

THE SECRET OF SKINWALKER RANCH

REVIEW
Season 4
Episode 6

1
00:00:11,120 --> 00:00:16,680

thank you

2
00:00:16,690 --> 00:00:27,529

[Applause]

3
00:00:33,049 --> 00:00:30,830

Jimmy we are reviewing episode six of

4
00:00:35,450 --> 00:00:33,059

season four of the secret of Skinwalker

5
00:00:38,389 --> 00:00:35,460

Ranch right off the bat just give me

6
00:00:40,190 --> 00:00:38,399

like in in one word your thoughts of

7
00:00:45,170 --> 00:00:40,200

this latest episode

8
00:00:46,549 --> 00:00:45,180

I can't I'm busy texting my fans in the

9
00:00:48,709 --> 00:00:46,559

chat room

10
00:00:51,110 --> 00:00:48,719

I'm I'm too busy for this right now

11
00:00:52,850 --> 00:00:51,120

what's going on Christine oh okay you

12
00:00:57,830 --> 00:00:52,860

want something quick

13
00:01:03,529 --> 00:01:01,130

yeah uh I'm I'm with you on this one did

14

00:01:05,509 --> 00:01:03,539

I steal that from you no actually I

15

00:01:07,310 --> 00:01:05,519

think I got that from you but like my

16

00:01:09,410 --> 00:01:07,320

first thought when I got through

17

00:01:11,630 --> 00:01:09,420

watching this latest episode is that

18

00:01:13,969 --> 00:01:11,640

both last week's show and this week's

19

00:01:16,190 --> 00:01:13,979

show could have been condensed into one

20

00:01:18,050 --> 00:01:16,200

show rather than two but like at the

21

00:01:19,670 --> 00:01:18,060

same time I get it okay we're heading

22

00:01:22,010 --> 00:01:19,680

into the Midway point of the Season

23

00:01:24,170 --> 00:01:22,020

leading up to the mind-blowing stuff

24

00:01:26,749 --> 00:01:24,180

towards the end of the season which we

25

00:01:29,330 --> 00:01:26,759

see in so many other TV shows so I think

26

00:01:31,969 --> 00:01:29,340

like that part kind of makes sense but

27

00:01:34,010 --> 00:01:31,979

at the same time like I'm reminded that

28

00:01:36,469 --> 00:01:34,020

so much of what goes on there on the

29

00:01:39,170 --> 00:01:36,479

ranch doesn't make the final cut only

30

00:01:41,929 --> 00:01:39,180

point seven percent of all of the

31

00:01:45,950 --> 00:01:41,939

research done by the people on the ranch

32

00:01:47,630 --> 00:01:45,960

make it on the TV show but as I've also

33

00:01:50,030 --> 00:01:47,640

been told by several the team members

34

00:01:52,069 --> 00:01:50,040

there are sometimes like long periods of

35

00:01:55,010 --> 00:01:52,079

time that pass which are relatively

36

00:01:57,230 --> 00:01:55,020

uneventful on the ranch so like I think

37

00:01:58,670 --> 00:01:57,240

that's really important to keep on keep

38

00:01:59,990 --> 00:01:58,680

in mind that they can't just prod

39

00:02:01,429 --> 00:02:00,000

something and say all right here's

40

00:02:04,550 --> 00:02:01,439

activity it's happening every day

41

00:02:06,289 --> 00:02:04,560

because it's not but um and I'll talk

42

00:02:08,089 --> 00:02:06,299

about this later in the show but I was

43

00:02:09,889 --> 00:02:08,099

really expecting them to like go back

44

00:02:12,790 --> 00:02:09,899

and actually get a sample of the Red

45

00:02:15,530 --> 00:02:12,800

Rock in the Mesa to be tested

46

00:02:16,970 --> 00:02:15,540

save that let's say yeah let's save that

47

00:02:20,630 --> 00:02:16,980

because that was a key part of this

48

00:02:22,670 --> 00:02:20,640

episode okay so let me say this to

49

00:02:28,130 --> 00:02:22,680

everybody out there I don't want uh

50

00:02:30,470 --> 00:02:28,140

Christina and I to dilute or pollute uh

51
00:02:33,770 --> 00:02:30,480
what this episode is all about and and

52
00:02:37,309 --> 00:02:33,780
and we kid about the filler aspect about

53
00:02:38,809 --> 00:02:37,319
this because I I thought uh and

54
00:02:40,850 --> 00:02:38,819
Christina and I were talking about this

55
00:02:43,390 --> 00:02:40,860
earlier uh before the broadcast I

56
00:02:46,550 --> 00:02:43,400
thought this show was was pretty good

57
00:02:49,250 --> 00:02:46,560
and I didn't look at it as much as a

58
00:02:51,890 --> 00:02:49,260
filler but see I I messed with Christina

59
00:02:55,130 --> 00:02:51,900
last week I said now she's looking for

60
00:02:58,790 --> 00:02:55,140
Filler episodes and and I don't think I

61
00:03:01,850 --> 00:02:58,800
don't think this one was that as much

62
00:03:04,250 --> 00:03:01,860
this week but there was uh some very

63
00:03:07,490 --> 00:03:04,260

interesting things that

64

00:03:11,030 --> 00:03:07,500

um I think were brought up in this show

65

00:03:13,009 --> 00:03:11,040

um but missing in this show

66

00:03:17,089 --> 00:03:13,019

were the boulders

67

00:03:20,210 --> 00:03:17,099

and and that's what I thought for sure

68

00:03:25,070 --> 00:03:20,220

especially with the title of of this

69

00:03:28,850 --> 00:03:25,080

episode which had Mesa in it Mesa

70

00:03:32,390 --> 00:03:28,860

um their play mess up the Mesa that we

71

00:03:34,009 --> 00:03:32,400

were going to see something uh with the

72

00:03:37,009 --> 00:03:34,019

movement of the bowlers and we didn't

73

00:03:39,470 --> 00:03:37,019

get that this week but there was a lot

74

00:03:42,350 --> 00:03:39,480

of other interesting details I don't

75

00:03:44,710 --> 00:03:42,360

know where to start let's go to the very

76

00:03:47,990 --> 00:03:44,720

beginning Jimmy where they were kind of

77

00:03:51,350 --> 00:03:48,000

re they were bringing back Thomas seeing

78

00:03:54,949 --> 00:03:51,360

the purple orb uh to us on the other

79

00:03:57,110 --> 00:03:54,959

side of the camera we saw it as blue but

80

00:03:59,210 --> 00:03:57,120

what I would like to mention is that

81

00:04:01,309 --> 00:03:59,220

Travis made a really interesting point

82

00:04:03,470 --> 00:04:01,319

in the first several minutes of this

83

00:04:05,710 --> 00:04:03,480

latest episode episode six where he

84

00:04:08,990 --> 00:04:05,720

stated that in order to be

85

00:04:11,509 --> 00:04:09,000

emitting purple light it would need to

86

00:04:14,869 --> 00:04:11,519

be transmitting a lot of energy to make

87

00:04:16,729 --> 00:04:14,879

it into that color and so regardless on

88

00:04:19,250 --> 00:04:16,739

if it was man-made or if it was

89

00:04:21,229 --> 00:04:19,260

something truly anomalous that is an

90

00:04:23,450 --> 00:04:21,239

important detail that I think that we

91

00:04:25,550 --> 00:04:23,460

should kind of look at and think okay

92

00:04:27,050 --> 00:04:25,560

well if it's man-made what's something

93

00:04:29,210 --> 00:04:27,060

that could have caused it what piece of

94

00:04:30,409 --> 00:04:29,220

tech and if it's anomalous we don't know

95

00:04:33,830 --> 00:04:30,419

what it is

96

00:04:35,749 --> 00:04:33,840

why is it creating a purple light again

97

00:04:38,870 --> 00:04:35,759

we're seeing it as blue but Thomas saw

98

00:04:43,249 --> 00:04:38,880

it as purple the question would be why

99

00:04:47,749 --> 00:04:43,259

okay so and I keep this image up

100

00:04:48,790 --> 00:04:47,759

because when this flashed in last week's

101
00:04:52,010 --> 00:04:48,800
episode

102
00:04:56,629 --> 00:04:52,020
I immediately went well that's at ground

103
00:04:59,030 --> 00:04:56,639
level you can see the lights from the

104
00:05:02,090 --> 00:04:59,040
structures that are other houses or or

105
00:05:06,170 --> 00:05:02,100
what whatever they are but you can see

106
00:05:10,610 --> 00:05:06,180
that that is at ground level so whatever

107
00:05:13,129 --> 00:05:10,620
is projecting this or emitting this it's

108
00:05:14,990 --> 00:05:13,139
some something that is on the ground or

109
00:05:16,510 --> 00:05:15,000
somebody standing on the ground that and

110
00:05:20,150 --> 00:05:16,520
is holding something

111
00:05:23,870 --> 00:05:20,160
and now Travis's point that he brought

