

Dr. Michael Masters

UFOs & Future Humans

**DISCLOSURE
TEAM**

VINCE ADAMS

1
00:00:00,659 --> 00:00:04,650
hahaha

2
00:00:32,630 --> 00:00:30,109
[Music]

3
00:00:35,209 --> 00:00:32,640
welcome back to the channel guys I hope

4
00:00:36,770 --> 00:00:35,219
everyone is doing well I can see there's

5
00:00:38,209 --> 00:00:36,780
quite a few people here in the live chat

6
00:00:40,250 --> 00:00:38,219
so thank you for being here I really

7
00:00:42,889 --> 00:00:40,260
appreciate it I'm really looking forward

8
00:00:44,450 --> 00:00:42,899
to my guest joining me today he has been

9
00:00:46,850 --> 00:00:44,460
on the show before and it's always a

10
00:00:48,350 --> 00:00:46,860
fascinating conversation so if any of

11
00:00:50,510 --> 00:00:48,360
you guys are watching in the live chat

12
00:00:52,729 --> 00:00:50,520
do have a question then please pop in

13
00:00:54,650 --> 00:00:52,739

capital letters I'll do my best to ask

14

00:00:57,410 --> 00:00:54,660

it or at least highlight it and

15

00:00:58,549 --> 00:00:57,420

potentially save it for a later point in

16

00:01:00,590 --> 00:00:58,559

the interview

17

00:01:02,630 --> 00:01:00,600

so yeah let's let's just get straight to

18

00:01:04,969 --> 00:01:02,640

it um like I said this is a returning

19

00:01:07,730 --> 00:01:04,979

guest and this is going to be great so

20

00:01:09,230 --> 00:01:07,740

please welcome back Dr Michael Masters

21

00:01:11,030 --> 00:01:09,240

Mike how are you

22

00:01:12,950 --> 00:01:11,040

good how are you doing Bernie good to

23

00:01:14,810 --> 00:01:12,960

see you again you too my friend yeah

24

00:01:16,969 --> 00:01:14,820

good thanks I think the first thing I'd

25

00:01:19,609 --> 00:01:16,979

like to do is just um as you're a

26

00:01:21,410 --> 00:01:19,619

professor of biological anthropology I'd

27

00:01:23,390 --> 00:01:21,420

like to know in your opinion of what the

28

00:01:27,070 --> 00:01:23,400

main links are between anthropology in

29

00:01:32,030 --> 00:01:27,080

general and the UFO subject

30

00:01:34,789 --> 00:01:32,040

hmm that's a good question I mean uh I

31

00:01:38,270 --> 00:01:34,799

could identify a few

32

00:01:41,450 --> 00:01:38,280

one in particular is uh our method of

33

00:01:43,789 --> 00:01:41,460

approaching questions like this

34

00:01:48,109 --> 00:01:43,799

um you know obviously this phenomenon

35

00:01:50,330 --> 00:01:48,119

doesn't lend itself to strict scientific

36

00:01:53,270 --> 00:01:50,340

rigor application of the scientific

37

00:01:56,030 --> 00:01:53,280

method hypothesis testing standards of

38

00:01:59,749 --> 00:01:56,040

evidence things like that so we we've

39

00:02:01,310 --> 00:01:59,759

been Limited in this field from uh

40

00:02:03,530 --> 00:02:01,320

really the beginning but mostly since

41

00:02:05,510 --> 00:02:03,540

the 70s when some rules went into place

42

00:02:07,730 --> 00:02:05,520

to protect human subjects which was

43

00:02:10,010 --> 00:02:07,740

obviously a good thing

44

00:02:13,690 --> 00:02:10,020

um so we can't experiment on humans we

45

00:02:17,270 --> 00:02:13,700

have to use methods that allow us to

46

00:02:19,250 --> 00:02:17,280

observe and study and try to develop

47

00:02:22,190 --> 00:02:19,260

hypotheses that can be tested with

48

00:02:24,830 --> 00:02:22,200

observational data which is still you

49

00:02:26,390 --> 00:02:24,840

know it's a rigorous scientific Pursuit

50

00:02:27,710 --> 00:02:26,400

um you don't you don't have cause and

51
00:02:29,630 --> 00:02:27,720
effect in the same way that you can

52
00:02:31,729 --> 00:02:29,640
isolate all variables in a laboratory

53
00:02:33,729 --> 00:02:31,739
setting but we can account for a number

54
00:02:36,410 --> 00:02:33,739
of variables and try to come up with

55
00:02:39,470 --> 00:02:36,420
explanations for things that are based

56
00:02:41,690 --> 00:02:39,480
on on sound data and sound results from

57
00:02:43,070 --> 00:02:41,700
analyzing that data so I think that's

58
00:02:45,710 --> 00:02:43,080
useful

59
00:02:48,110 --> 00:02:45,720
um I try to use that approach in my last

60
00:02:50,330 --> 00:02:48,120
book the extra tempestro model

61
00:02:51,949 --> 00:02:50,340
uh drawing from an abductive approach

62
00:02:54,830 --> 00:02:51,959
where you try to make inference to the

63
00:02:56,210 --> 00:02:54,840

best explanation based on uh the things

64

00:02:59,449 --> 00:02:56,220

that you can observe and look for

65

00:03:01,790 --> 00:02:59,459

patterns across those those things the

66

00:03:03,530 --> 00:03:01,800

phenomenon as a whole really

67

00:03:05,210 --> 00:03:03,540

um but then also like my my main

68

00:03:07,190 --> 00:03:05,220

approach since the beginning has been

69

00:03:09,830 --> 00:03:07,200

looking at the physiology the evolution

70

00:03:11,809 --> 00:03:09,840

of our morphological form

71

00:03:14,210 --> 00:03:11,819

um which was a big part of why I'm drawn

72

00:03:16,670 --> 00:03:14,220

to this time travel explanation because

73

00:03:19,729 --> 00:03:16,680

the main Trends in human evolution are

74

00:03:22,190 --> 00:03:19,739

are expanding neural cortex or expanding

75

00:03:23,930 --> 00:03:22,200

brain also the change in shape where it

76
00:03:26,210 --> 00:03:23,940
moves out over our eyes and expands

77
00:03:28,070 --> 00:03:26,220
medial laterally which occurs in concert

78
00:03:29,930 --> 00:03:28,080
with our mid and lower facial Anatomy

79
00:03:31,910 --> 00:03:29,940
shrinking back all of that has occurred

80
00:03:34,670 --> 00:03:31,920
in association with us standing upright

81
00:03:36,170 --> 00:03:34,680
walking by Peter Lee so if we look at

82
00:03:39,050 --> 00:03:36,180
that Trend over the last six to eight

83
00:03:41,089 --> 00:03:39,060
million years project that forward we

84
00:03:43,509 --> 00:03:41,099
are likely to look more and more like

85
00:03:45,710 --> 00:03:43,519
these what I think are are more distant

86
00:03:48,050 --> 00:03:45,720
evolutionary descendants these

87
00:03:49,990 --> 00:03:48,060
quintessential gray alien forms with a

88
00:03:53,030 --> 00:03:50,000

very large

89

00:03:55,490 --> 00:03:53,040

neurocortex large eyes Small Faces still

90

00:03:58,910 --> 00:03:55,500

upright walking still panadactyls still

91

00:04:01,789 --> 00:03:58,920

tetrapods so I think the biological side

92

00:04:04,430 --> 00:04:01,799

helps understand those evolutionary

93

00:04:05,990 --> 00:04:04,440

trends when talking about the beans but

94

00:04:08,570 --> 00:04:06,000

then also the way we can approach this

95

00:04:10,729 --> 00:04:08,580

with anthropological methods I believe

96

00:04:13,190 --> 00:04:10,739

can be useful for really trying to

97

00:04:15,410 --> 00:04:13,200

understand the behaviors looking at

98

00:04:17,930 --> 00:04:15,420

patterns across reports with regards to

99

00:04:19,670 --> 00:04:17,940

the behavior of the craft the beans the

100

00:04:20,930 --> 00:04:19,680

things that they're reported doing so

101
00:04:23,030 --> 00:04:20,940
yeah I think there's a lot of broad

102
00:04:25,730 --> 00:04:23,040
applications for anthropological

103
00:04:26,749 --> 00:04:25,740
research with regard to the the UFO

104
00:04:29,749 --> 00:04:26,759
question

105
00:04:31,490 --> 00:04:29,759
yeah interesting now you uh the first

106
00:04:32,990 --> 00:04:31,500
time you came on the show I think you

107
00:04:35,270 --> 00:04:33,000
just had the one book out which was

108
00:04:37,850 --> 00:04:35,280
identified flying objects which I think

109
00:04:39,469 --> 00:04:37,860
was published in 2019 and obviously

110
00:04:42,469 --> 00:04:39,479
since then you just mentioned the extra

111
00:04:44,510 --> 00:04:42,479
tempestral model so you're able to talk

112
00:04:47,510 --> 00:04:44,520
us through how your theory evolved from

113
00:04:49,909 --> 00:04:47,520

book one through to book two

114

00:04:54,490 --> 00:04:49,919

yeah quite a lot actually

115

00:04:57,830 --> 00:04:54,500

um and and really A lot of it was just

116

00:04:59,570 --> 00:04:57,840

overlooking things not really knowing

117

00:05:01,430 --> 00:04:59,580

the right questions to ask and that's

118

00:05:02,870 --> 00:05:01,440

how it is with any scientific Pursuit

119

00:05:05,570 --> 00:05:02,880

you're constantly evolving your

120

00:05:08,210 --> 00:05:05,580

perception as more information and more

121

00:05:11,210 --> 00:05:08,220

data becomes available so in the first

122

00:05:13,249 --> 00:05:11,220

book that was mostly rooted in this

123

00:05:14,990 --> 00:05:13,259

anthropological approach not just

124

00:05:17,749 --> 00:05:15,000

looking at the physical form of these

125

00:05:20,390 --> 00:05:17,759

beings but also the craft themselves and

126

00:05:22,850 --> 00:05:20,400

how the form of these craft seems to

127

00:05:23,990 --> 00:05:22,860

indicate the function of backward time

128

00:05:25,790 --> 00:05:24,000

travel

129

00:05:28,249 --> 00:05:25,800

uh which was the main theme in the

130

00:05:31,310 --> 00:05:28,259

second book as well but then also

131

00:05:34,490 --> 00:05:31,320

drawing from astrobiology astronomy and

132

00:05:36,650 --> 00:05:34,500

physics because any one field can't help

133

00:05:39,350 --> 00:05:36,660

explain all of the nuances of what's

134

00:05:41,390 --> 00:05:39,360

going on here so it was really an

135

00:05:44,029 --> 00:05:41,400

attempt at a multi-disciplinary approach

136

00:05:46,670 --> 00:05:44,039

but mostly focusing on

137

00:05:48,950 --> 00:05:46,680

what we know about what life on other

138

00:05:51,830 --> 00:05:48,960

planets might look like uh potential

139

00:05:53,689 --> 00:05:51,840

problems with beans developing evolving

140

00:05:55,490 --> 00:05:53,699

on a different planet with all of these

141

00:05:57,770 --> 00:05:55,500

different variables that shape their own

142

00:06:00,710 --> 00:05:57,780

evolutionary history problems with

143

00:06:02,930 --> 00:06:00,720

getting between different star systems

144

00:06:04,550 --> 00:06:02,940

or even finding life on other star

145

00:06:06,650 --> 00:06:04,560

systems

146

00:06:08,990 --> 00:06:06,660

um and then yeah I mean obviously tying

147

00:06:11,150 --> 00:06:09,000

in the physics of Time time travel what

148

00:06:14,870 --> 00:06:11,160

little we know about time and how that

149

00:06:17,510 --> 00:06:14,880

might work from our current present

150

00:06:19,610 --> 00:06:17,520

um and then yeah just really trying to

151

00:06:21,290 --> 00:06:19,620

wrap it all together to make a case for

152

00:06:24,050 --> 00:06:21,300

why we should consider this time travel

153

00:06:27,170 --> 00:06:24,060

Theory but I I definitely didn't dive

154

00:06:30,290 --> 00:06:27,180

too deep into the UFO question itself

155

00:06:32,270 --> 00:06:30,300

and especially not with regard to the uh

156

00:06:34,730 --> 00:06:32,280

the Abduction the close encounters which

157

00:06:37,490 --> 00:06:34,740

was more of the focus for the second

158

00:06:40,070 --> 00:06:37,500

book the extra tempestra model which

159

00:06:41,689 --> 00:06:40,080

really tried to look across a number of

160

00:06:43,990 --> 00:06:41,699

different case studies I think in total

161

00:06:46,330 --> 00:06:44,000

there were close to 25 or 30 but most

162

00:06:49,430 --> 00:06:46,340

focusing on 15

163

00:06:51,650 --> 00:06:49,440

individual well-vetted well understood

164

00:06:54,350 --> 00:06:51,660

cases that don't just adhere to this

165

00:06:55,969 --> 00:06:54,360

time travel model but also ones that you

166

00:06:57,590 --> 00:06:55,979

know show some variation throws some

167

00:06:59,090 --> 00:06:57,600

wrenches on those cogs as well because

168

00:07:02,150 --> 00:06:59,100

it's important to consider all of the

169

00:07:04,129 --> 00:07:02,160

evidence and um yeah just highlighting

170

00:07:06,770 --> 00:07:04,139

some things I overlooked with regard to

171

00:07:09,950 --> 00:07:06,780

the first book just things I didn't know

172

00:07:12,650 --> 00:07:09,960

that people pointed out to me seemingly

173

00:07:14,570 --> 00:07:12,660

obvious things like the rule of AI the

174

00:07:18,129 --> 00:07:14,580

role of genetic modification in the

