

# FADE TO BLACK

with JIMMY CHURCH  
PRESENTS

**MAX HAWTHORNE**  
MEGA SHARKS AND MEGALODON

**THUR JUNE 01 LIVE**  
700-900PM PT

1  
00:00:27,250 --> 00:00:22,269

[Music]

2  
00:00:30,529 --> 00:00:27,260

the smoke radio for the masses of July 8

3  
00:00:32,930 --> 00:00:30,539

1947 the Army Air Forces has announced

4  
00:00:36,049 --> 00:00:32,940

that a flying disc has been found and is

5  
00:00:38,470 --> 00:00:36,059

now in the possession of the army

6  
00:00:40,670 --> 00:00:38,480

change the game

7  
00:00:44,209 --> 00:00:40,680

[Music]

8  
00:00:47,869 --> 00:00:44,219

how quickly our difference is worldwide

9  
00:00:50,210 --> 00:00:47,879

would vanish if we were facing an alien

10  
00:00:52,060 --> 00:00:50,220

threat from outside this work

11  
00:00:52,210 --> 00:00:52,070

[Music]

12  
00:00:54,490 --> 00:00:52,220

[Applause]

13  
00:00:57,470 --> 00:00:54,500

[Music]

14

00:01:00,350 --> 00:00:57,480

this is Fade to Black with your host

15

00:01:01,000 --> 00:01:00,360

Jimmy Church on the game changer Radio

16

00:01:04,250 --> 00:01:01,010

Network

17

00:01:11,390 --> 00:01:07,789

all right good evening Fade to Black

18

00:01:13,149 --> 00:01:11,400

that's right today is Thursday June 1st

19

00:01:16,670 --> 00:01:13,159

a brand new month

20

00:01:20,390 --> 00:01:16,680

2023. tonight Our Guest is Max Hawthorne

21

00:01:24,050 --> 00:01:20,400

we're going to be discussing mega sharks

22

00:01:27,530 --> 00:01:24,060

and megalodon that's right is there

23

00:01:29,510 --> 00:01:27,540

evidence of the giant shark still

24

00:01:33,890 --> 00:01:29,520

existing

25

00:01:35,749 --> 00:01:33,900

ocean is a big place it's really big and

26

00:01:37,789 --> 00:01:35,759

we're going to be discussing all of that

27

00:01:40,010 --> 00:01:37,799

tonight he's an author he's a

28

00:01:42,770 --> 00:01:40,020

screenwriter he's referred to as the

29

00:01:45,530 --> 00:01:42,780

prince of paleo fiction he's best known

30

00:01:48,350 --> 00:01:45,540

for his Cronus Rising series of sci-fi

31

00:01:50,149 --> 00:01:48,360

suspension Thrillers he was born in

32

00:01:52,850 --> 00:01:50,159

Brooklyn attended School in Philadelphia

33

00:01:55,249 --> 00:01:52,860

where he graduated from in the

34

00:01:57,109 --> 00:01:55,259

University of the Arts in addition to

35

00:01:59,569 --> 00:01:57,119

being a best-selling novelist he's a

36

00:02:02,389 --> 00:01:59,579

singer he's a songwriter he didn't

37

00:02:04,850 --> 00:02:02,399

mention one thing about my guitars by

38

00:02:08,150 --> 00:02:04,860

the way right he's a paleontologist

39

00:02:11,690 --> 00:02:08,160

Cryptid researcher igfa world record

40

00:02:14,809 --> 00:02:11,700

holding angler that's that's he fishes

41

00:02:16,550 --> 00:02:14,819

and a voting member of the author's

42

00:02:18,830 --> 00:02:16,560

Guild and I would like to welcome for

43

00:02:21,170 --> 00:02:18,840

the first time to Fade to Black Max

44

00:02:24,309 --> 00:02:21,180

Hawthorne Max he didn't say anything

45

00:02:27,650 --> 00:02:24,319

about the guitars behind me

46

00:02:30,250 --> 00:02:27,660

I honestly didn't notice because I was

47

00:02:33,710 --> 00:02:30,260

so enraptured by our Converse station

48

00:02:36,350 --> 00:02:33,720

and whatnot you know plus I got these

49

00:02:39,050 --> 00:02:36,360

vampire glasses on so I can barely see

50

00:02:41,570 --> 00:02:39,060

the screen yeah okay okay fair enough

51  
00:02:43,070 --> 00:02:41,580  
fair enough all right uh I'm not buying

52  
00:02:46,430 --> 00:02:43,080  
anything that you're selling right now

53  
00:02:49,190 --> 00:02:46,440  
but let's uh let's get to the First Time

54  
00:02:51,110 --> 00:02:49,200  
guest disclaimer Max which is this this

55  
00:02:53,930 --> 00:02:51,120  
is you and I just sitting on my couch

56  
00:02:55,550 --> 00:02:53,940  
having a conversation and where that

57  
00:02:56,990 --> 00:02:55,560  
conversation starts or starts where it

58  
00:02:59,390 --> 00:02:57,000  
ends it ends but we're gonna end his

59  
00:03:02,089 --> 00:02:59,400  
friends there you go the disclaimer's

60  
00:03:03,770 --> 00:03:02,099  
over are you ready that sounds great and

61  
00:03:05,390 --> 00:03:03,780  
by the way thank you for having me on

62  
00:03:07,250 --> 00:03:05,400  
tonight it's it's an honor and a

63  
00:03:10,790 --> 00:03:07,260

privilege as as Benny Hill used to say

64

00:03:13,790 --> 00:03:10,800

yeah well the the honor and privilege is

65

00:03:16,790 --> 00:03:13,800

all mine um this is what I meant yeah

66

00:03:19,550 --> 00:03:16,800

okay good good that's also what Benny

67

00:03:23,930 --> 00:03:19,560

Hill used to say that I used to love

68

00:03:26,229 --> 00:03:23,940

that I remember I I was like in sixth

69

00:03:30,110 --> 00:03:26,239

grade right in there right it's great

70

00:03:31,670 --> 00:03:30,120

and uh I go over to spend the night at

71

00:03:34,970 --> 00:03:31,680

one of my neighbors house his name is

72

00:03:38,330 --> 00:03:34,980

Keith and I'm like 10 and he goes dude

73

00:03:41,570 --> 00:03:38,340

there's a show called Benny Hill

74

00:03:43,869 --> 00:03:41,580

and once in a while they'll have a naked

75

00:03:48,289 --> 00:03:43,879

lady on it

76

00:03:50,350 --> 00:03:48,299

I'm 10 right I'm like when does this

77

00:03:54,229 --> 00:03:50,360

start

78

00:03:55,850 --> 00:03:54,239

and uh and uh never did see what I never

79

00:03:59,710 --> 00:03:55,860

did see the naked lady running around

80

00:04:02,270 --> 00:03:59,720

maybe once but but uh yeah

81

00:04:05,390 --> 00:04:02,280

Benny Hill Benny Hill for a minute there

82

00:04:08,330 --> 00:04:05,400

kind of freaked out the world for sure

83

00:04:10,789 --> 00:04:08,340

he was hilarious I mean he could do more

84

00:04:13,009 --> 00:04:10,799

with a look than most stand-up comedians

85

00:04:15,050 --> 00:04:13,019

could do for their entire repertoire I

86

00:04:18,770 --> 00:04:15,060

love that show yeah yeah love that show

87

00:04:21,170 --> 00:04:18,780

the ocean let's start here

88

00:04:26,689 --> 00:04:21,180

the ocean is a big place

89

00:04:30,050 --> 00:04:26,699

and one of the quotes that gets used a

90

00:04:34,490 --> 00:04:30,060

lot when we talk about uh our planet is

91

00:04:36,530 --> 00:04:34,500

that we've we've mapped we've seen you

92

00:04:38,810 --> 00:04:36,540

know less than five percent of the

93

00:04:41,990 --> 00:04:38,820

oceans in the world and that's that's a

94

00:04:44,530 --> 00:04:42,000

mind-blowing number and I'm not even

95

00:04:47,749 --> 00:04:44,540

sure if it's that high right

96

00:04:50,510 --> 00:04:47,759

but when I was a kid

97

00:04:53,930 --> 00:04:50,520

I had a couple of uh experiences with

98

00:04:57,650 --> 00:04:53,940

sharks okay like direct like you know

99

00:05:00,530 --> 00:04:57,660

kind of stuff and and this is down in

100

00:05:03,110 --> 00:05:00,540

the Pacific Ocean in Central America and

101

00:05:08,689 --> 00:05:03,120

uh and I'm out sailing

102

00:05:10,370 --> 00:05:08,699

and off to my left I'm I'm I'm steering

103

00:05:13,010 --> 00:05:10,380

I forget what you call that when you're

104

00:05:16,490 --> 00:05:13,020

sailing right but I'm at the wheel

105

00:05:22,070 --> 00:05:16,500

and my dad is in front of me he is on

106

00:05:25,249 --> 00:05:22,080

the starboard side of the jib sale his

107

00:05:28,010 --> 00:05:25,259

back is to that the owner of the boat is

108

00:05:30,469 --> 00:05:28,020

down below deck I can see him in the

109

00:05:32,409 --> 00:05:30,479

galley I'm in the back it's the three of

110

00:05:35,689 --> 00:05:32,419

it's on the sailboat

111

00:05:37,730 --> 00:05:35,699

30-foot boat 33 foot decent sized

112

00:05:40,909 --> 00:05:37,740

sailboat and we're we're out we're doing

113

00:05:43,670 --> 00:05:40,919

our thing and then I'm going to guess

114

00:05:46,310 --> 00:05:43,680

and say a quarter mile

115

00:05:50,270 --> 00:05:46,320

somewhere between 100 yards and 400

116

00:05:51,710 --> 00:05:50,280

yards out you know out uh to on the port

117

00:05:54,590 --> 00:05:51,720

side my left

118

00:05:56,570 --> 00:05:54,600

this manta ray

119

00:05:59,810 --> 00:05:56,580

comes out of the water

120

00:06:02,450 --> 00:05:59,820

and and I don't know how big it is but

121

00:06:06,230 --> 00:06:02,460

it's bigger than the boat we are on okay

122

00:06:08,870 --> 00:06:06,240

wow and it catches the wind and it's

123

00:06:11,390 --> 00:06:08,880

coming towards me and its mouth you

124

00:06:13,010 --> 00:06:11,400

could have drove a car into its mouth

125

00:06:14,629 --> 00:06:13,020

all right I mean I'm looking right I

126

00:06:16,670 --> 00:06:14,639

could see the ribs on the inside of his

127

00:06:19,310 --> 00:06:16,680

mouth thing and then he goes back under

128

00:06:23,270 --> 00:06:19,320

the water and I never saw it again my

129

00:06:25,249 --> 00:06:23,280

point being it freaked me out that there

130

00:06:27,110 --> 00:06:25,259

is something like that and after that

131

00:06:28,370 --> 00:06:27,120

your head's on a swivel right you're

132

