

The Lazar Tape ...
And Excerpts
From The
Government Bible

1
00:00:29,810 --> 00:00:22,849
right

2
00:00:29,820 --> 00:00:59,049
thank you

3
00:01:05,509 --> 00:01:03,110
hi I'm Bob Lazar during late 1988 and

4
00:01:07,670 --> 00:01:05,519
early 89 I worked on the propulsion

5
00:01:09,710 --> 00:01:07,680
systems of extraterrestrial vehicles for

6
00:01:11,630 --> 00:01:09,720
the United States government the

7
00:01:13,370 --> 00:01:11,640
hardware and Technology I was exposed to

8
00:01:15,350 --> 00:01:13,380
should be placed in the proper hands of

9
00:01:17,270 --> 00:01:15,360
the scientific community and it is the

10
00:01:19,070 --> 00:01:17,280
right of every person on Earth to know

11
00:01:21,289 --> 00:01:19,080
that there is physical evidence which

12
00:01:23,090 --> 00:01:21,299
proves that there is life elsewhere and

13
00:01:25,130 --> 00:01:23,100

that at least one form of that life has

14

00:01:26,929 --> 00:01:25,140

been here for those of you whose

15

00:01:31,450 --> 00:01:26,939

information about me is limited to this

16

00:01:31,460 --> 00:01:35,410

foreign

17

00:01:39,649 --> 00:01:38,450

physics and electronics technology I've

18

00:01:41,690 --> 00:01:39,659

worked in a number of scientific

19

00:01:43,609 --> 00:01:41,700

programs some of which require top

20

00:01:46,130 --> 00:01:43,619

secret and Above Top Secret security

21

00:01:49,370 --> 00:01:46,140

clearances of which the most easily

22

00:01:51,350 --> 00:01:49,380

verifiable is my early 1980s job here at

23

00:01:54,350 --> 00:01:51,360

the Los Alamos Maison physics facility

24

00:01:57,050 --> 00:01:54,360

in Los Alamos New Mexico

25

00:01:58,910 --> 00:01:57,060

between December of 88 and April of 89 I

26

00:02:00,289 --> 00:01:58,920

worked as a senior staff physicist in

27

00:02:02,749 --> 00:02:00,299

what has to be the most secret project

28

00:02:05,330 --> 00:02:02,759

in history my place of work was a

29

00:02:07,270 --> 00:02:05,340

facility at an area known as S4 on the

30

00:02:10,490 --> 00:02:07,280

Nellis Air Force range in central Nevada

31

00:02:13,309 --> 00:02:10,500

area S4 is located approximately 15

32

00:02:16,130 --> 00:02:13,319

miles south of the infamous Area 51

33

00:02:19,190 --> 00:02:16,140

installation at Groom Lake where the U2

34

00:02:21,410 --> 00:02:19,200

and SR-71 spy planes were developed for

35

00:02:24,229 --> 00:02:21,420

the duration of my employment at S4 I

36

00:02:26,030 --> 00:02:24,239

was paid by the United States Navy

37

00:02:27,589 --> 00:02:26,040

for the purpose of this video I'm going

38

00:02:29,690 --> 00:02:27,599

to segregate the information contained

39

00:02:30,949 --> 00:02:29,700

here into two separate parts

40

00:02:32,930 --> 00:02:30,959

the first part will deal with

41

00:02:35,449 --> 00:02:32,940

information with which I've had hands-on

42

00:02:37,309 --> 00:02:35,459

experience and personal instruction

43

00:02:39,050 --> 00:02:37,319

in other words not only did I read

44

00:02:41,210 --> 00:02:39,060

briefings and Not only was I taught the

45

00:02:42,890 --> 00:02:41,220

theories of these Technologies but they

46

00:02:45,410 --> 00:02:42,900

were demonstrated for me and I know they

47

00:02:48,650 --> 00:02:45,420

are true and accurate some of the points

48

00:02:50,990 --> 00:02:48,660

covered in this first section will be

49

00:02:52,550 --> 00:02:51,000

how vast distances of space are traveled

50

00:02:55,610 --> 00:02:52,560

by virtue of an intense gravitational

51
00:03:00,830 --> 00:02:57,470
how this gravitational field is

52
00:03:05,570 --> 00:03:02,630
what the power source is and how it

53
00:03:11,149 --> 00:03:07,850
and general information about disks and

54
00:03:14,930 --> 00:03:12,949
the second part of this will deal with

55
00:03:16,970 --> 00:03:14,940
subjects on which I've read supporting

56
00:03:18,530 --> 00:03:16,980
information yet for the most part I had

57
00:03:21,050 --> 00:03:18,540
no other way to corroborate the

58
00:03:23,570 --> 00:03:21,060
information or ascertain its accuracy

59
00:03:24,949 --> 00:03:23,580
when we get to part two it'll be obvious

60
00:03:27,470 --> 00:03:24,959
why proof of some of this information

61
00:03:28,970 --> 00:03:27,480
could not be conclusive some of the

62
00:03:30,770 --> 00:03:28,980
points covered in the second section

63
00:03:32,630 --> 00:03:30,780

will be

64

00:03:36,410 --> 00:03:32,640

information about the beings that

65

00:03:41,030 --> 00:03:38,330

and how these beings have historically

66

00:03:42,949 --> 00:03:41,040

interacted with man

67

00:03:44,509 --> 00:03:42,959

I've been prudent in selecting what to

68

00:03:46,009 --> 00:03:44,519

expose here and I think that some of

69

00:03:48,470 --> 00:03:46,019

this information should not be made

70

00:03:50,149 --> 00:03:48,480

available to the general public this

71

00:03:52,309 --> 00:03:50,159

information is being conveyed to you as

72

00:03:54,050 --> 00:03:52,319

it was to me with the exception that in

73

00:03:55,550 --> 00:03:54,060

most cases I've simplified things for

74

00:03:57,890 --> 00:03:55,560

those of you with non-scientific and

75

00:04:00,710 --> 00:03:57,900

non-technological backgrounds so let's

76

00:04:03,530 --> 00:04:02,449

at the beginning of this first section

77

00:04:05,270 --> 00:04:03,540

I'm going to give you three short

78

00:04:07,009 --> 00:04:05,280

science lessons and once you've learned

79

00:04:08,869 --> 00:04:07,019

them you'll not only know more about

80

00:04:10,550 --> 00:04:08,879

Interstellar travel than almost anyone

81

00:04:12,649 --> 00:04:10,560

else in the world but you'll know the

82

00:04:14,390 --> 00:04:12,659

actual method another civilization is

83

00:04:15,830 --> 00:04:14,400

used to travel from another star system

84

00:04:17,509 --> 00:04:15,840

to the planet Earth

85

00:04:19,129 --> 00:04:17,519

now during the course of this I'm going

86

00:04:21,590 --> 00:04:19,139

to have to relate information that I've

87

00:04:23,930 --> 00:04:21,600

learned at S4 the information that we're

88

00:04:25,909 --> 00:04:23,940

already aware of and when I say we I

89

00:04:28,189 --> 00:04:25,919

mean the general mainstream scientific

90

00:04:30,830 --> 00:04:28,199

community so it's not to waste too much

91

00:04:33,050 --> 00:04:30,840

time explaining a stable scientific

92

00:04:35,150 --> 00:04:33,060

facts and theories when I say we know

93

00:04:36,890 --> 00:04:35,160

this or we know that please feel free to

94

00:04:39,110 --> 00:04:36,900

consult any qualified scientist

95

00:04:41,390 --> 00:04:39,120

Professor or science teacher to have

96

00:04:43,249 --> 00:04:41,400

them explain my statements to you

97

00:04:45,770 --> 00:04:43,259

one of the most predominantly asked

98

00:04:48,230 --> 00:04:45,780

questions is how is it possible to cross

99

00:04:50,210 --> 00:04:48,240

vast expanses of space without exceeding

100

00:04:52,310 --> 00:04:50,220

the speed of light

101
00:04:54,230 --> 00:04:52,320
or how can you travel in reasonable time

102
00:04:55,490 --> 00:04:54,240
in economy between points that are light

103
00:04:57,469 --> 00:04:55,500
years apart

104
00:05:01,070 --> 00:04:57,479
now keep in mind that the speed of light

105
00:05:03,249 --> 00:05:01,080
is 186 000 miles a second which

106
00:05:07,430 --> 00:05:03,259
translates into roughly

107
00:05:09,770 --> 00:05:07,440
669 million miles an hour

108
00:05:12,230 --> 00:05:09,780
and a light year is a distance traveled

109
00:05:14,810 --> 00:05:12,240
in one year at the speed of light

110
00:05:17,150 --> 00:05:14,820
Proxima centuri which is the star system

111
00:05:19,550 --> 00:05:17,160
nearest ours would take four years to

112
00:05:22,370 --> 00:05:19,560
reach traveling at the speed of light

113
00:05:24,050 --> 00:05:22,380

so up until now when we've examined the

114

00:05:25,610 --> 00:05:24,060

requirements to travel these distances

115

00:05:27,170 --> 00:05:25,620

we've always had to consider the

116

00:05:29,450 --> 00:05:27,180

problems of traveling at a speed near

117

00:05:31,490 --> 00:05:29,460

the speed of light this poses problems

118

00:05:33,770 --> 00:05:31,500

with propulsion navigation fuel

119

00:05:36,050 --> 00:05:33,780

capacities and even when you consider

120

00:05:38,629 --> 00:05:36,060

the effects of acceleration on space

121

00:05:41,270 --> 00:05:38,639

time which include time dilation Mass

122

00:05:43,969 --> 00:05:41,280

increase Lane contraction and a whole

123

00:05:46,129 --> 00:05:43,979

host of other things it quickly becomes

124

00:05:48,350 --> 00:05:46,139

evident that this type of travel would

125

00:05:50,810 --> 00:05:48,360

require a level of technology that man

126

00:05:53,090 --> 00:05:50,820

has not yet achieved the truth of the

127

00:05:55,610 --> 00:05:53,100

matter is that traveling these distances

128

00:05:57,770 --> 00:05:55,620

does require a level of technology that

129

00:05:59,390 --> 00:05:57,780

man has not yet achieved but it has

130

00:06:01,969 --> 00:05:59,400

nothing to do with flying in a linear

131

00:06:03,350 --> 00:06:01,979

mode near the speed of light

132

00:06:05,570 --> 00:06:03,360

we know that the shortest distance

133