175

00:07:21,770 --> 00:07:18,139

human future disease transmission and

176

00:07:24,409 --> 00:07:21,780

the way that the manipulation of time

177

00:07:26,629 --> 00:07:24,419

might help explain the g-forces and what

178

00:07:28,550 --> 00:07:26,639

we see is you know ten thousand G's

179

00:07:30,770 --> 00:07:28,560

might be nothing to them just because of

180

00:07:33,529 --> 00:07:30,780

the difference in the way time and space

181

00:07:35,689 --> 00:07:33,539

and the flow of time are perceived

182

00:07:37,610 --> 00:07:35,699

within and then outside of that craft so

183

00:07:39,350 --> 00:07:37,620

things like that

184

00:07:41,809 --> 00:07:39,360

um just the the way the conversations

185

00:07:43,490 --> 00:07:41,819

evolved I wanted to sort of take a

186

00:07:45,469 --> 00:07:43,500

different approach but still bring in

187

00:07:46,969 --> 00:07:45,479

I'm number of those things that I

188

00:07:49,370 --> 00:07:46,979

learned going from the first to the

189

00:07:50,870 --> 00:07:49,380

second book yeah thank you and there's a

190

00:07:52,730 --> 00:07:50,880

few things you said there that I have

191

00:07:54,529 --> 00:07:52,740

got sort of on my list to talk about so

192

00:07:56,210 --> 00:07:54,539

I'm going to start by asking how you

193

00:07:59,390 --> 00:07:56,220

account for things like paradoxes

194

00:08:01,550 --> 00:07:59,400

timeline effects timeline changes the

195

00:08:02,809 --> 00:08:01,560

butterfly effect I saw someone here in

196

00:08:04,670 --> 00:08:02,819

the live chat but the grandfather

197

00:08:06,770 --> 00:08:04,680

Paradox how do you account for all of

198

00:08:09,409 --> 00:08:06,780

those when discussing the uh the time

199

00:08:12,050 --> 00:08:09,419

travel part of things well they're kind

200

00:08:16,070 --> 00:08:12,060

of moot to be honest there really are no

201
00:08:17,930 --> 00:08:16,080
paradoxes if you conceptualize this

202
00:08:20,029 --> 00:08:17,940
phenomenon in the context of the black

203
00:08:22,129 --> 00:08:20,039
Universe model because there is no

204
00:08:26,330 --> 00:08:22,139
change it's really only once you

205
00:08:28,369 --> 00:08:26,340
interject that that issue of change that

206
00:08:30,170 --> 00:08:28,379
you start to get paradoxes and within

207
00:08:32,750 --> 00:08:30,180
the block Universe there there is no

208
00:08:34,670 --> 00:08:32,760
ability to change anything because all

209
00:08:36,409 --> 00:08:34,680
moments from the very beginning at the

210
00:08:38,510 --> 00:08:36,419
very end of time and space and all

211
00:08:40,969 --> 00:08:38,520
matter within this universe are already

212
00:08:42,889 --> 00:08:40,979
accounted for in this massive

213
00:08:44,810 --> 00:08:42,899

four-dimensional block of every moment

214

00:08:47,630 --> 00:08:44,820

that every part of articles ever

215

00:08:49,970 --> 00:08:47,640

experience so in moving in and around

216

00:08:51,949 --> 00:08:49,980

that 4D block you're not changing

217

00:08:53,570 --> 00:08:51,959

anything you're just doing what you had

218

00:08:56,329 --> 00:08:53,580

already done it doesn't matter if it's

219

00:08:58,070 --> 00:08:56,339

before or after you're present all of it

220

00:08:59,930 --> 00:08:58,080

is going to be the pass to someone in

221

00:09:01,550 --> 00:08:59,940

your future and nothing's going to

222

00:09:03,170 --> 00:09:01,560

change they're just going to see the

223

00:09:05,150 --> 00:09:03,180

interlinking of all of these different

224

00:09:07,430 --> 00:09:05,160

events that were always linked it's just

225

00:09:09,650 --> 00:09:07,440

when you interject your Consciousness

226

00:09:11,750 --> 00:09:09,660

into it and the way we perceive the flow

227

00:09:14,030 --> 00:09:11,760

of time it feels like something that

228

00:09:16,190 --> 00:09:14,040

you're doing in the past is in your

229

00:09:18,410 --> 00:09:16,200

future but really it's it's already in

230

00:09:19,970 --> 00:09:18,420

the past it already exists there as

231

00:09:21,769 --> 00:09:19,980

those structured moments in the block

232

00:09:24,410 --> 00:09:21,779

Universe you're just going to do the

233

00:09:26,870 --> 00:09:24,420

thing that's already been done and once

234

00:09:28,790 --> 00:09:26,880

you do it you come back it's now in your

235

00:09:31,070 --> 00:09:28,800

past it was the same as it ever was

236

00:09:34,009 --> 00:09:31,080

nothing changes there's no paradoxes

237

00:09:35,750 --> 00:09:34,019

it's only once you get into the the many

238

00:09:38,329 --> 00:09:35,760

worlds interpretation or these

239

00:09:40,009 --> 00:09:38,339

multiverses or multiple timelines that

240

00:09:41,750 --> 00:09:40,019

you start to run into that question of

241

00:09:43,610 --> 00:09:41,760

paradox where you can't actually have a

242

00:09:45,410 --> 00:09:43,620

change that affects something in a

243

00:09:47,210 --> 00:09:45,420

different way in this butterfly effect

244

00:09:49,130 --> 00:09:47,220

and you would come back to a different

245

00:09:51,430 --> 00:09:49,140

timeline where everything's

246

00:09:54,949 --> 00:09:51,440

fundamentally different but the most

247

00:09:57,050 --> 00:09:54,959

conventional explanation for time is the

248

00:09:59,570 --> 00:09:57,060

Black Universe model among philosophers

249

00:10:01,670 --> 00:09:59,580

and physicists and everyone who studies

250

00:10:03,590 --> 00:10:01,680

time and it just makes the most sense

251

00:10:06,050 --> 00:10:03,600

and

252

00:10:08,449 --> 00:10:06,060

um you know it it's important to

253

00:10:11,509 --> 00:10:08,459

recognize that that may not be the case

254

00:10:13,610 --> 00:10:11,519

you know we we don't know really what

255

00:10:15,050 --> 00:10:13,620

time is fundamentally we think it's an

256

00:10:16,610 --> 00:10:15,060

emergent phenomenon there's something

257

00:10:18,050 --> 00:10:16,620

much more fundamental that we haven't

258

00:10:20,389 --> 00:10:18,060

yet accounted for

259

00:10:22,430 --> 00:10:20,399

and once we do we may have to revisit

260

00:10:25,610 --> 00:10:22,440

that but what I did was just try to take

261

00:10:28,610 --> 00:10:25,620

what we know now and apply that

262

00:10:30,889 --> 00:10:28,620

knowledge to this question but obviously

263

00:10:33,110 --> 00:10:30,899

you know it's more information presents

264

00:10:35,449 --> 00:10:33,120

itself we may have to change that but

265

00:10:37,670 --> 00:10:35,459

honestly the block Universe model

266

00:10:39,230 --> 00:10:37,680

landscape time it does make the most

267

00:10:41,690 --> 00:10:39,240

sense and

268

00:10:43,790 --> 00:10:41,700

um I think it does help really explain

269

00:10:46,850 --> 00:10:43,800

what's happening and how they're moving

270

00:10:48,650 --> 00:10:46,860

about the the past and you know our

271

00:10:51,350 --> 00:10:48,660

future in their past Without Really

272

00:10:53,030 --> 00:10:51,360

interjecting any major changes I don't

273

00:10:56,090 --> 00:10:53,040

think it's really a factor that we need

274

00:10:58,430 --> 00:10:56,100

to to worry about too much yeah

275

00:11:00,530 --> 00:10:58,440

and then you mentioned m-a-i as well in

276

00:11:03,050 --> 00:11:00,540

there so could these

277

00:11:04,610 --> 00:11:03,060

beings and what relation could there be

278

00:11:08,329 --> 00:11:04,620

between AI could it be like an

279

00:11:10,250 --> 00:11:08,339

artificial biological intelligence like

280

00:11:11,389 --> 00:11:10,260

where does that fit in in what you've

281

00:11:13,790 --> 00:11:11,399

looked at

282

00:11:15,949 --> 00:11:13,800

I think it's certainly a possibility I

283

00:11:17,630 --> 00:11:15,959

mean we're we're already doing it we're

284

00:11:21,610 --> 00:11:17,640

already making things that are looking

285

00:11:24,050 --> 00:11:21,620

more and more like fully functional

286

00:11:25,850 --> 00:11:24,060

automatons and and doing them in our own

287

00:11:28,310 --> 00:11:25,860

image too I mean that's something that

288

00:11:30,050 --> 00:11:28,320

we would expect to do not just for the

289

00:11:32,090 --> 00:11:30,060

sex robot industry which I think

290

00:11:34,610 --> 00:11:32,100

probably is a driver in a lot of this

291

00:11:36,769 --> 00:11:34,620

and sex drives a lot of things but just

292

00:11:38,690 --> 00:11:36,779

because we are this we know what we are

293

00:11:41,329 --> 00:11:38,700

and to make something that can help us

294

00:11:42,889 --> 00:11:41,339

having the same physiological form as us

295

00:11:44,930 --> 00:11:42,899

will allow it to do many of the same

296

00:11:50,449 --> 00:11:44,940

things so I think we will probably

297

00:11:52,550 --> 00:11:50,459

create uh AI robots in our form at least

298

00:11:55,850 --> 00:11:52,560

something that looks similar to us maybe

299

00:11:58,550 --> 00:11:55,860

is indistinguishable from us that could

300

00:12:00,530 --> 00:11:58,560

perform some of the tasks that they do

301
00:12:02,389 --> 00:12:00,540
especially the more dangerous tasks and

302
00:12:04,610 --> 00:12:02,399
abductions like like Whitley strieber

303
00:12:07,210 --> 00:12:04,620
when he was abducted from his cabin in

304
00:12:09,710 --> 00:12:07,220
New York described a robot like Droid

305
00:12:11,870 --> 00:12:09,720
that looked very much like these shorter

306
00:12:13,069 --> 00:12:11,880
Grays coming at him and

307
00:12:14,870 --> 00:12:13,079
um you know I think it made him fall

308
00:12:17,269 --> 00:12:14,880
back asleep or something I forget the

309
00:12:20,269 --> 00:12:17,279
exact details but then then you have in

310
00:12:22,430 --> 00:12:20,279
the Pascagoula case uh with Parker and

311
00:12:24,230 --> 00:12:22,440
Hixson where it's a full-on robot

312
00:12:27,050 --> 00:12:24,240
doesn't really look like a human at all

313
00:12:28,910 --> 00:12:27,060

had like antennas and elephant skin and

314

00:12:30,949 --> 00:12:28,920

just kind of floated but there were

315

00:12:33,110 --> 00:12:30,959

humans on that ship Calvin Parker

316

00:12:36,050 --> 00:12:33,120

described scene fully formed modern

317

00:12:37,610 --> 00:12:36,060

humans just like us on that ship so that

318

00:12:39,170 --> 00:12:37,620

may be a case where they sent this thing

319

00:12:41,870 --> 00:12:39,180

out to do the dirty work for him

320

00:12:43,430 --> 00:12:41,880

especially with two full-grown men are

321

00:12:45,110 --> 00:12:43,440

freaked out about what's happening you

322

00:12:46,250 --> 00:12:45,120

would expect that

323

00:12:48,710 --> 00:12:46,260

um one other thing I've been thinking

324

00:12:51,610 --> 00:12:48,720

about recently with regard to ai2 is is

325

00:12:56,329 --> 00:12:51,620

how it might not be a coincidence that

326

00:12:58,490 --> 00:12:56,339

uh this seemingly different path toward

327

00:13:00,350 --> 00:12:58,500

disclosure and obviously you could argue

328

00:13:02,269 --> 00:13:00,360

that we've been down this road many

329

00:13:04,730 --> 00:13:02,279

times and we start to get glimpses that

330

00:13:08,090 --> 00:13:04,740

we get pulled back but this one if it is

331

00:13:12,050 --> 00:13:08,100

different it does seem to correlate with

332

00:13:13,970 --> 00:13:12,060

a very rapid evolution of our artificial

333

00:13:15,470 --> 00:13:13,980

intelligence technology and you can't

334

00:13:18,050 --> 00:13:15,480

help but wonder if that might be

335

00:13:19,970 --> 00:13:18,060

something that signals to these visitors

336

00:13:22,009 --> 00:13:19,980

that wow they're they're making

337

00:13:25,190 --> 00:13:22,019

something that's more intelligent than

338

00:13:27,350 --> 00:13:25,200

themselves you know like how as far as

339

00:13:30,170 --> 00:13:27,360

looking for cues as to whether or not we

340

00:13:31,910 --> 00:13:30,180

might be ready for contact or disclosure

341

00:13:33,949 --> 00:13:31,920

or whatever you want to call it if we

342

00:13:36,290 --> 00:13:33,959

start making something that's arguably

343

00:13:37,430 --> 00:13:36,300

as intelligent or more intelligent than

344

00:13:40,069 --> 00:13:37,440

us

345

00:13:41,629 --> 00:13:40,079

I I don't know what other red flag you

346