00:06:32,629 --> 00:06:28,380

just looking

133

00:06:36,770 --> 00:06:32,639

you don't know what is in the oceans and

134

00:06:40,249 --> 00:06:36,780

that thing was huge and and for me it

135

00:06:42,469 --> 00:06:40,259

was an experience of a lifetime we you

136

00:06:45,469 --> 00:06:42,479

know and and I never saw it again but

137

00:06:47,110 --> 00:06:45,479

there is stuff down there that we just

138

00:06:50,330 --> 00:06:47,120

don't have a clue about

139

00:06:53,150 --> 00:06:50,340

and when we talk about giant sharks or

140

00:06:56,210 --> 00:06:53,160

megalodons and Things They Live

141

00:06:58,249 --> 00:06:56,220

apparently forever right and that they

142

00:07:00,770 --> 00:06:58,259

don't need to come up they're not going

143

00:07:02,330 --> 00:07:00,780

to and we may never see them if they

144

00:07:04,730 --> 00:07:02,340

don't want to be found

145

00:07:07,189 --> 00:07:04,740

right

146

00:07:08,629 --> 00:07:07,199

um I don't know by the way the thing you

147

00:07:10,249 --> 00:07:08,639

said with the ribs with the manta ray

148

00:07:11,629 --> 00:07:10,259

that probably would have been its gills

149

00:07:14,350 --> 00:07:11,639

that you were seeing they have like

150

00:07:16,969 --> 00:07:14,360

gills Gill rakers

151  
00:07:19,309 --> 00:07:16,979  
they look like ribs yeah you would know

152  
00:07:22,089 --> 00:07:19,319  
better than me I just know that for that

153  
00:07:24,830 --> 00:07:22,099  
instant I looked right down its mouth

154  
00:07:27,350 --> 00:07:24,840  
which was huge

155  
00:07:29,809 --> 00:07:27,360  
I'm not sure it was it was 10 feet wide

156  
00:07:31,370 --> 00:07:29,819  
I guess that's crazy because I mean most

157  
00:07:33,770 --> 00:07:31,380  
manta rays don't get more than 20 feet

158  
00:07:37,129 --> 00:07:33,780  
wingspan so if you saw one that size

159  
00:07:38,589 --> 00:07:37,139  
that was a like a mutant Ray of mythical

160  
00:07:42,890 --> 00:07:38,599  
proportions

161  
00:07:44,990 --> 00:07:42,900  
it was crazy big it was crazy big

162  
00:07:48,170 --> 00:07:45,000  
um it's one of those stories right it's

163  
00:07:50,570 --> 00:07:48,180

out at Sea it's my story and I'm gonna

164

00:07:51,830 --> 00:07:50,580

stick to it that's true but uh you were

165

00:07:53,029 --> 00:07:51,840

right when you said five percent but

166

00:07:55,370 --> 00:07:53,039

that's only five percent of the ocean

167

00:07:58,249 --> 00:07:55,380

floor it doesn't include the average of

168

00:08:00,830 --> 00:07:58,259

11 000 or so feet two plus miles of

169

00:08:02,749 --> 00:08:00,840

water above that ocean floor see what

170

00:08:05,029 --> 00:08:02,759

I'm saying so from a cubic perspective

171

00:08:09,409 --> 00:08:05,039

we've seen a grain of sand on a beach

172

00:08:12,290 --> 00:08:09,419

effectively of the ocean and and we all

173

00:08:14,390 --> 00:08:12,300

know it's it's it's deep and there are

174

00:08:17,390 --> 00:08:14,400

deep sections of it tonight we're going

175

00:08:18,909 --> 00:08:17,400

to be talking about giant sharks and and

176  
00:08:23,270 --> 00:08:18,919  
megalodon

177  
00:08:25,969 --> 00:08:23,280  
how how deep where's their favorite spot

178  
00:08:28,070 --> 00:08:25,979  
as far as depths go

179  
00:08:29,650 --> 00:08:28,080  
are we talking about the extinct

180  
00:08:31,129 --> 00:08:29,660  
characters

181  
00:08:32,570 --> 00:08:31,139  
megalodon or are you talking about

182  
00:08:36,070 --> 00:08:32,580  
sharks in general or what are we talking

183  
00:08:38,990 --> 00:08:36,080  
about here I'm confused

184  
00:08:42,350 --> 00:08:39,000  
that's a complicated question there well

185  
00:08:44,870 --> 00:08:42,360  
you see uh it's sort of it's sort of a

186  
00:08:48,170 --> 00:08:44,880  
complicated question when we're when

187  
00:08:50,990 --> 00:08:48,180  
we're talking about uh sharks we know

188  
00:08:55,130 --> 00:08:51,000

that we see those on the shoreline and

189

00:08:58,130 --> 00:08:55,140

things but as the bigger sharks get do

190

00:09:00,590 --> 00:08:58,140

they like to get into deeper water and

191

00:09:03,230 --> 00:09:00,600

we don't necessarily make contact

192

00:09:05,630 --> 00:09:03,240

okay so well I think that depends on the

193

00:09:08,570 --> 00:09:05,640

species for example you get animals like

194

00:09:10,670 --> 00:09:08,580

uh six gills and sleeper sharks and

195

00:09:13,250 --> 00:09:10,680

stuff that are comfortable in extreme

196

00:09:14,930 --> 00:09:13,260

depths uh there was some video you

197

00:09:17,630 --> 00:09:14,940

probably seen where they were claiming

198

00:09:20,690 --> 00:09:17,640

it was a 60-foot Megalodon and really it

199

00:09:23,090 --> 00:09:20,700

was maybe a 25 or 30 foot uh six-year

200

00:09:25,850 --> 00:09:23,100

sleeper shark gnawing on a bait cage

201  
00:09:28,550 --> 00:09:25,860  
which is still in a men's shark but you

202  
00:09:30,949 --> 00:09:28,560  
see at that depth they're very lethargic

203  
00:09:33,710 --> 00:09:30,959  
they don't you know that fish is more of

204  
00:09:35,810 --> 00:09:33,720  
a scavenger at that point in that size

205  
00:09:39,009 --> 00:09:35,820  
Etc you're looking for 100 Predators I

206  
00:09:41,389 --> 00:09:39,019  
mean uh gosh Threshers go pretty deep

207  
00:09:42,829 --> 00:09:41,399  
for example that's why they have those

208  
00:09:45,290 --> 00:09:42,839  
huge eyes with their counter current

209  
00:09:47,090 --> 00:09:45,300  
heat exchangers so they can see and that

210  
00:09:48,470 --> 00:09:47,100  
kind of stuff come on

211  
00:09:50,690 --> 00:09:48,480  
um swordfish although that's not sharp

212  
00:09:52,430 --> 00:09:50,700  
but most of your sharks like white

213  
00:09:53,870 --> 00:09:52,440

sharks makos things like that your

214

00:09:56,210 --> 00:09:53,880

pelagic fish

215

00:09:58,550 --> 00:09:56,220

um they tend to be more in warmer Waters

216

00:10:01,009 --> 00:09:58,560

they don't go super deep often

217

00:10:03,769 --> 00:10:01,019

um white sharks only are normally I mean

218

00:10:05,870 --> 00:10:03,779

they sometimes dive deep but

219

00:10:07,970 --> 00:10:05,880

it doesn't happen often I think like

220

00:10:10,550 --> 00:10:07,980

there's one instance for example of the

221

00:10:12,470 --> 00:10:10,560

farallons where killer whales killed a

222

00:10:14,449 --> 00:10:12,480

great white and then every white shark

223

00:10:16,490 --> 00:10:14,459

in the area disappeared for the rest of

224

00:10:17,990 --> 00:10:16,500

the season and they tracked one or two

225

00:10:19,970 --> 00:10:18,000

of them with trackers and they found out

226

00:10:21,949 --> 00:10:19,980

that once they realized one of their

227

00:10:24,769 --> 00:10:21,959

brothers had been taken down by orcas

228

00:10:26,570 --> 00:10:24,779

they all dive down to 1500 feet or

229

00:10:28,370 --> 00:10:26,580

something which is more than a worker

230

00:10:29,750 --> 00:10:28,380

can do in terms of hunting and they all

231

00:10:31,850 --> 00:10:29,760

swam to Hawaii

232

00:10:33,350 --> 00:10:31,860

so at that point they realized

233

00:10:34,910 --> 00:10:33,360

discretion was the better part of value

234

00:10:37,970 --> 00:10:34,920

and they ran away from their natural

235

00:10:39,710 --> 00:10:37,980

predator and so forth but I mean when

236

00:10:41,630 --> 00:10:39,720

you're talking about a shark like uh

237

00:10:44,030 --> 00:10:41,640

megalodon or any of the other extinct

238

00:10:45,650 --> 00:10:44,040

Mega two sharks most of those fish were

239

00:10:49,069 --> 00:10:45,660

tend to be tempered or warm water

240

00:10:51,290 --> 00:10:49,079

animals they would be more Coastal they

241

00:10:53,810 --> 00:10:51,300

would be in the upper part of the of the

242

00:10:55,910 --> 00:10:53,820

water column and they ate well

243

00:10:58,430 --> 00:10:55,920

especially Megalodon and such would feed

244

00:11:00,470 --> 00:10:58,440

on whales and things like that which are

245

00:11:02,810 --> 00:11:00,480

also tend to be usually even from like

246

00:11:05,930 --> 00:11:02,820

surface to 300 feet or so in depth

247

00:11:07,190 --> 00:11:05,940

normally so I mean you stay where the

248

00:11:09,350 --> 00:11:07,200

food is

249

00:11:14,290 --> 00:11:09,360

you know what I mean right right well

250

00:11:17,569 --> 00:11:14,300

that's the beaches that's uh

251

00:11:20,509 --> 00:11:17,579

there's a there's an old joke in comedy

252

00:11:23,389 --> 00:11:20,519

that goes around why do you know why do

253

00:11:24,650 --> 00:11:23,399

sharks attack or why do sharks hang out

254

00:11:27,050 --> 00:11:24,660

of beaches and

255

00:11:28,790 --> 00:11:27,060

it's where the food is it's you know

256

00:11:31,069 --> 00:11:28,800

that's if you're going to be doing that

257

00:11:34,850 --> 00:11:31,079

how common

258

00:11:39,290 --> 00:11:34,860

um is are humans and again I'm just here

259

00:11:44,690 --> 00:11:39,300

to learn right are humans just as tasty

260

00:11:47,630 --> 00:11:44,700

uh to a shark as anything else

261

00:11:49,610 --> 00:11:47,640

uh well let's see primates don't tend to

