

and when they happen now Christian when

265

00:10:28,850 --> 00:10:26,640

you uh first came forward you did

266

00:10:30,590 --> 00:10:28,860

produce some photographic evidence and

267

00:10:32,269 --> 00:10:30,600

have you encountered in your

268

00:10:34,490 --> 00:10:32,279

conversations with other Pilots that

269

00:10:37,130 --> 00:10:34,500

have come forward any

270

00:10:39,350 --> 00:10:37,140

evidence that shows uh you know above

271

00:10:40,910 --> 00:10:39,360

the anecdotal stories let's say and

272

00:10:44,210 --> 00:10:40,920

experiences that they have produced any

273

00:10:47,329 --> 00:10:44,220

photos or videos not from the stories

274

00:10:49,069 --> 00:10:47,339

that I heard so far uh the biggest issue

275

00:10:51,410 --> 00:10:49,079

is and that's uh what I've looked just

276

00:10:53,990 --> 00:10:51,420

mentioned as well is that it's most of

277

00:10:55,370 --> 00:10:54,000

the time chance encounters and sometimes

278

00:10:57,650 --> 00:10:55,380

it's pretty far away sometimes it's

279

00:10:59,990 --> 00:10:57,660

literally next to the cockpit and it's

280

00:11:01,910 --> 00:11:00,000

uh it takes it takes people by surprise

281

00:11:03,650 --> 00:11:01,920

and even though I'm a professional

282

00:11:06,110 --> 00:11:03,660

photographer as well I always have my

283

00:11:08,269 --> 00:11:06,120

camera ready but I only managed to to

284

00:11:10,430 --> 00:11:08,279

capture it once because it just it was

285

00:11:12,470 --> 00:11:10,440

completely unexpected and that is the

286

00:11:14,449 --> 00:11:12,480

biggest uh the biggest issue uh with

287

00:11:16,009 --> 00:11:14,459

with aviators and also military

288

00:11:18,350 --> 00:11:16,019

personnel that if they see something

289

00:11:21,110 --> 00:11:18,360

it's most of the time it's gone within a

290

00:11:23,090 --> 00:11:21,120

second and second of all well taking a

291

00:11:24,530 --> 00:11:23,100

picture of it or documenting it's it's

292

00:11:26,030 --> 00:11:24,540

not the first thing on your mind when

293

00:11:28,730 --> 00:11:26,040

something like that happens especially

294

00:11:30,470 --> 00:11:28,740

since I'm a professional at work uh

295

00:11:32,150 --> 00:11:30,480

photography is always second so that's

296

00:11:34,250 --> 00:11:32,160

that's a big issue with these anecdotal

297

00:11:37,910 --> 00:11:34,260

evidences uh by the way if I if I can

298

00:11:39,889 --> 00:11:37,920

quickly a reply to uh to Avi Lopez

299

00:11:41,889 --> 00:11:39,899

arguments I completely agree that

300

00:11:44,630 --> 00:11:41,899

there's nothing scientific about

301  
00:11:46,910 --> 00:11:44,640  
Gathering these anecdotes but I do think

302  
00:11:49,069 --> 00:11:46,920  
it's good for the general public to gain

303  
00:11:51,230 --> 00:11:49,079  
interest in the in the topic and to and

304  
00:11:53,449 --> 00:11:51,240  
to potentially also raise the funds for

305  
00:11:55,730 --> 00:11:53,459  
let's say the Galileo project and that's

306  
00:11:58,190 --> 00:11:55,740  
why I think it was important for me to

307  
00:11:59,690 --> 00:11:58,200  
come forward with my stories even though

308  
00:12:01,790 --> 00:11:59,700  
um I completely agree it's it's

309  
00:12:04,550 --> 00:12:01,800  
anecdotal and it's kind of useless in a

310  
00:12:06,050 --> 00:12:04,560  
scientific way but I think as the moment

311  
00:12:07,910 --> 00:12:06,060  
we get rid of the stigma in the moment

312  
00:12:10,790 --> 00:12:07,920  
people start opening up or realizing

313  
00:12:12,889 --> 00:12:10,800