112
00:05:26,629 --> 00:05:23,880
up that purple light is difficult to see

113
00:05:29,689 --> 00:05:26,639

it's difficult to project I'm not sure

114

00:05:32,090 --> 00:05:29,699

what uh with the physics or scientific

115

00:05:36,409 --> 00:05:32,100

or electronic side about that with his

116

00:05:38,689 --> 00:05:36,419

background that he would be referring to

117

00:05:42,170 --> 00:05:38,699

um so I I don't know maybe he knows

118

00:05:45,129 --> 00:05:42,180

something but here's here was uh my take

119

00:05:47,749 --> 00:05:45,139

and after seeing this today

120

00:05:48,670 --> 00:05:47,759

and them going out to that side of the

121

00:05:53,150 --> 00:05:48,680

ranch

122

00:05:56,689 --> 00:05:53,160

it could almost be anything right and it

123

00:05:59,689 --> 00:05:56,699

it also could be the way that it was

124

00:06:04,850 --> 00:05:59,699

picked up electronically by the photo

125

00:06:07,610 --> 00:06:04,860

sensors that are in video equipment and

126

00:06:10,730 --> 00:06:07,620

that it is seeing something that is uh

127

00:06:14,749 --> 00:06:10,740

uh a bit different that wouldn't have to

128

00:06:18,469 --> 00:06:14,759

have a lot of energy uh tied to it could

129

00:06:20,890 --> 00:06:18,479

it be something as simple as

130

00:06:23,870 --> 00:06:20,900

um and I'm just

131

00:06:26,450 --> 00:06:23,880

just stay with me

132

00:06:28,249 --> 00:06:26,460

um you have little sensors on your cell

133

00:06:29,830 --> 00:06:28,259

phone right

134

00:06:33,710 --> 00:06:29,840

and and

135

00:06:36,950 --> 00:06:33,720

things that are uh projecting or sensing

136

00:06:41,270 --> 00:06:36,960

out could it have been something like

137

00:06:42,710 --> 00:06:41,280

that that was because that flashed so

138

00:06:47,270 --> 00:06:42,720

could it have been somebody walking

139

00:06:50,150 --> 00:06:47,280

around uh maybe filming them right I I'm

140

00:06:54,110 --> 00:06:50,160

I'm just speculating here I don't know

141

00:06:56,629 --> 00:06:54,120

anything but it was at ground level and

142

00:06:58,850 --> 00:06:56,639

not up high now they put cameras out

143

00:07:01,249 --> 00:06:58,860

there right they they went out there and

144

00:07:03,710 --> 00:07:01,259

insulted some cameras in the trees uh

145

00:07:05,710 --> 00:07:03,720

that was a blind spot uh there on the

146

00:07:09,170 --> 00:07:05,720

ranch and now they've got that covered

147

00:07:10,909 --> 00:07:09,180

and and you know so what you want with

148

00:07:13,370 --> 00:07:10,919

anything Christina you want this to

149

00:07:15,890 --> 00:07:13,380

repeat right you want it to happen again

150

00:07:19,670 --> 00:07:15,900

and hopefully they'll be able to capture

151

00:07:21,950 --> 00:07:19,680

whatever is emitting this light or light

152

00:07:24,290 --> 00:07:21,960

source and they'll uh catch it on camera

153

00:07:27,409 --> 00:07:24,300

oh that'd be interesting I'd love to see

154

00:07:30,350 --> 00:07:27,419

that and then moving onward they bring

155

00:07:31,790 --> 00:07:30,360

in the straight shot Drillers again from

156

00:07:33,350 --> 00:07:31,800

last year we saw them in the last

157

00:07:35,749 --> 00:07:33,360

episode and they were kind of prepping

158

00:07:38,629 --> 00:07:35,759

for this episode to see what they were

159

00:07:40,430 --> 00:07:38,639

going to uncover so

160

00:07:44,270 --> 00:07:40,440

with this

161

00:07:45,890 --> 00:07:44,280

Mesa we're all anticipating answers

162

00:07:47,510 --> 00:07:45,900

we're like give us the answers what's

163

00:07:49,490 --> 00:07:47,520

under there right what's this

164

00:07:52,790 --> 00:07:49,500

dome-shaped object that we keep hearing

165

00:07:55,129 --> 00:07:52,800

about and they were only able to get in

166

00:07:57,170 --> 00:07:55,139

so deep into the Mesa before they

167

00:07:58,790 --> 00:07:57,180

weren't able to drill anymore the the

168

00:08:01,670 --> 00:07:58,800

main guy stated

169

00:08:04,370 --> 00:08:01,680

we're not able to continue it's just

170

00:08:07,370 --> 00:08:04,380

stopping and it's like it's just coming

171

00:08:10,309 --> 00:08:07,380

against something incredibly hard uh but

172

00:08:12,350 --> 00:08:10,319

prior to hitting this hard object the

173

00:08:14,870 --> 00:08:12,360

the drill was going in the Mesa like

174

00:08:17,689 --> 00:08:14,880

butter that that that's how he described

175

00:08:19,969 --> 00:08:17,699

it and I was hoping to see some evidence

176
00:08:22,909 --> 00:08:19,979
of something when they were able to kind

177
00:08:24,650 --> 00:08:22,919
of pull out every like all of that water

178
00:08:26,930 --> 00:08:24,660
and all the little sediments and and

179
00:08:28,610 --> 00:08:26,940
filaments and stuff to get something if

180
00:08:30,469 --> 00:08:28,620
we that we could see like last year they

181
00:08:33,110 --> 00:08:30,479
were able to get a little piece of metal

182
00:08:35,750 --> 00:08:33,120
they were able to send it to uh Utah

183
00:08:37,969 --> 00:08:35,760
State University I believe and get that

184
00:08:41,149 --> 00:08:37,979
analyzed but in this case we got nothing

185
00:08:43,310 --> 00:08:41,159
but we were left with the idea from

186
00:08:45,710 --> 00:08:43,320
previous episodes and into this one that

187
00:08:49,190 --> 00:08:45,720
there may be two anomalous potential

188
00:08:52,310 --> 00:08:49,200

objects one Dome shaped and one shaped

189

00:08:53,990 --> 00:08:52,320

like a tower or that Tower anomaly that

190

00:08:57,530 --> 00:08:54,000

was caught on radar

191

00:09:00,470 --> 00:08:57,540

a few episodes back could be a void like

192

00:09:03,350 --> 00:09:00,480

a cave tunnel of sorts which will be

193

00:09:05,570 --> 00:09:03,360

really interesting but the drill bit had

194

00:09:07,670 --> 00:09:05,580

a transmitter which was at a frequency

195

00:09:09,410 --> 00:09:07,680

of 33

196

00:09:10,870 --> 00:09:09,420

um megahertz communicating with the

197

00:09:13,670 --> 00:09:10,880

portable

198

00:09:16,970 --> 00:09:13,680

triangulation device on top of the Mesa

199

00:09:18,470 --> 00:09:16,980

and the actual controlled interface on

200

00:09:20,630 --> 00:09:18,480

the drill rig which was really

201
00:09:22,670 --> 00:09:20,640
interesting so Travis and Eric were

202
00:09:25,070 --> 00:09:22,680
keeping an eye on that to see if they

203
00:09:28,009 --> 00:09:25,080
would see anything weird with the signal

204
00:09:31,250 --> 00:09:28,019
or any interferences and sure enough

205
00:09:34,850 --> 00:09:31,260
there was an interference with that 33

206
00:09:38,870 --> 00:09:34,860
megahertz signal what what happened

207
00:09:43,490 --> 00:09:38,880
well and as we uh later found out now

208
00:09:45,410 --> 00:09:43,500
this I thought uh was a very key point

209
00:09:46,690 --> 00:09:45,420
in this show and certainly in this

210
00:09:51,230 --> 00:09:46,700
investigation

211
00:09:53,750 --> 00:09:51,240
we find out that the drill is applying

212
00:09:58,490 --> 00:09:53,760
about 8 000 pounds of pressure that's a

213
00:10:02,030 --> 00:09:58,500

lot of pressure yes and uh and was just

214

00:10:04,070 --> 00:10:02,040

spinning uh the drill operator I think

215

00:10:07,009 --> 00:10:04,080

when when they pulled the drill bit out

216

00:10:09,829 --> 00:10:07,019

he was expecting that drill bit to be

217

00:10:12,829 --> 00:10:09,839

mangled or worn down and as it turned

218

00:10:16,009 --> 00:10:12,839

out the drill bit was actually fine uh

219

00:10:18,170 --> 00:10:16,019

there was there was no wear on it but it

220

00:10:20,870 --> 00:10:18,180

had come up against something and was

221

00:10:21,850 --> 00:10:20,880

just spinning over the top of it

222