262

00:11:51,949 --> 00:11:49,620

be normally on the menu

263

00:11:53,509 --> 00:11:51,959

and again this 10 that's a species

264

00:11:55,370 --> 00:11:53,519

specific question

265

00:11:57,769 --> 00:11:55,380

um generally speaking they consider like

266

00:11:59,509 --> 00:11:57,779

shark attacks from a great white tend to

267

00:12:01,610 --> 00:11:59,519

be accidental

268

00:12:03,230 --> 00:12:01,620

you know misinterpretation they see a

269

00:12:06,170 --> 00:12:03,240

diver on the surface or on a surfboard

270

00:12:08,150 --> 00:12:06,180

and they believe it's a seal and that's

271

00:12:11,269 --> 00:12:08,160

how they like to hunt they'll be closer

272

00:12:13,430 --> 00:12:11,279

down to the bottom and they have uh they

273

00:12:15,410 --> 00:12:13,440

have uh I'm sure you're familiar with

274

00:12:18,290 --> 00:12:15,420

their color patterns they're darker on

275

00:12:19,910 --> 00:12:18,300

the top and white underneath that's

276

00:12:24,050 --> 00:12:19,920

counter shading

277

00:12:25,790 --> 00:12:24,060

reason

278

00:12:27,829 --> 00:12:25,800

um that's the white part is so that when

279

00:12:29,509 --> 00:12:27,839

a shark is swimming up on the surface or

280

00:12:31,910 --> 00:12:29,519

near the surface and if there's

281

00:12:34,250 --> 00:12:31,920

something under him looking up and

282

00:12:37,310 --> 00:12:34,260

considering making a Mew out of him like

283

00:12:39,470 --> 00:12:37,320

a larger shark an orca an enormous squid

284

00:12:41,090 --> 00:12:39,480

whatever it might be that white belly

285

00:12:43,069 --> 00:12:41,100

tends to blend in with the light at the

286

00:12:43,910 --> 00:12:43,079

surface and camouflages them a little

287

00:12:45,889 --> 00:12:43,920

bit

288

00:12:47,930 --> 00:12:45,899

whereas if he's hunting something and

289

00:12:49,850 --> 00:12:47,940

lurking along near the bottom you know

290

00:12:52,370 --> 00:12:49,860

great whites when they get big they

291

00:12:55,550 --> 00:12:52,380

change from episcoporous diet that means

292

00:12:58,490 --> 00:12:55,560

fish eating to Honey more marine mammals

293

00:13:00,170 --> 00:12:58,500

like pinnipeds things of that nature and

294

00:13:02,629 --> 00:13:00,180

then because they get bigger and slower

295

00:13:03,590 --> 00:13:02,639

which is a fact they become more like a

296

00:13:05,329 --> 00:13:03,600

Mugger

297

00:13:07,970 --> 00:13:05,339

you know so they want to creep along the

298

00:13:10,190 --> 00:13:07,980

bottom and their dark color on their

299

00:13:12,050 --> 00:13:10,200

dorsal region lets them blend in with

300

00:13:13,310 --> 00:13:12,060

the sea floor better and then when they

301  
00:13:15,290 --> 00:13:13,320  
see their prey looking out they're

302  
00:13:18,050 --> 00:13:15,300  
looking up they try and Rush up at it

303  
00:13:20,750 --> 00:13:18,060  
and get that one bite in do a lot of

304  
00:13:22,490 --> 00:13:20,760  
damage spit it out so they don't get

305  
00:13:23,810 --> 00:13:22,500  
hurt you know lose an eye or something

306  
00:13:25,490 --> 00:13:23,820  
like that I mean obviously if you're a

307  
00:13:27,110 --> 00:13:25,500  
seal you're going to fight for your life

308  
00:13:29,269 --> 00:13:27,120  
and you're going to bite

309  
00:13:32,210 --> 00:13:29,279  
a shark that's blind in one eye or both

310  
00:13:33,769 --> 00:13:32,220  
eyes is in trouble so they they spit it

311  
00:13:35,509 --> 00:13:33,779  
out they do the bite and spit routine

312  
00:13:38,329 --> 00:13:35,519  
they wait for it to Hemorrhage to bleed

313  
00:13:40,970 --> 00:13:38,339

out you know and then they come and they

314

00:13:43,250 --> 00:13:40,980

eat it okay that's that's J that's the

315

00:13:45,230 --> 00:13:43,260

white sharks modus operandi as they say

316

00:13:46,790 --> 00:13:45,240

that's tiger sharks can be a little more

317

00:13:48,650 --> 00:13:46,800

uh

318

00:13:50,210 --> 00:13:48,660

I don't say they actually Target people

319

00:13:51,769 --> 00:13:50,220

but there are many instances in Hawaii

320

00:13:53,150 --> 00:13:51,779

where they seem to if you're on a

321

00:13:54,530 --> 00:13:53,160

surfboard and they keep coming after you

322

00:13:56,629 --> 00:13:54,540

and coming after you and it's not like

323

00:13:58,730 --> 00:13:56,639

Oh I thought you were a seal you know

324

00:14:00,050 --> 00:13:58,740

they seem to know and bull sharks

325

00:14:02,269 --> 00:14:00,060

sometimes they'll come after you and

326

00:14:04,550 --> 00:14:02,279

they won't let go they literally grab

327

00:14:06,350 --> 00:14:04,560

one they won't release but I mean human

328

00:14:07,790 --> 00:14:06,360

beings are not normally part of the menu

329

00:14:09,290 --> 00:14:07,800

but a lot of the animals are

330

00:14:11,870 --> 00:14:09,300

opportunistic

331

00:14:13,730 --> 00:14:11,880

know right they're like politicians you

332

00:14:16,629 --> 00:14:13,740

know they see an opportunity they want

333

00:14:19,970 --> 00:14:16,639

to sink their teeth into it

334

00:14:22,069 --> 00:14:19,980

again when I was a kid this is a Donna

335

00:14:26,090 --> 00:14:22,079

Panama too as well

336

00:14:29,569 --> 00:14:26,100

um uh had this uh friend of mine sitting

337

00:14:31,850 --> 00:14:29,579

next to me left in geometry class and I

338

00:14:33,710 --> 00:14:31,860

don't know what brought the subject up

339

00:14:38,690 --> 00:14:33,720

but we're talking about

340

00:14:39,590 --> 00:14:38,700

jaws and he says I was attacked by a

341

00:14:42,410 --> 00:14:39,600

shark

342

00:14:44,990 --> 00:14:42,420

I said you were because yeah check this

343

00:14:46,210 --> 00:14:45,000

out and he stands up and he pulls his

344

00:14:51,230 --> 00:14:46,220

shirt up

345

00:14:53,810 --> 00:14:51,240

and this he had the it's like right out

346

00:14:57,829 --> 00:14:53,820

of the movies right zigzag and teeth

347

00:14:59,990 --> 00:14:57,839

marks all the way around is all the way

348

00:15:02,629 --> 00:15:00,000

on his back like

349

00:15:06,350 --> 00:15:02,639

was this Rodney Fox by any chance no

350

00:15:09,710 --> 00:15:06,360

same with uh Jeff Scott okay okay so

351

00:15:11,329 --> 00:15:09,720

Jeff says to me I said what what

352

00:15:12,670 --> 00:15:11,339

happened he said I was out of toboga

353

00:15:15,170 --> 00:15:12,680

Island

354

00:15:16,790 --> 00:15:15,180

cliff diving there's a we had a cliff

355

00:15:18,949 --> 00:15:16,800

diving spot out at this island it's

356

00:15:21,110 --> 00:15:18,959

really cool we all did it and I never

357

00:15:24,290 --> 00:15:21,120

did it after he told me this story by

358

00:15:29,629 --> 00:15:24,300

the way but anyway he's cliff diving and

359

00:15:31,970 --> 00:15:29,639

he had a a life preserver on and when he

360

00:15:35,269 --> 00:15:31,980

was cliff diving he was trying to swim

361

00:15:37,730 --> 00:15:35,279

deep down as far as he could go with the

362

00:15:40,129 --> 00:15:37,740

light preserver on and then float to the

363

00:15:43,189 --> 00:15:40,139

top right that's it that that's his and

364

00:15:45,050 --> 00:15:43,199

he says so he's doing that he does the

365

00:15:47,810 --> 00:15:45,060

cliff dive he's diving down he said

366

00:15:50,930 --> 00:15:47,820

right out of the black boom this shark

367

00:15:54,530 --> 00:15:50,940

just comes out of nowhere grabs him and

368

00:15:56,389 --> 00:15:54,540

pulls him down and then the next thing

369

00:15:58,550 --> 00:15:56,399

he knew he was on the surface of the

370

00:16:02,990 --> 00:15:58,560

water it bit him

371

00:16:05,389 --> 00:16:03,000

and let him go it didn't eat him

372

00:16:08,509 --> 00:16:05,399

you know what I mean it didn't like bite

373

00:16:12,110 --> 00:16:08,519

through him it bit him and then let him

374

00:16:14,990 --> 00:16:12,120

go exactly what you're saying here and

375

00:16:16,610 --> 00:16:15,000

uh they medevaced him out helicopter the

376

00:16:20,590 --> 00:16:16,620

whole thing you know sewed him back up

377

00:16:25,370 --> 00:16:20,600

but it was a horrendously big big sure

378

00:16:27,710 --> 00:16:25,380

big mouth that that bit him but

379

00:16:31,569 --> 00:16:27,720

um let him go bit him and let him go

380

00:16:33,949 --> 00:16:31,579

did they say what species it was no no

381

00:16:36,170 --> 00:16:33,959

and he had a light preserver on you said

382

00:16:38,150 --> 00:16:36,180

yeah yeah that may have also contributed

383

00:16:40,310 --> 00:16:38,160

to saving his life because that would

384

00:16:42,470 --> 00:16:40,320

have borne some of the brunt of the you

385

00:16:44,329 --> 00:16:42,480

know the blow puncture reduce some of

386

00:16:46,610 --> 00:16:44,339

the puncturing of the teeth which they

387

00:16:48,230 --> 00:16:46,620

rely on that extreme sharpness and also

388

00:16:53,269 --> 00:16:48,240

probably didn't taste very palatable as

389

00:16:55,490 --> 00:16:53,279

well yeah so in a PE class right later

390

00:16:58,009 --> 00:16:55,500

every time I would look at we you know

391

00:16:59,990 --> 00:16:58,019

playing soccer and I would just look at

