

FADE **TO** BLACK

with **JIMMY CHURCH**
PRESENTS

BREAKING NEWS

Thur Mar 09, 2023 **LIVE**

1
00:00:07,200 --> 00:00:12,350
foreign

2
00:00:38,090 --> 00:00:24,490
[Music]

3
00:00:43,130 --> 00:00:40,670
welcome and good afternoon Fade to Black

4
00:00:44,229 --> 00:00:43,140
breaking news for this Thursday March

5
00:00:47,990 --> 00:00:44,239
9th

6
00:00:51,410 --> 00:00:48,000
2023 I'm Jimmy church and this is all of

7
00:00:53,529 --> 00:00:51,420
the news that you need on this day in

8
00:00:56,990 --> 00:00:53,539
history

9
00:01:01,369 --> 00:00:57,000
1997 Christopher Wallace AKA Biggie

10
00:01:03,850 --> 00:01:01,379
Smalls AKA The Notorious B.I.G is shot

11
00:01:07,250 --> 00:01:03,860
to death at a stoplight in Los Angeles

12
00:01:10,910 --> 00:01:07,260
just weeks before his new album titled

13
00:01:14,929 --> 00:01:10,920

life after death was scheduled to be

14

00:01:18,550 --> 00:01:14,939

released on this day in 1997. here's

15

00:01:20,450 --> 00:01:18,560

your fader fact today fully vetted

16

00:01:23,570 --> 00:01:20,460

Birds

17

00:01:28,070 --> 00:01:23,580

can't live in space because

18

00:01:29,570 --> 00:01:28,080

they need gravity to swallow

19

00:01:31,490 --> 00:01:29,580

and that

20

00:01:33,530 --> 00:01:31,500

is your favorite fact let's get to the

21

00:01:36,590 --> 00:01:33,540

breaking news

22

00:01:39,230 --> 00:01:36,600

a newly discovered asteroid will get

23

00:01:43,310 --> 00:01:39,240

really close to Earth in about 20 years

24

00:01:45,590 --> 00:01:43,320

with a roughly one in 600 chance that it

25

00:01:48,649 --> 00:01:45,600

will collide directly with our planet

26
00:01:51,289 --> 00:01:48,659
officials with NASA's planetary defense

27
00:01:54,230 --> 00:01:51,299
coordination office has just announced

28
00:01:56,690 --> 00:01:54,240
by the way when you watch the movie

29
00:01:58,090 --> 00:01:56,700
don't look up which I talk about all the

30
00:02:00,770 --> 00:01:58,100
time

31
00:02:04,429 --> 00:02:00,780
that planetary defense coordination

32
00:02:07,130 --> 00:02:04,439
office pops up in the film it is a real

33
00:02:11,210 --> 00:02:07,140
office while that's higher than average

34
00:02:14,510 --> 00:02:11,220
a a risk for something that is flying by

35
00:02:17,030 --> 00:02:14,520
our planet near Earth asteroids it's

36
00:02:20,270 --> 00:02:17,040
still a very small chance of impact NASA

37
00:02:23,630 --> 00:02:20,280
says and that risk level is expected to

38
00:02:26,630 --> 00:02:23,640

decline as clear observation of the

39

00:02:29,930 --> 00:02:26,640

asteroid become available now it was

40

00:02:33,170 --> 00:02:29,940

first detected back on February 27th the

41

00:02:35,990 --> 00:02:33,180

asteroid is dubbed 2023 DW it's

42

00:02:39,589 --> 00:02:36,000

estimated to measure about 160 feet in

43

00:02:42,949 --> 00:02:39,599

diameter or roughly the length of an

44

00:02:44,990 --> 00:02:42,959

olympic sized pool the asteroid is

45

00:02:48,610 --> 00:02:45,000

expected to make its very close approach

46

00:02:53,150 --> 00:02:48,620

to Earth on February 14th

47

00:02:59,690 --> 00:02:56,890

I think I just came up with a new name

48

00:03:02,690 --> 00:02:59,700

Antarctic sea ice has shrunk to a record

49

00:03:04,970 --> 00:03:02,700

low in February of this year satellite

50

00:03:07,910 --> 00:03:04,980

measurements revealed that only 66

51
00:03:09,770 --> 00:03:07,920
percent of the sea ice extent usually

52
00:03:12,410 --> 00:03:09,780
detected during the peak of the Southern

53
00:03:14,830 --> 00:03:12,420
summer has been present in the water

54
00:03:17,750 --> 00:03:14,840
surrounding the South Pole last month

55
00:03:21,410 --> 00:03:17,760
the previous monthly record low was

56
00:03:25,070 --> 00:03:21,420
reported back in 2017 out of a series of

57
00:03:27,290 --> 00:03:25,080
measurements that dates back to 1979.