00:06:07,370 --> 00:06:05,580

between two points is a straight line so

134

00:06:09,230 --> 00:06:07,380

in our universe we've always assumed

135

00:06:11,029 --> 00:06:09,240

that the fastest way from point A to B

136

00:06:12,110 --> 00:06:11,039

was to travel in a straight line at the

137

00:06:13,790 --> 00:06:12,120

speed of light

138

00:06:15,469 --> 00:06:13,800

well the fact is that when you're

139

00:06:17,450 --> 00:06:15,479

dealing with space-time and you enjoy

140

00:06:19,969 --> 00:06:17,460

the capability of generating an intense

141

00:06:22,129 --> 00:06:19,979

gravitational field the fastest way from

142

00:06:24,230 --> 00:06:22,139

point A to B is to distort or warp or

143

00:06:26,090 --> 00:06:24,240

bend the space-time between point A and

144

00:06:28,189 --> 00:06:26,100

B bringing point A and B closer together

145

00:06:30,050 --> 00:06:28,199

the more intense the gravitational field

146

00:06:31,550 --> 00:06:30,060

the greater the Distortion of space-time

147

00:06:33,110 --> 00:06:31,560

and the shorter the distance between

148

00:06:35,689 --> 00:06:33,120

points A and B

149

00:06:37,790 --> 00:06:35,699

most of us think of space-time as the

150

00:06:39,529 --> 00:06:37,800

void or as nothing and remember it

151
00:06:41,090 --> 00:06:39,539
wasn't that long ago that man considered

152
00:06:43,909 --> 00:06:41,100
the air in her atmosphere to be nothing

153
00:06:45,650 --> 00:06:43,919
yet with time we've become aware of the

154
00:06:48,770 --> 00:06:45,660
elements and properties of the urinary

155
00:06:50,930 --> 00:06:48,780
atmosphere well indeed space-time is an

156
00:06:53,029 --> 00:06:50,940
entity and one of its properties is that

157
00:06:54,710 --> 00:06:53,039
it can be distorted or bent by a

158
00:06:56,930 --> 00:06:54,720
gravitational field

159
00:06:58,909 --> 00:06:56,940
we know that gravity bends or distorts

160
00:07:00,950 --> 00:06:58,919
space time and Light by virtue of the

161
00:07:02,390 --> 00:07:00,960
fact that we're able to see stars which

162
00:07:03,770 --> 00:07:02,400
we know should be blocked from our view

163
00:07:06,770 --> 00:07:03,780

by the Sun

164

00:07:08,629 --> 00:07:06,780

referring to the graphic here the solid

165

00:07:10,850 --> 00:07:08,639

line denotes the position of a star

166

00:07:13,370 --> 00:07:10,860

that's located behind the sun and the

167

00:07:14,570 --> 00:07:13,380

dotted line shows its position as viewed

168

00:07:16,850 --> 00:07:14,580

from Earth

169

00:07:18,590 --> 00:07:16,860

this is made possible because the sun's

170

00:07:20,150 --> 00:07:18,600

gravitational field distorts the

171

00:07:22,129 --> 00:07:20,160

space-time and light around the Sun

172

00:07:23,990 --> 00:07:22,139

allowing us to view Stars which should

173

00:07:26,089 --> 00:07:24,000

be hidden from View

174

00:07:28,129 --> 00:07:26,099

we know that gravity distorts Time by

175

00:07:31,129 --> 00:07:28,139

virtue of the fact that if we take two

176
00:07:32,930 --> 00:07:31,139
identical atomic clocks and keep one at

177
00:07:34,969 --> 00:07:32,940
sea level and take the other one up to a

178
00:07:37,010 --> 00:07:34,979
high altitude when we bring them both

179
00:07:38,510 --> 00:07:37,020
back together they reflect different

180
00:07:40,490 --> 00:07:38,520
times

181
00:07:42,050 --> 00:07:40,500
the difference in this passage of time

182
00:07:43,850 --> 00:07:42,060
is caused by the fact that a

183
00:07:45,770 --> 00:07:43,860
gravitational field weakens the further

184
00:07:47,150 --> 00:07:45,780
you get from the source so the atomic

185
00:07:49,309 --> 00:07:47,160
clock which was taken to the High

186
00:07:51,529 --> 00:07:49,319
Altitude was exposed to a less powerful

187
00:07:53,270 --> 00:07:51,539
gravitational field than the clock which

188
00:07:55,490 --> 00:07:53,280

we kept at sea level

189

00:07:57,290 --> 00:07:55,500

the effect of a gravitational feel on

190

00:07:59,749 --> 00:07:57,300

space time is something that we've been

191

00:08:01,969 --> 00:07:59,759

able to observe but not to experiment

192

00:08:04,189 --> 00:08:01,979

with this is due to our inability to

193

00:08:06,110 --> 00:08:04,199

generate a gravitational field and up

194

00:08:08,390 --> 00:08:06,120

until this point in time great Mass such

195

00:08:10,129 --> 00:08:08,400

as a star planet or moon was the only

196

00:08:12,409 --> 00:08:10,139

source of a discernible gravitational

197

00:08:14,270 --> 00:08:12,419

field that we're aware of

198

00:08:16,070 --> 00:08:14,280

so just as the gravitational field

199

00:08:18,230 --> 00:08:16,080

around great Mass such as a planet

200

00:08:20,330 --> 00:08:18,240

distorts space and time any

201

00:08:23,210 --> 00:08:20,340

gravitational field whether naturally

202

00:08:25,490 --> 00:08:23,220

occurring or generated distort space and

203

00:08:27,469 --> 00:08:25,500

time in a similar manner now the great

204

00:08:29,749 --> 00:08:27,479

benefit of generating an intense

205

00:08:32,449 --> 00:08:29,759

gravitational field is not only can you

206

00:08:34,370 --> 00:08:32,459

turn it on but you can turn it off

207

00:08:36,949 --> 00:08:34,380

if we refer back to our original

208

00:08:38,630 --> 00:08:36,959

illustration of space-time Distortion we

209

00:08:41,029 --> 00:08:38,640

can see that when we generate an intense

210

00:08:42,829 --> 00:08:41,039

gravitational field we can distort the

211

00:08:44,630 --> 00:08:42,839

space time and in turn the distance

212

00:08:46,490 --> 00:08:44,640

between the point where we are and the

213

00:08:48,290 --> 00:08:46,500

point where we want to be we can then

214

00:08:50,389 --> 00:08:48,300

position ourselves at the point where we

215

00:08:52,910 --> 00:08:50,399

want to be and then stop generating the

216

00:08:57,050 --> 00:08:52,920

gravitational field allowing space time

217

00:09:00,949 --> 00:08:58,910

in this manner we can travel great

218

00:09:03,290 --> 00:09:00,959

distances with little linear movement

219

00:09:05,750 --> 00:09:03,300

and this is how space-time Distortion

220

00:09:08,269 --> 00:09:05,760

translates into reduced distance

221

00:09:10,490 --> 00:09:08,279

now back to our original question how is

222

00:09:12,290 --> 00:09:10,500

it possible to cross the vast expanses

223

00:09:14,210 --> 00:09:12,300

of space required for Interstellar

224

00:09:16,910 --> 00:09:14,220

travel without exceeding the speed of

225

00:09:18,910 --> 00:09:16,920

light this is accomplished by generating

226

00:09:21,350 --> 00:09:18,920

an intense gravitational field

227

00:09:23,509 --> 00:09:21,360

distorting space-time and allowing you

228

00:09:25,910 --> 00:09:23,519

to cross many light years of space in

229

00:09:28,850 --> 00:09:25,920

little or no time and without traveling

230

00:09:30,590 --> 00:09:28,860

in a linear mode near the speed of light

231

00:09:33,050 --> 00:09:30,600

the next question is how do you generate

232

00:09:34,670 --> 00:09:33,060

a gravitational field up until this

233

00:09:36,710 --> 00:09:34,680

point in time I've used the term

234

00:09:38,570 --> 00:09:36,720

generate to describe the capability of

235

00:09:40,130 --> 00:09:38,580

producing a gravitational field but

236

00:09:41,630 --> 00:09:40,140

since I'm not aware of any way of

237

00:09:43,970 --> 00:09:41,640

creating a gravitational field from

238

00:09:46,370 --> 00:09:43,980

nothing a more accurate term might be to

239

00:09:48,050 --> 00:09:46,380

access and amplify a gravitational field

240

00:09:50,329 --> 00:09:48,060

and this is what I mean when I use the

241

00:09:52,670 --> 00:09:50,339

term generate to understand how gravity

242

00:09:54,889 --> 00:09:52,680

is generated or accessed and Amplified

243

00:09:57,470 --> 00:09:54,899

you must first know what gravity is

244

00:09:59,449 --> 00:09:57,480

there are two main theories the wave

245

00:10:01,790 --> 00:09:59,459

theory which states that gravity is a

246

00:10:04,430 --> 00:10:01,800

wave and the currently accepted theory

247

00:10:07,130 --> 00:10:04,440

of gravitons which are alleged subatomic

248

00:10:10,550 --> 00:10:07,140

particles that perform as gravity which

249

00:10:12,410 --> 00:10:10,560

is total nonsense well gravity is a wave

250

00:10:15,889 --> 00:10:12,420

and there are two specific different

251
00:10:18,710 --> 00:10:15,899
types of gravity gravity a and gravity B

252
00:10:21,350 --> 00:10:18,720
gravity a works on a smaller micro scale

253
00:10:22,970 --> 00:10:21,360
while gravity B works on a larger macro

254
00:10:25,310 --> 00:10:22,980
scale

255
00:10:27,230 --> 00:10:25,320
we are familiar with gravity B it is the

256
00:10:28,910 --> 00:10:27,240
big gravity wave that holds the Earth as

257
00:10:30,530 --> 00:10:28,920
well as the rest of the planets in orbit

258
00:10:32,389 --> 00:10:30,540
around the Sun and holds the moon as

259
00:10:34,310 --> 00:10:32,399
well as man-made satellites in orbit

260
00:10:37,250 --> 00:10:34,320
around the Earth

261
00:10:39,230 --> 00:10:37,260
we're not familiar with gravity a it is

262
00:10:41,030 --> 00:10:39,240
a small gravity wave which is the major

263
00:10:43,130 --> 00:10:41,040

contributory force that holds together