392

00:17:02,749 --> 00:17:00,000

that and just imagine the size of the

393

00:17:05,449 --> 00:17:02,759

shark it it wasn't small you know this

394

00:17:07,490 --> 00:17:05,459

was this was something pretty big but it

395

00:17:09,230 --> 00:17:07,500

let them go well there's a there's

396

00:17:11,270 --> 00:17:09,240

formulas out there if I can get the

397

00:17:13,490 --> 00:17:11,280

measurements of the bite for you from

398

00:17:16,809 --> 00:17:13,500

you I can figure out how approximately

399

00:17:20,210 --> 00:17:16,819

how big the shark was and um hi Jamie

400

00:17:24,350 --> 00:17:20,220

c49 nice to meet you

401  
00:17:26,150 --> 00:17:24,360  
sorry the NEC 49 oh yeah yeah I don't I

402  
00:17:27,949 --> 00:17:26,160  
don't watch the chat

403  
00:17:30,470 --> 00:17:27,959  
I thought somebody just walked in your

404  
00:17:32,630 --> 00:17:30,480  
house no no I used to have do the the

405  
00:17:34,250 --> 00:17:32,640  
host myself so and all that so out of

406  
00:17:37,130 --> 00:17:34,260  
reflex I I tend to say hi to people when

407  
00:17:40,730 --> 00:17:37,140  
they say hi absolutely everybody say

408  
00:17:42,230 --> 00:17:40,740  
hello to Max so he can run down a

409  
00:17:47,029 --> 00:17:42,240  
thousand people real quick just

410  
00:17:48,710 --> 00:17:47,039  
everybody just go really is holy crap

411  
00:17:50,570 --> 00:17:48,720  
um now

412  
00:17:52,970 --> 00:17:50,580  
um

413  
00:17:55,430 --> 00:17:52,980

earlier this week

414

00:17:57,770 --> 00:17:55,440

um in fact it was yesterday uh there was

415

00:18:02,029 --> 00:17:57,780

a press release about you may have seen

416

00:18:06,529 --> 00:18:02,039

it the Titanic they have spotted a

417

00:18:09,289 --> 00:18:06,539

Megalodon necklace a tooth necklace

418

00:18:11,510 --> 00:18:09,299

um inside of the Titanic in the uh

419

00:18:13,789 --> 00:18:11,520

published the pictures of it it's a gold

420

00:18:16,250 --> 00:18:13,799

necklace the giant tooth it's it's

421

00:18:18,470 --> 00:18:16,260

pretty nuts

422

00:18:21,190 --> 00:18:18,480

um I actually left that down there

423

00:18:22,930 --> 00:18:21,200

myself when I was diving the last time

424

00:18:26,570 --> 00:18:22,940

how

425

00:18:32,409 --> 00:18:26,580

when I I have seen and then last holding

426

00:18:37,730 --> 00:18:34,909

some of these teeth and you can buy them

427

00:18:40,970 --> 00:18:37,740

right and and some of them are what are

428

00:18:42,710 --> 00:18:40,980

we talking about and Sally is uh in

429

00:18:45,169 --> 00:18:42,720

terms of I missed hi Scott hi lever

430

00:18:47,029 --> 00:18:45,179

you're a high cup High dystopian High's

431

00:18:50,270 --> 00:18:47,039

ends uh Bill uh what are we talking

432

00:18:53,409 --> 00:18:50,280

about in terms of what uh uh you know

433

00:18:57,590 --> 00:18:53,419

you see these teeth uh you know for sale

434

00:18:59,930 --> 00:18:57,600

and and and in museums what are you

435

00:19:01,850 --> 00:18:59,940

talking about in terms of feet and tons

436

00:19:03,830 --> 00:19:01,860

when we're talking about a Megalodon

437

00:19:06,890 --> 00:19:03,840

okay so you want to know like how big

438

00:19:08,810 --> 00:19:06,900

the shark got yes you know if I had

439

00:19:10,789 --> 00:19:08,820

known this as video because my fossil

440

00:19:12,830 --> 00:19:10,799

display case is literally 10 feet to my

441

00:19:14,150 --> 00:19:12,840

right over here I would have brought out

442

00:19:16,130 --> 00:19:14,160

some real teeth to show you and

443

00:19:17,510 --> 00:19:16,140

everything but you know I didn't know

444

00:19:18,950 --> 00:19:17,520

until the last second I thought it was

445

00:19:20,450 --> 00:19:18,960

just radio

446

00:19:23,029 --> 00:19:20,460

um if you want I'll go grab one though

447

00:19:24,789 --> 00:19:23,039

yeah go grab one it's okay if I go off

448

00:19:28,010 --> 00:19:24,799

camera for a few years

449

00:19:30,110 --> 00:19:28,020

while Max is off camera uh

450

00:19:33,169 --> 00:19:30,120

everybody I'm going to say hello to

451

00:19:35,210 --> 00:19:33,179

everybody uh hello Betty hello hi Phil

452

00:19:39,470 --> 00:19:35,220

hello Monica

453

00:19:40,549 --> 00:19:39,480

um when when I saw everybody if you

454

00:19:44,870 --> 00:19:40,559

haven't

455

00:19:47,510 --> 00:19:44,880

um Bill put up in the chat uh the link

456

00:19:50,630 --> 00:19:47,520

somebody go and grab that the Titanic

457

00:19:52,850 --> 00:19:50,640

Megalodon necklace uh the press release

458

00:19:55,190 --> 00:19:52,860

went out yesterday they posted uh the

459

00:19:59,210 --> 00:19:55,200

pictures I think they've got uh some

460

00:20:01,610 --> 00:19:59,220

video of it uh too as well that is a

461

00:20:04,850 --> 00:20:01,620

ginormous tooth

462

00:20:08,270 --> 00:20:04,860

um and then if you remember uh last year

463

00:20:09,950 --> 00:20:08,280

on Fade to Black uh I did the story

464

00:20:12,830 --> 00:20:09,960

about

465

00:20:16,070 --> 00:20:12,840

um a family and the Sun

466

00:20:18,890 --> 00:20:16,080

father and son on the beach uh finding

467

00:20:22,370 --> 00:20:18,900

one of the largest Megalodon teeth uh

468

00:20:25,730 --> 00:20:22,380

ever and that was just on a beach and

469

00:20:28,130 --> 00:20:25,740

they thought it was a piece of wood

470

00:20:31,250 --> 00:20:28,140

um so yeah I'm totally fascinated with

471

00:20:35,270 --> 00:20:31,260

this now let's see what uh what Max is

472

00:20:38,390 --> 00:20:35,280

about to show us let's see so you bought

473

00:20:41,210 --> 00:20:38,400

HBO Max and renamed it to your nickname

474

00:20:42,529 --> 00:20:41,220

oh that's uh yeah that's that's pretty

475

00:20:44,570 --> 00:20:42,539

good

476  
00:20:46,909 --> 00:20:44,580  
um

477  
00:20:51,890 --> 00:20:46,919  
and also

478  
00:20:57,169 --> 00:20:53,390  
I'm gonna bump

479  
00:20:59,870 --> 00:20:57,179  
let's see well first off

480  
00:21:05,210 --> 00:20:59,880  
here's a nice

481  
00:21:08,630 --> 00:21:05,220  
I'm gonna go with that is probably a you

482  
00:21:10,370 --> 00:21:08,640  
R1 upper right one or two

483  
00:21:13,490 --> 00:21:10,380  
um this is a nice

484  
00:21:16,430 --> 00:21:13,500  
six inch tooth and it's actually White

485  
00:21:18,529 --> 00:21:16,440  
wow a lot of people like say so they're

486  
00:21:20,390 --> 00:21:18,539  
like oh my God that's recently deposited

487  
00:21:25,130 --> 00:21:20,400  
and stuff like that so you got this bad

488  
00:21:27,409 --> 00:21:25,140

boy okay and then we got

489

00:21:37,730 --> 00:21:27,419

this

490

00:21:42,830 --> 00:21:37,740

uh

491

00:21:44,810 --> 00:21:42,840

L wait four

492

00:21:48,049 --> 00:21:44,820

upper left number four

493

00:21:50,090 --> 00:21:48,059

you got to get the uh front side see

494

00:21:53,630 --> 00:21:50,100

this is the back of the tooth the the

495

00:21:55,310 --> 00:21:53,640

rounded part okay see

496

00:21:58,909 --> 00:21:55,320

you got your lingual side and your

497

00:22:01,370 --> 00:21:58,919

labial side so the outer side

498

00:22:02,810 --> 00:22:01,380

should be the labial side is the part

499

00:22:04,490 --> 00:22:02,820

that actually would be shown when the

500

00:22:08,390 --> 00:22:04,500

shark opened its mouth

501  
00:22:10,010 --> 00:22:08,400  
um yeah right right right right and then

502  
00:22:12,590 --> 00:22:10,020  
you got this Feast which unfortunately

503  
00:22:15,110 --> 00:22:12,600  
is missing some of it's rude okay but

504  
00:22:17,090 --> 00:22:15,120  
the even so I mean this came from a

505  
00:22:18,169 --> 00:22:17,100  
monstrous tooth I mean look at the mass

506  
00:22:19,970 --> 00:22:18,179  
on that thing

507  
00:22:23,330 --> 00:22:19,980  
you fat that bad boy is yeah yeah yeah

508  
00:22:25,490 --> 00:22:23,340  
yeah and then I even got a two from uh

509  
00:22:28,490 --> 00:22:25,500  
close relative of

510  
00:22:31,490 --> 00:22:28,500  
the Megalodon which is uh the fish it

511  
00:22:33,430 --> 00:22:31,500  
actually descended from directly and

512  
00:22:37,250 --> 00:22:33,440  
this is a nice

513  
00:22:38,570 --> 00:22:37,260

4.8 inch totus chub utensis which

514

00:22:40,250 --> 00:22:38,580

actually looks remarkably like a white

515

00:22:43,610 --> 00:22:40,260

shark tooth though it's definitely a

516

00:22:46,070 --> 00:22:43,620

shape see so these fish just got to be a

517

00:22:48,169 --> 00:22:46,080

fish got to be about 40 feet long uh the

518

00:22:49,970 --> 00:22:48,179

uh the chub utensis they shared the Seas

519

00:22:51,590 --> 00:22:49,980

for many millions of years

520

00:22:54,649 --> 00:22:51,600

and it's like what's called Chrono

521

00:22:56,870 --> 00:22:54,659

species okay changed his form over time

522

00:22:58,370 --> 00:22:56,880

and then eventually they split off into

523

00:23:00,950 --> 00:22:58,380

different populations

524

00:23:02,690 --> 00:23:00,960

and trombutantis remained as it was and

525

00:23:04,310 --> 00:23:02,700

the megalon got bigger and it changed

526

00:23:05,930 --> 00:23:04,320

its feeding tactics and got bigger

527