there's there might be something to it

314

00:12:15,590 --> 00:12:12,899

um it's a small Cornerstone towards

315

00:12:17,930 --> 00:12:15,600

working uh uh yeah in the more General

316

00:12:21,290 --> 00:12:17,940

scientific Direction

317

00:12:22,490 --> 00:12:21,300

yeah I completely agree and I should say

318

00:12:25,150 --> 00:12:22,500

that

319

00:12:28,670 --> 00:12:25,160

um the reason I'm engaged as a scientist

320

00:12:31,550 --> 00:12:28,680

is because of these reports otherwise I

321

00:12:34,269 --> 00:12:31,560

would not do what I'm doing so what I'm

322

00:12:38,150 --> 00:12:34,279

saying is the Galileo project is already

323

00:12:40,930 --> 00:12:38,160

following this path that uh

324

00:12:43,129 --> 00:12:40,940

will allow us perhaps to

325

00:12:45,410 --> 00:12:43,139

systematically survey this kind figure

326

00:12:47,569 --> 00:12:45,420

out what's out there and it could be

327

00:12:49,970 --> 00:12:47,579

very exciting

328

00:12:51,650 --> 00:12:49,980

yeah absolutely and I really appreciate

329

00:12:53,449 --> 00:12:51,660

you uh you sort of bringing that point

330

00:12:56,030 --> 00:12:53,459

about the stigma there Christian because

331

00:12:57,769 --> 00:12:56,040

both in the aviation world and in the

332

00:13:00,590 --> 00:12:57,779

scientific world I think that the stigma

333

00:13:02,389 --> 00:13:00,600

has been been there quite strongly so uh

334

00:13:04,370 --> 00:13:02,399

first of all to you Abby how has the

335

00:13:05,870 --> 00:13:04,380

stigma lifted you know I think I

336

00:13:08,090 --> 00:13:05,880

probably ask you this question each time

337

00:13:10,129 --> 00:13:08,100

we speak but do you see the stigma

338

00:13:12,470 --> 00:13:10,139

lifting more and more each time every

339

00:13:15,650 --> 00:13:12,480

few months yeah and I think there would

340

00:13:18,350 --> 00:13:15,660

be a very clear way a simple way to

341

00:13:20,389 --> 00:13:18,360

remove it all together and that is by

342

00:13:23,990 --> 00:13:20,399

finding conclusive evidence Beyond any

343

00:13:26,090 --> 00:13:24,000

reasonable doubt and at that point all

344

00:13:27,949 --> 00:13:26,100

these people that ridicule the search

345

00:13:30,410 --> 00:13:27,959

would say oh of course you know we've

346

00:13:32,870 --> 00:13:30,420

been talking about it for decades you

347

00:13:35,329 --> 00:13:32,880

know shopping our uh how are the

348

00:13:38,810 --> 00:13:35,339

shopping hour the philosopher

349

00:13:42,590 --> 00:13:38,820

um argued that the three stages in

350

00:13:45,110 --> 00:13:42,600

accepting a new truth the first one is

351  
00:13:48,170 --> 00:13:45,120  
people ridiculing the discussion of that

352  
00:13:51,170 --> 00:13:48,180  
subject the second is people arguing

353  
00:13:53,269 --> 00:13:51,180  
against it very strongly and the third

354  
00:13:56,030 --> 00:13:53,279  
is people saying oh it's evident

355  
00:13:57,110 --> 00:13:56,040  
self-evident and we were saying that all

356  
00:14:00,470 --> 00:13:57,120  
along

357  
00:14:02,210 --> 00:14:00,480  
and you know of course there will be

358  
00:14:04,790 --> 00:14:02,220  
this phase as soon as we get a

359  
00:14:06,410 --> 00:14:04,800  
conclusive evidence but to collect it we

360  
00:14:08,569 --> 00:14:06,420  
really need to do the hard work it's

361  
00:14:10,910 --> 00:14:08,579  
much easier to have an opinion

362  
00:14:12,590 --> 00:14:10,920  
uh because it doesn't require much work

363  
00:14:15,710 --> 00:14:12,600

you just have an opinion like in

364