58
00:03:30,890 --> 00:03:27,300
the European environment monitoring

59
00:03:33,970 --> 00:03:30,900
agency Copernicus has just announced all

60
00:03:37,369 --> 00:03:33,980
of the news earlier today the agency's

61
00:03:40,789 --> 00:03:37,379
Sentinel satellites found below average

62
00:03:42,830 --> 00:03:40,799
sea ice concentrations in all regions of

63
00:03:44,869 --> 00:03:42,840

the Southern Ocean the southernmost part

64

00:03:46,309 --> 00:03:44,879

of the global ocean that surrounds

65

00:03:50,210 --> 00:03:46,319

Antarctica

66

00:03:53,270 --> 00:03:50,220

February 2023 was the fifth warmest

67

00:03:57,170 --> 00:03:53,280

February globally with most of Europe

68

00:03:59,930 --> 00:03:57,180

warmer than usual the U.S east Northern

69

00:04:02,470 --> 00:03:59,940

Russia Pakistan and India also

70

00:04:07,309 --> 00:04:02,480

experienced above average temperatures

71

00:04:10,070 --> 00:04:07,319

however the U.S West Northeastern Russia

72

00:04:11,110 --> 00:04:10,080

turkey and Northern Australia on the

73

00:04:15,009 --> 00:04:11,120

other hand

74

00:04:19,430 --> 00:04:15,019

experienced a colder February this year

75

00:04:22,790 --> 00:04:19,440

it was a flip-flop scientists just

76
00:04:27,170 --> 00:04:22,800
blasted Barbies that's right Barbie

77
00:04:30,590 --> 00:04:27,180
dolls with liquid nitrogen to test a new

78
00:04:32,629 --> 00:04:30,600
method of moon dust cleanup and it

79
00:04:33,530 --> 00:04:32,639
worked out extremely well so check this

80
00:04:36,010 --> 00:04:33,540
out

81
00:04:39,110 --> 00:04:36,020
for the experiment

82
00:04:41,810 --> 00:04:39,120
researchers I'm not making this up I'm

83
00:04:44,810 --> 00:04:41,820
not it sounds made up it's not

84
00:04:47,570 --> 00:04:44,820
for the experiment researchers at

85
00:04:50,930 --> 00:04:47,580
Washington State University dressed

86
00:04:52,850 --> 00:04:50,940
Barbies in makeshift spacesuits

87
00:04:56,270 --> 00:04:52,860
constructed of material similar to what

88
00:04:58,969 --> 00:04:56,280

Nasa uses then the team blasted the

89

00:05:01,730 --> 00:04:58,979

dolls with liquid nitrogen to test how

90

00:05:05,270 --> 00:05:01,740

well the cryogenic fluid would remove

91

00:05:08,510 --> 00:05:05,280

Moon dust or in this case volcanic ash

92

00:05:10,969 --> 00:05:08,520

collected from the 1980 eruption of

93

00:05:14,830 --> 00:05:10,979

Mount Saint Helens which is similar in

94

00:05:17,629 --> 00:05:14,840

consistency to lunar dust from the gear

95

00:05:21,290 --> 00:05:17,639

they found that spraying the spacesuit

96

00:05:23,390 --> 00:05:21,300

glad dolls with liquid nitrogen not only

97

00:05:26,990 --> 00:05:23,400

remove more than 98 percent of the Moon

98

00:05:29,629 --> 00:05:27,000

does substitute but also cause little or

99

00:05:32,150 --> 00:05:29,639

no damage to the kevlar-like suit

100

00:05:34,969 --> 00:05:32,160

material this proved to be a better

101
00:05:36,490 --> 00:05:34,979
