

1
00:00:05,749 --> 00:00:04,010
what's up everybody this is Jimmy church

2
00:00:09,890 --> 00:00:05,759
from fade to black and coast to coast am

3
00:00:14,180 --> 00:00:09,900
I was sent these images earlier today

4
00:00:16,630 --> 00:00:14,190
from somebody showing me a face in the

5
00:00:18,920 --> 00:00:16,640
ice and on the side of a mountain in

6
00:00:21,410 --> 00:00:18,930
Antarctica what you're looking at first

7
00:00:23,870 --> 00:00:21,420
here is a screen grab that I did from

8
00:00:25,490 --> 00:00:23,880
Google Earth shows the coordinates right

9
00:00:27,589 --> 00:00:25,500
there you can punch it in if you look at

10
00:00:29,269 --> 00:00:27,599
the comments below I will give you the

11
00:00:31,939 --> 00:00:29,279
coordinates there that you can just cut

12
00:00:33,830 --> 00:00:31,949
and paste and move it over to Google

13
00:00:35,930 --> 00:00:33,840

Earth go to satellite and you'll see it

14

00:00:39,200 --> 00:00:35,940

right there when I first looked at this

15

00:00:43,100 --> 00:00:39,210

image here as I zoomed in all I could

16

00:00:45,049 --> 00:00:43,110

think of is that's a face now look we

17

00:00:48,110 --> 00:00:45,059

have to think about what we're looking

18

00:00:50,750 --> 00:00:48,120

at is it something that was carved is it

19

00:00:54,350 --> 00:00:50,760

natural is it from a lost civilization

20

00:00:54,979 --> 00:00:54,360

is it from ET I don't know but this is

21

00:00:56,810 --> 00:00:54,989

exciting

22

00:00:59,270 --> 00:00:56,820

here it is on Google Earth you can see

23

00:01:01,250 --> 00:00:59,280

the position the you can see Australia

24

00:01:03,590 --> 00:01:01,260

in the upper left and New Zealand is the

25

00:01:06,490 --> 00:01:03,600

closest landmass it's about 200 miles

26

00:01:09,679 --> 00:01:06,500

from Shelley Station 400 miles from

27

00:01:11,660 --> 00:01:09,689

McMurdo Station so we're clicking around

28

00:01:13,670 --> 00:01:11,670

here you can see its position look at

29

00:01:16,609 --> 00:01:13,680

its natural surroundings there isn't

30

00:01:19,670 --> 00:01:16,619

anything else like this face in the

31

00:01:22,490 --> 00:01:19,680

immediate vicinity now we're gonna go

32

00:01:25,820 --> 00:01:22,500

through rotations here okay and I want

33

00:01:29,120 --> 00:01:25,830

you to notice this symmetry its left and

34

00:01:31,460 --> 00:01:29,130

right for something natural and being

35

00:01:33,800 --> 00:01:31,470

this symmetrical I'm not sure what I'm

36

00:01:36,350 --> 00:01:33,810

looking at here we're zooming in and we

37

00:01:39,260 --> 00:01:36,360

are going to start to rotate as we

38

00:01:43,550 --> 00:01:39,270

rotate look at the chin look at the

39

00:01:46,639 --> 00:01:43,560

shadows I see teeth I see symmetry I see

40

00:01:50,270 --> 00:01:46,649

the nose I see the eyes I even see what

41

00:01:55,490 --> 00:01:50,280

appears to be an ear and as we rotate

42

00:01:59,030 --> 00:01:55,500

all of these images get stronger the the

43

00:02:01,789 --> 00:01:59,040

appearance of a face is there you would

44

00:02:06,319 --> 00:02:01,799

nearly expect it to go away if it was

45

00:02:09,020 --> 00:02:06,329

natural it appears to be a face now as

46

00:02:12,080 --> 00:02:09,030

we rotate it and we look at it from the

47

00:02:14,470 --> 00:02:12,090

top and from the other side the

48

00:02:18,220 --> 00:02:14,480

definitions are clear

49

00:02:21,370 --> 00:02:18,230

it's a face it's fun to look at I don't

50

00:02:24,160 --> 00:02:21,380

know what it is could this be from an

51
00:02:26,680 --> 00:02:24,170
ancient civilization as we see global

52
00:02:28,960 --> 00:02:26,690
warming take its effect on Antarctica

53
00:02:31,720 --> 00:02:28,970
and things start to melt away will

54
00:02:36,150 --> 00:02:31,730
things like this appear more and more

55
00:02:40,600 --> 00:02:36,160
often now look at it here that's a face

56
00:02:43,870 --> 00:02:40,610
that's a face I don't know what else to

57
00:02:48,490 --> 00:02:43,880
describe it's clearly a face

58
00:02:50,559 --> 00:02:48,500
this isn't like Cydonia on Mars that's

59
00:02:52,780 --> 00:02:50,569
not what we're talking about here this

60
00:02:55,570 --> 00:02:52,790
is on planet Earth and it's in

61
00:02:57,490 --> 00:02:55,580
Antarctica we need to go and find out

62
00:02:59,500 --> 00:02:57,500
also we're gonna do another video we're

63
00:03:01,660 --> 00:02:59,510

gonna go back in time we're gonna see

64

00:03:04,210 --> 00:03:01,670

what Google Earth had ten years ago five

65

00:03:06,970 --> 00:03:04,220

years ago two years ago at this exact

66

00:03:09,160 --> 00:03:06,980

spot all right now here are the

67

00:03:12,670 --> 00:03:09,170

coordinates once again this is my screen

68

00:03:16,600 --> 00:03:12,680

grab I did earlier today from Google

69

00:03:19,449 --> 00:03:16,610

Earth in Satellite mode now there isn't

70

00:03:23,020 --> 00:03:19,459

any other except for azúcar chellie

71

00:03:26,259 --> 00:03:23,030

station and McMurdo Station there isn't

72

00:03:29,259 --> 00:03:26,269

anything else around here this is remote

73

00:03:32,250 --> 00:03:29,269

but it is accessible from those two

74

00:03:35,830 --> 00:03:32,260

stations that are 200 and 400 miles away

75

00:03:36,340 --> 00:03:35,840

this is a lot of fun it's great to look

76

00:03:38,380 --> 00:03:36,350

at

77

00:03:40,569 --> 00:03:38,390

I'm your host Jimmy Church of fade to

78

00:03:42,220 --> 00:03:40,579

black and coast to coast am you can come

79

00:03:43,840 --> 00:03:42,230

and check out our live show Monday

80

00:03:46,990 --> 00:03:43,850

through Thursday from 7:00 to 10:00 p.m.

81

00:03:50,080 --> 00:03:47,000

Pacific time at Jimmy Church radio.com

82

00:03:52,210 --> 00:03:50,090

follow us on twitter at jay turks radio

83

00:03:54,910 --> 00:03:52,220

when you go over to Jimmy Church radio

84

00:03:57,370 --> 00:03:54,920

calm you can find our podcast you can

85

00:03:59,440 --> 00:03:57,380

become a fade or not everything is there

86

00:04:02,140 --> 00:03:59,450

and you can listen to the show live each

87

00:04:04,900 --> 00:04:02,150

night monday through thursday for free