00:14:19,129 --> 00:14:15,720

politics but um collecting the evidence

365

00:14:20,690 --> 00:14:19,139

and making it conclusive is requires a

366

00:14:23,750 --> 00:14:20,700

lot of effort and that's what I'm

367

00:14:25,850 --> 00:14:23,760

willing to do uh as of now and the

368

00:14:27,410 --> 00:14:25,860

implications would be huge for Humanity

369

00:14:30,170 --> 00:14:27,420

if we find evidence for another

370

00:14:33,069 --> 00:14:30,180

technological civilization I discussed

371

00:14:35,930 --> 00:14:33,079

those implications in my new book

372

00:14:40,970 --> 00:14:35,940

Interstellar that I have the pleasure of

373

00:14:42,949 --> 00:14:40,980

holding here uh and I I do believe that

374

00:14:45,350 --> 00:14:42,959

in the coming years you know if there is

375

00:14:47,689 --> 00:14:45,360

something out there we'll find it

376

00:14:50,150 --> 00:14:47,699

nice I love I love that attitude I

377

00:14:51,110 --> 00:14:50,160

really do it's so positive and it's kind

378

00:14:52,850 --> 00:14:51,120

of the same question to you there

379

00:14:54,889 --> 00:14:52,860

Christian have you noticed the stigma

380

00:14:58,730 --> 00:14:54,899

lifting when your conversations with

381

00:15:00,410 --> 00:14:58,740

other Pilots uh in general I noticed

382

00:15:01,670 --> 00:15:00,420

that a lot of Pilots especially my

383

00:15:04,069 --> 00:15:01,680

direct colleagues they've seen my

384

00:15:05,750 --> 00:15:04,079

interviews and I'm not being laughed at

385

00:15:07,790 --> 00:15:05,760

and that's all at least not not straight

386

00:15:09,350 --> 00:15:07,800

in my face and that's already quite

387

00:15:10,910 --> 00:15:09,360

something and also some of the

388

00:15:13,009 --> 00:15:10,920

colleagues I've flown with a couple of

389

00:15:14,990 --> 00:15:13,019

flights they started opening up about

390

00:15:17,210 --> 00:15:15,000

their own experiences sometimes really

391

00:15:19,189 --> 00:15:17,220

uh carefully

392

00:15:21,470 --> 00:15:19,199

um and sometimes they share some some

393

00:15:23,449 --> 00:15:21,480

really amazing things but I also

394

00:15:25,310 --> 00:15:23,459

realized that other colleagues who have

395

00:15:26,689 --> 00:15:25,320

not seen anything are slowly opening up

396

00:15:30,470 --> 00:15:26,699

to

397

00:15:33,050 --> 00:15:30,480

David Traver and Ryan craves are coming

398

00:15:35,870 --> 00:15:33,060

forward Etc and I think it's a very slow

399

00:15:38,930 --> 00:15:35,880

process and we haven't seen the end of

400

00:15:41,210 --> 00:15:38,940

it yet but I I do think that the stigma

401  
00:15:43,250 --> 00:15:41,220  
slowly slowly disappearing and I must

402  
00:15:45,350 --> 00:15:43,260  
say that the one or two times I received

403  
00:15:48,710 --> 00:15:45,360  
negative feedback about my experiences

404  
00:15:49,910 --> 00:15:48,720  
was from a non-aviation uh people some

405  
00:15:52,790 --> 00:15:49,920  
some of them even call themselves

406  
00:15:55,490 --> 00:15:52,800  
scientists but they were just uh of the

407  
00:15:57,590 --> 00:15:55,500  
opinion that it's all and

408  
00:15:59,629 --> 00:15:57,600  
um it's it's becoming less and less and

409  
00:16:02,150 --> 00:15:59,639  
as I said among Pilots I haven't heard

410  
00:16:03,650 --> 00:16:02,160  
anything negative actually quite

411  
00:16:06,350 --> 00:16:03,660  
contrary a lot of pointers started

412  
00:16:08,509 --> 00:16:06,360  
taking it much more serious so

413  
00:16:10,610 --> 00:16:08,519

I think in the short periods we can say

414