00:23:07,850 --> 00:23:05,940

bigger bigger and then chubby tends to

528

00:23:08,870 --> 00:23:07,860

either blend it in or disappeared when

529

00:23:10,310 --> 00:23:08,880

extinct and then there was just

530

00:23:12,409 --> 00:23:10,320

Megalodon and then eventually it died

531

00:23:16,850 --> 00:23:12,419

off but anyways

532

00:23:22,250 --> 00:23:16,860

why uh okay is is there evidence uh

533

00:23:25,430 --> 00:23:22,260

today of the possibility of Megalodon

534

00:23:28,070 --> 00:23:25,440

surviving and and has yet to be

535

00:23:32,510 --> 00:23:31,130

um well I mean I have if we're talking

536

00:23:34,730 --> 00:23:32,520

about like all the stuff I did for

537

00:23:36,110 --> 00:23:34,740

Monsters Marine Mysteries all those mega

538

00:23:38,510 --> 00:23:36,120

sharks and stuff like that I mean we can

539

00:23:40,610 --> 00:23:38,520

discuss that and whether or not that was

540

00:23:43,190 --> 00:23:40,620

megalodon or something else is that what

541

00:23:46,130 --> 00:23:43,200

you mean well certainly that's exactly

542

00:23:50,690 --> 00:23:46,140

what I mean I mean

543

00:23:52,370 --> 00:23:50,700

uh okay the biggest aside from the whale

544

00:23:54,529 --> 00:23:52,380

shark and things but when we were

545

00:23:57,649 --> 00:23:54,539

talking about carnivorous

546

00:24:00,049 --> 00:23:57,659

sharks we think of the great white uh

547

00:24:01,370 --> 00:24:00,059

for the for obvious reasons and it's

548

00:24:03,950 --> 00:24:01,380

very big

549

00:24:05,930 --> 00:24:03,960

but when we're talking about carnivorous

550

00:24:08,330 --> 00:24:05,940

giant sharks we're not talking about a

551  
00:24:09,770 --> 00:24:08,340  
bigger version of the great white we're

552  
00:24:10,850 --> 00:24:09,780  
talking about a different species

553  
00:24:13,490 --> 00:24:10,860  
altogether

554  
00:24:16,490 --> 00:24:13,500  
yes that is true although they all are

555  
00:24:18,169 --> 00:24:16,500  
or slash we're both mackerel sharks

556  
00:24:20,029 --> 00:24:18,179  
um okay so let's see how we're gonna do

557  
00:24:22,250 --> 00:24:20,039  
this okay so first off

558  
00:24:25,130 --> 00:24:22,260  
um a couple years ago I did a book

559  
00:24:26,450 --> 00:24:25,140  
called monsters and Marine Mysteries

560  
00:24:29,270 --> 00:24:26,460  
um which if people were interested in

561  
00:24:31,669 --> 00:24:29,280  
Cryptids giant prehistoric life and the

562  
00:24:34,310 --> 00:24:31,679  
oceans and what's really made me out

563  
00:24:36,590 --> 00:24:34,320

there now then I I recommend the book I

564

00:24:38,990 --> 00:24:36,600

mean there's evidence of octopi and

565

00:24:42,289 --> 00:24:39,000

Squid big enough to eat whales literally

566

00:24:45,110 --> 00:24:42,299

eat whales I did a whole chapter on mega

567

00:24:46,730 --> 00:24:45,120

sharks which I got into in detail

568

00:24:48,470 --> 00:24:46,740

um and a lot of other stuff I mean some

569

00:24:50,870 --> 00:24:48,480

crazy things I interviewed people that

570

00:24:53,450 --> 00:24:50,880

nobody knows they're still alive one guy

571

00:24:55,430 --> 00:24:53,460

who saw 38-foot Turtle another guy that

572

00:24:57,590 --> 00:24:55,440

was actually attacked in 1976 that when

573

00:24:58,789 --> 00:24:57,600

he was a teenager by the South Side sea

574

00:25:01,490 --> 00:24:58,799

monster that tried to eat him in his

575

00:25:03,590 --> 00:25:01,500

dad's boat all sorts of stuff but in in

576  
00:25:06,289 --> 00:25:03,600  
Monsters Marine mystery users chapter

577  
00:25:09,049 --> 00:25:06,299  
one and Max advised us on self-defense

578  
00:25:11,830 --> 00:25:09,059  
when faced with a shark well the best

579  
00:25:14,270 --> 00:25:11,840  
tactic is to not be there number one

580  
00:25:16,549 --> 00:25:14,280  
we're probably in a cage but if you're

581  
00:25:19,070 --> 00:25:16,559  
faced with a shark uh the first thing I

582  
00:25:20,330 --> 00:25:19,080  
would do is I would not panic and I mean

583  
00:25:22,430 --> 00:25:20,340  
that's a complicated question though

584  
00:25:24,289 --> 00:25:22,440  
where are you are you underwater are you

585  
00:25:26,090 --> 00:25:24,299  
swimming are you scuba diving are you

586  
00:25:27,830 --> 00:25:26,100  
swimming on the surface are you

587  
00:25:29,510 --> 00:25:27,840  
snorkeling are you on a surfboard a

588  
00:25:31,430 --> 00:25:29,520

bodyboard I mean you know it's there's a

589

00:25:33,890 --> 00:25:31,440

it's a million things but I would not

590

00:25:36,230 --> 00:25:33,900

panic because thrashing is going to come

591

00:25:38,450 --> 00:25:36,240

off as a distress that you know kind of

592

00:25:40,010 --> 00:25:38,460

like stimuli Etc

593

00:25:42,350 --> 00:25:40,020

um I wouldn't turn my back on a shark

594

00:25:44,210 --> 00:25:42,360

that's for sure some sharks like tiger

595

00:25:46,250 --> 00:25:44,220

sharks if they try and bite you you can

596

00:25:48,350 --> 00:25:46,260

actually redirect them like push them

597

00:25:49,669 --> 00:25:48,360

slowly away even if you float one way

598

00:25:52,250 --> 00:25:49,679

and they float the other you can avoid

599

00:25:53,870 --> 00:25:52,260

being bitten so it varies from species

600

00:25:56,149 --> 00:25:53,880

to species there's a lot of info out

601  
00:25:58,549 --> 00:25:56,159  
there about that but anyway so

602  
00:26:00,890 --> 00:25:58,559  
in Monsters Marine Mysteries

603  
00:26:02,510 --> 00:26:00,900  
um I covered a bunch of different sharks

604  
00:26:05,990 --> 00:26:02,520  
evidence of sharks that were

605  
00:26:08,149 --> 00:26:06,000  
considerably larger than normal

606  
00:26:09,769 --> 00:26:08,159  
um the one in the video would you want

607  
00:26:11,470 --> 00:26:09,779  
to talk about the video documentary that

608  
00:26:14,090 --> 00:26:11,480  
we just did

609  
00:26:16,909 --> 00:26:14,100  
we'll we'll get to that in a second I

610  
00:26:19,970 --> 00:26:16,919  
mean what I what I would I I want you to

611  
00:26:23,029 --> 00:26:19,980  
continue because when we talk about uh

612  
00:26:25,029 --> 00:26:23,039  
using words like uh or definitions like

613  
00:26:27,350 --> 00:26:25,039

mega sharks

614

00:26:30,350 --> 00:26:27,360

for the audience they need to understand

615

00:26:32,570 --> 00:26:30,360

really what we're talking about here and

616

00:26:34,850 --> 00:26:32,580

not necessarily what comes to mind

617

00:26:37,490 --> 00:26:34,860

immediately which is like a tiger shark

618

00:26:39,049 --> 00:26:37,500

or a or a great white shark that we're

619

00:26:40,570 --> 00:26:39,059

talking about something completely

620

00:26:44,330 --> 00:26:40,580

different

621

00:26:47,029 --> 00:26:44,340

I'm sorry yeah so like the definition of

622

00:26:50,090 --> 00:26:47,039

a a mega shark is

623

00:26:51,890 --> 00:26:50,100

a preternaturally large shark it may be

624

00:26:53,810 --> 00:26:51,900

a very large large version of an

625

00:26:55,669 --> 00:26:53,820

existing species that's for some reason

626  
00:26:56,810 --> 00:26:55,679  
bigger than it's supposed to be it might

627  
00:26:58,250 --> 00:26:56,820  
be something we don't know about it

628  
00:27:00,350 --> 00:26:58,260  
could be something it's extinct and

629  
00:27:02,870 --> 00:27:00,360  
nobody sent it an email to tell it that

630  
00:27:04,669 --> 00:27:02,880  
it was extinct I mean it varies but it's

631  
00:27:06,350 --> 00:27:04,679  
something big just like the word Mega

632  
00:27:08,930 --> 00:27:06,360  
implies

633  
00:27:11,630 --> 00:27:08,940  
um so in Monsters Marine Mysteries there

634  
00:27:13,789 --> 00:27:11,640  
were gosh four or five different sharks

635  
00:27:15,590 --> 00:27:13,799  
that we looked into

636  
00:27:19,370 --> 00:27:15,600  
um the smallest one

637  
00:27:21,350 --> 00:27:19,380  
was and I I christened these shorts with

638  
00:27:24,350 --> 00:27:21,360

names to the book was a fish called the

639

00:27:27,590 --> 00:27:24,360

beasts of Briar Island and this was

640

00:27:30,350 --> 00:27:27,600

documented by a couple friends of mine

641

00:27:32,510 --> 00:27:30,360

um which would be the tutors

642

00:27:34,730 --> 00:27:32,520

um Jess Tudor and his wife Amy who

643

00:27:36,529 --> 00:27:34,740

actually work and live on Briar Island

644

00:27:39,049 --> 00:27:36,539

and they do

645

00:27:41,269 --> 00:27:39,059

um they were for real whale research you

646

00:27:43,490 --> 00:27:41,279

know they do tours for whales Etc and

647

00:27:45,950 --> 00:27:43,500

such they have a sea salt company but

648

00:27:50,390 --> 00:27:45,960

they um suggested documented this

649

00:27:54,350 --> 00:27:50,400

carcass of a 52 foot humpback whale that

650

00:27:57,470 --> 00:27:54,360

had died and he was measuring bites on

651  
00:27:59,630 --> 00:27:57,480  
it and he found a pair of bites that

652  
00:28:02,990 --> 00:27:59,640  
were 27 inches wide

653  
00:28:04,549 --> 00:28:03,000  
and one was 31 inches tall and the other

654  
00:28:07,850 --> 00:28:04,559  
one which is right next to it was 37

655  
00:28:09,169 --> 00:28:07,860  
inches tall 36 or 37 I think 37.