00:13:44,210 --> 00:13:41,639

could throw up that's going to indicate

347

00:13:45,530 --> 00:13:44,220

that so yeah I don't know if that's a

348

00:13:47,810 --> 00:13:45,540

coincidence or if there's something

349

00:13:49,310 --> 00:13:47,820

behind that but I do find it an

350

00:13:50,750 --> 00:13:49,320

interesting correlate

351

00:13:52,129 --> 00:13:50,760

yeah and I mean you mentioned Whitley

352

00:13:54,889 --> 00:13:52,139

strieber there and you know there's been

353

00:13:57,170 --> 00:13:54,899

a lot of really well a lot of abduction

354

00:13:59,810 --> 00:13:57,180

stories both big cases that we know

355

00:14:01,970 --> 00:13:59,820

about and then thousands of others and

356

00:14:05,210 --> 00:14:01,980

you know if these

357

00:14:06,829 --> 00:14:05,220

entities are coming back in time and

358

00:14:08,629 --> 00:14:06,839

abducting people why do you think that

359

00:14:11,090 --> 00:14:08,639

might be in your sort of speculative

360

00:14:13,310 --> 00:14:11,100

opinion what are they what are they what

361

00:14:16,009 --> 00:14:13,320

could they be doing

362

00:14:17,690 --> 00:14:16,019

well I think it's multifaceted they're

363

00:14:19,069 --> 00:14:17,700

probably doing it for a lot of different

364

00:14:22,129 --> 00:14:19,079

reasons

365

00:14:24,590 --> 00:14:22,139

um there's the obvious one that no I

366

00:14:27,949 --> 00:14:24,600

always try to to throw out my my own

367

00:14:29,569 --> 00:14:27,959

biases where they seem to be doing the

368

00:14:31,930 --> 00:14:29,579

same thing I would do as an

369

00:14:33,769 --> 00:14:31,940

anthropologist especially a biological

370

00:14:36,050 --> 00:14:33,779

paleoanthropologist where they're trying

371

00:14:39,110 --> 00:14:36,060

to learn about their distant past study

372

00:14:42,050 --> 00:14:39,120

the physiology of the genetics the you

373

00:14:43,670 --> 00:14:42,060

know the teeth the skin the blood

374

00:14:45,710 --> 00:14:43,680

um and that does seem to be a part of it

375

00:14:48,290 --> 00:14:45,720

but then you also have reports I

376

00:14:50,090 --> 00:14:48,300

highlighted a couple in my most recent

377

00:14:52,850 --> 00:14:50,100

book where they seem to be

378

00:14:56,030 --> 00:14:52,860

uh very clearly focused on the Ecology

379

00:14:58,990 --> 00:14:56,040

of Earth so studying the life forums

380

00:15:01,790 --> 00:14:59,000

they explicitly stated to a couple

381

00:15:04,430 --> 00:15:01,800

contactees that they're studying uh

382

00:15:06,889 --> 00:15:04,440

toxicity and environmental degradation

383

00:15:09,650 --> 00:15:06,899

because we're getting ourselves deeper

384

00:15:12,410 --> 00:15:09,660

in trouble as they said and then again

385

00:15:15,590 --> 00:15:12,420

why would they care if this isn't there

386

00:15:16,910 --> 00:15:15,600

too if they don't have it after us if

387

00:15:19,370 --> 00:15:16,920

they have their own Planet somewhere

388

00:15:20,870 --> 00:15:19,380

else it's hard to argue why they would

389

00:15:22,850 --> 00:15:20,880

necessarily be

390

00:15:24,949 --> 00:15:22,860

doing any of those things or why they

391

00:15:28,490 --> 00:15:24,959

would even care but then I think

392

00:15:31,370 --> 00:15:28,500

probably the main one has to do with uh

393

00:15:34,069 --> 00:15:31,380

our genetics or DNA and most likely

394

00:15:36,710 --> 00:15:34,079

their DNA too because that is arguably

395

00:15:39,350 --> 00:15:36,720

one of the most

396

00:15:40,910 --> 00:15:39,360

um prolific or ubiquitous aspects of

397

00:15:44,930 --> 00:15:40,920

this phenomenon is that they're picking

398

00:15:46,970 --> 00:15:44,940

people up and taking sperm from males

399

00:15:49,910 --> 00:15:46,980

um eggs from females

400

00:15:53,689 --> 00:15:49,920

growing fetuses and extracting those and

401
00:15:56,090 --> 00:15:53,699
females but also using exogenesis

402
00:15:58,550 --> 00:15:56,100
Chambers it's reported a lot especially

403
00:16:00,410 --> 00:15:58,560
in these large triangular crafts or the

404
00:16:01,670 --> 00:16:00,420
large triangular craft if there is only

405
00:16:04,069 --> 00:16:01,680
one

406
00:16:06,410 --> 00:16:04,079
where there's reports of these long rows

407
00:16:09,110 --> 00:16:06,420
of incubating fetuses that look very

408
00:16:11,930 --> 00:16:09,120
human but with slightly bigger eyes

409
00:16:13,670 --> 00:16:11,940
bigger heads so you know there's a lot

410
00:16:15,470 --> 00:16:13,680
of questions that would obviously stem

411
00:16:17,990 --> 00:16:15,480
from that what's the reasoning behind

412
00:16:19,850 --> 00:16:18,000
that why are they doing it exactly how

413
00:16:21,590 --> 00:16:19,860

are they doing it from what time periods

414

00:16:23,689 --> 00:16:21,600

are they sampling gametes and using

415

00:16:25,790 --> 00:16:23,699

those gametes what's the purpose of

416

00:16:28,910 --> 00:16:25,800

these hybrids what's their role in this

417

00:16:30,290 --> 00:16:28,920

whole thing but that is arguably one of

418

00:16:38,449 --> 00:16:30,300

the

419

00:16:40,310 --> 00:16:38,459

that plays in I talked about this a lot

420

00:16:41,749 --> 00:16:40,320

in my second book and especially with

421

00:16:43,249 --> 00:16:41,759

regard to the question of the many

422

00:16:46,430 --> 00:16:43,259

worlds interpretation different

423

00:16:49,009 --> 00:16:46,440

timelines or the block universe is what

424

00:16:50,930 --> 00:16:49,019

if there is a coming apocalypse or

425

00:16:52,610 --> 00:16:50,940

catastrophe which is something we've

426

00:16:53,689 --> 00:16:52,620

been discussing in the space for a

427

00:16:56,629 --> 00:16:53,699

couple years

428

00:16:58,790 --> 00:16:56,639

uh Frank milber and Roscoe art have been

429

00:17:01,129 --> 00:16:58,800

talking about this a lot and it is

430

00:17:04,370 --> 00:17:01,139

something to consider and if that is the

431

00:17:06,169 --> 00:17:04,380

case one would expect that we would see

432

00:17:09,049 --> 00:17:06,179

exactly that that we would see our

433

00:17:10,549 --> 00:17:09,059

future descendants or anyone who cares

434

00:17:13,549 --> 00:17:10,559

about

435

00:17:15,890 --> 00:17:13,559

um the human genome coming and taking a

436

00:17:18,110 --> 00:17:15,900

lot of our genes prior to a huge

437

00:17:21,289 --> 00:17:18,120

bottleneck where you have a number of

438

00:17:23,270 --> 00:17:21,299

those genes disappear where you have

439

00:17:26,449 --> 00:17:23,280

relatively little genetic variation

440

00:17:29,030 --> 00:17:26,459

after a number of humans die relative to

441

00:17:31,549 --> 00:17:29,040

a broad range of genetic variation in

442

00:17:34,010 --> 00:17:31,559

the human genome prior to that that

443

00:17:36,590 --> 00:17:34,020

cataclysm so I think I think that's

444

00:17:39,169 --> 00:17:36,600

something to keep in mind too and may

445

00:17:41,810 --> 00:17:39,179

help explain why there's such a focus an

446

00:17:43,250 --> 00:17:41,820

intense focus on on chromosomes but I

447

00:17:46,070 --> 00:17:43,260

list a number of other reasons outside

448

00:17:48,350 --> 00:17:46,080

the cataclysm idea as to why they may be

449

00:17:50,870 --> 00:17:48,360

doing that simple trends that we can see

450

00:17:53,390 --> 00:17:50,880

throughout human history with regard to

451

00:17:55,430 --> 00:17:53,400

infertility reduced fecundity

452

00:17:58,130 --> 00:17:55,440

um people choosing to have fewer

453

00:18:00,169 --> 00:17:58,140

children toxicity in our environment we

454

00:18:02,690 --> 00:18:00,179

see a 50 percent decrease in sperm

455

00:18:05,510 --> 00:18:02,700

counts over the last 50 years 60 percent

456

00:18:07,549 --> 00:18:05,520

decrease in the last 40 years among

457

00:18:10,909 --> 00:18:07,559

individuals in the Western World which

458

00:18:12,890 --> 00:18:10,919

are more polluted in many ways

459

00:18:15,110 --> 00:18:12,900

um so just you know any number of things

460

00:18:17,270 --> 00:18:15,120

that might help explain that but I do

461

00:18:19,490 --> 00:18:17,280

think the cataclysm one is something to

462

00:18:21,230 --> 00:18:19,500

keep on the table too yeah absolutely

463

00:18:23,390 --> 00:18:21,240

and you mentioning that about genes and

464

00:18:25,549 --> 00:18:23,400

DNA do you think in this sort of early

465

00:18:27,830 --> 00:18:25,559

evolution of homo sapien and possibly

466

00:18:29,570 --> 00:18:27,840

even other Harmony species that there

467

00:18:33,230 --> 00:18:29,580

may have been some type of manipulation

468

00:18:36,350 --> 00:18:33,240

potentially by these entities

469

00:18:38,450 --> 00:18:36,360

it's possible I mean I don't know

470

00:18:43,010 --> 00:18:38,460

how

471

00:18:45,950 --> 00:18:43,020

identify that that it's it's recent that

472

00:18:48,830 --> 00:18:45,960

we've even become aware of the fact that

473

00:18:52,130 --> 00:18:48,840

we could extract ancient DNA from some

474

00:18:55,010 --> 00:18:52,140

of our uh direct ancestors or closely

475

00:18:56,870 --> 00:18:55,020

related ones like Neanderthals but but

476
00:18:59,029 --> 00:18:56,880
there's a number of limitations in

477
00:19:01,010 --> 00:18:59,039
polymerase Chain Reaction can help you

478
00:19:03,230 --> 00:19:01,020
sort of get a bigger sample but there's

479
00:19:05,330 --> 00:19:03,240
issues with contamination and just not

480
00:19:07,430 --> 00:19:05,340
having a represented genome you only

481
00:19:09,830 --> 00:19:07,440
have certain aspects of the genome so

482
00:19:12,529 --> 00:19:09,840
you can't really map the entire thing

483
00:19:14,810 --> 00:19:12,539
and see what anomalies might be there

484
00:19:17,029 --> 00:19:14,820
but at some point maybe we'll be able to

485
00:19:19,669 --> 00:19:17,039
answer that question I I try not to

486
00:19:21,890 --> 00:19:19,679
speculate too much about what they're

487
00:19:23,750 --> 00:19:21,900
doing to us I think it's more about what

488
00:19:26,810 --> 00:19:23,760

they're doing for themselves I think

489

00:19:29,570 --> 00:19:26,820

that the DNA they take from us is to

490

00:19:32,210 --> 00:19:29,580

help them more than it is to necessarily

491

00:19:34,490 --> 00:19:32,220

change us or do something to us

492

00:19:35,870 --> 00:19:34,500

yeah I think I'm just going to jump to a

493

00:19:38,330 --> 00:19:35,880

couple of questions from the the live

494

00:19:40,430 --> 00:19:38,340

chat here Mr Calhoun uh with the five

495

00:19:41,870 --> 00:19:40,440

euro donation as well you might have

496

00:19:44,210 --> 00:19:41,880

answered this one in there but it said

497

00:19:46,549 --> 00:19:44,220

could we detect Time Travelers by the

498

00:19:50,330 --> 00:19:46,559

biological microbiotic contamination

499

00:19:52,909 --> 00:19:50,340

some may have accidentally caused

500

00:19:56,510 --> 00:19:52,919

yeah possibly but I do think from

501
00:19:59,630 --> 00:19:56,520
reports over they go out of their way to

502
00:20:03,049 --> 00:19:59,640
ensure there is not any sort of disease

503
00:20:04,630 --> 00:20:03,059
transmission or contamination I

504
00:20:07,310 --> 00:20:04,640
highlight a number of cases in the

505
00:20:09,110 --> 00:20:07,320
extrateral model where they make anyone

506
00:20:11,990 --> 00:20:09,120
that comes on the ship either strip

507
00:20:13,789 --> 00:20:12,000
naked go through this decontamination

508
00:20:16,909 --> 00:20:13,799
chamber and put on clothes that they

509
00:20:20,150 --> 00:20:16,919
give them or you know like like with um

510
00:20:22,970 --> 00:20:20,160
Antonio vs Boaz how he was strip naked

511
00:20:24,529 --> 00:20:22,980
white down in this probably antiseptic

512
00:20:26,510 --> 00:20:24,539
type solution

513
00:20:29,289 --> 00:20:26,520

so I mean it's the same thing with

514

00:20:31,549 --> 00:20:29,299

chimpanzees we we wear masks around

515

00:20:34,490 --> 00:20:31,559

chimpanzees and you know we ensure that

516

00:20:36,710 --> 00:20:34,500

we're not communicable with some virus

517

00:20:39,529 --> 00:20:36,720

or bacteria because as our closest

518

00:20:41,450 --> 00:20:39,539

living relative disease transmission is

519

00:20:44,570 --> 00:20:41,460