00:16:12,590 --> 00:16:10,620

that in my perspective the stigma Has

415

00:16:14,689 --> 00:16:12,600

Lifted at least a little bit I should

416

00:16:16,850 --> 00:16:14,699

say regarding the stigma let me add an

417

00:16:19,670 --> 00:16:16,860

anecdote there used to be a congressman

418

00:16:22,490 --> 00:16:19,680

in the United States that for many years

419

00:16:25,250 --> 00:16:22,500

made anti-gay statements

420

00:16:27,050 --> 00:16:25,260

and when he left the office he admitted

421

00:16:30,410 --> 00:16:27,060

that he is gay

422

00:16:33,769 --> 00:16:30,420

and you might as well make the point

423

00:16:38,329 --> 00:16:33,779

that uh those people who are the

424

00:16:40,970 --> 00:16:38,339

strongest to ridicule this study are the

425

00:16:42,650 --> 00:16:40,980

ones that are really intrigued by it and

426

00:16:43,550 --> 00:16:42,660

we'll admit it as soon as we find the

427

00:16:46,430 --> 00:16:43,560

evidence

428

00:16:48,470 --> 00:16:46,440

interesting absolutely yeah yeah now

429

00:16:50,629 --> 00:16:48,480

Abby um alongside yourself and and

430

00:16:53,509 --> 00:16:50,639

Christian at this this event in Paris we

431

00:16:55,150 --> 00:16:53,519

have Christopher melon and Jacques valet

432

00:16:57,769 --> 00:16:55,160

who are both

433

00:16:58,850 --> 00:16:57,779

affiliated with the Galileo project can

434

00:17:00,350 --> 00:16:58,860

you tell us how that it's been

435

00:17:03,230 --> 00:17:00,360

beneficial that you've had people like

436

00:17:05,210 --> 00:17:03,240

this working alongside you yeah they

437

00:17:06,650 --> 00:17:05,220

provide the the perspective on the

438

00:17:10,010 --> 00:17:06,660

history of the subject the past

439

00:17:13,429 --> 00:17:10,020

experiences see I'm more of the Mind of

440

00:17:16,250 --> 00:17:13,439

a kid I I'm still a farm boy I was born

441

00:17:18,230 --> 00:17:16,260

on a farm and and the mind of a kid is

442

00:17:20,150 --> 00:17:18,240

not to pay attention to the adults in

443

00:17:23,390 --> 00:17:20,160

the room you want to figure it out

444

00:17:26,449 --> 00:17:23,400

yourself so my mindset is more about

445

00:17:29,030 --> 00:17:26,459

getting new data figuring it out than

446

00:17:31,549 --> 00:17:29,040

about hearing stories of the past

447

00:17:33,350 --> 00:17:31,559

because the instruments that existed

448

00:17:35,630 --> 00:17:33,360

decades ago are not as good as the ones

449

00:17:37,730 --> 00:17:35,640

we have today also we can't really

450

00:17:39,770 --> 00:17:37,740

verify what happened decades ago there

451

00:17:42,770 --> 00:17:39,780

are legends myths and all kinds of

452

00:17:44,870 --> 00:17:42,780

stories whereas I want to see it myself

453

00:17:46,610 --> 00:17:44,880

I want to figure it out I want to use

454

00:17:49,430 --> 00:17:46,620

the best instruments we have on the

455

00:17:51,230 --> 00:17:49,440

shelf right now the best computers now

456

00:17:54,110 --> 00:17:51,240

we have artificial intelligence can

457

00:17:56,330 --> 00:17:54,120

assist us and in that regard we are on a

458

00:17:57,370 --> 00:17:56,340

much better footing it figuring it out

459

00:18:00,350 --> 00:17:57,380

so

460

00:18:03,049 --> 00:18:00,360

in a way I disagree with the current

461

00:18:05,810 --> 00:18:03,059

operation of government which is trying

462

00:18:08,630 --> 00:18:05,820

to go back to Historic reports and

463

00:18:11,150 --> 00:18:08,640

analyze and vet what they mean because

464

00:18:13,970 --> 00:18:11,160

that's a lot of effort and at the end of