00:10:25,130 --> 00:10:21,860

um now

223

00:10:27,949 --> 00:10:25,140

obviously the question is what what is

224

00:10:32,269 --> 00:10:27,959

there that is so eight thousand pounds

225

00:10:35,630 --> 00:10:32,279

of pressure with a drill bit is a lot I

226

00:10:38,930 --> 00:10:35,640

mean a lot of pressure uh Travis's

227

00:10:41,750 --> 00:10:38,940

animated uh response to that wow 8 000

228

00:10:44,210 --> 00:10:41,760

pounds well no it was warranted eight

229

00:10:46,550 --> 00:10:44,220

thousand pounds of pressure is a lot of

230

00:10:47,930 --> 00:10:46,560

pressure on that drill bit and for it to

231

00:10:51,470 --> 00:10:47,940

go nowhere

232

00:10:54,710 --> 00:10:51,480

you know what is it that it is uh coming

233

00:10:56,750 --> 00:10:54,720

up against uh and again we we just don't

234

00:11:00,170 --> 00:10:56,760

know now

235

00:11:01,850 --> 00:11:00,180

um in the end of the episode now it's

236

00:11:04,970 --> 00:11:01,860

always Thomas right that comes up with

237

00:11:08,030 --> 00:11:04,980

the the smart stuff but but Thomas says

238

00:11:10,490 --> 00:11:08,040

Uh there's the uh triangulation device

239

00:11:13,250 --> 00:11:10,500

for the 33 megahertz and that sits on

240

00:11:15,170 --> 00:11:13,260

the top of the Mesa and you need that so

241

00:11:17,269 --> 00:11:15,180

you know how far the drill bit is going

242

00:11:19,370 --> 00:11:17,279

in and also the angle of it you want to

243

00:11:22,550 --> 00:11:19,380

make sure that you're you're moving in

244

00:11:25,310 --> 00:11:22,560

the right direction and and that is it

245

00:11:27,110 --> 00:11:25,320

sitting on the top of the Mesa

246

00:11:30,350 --> 00:11:27,120

um that

247

00:11:32,630 --> 00:11:30,360

Thomas once again spoiler alert right

248

00:11:36,050 --> 00:11:32,640

this is at the end of the episode he

249

00:11:39,230 --> 00:11:36,060

goes hey hey hey hey hey hey hey

250

00:11:42,170 --> 00:11:39,240

why are we drilling from the top down

251

00:11:45,290 --> 00:11:42,180

why don't we just go and and it's like

252

00:11:47,630 --> 00:11:45,300

yeah no kidding right

253

00:11:50,269 --> 00:11:47,640

um I think that all of this I know I

254

00:11:52,130 --> 00:11:50,279

have uh from the very beginning have

255

00:11:54,110 --> 00:11:52,140

thought why not bring something now the

256

00:11:56,150 --> 00:11:54,120

mesa's high you've got to bring up heavy

257

00:11:58,610 --> 00:11:56,160

equipment and somehow get it on top of

258

00:12:01,310 --> 00:11:58,620

the Mesa I understand that it sounds

259

00:12:07,310 --> 00:12:01,320

easier than it probably is to pull off

260

00:12:10,130 --> 00:12:07,320

but why not drill from the top down

261

00:12:13,490 --> 00:12:10,140

all right let's let's let's do that and

262

00:12:15,710 --> 00:12:13,500

and hit the top of the Dome if uh they

263

00:12:17,750 --> 00:12:15,720

or whatever is under there I just said

264

00:12:19,790 --> 00:12:17,760

Dome like I know it's a dome we don't

265

00:12:24,290 --> 00:12:19,800

know what it is but

266

00:12:25,790 --> 00:12:24,300

um uh yeah and they also uh so that's I

267

00:12:28,370 --> 00:12:25,800

think we're gonna see that hopefully

268

00:12:31,250 --> 00:12:28,380

this season that they're gonna get a

269

00:12:32,630 --> 00:12:31,260

drill uh to the top of uh the Mason and

270

00:12:37,009 --> 00:12:32,640

then go straight down

271

00:12:39,590 --> 00:12:37,019

um they sieved okay so they sieved uh

272

00:12:41,569 --> 00:12:39,600

what they drilled out and and didn't

273

00:12:44,629 --> 00:12:41,579

find anything

274

00:12:46,610 --> 00:12:44,639

um and you know no more of the ceramic

275

00:12:48,590 --> 00:12:46,620

tile stuff that's on the outside of the

276

00:12:50,449 --> 00:12:48,600

Space Shuttle that appears to be

277

00:12:52,790 --> 00:12:50,459

manufactured

278

00:12:54,710 --> 00:12:52,800

um they didn't get any fragments at all

279

00:12:57,910 --> 00:12:54,720

uh from what I could see did you see

280

00:13:00,470 --> 00:12:57,920

anything in that mud they they didn't

281

00:13:02,690 --> 00:13:00,480

provide us that uh they just said that

282

00:13:05,030 --> 00:13:02,700

they didn't really see anything but uh

283

00:13:07,730 --> 00:13:05,040

Travis Dr Travis Taylor brought up a

284

00:13:10,670 --> 00:13:07,740

really interesting point uh I would say

285

00:13:13,550 --> 00:13:10,680

a speculative hypothesis that what if

286

00:13:15,410 --> 00:13:13,560

there was this massive force field on

287

00:13:17,329 --> 00:13:15,420

the outside of this object and that's

288

00:13:18,949 --> 00:13:17,339

why they weren't able to get these types

289

00:13:20,690 --> 00:13:18,959

of metal filaments like they were able

290

00:13:22,850 --> 00:13:20,700

to last time

291

00:13:24,530 --> 00:13:22,860

um and I was thinking I don't know for

292

00:13:26,750 --> 00:13:24,540

Dr Travis Taylor to say something like

293

00:13:29,210 --> 00:13:26,760

that that's pretty wild but what's

294

00:13:30,889 --> 00:13:29,220

what's even crazier is when I was

295

00:13:33,290 --> 00:13:30,899

watching the episode I was thinking to

296

00:13:35,329 --> 00:13:33,300

myself what if it was a force field and

297

00:13:37,310 --> 00:13:35,339

then Travis said it and I was like ah

298

00:13:40,550 --> 00:13:37,320

we're on the same wavelength Travis

299

00:13:43,190 --> 00:13:40,560

thank you for that but but it's just he

300

00:13:45,650 --> 00:13:43,200

has no fear in going there no but the

301

00:13:48,470 --> 00:13:45,660

things that it's mere speculation we

302

00:13:50,329 --> 00:13:48,480

have no idea as of yet uh could that

303

00:13:54,110 --> 00:13:50,339

change I sure do hope so that would be

304

00:13:57,829 --> 00:13:54,120

amazing technology to be aware of and to

305

00:13:59,509 --> 00:13:57,839

possess right but is that the case did

306

00:14:01,850 --> 00:13:59,519

they just did they hit something else

307

00:14:04,129 --> 00:14:01,860

like a super hard rock and it wasn't

308

00:14:07,310 --> 00:14:04,139

metal we have to consider these things

309

00:14:10,310 --> 00:14:07,320

as well we weren't given any answers and

310

00:14:11,930 --> 00:14:10,320

what I the disappointing aspect to this

311

00:14:14,629 --> 00:14:11,940

and maybe it was asked but it didn't

312

00:14:17,090 --> 00:14:14,639

make the cut on the show is no one on

313

00:14:20,030 --> 00:14:17,100

the team asked are there any natural

314

00:14:22,490 --> 00:14:20,040

items any natural rocks that your drill

315

00:14:25,850 --> 00:14:22,500

bit wouldn't be able to go through well

316

00:14:31,509 --> 00:14:29,750

um uh the hardest rock

317

00:14:35,449 --> 00:14:31,519

um is diorite

318

00:14:37,310 --> 00:14:35,459

and so I believe I I could be wrong but

319

00:14:39,590 --> 00:14:37,320

it's called die right because of diamond

320

00:14:42,050 --> 00:14:39,600

right Dia

321

00:14:43,449 --> 00:14:42,060

um being the hardest material uh natural

322

00:14:48,730 --> 00:14:43,459

material

323

00:14:55,550 --> 00:14:48,740

so uh could can you okay well let's look

324

00:15:01,210 --> 00:14:58,610

I all right

325

00:15:04,009 --> 00:15:01,220

this is live he's checking this live

326

00:15:04,910 --> 00:15:04,019

right now to give us the answers because

327

00:15:07,790 --> 00:15:04,920

it's a great I mean it's a great

328

00:15:13,069 --> 00:15:07,800

question uh

329

00:15:17,810 --> 00:15:13,079

uh yes you can okay so the

330

00:15:19,689 --> 00:15:17,820

um now that is if it is diorite die or I

331

00:15:22,310 --> 00:15:19,699

it's

332

00:15:26,150 --> 00:15:22,320

d-i-o-r-i-t-e diorite

333

00:15:29,389 --> 00:15:26,160

um but I would I would I would assume