much more likely to happen between us

520

00:20:47,210 --> 00:20:44,580

which is where we got HIV as an example

521

00:20:49,130 --> 00:20:47,220

and many others do noticed diseases that

522

00:20:51,110 --> 00:20:49,140

come from other animals like Pigs we're

523

00:20:54,110 --> 00:20:51,120

closely related to pigs or at least have

524

00:20:57,289 --> 00:20:54,120

similar genetics so we can get more

525

00:20:59,450 --> 00:20:57,299

diseases with them uh bats being mammals

526

00:21:02,029 --> 00:20:59,460

with rabies whereas Birds can't carry

527

00:21:03,350 --> 00:21:02,039

that so the closer you are to an

528

00:21:06,049 --> 00:21:03,360

individual maybe this is another

529

00:21:08,090 --> 00:21:06,059

indication that they're human too that

530

00:21:10,310 --> 00:21:08,100

they do seem to be more concerned about

531

00:21:13,610 --> 00:21:10,320

interjecting

532

00:21:15,529 --> 00:21:13,620

um any sort of negative virus bacteria

533

00:21:18,350 --> 00:21:15,539

parasite it's not likely they have

534

00:21:19,970 --> 00:21:18,360

parasites in the future but any of those

535

00:21:21,950 --> 00:21:19,980

things so I think it's probably

536

00:21:24,049 --> 00:21:21,960

something they're cautious of and I

537

00:21:25,430 --> 00:21:24,059

don't think it's likely to happen but I

538

00:21:27,409 --> 00:21:25,440

mean the crash the hell out of these

539

00:21:30,289 --> 00:21:27,419

crafts too so clearly they're infallible

540

00:21:31,789 --> 00:21:30,299

and not perfect with everything so

541

00:21:35,029 --> 00:21:31,799

something could always slip through the

542

00:21:37,430 --> 00:21:35,039

cracks yeah for sure a question here

543

00:21:39,590 --> 00:21:37,440

from yin yang what does Dr Masters think

544

00:21:42,130 --> 00:21:39,600

of the infamous slide 9 and its

545

00:21:45,470 --> 00:21:42,140

implications

546

00:21:47,750 --> 00:21:45,480

slide nine uh I don't know what that is

547

00:21:49,789 --> 00:21:47,760

all right so in the original a tip

548

00:21:51,590 --> 00:21:49,799

slides there was a slide down with a

549

00:21:54,409 --> 00:21:51,600

list of things

550

00:21:56,630 --> 00:21:54,419

was that the like the five observables

551
00:21:58,490 --> 00:21:56,640
was that no it was kind of something

552
00:22:01,250 --> 00:21:58,500
similar along those lines it was a list

553
00:22:03,289 --> 00:22:01,260
of certain uh things that they kind of

554
00:22:04,610 --> 00:22:03,299
were looking into during 80 but hey if

555
00:22:07,130 --> 00:22:04,620
you're not familiar with that's fine you

556
00:22:08,990 --> 00:22:07,140
know I'll send you it oh please on that

557
00:22:10,490 --> 00:22:09,000
one I'll send it to you later after the

558
00:22:12,350 --> 00:22:10,500
interview yeah we'll look into it I

559
00:22:14,210 --> 00:22:12,360
always do try to follow up on stuff I

560
00:22:15,830 --> 00:22:14,220
don't know about yeah it's it's

561
00:22:18,110 --> 00:22:15,840
definitely interesting I'll tell you

562
00:22:19,610 --> 00:22:18,120
that definitely so

563
00:22:20,990 --> 00:22:19,620

um another one for Mr Calhoun and again

564

00:22:22,130 --> 00:22:21,000

thank you so much for your generous

565

00:22:24,830 --> 00:22:22,140

donation

566

00:22:27,169 --> 00:22:24,840

um Dolan's alien agendas vaguely implies

567

00:22:29,750 --> 00:22:27,179

that an ancient human group may have

568

00:22:32,690 --> 00:22:29,760

been abducted and evolved instead into

569

00:22:35,630 --> 00:22:32,700

the Grays based on Dr C Clement's work

570

00:22:38,630 --> 00:22:35,640

and partly DNA from P Cory's case

571

00:22:38,640 --> 00:22:43,490

I've been abducted and

572

00:22:47,029 --> 00:22:44,149

um

573

00:22:49,490 --> 00:22:47,039

yeah I haven't read that book so I don't

574

00:22:52,130 --> 00:22:49,500

know exactly but

575

00:22:55,850 --> 00:22:52,140

based on the question I mean if that's

576

00:22:59,210 --> 00:22:55,860

related to the whole sort of uh

577

00:23:02,149 --> 00:22:59,220

like splitting off Divergent human Group

578

00:23:04,070 --> 00:23:02,159

which I hear a lot

579

00:23:05,510 --> 00:23:04,080

um and have more recently I don't I'm

580

00:23:07,610 --> 00:23:05,520

not sure why there's probably something

581

00:23:09,529 --> 00:23:07,620

that happened that made people talk

582

00:23:12,649 --> 00:23:09,539

about that more but

583

00:23:15,409 --> 00:23:12,659

um yeah the way that was phrased is

584

00:23:18,409 --> 00:23:15,419

something I might consider more than the

585

00:23:20,630 --> 00:23:18,419

way it's usually uh articulated where

586

00:23:23,630 --> 00:23:20,640

you have this ancient

587

00:23:25,730 --> 00:23:23,640

human group that goes underground or

588

00:23:28,010 --> 00:23:25,740

some cataclysm happens and they leave

589

00:23:30,950 --> 00:23:28,020

Earth somehow or evolve on a different

590

00:23:34,370 --> 00:23:30,960

planet all of that it kind of seems like

591

00:23:37,250 --> 00:23:34,380

ridiculous garbage to me because for for

592

00:23:39,770 --> 00:23:37,260

a couple reasons one is that there's no

593

00:23:41,870 --> 00:23:39,780

evidence of that archaeologically maybe

594

00:23:44,090 --> 00:23:41,880

we'll find some someday at which point I

595

00:23:46,250 --> 00:23:44,100

would reassess my somewhat critical

596

00:23:48,649 --> 00:23:46,260

stance on this

597

00:23:50,750 --> 00:23:48,659

um the other problem and this is a very

598

00:23:53,210 --> 00:23:50,760

important one is that simple always

599

00:23:56,270 --> 00:23:53,220

comes before complex with compounding

600

00:23:59,029 --> 00:23:56,280

culture you have this foundation and

601
00:24:00,350 --> 00:23:59,039
each subsequent generation builds upon

602
00:24:03,169 --> 00:24:00,360
that Foundation it's one of the most

603
00:24:07,310 --> 00:24:03,179
basic principles of cultural Evolution

604
00:24:10,130 --> 00:24:07,320
so there's really no way unless and as

605
00:24:12,370 --> 00:24:10,140
your your viewer seemed to indicate

606
00:24:14,810 --> 00:24:12,380
unless you have another

607
00:24:16,610 --> 00:24:14,820
extraterrestrial civilization come and

608
00:24:18,289 --> 00:24:16,620
abduct people and then you know whatever

609
00:24:20,750 --> 00:24:18,299
can happen I think that's one of the

610
00:24:23,270 --> 00:24:20,760
only ways this can happen or if you have

611
00:24:25,070 --> 00:24:23,280
a future human population that is more

612
00:24:26,810 --> 00:24:25,080
advanced where you do still have simple

613
00:24:29,149 --> 00:24:26,820

coming before complex and that

614

00:24:31,490 --> 00:24:29,159

compounding cultural knowledge evolving

615

00:24:34,310 --> 00:24:31,500

into the future if they came back and

616

00:24:37,130 --> 00:24:34,320

jumped over our present then you could

617

00:24:38,950 --> 00:24:37,140

have very complex individuals who

618

00:24:41,690 --> 00:24:38,960

technically originated in our future

619

00:24:44,690 --> 00:24:41,700

existing in our simple past and they

620

00:24:47,330 --> 00:24:44,700

could even set up you know a whole

621

00:24:49,190 --> 00:24:47,340

civilization in there they might want to

622

00:24:51,230 --> 00:24:49,200

especially considering what we've been

623

00:24:54,049 --> 00:24:51,240

doing to this planet be more pristine

624

00:24:56,090 --> 00:24:54,059

and be more natural so you know you

625

00:24:58,669 --> 00:24:56,100

could have an Atlantis you could have a

626

00:25:01,610 --> 00:24:58,679

really highly complex civilization that

627

00:25:03,890 --> 00:25:01,620

that existed as a complex entity before

628

00:25:07,190 --> 00:25:03,900

us but only because they originated from

629

00:25:09,350 --> 00:25:07,200

a more complex future so I see if that

630

00:25:12,110 --> 00:25:09,360

is the case I see the only real

631

00:25:13,630 --> 00:25:12,120

possibilities is not that you had an

632

00:25:15,890 --> 00:25:13,640

offshoot per se

633

00:25:18,289 --> 00:25:15,900

because we would see that in the

634

00:25:19,610 --> 00:25:18,299

archaeological record or even if they're

635

00:25:21,049 --> 00:25:19,620

living underground which I've heard

636

00:25:22,850 --> 00:25:21,059

before like you're not developing

637

00:25:24,950 --> 00:25:22,860

spaceships underground you need to be

638

00:25:27,470 --> 00:25:24,960

able to test those and fly them and see

639

00:25:29,510 --> 00:25:27,480

if they work so so that really makes no

640

00:25:31,430 --> 00:25:29,520

sense as far as an actual direct

641

00:25:32,990 --> 00:25:31,440

offshoot but if you did have

642

00:25:35,390 --> 00:25:33,000

extraterrestrials coming here taking

643

00:25:37,549 --> 00:25:35,400

people from our past doing whatever on

644

00:25:39,710 --> 00:25:37,559

their planet or here in secrecy that's

645

00:25:42,409 --> 00:25:39,720

possibility but that also adds another

646

00:25:44,570 --> 00:25:42,419

assumption that also adds this question

647

00:25:47,750 --> 00:25:44,580

of extraterrestrial life and advanced

648

00:25:49,730 --> 00:25:47,760

extrator real life meddling with us the

649

00:25:51,590 --> 00:25:49,740

simpler explanation might be us because

650

00:25:54,049 --> 00:25:51,600

we know we're here and we are going from

651
00:25:56,810 --> 00:25:54,059
simple to complex where they come back

652
00:25:58,370 --> 00:25:56,820
and and set up shop in the past and you

653
00:26:00,769 --> 00:25:58,380
know maybe that helps explain the crypto

654
00:26:03,950 --> 00:26:00,779
terrestrials too why you have people

655
00:26:05,990 --> 00:26:03,960
that look just like us but possess the

656
00:26:07,970 --> 00:26:06,000
Clairvoyance and the telepathy and the

657
00:26:10,490 --> 00:26:07,980
future knowledge because they came from

658
00:26:12,049 --> 00:26:10,500
the future and they have that and they

659
00:26:14,390 --> 00:26:12,059
retain those characteristics while still

660
00:26:16,310 --> 00:26:14,400
physiologically looking just like us so

661
00:26:17,870 --> 00:26:16,320
you know if people think they're walking

662
00:26:20,990 --> 00:26:17,880
amongst us which there's definitely

663
00:26:23,870 --> 00:26:21,000

evidence for that then I think that that

664

00:26:26,029 --> 00:26:23,880

future to pass transmission of culture

665

00:26:28,250 --> 00:26:26,039

knowledge and physical entities could

666

00:26:30,110 --> 00:26:28,260

help explain that yeah I mean you know

667

00:26:33,470 --> 00:26:30,120

you mentioned again humans we've talked

668

00:26:34,690 --> 00:26:33,480

about Grays and robotic AI but how do

669

00:26:37,070 --> 00:26:34,700

you consider descriptions of

670

00:26:40,370 --> 00:26:37,080

non-harmonid type entities such as

671

00:26:43,490 --> 00:26:40,380

mantis beings or insectoids

672

00:26:46,370 --> 00:26:43,500

yeah I think if they do have six legs

673

00:26:49,490 --> 00:26:46,380

then we should consider the possibility

674

00:26:52,190 --> 00:26:49,500

that we're dealing with insects but from

675

00:26:54,710 --> 00:26:52,200

what I've seen they still are tetrapods

676
00:26:59,090 --> 00:26:54,720
they still have four Limbs and lower

677
00:27:02,210 --> 00:26:59,100
limbs legs as we call them and upper

678
00:27:04,010 --> 00:27:02,220
legs what we call arms so if they do

679
00:27:07,130 --> 00:27:04,020
have that same configuration which is

680
00:27:10,010 --> 00:27:07,140
ubiquitous among all mammals and most

681
00:27:11,810 --> 00:27:10,020
you know non-mammalian life forms too

682
00:27:14,330 --> 00:27:11,820
that aren't insects then we do still

683
00:27:17,149 --> 00:27:14,340
need to consider whether or not they are

684
00:27:18,950 --> 00:27:17,159
Earthly tetrapods just like us

685
00:27:21,049 --> 00:27:18,960
um you know but if they do have six

686
00:27:22,490 --> 00:27:21,059
Limbs and they have claws and things

687
00:27:25,730 --> 00:27:22,500
like that then yeah we're definitely not

688
00:27:28,730 --> 00:27:25,740

talking about a hominin form my personal

689

00:27:30,529 --> 00:27:28,740

take is that once we get so far into the

690

00:27:32,570 --> 00:27:30,539

future we're just gonna start looking

691

00:27:36,230 --> 00:27:32,580

less and like less and less like

692

00:27:37,789 --> 00:27:36,240