465

00:18:16,390 --> 00:18:13,980

it if it will be inconclusive we won't

466

00:18:19,190 --> 00:18:16,400

be able to revisit those incidents

467

00:18:22,610 --> 00:18:19,200

whereas if you see something right now

468

00:18:25,490 --> 00:18:22,620

you can get even better data on it by

469

00:18:27,710 --> 00:18:25,500

continuing the search and then this is a

470

00:18:30,230 --> 00:18:27,720

great Advantage so that's my frame of

471

00:18:33,950 --> 00:18:30,240

thinking but on the other hand I want to

472

00:18:36,529 --> 00:18:33,960

be guided by what people learn from

473

00:18:38,870 --> 00:18:36,539

history and their perspective on the

474

00:18:43,370 --> 00:18:38,880

subject and obviously both Chris melon

475

00:18:46,070 --> 00:18:43,380

and Jacque Valley have a lot to say so I

476

00:18:48,710 --> 00:18:46,080

do listen to the other adults in the

477

00:18:51,770 --> 00:18:48,720

room but my mindset is more of a kid

478

00:18:53,690 --> 00:18:51,780

I appreciate that now Christian I just

479

00:18:54,770 --> 00:18:53,700

wanted to talk to you about air safety

480

00:18:56,630 --> 00:18:54,780

and I just wondered if you could just

481

00:18:58,789 --> 00:18:56,640

briefly talk us about the importance of

482

00:19:00,950 --> 00:18:58,799

when we're studying anything whether it

483

00:19:04,130 --> 00:19:00,960

be UAP or anything Aviation related the

484

00:19:06,230 --> 00:19:04,140

importance of air safety yeah that's the

485

00:19:08,090 --> 00:19:06,240

biggest issue that's uh that I had

486

00:19:10,070 --> 00:19:08,100

basically also for the reason for for

487

00:19:12,650 --> 00:19:10,080

coming forward with my stories is that

488

00:19:14,330 --> 00:19:12,660

there are things being reported by

489

00:19:15,890 --> 00:19:14,340

pilots in the sky

490

00:19:18,169 --> 00:19:15,900

um pretty far from the airplane or even

491

00:19:20,870 --> 00:19:18,179

next to the airplane this could pose a

492

00:19:22,370 --> 00:19:20,880

serious Aviation threats so far at least

493

00:19:25,430 --> 00:19:22,380

at least for as far as I know there have

494

00:19:27,169 --> 00:19:25,440

not been any incidents or accidents

495

00:19:29,090 --> 00:19:27,179

um but there is a genuine fear of flight

496

00:19:32,150 --> 00:19:29,100

safety yeah for me especially being

497

00:19:33,950 --> 00:19:32,160

Pilots being in command of of a very

498

00:19:37,010 --> 00:19:33,960

expensive airplane and it's it's cargo

499

00:19:39,710 --> 00:19:37,020

or passengers I'm responsible for uh for

500

00:19:41,150 --> 00:19:39,720

dealing with that flight safety issue so

501  
00:19:42,830 --> 00:19:41,160  
um as I said that was for me the biggest

502  
00:19:45,289 --> 00:19:42,840  
reason to come forward and that's also

503  
00:19:46,549 --> 00:19:45,299  
the reason why I was very captivated for

504  
00:19:48,049 --> 00:19:46,559  
many years by the things I've seen

505  
00:19:50,090 --> 00:19:48,059  
because I want to I want to understand

506  
00:19:51,770 --> 00:19:50,100  
what I've what I've been seeing and what

507  
00:19:54,710 --> 00:19:51,780  
the implications are for flight safety

508  
00:19:56,690 --> 00:19:54,720  
and uh actually I was kind of happy when

509  
00:19:58,310 --> 00:19:56,700  
I saw the the incident with the Spy

510  
00:19:59,930 --> 00:19:58,320  
balloon over the US and also these

511  
00:20:02,150 --> 00:19:59,940  
objects that have been shot down because

512  
00:20:04,310 --> 00:20:02,160  
for the first time it was proof that

513  
00:20:05,930 --> 00:20:04,320