334

00:15:31,610 --> 00:15:29,399

I'm a guy I love mechanical things and

335

00:15:33,350 --> 00:15:31,620

these giant drills and cranes and stuff

336

00:15:36,829 --> 00:15:33,360

that they're bringing out I'm fascinated

337

00:15:38,870 --> 00:15:36,839

with that but a drill like that is

338

00:15:41,629 --> 00:15:38,880

designed to just

339

00:15:44,449 --> 00:15:41,639

cut through anything I don't think it

340

00:15:47,329 --> 00:15:44,459

has issues with well it might was steel

341

00:15:49,189 --> 00:15:47,339

but you would maybe or or something like

342

00:15:52,790 --> 00:15:49,199

that you would change the drill bit and

343

00:15:55,129 --> 00:15:52,800

then continue but to have it stop and

344

00:15:57,889 --> 00:15:55,139

and and hit something that it can't

345

00:15:59,990 --> 00:15:57,899

drill through then what is it and then

346

00:16:02,750 --> 00:16:00,000

it didn't ruin the drill bit as well

347

00:16:06,470 --> 00:16:02,760

yeah I don't think it's I I don't think

348

00:16:10,370 --> 00:16:06,480

what they came up against was Rock

349

00:16:12,769 --> 00:16:10,380

you know I I I don't I I think uh it it

350

00:16:14,870 --> 00:16:12,779

would just like you said earlier just

351
00:16:17,269 --> 00:16:14,880
cut through it like butter and they were

352
00:16:21,290 --> 00:16:17,279
having no issues they got in 160 feet

353
00:16:24,230 --> 00:16:21,300
and and and they spent 30 minutes 30

354
00:16:26,629 --> 00:16:24,240
minutes spinning and you could hear at

355
00:16:30,650 --> 00:16:26,639
eight thousand pounds pressure you could

356
00:16:33,290 --> 00:16:30,660
hear that high pitch uh whiny sound that

357
00:16:35,689 --> 00:16:33,300
you get with any drift you've drilled at

358
00:16:37,850 --> 00:16:35,699
your house and you've tried to drill

359
00:16:40,009 --> 00:16:37,860
through metal with the drill bit and you

360
00:16:43,009 --> 00:16:40,019
get that sound

361
00:16:45,590 --> 00:16:43,019
um or or try to drill through

362
00:16:48,590 --> 00:16:45,600
um reinforced concrete with the wrong

363
00:16:50,210 --> 00:16:48,600

drill bit it just won't go through and

364

00:16:52,790 --> 00:16:50,220

you have to sit and listen to that

365

00:16:55,430 --> 00:16:52,800

squeaking sound and that's exactly what

366

00:16:57,470 --> 00:16:55,440

they got there so I'm not sure uh what

367

00:17:00,350 --> 00:16:57,480

it is they've come up against but

368

00:17:04,189 --> 00:17:00,360

certainly uh something is there to stop

369

00:17:06,289 --> 00:17:04,199

a drill like that I I find it incredible

370

00:17:08,870 --> 00:17:06,299

and while they were drilling through

371

00:17:12,169 --> 00:17:08,880

this this item whatever it may be this

372

00:17:14,870 --> 00:17:12,179

anomalous object Travis had noticed that

373

00:17:17,329 --> 00:17:14,880

the 33 megahertz signal was kind of

374

00:17:20,569 --> 00:17:17,339

spreading so Eric thought of this idea

375

00:17:24,829 --> 00:17:20,579

of okay go ahead and bring the drill bit

376

00:17:27,350 --> 00:17:24,839

in and out tapping on this object and

377

00:17:29,870 --> 00:17:27,360

see how the signal will react and in

378

00:17:32,330 --> 00:17:29,880

fact the signal would go back to its

379

00:17:34,610 --> 00:17:32,340

peak go back to it to its normal 33

380

00:17:37,130 --> 00:17:34,620

megahertz frequency and then when when

381

00:17:40,370 --> 00:17:37,140

the drill would hit this whatever it is

382

00:17:42,529 --> 00:17:40,380

the signal would kind of spread so I was

383

00:17:46,010 --> 00:17:42,539

I really liked that aspect that we were

384

00:17:48,529 --> 00:17:46,020

able to see them do experiments and and

385

00:17:51,409 --> 00:17:48,539

see it kind of in real time where they

386

00:17:53,330 --> 00:17:51,419

had this idea and they acted upon it in

387

00:17:55,370 --> 00:17:53,340

that moment I thought that was really

388

00:17:57,830 --> 00:17:55,380

cool and I would have liked to have

389

00:18:01,430 --> 00:17:57,840

received obviously more information on

390

00:18:02,810 --> 00:18:01,440

that but it also could have been a

391

00:18:05,450 --> 00:18:02,820

propagating

392

00:18:09,950 --> 00:18:05,460

um waveform like the structure could be

393

00:18:12,970 --> 00:18:09,960

big enough as well yes yes yeah yeah now

394

00:18:17,810 --> 00:18:12,980

I am trying to

395

00:18:22,190 --> 00:18:17,820

uh find out what is the hardest now

396

00:18:24,350 --> 00:18:22,200

um meta court site is is really uh

397

00:18:26,390 --> 00:18:24,360

really hard it's that's a classification

398

00:18:30,470 --> 00:18:26,400

of stones

399

00:18:33,830 --> 00:18:30,480

um and you know aside from diamond

400

00:18:36,350 --> 00:18:33,840

uh I you know you know I I believe it's

401
00:18:38,630 --> 00:18:36,360
diorite uh that would be the next Heart

402
00:18:42,049 --> 00:18:38,640
of Stone I'm I'm just very interested in

403
00:18:44,150 --> 00:18:42,059
this seeing this anomaly pop up uh keep

404
00:18:47,510 --> 00:18:44,160
this on the screen

405
00:18:50,150 --> 00:18:47,520
um what does everybody see here well if

406
00:18:53,150 --> 00:18:50,160
you look really closely and Travis

407
00:18:56,690 --> 00:18:53,160
didn't bring this up but those spikes

408
00:18:58,669 --> 00:18:56,700
and there's one two three four five six

409
00:19:01,789 --> 00:18:58,679
not the one in the center

410
00:19:04,490 --> 00:19:01,799
but the other ones those are all exactly

411
00:19:07,190 --> 00:19:04,500
equally spaced

412
00:19:08,750 --> 00:19:07,200
okay yeah they're symmetrical that's I'm

413
00:19:12,890 --> 00:19:08,760

really I'm glad you brought that up

414

00:19:16,130 --> 00:19:12,900

Jimmy yeah yep yep yep yep so what is

415

00:19:19,370 --> 00:19:16,140

the frequency between the spaces and is

416

00:19:22,490 --> 00:19:19,380

this an anomaly just created from the 33

417

00:19:26,270 --> 00:19:22,500

megahertz and uh the drilling that was

418

00:19:30,230 --> 00:19:26,280

going on it is it's something repeatable

419

00:19:33,169 --> 00:19:30,240

um in in the sound Spectrum I don't know

420

00:19:36,490 --> 00:19:33,179

um but those are you can look at it and

421

00:19:40,730 --> 00:19:36,500

see that those are exactly equally

422

00:19:43,669 --> 00:19:40,740

spaced so uh Christina if you can send

423

00:19:46,250 --> 00:19:43,679

me this screen grab

424

00:19:48,230 --> 00:19:46,260

um I will blow it up and I will see what

425

00:19:51,350 --> 00:19:48,240

kind of analysis I can do on this and

426

00:19:53,390 --> 00:19:51,360

see what now down below

427

00:19:55,669 --> 00:19:53,400

you have the graph below and then you

428

00:19:57,950 --> 00:19:55,679

have the Spectrum analysis below that

429

00:20:01,370 --> 00:19:57,960

it's the same thing and you can see the

430

00:20:05,090 --> 00:20:01,380

white lines there I would bet my bottom

431

00:20:07,070 --> 00:20:05,100

dollar that those are exactly spaced

432

00:20:09,470 --> 00:20:07,080

okay so I just don't know what the

433

00:20:12,110 --> 00:20:09,480

frequency separation is between between

434

00:20:15,190 --> 00:20:12,120

them that could be some it's like an

435

00:20:18,590 --> 00:20:15,200

echo right it could be some natural

436

00:20:21,830 --> 00:20:18,600

replication of it but those spikes are

437

00:20:23,990 --> 00:20:21,840

there and then they went away when they

438

00:20:25,490 --> 00:20:24,000

stopped drilling now was it because they

439

00:20:28,789 --> 00:20:25,500

stopped drilling or because the sound

440

00:20:31,669 --> 00:20:28,799

wasn't uh being created but uh very

441

00:20:36,830 --> 00:20:31,679

interesting because you can see it right

442

00:20:39,230 --> 00:20:36,840

and those are six equidistant uh spikes