ourselves I mean even when Europeans got

693

00:27:39,409 --> 00:27:37,799

on boats and started traveling around

694

00:27:41,269 --> 00:27:39,419

they weren't sure the humans they were

695

00:27:42,769 --> 00:27:41,279

coming into contact with with were even

696

00:27:45,470 --> 00:27:42,779

humans they came up with all these

697

00:27:47,210 --> 00:27:45,480

cockamami ideas about how their separate

698

00:27:49,970 --> 00:27:47,220

creation of God or you know whatever

699

00:27:52,010 --> 00:27:49,980

they use to try to justify acts of ultra

700

00:27:54,169 --> 00:27:52,020

violence against them but they didn't

701
00:27:56,029 --> 00:27:54,179
even recognize our humanity and these

702
00:27:57,769 --> 00:27:56,039
people that look exactly like us except

703
00:27:59,690 --> 00:27:57,779
for some slight differences in skin

704
00:28:02,090 --> 00:27:59,700
color and hair color and texture and

705
00:28:03,769 --> 00:28:02,100
things like that so you know I do wonder

706
00:28:06,289 --> 00:28:03,779
if it's that same sort of thing just

707
00:28:08,690 --> 00:28:06,299
projected into the future where once

708
00:28:09,890 --> 00:28:08,700
your eyes get big enough especially if

709
00:28:13,130 --> 00:28:09,900
they're wearing some kind of contact

710
00:28:14,990 --> 00:28:13,140
lens like a darkened lens because with

711
00:28:17,990 --> 00:28:15,000
huge eyes you would want to shelter them

712
00:28:19,250 --> 00:28:18,000
from light to some extent then yeah I

713
00:28:22,970 --> 00:28:19,260

mean you could see how it might look

714

00:28:25,010 --> 00:28:22,980

like a praying mantis in that regard but

715

00:28:26,690 --> 00:28:25,020

if they are walking on two legs with two

716

00:28:28,669 --> 00:28:26,700

arms then I think it's hard to argue

717

00:28:31,430 --> 00:28:28,679

that they are an actual insect

718

00:28:32,990 --> 00:28:31,440

yeah yeah it's interesting now I just

719

00:28:35,029 --> 00:28:33,000

wanted to flip it sort of around to sort

720

00:28:37,669 --> 00:28:35,039

of the science a little bit more or the

721

00:28:39,110 --> 00:28:37,679

scientific community and it seems like

722

00:28:41,090 --> 00:28:39,120

we're seeing a lot more scientists

723

00:28:42,529 --> 00:28:41,100

looking into this subject so I just like

724

00:28:44,390 --> 00:28:42,539

to see you know what your thoughts are

725

00:28:46,490 --> 00:28:44,400

on that you see the stigma sort of

726

00:28:49,070 --> 00:28:46,500
dropping in the sort of scientific

727

00:28:51,890 --> 00:28:49,080
community in Academia

728

00:28:54,289 --> 00:28:51,900
oh yeah for sure and it's uh it's great

729

00:28:55,970 --> 00:28:54,299
to see honestly it's it's a very

730

00:28:56,690 --> 00:28:55,980
welcomed site

731

00:28:59,210 --> 00:28:56,700
um

732

00:29:04,190 --> 00:28:59,220
yeah I just I wrote a whole article

733

00:29:06,110 --> 00:29:04,200
about that for the mufon uh Journal I

734

00:29:08,390 --> 00:29:06,120
think it was the March Edition when it

735

00:29:10,490 --> 00:29:08,400
came out just talking about my own

736

00:29:12,950 --> 00:29:10,500
experience and kind of what I've seen

737

00:29:15,710 --> 00:29:12,960
over the last four or five years

738

00:29:17,450 --> 00:29:15,720

with regard to how the subject's been

739

00:29:20,269 --> 00:29:17,460

perceived

740

00:29:23,570 --> 00:29:20,279

um in Academia and how academics have

741

00:29:25,610 --> 00:29:23,580

been perceived who study this and it all

742

00:29:27,470 --> 00:29:25,620

seems to be moving in a positive

743

00:29:29,269 --> 00:29:27,480

direction I mean I can only talk about

744

00:29:30,169 --> 00:29:29,279

my own personal experience but it has

745

00:29:32,990 --> 00:29:30,179

been

746

00:29:35,210 --> 00:29:33,000

quite quite encouraging to be honest

747

00:29:36,889 --> 00:29:35,220

from you know the first time I told the

748

00:29:39,470 --> 00:29:36,899

chair of my department that I was

749

00:29:40,549 --> 00:29:39,480

working on this book back in 2017 I

750

00:29:43,310 --> 00:29:40,559

think it was

751
00:29:45,470 --> 00:29:43,320
he looked at me and said yeah I mean

752
00:29:47,450 --> 00:29:45,480
that's what scientists are supposed to

753
00:29:48,769 --> 00:29:47,460
be doing and then just kind of made a

754
00:29:50,510 --> 00:29:48,779
face like why the hell are we even

755
00:29:52,610 --> 00:29:50,520
having this conversation and walked away

756
00:29:55,490 --> 00:29:52,620
like yeah of course you should be doing

757
00:29:57,470 --> 00:29:55,500
that it's our job and it is our job I

758
00:30:00,169 --> 00:29:57,480
mean we're supposed to be investigating

759
00:30:01,730 --> 00:30:00,179
the mysterious aspects of the universe

760
00:30:04,070 --> 00:30:01,740
and you know and

761
00:30:06,649 --> 00:30:04,080
asking questions investigating things to

762
00:30:08,570 --> 00:30:06,659
the best of our ability

763
00:30:11,510 --> 00:30:08,580

um but yeah I mean I got asked to teach

764

00:30:14,450 --> 00:30:11,520

an honors course at my University about

765

00:30:17,510 --> 00:30:14,460

this research about UFOs about my book

766

00:30:21,169 --> 00:30:17,520

specifically I got a a scholarship and

767

00:30:23,450 --> 00:30:21,179

research award from the dean of uh my

768

00:30:26,210 --> 00:30:23,460

University last spring right before I

769

00:30:28,549 --> 00:30:26,220

went on sabbatical got a merit award for

770

00:30:31,490 --> 00:30:28,559

scholarship and research just a month or

771

00:30:33,409 --> 00:30:31,500

so ago when I was on sabbatical

772

00:30:35,690 --> 00:30:33,419

um you know each of my book covers are

773

00:30:37,549 --> 00:30:35,700

up in the main lobby of my building they

774

00:30:40,490 --> 00:30:37,559

sell my books at the bookstore the

775

00:30:42,529 --> 00:30:40,500

University Bookstore so I I've been very

776

00:30:44,870 --> 00:30:42,539

encouraged by my institution by my

777

00:30:46,909 --> 00:30:44,880

academic colleagues and if that's my

778

00:30:49,430 --> 00:30:46,919

experience I would assume it's the

779

00:30:51,230 --> 00:30:49,440

experience of others too I mean

780

00:30:55,070 --> 00:30:51,240

obviously waited till I had tenure and

781

00:30:57,289 --> 00:30:55,080

full Professor status before I really uh

782

00:30:58,909 --> 00:30:57,299

hit the ground running with this just to

783

00:31:00,710 --> 00:30:58,919

make sure those protections are in place

784

00:31:02,810 --> 00:31:00,720

and at this point I would encourage

785

00:31:04,130 --> 00:31:02,820

others to do that too I don't know if an

786

00:31:07,430 --> 00:31:04,140

early stage

787

00:31:09,769 --> 00:31:07,440

scientist you know a visiting Professor

788

00:31:10,970 --> 00:31:09,779

associate or assistant professor would

789

00:31:12,830 --> 00:31:10,980

really want to stick their necks out

790

00:31:16,430 --> 00:31:12,840

without those protections

791

00:31:18,470 --> 00:31:16,440

but I don't know I I see I see

792

00:31:20,990 --> 00:31:18,480

encouraging Trends and and yeah

793

00:31:24,649 --> 00:31:21,000

obviously having more academics get into

794

00:31:26,690 --> 00:31:24,659

the space is is great I I think the

795

00:31:28,909 --> 00:31:26,700

Knowledge and Skills that we can bring

796

00:31:31,070 --> 00:31:28,919

to the table are only going to help I

797

00:31:33,289 --> 00:31:31,080

don't see how they could detract

798

00:31:35,210 --> 00:31:33,299

yeah now it certainly is encouraging and

799

00:31:37,970 --> 00:31:35,220

the congratulations on those those

800

00:31:40,789 --> 00:31:37,980

Awards and and so being you know quite

801
00:31:42,049 --> 00:31:40,799
open in the UFO subject how's that led

802
00:31:43,789 --> 00:31:42,059
to you being invited to sort of

803
00:31:46,190 --> 00:31:43,799
different events regard you know related

804
00:31:50,510 --> 00:31:46,200
to the subject and and if so any kind of

805
00:31:53,389 --> 00:31:50,520
standout events that you can talk about

806
00:31:55,730 --> 00:31:53,399
yeah absolutely I mean you know there's

807
00:31:59,210 --> 00:31:55,740
a lot of great UFO conferences and and

808
00:32:02,330 --> 00:31:59,220
those were arguably happening before a

809
00:32:04,010 --> 00:32:02,340
lot of really academic conferences or if

810
00:32:06,529 --> 00:32:04,020
not before

811
00:32:09,590 --> 00:32:06,539
at least in higher numbers

812
00:32:12,470 --> 00:32:09,600
um but yeah I've been fortunate to have

813
00:32:14,210 --> 00:32:12,480

been invited to a couple just in the

814

00:32:16,669 --> 00:32:14,220

last year

815

00:32:19,010 --> 00:32:16,679

um one put on by Jeff craple at Rice

816

00:32:21,110 --> 00:32:19,020

University opening of The Archives which

817

00:32:23,389 --> 00:32:21,120

was the phenomenal I would call Historic

818

00:32:25,250 --> 00:32:23,399

what they did there

819

00:32:28,190 --> 00:32:25,260

um I got to be on a panel with a number

820

00:32:31,010 --> 00:32:28,200

of prominent researchers

821

00:32:32,930 --> 00:32:31,020

um Aaron Prophet I remember a professor

822

00:32:36,110 --> 00:32:32,940

at University of Florida Eric Wargo

823

00:32:38,510 --> 00:32:36,120

who's written arguably the book on

824

00:32:41,570 --> 00:32:38,520

precognition called time Loops which I'd

825

00:32:43,310 --> 00:32:41,580

recommend everybody read

826

00:32:46,669 --> 00:32:43,320

um and that was a fantastic event

827

00:32:49,789 --> 00:32:46,679

Jacques valet Leslie Kane Whitley

828

00:32:52,730 --> 00:32:49,799

strieber so many great speakers

829

00:32:55,850 --> 00:32:52,740

um Edwin May the head of the Stargate

830

00:32:59,330 --> 00:32:55,860

project the CIA a really interesting

831

00:33:01,730 --> 00:32:59,340

talk and and countless others as well

832

00:33:04,370 --> 00:33:01,740

um and then in July I got to give a talk

833

00:33:07,070 --> 00:33:04,380

at the eslin institute in Big Sur

834

00:33:10,610 --> 00:33:07,080

California again with a number of uh

835

00:33:12,110 --> 00:33:10,620

prominent phds in various Fields related

836

00:33:20,509 --> 00:33:12,120

to

837

00:33:24,110 --> 00:33:20,519

lot of those kind of under the radar

838

00:33:27,710 --> 00:33:24,120

Fringe type Fields but just um really

839

00:33:29,509 --> 00:33:27,720

being able to to give a talk in very

840

00:33:32,029 --> 00:33:29,519

academic terms you know you never want

841

00:33:34,490 --> 00:33:32,039

to be too esoteric when going on a

842

00:33:36,169 --> 00:33:34,500

podcast or giving a talk to a UFO

843

00:33:38,990 --> 00:33:36,179

Community but being in a room full of

844

00:33:40,970 --> 00:33:39,000

academics we could all kind of go just a

845

00:33:43,370 --> 00:33:40,980

little bit deeper and actually the

846

00:33:45,649 --> 00:33:43,380

inspiration for my most recent book came

847

00:33:47,509 --> 00:33:45,659

from that uh one of the co-founders of

848

00:33:51,169 --> 00:33:47,519

the eslin Institute guy named Michael

849

00:33:53,029 --> 00:33:51,179

Murphy came up to me after my talk and

850

00:33:55,490 --> 00:33:53,039

he was like man I was I was done with

851

00:33:57,889 --> 00:33:55,500

this really great guy really uh I think

852

00:33:59,690 --> 00:33:57,899

he's like 93 but he seems like he's in

853

00:34:01,490 --> 00:33:59,700

his 50s it's crazy

854

00:34:04,130 --> 00:34:01,500

but he was like you know I was done with

855

00:34:06,169 --> 00:34:04,140

UFOs I thought I'd heard everything I'd

856

00:34:08,270 --> 00:34:06,179

seen everything and it just didn't make

857

00:34:10,430 --> 00:34:08,280

any damn sense but your your

858

00:34:13,070 --> 00:34:10,440

presentation you know the future humans

859

00:34:15,050 --> 00:34:13,080

this kind of makes sense and I really

860

00:34:17,389 --> 00:34:15,060

appreciate he's spelling all this out

861

00:34:21,649 --> 00:34:17,399

and then asked me

862

00:34:26,030 --> 00:34:21,659

if uh if I if there's any really deep

863

00:34:28,430 --> 00:34:26,040

dives into uh sex and music

864

00:34:31,010 --> 00:34:28,440

like with regard to the way the visitors

865

00:34:34,129 --> 00:34:31,020

interact with us future humans as I

866

00:34:35,990 --> 00:34:34,139

would argue and I got back from that and

867