656  
00:28:10,669 --> 00:28:09,179  
um and that's because the shark open

657  
00:28:12,830 --> 00:28:10,679  
it's about wider

658  
00:28:14,390 --> 00:28:12,840  
you know to try and get a bite okay but

659  
00:28:17,210 --> 00:28:14,400  
they were the same with the same fish it

660  
00:28:18,350 --> 00:28:17,220  
was obvious and like your friend you

661  
00:28:21,769 --> 00:28:18,360  
were talking about who had that bite

662  
00:28:23,870 --> 00:28:21,779  
scar on him it probably wasn't 27 inches

663  
00:28:26,149 --> 00:28:23,880

wide because if you take your hand and

664

00:28:28,909 --> 00:28:26,159

measure out 27 inches that would

665

00:28:32,029 --> 00:28:28,919

probably go from his hip to his shoulder

666

00:28:34,310 --> 00:28:32,039

or something like that okay but that

667

00:28:36,350 --> 00:28:34,320

suggested a white shark feeding on the

668

00:28:37,310 --> 00:28:36,360

carcass that was a little over 26 feet

669

00:28:39,710 --> 00:28:37,320

long

670

00:28:41,510 --> 00:28:39,720

so now that was the small end of the

671

00:28:45,169 --> 00:28:41,520

scale and that's already a fish it's

672

00:28:47,510 --> 00:28:45,179

bigger than Bruce from Jaws okay 25

673

00:28:53,710 --> 00:28:47,520

three tons of them you know that kind of

674

00:28:56,590 --> 00:28:53,720

thing okay black guys like a doll's eyes

675

00:28:59,590 --> 00:28:56,600

until he bites you

676

00:29:04,130 --> 00:28:59,600

still the best scene in cinema history

677

00:29:05,990 --> 00:29:04,140

absolutely the USS Indianapolis okay

678

00:29:08,810 --> 00:29:06,000

um uh back to the whale and the bite

679

00:29:10,669 --> 00:29:08,820

sizes so that was the small end of it

680

00:29:12,590 --> 00:29:10,679

then there was I'm going to try and work

681

00:29:14,510 --> 00:29:12,600

my way up the size

682

00:29:17,750 --> 00:29:14,520

line okay

683

00:29:19,909 --> 00:29:17,760

um then there was gosh another one okay

684

00:29:22,130 --> 00:29:19,919

so in

685

00:29:24,470 --> 00:29:22,140

Kurt Jenner from the center for whale

686

00:29:26,990 --> 00:29:24,480

research in Australia he and this was in

687

00:29:29,870 --> 00:29:27,000

a Discovery Channel special that they

688

00:29:31,669 --> 00:29:29,880

it um he had photographed a 69

689

00:29:33,470 --> 00:29:31,679

approximately for pygmy blue whale

690

00:29:37,490 --> 00:29:33,480

picture a 70-foot whale is called a

691

00:29:39,889 --> 00:29:37,500

pygmy that had this huge healed bite

692

00:29:41,570 --> 00:29:39,899

scar on the top of its peduncle that's

693

00:29:43,190 --> 00:29:41,580

the right the tail right in front of the

694

00:29:45,289 --> 00:29:43,200

flukes okay

695

00:29:46,310 --> 00:29:45,299

and it had like you know gouges on it

696

00:29:48,409 --> 00:29:46,320

and stuff that were healed so you could

697

00:29:50,149 --> 00:29:48,419

see that it was a shark bite and he was

698

00:29:52,130 --> 00:29:50,159

kind enough to send me some great HD

699

00:29:55,010 --> 00:29:52,140

full color images and stuff so I could

700

00:29:58,130 --> 00:29:55,020

use do research on it for Monsters and

701  
00:30:00,590 --> 00:29:58,140  
Mysteries and I was able to number

702  
00:30:02,810 --> 00:30:00,600  
Crunch and all that and eventually I

703  
00:30:06,230 --> 00:30:02,820  
figured out the white the heel bite was

704  
00:30:07,669 --> 00:30:06,240  
estimated at 39 to 47 inches that's they

705  
00:30:10,070 --> 00:30:07,679  
photographed from a distance so they had

706  
00:30:12,049 --> 00:30:10,080  
to you know count pixels

707  
00:30:13,610 --> 00:30:12,059  
to estimate the bite

708  
00:30:15,889 --> 00:30:13,620  
um and that could have suggested in a

709  
00:30:17,510 --> 00:30:15,899  
very very big shark especially since it

710  
00:30:18,470 --> 00:30:17,520  
looked like the only the front of the

711  
00:30:21,110 --> 00:30:18,480  
jaw

712  
00:30:23,510 --> 00:30:21,120  
had crunched into the whale but what it

713  
00:30:26,630 --> 00:30:23,520

turned out is this was an older bite and

714

00:30:28,130 --> 00:30:26,640

it hadn't grown per se you know they say

715

00:30:30,049 --> 00:30:28,140

a lot of people think oh it was bitten

716

00:30:33,049 --> 00:30:30,059

when it was younger and the bike grew

717

00:30:35,269 --> 00:30:33,059

right it doesn't work like that okay you

718

00:30:37,310 --> 00:30:35,279

know if you have a bite on you it

719

00:30:40,370 --> 00:30:37,320

doesn't magically symmetrically and

720

00:30:42,289 --> 00:30:40,380

large and the tooth marks enlarge like

721

00:30:43,850 --> 00:30:42,299

it's a copy machine and you hit plus 50

722

00:30:46,010 --> 00:30:43,860

plus 80

723

00:30:47,090 --> 00:30:46,020

Etc it doesn't work like that just like

724

00:30:50,210 --> 00:30:47,100

what a whale shark when a whale shark

725

00:30:52,669 --> 00:30:50,220

gets bitten by a larger shark the wound

726

00:30:55,010 --> 00:30:52,679

fills in it heals like it's it's

727

00:30:56,630 --> 00:30:55,020

literally filling up and within like a

728

00:30:59,810 --> 00:30:56,640

year or two years it's almost gone or

729

00:31:02,149 --> 00:30:59,820

unrecognizable anymore see so people you

730

00:31:04,190 --> 00:31:02,159

know get this like oh it was bitten when

731

00:31:06,230 --> 00:31:04,200

it was small and they just miss it

732

00:31:08,149 --> 00:31:06,240

that's not how it works okay people go

733

00:31:10,549 --> 00:31:08,159

on my website and you look up an article

734

00:31:11,750 --> 00:31:10,559

a blog post I did about whale sharks and

735

00:31:14,090 --> 00:31:11,760

great whites and how the whale shark

736

00:31:15,950 --> 00:31:14,100

survives attacks by white sharks and

737

00:31:17,630 --> 00:31:15,960

you'll see right there you know

738

00:31:19,130 --> 00:31:17,640

photographic evidence of how these

739

00:31:21,830 --> 00:31:19,140

sharks healed so anyway back to the

740

00:31:24,950 --> 00:31:21,840

pygmy blue whale So what had happened is

741

00:31:26,389 --> 00:31:24,960

is like picture this is the the part of

742

00:31:29,810 --> 00:31:26,399

the whale's tail and the flukes are over

743

00:31:32,269 --> 00:31:29,820

here okay so the bite's right here like

744

00:31:34,250 --> 00:31:32,279

that like like this okay but it was kind

745

00:31:36,529 --> 00:31:34,260

of shallow and I realized what had

746

00:31:39,529 --> 00:31:36,539

happened is this whale is constantly

747

00:31:41,870 --> 00:31:39,539

moving its tail you know that's how it

748

00:31:43,490 --> 00:31:41,880

swims it's just like you walking if you

749

00:31:45,769 --> 00:31:43,500

put on one of those fitbits and you know

750

00:31:47,389 --> 00:31:45,779

seven thousand steps in a day same thing

751

00:31:49,909 --> 00:31:47,399

with the whale's tail that's its

752

00:31:51,830 --> 00:31:49,919

Locomotion okay so the bite didn't

753

00:31:54,409 --> 00:31:51,840

change in terms of depth it stayed the

754

00:31:55,549 --> 00:31:54,419

same depth but it gradually flattened

755

00:31:57,950 --> 00:31:55,559

out

756

00:32:00,289 --> 00:31:57,960

see as the whale grew around it and that

757

00:32:02,870 --> 00:32:00,299

motion so it became like a more shallow

758

00:32:05,389 --> 00:32:02,880

looking bite so in reality when I

759

00:32:08,330 --> 00:32:05,399

crunched the numbers at least this is my

760

00:32:10,970 --> 00:32:08,340

considered opinion the shark bite was 27

761

00:32:12,169 --> 00:32:10,980

to 33 inches across when it was

762

00:32:14,630 --> 00:32:12,179

originally attacked when it was a

763

00:32:17,090 --> 00:32:14,640

younger whale and that still suggests a

764

00:32:17,950 --> 00:32:17,100

white shark between 26 and 30 feet of

765

00:32:21,529 --> 00:32:17,960

length

766

00:32:23,510 --> 00:32:21,539

yeah that's nothing small okay I mean

767

00:32:25,370 --> 00:32:23,520

not at all okay so that one I was

768

00:32:27,169 --> 00:32:25,380

calling the Perth Canyon Colossus I try

769

00:32:29,149 --> 00:32:27,179

to come up with these cool names you

770

00:32:32,269 --> 00:32:29,159

know like the Beast of Briar Island

771

00:32:33,950 --> 00:32:32,279

Perth Canyon Colossus and stuff but the

772

00:32:36,590 --> 00:32:33,960

biggest one in the book

773

00:32:40,549 --> 00:32:36,600

was insane and this these pictures this

774

00:32:43,310 --> 00:32:40,559

was from 2017 and was courtesy of Dr

775

00:32:44,750 --> 00:32:43,320

Simon Pierce and this guy is one of the

776

00:32:47,690 --> 00:32:44,760

greatest marine biologists in the world

777

00:32:50,210 --> 00:32:47,700

this man swims with whale sharks the

778

00:32:53,510 --> 00:32:50,220

size of a bus pregnant ones and gives

779

00:32:54,289 --> 00:32:53,520

them sonograms okay he is living the

780

00:32:57,049 --> 00:32:54,299

life

781

00:32:59,510 --> 00:32:57,059

honestly I'm like hashtag jealous love

782

00:33:02,870 --> 00:32:59,520

them whatever okay but he's my go-to guy

783

00:33:06,350 --> 00:33:02,880

so he photographed this 40-foot whale

784

00:33:10,310 --> 00:33:06,360

shark off the Galapagos and it had a

785

00:33:12,169 --> 00:33:10,320

fairly recently healed shark bite a

786

00:33:14,269 --> 00:33:12,179

chunk taken out of it and if you guys

787

00:33:16,009 --> 00:33:14,279

want to see it the black and white one

788

00:33:18,049 --> 00:33:16,019

isn't version is in Monsters Marine

789

00:33:21,350 --> 00:33:18,059

Mysteries but if you go on my YouTube

790

00:33:24,169 --> 00:33:21,360

channel which is at real max Hawthorne

791

00:33:25,909 --> 00:33:24,179

you can find it by Google and everything

792

00:33:27,649 --> 00:33:25,919

um there is an actual documentary we'll

793

00:33:30,110 --> 00:33:27,659

be talking about momentarily and in that

794

00:33:32,090 --> 00:33:30,120

there are color photos of Simon Pierce

795

00:33:35,870 --> 00:33:32,100

swimming with this whale shark with a

796

00:33:40,970 --> 00:33:35,880

four foot bite taken out of it 48 inches

797

00:33:43,610 --> 00:33:40,980

across with tooth marks on it okay and

798

00:33:45,950 --> 00:33:43,620

that using the most conservative bite

799

00:33:48,529 --> 00:33:45,960

formula out there suggested a strike

800

00:33:50,450 --> 00:33:48,539

approximately 42 feet in length so

801  
00:33:53,649 --> 00:33:50,460  
you're talking about a bust size

802  
00:33:59,810 --> 00:33:57,169  
I have a I'm looking at the yardstick

803  
00:34:02,330 --> 00:33:59,820  
right that's leaning against my wall

804  
00:34:05,810 --> 00:34:02,340  
that's three feet right you're saying

805  
00:34:08,690 --> 00:34:05,820  
four feet right yeah yep

806  
00:34:11,210 --> 00:34:08,700  
if you stretch your hands out like you

807  
00:34:14,089 --> 00:34:11,220  
know so wide okay you can estimate four

808  
00:34:15,950 --> 00:34:14,099  
feet wide I mean it's gigantic and you

809  
00:34:18,770 --> 00:34:15,960  
see the divers right next to the plate

810  
00:34:22,010 --> 00:34:18,780  
so I mean it's like for scale okay it

811  
00:34:23,750 --> 00:34:22,020  
was crazy and you know I mean like how

812  
00:34:25,609 --> 00:34:23,760  
did the shark not finish the whale shark

813  
00:34:28,730 --> 00:34:25,619

off and so I mean there's such slow

814

00:34:30,169 --> 00:34:28,740

innocuous creatures and all that and I

815

00:34:31,430 --> 00:34:30,179

mean I have a theory on that and it's in

816

00:34:32,450 --> 00:34:31,440

the book and all that but you know at

817

00:34:34,849 --> 00:34:32,460

the end of the day the whale shark

818

00:34:36,349 --> 00:34:34,859

escaped and you know its attacker got a

819

00:34:38,690 --> 00:34:36,359

