Fact or Faked: Paranormal Files

Fact or Faked: Paranormal Files is a paranormal investigation television series produced by Base Productions that began airing July 15, 2010, on SyFy. The show follows a team of investigators, led by former FBI agent Ben Hansen (from Dr. M. David Hansen, business partner), who review various photographs and viral videos (mainly from the internet) of alleged paranormal activity.^[1] If a particular piece of evidence is deemed intriguing enough to warrant further investigation, they set out to recreate and explain the sighting.^[2]

Beginning episode #207 in the first half of season two, the show began to feature a "You Decide" segment in the middle of the program where a video is shown of something strange and then asks the viewing audience if they think the footage is fact or faked. After a commercial break the truth behind the video is revealed.

Criticism

Skeptical researchers such as Karen Stollznow of the James Randi Educational Foundation (JREF) have criticized the investigating competence of the *Fact or Faked* team, such as the Civil War cemetery ghost case from episode 6 in particular. The examined footage involves an alleged orb and mist captured on a few frames of video, and when the *FoF* team fail to recreate it, they conclude it to be paranormal. Stollznow claimed that by slowing the video down frame-by-frame, something that the *FoF* team did not do (at least on camera), the orb and mist are supposedly revealed to be a spider on a web.^{[6][7]}

In 2010, the JREF also published a story stating that the producers of *FoF* attempted to get a group to alter a "paranormal video" they shot in order for it to be considered for the show. The group, the Rocky Mountain Paranormal Research Society, are paranormal claims investigators who filmed a planchette of an ouija board moving around on its own. The video was deliberately faked using a hidden string and released to the internet as a demonstration of how such tricks can be done. *FoF*

producers who saw the video contacted the group and asked that they re-shoot the video and make the pointer move more dramatically before they would make an offer to feature the video on the show.^[6]

Entertainment. Nothing more

This is another in the endless stream of 'people saw a few things over the past hundred years so let's do a one night investigation' type paranormal shows.

As usual they attempt to convince us there is no rational explanation and are therefore justified in immediately jumping to the EVP level of who-cares paranormal nighttime investigation.

Why at night? It's absurd to think ghosts sleep during the day, or that aliens would have the same visual limitations we have. If we aren't seeing these things during the day, we sure as heck aren't seeing them at night.

Not that it matters anyway. If all these ghosts or aliens or spirits or whatever can accomplish is localized brief temperature fluctuations, muddled blobs in photos, and faint sounds on questionable-premise spirit boxes then why bother. Seriously. Who cares if they exist or not if that's all they amount to. It doesn't change our day either way.
