[Music]

2  
00:00:32,510 --> 00:00:29,000

thank you

3  
00:00:38,930 --> 00:00:35,209

good afternoon Fade to Black breaking

4  
00:00:41,750 --> 00:00:38,940

news for this Tuesday April 18 2023 this

5  
00:00:44,150 --> 00:00:41,760

is all of the news that you need I'm

6  
00:00:47,150 --> 00:00:44,160

Jimmy Church let's get straight to it on

7  
00:00:52,010 --> 00:00:47,160

this day in history 1906.

8  
00:00:54,910 --> 00:00:52,020

at 5 13 a.m an earthquake estimated at

9  
00:00:58,490 --> 00:00:54,920

close to 8.0 on the Richter Scale

10  
00:01:04,210 --> 00:00:58,500

strikes San Francisco California killing

11  
00:01:08,170 --> 00:01:04,220

an estimated 3 000 people on this day in

12  
00:01:10,010 --> 00:01:08,180

1906. here's your fader fact

13  
00:01:12,530 --> 00:01:10,020

## Viagra

14

00:01:16,550 --> 00:01:12,540

when dissolved in water

15

00:01:20,030 --> 00:01:16,560

can make cut flowers stay erect for up

16

00:01:23,210 --> 00:01:20,040

to a week longer than they usually would

17

00:01:25,550 --> 00:01:23,220

but you still need a prescription

18

00:01:29,090 --> 00:01:25,560

there you go that's your favorite fact

19

00:01:31,190 --> 00:01:29,100

let's get to the breaking news NASA has

20

00:01:34,070 --> 00:01:31,200

released a new image and they did this

21

00:01:35,710 --> 00:01:34,080

yesterday of two spiral galaxies in the

22

00:01:38,990 --> 00:01:35,720

process of merging

23

00:01:42,050 --> 00:01:39,000

250 million light years away in the

24

00:01:44,390 --> 00:01:42,060

constellation of serpents and it was

25

00:01:47,749 --> 00:01:44,400

captured by the James Webb Space

26

00:01:52,550 --> 00:01:47,759

Telescope NASA says the Collision of the

27

00:01:55,069 --> 00:01:52,560

two spiral galaxies dubbed ARP 220 began

28

00:01:58,330 --> 00:01:55,079

about 700 million years ago and sparked

29

00:02:02,090 --> 00:01:58,340

an enormous burst of star formation

30

00:02:04,670 --> 00:02:02,100

scientists say ARP 220 is both the

31

00:02:07,249 --> 00:02:04,680

nearest Ultra luminous infrared Galaxy

32

00:02:09,650 --> 00:02:07,259

and the brightest of the three Galactic

33

00:02:11,449 --> 00:02:09,660

merges closest to Earth

34

00:02:13,910 --> 00:02:11,459

the Hubble Space Telescope had

35

00:02:16,790 --> 00:02:13,920

previously uncovered the cores of the

36

00:02:19,790 --> 00:02:16,800

parent galaxies 1200 light years apart

37

00:02:23,089 --> 00:02:19,800

but with the web telescope's new view

38

00:02:24,229 --> 00:02:23,099

far more detail has been revealed you

39

00:02:25,309 --> 00:02:24,239

gotta check out the image it's

40

00:02:27,470 --> 00:02:25,319

incredible

41

00:02:31,130 --> 00:02:27,480

NASA is still in the news

42

00:02:33,470 --> 00:02:31,140

a dead NASA spacecraft will come

43

00:02:37,610 --> 00:02:33,480

crashing back to Earth in the next few

44

00:02:40,250 --> 00:02:37,620

days NASA's resi satellite which studied

45

00:02:44,089 --> 00:02:40,260

the Sun from 2002 until decommissioning

46

00:02:48,290 --> 00:02:44,099

in 2018 is expected to re-enter Earth's

47

00:02:52,009 --> 00:02:48,300

atmosphere at around 9 30 p.m eastern

48

00:02:54,530 --> 00:02:52,019

time tomorrow plus or minus 16 hours

49

00:02:58,670 --> 00:02:54,540

according to the latest estimates by the