443

00:20:41,510 --> 00:20:39,240

Ryan brings up a great Point that's

444

00:20:43,549 --> 00:20:41,520

called harmonics and Echo harmonics

445

00:20:46,430 --> 00:20:43,559

which gets smaller and smaller as they

446

00:20:47,930 --> 00:20:46,440

go further from the 33 megahertz is

447

00:20:50,990 --> 00:20:47,940

something that would make sense when

448

00:20:54,890 --> 00:20:51,000

we're looking at this at this right here

449

00:20:56,409 --> 00:20:54,900

so Ryan good job on that

450

00:20:59,690 --> 00:20:56,419

yeah

451
00:21:01,570 --> 00:20:59,700
harmonics and overtones uh over another

452
00:21:04,070 --> 00:21:01,580
tone but you would

453
00:21:06,310 --> 00:21:04,080
assume that

454
00:21:09,350 --> 00:21:06,320
um and this is where

455
00:21:11,630 --> 00:21:09,360
uh this is correct and also incorrect

456
00:21:14,029 --> 00:21:11,640
too as well so uh Square can be a

457
00:21:16,370 --> 00:21:14,039
rectangle rectangle uh can't be a square

458
00:21:19,310 --> 00:21:16,380
kind of thing in that

459
00:21:22,789 --> 00:21:19,320
um these are exact

460
00:21:26,570 --> 00:21:22,799
frequency points harmonic overtones

461
00:21:29,149 --> 00:21:26,580
would would happen further apart uh or

462
00:21:31,970 --> 00:21:29,159
get closer together you know you you

463
00:21:35,210 --> 00:21:31,980

would see them space out further apart

464

00:21:36,590 --> 00:21:35,220

away from that where the these are

465

00:21:40,730 --> 00:21:36,600

equidistant

466

00:21:44,270 --> 00:21:40,740

so I'm not so sure that now if those are

467

00:21:47,029 --> 00:21:44,280

harmonic overtones that's really really

468

00:21:50,090 --> 00:21:47,039

really really strange I just I just

469

00:21:53,570 --> 00:21:50,100

don't know what what this is it you know

470

00:21:58,549 --> 00:21:53,580

are these a thousand you know are these

471

00:21:59,630 --> 00:21:58,559

1K apart 2K apart 2.1 K apart I don't

472

00:22:02,210 --> 00:21:59,640

know

473

00:22:04,850 --> 00:22:02,220

um but uh send me this graph is send me

474

00:22:07,909 --> 00:22:04,860

this screen grab and I'll take a closer

475

00:22:09,130 --> 00:22:07,919

look and see what I can find out I will

476
00:22:13,970 --> 00:22:09,140
moving on

477
00:22:17,029 --> 00:22:13,980
we get to see Thomas and Caleb put up a

478
00:22:18,590 --> 00:22:17,039
trail cam on one of the South like in an

479
00:22:21,169 --> 00:22:18,600
area on the south side of the ranch

480
00:22:23,750 --> 00:22:21,179
because they Thomas had mentioned that a

481
00:22:25,610 --> 00:22:23,760
lot of cameras looking up at the sky but

482
00:22:27,590 --> 00:22:25,620
there aren't a lot really looking at the

483
00:22:29,570 --> 00:22:27,600
ground kind of ground level so they went

484
00:22:32,750 --> 00:22:29,580
ahead and they placed a trail cam on one

485
00:22:34,310 --> 00:22:32,760
of these trees and what they began to

486
00:22:36,350 --> 00:22:34,320
find when they were kind of like walking

487
00:22:40,430 --> 00:22:36,360
around cleaning up the branches and

488
00:22:42,529 --> 00:22:40,440

stuff they find a deer carcass

489

00:22:45,890 --> 00:22:42,539

and

490

00:22:48,409 --> 00:22:45,900

in this they they find the pelvis they

491

00:22:52,250 --> 00:22:48,419

find the spine and they find hide that's

492

00:22:54,169 --> 00:22:52,260

that's about it but it was so compelling

493

00:22:56,570 --> 00:22:54,179

to them they end up bringing a

494

00:22:57,890 --> 00:22:56,580

veterinarian by the name of Haley and it

495

00:23:01,010 --> 00:22:57,900

was mentioned in the show that she

496

00:23:04,010 --> 00:23:01,020

specializes in animal forensics but

497

00:23:06,590 --> 00:23:04,020

we're not really left and we at this

498

00:23:07,970 --> 00:23:06,600

time this is from a year ago now they

499

00:23:10,430 --> 00:23:07,980

weren't in love with a lot of evidence

500

00:23:13,430 --> 00:23:10,440

other than the high the pelvis and the

501
00:23:15,169 --> 00:23:13,440
spine and Haley had mentioned well the

502
00:23:16,730 --> 00:23:15,179
cause of death is unknown there are a

503
00:23:19,730 --> 00:23:16,740
few puncture wounds but there's no blood

504
00:23:22,730 --> 00:23:19,740
on the hide and things like this and

505
00:23:24,590 --> 00:23:22,740
while I I love the word unexplained I'm

506
00:23:28,130 --> 00:23:24,600
like yeah so that's so awesome

507
00:23:30,669 --> 00:23:28,140
there just isn't a significant amount of

508
00:23:33,230 --> 00:23:30,679
evidence to say that it was something

509
00:23:36,230 --> 00:23:33,240
mundane or something unexplained because

510
00:23:38,870 --> 00:23:36,240
what she did mention was that this was a

511
00:23:40,850 --> 00:23:38,880
fun about six months old could it have

512
00:23:42,590 --> 00:23:40,860
been that it died from disease that

513
00:23:45,049 --> 00:23:42,600

that's why there isn't any blood on the

514

00:23:47,990 --> 00:23:45,059

hide is it could it have been that the

515

00:23:51,289 --> 00:23:48,000

that the mother abandoned the the baby

516

00:23:53,029 --> 00:23:51,299

deer right as it had to fend for itself

517

00:23:55,310 --> 00:23:53,039

um we have to think about these things

518

00:23:57,649 --> 00:23:55,320

and maybe those were discussed but again

519

00:23:59,570 --> 00:23:57,659

it didn't make it on the show but then

520

00:24:02,390 --> 00:23:59,580

there was a possible correlation that

521

00:24:05,570 --> 00:24:02,400

was discussed with the burn on the fence

522

00:24:07,730 --> 00:24:05,580

post and the dead deer but we don't see

523

00:24:11,330 --> 00:24:07,740

any burns on the hide or we don't see

524

00:24:14,210 --> 00:24:11,340

any burned bones either and if there was

525

00:24:16,490 --> 00:24:14,220

burns on the carcass it would be an

526
00:24:19,610 --> 00:24:16,500
entirely different and more ominous ball

527
00:24:21,470 --> 00:24:19,620
game but in this case and again only a

528
00:24:23,510 --> 00:24:21,480
limited amount of information makes it

529
00:24:25,970 --> 00:24:23,520
on the show but does it mean that

530
00:24:28,789 --> 00:24:25,980
causation equals correlation not the

531
00:24:31,310 --> 00:24:28,799
deer and this burnt post

532
00:24:34,370 --> 00:24:31,320
have any connection with each other you

533
00:24:35,390 --> 00:24:34,380
know what I thought immediately with the

534
00:24:39,890 --> 00:24:35,400
carcass

535
00:24:44,450 --> 00:24:41,870
but even if it was lightning there would

536
00:24:46,610 --> 00:24:44,460
have been hopefully some evidence at the

537
00:24:51,049 --> 00:24:46,620
very least on the hide but there wasn't

538
00:24:54,169 --> 00:24:51,059

no and not if you're just electrocuted

539

00:24:56,510 --> 00:24:54,179

I'm just saying I'm just saying a you

540

00:24:59,390 --> 00:24:56,520

know a little deer down in the bubbling

541

00:25:03,529 --> 00:24:59,400

brook you know just drinking the water

542

00:25:06,590 --> 00:25:03,539

and then but you know and then just

543

00:25:08,029 --> 00:25:06,600

um that's all I'm saying I it looked the

544

00:25:12,049 --> 00:25:08,039

burnt post

545

00:25:15,470 --> 00:25:12,059

was freaking interesting I stopped and

546

00:25:17,270 --> 00:25:15,480

went now huh all right just in that

547

00:25:20,690 --> 00:25:17,280

specifics and then you know but then

548

00:25:24,049 --> 00:25:20,700

you've got the the the deer and now they

549

00:25:27,110 --> 00:25:24,059

jumped uh to some conclusions about the

550

00:25:31,010 --> 00:25:27,120

deer which made me think

551
00:25:32,990 --> 00:25:31,020
lightning strike all right so uh a

552
00:25:37,490 --> 00:25:33,000
couple of things one they immediately

553
00:25:40,250 --> 00:25:37,500
said ah it wasn't it it wasn't an animal

554
00:25:41,990 --> 00:25:40,260
