

1
00:00:04,070 --> 00:00:01,910
well the most significant one to my mind

2
00:00:06,170 --> 00:00:04,080
was the very bright shining Spotlight

3
00:00:08,629 --> 00:00:06,180
Exotica Sports is all I could call it

4
00:00:10,910 --> 00:00:08,639
the two largest cylindrical objects

5
00:00:12,530 --> 00:00:10,920
appeared somewhat in the manner of say a

6
00:00:14,150 --> 00:00:12,540
large aircraft passing through a patch

7
00:00:16,070 --> 00:00:14,160
of moist air giving a short fat

8
00:00:17,750 --> 00:00:16,080
condensation Trail

9
00:00:19,430 --> 00:00:17,760
well there were no aircrafts that no

10
00:00:20,750 --> 00:00:19,440
aircraft there large enough that we

11
00:00:22,490 --> 00:00:20,760
could see to have caused anything like

12
00:00:23,870 --> 00:00:22,500
this and no other aircraft in the sky at

13
00:00:25,970 --> 00:00:23,880

that time in the direction we were

14

00:00:28,550 --> 00:00:25,980

looking these things were it's difficult

15

00:00:30,050 --> 00:00:28,560

to estimate their length I mean size of

16

00:00:31,310 --> 00:00:30,060

a battleship is being coated at me but

17

00:00:34,069 --> 00:00:31,320

since it was it's very difficult to get

18

00:00:36,049 --> 00:00:34,079

visual reference in this guy

19

00:00:37,729 --> 00:00:36,059

say the length is a GPO Tower or

20

00:00:40,729 --> 00:00:37,739

something like that and uh

21

00:00:43,010 --> 00:00:40,739

about a quarter as wide as they were

22

00:00:44,690 --> 00:00:43,020

long appears cylindrical I mean there

23

00:00:46,369 --> 00:00:44,700

have been explanations as to The Shining

24

00:00:48,410 --> 00:00:46,379

Light so Reflections off the Sun from an

25

00:00:49,970 --> 00:00:48,420

underside of an aircraft but most Parts

26
00:00:52,549 --> 00:00:49,980
have seen that sort of thing and it was

27
00:00:54,350 --> 00:00:52,559
Far Far brighter than that

28
00:00:56,810 --> 00:00:54,360
it certainly wasn't a star or a planet

29
00:00:59,029 --> 00:00:56,820
on our flight back we passed the same

30
00:01:01,729 --> 00:00:59,039
area of sky at about two hours later

31
00:01:03,590 --> 00:01:01,739
this was at 11 PM it was dark it was a

32
00:01:06,230 --> 00:01:03,600
perfectly clear night we had the

33
00:01:08,929 --> 00:01:06,240
aircraft weather radar on and we picked

34
00:01:10,670 --> 00:01:08,939
up some very definite returns very solid

35
00:01:11,750 --> 00:01:10,680
returns not there were no clouds in the

36
00:01:14,450 --> 00:01:11,760
sky so it couldn't have been a cloud

37
00:01:16,070 --> 00:01:14,460
return and we we picked these up at

38
00:01:18,770 --> 00:01:16,080

about 20 miles first and as we flew

39

00:01:20,630 --> 00:01:18,780

along our track we closed with these

40

00:01:21,950 --> 00:01:20,640

objects and we eventually passed them at

41

00:01:23,090 --> 00:01:21,960

about seven miles and yet we could see

42

00:01:25,130 --> 00:01:23,100

absolutely nothing

43

00:01:26,630 --> 00:01:25,140

we had very strong Returns on the radar

44

00:01:28,730 --> 00:01:26,640

from a distance of seven miles which is