00:34:38,510 --> 00:34:36,000

I started looking and I couldn't really

868

00:34:41,510 --> 00:34:38,520

find anything that really went deep into

869

00:34:43,970 --> 00:34:41,520

the sex aspect in music specifically

870

00:34:46,909 --> 00:34:43,980

there's obviously cases where people do

871

00:34:50,270 --> 00:34:46,919

report having sex and and that was a big

872

00:34:53,089 --> 00:34:50,280

uh a big motivator for writing this this

873

00:34:54,970 --> 00:34:53,099

book which one of my reviewers called I

874

00:34:57,370 --> 00:34:54,980

think she called me the Danielle Steel

875

00:35:00,650 --> 00:34:57,380

of

876

00:35:04,370 --> 00:35:00,660

UFO research or something that's a very

877

00:35:06,410 --> 00:35:04,380

sex sexual book uh also focuses on music

878

00:35:09,170 --> 00:35:06,420

and culture and things like that which

879

00:35:11,270 --> 00:35:09,180

you know stemmed from hey why you know

880

00:35:13,190 --> 00:35:11,280

if the gametes are so important if sex

881

00:35:15,290 --> 00:35:13,200

and sexuality is so important why aren't

882

00:35:16,910 --> 00:35:15,300

we talking about that more so it's

883

00:35:19,730 --> 00:35:16,920

obviously you know it's a satirical

884

00:35:22,190 --> 00:35:19,740

science fiction novel but really does

885

00:35:24,290 --> 00:35:22,200

try to draw in all of these same things

886

00:35:25,730 --> 00:35:24,300

from my previous two books

887

00:35:28,550 --> 00:35:25,740

um but that's that's definitely a main

888

00:35:30,589 --> 00:35:28,560

theme largely thanks to Michael Murphy

889

00:35:32,390 --> 00:35:30,599

yes and this is your new book you

890

00:35:34,790 --> 00:35:32,400

mentioned Revelation the future human

891

00:35:36,349 --> 00:35:34,800

past so was it always something you'd

892

00:35:38,349 --> 00:35:36,359

wanted to do is for write a fiction book

893

00:35:42,950 --> 00:35:38,359

around this subject

894

00:35:46,370 --> 00:35:42,960

uh yeah yes and no like I I kind of saw

895

00:35:48,650 --> 00:35:46,380

this is is sort of a three-part thing

896

00:35:51,829 --> 00:35:48,660

where there's the first book is kind of

897

00:35:54,650 --> 00:35:51,839

the more hard science dense uh Deep dive

898

00:35:55,970 --> 00:35:54,660

into the these four different fields I

899

00:35:58,970 --> 00:35:55,980

mentioned earlier

900

00:36:00,470 --> 00:35:58,980

but it's been called dense it's more of

901
00:36:02,510 --> 00:36:00,480
a hard read especially if you're not

902
00:36:06,410 --> 00:36:02,520
familiar with a lot of these terms but I

903
00:36:08,390 --> 00:36:06,420
I did you know but I had three PhD

904
00:36:10,130 --> 00:36:08,400
reviewers to make sure it appealed to my

905
00:36:12,410 --> 00:36:10,140
academic colleagues but also a number of

906
00:36:15,290 --> 00:36:12,420
beta readers to make sure it appealed to

907
00:36:18,050 --> 00:36:15,300
everyone I was readable but I is I'll

908
00:36:21,109 --> 00:36:18,060
agree with that critique that it is

909
00:36:23,270 --> 00:36:21,119
somewhat dense whereas the second book

910
00:36:25,250 --> 00:36:23,280
um is much more readable it's stories

911
00:36:27,950 --> 00:36:25,260
and as this is what happened to people

912
00:36:29,630 --> 00:36:27,960
then I bring that science in to sort of

913
00:36:31,970 --> 00:36:29,640

highlight how we might understand these

914

00:36:34,130 --> 00:36:31,980

patterns that exist across these various

915

00:36:36,109 --> 00:36:34,140

case studies and then yeah this one is

916

00:36:38,390 --> 00:36:36,119

kind of that last piece for people that

917

00:36:40,849 --> 00:36:38,400

really aren't into science at all but

918

00:36:43,069 --> 00:36:40,859

are still interested in maybe how this

919

00:36:45,770 --> 00:36:43,079

time travel model might be understood in

920

00:36:47,870 --> 00:36:45,780

the context of a purely fictitious story

921

00:36:50,450 --> 00:36:47,880

that may actually have more truth in it

922

00:36:52,790 --> 00:36:50,460

than a lot of people realize

923

00:36:54,230 --> 00:36:52,800

um but it's very readable sort of a

924

00:36:57,890 --> 00:36:54,240

funny

925

00:36:59,690 --> 00:36:57,900

highly sexual look at the uh the

926
00:37:01,550 --> 00:36:59,700
phenomenon in the context of this future

927
00:37:03,530 --> 00:37:01,560
human hypothesis

928
00:37:04,910 --> 00:37:03,540
oh that's amazing I can't wait to read

929
00:37:06,650 --> 00:37:04,920
it it looks amazing and it looks

930
00:37:08,690 --> 00:37:06,660
physically amazing with a very standout

931
00:37:11,930 --> 00:37:08,700
cover as well it does yeah they killed

932
00:37:14,510 --> 00:37:11,940
it on the cover uh 33

933
00:37:18,349 --> 00:37:14,520
ounce creatives out the Oz stands for it

934
00:37:20,569 --> 00:37:18,359
is yeah yeah Dan and Olaf with um yeah

935
00:37:22,490 --> 00:37:20,579
they made me two covers and it was

936
00:37:24,710 --> 00:37:22,500
really hard to pick which one I was

937
00:37:26,569 --> 00:37:24,720
going to use but one they took some

938
00:37:29,270 --> 00:37:26,579

creative liberties with one of them that

939

00:37:30,890 --> 00:37:29,280

were perfect I kind of wonder if they

940

00:37:33,410 --> 00:37:30,900

got a sneak peek at the manuscript

941

00:37:35,630 --> 00:37:33,420

honestly it was it was a little too good

942

00:37:37,130 --> 00:37:35,640

what they did

943

00:37:38,870 --> 00:37:37,140

um but yeah I know they they knocked it

944

00:37:41,030 --> 00:37:38,880

out of the park I'm I'm as excited about

945

00:37:44,210 --> 00:37:41,040

the cover as I am the book itself they

946

00:37:45,950 --> 00:37:44,220

did a great job yeah excellent excellent

947

00:37:47,569 --> 00:37:45,960

um just switching back again to sort of

948

00:37:50,210 --> 00:37:47,579

more sort of the uh

949

00:37:52,970 --> 00:37:50,220

theories let's say have you considered a

950

00:37:55,790 --> 00:37:52,980

shadow biosphere or Shadow biome concept

951
00:37:59,630 --> 00:37:55,800
when it comes to this subject

952
00:38:00,950 --> 00:37:59,640
yeah I mean that kind of plays into the

953
00:38:03,829 --> 00:38:00,960
whole

954
00:38:06,410 --> 00:38:03,839
um breakout civilization thing to some

955
00:38:09,650 --> 00:38:06,420
extent but I just I don't know I mean if

956
00:38:12,829 --> 00:38:09,660
there is a shadow biome that is as

957
00:38:14,810 --> 00:38:12,839
complex and advanced and sophisticated

958
00:38:16,490 --> 00:38:14,820
as us which I think when you're talking

959
00:38:17,990 --> 00:38:16,500
about the UFO phenomenon it would have

960
00:38:20,450 --> 00:38:18,000
to be because they're clearly more

961
00:38:23,390 --> 00:38:20,460
advanced than us then I do think that's

962
00:38:25,430 --> 00:38:23,400
a little more tenuous just because we

963
00:38:27,589 --> 00:38:25,440

would see that more it's harder to hide

964

00:38:31,310 --> 00:38:27,599

but you know there could absolutely be

965

00:38:33,710 --> 00:38:31,320

something on the molecular level that

966

00:38:36,109 --> 00:38:33,720

might represent that

967

00:38:39,349 --> 00:38:36,119

I mean you're talking about a lot of

968

00:38:41,270 --> 00:38:39,359

anecdotes and a lot of speculation

969

00:38:43,370 --> 00:38:41,280

is that one of the hardest parts about

970

00:38:45,829 --> 00:38:43,380

combining your research and work with

971

00:38:47,150 --> 00:38:45,839

the UFO subject or if it's not what is

972

00:38:48,470 --> 00:38:47,160

the sort of the hardest part about

973

00:38:49,970 --> 00:38:48,480

researching and writing about this

974

00:38:52,609 --> 00:38:49,980

subject for you

975

00:38:54,230 --> 00:38:52,619

I mean I think that's a stereotype yeah

976

00:38:56,750 --> 00:38:54,240

that anytime you're talking about the

977

00:38:59,990 --> 00:38:56,760

future has to be speculation but I I

978

00:39:01,609 --> 00:39:00,000

think that's actually a misnomer and

979

00:39:04,190 --> 00:39:01,619

it's sort of unfortunate that people

980

00:39:06,470 --> 00:39:04,200

just default to that because in this

981

00:39:08,990 --> 00:39:06,480

particular case if we are talking about

982

00:39:10,670 --> 00:39:09,000

the future and we're actually seeing the

983

00:39:12,950 --> 00:39:10,680

craft and the beans coming back from

984

00:39:15,589 --> 00:39:12,960

that future it's not speculation at all

985

00:39:16,790 --> 00:39:15,599

right it's not speculating about what

986

00:39:19,310 --> 00:39:16,800

we're going to be it's actual

987

00:39:21,530 --> 00:39:19,320

observational research which at the top

988

00:39:23,510 --> 00:39:21,540

of the show I said is kind of our Forte

989

00:39:25,690 --> 00:39:23,520

that's what we do and anthropology is

990

00:39:28,190 --> 00:39:25,700

observational research because we can't

991

00:39:31,370 --> 00:39:28,200

experiment on humans so it is kind of

992

00:39:34,190 --> 00:39:31,380

annoying when I hear that because it's

993

00:39:37,490 --> 00:39:34,200

not speculation if you are quantifying

994

00:39:39,410 --> 00:39:37,500

and trying to understand the things that

995

00:39:40,970 --> 00:39:39,420

you're seeing that it doesn't matter if

996

00:39:43,310 --> 00:39:40,980

they come from our future past if

997

00:39:45,109 --> 00:39:43,320

they're present in our reality our

998

00:39:46,970 --> 00:39:45,119

current present then you can do

999

00:39:49,550 --> 00:39:46,980

observational studies the same way you

1000

00:39:52,730 --> 00:39:49,560

can with anything else the same way we

1001
00:39:54,829 --> 00:39:52,740
have Foss muscles from the past we see

1002
00:39:56,569 --> 00:39:54,839
them in our present they've lost the

1003
00:39:59,870 --> 00:39:56,579
soft tissue obviously but we can still

1004
00:40:01,490 --> 00:39:59,880
use what we see to make educated guesses

1005
00:40:04,550 --> 00:40:01,500
about what happened between now and then

1006
00:40:06,790 --> 00:40:04,560
so and I really I hit this hard in my

1007
00:40:10,130 --> 00:40:06,800
first book is that I did try to avoid

1008
00:40:12,530 --> 00:40:10,140
anything that could be considered just

1009
00:40:14,150 --> 00:40:12,540
on a baited speculation where we're

1010
00:40:16,609 --> 00:40:14,160
saying well we look like that because

1011
00:40:18,650 --> 00:40:16,619
this happened and that caused us to have

1012
00:40:21,230 --> 00:40:18,660
this physical characteristic or these

1013
00:40:23,270 --> 00:40:21,240

behaviors I I really steered away from

1014

00:40:25,970 --> 00:40:23,280

that and try to just stick to dominant

1015

00:40:29,089 --> 00:40:25,980

Trends throughout the hominin past and

1016

00:40:31,190 --> 00:40:29,099

how those might correlate with what we

1017

00:40:33,950 --> 00:40:31,200

do actually observe in these craft and

1018

00:40:35,270 --> 00:40:33,960

the beans themselves so yeah I mean I

1019

00:40:37,010 --> 00:40:35,280

think that's kind of a knee-jerk

1020

00:40:39,890 --> 00:40:37,020

reaction that a lot of people have but

1021

00:40:41,690 --> 00:40:39,900

if if they are from the future and they

1022

00:40:44,750 --> 00:40:41,700

are here in our present and that's not

1023

00:40:46,130 --> 00:40:44,760

speculation it's observation yeah I'm

1024

00:40:49,190 --> 00:40:46,140

going to mention there as well about

1025

00:40:52,250 --> 00:40:49,200

anecdotes and anecdotal evidence I.E

1026
00:40:54,230 --> 00:40:52,260
stories from experiences I think that's

1027
00:40:56,569 --> 00:40:54,240
been

1028
00:40:58,190 --> 00:40:56,579
and looked over a bit too much in my in

1029
00:40:59,930 --> 00:40:58,200
my opinion you know people say well it's

1030
00:41:01,790 --> 00:40:59,940
just it's just a story we'll kind of

1031
00:41:03,290 --> 00:41:01,800
brush it aside so you know I believe

1032
00:41:05,030 --> 00:41:03,300
that experiences stories should

1033
00:41:07,130 --> 00:41:05,040
definitely be heard and respected and

1034
00:41:08,930 --> 00:41:07,140
taken seriously so it seems like you

1035
00:41:11,030 --> 00:41:08,940
agree with that yeah yeah and if you

1036
00:41:13,430 --> 00:41:11,040
have enough of them then it's content

1037
00:41:14,750 --> 00:41:13,440
analysis it's that abductive approach I

1038
00:41:17,089 --> 00:41:14,760

mentioned earlier if you're just looking

1039