attack right okay that there was no

555
00:25:44,930 --> 00:25:42,000
blood okay

556
00:25:48,470 --> 00:25:44,940
um uh that the the the deer apparently

557
00:25:49,909 --> 00:25:48,480
just dropped dead and that uh and the

558
00:25:52,190 --> 00:25:49,919
fourth thing that she brought up was

559
00:25:54,649 --> 00:25:52,200
that were puncture wounds because she

560
00:25:56,169 --> 00:25:54,659
picked up the fur or the hide and that

561
00:26:01,310 --> 00:25:56,179
there were puncture wounds that happened

562
00:26:03,890 --> 00:26:01,320
after the deer had died now I think that

563
00:26:07,370 --> 00:26:03,900

it's jumping to a lot of conclusions

564

00:26:10,190 --> 00:26:07,380

before we know uh a whole lot is it

565

00:26:13,190 --> 00:26:10,200

interesting yes in the same apparent

566

00:26:15,710 --> 00:26:13,200

location that you know you start to put

567

00:26:19,370 --> 00:26:15,720

things together the burn mark and and

568

00:26:21,470 --> 00:26:19,380

things I I'm thinking lightning you know

569

00:26:25,070 --> 00:26:21,480

um the whole the whole fence post wasn't

570

00:26:26,870 --> 00:26:25,080

burned nothing else in the area was

571

00:26:30,110 --> 00:26:26,880

burned was it just a simple lightning

572

00:26:33,169 --> 00:26:30,120

strike like deer got electrocuted and

573

00:26:36,830 --> 00:26:33,179

and shocked as you know bubbling brook

574

00:26:40,070 --> 00:26:36,840

you know bubbling bubbling brook deer

575

00:26:41,870 --> 00:26:40,080

deer but see if if it was a lightning

576

00:26:43,850 --> 00:26:41,880

strike don't you think that the top of

577

00:26:45,350 --> 00:26:43,860

the post or the majority of the post

578

00:26:47,930 --> 00:26:45,360

would have been burnt I mean that kind

579

00:26:51,110 --> 00:26:47,940

of angle that we're seeing right here is

580

00:26:54,409 --> 00:26:51,120

odd but I'm also not familiar too much

581

00:26:56,990 --> 00:26:54,419

with with right well keep keep it keep

582

00:27:00,049 --> 00:26:57,000

this image up what do you see right

583

00:27:03,409 --> 00:27:00,059

below at the bottom of the burn mark

584

00:27:06,470 --> 00:27:03,419

here wire right yeah

585

00:27:08,690 --> 00:27:06,480

yeah lightning I mean I don't know I

586

00:27:11,450 --> 00:27:08,700

don't know could I you know I'm I'm you

587

00:27:15,590 --> 00:27:11,460

know I'm just saying it just it feels

588

00:27:17,269 --> 00:27:15,600

like I I'm not there uh I find that very

589

00:27:19,310 --> 00:27:17,279

very compelling

590

00:27:22,070 --> 00:27:19,320

why would that have been caught on fire

591

00:27:24,529 --> 00:27:22,080

unless it's some kids with a with a big

592

00:27:26,630 --> 00:27:24,539

lighter out goofing around and and

593

00:27:28,850 --> 00:27:26,640

trying to burn down a fence post which

594

00:27:31,430 --> 00:27:28,860

wouldn't make any sense but what else

595

00:27:33,470 --> 00:27:31,440

would cause something like that

596

00:27:37,549 --> 00:27:33,480

lightning

597

00:27:41,090 --> 00:27:37,559

right I I would think I I'm you know I

598

00:27:42,769 --> 00:27:41,100

don't think I'm going to to whack here I

599

00:27:46,190 --> 00:27:42,779

think I'm staying pretty close in the

600

00:27:48,169 --> 00:27:46,200

zone I'm thinking lightning and if if

601
00:27:49,430 --> 00:27:48,179
the deer is connected to it maybe the

602
00:27:52,850 --> 00:27:49,440
deer just got

603
00:27:54,649 --> 00:27:52,860
you know bubbling brook well why are

604
00:27:57,049 --> 00:27:54,659
wire could have conducted the lightning

605
00:27:59,630 --> 00:27:57,059
away from the rest of the post so like I

606
00:28:02,510 --> 00:27:59,640
I can get that I can get that I'd say

607
00:28:06,830 --> 00:28:02,520
I'm just saying you know blasted through

608
00:28:09,409 --> 00:28:06,840
the post right glancing glow and zap

609
00:28:11,090 --> 00:28:09,419
that poor cute little deer

610
00:28:13,850 --> 00:28:11,100
bubbling brook

611
00:28:16,850 --> 00:28:13,860
you know you know the poor deer is just

612
00:28:18,769 --> 00:28:16,860
there thirsty just minding its own

613
00:28:22,250 --> 00:28:18,779

business and then trying to live its

614

00:28:24,950 --> 00:28:22,260

best life thing exactly so

615

00:28:28,490 --> 00:28:24,960

but uh very interesting cattle

616

00:28:31,610 --> 00:28:28,500

mutilation puncture wounds no blood okay

617

00:28:33,409 --> 00:28:31,620

we're starting to uh see see something

618

00:28:36,350 --> 00:28:33,419

interesting

619

00:28:39,049 --> 00:28:36,360

um I I you know I'm not so sure now okay

620

00:28:40,850 --> 00:28:39,059

but I will say this I thought the fence

621

00:28:42,169 --> 00:28:40,860

post was interesting puncture marks

622

00:28:45,049 --> 00:28:42,179

interesting

623

00:28:47,330 --> 00:28:45,059

the the bones

624

00:28:49,850 --> 00:28:47,340

seem pretty complete

625

00:28:52,909 --> 00:28:49,860

I thought that was strange the spine

626
00:28:54,710 --> 00:28:52,919
right and and things everything you

627
00:28:56,690 --> 00:28:54,720
would have thought that if it was some

628
00:29:00,470 --> 00:28:56,700
predatory animal that they would have

629
00:29:02,750 --> 00:29:00,480
you know do do their thing and and rip

630
00:29:05,090 --> 00:29:02,760
it to shreds and and that wasn't the

631
00:29:07,130 --> 00:29:05,100
case it seemed seemed pretty complete

632
00:29:08,769 --> 00:29:07,140
were you surprised to see the fur just

633
00:29:13,850 --> 00:29:08,779
sitting there

634
00:29:15,409 --> 00:29:13,860
yes I was and also slightly no it was a

635
00:29:17,029 --> 00:29:15,419
little bit of two and two and the great

636
00:29:18,889 --> 00:29:17,039
thing is that we did a whole episode on

637
00:29:21,350 --> 00:29:18,899
cattle mutilation so we even watched a

638
00:29:23,750 --> 00:29:21,360

whole deer decompose in two weeks so I

639

00:29:26,389 --> 00:29:23,760

kept that image in mind while watching

640

00:29:28,730 --> 00:29:26,399

this and we can see that it's been there

641

00:29:31,130 --> 00:29:28,740

for at the very least two to three weeks

642

00:29:33,049 --> 00:29:31,140

the bones were completely clean yes the

643

00:29:34,610 --> 00:29:33,059

spine was beautifully intact but there's

644

00:29:36,830 --> 00:29:34,620

a lot of pieces that were still missing

645

00:29:38,870 --> 00:29:36,840

then you look at the hive yes it was

646

00:29:42,529 --> 00:29:38,880

beautifully intact now here's the thing

647

00:29:45,470 --> 00:29:42,539

the climate in Utah is very dry so I'm

648

00:29:47,870 --> 00:29:45,480

like okay okay I I can kind of buy that

649

00:29:50,389 --> 00:29:47,880

at the um fur wouldn't be totally all

650

00:29:54,110 --> 00:29:50,399

over the place and decomposed but

651
00:29:58,490 --> 00:29:54,120
here's the butt Jimmy is that if bugs

652
00:30:01,850 --> 00:29:58,500
were going through the fur into the into

653
00:30:05,389 --> 00:30:01,860
the Flesh and eating that right then the

654
00:30:07,490 --> 00:30:05,399
fur shouldn't have been intact okay

655
00:30:08,810 --> 00:30:07,500
um that's I mean we saw that in the

656
00:30:10,430 --> 00:30:08,820
video in the episode of cattle

657
00:30:11,570 --> 00:30:10,440
mutilations

658
00:30:13,970 --> 00:30:11,580
um now could there have been an

659
00:30:16,370 --> 00:30:13,980
exception it's a possibility that the

660
00:30:18,649 --> 00:30:16,380
that the hide was just nicely cleaned

661
00:30:20,690 --> 00:30:18,659
off and you got like the good back of it

662
00:30:22,909 --> 00:30:20,700
right and it's totally dried up I mean

663
00:30:25,250 --> 00:30:22,919

when the veterinarian was holding that

664

00:30:27,230 --> 00:30:25,260

uh it looked very dry it looked very

665

00:30:30,830 --> 00:30:27,240

hard as well like it's been there for