264

00:10:45,889 --> 00:10:43,140

the mass that makes up all protons and

265

00:10:47,870 --> 00:10:45,899

neutrons gravity a is what is currently

266

00:10:49,850 --> 00:10:47,880

being labeled as the strong nuclear

267

00:10:51,710 --> 00:10:49,860

force in mainstream physics and gravity

268

00:10:54,050 --> 00:10:51,720

a is the wave that you need to access

269

00:10:56,210 --> 00:10:54,060

and amplify in it to enable you to cause

270

00:10:57,949 --> 00:10:56,220

space-time Distortion for Interstellar

271

00:10:59,810 --> 00:10:57,959

travel

272

00:11:03,110 --> 00:10:59,820

to keep them straight just remember that

273

00:11:05,150 --> 00:11:03,120

gravity a works on an atomic scale and

274

00:11:07,490 --> 00:11:05,160

gravity B is the big gravity wave that

275

00:11:09,530 --> 00:11:07,500

works on a stellar or planetary level

276

00:11:11,269 --> 00:11:09,540

however don't mistake the size of these

277

00:11:13,970 --> 00:11:11,279

waves for their strength because gravity

278

00:11:16,370 --> 00:11:13,980

a is a much stronger force in gravity B

279

00:11:18,350 --> 00:11:16,380

you can momentarily break the gravity B

280

00:11:19,550 --> 00:11:18,360

field of the earth simply by jumping in

281

00:11:21,470 --> 00:11:19,560

the air

282

00:11:23,030 --> 00:11:21,480

so this is not an intense gravitational

283

00:11:25,370 --> 00:11:23,040

field

284

00:11:27,710 --> 00:11:25,380

locating gravity a is no problem because

285

00:11:29,690 --> 00:11:27,720

it is found in the nucleus of every atom

286

00:11:33,170 --> 00:11:29,700

of all matter here on Earth and all

287

00:11:35,569 --> 00:11:33,180

matter anywhere else in our universe

288

00:11:37,190 --> 00:11:35,579

however accessing gravity a with the

289

00:11:39,590 --> 00:11:37,200

naturally occurring elements found on

290

00:11:41,329 --> 00:11:39,600

Earth is a big problem actually I'm not

291

00:11:43,370 --> 00:11:41,339

aware of any way of accessing the

292

00:11:45,170 --> 00:11:43,380

gravity a-wave using any Earth elements

293

00:11:48,530 --> 00:11:45,180

whether naturally occurring or

294

00:11:50,630 --> 00:11:48,540

synthesized and here's why

295

00:11:52,430 --> 00:11:50,640

we've already learned that gravity a is

296

00:11:54,410 --> 00:11:52,440

the major force that holds together the

297

00:11:57,050 --> 00:11:54,420

mass that makes up protons and neutrons

298

00:11:58,430 --> 00:11:57,060

this means the gravity a wave we are

299

00:12:00,949 --> 00:11:58,440

trying to access is virtually

300

00:12:02,810 --> 00:12:00,959

inaccessible as it is located within

301
00:12:04,970 --> 00:12:02,820
matter or at least within the matter

302
00:12:06,829 --> 00:12:04,980
that we have here on Earth

303
00:12:08,930 --> 00:12:06,839
however the Earth is not representative

304
00:12:10,790 --> 00:12:08,940
of all matter within our universe the

305
00:12:12,530 --> 00:12:10,800
residual matter which remains after the

306
00:12:14,269 --> 00:12:12,540
creation of a solar system is totally

307
00:12:15,769 --> 00:12:14,279
dependent on the contributing factors

308
00:12:17,690 --> 00:12:15,779
which were present during the creation

309
00:12:19,370 --> 00:12:17,700
of the solar system

310
00:12:20,930 --> 00:12:19,380
this is true whether you believe that

311
00:12:23,030 --> 00:12:20,940
the origin of the universe was an

312
00:12:25,610 --> 00:12:23,040
evolutionary event or that a Supreme

313
00:12:27,650 --> 00:12:25,620

Being caused this event to happen

314

00:12:29,870 --> 00:12:27,660

the two main factors which determine

315

00:12:31,850 --> 00:12:29,880

what residual matter remains after the

316

00:12:34,069 --> 00:12:31,860

creation of a solar system are the

317

00:12:36,230 --> 00:12:34,079

amount of electromagnetic energy and the

318

00:12:38,569 --> 00:12:36,240

amount of mass present during the Solar

319

00:12:40,850 --> 00:12:38,579

System's creation

320

00:12:42,710 --> 00:12:40,860

our solar system has one star which is

321

00:12:44,509 --> 00:12:42,720

our sun but the majority of solar

322

00:12:47,449 --> 00:12:44,519

systems in our Milky Way galaxy are

323

00:12:49,550 --> 00:12:47,459

binary and multiple star systems in fact

324

00:12:51,170 --> 00:12:49,560

many single star systems have stars that

325

00:12:54,590 --> 00:12:51,180

are so large that our sun would appear

326

00:12:56,629 --> 00:12:54,600

to be a dwarf by comparison

327

00:12:58,850 --> 00:12:56,639

keeping all this in mind it should be

328

00:13:01,069 --> 00:12:58,860

obvious that a large single star system

329

00:13:02,990 --> 00:13:01,079

binary star system or multiple star

330

00:13:05,150 --> 00:13:03,000

system would have had more of the

331

00:13:07,490 --> 00:13:05,160

prerequisite mass and electromagnetic

332

00:13:09,769 --> 00:13:07,500

energy present during their creations

333

00:13:11,509 --> 00:13:09,779

this makes it possible for these systems

334

00:13:13,610 --> 00:13:11,519

to possess Elements which are not native

335

00:13:15,410 --> 00:13:13,620

to the earth scientists have long

336

00:13:17,389 --> 00:13:15,420

theorized that there are potential

337

00:13:19,310 --> 00:13:17,399

combinations of protons and neutrons

338

00:13:21,230 --> 00:13:19,320

which should provide stable elements

339

00:13:23,389 --> 00:13:21,240

with atomic numbers higher than any

340

00:13:24,889 --> 00:13:23,399

which appear in our Periodic Chart

341

00:13:26,690 --> 00:13:24,899

though none of these heavy elements

342

00:13:28,910 --> 00:13:26,700

occur naturally on Earth

343

00:13:30,829 --> 00:13:28,920

88 of the first 92 elements on the

344

00:13:33,350 --> 00:13:30,839

periodic chart occur naturally on Earth

345

00:13:34,850 --> 00:13:33,360

some heavy elements do occur in Trace

346

00:13:36,590 --> 00:13:34,860

Amounts but for the most part we

347

00:13:38,569 --> 00:13:36,600

synthesize these heavier elements in

348

00:13:40,250 --> 00:13:38,579

Laboratories generally speaking the

349

00:13:42,050 --> 00:13:40,260

stability of these synthesized heavy

350

00:13:44,210 --> 00:13:42,060

elements decreases as their atomic

351
00:13:46,129 --> 00:13:44,220
number increases but experiments the lab

352
00:13:47,990 --> 00:13:46,139
for heavy ion research in Germany have

353
00:13:49,730 --> 00:13:48,000
shown that this may only be true up to a

354
00:13:51,590 --> 00:13:49,740
certain point as the half-life for

355
00:13:55,790 --> 00:13:51,600
element 109 is longer than that of

356
00:13:59,930 --> 00:13:57,769
the point is that our observations and

357
00:14:02,090 --> 00:13:59,940
theories are accurate the fact is that

358
00:14:03,829 --> 00:14:02,100
heavier stable elements with higher

359
00:14:05,750 --> 00:14:03,839
atomic numbers which have more protons

360
00:14:08,629 --> 00:14:05,760
neutrons and electrons than any Earth

361
00:14:10,310 --> 00:14:08,639
elements do exist however up until this

362
00:14:12,590 --> 00:14:10,320
point in history there has been no

363
00:14:14,629 --> 00:14:12,600

physical evidence to prove this but now

364

00:14:16,550 --> 00:14:14,639

that proof is here

365

00:14:18,230 --> 00:14:16,560

the most important attribute of these

366

00:14:20,329 --> 00:14:18,240

heavier stable elements is that the

367

00:14:22,069 --> 00:14:20,339

gravity a wave is so abundant that it

368

00:14:24,710 --> 00:14:22,079

actually extends past the perimeter of

369

00:14:26,629 --> 00:14:24,720

the atom these heavier stable elements

370

00:14:28,730 --> 00:14:26,639

literally have their own gravity a field

371

00:14:33,290 --> 00:14:28,740

around them in addition to the gravity B

372

00:14:37,490 --> 00:14:35,449

no naturally occurring atoms on earth

373

00:14:39,769 --> 00:14:37,500

have enough protons and neutrons for the

374

00:14:41,329 --> 00:14:39,779

cumulative gravity a wave to extend past

375

00:14:42,530 --> 00:14:41,339

the perimeter of the atom so you can

376

00:14:44,509 --> 00:14:42,540

access it

377

00:14:47,030 --> 00:14:44,519

even though the distance that the

378

00:14:50,090 --> 00:14:47,040

gravity a wave extends is infinitesimal

379

00:14:52,430 --> 00:14:50,100

it is accessible and it has amplitude

380

00:14:53,990 --> 00:14:52,440

wavelength and frequency just like any

381

00:14:55,129 --> 00:14:54,000

other wave in the electromagnetic

382

00:14:57,530 --> 00:14:55,139

spectrum

383

00:15:00,290 --> 00:14:57,540

once you can access the gravity a wave

384

00:15:03,350 --> 00:15:00,300

you can amplify it just like we amplify

385

00:15:05,329 --> 00:15:03,360

any other electromagnetic wave

386

00:15:07,850 --> 00:15:05,339

to demonstrate how a wave is Amplified

387

00:15:09,769 --> 00:15:07,860

we can use this oscilloscope and as you

388

00:15:11,569 --> 00:15:09,779

can see it graphically depicts the tone

389

00:15:13,850 --> 00:15:11,579

you hear as a wave

390

00:15:15,650 --> 00:15:13,860

as we amplify the tone you can see that

391

00:15:17,990 --> 00:15:15,660

the size or the amplitude of the wave

392

00:15:20,449 --> 00:15:18,000

increases giving us a more powerful

393

00:15:29,750 --> 00:15:20,459

version of the same identical wave and

394

00:15:34,490 --> 00:15:32,329

in like manner the gravity a wave is

395