50

00:03:00,890 --> 00:02:58,680

U.S military resi isn't a huge satellite

51  
00:03:03,110 --> 00:03:00,900  
it weighs just 600 pounds and the

52  
00:03:06,650 --> 00:03:03,120  
majority of that mass will be converted

53  
00:03:08,770 --> 00:03:06,660  
to Ash and Vapor during resi's death

54  
00:03:12,949 --> 00:03:08,780  
dive back to Earth

55  
00:03:15,530 --> 00:03:12,959  
two Russian cosmonauts will attempt a

56  
00:03:18,589 --> 00:03:15,540  
twice delayed spacewalk yet again

57  
00:03:21,589 --> 00:03:18,599  
tonight and you can watch the action

58  
00:03:23,089 --> 00:03:21,599  
live kicks off right before Fade to

59  
00:03:25,130 --> 00:03:23,099  
Black coverage of the International

60  
00:03:27,649 --> 00:03:25,140  
Space Station Space Walk will start

61  
00:03:31,330 --> 00:03:27,659  
tonight at 6 PM Pacific time at

62

space.com courtesy of NASA Television

63  
00:03:39,110 --> 00:03:35,940

ISS Expedition 69 uh cosmonauts Sergey

64

00:03:41,449 --> 00:03:39,120

praka pm

65

00:03:45,110 --> 00:03:41,459

I mess his name up every time don't I

66

00:03:47,089 --> 00:03:45,120

and Dimitri Patel have already made two

67

00:03:50,030 --> 00:03:47,099

tries at starting this set of space

68

00:03:52,750 --> 00:03:50,040

activities a failed space shoot uh pump

69

00:03:56,570 --> 00:03:52,760

aborted an attempt back on November 25th

70

00:03:59,390 --> 00:03:56,580

2022 and then just three weeks later on

71

00:04:01,490 --> 00:03:59,400

December 15th that try was called off

72

00:04:04,309 --> 00:04:01,500

following a leak on a Russian soyuz

73

00:04:07,130 --> 00:04:04,319

spacecraft that started just before the

74

00:04:11,330 --> 00:04:07,140

airlock was open spewing corrosive

75

00:04:16,250 --> 00:04:11,340

coolant out into space all right

76

00:04:19,129 --> 00:04:16,260

check this out a skeleton of a 67

77

00:04:23,230 --> 00:04:19,139

million year old Tyrannosaurus Rex has

78

00:04:25,909 --> 00:04:23,240

been sold to a private individual for

79

00:04:29,150 --> 00:04:25,919

6.2 million dollars what are you gonna

80

00:04:31,730 --> 00:04:29,160

do with the T-rex skeleton

81

00:04:34,490 --> 00:04:31,740

this is the first time a T-Rex has been

82

00:04:35,930 --> 00:04:34,500

auctioned in Europe the specimen has

83

00:04:39,010 --> 00:04:35,940

been described as one of the most

84

00:04:41,990 --> 00:04:39,020

spectacular T-Rex skeletons in existence

85

00:04:44,330 --> 00:04:42,000

last year a T-rex skeleton which was

86

00:04:47,030 --> 00:04:44,340

expected to fetch up to 25 million

87

00:04:49,249 --> 00:04:47,040

dollars in auction was withdrawn after

88

00:04:52,670 --> 00:04:49,259

doubts were raised over where the parts

89

00:04:56,330 --> 00:04:52,680

of it had come from yeah you heard me

90

00:04:59,689 --> 00:04:56,340

right the name of this skeleton is 293

91

00:05:02,450 --> 00:04:59,699

Trinity because it is built from three

92

00:05:05,930 --> 00:05:02,460

different T-Rexes from U.S dinosaur

93

00:05:09,530 --> 00:05:05,940

sites in Montana and Wyoming it is made

94

00:05:11,170 --> 00:05:09,540

up of 293 separate Bones from specimens

95

00:05:13,870 --> 00:05:11,180

retrieved between

96

00:05:15,969 --> 00:05:13,880

2008 and

97

00:05:20,270 --> 00:05:15,979

2013.