mouthful of uh

820

00:34:41,950 --> 00:34:38,700

tough skin it probably didn't enjoy and

821

00:34:49,010 --> 00:34:45,349

four okay so we're talking about

822

00:34:51,589 --> 00:34:49,020

something that is uh mega mega is not

823

00:34:54,710 --> 00:34:51,599

even the right word we need a a new word

824

00:34:58,730 --> 00:34:54,720

monster yeah

825

00:35:02,570 --> 00:35:01,550

four four feet wide

826

00:35:05,390 --> 00:35:02,580

um

827

00:35:09,550 --> 00:35:05,400

that thing is still alive

828

00:35:12,650 --> 00:35:09,560

and probably has brothers and sisters

829

00:35:16,310 --> 00:35:12,660

right this isn't uh this isn't

830

00:35:21,170 --> 00:35:16,320

prehistoric uh something that has a four

831

00:35:24,530 --> 00:35:21,180

foot bite mark that could be 40 50 foot

832

00:35:25,670 --> 00:35:24,540

long a shark is is alive in swimming

833

00:35:27,829 --> 00:35:25,680

right now

834

00:35:29,690 --> 00:35:27,839

appears it's it's quite conceivable yes

835

00:35:32,030 --> 00:35:29,700

I believe they were doing actually a

836

00:35:34,130 --> 00:35:32,040

formal paper on this

837

00:35:35,329 --> 00:35:34,140

um so I don't know what stage that's in

838

00:35:37,130 --> 00:35:35,339

or anything like that but I'll be

839

00:35:40,550 --> 00:35:37,140

curious to see what the professionals

840

00:35:42,109 --> 00:35:40,560

put out in terms of that but um and do

841

00:35:44,410 --> 00:35:42,119

you want to talk about the documentary

842

00:35:47,870 --> 00:35:44,420

that we yeah well

843

00:35:50,710 --> 00:35:47,880

absolutely absolutely and and we'll do

844

00:35:54,470 --> 00:35:50,720

that right now but

845

00:35:56,810 --> 00:35:54,480

wait there's more those teeth that you

846

00:35:58,430 --> 00:35:56,820

just held up from Megalodon right and

847

00:36:01,670 --> 00:35:58,440

and you're talking about the size of

848

00:36:03,910 --> 00:36:01,680

Megalodon but the the the the four foot

849

00:36:06,470 --> 00:36:03,920

bite mark

850

00:36:07,690 --> 00:36:06,480

are those are we talking about teeth

851

00:36:11,030 --> 00:36:07,700

probably

852

00:36:14,150 --> 00:36:11,040

about this size yeah right right that's

853

00:36:17,510 --> 00:36:14,160

insane yeah I mean I discussed the only

854

00:36:19,190 --> 00:36:17,520

you know it was either well I I have a

855

00:36:20,210 --> 00:36:19,200

pretty good idea what did the attack and

856

00:36:22,430 --> 00:36:20,220

we'll talk about that when we talk about

857

00:36:23,930 --> 00:36:22,440

the documentary but it was like I said

858

00:36:26,150 --> 00:36:23,940

there are

859

00:36:28,430 --> 00:36:26,160

elasma branchologist that means

860

00:36:30,349 --> 00:36:28,440

scientists who study sharks Rays things

861

00:36:32,270 --> 00:36:30,359

like that cartilage in his fish and

862

00:36:34,550 --> 00:36:32,280

there are elasma branchologist formulas

863

00:36:37,069 --> 00:36:34,560

out there where you can use those to

864

00:36:40,130 --> 00:36:37,079

plug in numbers and estimate the length

865

00:36:42,349 --> 00:36:40,140

of a shark based on the bite width

866

00:36:44,690 --> 00:36:42,359

and I've used these a lot when I did the

867

00:36:47,569 --> 00:36:44,700

wrote the book and

868

00:36:50,810 --> 00:36:47,579

like I said I use the most conservative

869

00:36:53,089 --> 00:36:50,820

one available because some of the

870

00:36:54,190 --> 00:36:53,099

findings were ridiculously big I was

871

00:36:59,569 --> 00:36:54,200

like that's

872

00:37:01,730 --> 00:36:59,579

okay but still a 42 foot fish is is an

873

00:37:03,650 --> 00:37:01,740

insanely large fish and the one that's

874

00:37:05,930 --> 00:37:03,660

in the documentary wasn't quite that big

875

00:37:09,109 --> 00:37:05,940

but it was pretty freaking big so I mean

876

00:37:13,130 --> 00:37:09,119

and we got some hard evidence of that

877

00:37:15,530 --> 00:37:13,140

okay we've got uh links up uh in the

878

00:37:16,930 --> 00:37:15,540

chat you probably saw it uh to your

879

00:37:19,970 --> 00:37:16,940

YouTube channel

880

00:37:22,550 --> 00:37:19,980

and I am here now and you said the

881

00:37:24,530 --> 00:37:22,560

documentary is on the YouTube channel

882

00:37:25,970 --> 00:37:24,540

yeah it's the most recent one I've been

883

00:37:27,109 --> 00:37:25,980

slacking I haven't put anything on there

884

00:37:29,870 --> 00:37:27,119

in the last four months or something

885

00:37:31,310 --> 00:37:29,880

like that right my guy was giving me

886

00:37:36,250 --> 00:37:31,320

grief about it you know you haven't done

887

00:37:42,829 --> 00:37:40,730

mega shark or Megalodon yes that's the

888

00:37:44,750 --> 00:37:42,839

documentary okay we've got the links up

889

00:37:46,069 --> 00:37:44,760

for it now

890

00:37:49,670 --> 00:37:46,079

um

891

00:37:52,730 --> 00:37:49,680

it would sound okay what's your best

892

00:37:55,250 --> 00:37:52,740

guess here I mean I understand the title

893

00:37:58,310 --> 00:37:55,260

and and and what we're talking about

894

00:38:02,470 --> 00:37:58,320

tonight but when we're we're talking

895

00:38:09,470 --> 00:38:02,480

about a measurement of of uh four feet

896

00:38:11,150 --> 00:38:09,480

I I I'm going Megalodon I I I I am I

897

00:38:13,550 --> 00:38:11,160

wrong with thinking like that that it's

898

00:38:15,470 --> 00:38:13,560

possible for something that is supposed

899

00:38:18,109 --> 00:38:15,480

to have been extinct for 10 million

900

00:38:20,930 --> 00:38:18,119

years to to have survived

901  
00:38:23,750 --> 00:38:20,940  
well the problem with the Megalodon

902  
00:38:25,849 --> 00:38:23,760  
thing I mean you're you're do you want

903  
00:38:27,829 --> 00:38:25,859  
we want to discuss the documentary the

904  
00:38:30,650 --> 00:38:27,839  
shark bites in there first because

905  
00:38:33,829 --> 00:38:30,660  
you're all kind of interrelated sure or

906  
00:38:35,990 --> 00:38:33,839  
Okay so let's talk about Mega Shark or

907  
00:38:36,710 --> 00:38:36,000  
Megalodon the documentary

908  
00:38:40,490 --> 00:38:36,720  
um

909  
00:38:42,050 --> 00:38:40,500  
this came about because uh my my buddies

910  
00:38:44,890 --> 00:38:42,060  
the tutors the same couple I told you

911  
00:38:47,270 --> 00:38:44,900  
about Jess and Amy I'm from Briar Island

912  
00:38:48,829 --> 00:38:47,280  
uh they reach out to me when they find

913  
00:38:51,050 --> 00:38:48,839

interesting stuff because you know we

914

00:38:53,270 --> 00:38:51,060

have a shared passion for this and so

915

00:38:54,710 --> 00:38:53,280

just was like Max I got a video I got a

916

00:38:56,810 --> 00:38:54,720

whale carcass here what do you think

917

00:38:58,550 --> 00:38:56,820

blah blah blah it's got shark bites all

918

00:39:00,109 --> 00:38:58,560

over it all this stuff so you sent me

919

00:39:02,150 --> 00:39:00,119

the video and he's like panning along

920

00:39:04,069 --> 00:39:02,160

the carcass and the carcass is pretty

921

00:39:05,690 --> 00:39:04,079

nasty at this point it's been beached

922

00:39:07,550 --> 00:39:05,700

for a couple days whatever and stuff

923

00:39:11,030 --> 00:39:07,560

like that and he was under the

924

00:39:13,910 --> 00:39:11,040

impression that the the whale which is a

925

00:39:16,370 --> 00:39:13,920

30-foot humpback so a sub adult humpback

926

00:39:18,710 --> 00:39:16,380

um this is just this past July just so

927

00:39:20,329 --> 00:39:18,720

we're clear on that okay so 10 months

928

00:39:22,490 --> 00:39:20,339

ago 11 months ago something like that

929

00:39:24,950 --> 00:39:22,500

and um

930

00:39:27,230 --> 00:39:24,960

have been killed by a ship strike

931

00:39:28,849 --> 00:39:27,240

and he wasn't wrong it had certainly

932

00:39:29,870 --> 00:39:28,859

been badly wounded by a ship strike

933

00:39:32,930 --> 00:39:29,880

because and you'll see in the

934

00:39:35,810 --> 00:39:32,940

documentary there are uh there's prop

935

00:39:37,550 --> 00:39:35,820

wounds or prop massive prop wounds on I

936

00:39:40,870 --> 00:39:37,560

believe it's the right shoulder

937

00:39:43,370 --> 00:39:40,880

but it was like shredded like

938

00:39:45,410 --> 00:39:43,380

badly hurt the whale I didn't kill it

939

00:39:47,210 --> 00:39:45,420

but it would have been a bloody mess and

940

00:39:49,190 --> 00:39:47,220

and you know it would have drawn

941

00:39:50,210 --> 00:39:49,200

Predators from all over obviously and

942

00:39:51,829 --> 00:39:50,220

stuff

943

00:39:56,510 --> 00:39:51,839

um so and this is all covered in the

944

00:39:59,870 --> 00:39:56,520

documentary but um the

945

00:40:02,150 --> 00:39:59,880

as he was the video was moving you know

946

00:40:05,270 --> 00:40:02,160

towards the codal region that means I'm

947

00:40:06,829 --> 00:40:05,280

sorry towards the tail okay I was like

948

00:40:09,109 --> 00:40:06,839

whoa whoa stop the camera right there

949

00:40:12,890 --> 00:40:09,119

what do we look what stop let's go back

950

00:40:14,750 --> 00:40:12,900

you know an air was this enormous bite

951

00:40:15,890 --> 00:40:14,760

on the near the Tail

952

00:40:17,690 --> 00:40:15,900

of the whale

953

00:40:19,010 --> 00:40:17,700

now we talked about like you know white

954

00:40:20,569 --> 00:40:19,020

sharks they come up and they take a

955

00:40:22,130 --> 00:40:20,579

Munch and you know whatever and then

956

00:40:23,990 --> 00:40:22,140

they wait for you to die

957

00:40:25,430 --> 00:40:24,000

Etc well that's what they do they like

958

00:40:27,050 --> 00:40:25,440

to hit you in the haunch in the rear

959

00:40:28,130 --> 00:40:27,060

this type of stuff like if you're a

960

00:40:30,170 --> 00:40:28,140

white shark and you're attacking an

961

00:40:32,210 --> 00:40:30,180

elephant seal as big as you you don't

962

00:40:34,550 --> 00:40:32,220

want to get bit by that thing you could

963

00:40:37,370 --> 00:40:34,560

be killed even you know or badly wounded

964

00:40:39,109 --> 00:40:37,380

so they bite them in the tail region

965

00:40:41,510 --> 00:40:39,119

inflict damage like you're you know what

966

00:40:42,950 --> 00:40:41,520

happened to your friend okay so there

967

00:40:44,510 --> 00:40:42,960

was this looked like a giant bite there

968

00:40:46,970 --> 00:40:44,520

and I was I was looking at the video I

969

00:40:49,430 --> 00:40:46,980

could even see two notches and and there

970

00:40:50,990 --> 00:40:49,440

was no doubt it was a bite okay so I

971

00:40:53,150 --> 00:40:51,000

asked Jess um because he'd already

972

00:40:56,270 --> 00:40:53,160

filmed this to go back to the carcass

973

00:40:57,890 --> 00:40:56,280

and get me measurements of the bite you

974

00:41:00,530 --> 00:40:57,900

know I'm not in Briar Island I'm here in

975

00:41:02,630 --> 00:41:00,540

Pennsylvania and whatnot but um

976

00:41:05,030 --> 00:41:02,640

so he went back like a day or two later

977

00:41:07,370 --> 00:41:05,040

but the tide kept moving the carcass and

978

00:41:09,530 --> 00:41:07,380

it shifted so he measured this section

979

00:41:12,410 --> 00:41:09,540

and it's in the video

980

00:41:15,050 --> 00:41:12,420

um that was like 54 inches wide

981

00:41:16,069 --> 00:41:15,060

and I I was using this for his well

982

00:41:18,050 --> 00:41:16,079

putting all this stuff together all

983

00:41:20,390 --> 00:41:18,060

photos and videos and all this stuff in

984

00:41:22,190 --> 00:41:20,400

the documentary and it just it didn't

985

00:41:24,950 --> 00:41:22,200

look like the the bite that I had seen

986

00:41:26,390 --> 00:41:24,960

before you know it was off and it turned