00:15:36,230 --> 00:15:34,500

Amplified and then focused on the

396

00:15:38,210 --> 00:15:36,240

desired destination to cause the

397

00:15:39,110 --> 00:15:38,220

space-time Distortion required for space

398

00:15:41,990 --> 00:15:39,120

travel

399

00:15:43,910 --> 00:15:42,000

this Amplified gravity a wave is so

400

00:15:46,129 --> 00:15:43,920

powerful that the only naturally

401
00:15:47,750 --> 00:15:46,139
occurring source of gravity that could

402
00:15:50,210 --> 00:15:47,760
cause space-time to distort this much

403
00:15:52,430 --> 00:15:50,220
would be a black hole this brings us

404
00:15:54,530 --> 00:15:52,440
back to our original question how do you

405
00:15:57,110 --> 00:15:54,540
generate a gravitational field

406
00:15:59,449 --> 00:15:57,120
you must have access to an element which

407
00:16:01,550 --> 00:15:59,459
is heavy enough for the gravity a wave

408
00:16:04,069 --> 00:16:01,560
to extend past the perimeter of the atom

409
00:16:07,009 --> 00:16:04,079
then you can access and amplify it for

410
00:16:08,990 --> 00:16:07,019
space-time distortion

411
00:16:11,030 --> 00:16:09,000
to complete our three science lessons

412
00:16:14,569 --> 00:16:11,040
the last question is what is the power

413
00:16:18,470 --> 00:16:16,250

well for those of you with limited

414

00:16:20,090 --> 00:16:18,480

knowledge about power sources I'm sure

415

00:16:21,889 --> 00:16:20,100

you can probably imagine the enormous

416

00:16:23,629 --> 00:16:21,899

amount of power required to cause a

417

00:16:26,569 --> 00:16:23,639

space-time Distortion for this type of

418

00:16:29,210 --> 00:16:26,579

travel after all we're amplifying a wave

419

00:16:31,189 --> 00:16:29,220

that barely extends past the perimeter

420

00:16:33,829 --> 00:16:31,199

of an atom until it's large enough to

421

00:16:35,449 --> 00:16:33,839

distort vast amounts of space-time

422

00:16:37,670 --> 00:16:35,459

for those of you with extensive

423

00:16:39,829 --> 00:16:37,680

knowledge about power sources I'm sure

424

00:16:41,509 --> 00:16:39,839

it's probably even more puzzling as to

425

00:16:43,910 --> 00:16:41,519

how it's possible to have a compact

426

00:16:46,129 --> 00:16:43,920

lightweight onboard power source that

427

00:16:47,870 --> 00:16:46,139

can provide this much power for everyone

428

00:16:49,790 --> 00:16:47,880

to understand that I need to further

429

00:16:52,730 --> 00:16:49,800

explain a couple of things we briefly

430

00:16:54,410 --> 00:16:52,740

touched upon in the last question if you

431

00:16:56,990 --> 00:16:54,420

remember I said that for the most part

432

00:16:58,910 --> 00:16:57,000

we synthesize or create heavier elements

433

00:17:00,829 --> 00:16:58,920

in accelerators and their stability

434

00:17:04,370 --> 00:17:00,839

decreases as their atomic number

435

00:17:06,409 --> 00:17:04,380

increases so what does this all mean

436

00:17:08,630 --> 00:17:06,419

well we synthesize these heavier

437

00:17:10,370 --> 00:17:08,640

unstable elements by using more stable

438

00:17:12,409 --> 00:17:10,380

elements as Targets in a particle

439

00:17:14,150 --> 00:17:12,419

accelerator we then bombard the target

440

00:17:16,130 --> 00:17:14,160

element with various Atomic and

441

00:17:18,110 --> 00:17:16,140

subatomic particles at this point

442

00:17:20,809 --> 00:17:18,120

transmutation occurs making the target

443

00:17:22,549 --> 00:17:20,819

element a different heavier element this

444

00:17:24,829 --> 00:17:22,559

element now has a higher atomic number

445

00:17:26,689 --> 00:17:24,839

as the atomic number simply indicates

446

00:17:28,610 --> 00:17:26,699

the number of protons in the nucleus of

447

00:17:32,090 --> 00:17:28,620

the atom so this is what I mean when I

448

00:17:35,270 --> 00:17:32,100

say their atomic number increases

449

00:17:36,890 --> 00:17:35,280

what does their stability decreases mean

450

00:17:39,289 --> 00:17:36,900

the length of time which an element

451
00:17:42,110 --> 00:17:39,299
exists before it decays determines its

452
00:17:43,909 --> 00:17:42,120
stability atoms of some elements Decay

453
00:17:45,770 --> 00:17:43,919
faster than atoms of other elements So

454
00:17:47,690 --> 00:17:45,780
the faster an element decays the more

455
00:17:48,470 --> 00:17:47,700
unstable that element is considered to

456
00:17:50,510 --> 00:17:48,480
be

457
00:17:52,789 --> 00:17:50,520
when an atom decays it releases or

458
00:17:54,529 --> 00:17:52,799
radiates subatomic particles and energy

459
00:17:56,990 --> 00:17:54,539
which is the radiation that a geiger

460
00:17:58,430 --> 00:17:57,000
counter detects as you can see this

461
00:18:00,529 --> 00:17:58,440
geiger counter is detecting the

462
00:18:02,270 --> 00:18:00,539
radiation from this uranium which

463
00:18:04,250 --> 00:18:02,280

literally means that the geiger counter

464

00:18:06,529 --> 00:18:04,260

is sensing the subatomic particles which

465

00:18:09,830 --> 00:18:06,539

are being released or radiated as the

466

00:18:13,850 --> 00:18:11,690

those elements in which nuclear

467

00:18:16,970 --> 00:18:13,860

radiation can be consistently detected

468

00:18:19,010 --> 00:18:16,980

are radioactive elements these heavy

469

00:18:20,930 --> 00:18:19,020

Elements which we synthesize in particle

470

00:18:23,810 --> 00:18:20,940

accelerators are of the radioactive

471

00:18:25,370 --> 00:18:23,820

variety and they Decay very rapidly

472

00:18:27,230 --> 00:18:25,380

since we're only able to make a few

473

00:18:29,510 --> 00:18:27,240

atoms of these elements and because they

474

00:18:31,730 --> 00:18:29,520

Decay so rapidly we're not able to

475

00:18:33,230 --> 00:18:31,740

observe much about them this is what I

476

00:18:36,650 --> 00:18:33,240

mean when I say their stability

477

00:18:38,870 --> 00:18:36,660

decreases however there are elements

478

00:18:40,850 --> 00:18:38,880

with higher atomic numbers which are

479

00:18:42,770 --> 00:18:40,860

stable even though they don't occur

480

00:18:45,529 --> 00:18:42,780

naturally on Earth and we can't

481

00:18:48,350 --> 00:18:45,539

synthesize them in particle accelerators

482

00:18:50,390 --> 00:18:48,360

these are the elements in the 114 115

483

00:18:53,029 --> 00:18:50,400

range which don't appear on a periodic

484

00:18:55,070 --> 00:18:53,039

chart Beyond Element 115 the elements

485

00:18:57,529 --> 00:18:55,080

become unstable again and in fact

486

00:18:58,310 --> 00:18:57,539

element 116 decays in fractions of a

487

00:18:59,990 --> 00:18:58,320

second

488

00:19:01,730 --> 00:19:00,000

this finally brings us to the power

489

00:19:09,110 --> 00:19:01,740

source

490

00:19:14,330 --> 00:19:12,169

in this reactor Element 115 is used as a

491

00:19:16,190 --> 00:19:14,340

Target and is bombarded with protons in

492

00:19:18,710 --> 00:19:16,200

a small particle accelerator

493

00:19:21,470 --> 00:19:18,720

when a proton plugs into the nucleus of

494

00:19:22,970 --> 00:19:21,480

an atom of 115 it increases its atomic

495

00:19:26,330 --> 00:19:22,980

number and becomes an atom of element

496

00:19:29,390 --> 00:19:26,340

116 which remember decays instantly

497

00:19:32,150 --> 00:19:29,400

what element 116 release is as it decays

498

00:19:34,789 --> 00:19:32,160

or what it radiates is any matter

499

00:19:37,250 --> 00:19:34,799

what is antimatter any matter is the

500

00:19:39,110 --> 00:19:37,260

exact counterpart of matter which has a

501
00:19:40,850 --> 00:19:39,120
charge and a spin that is in the

502
00:19:42,470 --> 00:19:40,860
opposite of all matter

503
00:19:44,450 --> 00:19:42,480
when combined with any matter in our

504
00:19:46,669 --> 00:19:44,460
universe any matter reacts and

505
00:19:48,470 --> 00:19:46,679
completely converts to energy and

506
00:19:50,450 --> 00:19:48,480
remember the rapid conversion of matter

507
00:19:52,789 --> 00:19:50,460
to energy is what we generally call an

508
00:19:54,950 --> 00:19:52,799
explosion to demonstrate the explosive

509
00:19:56,750 --> 00:19:54,960
power of antimatter let's pick a random

510
00:19:59,750 --> 00:19:56,760
area where an atomic bomb might explode

511
00:20:01,909 --> 00:19:59,760
oh let's say Iraq

512
00:20:03,529 --> 00:20:01,919
and for demonstration purposes let's say

513
00:20:07,850 --> 00:20:03,539

an atomic bomb would explode for

514

00:20:09,950 --> 00:20:07,860

instance in uh oh Baghdad

515

00:20:12,350 --> 00:20:09,960

well if one of our older atomic bombs

516

00:20:14,270 --> 00:20:12,360

exploded in Baghdad the area of total

517

00:20:15,590 --> 00:20:14,280

devastation which is indicated by the

518

00:20:17,930 --> 00:20:15,600

Red Dot on the map would be

519

00:20:19,730 --> 00:20:17,940

approximately two miles this would be

520

00:20:21,350 --> 00:20:19,740

caused by a fission reaction in which

521

00:20:24,409 --> 00:20:21,360

less than one percent of the nuclear

522

00:20:26,029 --> 00:20:24,419

material is converted to energy

523

00:20:27,890 --> 00:20:26,039

most of you are familiar with the bombs

524

00:20:29,870 --> 00:20:27,900

that were dropped on Japan in World War

525

00:20:34,669 --> 00:20:29,880

ll this is the same bomb that was

526

00:20:37,190 --> 00:20:34,679

dropped on Nagasaki August 9 1945.

