

1
00:00:05,749 --> 00:00:03,290
evidence like this these are the actual

2
00:00:07,670 --> 00:00:05,759
holes as you know a UFO landed on a

3
00:00:08,830 --> 00:00:07,680
highway down there there were four all

4
00:00:11,930 --> 00:00:08,840
together

5
00:00:14,390 --> 00:00:11,940
correct uh took a bit burned how does

6
00:00:16,550 --> 00:00:14,400
this rank as evidence Dr McDonald

7
00:00:19,310 --> 00:00:16,560
well of course uh physical evidence is

8
00:00:21,529 --> 00:00:19,320
how to adjust the excuse me just the

9
00:00:23,330 --> 00:00:21,539
sort of thing that um my scientific

10
00:00:26,390 --> 00:00:23,340
colleagues and I too are looking for all

11
00:00:29,029 --> 00:00:26,400
the time uh anecdotal data subjective

12
00:00:31,429 --> 00:00:29,039
observations are of great interest and

13
00:00:33,590 --> 00:00:31,439

pertinent but uh physical evidence is

14

00:00:37,190 --> 00:00:33,600

badly needed and there is more of this

15

00:00:39,470 --> 00:00:37,200

than most persons would realize and most

16

00:00:42,049 --> 00:00:39,480

scientists would realize there are quite

17

00:00:43,910 --> 00:00:42,059

a range of magnetic uh effects

18

00:00:45,709 --> 00:00:43,920

magnetographs have been driven off scale

19

00:00:47,630 --> 00:00:45,719

cut watches have been stopped Compass is

20

00:00:50,090 --> 00:00:47,640

Disturbed ships compasses radio

21

00:00:54,529 --> 00:00:50,100

compasses and so on great many cases of

22

00:00:56,750 --> 00:00:54,539

uh disturbance of uh car engines cars

23

00:00:58,670 --> 00:00:56,760

have been stopped I suppose that there

24

00:01:01,130 --> 00:00:58,680

must be 100 to 150 rather well

25

00:01:03,229 --> 00:01:01,140

authenticated cases of cars stopped

26
00:01:05,390 --> 00:01:03,239
there have been power disturbances on

27
00:01:07,310 --> 00:01:05,400
small systems and large coincident with

28
00:01:08,810 --> 00:01:07,320
this doesn't prove it that it's cause

29
00:01:11,570 --> 00:01:08,820
and effect but there are too many

30
00:01:13,910 --> 00:01:11,580
instances of malfunctions and

31
00:01:16,789 --> 00:01:13,920
disturbances of Power Systems coincident

32
00:01:19,190 --> 00:01:16,799
with objects of an unconventional nature

33
00:01:20,570 --> 00:01:19,200
in the vicinity to ignore that category

34
00:01:23,690 --> 00:01:20,580
of data so there really is a much better

35
00:01:25,249 --> 00:01:23,700
broader range of effects than many

36
00:01:27,469 --> 00:01:25,259
persons are aware of and I've been

37
00:01:30,469 --> 00:01:27,479
attempting to check into every one of

38
00:01:31,910 --> 00:01:30,479

these as best I can I don't know how

39

00:01:34,730 --> 00:01:31,920

important for instance are photographs

40

00:01:36,350 --> 00:01:34,740

photographs are potentially very

41

00:01:39,109 --> 00:01:36,360

important but there are many more hoax

42

00:01:41,450 --> 00:01:39,119

photos than there are genuine photos

43

00:01:44,870 --> 00:01:41,460

unfortunately you can sell a photo and

44

00:01:48,170 --> 00:01:44,880

that possibility opens the the doors to

45

00:01:49,550 --> 00:01:48,180

fraud and Fabrication and icap has done

46

00:01:50,690 --> 00:01:49,560

a great deal of checking on this as have

47

00:01:52,210 --> 00:01:50,700

other groups and the University of

48

00:01:54,830 --> 00:01:52,220

Colorado is doing a lot of checking

49

00:01:56,569 --> 00:01:54,840

there are a few cases that really seem

50

00:01:59,210 --> 00:01:56,579

to stand very close scrutiny and one of

51
00:02:01,670 --> 00:01:59,220
these for example is the is the Heflin

52
00:02:04,490 --> 00:02:01,680
photos well now what is the attitude of

53
00:02:05,870 --> 00:02:04,500
science towards UFOs I mean uh is it

54
00:02:07,550 --> 00:02:05,880
beginning to change or is it still

55