00:41:19,849 --> 00:41:17,099

at one or two yeah that's anecdote but

1040

00:41:22,069 --> 00:41:19,859

if you start really going deep into a

1041

00:41:25,130 --> 00:41:22,079

number of these and and with big data

1042

00:41:27,290 --> 00:41:25,140

and possibly AI we might be able to

1043

00:41:29,390 --> 00:41:27,300

really accumulate a massive database

1044

00:41:31,550 --> 00:41:29,400

that allows us to do content analysis

1045

00:41:33,290 --> 00:41:31,560

over thousands and thousands of cases

1046

00:41:35,270 --> 00:41:33,300

and you you do have people doing that

1047

00:41:37,310 --> 00:41:35,280

like with the Dr Edgar Mitchell free

1048

00:41:40,390 --> 00:41:37,320

study I mean they have upwards of five

1049

00:41:43,069 --> 00:41:40,400

thousand individuals now Multicultural

1050

00:41:46,550 --> 00:41:43,079

multi-linguistic study where they're

1051
00:41:50,210 --> 00:41:46,560
using surveys which is also a valid form

1052
00:41:52,069 --> 00:41:50,220
of research and you know there's there's

1053
00:41:54,170 --> 00:41:52,079
always issues with surveys but that's

1054
00:41:56,450 --> 00:41:54,180
not anecdote anymore now you're seeing

1055
00:41:58,790 --> 00:41:56,460
mean statistically what people most

1056
00:42:00,430 --> 00:41:58,800
commonly report and to tie it into what

1057
00:42:02,810 --> 00:42:00,440
we're talking about earlier with the the

1058
00:42:05,030 --> 00:42:02,820
insects the reptilians things like that

1059
00:42:07,190 --> 00:42:05,040
that research has shown that that's only

1060
00:42:10,250 --> 00:42:07,200
about five percent and not just those

1061
00:42:12,770 --> 00:42:10,260
two but every other thing that's not a

1062
00:42:14,630 --> 00:42:12,780
tall gray short gray human which was the

1063
00:42:17,569 --> 00:42:14,640

most commonly described a full-on human

1064

00:42:20,170 --> 00:42:17,579

or a hybrid all four of those the first

1065

00:42:23,150 --> 00:42:20,180

four categories are entirely human

1066

00:42:26,870 --> 00:42:23,160

hominin entities just with various forms

1067

00:42:28,670 --> 00:42:26,880

of of evolutionary variation so yeah I

1068

00:42:31,370 --> 00:42:28,680

mean we can look at things like that we

1069

00:42:34,550 --> 00:42:31,380

can do content analysis we can do big

1070

00:42:37,849 --> 00:42:34,560

data analyzes we can even what I'd like

1071

00:42:39,890 --> 00:42:37,859

to do some days is model our physiology

1072

00:42:42,349 --> 00:42:39,900

our morphological form

1073

00:42:43,790 --> 00:42:42,359

into the future see what we get I did

1074

00:42:46,370 --> 00:42:43,800

something similar to that in my first

1075

00:42:49,670 --> 00:42:46,380

book I used the geometric morphometric

1076

00:42:52,609 --> 00:42:49,680

approach to shift between a fully

1077

00:42:54,710 --> 00:42:52,619

uh entirely male versus an entirely

1078

00:42:56,810 --> 00:42:54,720

female skull because one dominant Trend

1079

00:42:59,329 --> 00:42:56,820

and recent hominin Evolution ever since

1080

00:43:01,430 --> 00:42:59,339

about 20 or 30 000 years ago is a shift

1081

00:43:03,890 --> 00:43:01,440

toward craniofacial feminization where

1082

00:43:06,170 --> 00:43:03,900

we all males and females start to look

1083

00:43:08,030 --> 00:43:06,180

more like the females of our ancestors

1084

00:43:11,390 --> 00:43:08,040

and if that Trend continues what I found

1085

00:43:13,430 --> 00:43:11,400

is that we have these big round medial

1086

00:43:14,750 --> 00:43:13,440

laterally expanded heads the eyes start

1087

00:43:16,730 --> 00:43:14,760

wrapping around we have these small

1088

00:43:19,250 --> 00:43:16,740

faces we start to look more like the

1089

00:43:21,109 --> 00:43:19,260

Grays so if that is a trend that

1090

00:43:24,050 --> 00:43:21,119

continues into the future based on this

1091

00:43:25,790 --> 00:43:24,060

geometric morphometric analysis it looks

1092

00:43:28,430 --> 00:43:25,800

like that is something that would also

1093

00:43:30,589 --> 00:43:28,440

help explain why we might look like that

1094

00:43:33,470 --> 00:43:30,599

why they look like that and why we may

1095

00:43:34,690 --> 00:43:33,480

be related yeah and I just had a thought

1096

00:43:37,250 --> 00:43:34,700

then if we're seeing different

1097

00:43:38,809 --> 00:43:37,260

variations on what we would call the

1098

00:43:41,270 --> 00:43:38,819

Grays could it be that we're being

1099

00:43:43,609 --> 00:43:41,280

visited by them from different stages of

1100

00:43:46,430 --> 00:43:43,619

the future oh yeah we're seeing the

1101
00:43:49,430 --> 00:43:46,440
different Evolution evolutionary steps of

1102
00:43:52,010 --> 00:43:49,440
this this future entity absolutely yeah

1103
00:43:54,109 --> 00:43:52,020
and and that's that's what I argue in

1104
00:43:56,150 --> 00:43:54,119
both my books I refer to it as temporal

1105
00:43:58,370 --> 00:43:56,160
variation right now we have Geographic

1106
00:44:00,410 --> 00:43:58,380
variation we can see but that's also

1107
00:44:02,750 --> 00:44:00,420
temporal in the sense that what we see

1108
00:44:06,109 --> 00:44:02,760
is how those populations evolved in

1109
00:44:09,430 --> 00:44:06,119
those regions over the last 200 to 300

1110
00:44:14,030 --> 00:44:09,440
000 years so it's both and and with this

1111
00:44:16,130 --> 00:44:14,040
you know I I sort of delve into how much

1112
00:44:18,890 --> 00:44:16,140
of it is continued Geographic variation

1113
00:44:20,569 --> 00:44:18,900

into the future or how much of it like

1114

00:44:21,950 --> 00:44:20,579

you said is that temporal variation

1115

00:44:24,650 --> 00:44:21,960

where we're coming back from different

1116

00:44:26,870 --> 00:44:24,660

points in our future and therefore look

1117

00:44:28,910 --> 00:44:26,880

different than one another and and

1118

00:44:30,530 --> 00:44:28,920

that's another thing I overlooked in my

1119

00:44:32,870 --> 00:44:30,540

first book because I was really just

1120

00:44:36,109 --> 00:44:32,880

purely focused on these these archetypal

1121

00:44:38,450 --> 00:44:36,119

gray aliens but left out the obvious

1122

00:44:41,210 --> 00:44:38,460

fact that will probably be time

1123

00:44:43,550 --> 00:44:41,220

traveling way before that and if they're

1124

00:44:45,650 --> 00:44:43,560

able to reach this point and are present

1125

00:44:47,030 --> 00:44:45,660

and previous points then we already have

1126

00:44:51,170 --> 00:44:47,040

time travel

1127

00:44:52,790 --> 00:44:51,180

can possibly reach because they could

1128

00:44:54,589 --> 00:44:52,800

pick someone up from that time and move

1129

00:44:57,050 --> 00:44:54,599

them to whenever the hell they want it

1130

00:44:59,750 --> 00:44:57,060

to so I that seemed like an obvious

1131

00:45:01,309 --> 00:44:59,760

Omission to me once I started reading

1132

00:45:03,950 --> 00:45:01,319

more reports and researching the second

1133

00:45:06,349 --> 00:45:03,960

book where a lot of them are just humans

1134

00:45:07,370 --> 00:45:06,359

just like uh still not quite to the

1135

00:45:09,410 --> 00:45:07,380

point where they're speaking

1136

00:45:11,390 --> 00:45:09,420

telepathically but speaking with

1137

00:45:13,430 --> 00:45:11,400

vocalized speech they have kitchens and

1138

00:45:14,870 --> 00:45:13,440

bathrooms and they're doing the same

1139

00:45:17,150 --> 00:45:14,880

things that we do they're seen

1140

00:45:19,010 --> 00:45:17,160

exercising outside the craft and picking

1141

00:45:21,290 --> 00:45:19,020

up grasshoppers to collect data about

1142

00:45:24,349 --> 00:45:21,300

the environment and they look exactly

1143

00:45:26,089 --> 00:45:24,359

like us so so it made me realize that

1144

00:45:28,670 --> 00:45:26,099

this was probably going to be happening

1145

00:45:32,150 --> 00:45:28,680

much sooner than I previously thought

1146

00:45:34,609 --> 00:45:32,160

and um yeah I think it would also help

1147

00:45:37,490 --> 00:45:34,619

explain why we see them more often based

1148

00:45:40,010 --> 00:45:37,500

on the Dr Edgar Mitchell free study

1149

00:45:42,890 --> 00:45:40,020

is that if you have this point in time

1150

00:45:45,650 --> 00:45:42,900

we have temporal proximity to points

1151

00:45:47,630 --> 00:45:45,660

closer to us we're we're more obvious to

1152

00:45:50,270 --> 00:45:47,640

them because we exist closer to them the

1153

00:45:52,670 --> 00:45:50,280

farther out you get with these more gray

1154

00:45:54,349 --> 00:45:52,680

like beans or these more manted or

1155

00:45:56,270 --> 00:45:54,359

reptilian like creatures that are maybe

1156

00:45:58,970 --> 00:45:56,280

in our very distant future where one

1157

00:46:01,069 --> 00:45:58,980

tiny blip on their overall temporal

1158

00:46:02,990 --> 00:46:01,079

Spectrum so we would expect therefore to

1159

00:46:05,690 --> 00:46:03,000

see them less often and I made the

1160

00:46:07,370 --> 00:46:05,700

analogy recently with Geographic

1161

00:46:09,050 --> 00:46:07,380

variation how you expect to see people

1162

00:46:10,609 --> 00:46:09,060

in your neighborhood much more

1163

00:46:13,609 --> 00:46:10,619

frequently than you do someone that

1164

00:46:15,650 --> 00:46:13,619

lives in China or you know Mozambique or

1165

00:46:17,210 --> 00:46:15,660

Indonesia or something like that simply

1166

00:46:19,069 --> 00:46:17,220

because you move around in that space

1167

00:46:22,250 --> 00:46:19,079

more often so I think that could help

1168

00:46:24,650 --> 00:46:22,260

account for for that result in the free

1169

00:46:26,990 --> 00:46:24,660

study as well that makes so much sense

1170

00:46:28,010 --> 00:46:27,000

yeah it's a lot of food for thought in

1171

00:46:29,450 --> 00:46:28,020

there

1172

00:46:32,089 --> 00:46:29,460

um I just wanted to move to something

1173

00:46:34,250 --> 00:46:32,099

slightly off the topic of UFOs for a

1174

00:46:36,170 --> 00:46:34,260

moment and I just wanted to if you

1175

00:46:37,930 --> 00:46:36,180

looked into and if so what your thoughts

1176

00:46:40,490 --> 00:46:37,940

are on and I'll say this

1177

00:46:43,010 --> 00:46:40,500

homophoriensis because there seems to be

1178

00:46:46,190 --> 00:46:43,020

somewhat of an anthropo anthropological

1179

00:46:48,170 --> 00:46:46,200

debate surrounding them yeah yeah I know

1180

00:46:51,050 --> 00:46:48,180

I know all about that one

1181

00:46:54,230 --> 00:46:51,060

um one of my favorite anthropologists

1182

00:46:56,329 --> 00:46:54,240

Peter Brown was deep deep into that

1183

00:46:59,809 --> 00:46:56,339

debate about whether it was a genetic

1184

00:47:01,250 --> 00:46:59,819

deformity or Island dwarfism

1185

00:47:03,050 --> 00:47:01,260

um that yeah that was raging when I was

1186

00:47:05,030 --> 00:47:03,060

in grad school and I used a lot of Peter

1187

00:47:08,930 --> 00:47:05,040

Brown's data for my own dissertation

1188

00:47:11,630 --> 00:47:08,940

research and it was unavoidable it would

1189

00:47:13,849 --> 00:47:11,640

eventually come across that but yeah

1190

00:47:16,910 --> 00:47:13,859

even beyond that question there but

1191

00:47:18,349 --> 00:47:16,920

tremendously interesting group

1192

00:47:20,510 --> 00:47:18,359

um they

1193

00:47:23,089 --> 00:47:20,520

you know we're doing cave paintings long

1194

00:47:25,309 --> 00:47:23,099

before Alaska uh which I just got to

1195

00:47:27,170 --> 00:47:25,319

visit a couple weeks ago actually it was

1196

00:47:30,530 --> 00:47:27,180

kind of a bucket list item the whole

1197

00:47:33,230 --> 00:47:30,540

door down region honestly is fantastic

1198

00:47:35,870 --> 00:47:33,240

but getting to go there is a place of

1199

00:47:38,690 --> 00:47:35,880

you know researched and written about

1200

00:47:41,930 --> 00:47:38,700

extensively it was phenomenal but yeah

1201
00:47:43,609 --> 00:47:41,940
like almost three times before the Lasko

1202
00:47:44,930 --> 00:47:43,619
cave paintings were done they were

1203
00:47:47,990 --> 00:47:44,940
making

1204
00:47:50,150 --> 00:47:48,000
um pictures of little pigs and and

1205
00:47:52,309 --> 00:47:50,160
things like that but

1206
00:47:54,109 --> 00:47:52,319
um yeah no amazing group

1207
00:47:56,329 --> 00:47:54,119