527

00:20:38,330 --> 00:20:37,200

about the same time Dr Edward Teller

528

00:20:40,370 --> 00:20:38,340

who's known as the father of the

529

00:20:42,770 --> 00:20:40,380

hydrogen bomb figured out that a nuclear

530

00:20:44,570 --> 00:20:42,780

fusion bomb was possible Fusion would

531

00:20:46,190 --> 00:20:44,580

release even more energy and cause an

532

00:20:48,529 --> 00:20:46,200

even bigger explosion from the same

533

00:20:50,870 --> 00:20:48,539

amount of nuclear material much to Dr

534

00:20:52,730 --> 00:20:50,880

teller's dismay the Japanese surrendered

535

00:20:54,470 --> 00:20:52,740

we never dropped the hydrogen bomb and

536

00:20:56,510 --> 00:20:54,480

Dr Teller has been in a bad mood ever

537

00:20:58,610 --> 00:20:56,520

since

538

00:21:00,409 --> 00:20:58,620

but if a hydrogen bomb containing the

539

00:21:02,750 --> 00:21:00,419

same amount of nuclear material as the

540

00:21:05,150 --> 00:21:02,760

Nagasaki bomb were to explode in Baghdad

541

00:21:07,549 --> 00:21:05,160

the area of total devastation would be

542

00:21:09,470 --> 00:21:07,559

approximately 20 miles this would be

543

00:21:11,690 --> 00:21:09,480

caused by a nuclear fusion reaction

544

00:21:13,730 --> 00:21:11,700

which again less than one percent of the

545

00:21:16,549 --> 00:21:13,740

nuclear material actually converts to

546

00:21:19,310 --> 00:21:16,559

energy or explodes

547

00:21:21,169 --> 00:21:19,320

the other 99 of the nuclear material on

548

00:21:22,850 --> 00:21:21,179

this type of bomb is dispersed but is

549

00:21:25,370 --> 00:21:22,860

not involved in the actual nuclear

550

00:21:27,409 --> 00:21:25,380

fusion reaction

551
00:21:29,149 --> 00:21:27,419
now if a bomb was made with the same

552
00:21:31,310 --> 00:21:29,159
amount of nuclear material as the

553
00:21:33,890 --> 00:21:31,320
Nagasaki bomb and that material was

554
00:21:36,289 --> 00:21:33,900
antimatter when that bomb exploded in

555
00:21:38,570 --> 00:21:36,299
Baghdad the area of total devastation

556
00:21:40,850 --> 00:21:38,580
would include parts of Africa Europe and

557
00:21:42,950 --> 00:21:40,860
Asia with the exact area of total

558
00:21:44,990 --> 00:21:42,960
devastation being very difficult to

559
00:21:46,789 --> 00:21:45,000
calculate

560
00:21:48,590 --> 00:21:46,799
this would be caused by a total

561
00:21:50,270 --> 00:21:48,600
Annihilation reaction which is the

562
00:21:52,370 --> 00:21:50,280
complete conversion of matter to energy

563
00:21:54,110 --> 00:21:52,380

a hundred percent of the nuclear

564

00:21:55,490 --> 00:21:54,120

material on this bomb would explode or

565

00:21:57,529 --> 00:21:55,500

convert to energy

566

00:21:59,210 --> 00:21:57,539

we currently have no practical way to

567

00:22:01,250 --> 00:21:59,220

harness any matter into a bomb and

568

00:22:03,770 --> 00:22:01,260

generally speaking we can only isolate

569

00:22:05,510 --> 00:22:03,780

any matter in a particle accelerator and

570

00:22:07,730 --> 00:22:05,520

store it for a short time

571

00:22:09,350 --> 00:22:07,740

this demonstrates the enormous amount of

572

00:22:11,330 --> 00:22:09,360

Power released when you totally convert

573

00:22:14,810 --> 00:22:11,340

matter to energy which is what happens

574

00:22:17,090 --> 00:22:14,820

when any matter and matter are combined

575

00:22:19,730 --> 00:22:17,100

so back to our power source inside the

576

00:22:22,070 --> 00:22:19,740

reactor Element 115 is bombarded with a

577

00:22:24,590 --> 00:22:22,080

proton which plugs into the nucleus of

578

00:22:26,930 --> 00:22:24,600

the 115 atom and becomes element 116

579

00:22:29,450 --> 00:22:26,940

which immediately decays and releases or

580

00:22:31,909 --> 00:22:29,460

radiates small amounts of antimatter the

581

00:22:33,470 --> 00:22:31,919

antimatter is released in a vacuum into

582

00:22:35,270 --> 00:22:33,480

a tuned tube which keeps it from

583

00:22:37,370 --> 00:22:35,280

reacting with a matter that surrounds it

584

00:22:39,529 --> 00:22:37,380

it is then directed towards a gaseous

585

00:22:41,029 --> 00:22:39,539

matter Target at the end of the tube the

586

00:22:42,830 --> 00:22:41,039

matter in any matter Collide and

587

00:22:45,049 --> 00:22:42,840

annihilate totally converting to energy

588

00:22:46,970 --> 00:22:45,059

the heat from this reaction is converted

589

00:22:48,770 --> 00:22:46,980

into electrical energy in a near 100

590

00:22:51,230 --> 00:22:48,780

percent efficient thermoelectric

591

00:22:52,990 --> 00:22:51,240

generator this is a device that converts

592

00:22:55,730 --> 00:22:53,000

heat directly into electrical energy

593

00:22:57,529 --> 00:22:55,740

many of our satellites and space probes

594

00:23:00,890 --> 00:22:57,539

use thermoelectric generators but their

595

00:23:02,810 --> 00:23:00,900

efficiency is very very low

596

00:23:04,610 --> 00:23:02,820

all of these actions and reactions

597

00:23:07,070 --> 00:23:04,620

inside of the reactor are orchestrated

598

00:23:08,810 --> 00:23:07,080

perfectly like a tiny little ballet and

599

00:23:11,210 --> 00:23:08,820

in this manner the reactor provides an

600

00:23:13,190 --> 00:23:11,220

enormous amount of power so back to our

601
00:23:15,110 --> 00:23:13,200
original question what is the power

602
00:23:16,789 --> 00:23:15,120
source that provides the power required

603
00:23:19,549 --> 00:23:16,799
for this type of travel

604
00:23:22,610 --> 00:23:19,559
the power source is a reactor which uses

605
00:23:24,350 --> 00:23:22,620
Element 115 as a fuel and uses a total

606
00:23:26,330 --> 00:23:24,360
Annihilation reaction to provide the

607
00:23:28,430 --> 00:23:26,340
heat which it converts to energy

608
00:23:31,010 --> 00:23:28,440
making it a compact lightweight

609
00:23:32,510 --> 00:23:31,020
efficient onboard power source I've got

610
00:23:34,610 --> 00:23:32,520
a couple of quick comments about Element

611
00:23:36,890 --> 00:23:34,620
115 for those of you who are interested

612
00:23:39,529 --> 00:23:36,900
by virtue of the way it's used in the

613
00:23:42,289 --> 00:23:39,539

reactor it depletes very slowly and only

614

00:23:44,149 --> 00:23:42,299

223 grams of 115 which is just under

615

00:23:45,890 --> 00:23:44,159

half a pound can be utilized for a

616

00:23:49,070 --> 00:23:45,900

period of 20 to 30 years

617

00:23:51,350 --> 00:23:49,080

element 115's melting point is 1740

618

00:23:52,490 --> 00:23:51,360

degrees Celsius I need to State here

619

00:23:54,770 --> 00:23:52,500

that even though I had hands-on

620

00:23:57,049 --> 00:23:54,780

experience with element 115 I didn't

621

00:23:58,850 --> 00:23:57,059

melt any of it down and I didn't use any

622

00:24:00,649 --> 00:23:58,860

of it for 20 to 30 years to see if it

623

00:24:02,390 --> 00:24:00,659

depleted

624

00:24:04,909 --> 00:24:02,400

so we've learned how space-time is

625

00:24:07,070 --> 00:24:04,919

distorted by a gravitational field we've

626
00:24:09,230 --> 00:24:07,080
learned how that gravitational field is

627
00:24:11,029 --> 00:24:09,240
generated and we've also learned where

628
00:24:12,950 --> 00:24:11,039
you get the power to accomplish all of

629
00:24:14,930 --> 00:24:12,960
this

630
00:24:16,549 --> 00:24:14,940
now it's time to link all we've learned

631
00:24:19,010 --> 00:24:16,559
in our science lessons to the vehicle

632
00:24:20,510 --> 00:24:19,020
that utilizes all this technology and a

633
00:24:22,370 --> 00:24:20,520
few years ago I never thought I'd hear

634
00:24:24,409 --> 00:24:22,380
myself say this but that vehicle is a

635
00:24:26,630 --> 00:24:24,419
disc which is generally referred to as a

636
00:24:28,490 --> 00:24:26,640
flying saucer I had at least partial

637
00:24:30,529 --> 00:24:28,500
views of nine different discs out at

638
00:24:32,630 --> 00:24:30,539

area S4 but the one I'm going to

639

00:24:34,549 --> 00:24:32,640

describe to you now is the one in which

640

00:24:36,649 --> 00:24:34,559

I not only saw two of the three interior

641

00:24:38,149 --> 00:24:36,659

levels but I also saw it fully

642

00:24:40,909 --> 00:24:38,159

functional in flight

643

00:24:43,669 --> 00:24:40,919

and no unfortunately I didn't get to go

644

00:24:45,830 --> 00:24:43,679

for a ride in it

645

00:24:47,630 --> 00:24:45,840

this particular disc appeared to be in

646

00:24:49,190 --> 00:24:47,640

excellent condition and because of its

647

00:24:50,390 --> 00:24:49,200

Sleek appearance I nicknamed it the

648

00:24:55,190 --> 00:24:50,400

sport model

649

00:24:57,169 --> 00:24:55,200

and 40 feet in diameter the exterior

650

00:24:59,450 --> 00:24:57,179