sometimes on Pilot's report seeing

514

00:20:07,610 --> 00:20:05,940

things they're not making things up that

515

00:20:10,130 --> 00:20:07,620

were really balloons there and not even

516

00:20:12,230 --> 00:20:10,140

the Chinese Bible units I think 80 or 90

517

00:20:13,909 --> 00:20:12,240

000 feet but even those other objects

518

00:20:15,830 --> 00:20:13,919

they were I think hovering between 20

519

00:20:18,590 --> 00:20:15,840

and 40 000 feet and that's right in the

520

00:20:20,510 --> 00:20:18,600

middle of commercial air air routes so

521

00:20:23,150 --> 00:20:20,520

for me I was very happy that finally

522

00:20:25,250 --> 00:20:23,160

these things were not even reported but

523

00:20:27,590 --> 00:20:25,260

even tracked down and and data will be

524

00:20:29,029 --> 00:20:27,600

shown and it proves that there might be

525

00:20:30,950 --> 00:20:29,039

a big issue and you know even if we

526

00:20:33,350 --> 00:20:30,960

found out that it's just

527

00:20:35,630 --> 00:20:33,360

um balloons spy balloons that's fine

528

00:20:38,090 --> 00:20:35,640

with me as well we have to we have to

529

00:20:41,330 --> 00:20:38,100

keep the safety of uh basically air

530

00:20:43,850 --> 00:20:41,340

traffic in mine so uh I think it's uh it

531

00:20:45,650 --> 00:20:43,860

was a a very fortunate uh incident with

532

00:20:48,770 --> 00:20:45,660

this my balloon and it's it really helps

533

00:20:51,470 --> 00:20:48,780

to to push the UAP topic forward I sure

534

00:20:54,289 --> 00:20:51,480

I should the note on that that as far as

535

00:20:56,270 --> 00:20:54,299

a scientist like myself is concerned I

536

00:20:58,430 --> 00:20:56,280

I'm very happy as well that the

537

00:21:01,190 --> 00:20:58,440

government shoots down balloons because

538

00:21:03,289 --> 00:21:01,200

it reduces the clutter in the sky we

539

00:21:05,710 --> 00:21:03,299

don't I mean anything that is human made

540

00:21:09,010 --> 00:21:05,720

is not of much interest and obviously

541

00:21:11,450 --> 00:21:09,020

the unidentified objects are a mixed bag

542

00:21:14,270 --> 00:21:11,460

the Director of National Intelligence

543

00:21:16,370 --> 00:21:14,280

admitted that they believe about half of

544

00:21:17,990 --> 00:21:16,380

the objects that are unidentified are

545

00:21:20,510 --> 00:21:18,000

balloons there are plenty of balloons

546

00:21:24,110 --> 00:21:20,520

and by the way that would explain why

547

00:21:26,870 --> 00:21:24,120

the rate of reports on unidentified

548

00:21:29,149 --> 00:21:26,880

objects uh scales with population

549

00:21:31,669 --> 00:21:29,159

density the more people are looking at

550

00:21:34,549 --> 00:21:31,679

the sky the more balloons they might see

551  
00:21:36,529 --> 00:21:34,559  
so there might be a substantial fraction

552  
00:21:38,570 --> 00:21:36,539  
of those unidentified objects which are

553  
00:21:42,409 --> 00:21:38,580  
have a trivial explanation like balloons

554  
00:21:44,930 --> 00:21:42,419  
drones and the fewer there are the

555  
00:21:47,870 --> 00:21:44,940  
better as far as I'm concerned what we

556  
00:21:50,270 --> 00:21:47,880  
are after is really whether there is

557  
00:21:52,789 --> 00:21:50,280  
even one object that is of

558  
00:21:56,570 --> 00:21:52,799  
extraterrestrial origin you know it

559  
00:22:00,350 --> 00:21:56,580  
could be that 99 even 0.9 of the objects

560  
00:22:02,510 --> 00:22:00,360  
are human made or natural but even if

561  
00:22:05,390 --> 00:22:02,520  
one is not from this Earth

562  
00:22:08,510 --> 00:22:05,400  