00:02:09,169 --> 00:02:07,560
mostly skeptical oh it's it's beginning

56
00:02:10,850 --> 00:02:09,179
to change but it is still largely

57
00:02:12,650 --> 00:02:10,860
skeptical and it's it's quite

58
00:02:14,570 --> 00:02:12,660
understandable they have been assured

59
00:02:17,869 --> 00:02:14,580
that the problem has been looked at by

60
00:02:19,670 --> 00:02:17,879
official agencies and it is a problem in

61
00:02:22,369 --> 00:02:19,680
which the type of data is less than

62
00:02:24,949 --> 00:02:22,379
ideal to understate it it's largely

63
00:02:26,449 --> 00:02:24,959

reports subjective reports of witnesses

64

00:02:28,250 --> 00:02:26,459

but and this is the point I would

65

00:02:30,410 --> 00:02:28,260

emphasize after a year and a half study

66

00:02:32,089 --> 00:02:30,420

of the problem when you go to the

67

00:02:34,210 --> 00:02:32,099

Witnesses in many of these cases when

68

00:02:37,070 --> 00:02:34,220

you sort through there are so many

69

00:02:39,050 --> 00:02:37,080

examples of Highly credible Witnesses

70

00:02:40,670 --> 00:02:39,060

completely stable people of excellent

71

00:02:43,130 --> 00:02:40,680

reputation when you check around a bit

72

00:02:45,589 --> 00:02:43,140

who have seen utterly unconventional

73

00:02:49,009 --> 00:02:45,599

objects maneuvering at low or sometimes

74

00:02:51,770 --> 00:02:49,019

high altitude that to regard this as

75

00:02:53,509 --> 00:02:51,780

anything but a problem of considerable

76

00:02:56,210 --> 00:02:53,519

scientific importance I think will be to

77

00:02:58,910 --> 00:02:56,220

miss something that we've already missed

78

00:03:01,490 --> 00:02:58,920

far too long 20 years as a scientist I

79

00:03:04,729 --> 00:03:01,500

regarded as extremely urgent because

80

00:03:06,830 --> 00:03:04,739

here is a really unusual problem that is

81

00:03:07,910 --> 00:03:06,840

going unattended by the scientific

82

00:03:09,589 --> 00:03:07,920

Community throughout the world

83

00:03:11,990 --> 00:03:09,599

apparently the situation is no different

84

00:03:14,270 --> 00:03:12,000

in England Russia I've been in Australia

85

00:03:16,910 --> 00:03:14,280

recently and I think it's scientifically

86

00:03:19,670 --> 00:03:16,920

uh well almost scandalous that we're

87

00:03:21,290 --> 00:03:19,680

ignoring this long-standing problem in

88

00:03:23,630 --> 00:03:21,300

the way that we and scientific Community

89

00:03:25,970 --> 00:03:23,640

have ignored it well science doesn't

90

00:03:27,890 --> 00:03:25,980

want to sanctify it because it regards

91

00:03:29,270 --> 00:03:27,900

the evidence as not good scientific

92

00:03:31,850 --> 00:03:29,280

evidence so you have a vicious cycle

93

00:03:34,009 --> 00:03:31,860

that's uh not very common in science we

94

00:03:36,530 --> 00:03:34,019

don't usually move ahead in areas this

95

00:03:38,690 --> 00:03:36,540

way in science and so the problem is how

96

00:03:40,610 --> 00:03:38,700

to take an originally subjectively

97

00:03:43,250 --> 00:03:40,620

reported category of data of most

98

00:03:45,350 --> 00:03:43,260

unusual nature and convince scientists

99

00:03:46,550 --> 00:03:45,360

that they ought to take it seriously my

100

00:03:48,770 --> 00:03:46,560

effort has been to personally

101

00:03:51,170 --> 00:03:48,780

investigate cases check for example many

102

00:03:52,910 --> 00:03:51,180

nightcap cases and other cases here and

103

00:03:54,589 --> 00:03:52,920

in other parts of the world as best I

104

00:03:56,509 --> 00:03:54,599

can and some of them I feel I've done

105

00:03:59,330 --> 00:03:56,519

quite a thorough check and find out for

106

00:04:01,910 --> 00:03:59,340

myself whether the accounts are as

107

00:04:04,130 --> 00:04:01,920

provocative and as unusual as they seem