skin of the disc is metal which is the

651
00:25:01,250 --> 00:24:59,460
color of unpolished stainless steel the

652
00:25:03,110 --> 00:25:01,260
sport model sits on its belly when it's

653
00:25:05,450 --> 00:25:03,120
not energized

654
00:25:07,250 --> 00:25:05,460
as you can see the hatch is located on

655
00:25:08,930 --> 00:25:07,260
the upper half of the disc with just the

656
00:25:11,690 --> 00:25:08,940
bottom portion of the door wrapping

657
00:25:13,730 --> 00:25:11,700
around the center lip of the disc

658
00:25:15,590 --> 00:25:13,740
the interior level of the disc is

659
00:25:17,450 --> 00:25:15,600
divided into three levels

660
00:25:19,669 --> 00:25:17,460
the lower level is where the three

661
00:25:21,830 --> 00:25:19,679
gravity amplifiers and amplifier guides

662
00:25:23,930 --> 00:25:21,840
are located these are the things used to

663
00:25:25,190 --> 00:25:23,940

amplify and focus the gravity a wave

664

00:25:26,330 --> 00:25:25,200

that we learned about in our science

665

00:25:28,789 --> 00:25:26,340

lessons

666

00:25:30,529 --> 00:25:28,799

the reactor is located directly above

667

00:25:32,269 --> 00:25:30,539

the three gravity amplifiers on the

668

00:25:34,310 --> 00:25:32,279

center level and is in fact centered

669

00:25:36,169 --> 00:25:34,320

between them

670

00:25:39,169 --> 00:25:36,179

the reactor is similar to this half

671

00:25:40,970 --> 00:25:39,179

scale model the element 115 is machined

672

00:25:43,310 --> 00:25:40,980

into triangles like this and is then

673

00:25:45,590 --> 00:25:43,320

inserted into the reactor this piece of

674

00:25:47,450 --> 00:25:45,600

element 115 is the source of the gravity

675

00:25:49,250 --> 00:25:47,460

a wave as well as the Target that is

676
00:25:51,110 --> 00:25:49,260
bombarded with protons to release the

677
00:25:54,350 --> 00:25:51,120
antimatter both of which we learned

678
00:25:56,330 --> 00:25:54,360
about in our science lessons

679
00:25:58,310 --> 00:25:56,340
the center level of this disc also

680
00:26:00,169 --> 00:25:58,320
houses the control consoles and seats

681
00:26:01,850 --> 00:26:00,179
both of which were too small and too low

682
00:26:03,950 --> 00:26:01,860
to the floor to be functional for adult

683
00:26:05,570 --> 00:26:03,960
human beings

684
00:26:07,669 --> 00:26:05,580
the walls of the center level are all

685
00:26:09,769 --> 00:26:07,679
divided into archways at one point in

686
00:26:11,750 --> 00:26:09,779
time when the disc was energized one of

687
00:26:13,549 --> 00:26:11,760
the archways became transparent and you

688
00:26:15,830 --> 00:26:13,559

could see the area outside of it just as

689

00:26:17,630 --> 00:26:15,840

if the archway was a window after the

690

00:26:19,730 --> 00:26:17,640

panel had been transparent for a while a

691

00:26:21,649 --> 00:26:19,740

form of writing which was unlike any

692

00:26:23,570 --> 00:26:21,659

alphabetic scientific or mathematical

693

00:26:25,549 --> 00:26:23,580

symbols I've ever seen began to appear

694

00:26:27,470 --> 00:26:25,559

on the transparent Archway and I was

695

00:26:29,330 --> 00:26:27,480

never informed as to how all of this was

696

00:26:32,690 --> 00:26:29,340

achieved not that any of that would have

697

00:26:36,769 --> 00:26:34,730

I was never given access to the upper

698

00:26:38,630 --> 00:26:36,779

level of the disk so I can Enlighten you

699

00:26:40,490 --> 00:26:38,640

as to what the porthole-like areas are

700

00:26:42,529 --> 00:26:40,500

other than I can assure you that they're

701
00:26:44,390 --> 00:26:42,539
not portholes

702
00:26:46,310 --> 00:26:44,400
now before I go any further about the

703
00:26:48,590 --> 00:26:46,320
disc I'm going to show you where and

704
00:26:50,990 --> 00:26:48,600
under what circumstances I saw it tested

705
00:26:53,149 --> 00:26:51,000
my job in this program was to be part of

706
00:26:54,830 --> 00:26:53,159
a back engineering team back engineering

707
00:26:56,450 --> 00:26:54,840
is the act of taking a finished product

708
00:26:58,430 --> 00:26:56,460
and tearing it apart to find out what

709
00:27:00,289 --> 00:26:58,440
makes it tick the goal in this program

710
00:27:03,769 --> 00:27:00,299
was to see if the technology of the disc

711
00:27:05,690 --> 00:27:03,779
could be duplicated with earth materials

712
00:27:08,510 --> 00:27:05,700
when I went to work I was flown from

713
00:27:10,789 --> 00:27:08,520

McCarran airport in Las Vegas to Area 51

714

00:27:13,610 --> 00:27:10,799

which is a highly secure government base

715

00:27:16,190 --> 00:27:13,620

on the Nevada Test Site Area 51 is

716

00:27:17,810 --> 00:27:16,200

located about 125 miles north of Las

717

00:27:20,930 --> 00:27:17,820

Vegas near the grew mountains in the

718

00:27:22,610 --> 00:27:20,940

groomed dry lake bed from Area 51 I was

719

00:27:25,130 --> 00:27:22,620

bus to an even more highly secure

720

00:27:28,789 --> 00:27:25,140

facility located about 15 miles south of

721

00:27:30,470 --> 00:27:28,799

Area 51 called S4 S4 is situated at the

722

00:27:33,169 --> 00:27:30,480

base of the papoose mountains by the

723

00:27:35,630 --> 00:27:33,179

papoose dry lake bed

724

00:27:37,610 --> 00:27:35,640

the airspace around S4 is restricted and

725

00:27:39,590 --> 00:27:37,620

if any unwelcome aircraft Strays into

726

00:27:41,750 --> 00:27:39,600

the outer sector they radio the pilot

727

00:27:43,549 --> 00:27:41,760

and instruct him or her to leave if that

728

00:27:45,470 --> 00:27:43,559

pilot continues and Strays into the

729

00:27:47,810 --> 00:27:45,480

middle sector Jets will be scrambled to

730

00:27:49,850 --> 00:27:47,820

escort the intruding aircraft out

731

00:27:51,409 --> 00:27:49,860

if for any reason whatsoever that

732

00:27:53,269 --> 00:27:51,419

aircraft penetrates into the inside

733

00:27:55,130 --> 00:27:53,279

sector before Jets can be airborne

734

00:27:56,990 --> 00:27:55,140

ground-to-air missiles will neutralize

735

00:27:59,090 --> 00:27:57,000

the intruder

736

00:28:01,130 --> 00:27:59,100

the moral of this story is don't try and

737

00:28:03,529 --> 00:28:01,140

fly into S4

738

00:28:05,210 --> 00:28:03,539

the S4 installation is built into the

739

00:28:08,029 --> 00:28:05,220

mountain and the nine Hangar doors are

740

00:28:09,830 --> 00:28:08,039

angled at about 60 degrees these doors

741

00:28:11,210 --> 00:28:09,840

are covered with a sand textured coating

742

00:28:13,490 --> 00:28:11,220

to blend in with the side of the

743

00:28:15,890 --> 00:28:13,500

mountain and the desert floor

744

00:28:18,049 --> 00:28:15,900

as you can see in this representation my

745

00:28:19,909 --> 00:28:18,059

ID badge had a white background with one

746

00:28:22,250 --> 00:28:19,919

light blue and one dark blue diagonal

747

00:28:23,570 --> 00:28:22,260

stripe in the upper left hand corner at

748

00:28:25,370 --> 00:28:23,580

the bottom of the badge there were

749

00:28:28,370 --> 00:28:25,380

letters and numbers designating various

750

00:28:30,950 --> 00:28:28,380

areas including S4 on my badge there was

751
00:28:32,750 --> 00:28:30,960
a star punch through S4 the back of the

752
00:28:36,649 --> 00:28:32,760
ID badge was dark blue with a vertical

753
00:28:40,250 --> 00:28:38,390
The Hanger that housed the sport model

754
00:28:42,049 --> 00:28:40,260
was like a typical airplane Hangar with

755
00:28:44,149 --> 00:28:42,059
the exception of the angled doors that I

756
00:28:45,830 --> 00:28:44,159
mentioned before the hanger was equipped

757
00:28:48,110 --> 00:28:45,840
with typical tools and extensive

758
00:28:49,909 --> 00:28:48,120
electronic equipment it also had a

759
00:28:51,590 --> 00:28:49,919
machine with an x-ray emblem on it and

760
00:28:53,990 --> 00:28:51,600
an overhead crane rated at twenty

761
00:28:56,390 --> 00:28:54,000
thousand pounds equipment in this Hangar

762
00:28:59,210 --> 00:28:56,400
was marked with a black number 41 with a

763
00:29:01,310 --> 00:28:59,220

white circle around it

764

00:29:03,890 --> 00:29:01,320

it was outside of this hanger that I saw

765

00:29:05,570 --> 00:29:03,900

the sport model tested now when the disc

766

00:29:07,789 --> 00:29:05,580

travels near another source of gravity

767

00:29:09,289 --> 00:29:07,799

such as a planet or Moon it doesn't use

768

00:29:11,450 --> 00:29:09,299

the same mode of travel that we've

769

00:29:13,130 --> 00:29:11,460

learned about in our science lessons

770

00:29:15,710 --> 00:29:13,140

when a disc is near another source of

771

00:29:17,510 --> 00:29:15,720

gravity like Earth the gravity a wave

772

00:29:20,090 --> 00:29:17,520