that would be major news

563  
00:22:10,130 --> 00:22:08,520

yeah absolutely so my final kind of

564

00:22:12,830 --> 00:22:10,140

question is for you Avi and it's you

565

00:22:15,049 --> 00:22:12,840

know we we see a lot of conversations

566

00:22:16,669 --> 00:22:15,059

coming from the US when it comes to the

567

00:22:18,169 --> 00:22:16,679

UAP subjects whether it be from

568

00:22:20,570 --> 00:22:18,179

government from the mainstream media

569

00:22:22,909 --> 00:22:20,580

from science and Academia I just wanted

570

00:22:24,230 --> 00:22:22,919

to see what your thoughts on with events

571

00:22:26,450 --> 00:22:24,240

like this that is happening in Paris

572

00:22:29,330 --> 00:22:26,460

France the importance of having this

573

00:22:32,270 --> 00:22:29,340

conversation overseas as well

574

00:22:34,010 --> 00:22:32,280

yeah I do think that more discussion is

575

00:22:36,230 --> 00:22:34,020

helpful in the sense of removing the

576  
00:22:37,850 --> 00:22:36,240  
stigma in the sense of allowing people

577  
00:22:41,090 --> 00:22:37,860  
to interact with each other share

578  
00:22:43,909 --> 00:22:41,100  
experiences but you know if you ask

579  
00:22:46,490 --> 00:22:43,919  
yourself what would be the major uh

580  
00:22:49,130 --> 00:22:46,500  
event that will trigger a change in the

581  
00:22:51,470 --> 00:22:49,140  
mindset of politicians the public the

582  
00:22:53,570 --> 00:22:51,480  
scientific Community it would be finding

583  
00:22:56,390 --> 00:22:53,580  
evidence that you cannot dispute

584  
00:22:57,950 --> 00:22:56,400  
and then of course you know if you look

585  
00:23:00,470 --> 00:22:57,960  
at the history

586  
00:23:03,289 --> 00:23:00,480  
um four centuries ago Copernicus and

587  
00:23:05,330 --> 00:23:03,299  
Galileo argued that the Earth is moving

588  
00:23:07,730 --> 00:23:05,340

around the Sun and they were dismissed

589

00:23:09,770 --> 00:23:07,740

by the clergy at the time which

590

00:23:12,590 --> 00:23:09,780

dominated politics and you ask yourself

591

00:23:14,870 --> 00:23:12,600

okay so how did Humanity arrive to the

592

00:23:17,210 --> 00:23:14,880

right conclusion that it's not the Sun

593

00:23:19,850 --> 00:23:17,220

moving around the earth uh was it by

594

00:23:22,789 --> 00:23:19,860

rational thinking no they refused to

595

00:23:25,250 --> 00:23:22,799

look through Galileo's telescope uh but

596

00:23:28,130 --> 00:23:25,260

I think nowadays if you show a

597

00:23:31,190 --> 00:23:28,140

photograph of an object that doesn't

598

00:23:32,750 --> 00:23:31,200

look like a bird you know it looks at

599

00:23:35,570 --> 00:23:32,760

high resolution as if it's

600

00:23:37,730 --> 00:23:35,580

technologically manufactured and then it

601  
00:23:40,010 --> 00:23:37,740  
Maneuvers in ways that human-made

602  
00:23:42,529 --> 00:23:40,020  
Technologies cannot reproduce you have

603  
00:23:44,450 --> 00:23:42,539  
the video of that using scientific

604  
00:23:47,210 --> 00:23:44,460  
instruments that you have full control

605  
00:23:48,770 --> 00:23:47,220  
over that you calibrated you know the

606  
00:23:50,390 --> 00:23:48,780  
distance to the object which I should

607  
00:23:52,130 --> 00:23:50,400  
emphasize it's extremely important

608  
00:23:54,950 --> 00:23:52,140  
because people see objects moving really

609  
00:23:56,510 --> 00:23:54,960  
fast but they may be laws to them and

610  
00:23:59,510 --> 00:23:56,520  
they don't know the distance very often

611  
00:24:01,250 --> 00:23:59,520  
so knowing the distance is crucial so if

