

1
00:00:06,230 --> 00:00:03,830
well the whole story began last tuesday

2
00:00:07,829 --> 00:00:06,240
when we were flying in a vampire night

3
00:00:09,350 --> 00:00:07,839
fighter over kent

4
00:00:11,589 --> 00:00:09,360
and uh

5
00:00:14,870 --> 00:00:11,599
twenty thousand feet and i first cited

6
00:00:17,750 --> 00:00:14,880
this object the first sighting was of a

7
00:00:19,830 --> 00:00:17,760
tiny pinpoint of bright light

8
00:00:22,790 --> 00:00:19,840
my first impression was that it was a

9
00:00:24,550 --> 00:00:22,800
star shining through the overcast

10
00:00:26,870 --> 00:00:24,560
and uh i looked around see if there were

11
00:00:29,029 --> 00:00:26,880
any more stars obviously the branch

12
00:00:32,150 --> 00:00:29,039
and i continued washing this thing and

13
00:00:34,950 --> 00:00:32,160

for about 15 to 20 seconds it remains

14

00:00:37,110 --> 00:00:34,960

stationary neither moving left or right

15

00:00:37,990 --> 00:00:37,120

um after this

16

00:00:39,830 --> 00:00:38,000

time

17

00:00:40,549 --> 00:00:39,840

the thing obviously was moving towards

18

00:00:42,310 --> 00:00:40,559

us

19

00:00:44,630 --> 00:00:42,320

and before i reached the overhead

20

00:00:45,670 --> 00:00:44,640

position i nudged my navigator right off

21

00:00:47,990 --> 00:00:45,680

the smile

22

00:00:49,190 --> 00:00:48,000

to have a look up

23

00:00:50,150 --> 00:00:49,200

by the time it got to the overhead

24

00:00:52,150 --> 00:00:50,160

position

25

00:00:53,750 --> 00:00:52,160

it appeared to be moving at quite a fast

26

00:00:54,869 --> 00:00:53,760

fantastic speed

27

00:00:56,709 --> 00:00:54,879

and uh

28

00:00:58,470 --> 00:00:56,719

my impression of it more as a

29

00:01:00,950 --> 00:00:58,480

photographic impression

30

00:01:02,229 --> 00:01:00,960

uh was of a round

31

00:01:03,750 --> 00:01:02,239

object

32

00:01:05,429 --> 00:01:03,760

uh quite a

33

00:01:08,070 --> 00:01:05,439

distinct outline

34

00:01:09,350 --> 00:01:08,080

still with the same intense light with a

35

00:01:11,510 --> 00:01:09,360

maximum light

36

00:01:13,030 --> 00:01:11,520

uh around or towards the periphery of

37

00:01:15,350 --> 00:01:13,040

the circle

38

00:01:17,190 --> 00:01:15,360

not quite so intense in the center

39

00:01:18,710 --> 00:01:17,200

the size

40

00:01:21,429 --> 00:01:18,720

uh the only thing i can compare it with

41

00:01:23,590 --> 00:01:21,439

is the sun or the moon and i had said

42

00:01:26,070 --> 00:01:23,600

that the size was approximately half to

43

00:01:28,310 --> 00:01:26,080

three quarters of the size of the moon

44

00:01:30,149 --> 00:01:28,320

and it's tight well there again i

45

00:01:31,350 --> 00:01:30,159

haven't anything to

46

00:01:33,830 --> 00:01:31,360

compare

47

00:01:35,109 --> 00:01:33,840

it with there's no cloud on that there

48

00:01:36,550 --> 00:01:35,119

no there's no cloud at all the

49

00:01:38,230 --> 00:01:36,560

visibility was around 100 miles from

50

00:01:39,749 --> 00:01:38,240

where we were we could actually see the

51
00:01:42,310 --> 00:01:39,759
other side of the island point and what

52
00:01:43,910 --> 00:01:42,320
about its speed

53
00:01:47,270 --> 00:01:43,920
well i can't give anything occasional

54
00:01:49,670 --> 00:01:47,280
speed as i can't give a true um idea of

55
00:01:52,069 --> 00:01:49,680
the height the thing is i can say that

56
00:01:55,270 --> 00:01:52,079
the impression was of an object very

57
00:01:57,590 --> 00:01:55,280
much higher above us and

58
00:01:59,749 --> 00:01:57,600
therefore depending on height would

59
00:02:01,350 --> 00:01:59,759
depend on the speed but truly has a very

60
00:02:03,990 --> 00:02:01,360
fantastic speed

61
00:02:05,510 --> 00:02:04,000
in roughly the opposite direction

62
00:02:07,990 --> 00:02:05,520
thank you very much

63
00:02:10,150 --> 00:02:08,000

so trying off the smile can we have your

64

00:02:11,990 --> 00:02:10,160

side of the story

65

00:02:14,070 --> 00:02:12,000

well i was rather busy at the time and i

66

00:02:15,270 --> 00:02:14,080

didn't see anything until the pilot told

67

00:02:17,270 --> 00:02:15,280

me to

68

00:02:19,110 --> 00:02:17,280

look up

69

00:02:20,710 --> 00:02:19,120

when i looked up i saw this bright

70

00:02:22,390 --> 00:02:20,720

object almost immediately in the head

71

00:02:24,949 --> 00:02:22,400

going in the opposite direction quite

72

00:02:26,869 --> 00:02:24,959

fantastic speed

73

00:02:29,110 --> 00:02:26,879

and could it have been

74

00:02:31,430 --> 00:02:29,120

any sort of meteorological

75

00:02:33,430 --> 00:02:31,440

instrument or balloon

76

00:02:35,350 --> 00:02:33,440

in your opinion

77

00:02:37,430 --> 00:02:35,360

but i don't think so we've gone into

78

00:02:39,670 --> 00:02:37,440

this business we've argued

79

00:02:41,350 --> 00:02:39,680

out amongst ourselves and we

80

00:02:44,070 --> 00:02:41,360

we haven't yet arrived at any anything

81

00:02:45,430 --> 00:02:44,080

conclusive we didn't think it was a met

82

00:02:46,550 --> 00:02:45,440

balloon we didn't think it was another

83

00:02:48,470 --> 00:02:46,560

aircraft

84

00:02:50,949 --> 00:02:48,480

they're pretty used to seeing those i've

85

00:02:56,070 --> 00:02:53,030

yeah so what about your

86

00:02:57,670 --> 00:02:56,080

conclusions you say you've drawn none um

87

00:02:59,270 --> 00:02:57,680

what did you think about this whole

88

00:03:02,149 --> 00:02:59,280

flying saucer

89

00:03:03,270 --> 00:03:02,159

story before you before you came across

90

00:03:05,990 --> 00:03:03,280

this one

91

00:03:08,309 --> 00:03:06,000

for this event well after this this time

92

00:03:10,309 --> 00:03:08,319

i i was a confirmed skeptic but now i