which propagates outward from the disc

773

00:29:21,710 --> 00:29:20,100

is Phase shifted into the gravity B wave

774

00:29:24,409 --> 00:29:21,720

which propagates outward from the earth

775

00:29:26,330 --> 00:29:24,419

and this creates lift the gravity

776

00:29:28,070 --> 00:29:26,340

amplifiers of the disc can be focused

777

00:29:30,529 --> 00:29:28,080

independently and they are pulsed and

778

00:29:32,090 --> 00:29:30,539

did not stay on continuously when all

779

00:29:33,529 --> 00:29:32,100

three of these amplifiers are being used

780

00:29:35,690 --> 00:29:33,539

for travel they're in the Delta

781

00:29:37,250 --> 00:29:35,700

configuration and when only one is being

782

00:29:39,830 --> 00:29:37,260

used for travel it's in the Omicron

783

00:29:41,450 --> 00:29:39,840

configuration as the intensity of the

784

00:29:43,909 --> 00:29:41,460

gravitational field around the disc

785

00:29:46,490 --> 00:29:43,919

increases the Distortion of space-time

786

00:29:48,230 --> 00:29:46,500

around the disc also increases and if

787

00:29:50,450 --> 00:29:48,240

you could see the space-time Distortion

788

00:29:52,610 --> 00:29:50,460

this is how it would look

789

00:29:54,590 --> 00:29:52,620

as you can see as the output of the

790

00:29:57,049 --> 00:29:54,600

gravitational field from the amplifiers

791

00:29:59,090 --> 00:29:57,059

becomes more intense the form of

792

00:30:01,909 --> 00:29:59,100

space-time around the disc not only

793

00:30:04,190 --> 00:30:01,919

bends upward but at maximum Distortion

794

00:30:07,010 --> 00:30:04,200

actually folds over into almost a heart

795

00:30:09,710 --> 00:30:07,020

shape around the top of the disk

796

00:30:12,590 --> 00:30:09,720

now remember this space-time Distortion

797

00:30:14,750 --> 00:30:12,600

is taking place 360 Degrees around the

798

00:30:17,210 --> 00:30:14,760

disc so if you're looking at the disc

799

00:30:20,750 --> 00:30:17,220

from the top the space-time Distortion

800

00:30:24,830 --> 00:30:22,909

when the gravitational field around the

801
00:30:26,570 --> 00:30:24,840
disc is so intense that the space-time

802
00:30:28,970 --> 00:30:26,580
Distortion around the disc achieves

803
00:30:31,190 --> 00:30:28,980
maximum Distortion and is folded up into

804
00:30:33,230 --> 00:30:31,200
this heart-shaped form the disc can't be

805
00:30:35,570 --> 00:30:33,240
seen from any vantage point and for all

806
00:30:37,190 --> 00:30:35,580
practical purposes is invisible all you

807
00:30:38,450 --> 00:30:37,200
could see would be the sky surrounding

808
00:30:41,210 --> 00:30:38,460
it

809
00:30:43,909 --> 00:30:41,220
the program out at area S4 consisted of

810
00:30:48,110 --> 00:30:43,919
three projects project Galileo project

811
00:30:50,149 --> 00:30:48,120
sidekick and project Looking Glass

812
00:30:52,070 --> 00:30:50,159
project Galileo dealt with gravity

813
00:30:53,630 --> 00:30:52,080

propulsion and was the source of all the

814

00:30:56,029 --> 00:30:53,640

information you've learned in this first

815

00:30:57,889 --> 00:30:56,039

section project sidekick dealt with a

816

00:30:59,570 --> 00:30:57,899

beam weapon that had a neutron source

817

00:31:01,610 --> 00:30:59,580

and was focused by a gravity lens

818

00:31:04,370 --> 00:31:01,620

project Looking Glass dealt with the

819

00:31:05,870 --> 00:31:04,380

physics of seeing back in time now I was

820

00:31:07,669 --> 00:31:05,880

not personally involved with the

821

00:31:09,830 --> 00:31:07,679

hardware of project sidekick or Looking

822

00:31:11,149 --> 00:31:09,840

Glass and those projects are beyond the

823

00:31:12,830 --> 00:31:11,159

scope of this video

824

00:31:14,210 --> 00:31:12,840

so this brings us to the end of this

825

00:31:16,490 --> 00:31:14,220

first part in which I'm presenting to

826

00:31:18,470 --> 00:31:16,500

you as fact

827

00:31:20,149 --> 00:31:18,480

at this point we begin our second part

828

00:31:21,409 --> 00:31:20,159

which is the section that contains what

829

00:31:22,370 --> 00:31:21,419

I call excerpts from the government

830

00:31:24,049 --> 00:31:22,380

Bible

831

00:31:26,029 --> 00:31:24,059

I call it that because as you can tell

832

00:31:27,470 --> 00:31:26,039

from part one there's a small segment of

833

00:31:29,389 --> 00:31:27,480

the United States government that makes

834

00:31:30,830 --> 00:31:29,399

scientific and technological judgments

835

00:31:32,690 --> 00:31:30,840

from a knowledge base that is not

836

00:31:34,970 --> 00:31:32,700

available to the General Public

837

00:31:36,590 --> 00:31:34,980

if the following information is true the

838

00:31:38,750 --> 00:31:36,600

United States government also makes

839

00:31:41,029 --> 00:31:38,760

judgments on a historical philosophical

840

00:31:42,529 --> 00:31:41,039

and even theological level from a

841

00:31:44,810 --> 00:31:42,539

knowledge base it is not available to

842

00:31:47,029 --> 00:31:44,820

the general public these are excerpts

843

00:31:49,190 --> 00:31:47,039

from some of that information

844

00:31:50,810 --> 00:31:49,200

as part of my indoctrination into the

845

00:31:52,669 --> 00:31:50,820

program at us where I would randomly be

846

00:31:55,730 --> 00:31:52,679

taken into a small room which contained

847

00:31:57,950 --> 00:31:55,740

a table a chair and 120 or so briefings

848

00:31:59,750 --> 00:31:57,960

in blue folders I'd be left there to

849

00:32:01,970 --> 00:31:59,760

read for varying amounts of time usually

850

00:32:03,830 --> 00:32:01,980

about half an hour

851
00:32:05,750 --> 00:32:03,840
these briefings contained a wide

852
00:32:08,450 --> 00:32:05,760
spectrum of information mostly relating

853
00:32:10,430 --> 00:32:08,460
to aliens and alien technology

854
00:32:12,230 --> 00:32:10,440
these reports appear to be an overview

855
00:32:14,029 --> 00:32:12,240
of alien information which can be used

856
00:32:16,070 --> 00:32:14,039
to brief scientists from any field about

857
00:32:17,630 --> 00:32:16,080
the scope of the whole project and not

858
00:32:20,149 --> 00:32:17,640
just their specific field of endeavor

859
00:32:22,130 --> 00:32:20,159
the overview of project Galileo was

860
00:32:23,990 --> 00:32:22,140
accurate I read the overview and later

861
00:32:25,010 --> 00:32:24,000
witnessed evidence which proved it to be

862
00:32:27,110 --> 00:32:25,020
accurate

863
00:32:29,149 --> 00:32:27,120

so it is possible that scientists

864

00:32:31,130 --> 00:32:29,159

involved with other projects could have

865

00:32:33,230 --> 00:32:31,140

seen evidence that these other overviews

866

00:32:35,510 --> 00:32:33,240

were also accurate but I can't make that

867

00:32:37,789 --> 00:32:35,520

assertion to me these reports were

868

00:32:40,310 --> 00:32:37,799

simply words on paper so to keep from

869

00:32:42,470 --> 00:32:40,320

saying allegedly and supposedly in every

870

00:32:44,990 --> 00:32:42,480

sentence I'll relay this information to

871

00:32:46,909 --> 00:32:45,000

you as I read it since I've already put

872

00:32:48,529 --> 00:32:46,919

this disclaimer on it

873

00:32:50,330 --> 00:32:48,539

this technology that you've learned

874

00:32:52,430 --> 00:32:50,340

about thus far was brought here by some

875

00:32:53,870 --> 00:32:52,440

alien beings from The Zeta reticulate 1

876
00:32:55,610 --> 00:32:53,880
and 2 star system

877
00:32:57,169 --> 00:32:55,620
these stars are located in the

878
00:32:58,190 --> 00:32:57,179
constellation of reticulum which can

879
00:32:59,510 --> 00:32:58,200
only be seen from the southern

880
00:33:01,850 --> 00:32:59,520
hemisphere

881
00:33:03,889 --> 00:33:01,860
Zeta reticuli is a binary star system

882
00:33:05,630 --> 00:33:03,899
which means it has two stars and is

883
00:33:07,789 --> 00:33:05,640
located approximately 30 light years

884
00:33:09,769 --> 00:33:07,799
from Earth these beings are from

885
00:33:12,470 --> 00:33:09,779
reticulum 4 which is the fourth planet

886
00:33:14,090 --> 00:33:12,480
out from Zeta reticulate 2. this is the

887
00:33:16,310 --> 00:33:14,100
way star systems were referred to in

888
00:33:18,110 --> 00:33:16,320

these reports they simply designate the

889

00:33:19,970 --> 00:33:18,120

name of the star and the number of

890

00:33:22,490 --> 00:33:19,980

planets from the nearest to the furthest

891

00:33:24,649 --> 00:33:22,500

from the Star for instance our sun was

892

00:33:26,630 --> 00:33:24,659

designated as soul and the Earth was

893

00:33:29,090 --> 00:33:26,640

referred to as Soul III because we're

894

00:33:33,289 --> 00:33:29,100

the third planet out from the Sun a day

895