solution than older methods when Apollo

102
00:05:40,129 --> 00:05:36,500
Astronauts

103
00:05:42,230 --> 00:05:40,139
used lint brushes

104
00:05:44,029 --> 00:05:42,240
that's right

105
00:05:45,710 --> 00:05:44,039
brushes

106
00:05:49,129 --> 00:05:45,720
all right

107
00:05:52,129 --> 00:05:49,139
space startup relativity space

108
00:05:56,029 --> 00:05:52,139
was forced to call off the launch of the

109
00:05:58,070 --> 00:05:56,039
world's first 3D printed rocket with

110
00:06:01,070 --> 00:05:58,080
just over a minute to go before liftoff

111
00:06:03,469 --> 00:06:01,080
the startup opted to stand down from

112
00:06:06,310 --> 00:06:03,479
launching the world's first 3D printed

113
00:06:09,529 --> 00:06:06,320

rocket on its inaugural test flight

114

00:06:12,590 --> 00:06:09,539

relativity was set to launch its terrain

115

00:06:14,749 --> 00:06:12,600

one booster yesterday from Florida's

116

00:06:16,749 --> 00:06:14,759

Cape Canaveral space force station but

117

00:06:19,610 --> 00:06:16,759

technical difficulties at the launch pad

118

00:06:23,170 --> 00:06:19,620

forced the company to call off the

119

00:06:25,670 --> 00:06:23,180

attempt we still don't know why

120

00:06:28,490 --> 00:06:25,680

3D printed components have flown on

121

00:06:31,010 --> 00:06:28,500

Rockets before relativities booster is

122

00:06:34,270 --> 00:06:31,020

the first to be made almost entirely

123

00:06:38,090 --> 00:06:34,280

with 3D printing which is also known as

124

00:06:40,610 --> 00:06:38,100

additive manufacturing relativity has

125

00:06:43,129 --> 00:06:40,620

not yet announced a new launch date and

126
00:06:46,249 --> 00:06:43,139
time but company officials say details

127
00:06:47,809 --> 00:06:46,259
will be disclosed soon

128
00:06:51,830 --> 00:06:47,819
check this out

129
00:06:54,770 --> 00:06:51,840
a centuries old gold disc Found in

130
00:06:59,330 --> 00:06:54,780
Denmark has revealed the earliest known

131
00:07:02,090 --> 00:06:59,340
mention of the Norse god Odin and and

132
00:07:05,510 --> 00:07:02,100
was shown that he was being worshiped at

133
00:07:10,969 --> 00:07:05,520
least 150 years earlier than previously

134
00:07:14,150 --> 00:07:10,979
thought the disc known as a bracteate was

135
00:07:17,270 --> 00:07:14,160
Unearthed in a treasure Trove in

136
00:07:19,850 --> 00:07:17,280
vendelov central Denmark back in 2020

137
00:07:23,330 --> 00:07:19,860
alongside Roman coins that have been

138
00:07:25,249 --> 00:07:23,340

reworked into jewelry it was displayed

139

00:07:28,129 --> 00:07:25,259

to the public at a museum near the

140

00:07:30,650 --> 00:07:28,139

discovery site and only recently made

141

00:07:33,230 --> 00:07:30,660

available to academics who were able to

142

00:07:35,990 --> 00:07:33,240

establish its significance

143

00:07:38,629 --> 00:07:36,000

Odin is one of the primary gods of North

144

00:07:40,969 --> 00:07:38,639

mythology of course a pre-christian

145

00:07:44,029 --> 00:07:40,979