666

00:30:35,990 --> 00:30:30,840

again at the very very least a few weeks

667

00:30:38,810 --> 00:30:36,000

into like a month or two but it was an

668

00:30:41,950 --> 00:30:38,820

interesting look I think overall but the

669

00:30:45,889 --> 00:30:41,960

the aspect of of the spinal cord being

670

00:30:47,990 --> 00:30:45,899

intact that's not necessarily that weird

671

00:30:51,110 --> 00:30:48,000

but it is slightly odd

672

00:30:55,610 --> 00:30:51,120

it is now with the property that big

673

00:30:59,630 --> 00:30:55,620

right how many acres is it 600

674

00:31:01,909 --> 00:30:59,640

right okay I don't know I please

675

00:31:04,610 --> 00:31:01,919

everybody save your email don't correct

676

00:31:07,430 --> 00:31:04,620

me on this but we do know it's a big

677

00:31:09,110 --> 00:31:07,440

chunk of land and I would think that

678

00:31:11,330 --> 00:31:09,120

there are

679

00:31:13,930 --> 00:31:11,340

you know dead animals all over the place

680

00:31:17,029 --> 00:31:13,940

that this isn't you know some anomalous

681

00:31:20,149 --> 00:31:17,039

discovery of of a deer carcass I would

682

00:31:23,090 --> 00:31:20,159

think that uh there there would be many

683

00:31:25,850 --> 00:31:23,100

found there that it the question is the

684

00:31:28,970 --> 00:31:25,860

you know in such close proximity to this

685

00:31:31,430 --> 00:31:28,980

burn Mark um on this fence post which I

686

00:31:34,370 --> 00:31:31,440

do find strange and it'll look fresh

687

00:31:36,230 --> 00:31:34,380

you know so there you go

688

00:31:38,990 --> 00:31:36,240

what's next

689

00:31:40,669 --> 00:31:39,000

well the next thing um we can move on

690

00:31:43,310 --> 00:31:40,679

and yes you know it is it is in the same

691

00:31:45,529 --> 00:31:43,320

area just to hit what you're

692

00:31:47,990 --> 00:31:45,539

to touch on what you mentioned but the

693

00:31:50,930 --> 00:31:48,000

next aspect that we can talk about is

694

00:31:52,970 --> 00:31:50,940

the let me pull up this

695

00:31:56,090 --> 00:31:52,980

nope there's that is the Red Rock

696

00:31:58,310 --> 00:31:56,100

because this is where it's getting like

697

00:32:01,370 --> 00:31:58,320

a little a little interesting here

698

00:32:05,750 --> 00:32:01,380

because we saw last week that dragon and

699

00:32:08,210 --> 00:32:05,760

Caleb they put in a a uh like a a camera

700

00:32:10,370 --> 00:32:08,220

but on a wire to kind of go into the

701
00:32:13,669 --> 00:32:10,380
Mesa and see if they find anything weird

702
00:32:16,190 --> 00:32:13,679
they take some images of this red rock

703
00:32:17,750 --> 00:32:16,200
that supposedly shouldn't be there which

704
00:32:19,970 --> 00:32:17,760
I'm really sad about is that they didn't

705
00:32:22,669 --> 00:32:19,980
take any samples to send that to Utah

706
00:32:25,310 --> 00:32:22,679
State University they only sent these

707
00:32:27,470 --> 00:32:25,320
images and Dave polite us made a really

708
00:32:30,169 --> 00:32:27,480
great point in his review on the show

709
00:32:32,810 --> 00:32:30,179
today on his channel Cam man missing and

710
00:32:34,549 --> 00:32:32,820
he said could it be the residue from the

711
00:32:36,649 --> 00:32:34,559
red smoke bomb that they dropped into

712
00:32:39,350 --> 00:32:36,659
the holes on the side of the Mesa last

713
00:32:41,990 --> 00:32:39,360

year because the celium that Travis

714

00:32:43,669 --> 00:32:42,000

mentioned that's just speculation

715

00:32:46,010 --> 00:32:43,679

because they didn't actually get any

716

00:32:49,010 --> 00:32:46,020

samples to give to the Utah State

717

00:32:53,029 --> 00:32:49,020

University they merely provided images

718

00:32:57,049 --> 00:32:53,039

so how can they be certain that it is

719

00:32:59,870 --> 00:32:57,059

um that that it is um selenium selenium

720

00:33:01,850 --> 00:32:59,880

thank you so much but if they were able

721

00:33:04,130 --> 00:33:01,860

to receive a sample and it turned out to

722

00:33:06,649 --> 00:33:04,140

be red phosphorus then they could have

723

00:33:10,070 --> 00:33:06,659

been like oh okay it's the smoke bomb

724

00:33:14,210 --> 00:33:10,080

that's nothing that strange so right

725

00:33:15,769 --> 00:33:14,220

there I was like uh they they could have

726

00:33:19,130 --> 00:33:15,779

done better and then and then in the

727

00:33:21,950 --> 00:33:19,140

show the team mentioned vapor and I'm

728

00:33:24,710 --> 00:33:21,960

like vapor smoke bombs come on like yeah

729

00:33:28,490 --> 00:33:24,720

two and two together possible now

730

00:33:30,769 --> 00:33:28,500

Pilates is a pretty smart guy all right

731

00:33:33,409 --> 00:33:30,779

and and so

732

00:33:35,269 --> 00:33:33,419

uh I like the idea of putting everything

733

00:33:40,310 --> 00:33:35,279

out there so we can stop and think about

734

00:33:41,649 --> 00:33:40,320

it but this to me uh looks like a

735

00:33:45,289 --> 00:33:41,659

coating

736

00:33:48,470 --> 00:33:45,299

phosphorus and they mentioned right this

737

00:33:50,930 --> 00:33:48,480

looks liquidy uh that it was liquid and

738

00:33:54,049 --> 00:33:50,940

I think it's been there for a while now

739

00:33:57,710 --> 00:33:54,059

that's just my eyeballs but smoke

740

00:34:00,549 --> 00:33:57,720

residue uh from something like that

741

00:34:03,529 --> 00:34:00,559

would be a powdery

742

00:34:07,610 --> 00:34:03,539

non-reflective uh thing and here you can

743

00:34:10,730 --> 00:34:07,620

see that it looks pretty thick and and

744

00:34:12,530 --> 00:34:10,740

you know at some point uh was turned

745

00:34:14,510 --> 00:34:12,540

into a liquid

746

00:34:18,050 --> 00:34:14,520

um you know probably from heat or over

747

00:34:21,349 --> 00:34:18,060

time now again I I don't know I'm just

748

00:34:23,089 --> 00:34:21,359

you know speaking uh from what my eyes

749

00:34:26,869 --> 00:34:23,099

are telling me

750

00:34:28,070 --> 00:34:26,879

um like if you poured paint over uh

751
00:34:31,310 --> 00:34:28,080
concrete

752
00:34:33,950 --> 00:34:31,320
or rocks or whatever the paint would

753
00:34:37,609 --> 00:34:33,960
have that shiny you know and filling and

754
00:34:40,310 --> 00:34:37,619
and smooth over the surface and that's

755
00:34:41,750 --> 00:34:40,320
what this looks like to me here

756
00:34:46,129 --> 00:34:41,760
so

757
00:34:49,430 --> 00:34:46,139
um now is it hard now is it is it is it

758
00:34:51,589 --> 00:34:49,440
sticky uh we don't we don't know any of

759
00:34:54,129 --> 00:34:51,599
these things but uh getting a tent now

760
00:34:57,109 --> 00:34:54,139
you test it and it turns out to be

761
00:35:00,050 --> 00:34:57,119
phosphorus and it's still in that state

762
00:35:01,910 --> 00:35:00,060
that was one heck of a smoke bomb oh

763
00:35:04,130 --> 00:35:01,920

yeah because and the great thing about

764

00:35:05,990 --> 00:35:04,140

that test I think that was last season

765

00:35:07,730 --> 00:35:06,000

or the season prior

766

00:35:10,310 --> 00:35:07,740

what was so cool is that like they

767

00:35:12,530 --> 00:35:10,320

dropped these smoke bombs but no smoke

768

00:35:14,990 --> 00:35:12,540

came out of the Mesa it got like sucked

769

00:35:17,450 --> 00:35:15,000

in and they classified it as a vacuum so

770

00:35:19,370 --> 00:35:17,460

that right there was super cool now if

771

00:35:20,630 --> 00:35:19,380

that's the case for this and it is a

772

00:35:23,870 --> 00:35:20,640

smoke bomb

773

00:35:25,790 --> 00:35:23,880

I would like for them if possible to go

774

00:35:27,890 --> 00:35:25,800

deeper into the camera and see where the

775

00:35:30,290 --> 00:35:27,900

red just stops right if if they were

776
00:35:32,270 --> 00:35:30,300