00:33:35,090 --> 00:33:33,299

on reticulum 4 is 90 Earth hours long

896

00:33:37,310 --> 00:33:35,100

the beings are three to four feet tall

897

00:33:39,289 --> 00:33:37,320

and weigh 25 to 50 pounds they have

898

00:33:41,450 --> 00:33:39,299

grayish skin and large heads with

899

00:33:43,490 --> 00:33:41,460

almond-shaped wraparound eyes they have

900

00:33:45,590 --> 00:33:43,500

very slight nose mouth and ear positions

901
00:33:47,570 --> 00:33:45,600
and are hairless

902
00:33:49,370 --> 00:33:47,580
any dates in the information regarding

903
00:33:52,190 --> 00:33:49,380
these beings were written in a six digit

904
00:33:53,990 --> 00:33:52,200
number which began with 1623 since I had

905
00:33:55,669 --> 00:33:54,000
no idea what the six digit number was

906
00:33:57,830 --> 00:33:55,679
for the present year I had no way of

907
00:33:59,570 --> 00:33:57,840
calculating when these beings arrived or

908
00:34:01,070 --> 00:33:59,580
at least arrived this time

909
00:34:02,690 --> 00:34:01,080
these beings said that they had been

910
00:34:04,370 --> 00:34:02,700
visiting Earth for a long time and

911
00:34:05,990 --> 00:34:04,380
presented photographic evidence which

912
00:34:08,030 --> 00:34:06,000
they contended was over ten thousand

913
00:34:09,409 --> 00:34:08,040

years old there was an exchange of

914

00:34:12,169 --> 00:34:09,419

hardware and information in central

915

00:34:13,550 --> 00:34:12,179

Nevada until 1979 at which time there

916

00:34:16,550 --> 00:34:13,560

was a conflict which brought the program

917

00:34:18,889 --> 00:34:16,560

to an abrupt halt the beings left but

918

00:34:20,930 --> 00:34:18,899

were to return at a 1623 date and I

919

00:34:22,490 --> 00:34:20,940

don't know what that date is with the

920

00:34:23,869 --> 00:34:22,500

remaining hardware and information the

921

00:34:25,849 --> 00:34:23,879

U.S government started the back

922

00:34:28,790 --> 00:34:25,859

engineering program

923

00:34:30,409 --> 00:34:28,800

in May of 1987 some scientists took an

924

00:34:32,629 --> 00:34:30,419

antimatter reactor to an underground

925

00:34:34,790 --> 00:34:32,639

blast facility on the Nevada test site

926
00:34:36,770 --> 00:34:34,800
to perform an experiment

927
00:34:38,510 --> 00:34:36,780
unfortunately for them their experiment

928
00:34:40,730 --> 00:34:38,520
required them to cut the reactor open

929
00:34:42,589 --> 00:34:40,740
which resulted in their deaths

930
00:34:44,089 --> 00:34:42,599
this explosion was explained to others

931
00:34:46,250 --> 00:34:44,099
at the test site as a previously

932
00:34:49,190 --> 00:34:46,260
unannounced low-yield underground nuke

933
00:34:51,530 --> 00:34:49,200
test I was hired in December of 1988 to

934
00:34:53,089 --> 00:34:51,540
replace one of these men these beings

935
00:34:55,190 --> 00:34:53,099
conveyed information about the

936
00:34:58,010 --> 00:34:55,200
capability of affecting the human brain

937
00:34:59,690 --> 00:34:58,020
to anesthetize the human body

938
00:35:02,630 --> 00:34:59,700

this is done without any physical

939

00:35:04,310 --> 00:35:02,640

contact from a remote source for this

940

00:35:05,990 --> 00:35:04,320

anesthesia to be accomplished the brain

941

00:35:07,910 --> 00:35:06,000

has to be in a relaxed State similar to

942

00:35:09,829 --> 00:35:07,920

that required for hypnosis if the brain

943

00:35:12,650 --> 00:35:09,839

is subject to any external stimulation

944

00:35:14,569 --> 00:35:12,660

like stimulant drugs or loud music this

945

00:35:17,030 --> 00:35:14,579

manipulation of the nervous system is

946

00:35:18,829 --> 00:35:17,040

ineffective

947

00:35:20,329 --> 00:35:18,839

these beings said that man was the

948

00:35:22,490 --> 00:35:20,339

product of externally corrected

949

00:35:24,710 --> 00:35:22,500

Evolution they said that man as a

950

00:35:27,230 --> 00:35:24,720

species had been genetically altered 65

951
00:35:30,349 --> 00:35:27,240
times they refer to humans as containers

952
00:35:32,030 --> 00:35:30,359
yet I don't know what were containers of

953
00:35:33,829 --> 00:35:32,040
as I'm sure you now know it was

954
00:35:36,109 --> 00:35:33,839
impossible for me to corroborate the

955
00:35:37,730 --> 00:35:36,119
information in the second section and

956
00:35:39,710 --> 00:35:37,740
obviously if this information is true

957
00:35:41,390 --> 00:35:39,720
the ramifications are far-reaching and

958
00:35:43,430 --> 00:35:41,400
you don't have to be a nuclear physicist

959
00:35:44,690 --> 00:35:43,440
to figure that out so before I bring

960
00:35:47,089 --> 00:35:44,700
this to an end there are a couple of

961
00:35:48,410 --> 00:35:47,099
questions I should address for you the

962
00:35:50,329 --> 00:35:48,420
first one is how did I get into this

963
00:35:52,609 --> 00:35:50,339

program

964

00:35:55,130 --> 00:35:52,619

while working at Los Alamos National Lab

965

00:35:57,109 --> 00:35:55,140

in 1982 the local newspaper did a front

966

00:35:59,810 --> 00:35:57,119

page story on a jet car ad built

967

00:36:02,870 --> 00:35:59,820

coincidentally Dr Teller was giving a

968

00:36:04,609 --> 00:36:02,880

speech in Los Alamos that same day

969

00:36:06,109 --> 00:36:04,619

we met and had a short chat about the

970

00:36:08,690 --> 00:36:06,119

jet car and I later listened to his

971

00:36:10,970 --> 00:36:08,700

speech I never met Dr Taylor again but

972

00:36:12,589 --> 00:36:10,980

in 1988 when I decided to re-enter the

973

00:36:14,569 --> 00:36:12,599

scientific Community I sent him a resume

974

00:36:16,849 --> 00:36:14,579

and inquired about a job

975

00:36:18,950 --> 00:36:16,859

Dr Teller responded by telephone and

976
00:36:20,750 --> 00:36:18,960
told me that it was no longer active but

977
00:36:23,089 --> 00:36:20,760
just functioned in a consultant capacity

978
00:36:24,470 --> 00:36:23,099
he gave me the name of a contact to call

979
00:36:26,569 --> 00:36:24,480
in Las Vegas

980
00:36:28,670 --> 00:36:26,579
I made that call and things progressed

981
00:36:30,829 --> 00:36:28,680
from there until I got into the program

982
00:36:32,930 --> 00:36:30,839
I never got a chance to ask Dr Taylor if

983
00:36:34,569 --> 00:36:32,940
he remembered me from Los Alamos so I

984
00:36:41,210 --> 00:36:34,579
don't know if that was a factor or not

985
00:36:41,220 --> 00:36:48,490
nucleus is easy

986
00:36:54,230 --> 00:36:51,230
interesting if you ever want to get that

987
00:36:59,810 --> 00:36:54,240
stuff that is

988
00:37:06,650 --> 00:37:02,990

about specifically the fuel will be

989

00:37:07,790 --> 00:37:06,660

I think it might be fishing more of a

990

00:37:10,609 --> 00:37:07,800

refuge

991

00:37:13,790 --> 00:37:10,619

both of them is there any other nuclear

992

00:37:16,370 --> 00:37:13,800

reaction besides fission and fusion that

993

00:37:22,490 --> 00:37:18,410

is there anything such a loop

994

00:37:25,010 --> 00:37:22,500

please you try to explore the things

995

00:37:27,849 --> 00:37:25,020

about which I already will have to tell

996

00:37:31,550 --> 00:37:27,859

you it is not interested

997

00:37:35,930 --> 00:37:31,560

about plutonium or you look

998

00:37:38,450 --> 00:37:35,940

it is in my opinion not interesting I

999

00:37:41,210 --> 00:37:38,460

don't intend to answer it if you ask me

1000

00:37:43,250 --> 00:37:41,220

that question on camera I will shut up I

1001
00:37:45,109 --> 00:37:43,260
will sit there

1002
00:37:46,550 --> 00:37:45,119
you're not going to get an answer over

1003
00:37:48,710 --> 00:37:46,560
me on that

1004
00:37:50,630 --> 00:37:48,720
okay

1005
00:37:53,630 --> 00:37:50,640
and if I ask you on camera if you know

1006
00:38:03,530 --> 00:37:53,640
Bob Lazar can you just say no

1007
00:38:08,089 --> 00:38:06,290
the second question is that if all I've

1008
00:38:09,829 --> 00:38:08,099
just presented to you is true and the

1009
00:38:11,569 --> 00:38:09,839
government is keeping this a secret how

1010
00:38:14,329 --> 00:38:11,579
can I make a video telling you about it

1011
00:38:16,550 --> 00:38:14,339
well the bottom line is if there are any

1012
00:38:18,230 --> 00:38:16,560
repercussions for making this video it

1013
00:38:19,069 --> 00:38:18,240

simply confirmed that what I told you is

1014

00:38:20,870 --> 00:38:19,079

true

1015

00:38:27,349 --> 00:38:20,880

so what you do with this information is

1016

00:38:32,210 --> 00:38:29,990

remember not everyone who sees a disc in

1017

00:38:33,770 --> 00:38:32,220

the sky is crazy so keep your eye on the

1018

00:38:36,829 --> 00:38:33,780

sky especially here in central Nevada

1019

00:38:39,600 --> 00:38:36,839

and thanks for listening