98

00:05:21,530 --> 00:05:20,280

6.2 million dollars incredible

99

00:05:25,610 --> 00:05:21,540

well

100

00:05:29,570 --> 00:05:25,620

the filming of the movie rust will

101  
00:05:31,790 --> 00:05:29,580  
resume this week on Tuesday today a

102  
00:05:35,390 --> 00:05:31,800  
spokesman for rust movie productions

103  
00:05:37,610 --> 00:05:35,400  
told uh has announced that principal

104  
00:05:41,390 --> 00:05:37,620  
photography of Russ is set to resume

105  
00:05:44,570 --> 00:05:41,400  
this Thursday at Yellowstone film Ranch

106  
00:05:47,570 --> 00:05:44,580  
in Montana production on the western

107  
00:05:50,689 --> 00:05:47,580  
starring Alec Baldwin came to a halt in

108  
00:05:51,430 --> 00:05:50,699  
2021 when cinematographer

109  
00:05:55,249 --> 00:05:51,440  
um

110  
00:05:58,370 --> 00:05:55,259  
uh Hutchins was fatally shot when a prop

111  
00:06:01,029 --> 00:05:58,380  
gun Baldwin was holding fired a live

112  
00:06:04,850 --> 00:06:01,039  
round of ammunition during rehearsal

113  
00:06:07,010 --> 00:06:04,860

Matthew Hutchins Hutchins widower and

114

00:06:09,370 --> 00:06:07,020

Baldwin announced they have reached an

115

00:06:12,230 --> 00:06:09,380

undisclosed settlement in October

116

00:06:13,430 --> 00:06:12,240

following a wrongful death lawsuit filed

117

00:06:15,770 --> 00:06:13,440

against the actor in the film's

118

00:06:17,810 --> 00:06:15,780

production companies its producers and

119

00:06:19,909 --> 00:06:17,820

other key members of the crew the movie

120

00:06:23,210 --> 00:06:19,919

is set to be completed as part of the

121

00:06:25,969 --> 00:06:23,220

agreement with Matthew serving as

122

00:06:29,689 --> 00:06:25,979

executive producer Baldwin and Souza

123

00:06:32,689 --> 00:06:29,699

will also return to finish the project

124

00:06:36,909 --> 00:06:32,699

and now I'll leave you with this

125

00:06:39,890 --> 00:06:36,919

SpaceX is now targeting this Thursday

126  
00:06:42,529 --> 00:06:39,900  
for the next attempt to get Starship the

127  
00:06:43,670 --> 00:06:42,539  
most powerful rocket ever built off the

128  
00:06:46,730 --> 00:06:43,680  
ground

129  
00:06:49,249 --> 00:06:46,740  
Starship was left on its launch pad in

130  
00:06:51,290 --> 00:06:49,259  
South Texas yesterday because of a

131  
00:06:54,170 --> 00:06:51,300  
technical issue delaying the vehicle's

132  
00:06:56,330 --> 00:06:54,180  
historic first launch attempt SpaceX

133  
00:06:59,749 --> 00:06:56,340  
will have a Thursday launch window that

134  
00:07:03,409 --> 00:06:59,759  
opens at around 8 28 a.m Central Time as

135  
00:07:06,710 --> 00:07:03,419  
Texas time and closes at 9 30 a.m

136  
00:07:08,870 --> 00:07:06,720  
central time they will live stream the

137  
00:07:12,409 --> 00:07:08,880  
launch attempt on their website starting

138  
00:07:13,909 --> 00:07:12,419

about 45 minutes before liftoff and

139

00:07:15,409 --> 00:07:13,919

there you go there's all the Fade to