given the resources to do so that would

777
00:35:34,670 --> 00:35:32,280
be super cool but then I also thought of

778
00:35:37,310 --> 00:35:34,680
like weather conditions let's say it

779
00:35:39,589 --> 00:35:37,320
began it it rained and the water went

780
00:35:42,770 --> 00:35:39,599
down into these little crevices with

781
00:35:44,810 --> 00:35:42,780
that red phosphorus still be there would

782
00:35:47,390 --> 00:35:44,820
it still be stuck on the rocks or would

783
00:35:51,829 --> 00:35:47,400
it have washed away

784
00:35:54,470 --> 00:35:51,839
yeah it's it and how how deep does this

785
00:35:56,569 --> 00:35:54,480
go how much of it is there talking about

786
00:35:59,150 --> 00:35:56,579
a camera lens that's this big that's

787
00:36:02,210 --> 00:35:59,160
being pointed around at a very specific

788
00:36:04,130 --> 00:36:02,220

area so we don't even know what we're

789

00:36:06,829 --> 00:36:04,140

looking at here we're looking at an area

790

00:36:10,730 --> 00:36:06,839

that is this big covered with this or is

791

00:36:12,890 --> 00:36:10,740

it the entire crevice uh leading into

792

00:36:14,630 --> 00:36:12,900

this break in the Rocks you know that

793

00:36:17,210 --> 00:36:14,640

goes down hundreds of feet or something

794

00:36:18,650 --> 00:36:17,220

we don't know uh we don't have those

795

00:36:22,430 --> 00:36:18,660

answers

796

00:36:26,690 --> 00:36:22,440

um if it was me uh I'd be right back up

797

00:36:29,210 --> 00:36:26,700

there uh doing a biopsy I would do a

798

00:36:31,790 --> 00:36:29,220

biopsy on that Cavern I would get

799

00:36:33,829 --> 00:36:31,800

something down there to claw a piece of

800

00:36:37,010 --> 00:36:33,839

that out and and go and get that tested

801
00:36:40,069 --> 00:36:37,020
and see what that is see if it chips off

802
00:36:42,710 --> 00:36:40,079
the wall or is it doesn't it look moist

803
00:36:44,870 --> 00:36:42,720
like it might be sticky and wet okay

804
00:36:47,089 --> 00:36:44,880
well here's the thing Jimmy they get

805
00:36:49,550 --> 00:36:47,099
really heavy rainstorms there I see them

806
00:36:52,970 --> 00:36:49,560
on cider a project webcams all the time

807
00:36:54,950 --> 00:36:52,980
and the water comes down off the Mesa

808
00:36:57,170 --> 00:36:54,960
the run water and there's erosion there

809
00:36:59,630 --> 00:36:57,180
so if they are getting these super

810
00:37:02,690 --> 00:36:59,640
massive heavy rainstorms

811
00:37:05,450 --> 00:37:02,700
would it have washed away this material

812
00:37:07,970 --> 00:37:05,460
from inside of the Mesa like that's my

813
00:37:10,310 --> 00:37:07,980

biggest question and I would need to

814

00:37:12,710 --> 00:37:10,320

know if it was

815

00:37:14,390 --> 00:37:12,720

um you know powder from the smoke bombs

816

00:37:16,250 --> 00:37:14,400

from the smoke

817

00:37:18,530 --> 00:37:16,260

and the vapor I would think that that

818

00:37:19,910 --> 00:37:18,540

would just wash off you would think so

819

00:37:22,490 --> 00:37:19,920

but somehow

820

00:37:24,950 --> 00:37:22,500

some later it's still there yeah now

821

00:37:28,190 --> 00:37:24,960

maybe the water mixed with the

822

00:37:31,430 --> 00:37:28,200

phosphorus and it turned into a sticky

823

00:37:34,370 --> 00:37:31,440

pasty residue and it formed this and and

824

00:37:36,190 --> 00:37:34,380

pilates could be onto something so I

825

00:37:39,410 --> 00:37:36,200

don't know we we don't know anything

826

00:37:42,470 --> 00:37:39,420

unless we go in there and and do a

827

00:37:46,609 --> 00:37:42,480

biopsy uh I don't know what you would

828

00:37:49,130 --> 00:37:46,619

call a collect some samples from this

829

00:37:52,069 --> 00:37:49,140

wall and and see what this actually is

830

00:37:53,950 --> 00:37:52,079

yeah I thought it was a good episode

831

00:37:57,530 --> 00:37:53,960

um now it it it

832

00:37:59,810 --> 00:37:57,540

tended to be a little bit of filler

833

00:38:02,089 --> 00:37:59,820

um I I understand that and setting up

834

00:38:04,730 --> 00:38:02,099

stuff for later on

835

00:38:06,730 --> 00:38:04,740

um in the season but uh we'll see what

836

00:38:09,950 --> 00:38:06,740

next week brings us

837

00:38:12,170 --> 00:38:09,960

I I that would be I would like to see

838

00:38:13,490 --> 00:38:12,180

what happens next but before we end

839

00:38:14,990 --> 00:38:13,500

something else I'd like to mention about

840

00:38:17,630 --> 00:38:15,000

this rock is that there's there's a lot

841

00:38:19,550 --> 00:38:17,640

of iron oxide in the Rocks there and

842

00:38:24,550 --> 00:38:19,560

that's something to consider as well so

843

00:38:28,849 --> 00:38:24,560

but could it be some kind of living

844

00:38:32,150 --> 00:38:28,859

growth like a red moss or or a lichen

845

00:38:35,770 --> 00:38:32,160

right yeah I've seen the movie The Blob

846

00:38:40,130 --> 00:38:35,780

yeah right yeah

847

00:38:42,170 --> 00:38:40,140

we don't know you know there's so many

848

00:38:45,650 --> 00:38:42,180

um you know what's different uh with

849

00:38:47,990 --> 00:38:45,660

this show uh and others that that are

850

00:38:50,569 --> 00:38:48,000

like it is that we've got the location

851
00:38:53,930 --> 00:38:50,579
we've got interesting things to go and

852
00:38:55,970 --> 00:38:53,940
check out and measure and and analyze

853
00:38:58,730 --> 00:38:55,980
and scientifically you know get sensors

854
00:39:02,030 --> 00:38:58,740
on and and do some Laboratory Testing

855
00:39:05,510 --> 00:39:02,040
and so all you can do now uh which is

856
00:39:07,430 --> 00:39:05,520
the exciting part is is get results so I

857
00:39:09,829 --> 00:39:07,440
think we're eventually going to see a

858
00:39:11,930 --> 00:39:09,839
lot of that uh with uh the secret of

859
00:39:13,790 --> 00:39:11,940
Skinwalker Ranch pretty cool

860
00:39:15,770 --> 00:39:13,800
well we are getting closer to the end of

861
00:39:17,870 --> 00:39:15,780
the season so

862
00:39:19,730 --> 00:39:17,880
um hopefully we'll see some really

863
00:39:22,190 --> 00:39:19,740

awesome

864

00:39:23,510 --> 00:39:22,200

new things that we haven't seen prior

865

00:39:26,150 --> 00:39:23,520

hopefully they'll come to New

866

00:39:28,190 --> 00:39:26,160

Revelations on what's going on there how

867

00:39:30,589 --> 00:39:28,200

many of us are left

868

00:39:34,430 --> 00:39:30,599

I'm not sure I don't know if it ends at

869

00:39:36,230 --> 00:39:34,440

10 or 12 episodes but right now but

870

00:39:37,970 --> 00:39:36,240

right now either way we're kind of in

871

00:39:41,630 --> 00:39:37,980

the halfway mark we're on episode six

872

00:39:44,089 --> 00:39:41,640

right so so there's still a lot more to

873

00:39:46,069 --> 00:39:44,099

come right so if it's time we have four

874

00:39:49,310 --> 00:39:46,079

episodes left

875

00:39:52,550 --> 00:39:49,320

it's a nail biter this is great stuff

876

00:39:54,530 --> 00:39:52,560

and what a great review today I enjoyed

877

00:39:56,569 --> 00:39:54,540

this episode

878

00:39:58,970 --> 00:39:56,579

um and we'll see what happens next week

879

00:40:00,530 --> 00:39:58,980

thank you so much Christina thank you

880

00:40:01,970 --> 00:40:00,540

for doing this review with me and I

881

00:40:04,910 --> 00:40:01,980

would like to mention that I have Eric

882

00:40:07,430 --> 00:40:04,920

Bard coming on the show uh just soon

883

00:40:09,650 --> 00:40:07,440

after this one so do check that out and

884

00:40:11,870 --> 00:40:09,660

hear his insights his experiences and

885

00:40:14,150 --> 00:40:11,880

his research that he does on the ranch

886

00:40:15,890 --> 00:40:14,160

that's going to be really awesome Jimmy

887

00:40:18,170 --> 00:40:15,900

thank you so much for doing this review