612  
00:24:04,250 --> 00:24:01,260  
you measure the distance with multiple

613  
00:24:07,430 --> 00:24:04,260

instruments separated from each other so

614

00:24:09,350 --> 00:24:07,440

that you can triangulate and you have

615

00:24:10,490 --> 00:24:09,360

evidence Beyond any reasonable doubt

616

00:24:12,890 --> 00:24:10,500

that we are dealing with something

617

00:24:15,230 --> 00:24:12,900

unusual that humans cannot produce then

618

00:24:17,510 --> 00:24:15,240

I think everyone would jump on the on

619

00:24:20,210 --> 00:24:17,520

the boat of arguing yes there is

620

00:24:22,250 --> 00:24:20,220

something strange here and not only that

621

00:24:24,590 --> 00:24:22,260

but they would say that this has been

622

00:24:26,510 --> 00:24:24,600

the case for a long time and they were

623

00:24:29,390 --> 00:24:26,520

always open-minded and some of them said

624

00:24:31,669 --> 00:24:29,400

that before and in order to you know

625

00:24:33,590 --> 00:24:31,679

it's just like entering a castle you

626  
00:24:35,570 --> 00:24:33,600  
know you can bang against the door and

627  
00:24:38,149 --> 00:24:35,580  
claim the door is too heavy I can't push

628  
00:24:41,870 --> 00:24:38,159  
it I cannot get in and so forth but

629  
00:24:44,450 --> 00:24:41,880  
actually a child with a key that fits

630  
00:24:47,149 --> 00:24:44,460  
the lock can open the door and let you

631  
00:24:51,950 --> 00:24:47,159  
in without much effort and here the key

632  
00:24:55,850 --> 00:24:51,960  
to open the lock and let us in is good

633  
00:24:58,370 --> 00:24:55,860  
evidence of High scientific quality not

634  
00:25:00,649 --> 00:24:58,380  
fuzzy images from cell phones not

635  
00:25:05,230 --> 00:25:00,659  
eyewitness testimonies that will not

636  
00:25:08,090 --> 00:25:05,240  
change the game the game changer is

637  
00:25:09,590 --> 00:25:08,100  
exquisite scientific data that nobody

638  
00:25:12,049 --> 00:25:09,600

can dispute

639

00:25:13,610 --> 00:25:12,059

absolutely and I'm really excited as

640

00:25:15,890 --> 00:25:13,620

always Avi for the work that you are

641

00:25:17,990 --> 00:25:15,900

doing with the Galileo project and I

642

00:25:20,210 --> 00:25:18,000

really do hope that you are the team to

643

00:25:21,950 --> 00:25:20,220

to finally give us that evidence that

644

00:25:23,750 --> 00:25:21,960

you mentioned there but listen gentlemen

645

00:25:25,310 --> 00:25:23,760

thank you so much for joining me I look

646

00:25:27,409 --> 00:25:25,320

forward to to speaking with you

647

00:25:28,909 --> 00:25:27,419

virtually at the conference Avi and

648

00:25:30,409 --> 00:25:28,919

Christian obviously meeting you in

649

00:25:32,450 --> 00:25:30,419

person it's going to be an absolutely

650

00:25:34,490 --> 00:25:32,460

incredible event I cannot wait for it

651

00:25:36,230 --> 00:25:34,500

but thank you very much and I really

652

00:25:39,230 --> 00:25:36,240

appreciate you both joining me today so

653

00:25:40,909 --> 00:25:39,240

thank you thank you thank you

654

00:25:42,890 --> 00:25:40,919

so there we go guys I hope you enjoyed

655

00:25:45,470 --> 00:25:42,900

that brief interview with Christian and

656

00:25:47,090 --> 00:25:45,480

Avi if you are interested in attending

657

00:25:49,909 --> 00:25:47,100

the event please check the link in the

658

00:25:51,830 --> 00:25:49,919

description of this video and yeah if

659

00:25:53,870 --> 00:25:51,840

you do attend then please make sure you

660

00:25:56,810 --> 00:25:53,880

come and say hello it'd be great to meet