pagan belief system central to Viking

146

00:07:47,510 --> 00:07:44,039

Society before the vindalev hordes

147

00:07:50,270 --> 00:07:47,520

Discovery the oldest mention of Odin was

148

00:07:54,710 --> 00:07:50,280

a brooch found in southern Germany from

149

00:07:56,089 --> 00:07:54,720

the latter half of the 6th century

150

00:07:59,689 --> 00:07:56,099

now I'm Gonna Leave You with this

151
00:08:00,730 --> 00:07:59,699
feel-good story of the day an elderly

152
00:08:04,610 --> 00:08:00,740
man

153
00:08:08,330 --> 00:08:04,620
survived on croissants candy and

154
00:08:10,969 --> 00:08:08,340
biscotti for nearly a week alone in his

155
00:08:14,870 --> 00:08:10,979
car stuck in a snow bank on a desolate

156
00:08:17,930 --> 00:08:14,880
California highway his name Jerry juray

157
00:08:19,610 --> 00:08:17,940
he's 81 years old and he set out from

158
00:08:22,850 --> 00:08:19,620
his Mountain House in Big Pine

159
00:08:25,330 --> 00:08:22,860
California on February 24th to return to

160
00:08:28,309 --> 00:08:25,340
his family home in Gardnerville Nevada

161
00:08:31,070 --> 00:08:28,319
just over three hours away in good

162
00:08:33,769 --> 00:08:31,080
driving conditions right well during the

163
00:08:37,010 --> 00:08:33,779

drive joray accidentally veered onto a

164

00:08:40,610 --> 00:08:37,020

smaller Road and his SUV became stuck

165

00:08:43,790 --> 00:08:40,620

near Gilbert pass the mathematician and

166

00:08:46,190 --> 00:08:43,800

former NASA employee was ill-prepared

167

00:08:50,750 --> 00:08:46,200

for the weather wearing only a light

168

00:08:54,170 --> 00:08:50,760

windbreaker after nearly a week buried

169

00:08:56,090 --> 00:08:54,180

in snow on March 2nd a cell phone ping

170

00:08:58,610 --> 00:08:56,100

identified by the California Highway

171

00:09:00,829 --> 00:08:58,620

Patrol team helped narrow the search

172

00:09:03,470 --> 00:09:00,839

area and once weather allowed a

173

00:09:06,230 --> 00:09:03,480

helicopter was deployed

174

00:09:08,269 --> 00:09:06,240

as one team headed to reveal the

175

00:09:09,850 --> 00:09:08,279

aircraft the pilot spotted something he

176

00:09:13,370 --> 00:09:09,860

initially thought was a large Rock

177

00:09:15,829 --> 00:09:13,380

closer look revealed a vehicle and the

178

00:09:18,230 --> 00:09:15,839

pilot spotted an arm waving out of the

179

00:09:22,009 --> 00:09:18,240

small opening in the car window

180

00:09:23,690 --> 00:09:22,019

now after a brief hospital visit he had

181

00:09:27,889 --> 00:09:23,700

to take a bus home to his wife in

182

00:09:29,990 --> 00:09:27,899

Gardnerville as his SUV is still stuck

183

00:09:31,790 --> 00:09:30,000

in the snow

184

00:09:34,009 --> 00:09:31,800

there you go there's your Fade to Black

185

00:09:37,130 --> 00:09:34,019

breaking news all of the news that you

186

00:09:39,710 --> 00:09:37,140

need for this Thursday March 9th 2023

187

00:09:43,670 --> 00:09:39,720

Fade to Black breaking news is produced

188