um it's it's so fun to imagine them

1208
00:47:58,790 --> 00:47:56,339
running around and you know hunting

1209
00:48:02,450 --> 00:47:58,800
little baby elephants tiny Island

1210
00:48:05,030 --> 00:48:02,460
dwarfed elephants and uh yeah a cool

1211
00:48:06,950 --> 00:48:05,040
group of people for sure they they show

1212
00:48:09,170 --> 00:48:06,960
up in my new book too

1213
00:48:12,470 --> 00:48:09,180

um because one of the first time periods

1214

00:48:15,770 --> 00:48:12,480

visited by these future humans is 48 000

1215

00:48:17,930 --> 00:48:15,780

years ago in the dordon river valley of

1216

00:48:21,470 --> 00:48:17,940

uh southern France and then also in

1217

00:48:22,970 --> 00:48:21,480

Indonesia with the Flores Hobbits many

1218

00:48:25,250 --> 00:48:22,980

other places

1219

00:48:26,630 --> 00:48:25,260

wow that's interesting

1220

00:48:28,609 --> 00:48:26,640

I'm just going to switch to a couple of

1221

00:48:30,470 --> 00:48:28,619

questions before we we start winding

1222

00:48:32,930 --> 00:48:30,480

down here I got a question from a

1223

00:48:34,430 --> 00:48:32,940

follower on Twitter and he said that in

1224

00:48:36,230 --> 00:48:34,440

a recent interview you expressed

1225

00:48:38,809 --> 00:48:36,240

interest in possibly looking into the

1226

00:48:41,270 --> 00:48:38,819

testimony of dambarish a purported Area

1227

00:48:43,550 --> 00:48:41,280

51 whistleblower which personally I

1228

00:48:45,650 --> 00:48:43,560

think is quite controversial but he did

1229

00:48:47,450 --> 00:48:45,660

claim that the euphenots were future

1230

00:48:48,770 --> 00:48:47,460

human Time Travelers I just wondered if

1231

00:48:50,270 --> 00:48:48,780

it is something that you'd looked into

1232

00:48:53,870 --> 00:48:50,280

yet

1233

00:48:56,510 --> 00:48:53,880

I did yeah I mean I I looked into it

1234

00:48:59,630 --> 00:48:56,520

again recently just because it did come

1235

00:49:01,370 --> 00:48:59,640

up and that podcast and I I didn't

1236

00:49:03,650 --> 00:49:01,380

really remember a lot

1237

00:49:07,730 --> 00:49:03,660

during that and then

1238

00:49:10,609 --> 00:49:07,740

yeah I found it really hard to find any

1239

00:49:12,710 --> 00:49:10,619

reliable sources

1240

00:49:14,690 --> 00:49:12,720

um and I feel like that was sort of an

1241

00:49:16,190 --> 00:49:14,700

issue the first time too which is why I

1242

00:49:18,109 --> 00:49:16,200

was kind of wishy-washy on the little

1243

00:49:21,589 --> 00:49:18,119

subject in the last conversation about

1244

00:49:24,530 --> 00:49:21,599

it but even in looking again

1245

00:49:28,210 --> 00:49:24,540

uh I I don't know like like for instance

1246

00:49:30,950 --> 00:49:28,220

I saw claims that this Dan bursh guy

1247

00:49:32,530 --> 00:49:30,960

claims to have worked with this j-rod

1248

00:49:38,089 --> 00:49:32,540

that

1249

00:49:40,790 --> 00:49:38,099

was in 1950 and Birch wasn't even born

1250

00:49:43,010 --> 00:49:40,800

till 1963 so I couldn't figure out how

1251

00:49:45,109 --> 00:49:43,020

that could have happened

1252

00:49:47,270 --> 00:49:45,119

um unless you know he's done traveling

1253

00:49:50,809 --> 00:49:47,280

too and if j-rod's a time traveler maybe

1254

00:49:52,370 --> 00:49:50,819

maybe that that all took place but no it

1255

00:49:54,770 --> 00:49:52,380

is interesting you know and there's

1256

00:49:57,710 --> 00:49:54,780

obviously things that sync up with what

1257

00:50:00,170 --> 00:49:57,720

I'm saying but I'm not going to give

1258

00:50:01,970 --> 00:50:00,180

them more Credence because it happens to

1259

00:50:03,470 --> 00:50:01,980

correlate with what I'm saying I I found

1260

00:50:05,809 --> 00:50:03,480

it really difficult to find anything

1261

00:50:07,130 --> 00:50:05,819

reliable and then you know I was reading

1262

00:50:09,890 --> 00:50:07,140

something about

1263

00:50:12,530 --> 00:50:09,900

how j-rod you know maybe died or got

1264

00:50:14,569 --> 00:50:12,540

sent through a portal and abidos Egypt

1265

00:50:16,609 --> 00:50:14,579

which interestingly comes up a lot in

1266

00:50:19,210 --> 00:50:16,619

the homesteady case

1267

00:50:22,069 --> 00:50:19,220

so yeah I don't know I'm I'm still

1268

00:50:25,370 --> 00:50:22,079

sitting High atop the fence on that one

1269

00:50:27,290 --> 00:50:25,380

dangling both legs on both sides

1270

00:50:29,329 --> 00:50:27,300

don't think that's possible one leg on

1271

00:50:32,270 --> 00:50:29,339

either side I guess is how that would

1272

00:50:34,309 --> 00:50:32,280

work oh yeah yeah but yeah I don't I

1273

00:50:35,809 --> 00:50:34,319

don't know is Dan Burr still alive why

1274

00:50:37,030 --> 00:50:35,819

why aren't people asking him these

1275

00:50:39,170 --> 00:50:37,040

questions

1276

00:50:41,150 --> 00:50:39,180

but it certainly was something that I

1277

00:50:42,950 --> 00:50:41,160

encountered that that story in the

1278

00:50:44,930 --> 00:50:42,960

earlier days of when I was first in this

1279

00:50:47,690 --> 00:50:44,940

subject and it you know it sounded so

1280

00:50:49,430 --> 00:50:47,700

incredible but then it did fall apart

1281

00:50:51,829 --> 00:50:49,440

the sort of more you look into it so

1282

00:50:54,470 --> 00:50:51,839

yeah and with many things there could be

1283

00:50:56,990 --> 00:50:54,480

elements of Truth sure and and there's

1284

00:50:59,089 --> 00:50:57,000

obviously there's no doubt that many

1285

00:51:02,089 --> 00:50:59,099

things are intentionally

1286

00:51:03,530 --> 00:51:02,099

muddied uh the rendersham case was one

1287

00:51:05,870 --> 00:51:03,540

of those you know they try to take

1288

00:51:07,970 --> 00:51:05,880

everybody's account and just mix them

1289

00:51:11,089 --> 00:51:07,980

all up so nobody had the right date and

1290

00:51:13,790 --> 00:51:11,099

time for anything and and they they did

1291

00:51:15,650 --> 00:51:13,800

that intentionally they being the ones

1292

00:51:17,870 --> 00:51:15,660

who have always known about this and

1293

00:51:20,210 --> 00:51:17,880

have taken great measures to cover it up

1294

00:51:21,710 --> 00:51:20,220

and confuse us and to keep it out of the

1295

00:51:24,049 --> 00:51:21,720

the mainstream

1296

00:51:25,670 --> 00:51:24,059

cultural Zeitgeist of any of these

1297

00:51:28,250 --> 00:51:25,680

various periods so that that could have

1298

00:51:30,589 --> 00:51:28,260

happened with the burish case too

1299

00:51:31,970 --> 00:51:30,599

um it just you never know we're not in a

1300

00:51:35,450 --> 00:51:31,980

place where we can really say anything

1301

00:51:37,430 --> 00:51:35,460

for sure right now yeah absolutely I've

1302

00:51:39,530 --> 00:51:37,440

got a question here from Jason he asks

1303

00:51:41,930 --> 00:51:39,540

if Dr Masters was tapped to join a team

1304

00:51:43,609 --> 00:51:41,940

of time traveling scientists where would

1305

00:51:48,170 --> 00:51:43,619

he go what would he want to learn and

1306

00:51:55,250 --> 00:51:50,930

um I actually would want to go to the

1307

00:51:58,490 --> 00:51:55,260

future if I was taken aboard one of

1308

00:51:59,990 --> 00:51:58,500

these alleged time machines

1309

00:52:01,549 --> 00:52:00,000

um just to know I mean I wouldn't have

1310

00:52:02,990 --> 00:52:01,559

to do anything wouldn't have to run any

1311

00:52:04,609 --> 00:52:03,000

experiments I could just go to the

1312

00:52:06,589 --> 00:52:04,619

Future after they already did all of

1313

00:52:08,990 --> 00:52:06,599

that and be like case what about this

1314

00:52:10,430 --> 00:52:09,000

what will happen there you know is there

1315

00:52:12,890 --> 00:52:10,440

a god what's the beginning of the

1316

00:52:15,890 --> 00:52:12,900

universe what's the meaning of life

1317

00:52:18,410 --> 00:52:15,900

are we in a simulation you know how's

1318

00:52:19,970 --> 00:52:18,420

the hive mind Consciousness work how do

1319

00:52:22,910 --> 00:52:19,980

you do that you know like all these

1320

00:52:24,770 --> 00:52:22,920

things that I would love to know about

1321

00:52:26,030 --> 00:52:24,780

um that you can't know from going

1322

00:52:28,130 --> 00:52:26,040

backward

1323

00:52:30,530 --> 00:52:28,140

but with that said I mean that was a big

1324

00:52:33,890 --> 00:52:30,540

part about writing this most recent book

1325

00:52:34,970 --> 00:52:33,900

which actually goes to uh be formatted

1326

00:52:37,250 --> 00:52:34,980

tomorrow

1327

00:52:40,730 --> 00:52:37,260

which is kind of exciting and would be

1328

00:52:43,670 --> 00:52:40,740

out June 1st I think or slightly after

1329

00:52:45,650 --> 00:52:43,680

that was a big part of it for me that's

1330

00:52:47,690 --> 00:52:45,660

what kind of started it along with

1331

00:52:50,630 --> 00:52:47,700

Michael Murphy's what about sex

1332

00:52:52,730 --> 00:52:50,640

question is is where would I go what

1333

00:52:55,430 --> 00:52:52,740

would I be interested and I could kind

1334

00:52:58,069 --> 00:52:55,440

of put myself in the mindset of these

1335

00:53:00,710 --> 00:52:58,079

Time Travelers who come back from the

1336

00:53:02,089 --> 00:53:00,720

future pick me up go to the Past you

1337

00:53:03,829 --> 00:53:02,099

know where where are we going what are

1338

00:53:05,450 --> 00:53:03,839

we doing who are we encountering what

1339

00:53:08,270 --> 00:53:05,460

are we doing with them

1340

00:53:11,030 --> 00:53:08,280

um what are we learning from them so

1341

00:53:14,270 --> 00:53:11,040

yeah if that I mean I I wrote

1342

00:53:16,670 --> 00:53:14,280

you know a 350 page book answering that

1343

00:53:19,309 --> 00:53:16,680

very question that should be out in a

1344

00:53:20,690 --> 00:53:19,319

couple weeks fantastic but listen Before

1345

00:53:22,250 --> 00:53:20,700

I Let You Go if you could just tell us

1346

00:53:23,690 --> 00:53:22,260

about any future projects that you might

1347

00:53:27,230 --> 00:53:23,700

be working on or anything that you think

1348

00:53:30,109 --> 00:53:27,240

you'd like to you know to bring up

1349

00:53:32,690 --> 00:53:30,119

um yeah I don't know I mean just uh

1350

00:53:35,030 --> 00:53:32,700

getting this last book out

1351
00:53:38,690 --> 00:53:35,040
um a couple conferences we'll be giving

1352
00:53:42,950 --> 00:53:38,700
a talk in Phoenix next weekend part of a

1353
00:53:46,430 --> 00:53:42,960
mu fun event down there uh the main

1354
00:53:48,530 --> 00:53:46,440
muffon Symposium in August

1355
00:53:52,430 --> 00:53:48,540
um doing a couple documentary things

1356
00:53:55,609 --> 00:53:52,440
various TV things from time to time

1357
00:53:57,589 --> 00:53:55,619
yeah that's about it just um you know

1358
00:54:00,290 --> 00:53:57,599
talking to good folks like you and

1359
00:54:01,549 --> 00:54:00,300
having conversations with with good

1360
00:54:04,730 --> 00:54:01,559
people with

1361
00:54:07,190 --> 00:54:04,740
a lot of questions like we all have so

1362
00:54:09,530 --> 00:54:07,200
that's about it really nah it's much

1363
00:54:10,970 --> 00:54:09,540

appreciated I know everyone there loves

1364

00:54:13,069 --> 00:54:10,980

listening to what you've got to say and

1365

00:54:14,930 --> 00:54:13,079

uh I do too and I really want to thank

1366

00:54:16,670 --> 00:54:14,940

you for coming on today it's always

1367

00:54:17,930 --> 00:54:16,680

really fascinating So yeah thank you

1368

00:54:19,910 --> 00:54:17,940

thank you Vinnie it's always great

1369

00:54:21,349 --> 00:54:19,920

talking to you as well thanks and

1370

00:54:23,150 --> 00:54:21,359

everyone that's in the live chat thank

1371

00:54:25,670 --> 00:54:23,160

you so much you've all been a really

1372

00:54:27,710 --> 00:54:25,680

calm cool collected as always and I

1373

00:54:29,690 --> 00:54:27,720

really do appreciate that I'm gonna be

1374

00:54:31,490 --> 00:54:29,700

back next week where Katie Howland will

1375

00:54:34,130 --> 00:54:31,500

be returning to co-host and we'll be

1376

00:54:36,290 --> 00:54:34,140

talking with veteran ufologist Alan

1377

00:54:39,589 --> 00:54:36,300

Green Greenfield I'm gonna get that

1378

00:54:41,630 --> 00:54:39,599

wrong now yeah sorry uh yeah guys see
