

1
00:00:03,830 --> 00:00:01,829
we were flying along in a 20-inch

2
00:00:06,070 --> 00:00:03,840
apartment very much like this one now

3
00:00:07,909 --> 00:00:06,080
we're coming south through florida and

4
00:00:09,190 --> 00:00:07,919
uh we're just about the same altitude

5
00:00:10,390 --> 00:00:09,200
about a thousand feet above the ground

6
00:00:11,830 --> 00:00:10,400
which suddenly one of the men in the

7
00:00:13,990 --> 00:00:11,840
back of the airplane reported that we

8
00:00:16,070 --> 00:00:14,000
had a bright light coming down toward

9
00:00:18,070 --> 00:00:16,080
the aircraft behind us the closer it

10
00:00:19,590 --> 00:00:18,080
came the more it looked like a disc

11
00:00:21,750 --> 00:00:19,600
instead of just a light it was a

12
00:00:24,390 --> 00:00:21,760
disreflecting sunlight and it came from

13
00:00:26,550 --> 00:00:24,400

behind us over here and came rushing up

14

00:00:29,109 --> 00:00:26,560

and then suddenly a dome and passed

15

00:00:31,189 --> 00:00:29,119

beneath the airplane so we're looking

16

00:00:33,110 --> 00:00:31,199

down and there goes this thing along the

17

00:00:35,910 --> 00:00:33,120

ground and we can see the shadow of the

18

00:00:39,590 --> 00:00:35,920

b25 we had a wingspan of about 72 feet

19

00:00:41,350 --> 00:00:39,600

this thing was twice as wide as a b-25

20

00:00:42,950 --> 00:00:41,360

and we could see its shadow clear as it

21

00:00:44,630 --> 00:00:42,960

fell on the ground there we were right

22

00:00:46,389 --> 00:00:44,640

after it

23

00:00:48,229 --> 00:00:46,399

we said let's try and pull up alongside

24

00:00:50,069 --> 00:00:48,239

see what the hell this thing is

25

00:00:52,229 --> 00:00:50,079

the closer we came to it the bar pulled

26
00:00:54,869 --> 00:00:52,239
away from us we called patrick air force

27
00:00:57,270 --> 00:00:54,879
base with the radar tracking he picked

28
00:00:59,029 --> 00:00:57,280
up two targets us and the disc and

29
00:01:00,950 --> 00:00:59,039
finally that sucker just took off at

30
00:01:03,110 --> 00:01:00,960
about four thousand miles an hour and we

31
00:01:05,270 --> 00:01:03,120
were trying to catch it we pulled up

32
00:01:10,870 --> 00:01:05,280
went down went around

33
00:01:15,190 --> 00:01:13,510
what was it i don't know i'd like to

34
00:01:17,830 --> 00:01:15,200
know what it was because i've been

35
00:01:19,990 --> 00:01:17,840
flying for 52 years i'm flying over

36
00:01:21,590 --> 00:01:20,000
oceans deserts mounds seen all kinds of