987

00:41:28,490 --> 00:41:26,400

out the carcass had shifted with the

988

00:41:29,450 --> 00:41:28,500

tide and so the coda white was more

989

00:41:32,030 --> 00:41:29,460

covered

990

00:41:34,790 --> 00:41:32,040

and this was actually like four or five

991

00:41:36,349 --> 00:41:34,800

bites combined from a big white shark

992

00:41:39,290 --> 00:41:36,359

that have been feeding in the same

993

00:41:42,970 --> 00:41:39,300

section so this was a quote small white

994

00:41:45,230 --> 00:41:42,980

shark by 20 feet long so small okay

995

00:41:48,470 --> 00:41:45,240

when you see the video you understand

996

00:41:49,730 --> 00:41:48,480

why I say small okay and I was like so

997

00:41:51,230 --> 00:41:49,740

how you know and then we didn't have any

998

00:41:52,970 --> 00:41:51,240

like the carcass was disassembled at

999

00:41:54,290 --> 00:41:52,980

this point and the skeleton and whatever

1000

00:41:55,609 --> 00:41:54,300

all the stuff so there was no more

1001  
00:41:57,530 --> 00:41:55,619  
evidence and I'm like well how are we

1002  
00:42:00,530 --> 00:41:57,540  
going to measure this thing but luckily

1003  
00:42:02,750 --> 00:42:00,540  
Jess at one point had taken his Boot and

1004  
00:42:04,790 --> 00:42:02,760  
he had while he was taping he had stuck

1005  
00:42:06,950 --> 00:42:04,800  
it inside a bite

1006  
00:42:08,990 --> 00:42:06,960  
that was right in the same region you

1007  
00:42:11,030 --> 00:42:09,000  
know for comparison and I was able to

1008  
00:42:13,370 --> 00:42:11,040  
get an exact measurement of his Boot and

1009  
00:42:16,670 --> 00:42:13,380  
then map that out to the codal bite Etc

1010  
00:42:20,030 --> 00:42:16,680  
so we discovered that the the bite by

1011  
00:42:24,550 --> 00:42:20,040  
the tail was at least 36 inches across

1012  
00:42:27,890 --> 00:42:24,560  
okay which it's pretty big I mean

1013  
00:42:30,250 --> 00:42:27,900

I've seen it in the documentary

1014

00:42:35,630 --> 00:42:32,630

you're talking about the the photograph

1015

00:42:40,730 --> 00:42:35,640

that's in the video was showing the tail

1016

00:42:43,010 --> 00:42:40,740

from the side and a video tone yeah

1017

00:42:46,130 --> 00:42:43,020

um uh no I'm saying

1018

00:42:49,010 --> 00:42:46,140

okay misunderstanding but is that you in

1019

00:42:51,349 --> 00:42:49,020

that shot no that's Jess that's Jess

1020

00:42:53,630 --> 00:42:51,359

okay yeah because you can see the size

1021

00:42:56,030 --> 00:42:53,640

of the bite right there because he's

1022

00:42:59,990 --> 00:42:56,040

standing right there and it's it's like

1023

00:43:01,609 --> 00:43:00,000

this yes it's gigantic and his wife had

1024

00:43:03,950 --> 00:43:01,619

taken pictures of the cargo soon it was

1025

00:43:05,510 --> 00:43:03,960

at Sea and it was fresh and as I looked

1026  
00:43:07,730 --> 00:43:05,520  
through all those God bless her she got

1027  
00:43:09,290 --> 00:43:07,740  
some it's so rare to get pictures of one

1028  
00:43:11,750 --> 00:43:09,300  
of these carcasses before that starts to

1029  
00:43:13,790 --> 00:43:11,760  
turn the jello and nasty jello with that

1030  
00:43:15,530 --> 00:43:13,800  
and she got one there's one shot where

1031  
00:43:18,470 --> 00:43:15,540  
you can see there's another huge fight

1032  
00:43:20,030 --> 00:43:18,480  
right near where the problem was the

1033  
00:43:22,370 --> 00:43:20,040  
fish must have been attracted to the

1034  
00:43:24,410 --> 00:43:22,380  
wound and was chewing on that part too

1035  
00:43:26,569 --> 00:43:24,420  
and it's as big as the bite in the back

1036  
00:43:27,770 --> 00:43:26,579  
so we had two giant bites you know we

1037  
00:43:30,470 --> 00:43:27,780  
all see the other side of the shark

1038  
00:43:33,470 --> 00:43:30,480

unfortunately but two bites at least

1039

00:43:34,849 --> 00:43:33,480

from the same monstrous fish I mean a 32

1040

00:43:37,490 --> 00:43:34,859

foot white shark would weigh about eight

1041

00:43:40,550 --> 00:43:37,500

tons just to give you an idea so it's an

1042

00:43:44,150 --> 00:43:40,560

enormous enormous animal in that and and

1043

00:43:45,950 --> 00:43:44,160

the shot um so that's Jess's boot I

1044

00:43:48,470 --> 00:43:45,960

remember that too as well where he

1045

00:43:51,730 --> 00:43:48,480

flashes his boot up next to the uh the

1046

00:43:58,190 --> 00:43:55,010

and then next to it is another bite mark

1047

00:43:59,030 --> 00:43:58,200

that is is right there and that's got to

1048

00:44:02,390 --> 00:43:59,040

be

1049

00:44:04,609 --> 00:44:02,400

I mean that's multiple feet wide I mean

1050

00:44:07,130 --> 00:44:04,619

it depends on I don't have the video in

1051  
00:44:09,050 --> 00:44:07,140  
front of me but the the one the group of

1052  
00:44:11,089 --> 00:44:09,060  
bytes I told you about maybe the group

1053  
00:44:13,190 --> 00:44:11,099  
that's right under his foot right where

1054  
00:44:15,470 --> 00:44:13,200  
there was like four bites together right

1055  
00:44:17,870 --> 00:44:15,480  
and those are still big bites they're

1056  
00:44:20,150 --> 00:44:17,880  
like 25 inches wide or something like

1057  
00:44:22,370 --> 00:44:20,160  
that they look like those look like

1058  
00:44:25,309 --> 00:44:22,380  
nibbles those reminded me of nibbles

1059  
00:44:26,930 --> 00:44:25,319  
like well compared to that one yeah I

1060  
00:44:29,150 --> 00:44:26,940  
mean yeah

1061  
00:44:31,790 --> 00:44:29,160  
and it's still huge they're they're

1062  
00:44:34,490 --> 00:44:31,800  
they're they're they're big yeah and you

1063  
00:44:37,790 --> 00:44:34,500

see the size of this whale knowing that

1064

00:44:40,069 --> 00:44:37,800

uh you know the the circumference of

1065

00:44:42,950 --> 00:44:40,079

circumference that's the wrong the width

1066

00:44:45,470 --> 00:44:42,960

let's go with width of that one giant

1067

00:44:48,230 --> 00:44:45,480

bite mark uh next to the the three or

1068

00:44:51,230 --> 00:44:48,240

four nibbles I think it's huge it's huge

1069

00:44:52,970 --> 00:44:51,240

this is why I could swallow a person the

1070

00:44:55,250 --> 00:44:52,980

size pretty much of the shark from Jaws

1071

00:44:57,950 --> 00:44:55,260

three which did swallow somebody whole

1072

00:45:01,010 --> 00:44:57,960

in fact if I recall correctly I didn't

1073

00:45:02,990 --> 00:45:01,020

see jaws 3. yeah no when they had me

1074

00:45:05,569 --> 00:45:03,000

down at uh years back they invited me

1075

00:45:07,490 --> 00:45:05,579

down to SeaWorld in Orlando for a behind

1076

00:45:09,410 --> 00:45:07,500

the scenes tour and all that they

1077

00:45:12,109 --> 00:45:09,420

weren't happy with me uh you know making

1078

00:45:13,849 --> 00:45:12,119

fun of the you know their orcas being

1079

00:45:15,589 --> 00:45:13,859

captivity and stuff like that so they

1080

00:45:17,150 --> 00:45:15,599

invited me down there and they actually

1081

00:45:19,250 --> 00:45:17,160

had they turned out jaw Street had been

1082

00:45:21,109 --> 00:45:19,260

filmed there and they had kept a sign

1083

00:45:23,990 --> 00:45:21,119

about the sharks or whatever and stuff

1084

00:45:25,910 --> 00:45:24,000

you know like uh dangerous sharks where

1085

00:45:26,990 --> 00:45:25,920

I forget what it says but it's in the

1086

00:45:28,309 --> 00:45:27,000

movie it's still hanging on the wall

1087

00:45:30,589 --> 00:45:28,319

there so I have a photo of me with

1088

00:45:33,770 --> 00:45:30,599

design and everything from Jaws three it

1089

00:45:36,050 --> 00:45:33,780

was pretty funny uh again when I was a

1090

00:45:37,430 --> 00:45:36,060

kid uh we had a Hobie Cat right

1091

00:45:40,910 --> 00:45:37,440

catamaran

1092

00:45:42,290 --> 00:45:40,920

and we sunk it my dad and I and we had a

1093

00:45:45,050 --> 00:45:42,300

friend of ours Eric

1094

00:45:47,690 --> 00:45:45,060

this is down in the Panama Canal on the

1095

00:45:51,349 --> 00:45:47,700

other side of the panel it's a too long

1096

00:45:53,450 --> 00:45:51,359

of a story anyway so we flipped one of

1097

00:45:57,770 --> 00:45:53,460

the pontoons filled with water

1098

00:45:59,690 --> 00:45:57,780

catamaran capsizes so the Mast is

1099

00:46:02,089 --> 00:45:59,700

pointing straight to the ocean floor

1100

00:46:06,770 --> 00:46:02,099

it's flipped upside down

1101  
00:46:09,829 --> 00:46:06,780  
and my dad and I and Eric are trying to

1102  
00:46:12,290 --> 00:46:09,839  
hold on to it and and swim to shore

1103  
00:46:14,329 --> 00:46:12,300  
we're about half mile off off of the

1104  
00:46:16,190 --> 00:46:14,339  
shoreline and there are people lining up

1105  
00:46:18,410 --> 00:46:16,200  
on the shoreline in front of us watching

1106  
00:46:21,230 --> 00:46:18,420  
what's going on right and kind of way

1107  
00:46:23,510 --> 00:46:21,240  
anyway and then all of a sudden well

1108  
00:46:25,510 --> 00:46:23,520  
I get bummed and I was like what was

1109  
00:46:28,130 --> 00:46:25,520  
that all right

1110  
00:46:30,530 --> 00:46:28,140  
there it goes that's never a good thing

1111  
00:46:32,870 --> 00:46:30,540  
yeah he goes sharks

1112  
00:46:35,150 --> 00:46:32,880  
and he takes out he swims to shore he

1113  
00:46:38,990 --> 00:46:35,160

leaves me and my dad out there

1114

00:46:39,890 --> 00:46:39,000

and and by the time so this is not a

1115

00:46:43,190 --> 00:46:39,900

joke

1116

00:46:45,230 --> 00:46:43,200

we get to Shore people swam out we pull

1117

00:46:47,930 --> 00:46:45,240

the boat in it's sitting there on the

1118

00:46:51,349 --> 00:46:47,940

shore and I look at myself and I am

1119

00:46:55,250 --> 00:46:51,359

scraped from head to toe

1120

00:46:58,190 --> 00:46:55,260

like sandpaper I was bleeding just just

1121

00:47:01,370 --> 00:46:58,200

these things never I didn't get bit

1122

00:47:04,550 --> 00:47:01,380

but they were just like boom yeah the

1123

00:47:08,150 --> 00:47:04,560

skin is like I mean like coarse

1124

00:47:10,430 --> 00:47:08,160

sandpaper yeah I was shredded man I was

1125

00:47:12,050 --> 00:47:10,440

scraped it up but not that still the

1126

00:47:15,950 --> 00:47:12,060

stalker did everybody read the sign

1127

00:47:18,109 --> 00:47:15,960

behind Max yes that is on my wall that

1128

00:47:19,069 --> 00:47:18,119

was put there Phil for when my nephews

1129

00:47:21,109 --> 00:47:19,079

used to come over when they were little

1130

00:47:22,670 --> 00:47:21,119

and and a little Annoying and stuff

1131

00:47:25,849 --> 00:47:22,680

there's giant fish on the wall behind me

1132

00:47:27,470 --> 00:47:25,859

but Jimmy wants the camera exactly where

1133

00:47:28,670 --> 00:47:27,480

it is so I can't pan up to show you the

1134

00:47:30,950 --> 00:47:28,680

fish because I don't know if I could put

1135

00:47:32,210 --> 00:47:30,960

it exactly back but it says yeah unruly

1136

00:47:33,950 --> 00:47:32,220

children will be used for baits there's

1137

00:47:37,490 --> 00:47:33,960

warning above that I'm just gonna move

1138

00:47:39,530 --> 00:47:37,500

it up a little bit there we go see see

1139

00:47:40,910 --> 00:47:39,540

there you go see and there's a striped

1140

00:47:43,210 --> 00:47:40,920

bass there too but let me lower that

1141

00:47:45,530 --> 00:47:43,220

back down

1142

00:47:48,410 --> 00:47:45,540

all right all right I think that's

1143

00:47:51,290 --> 00:47:48,420

pretty good that's pretty close so yeah

1144

00:47:52,870 --> 00:47:51,300

we used to um uh lucky you weren't

1145

00:47:55,970 --> 00:47:52,880

attacked by the way

1146

00:47:59,450 --> 00:47:55,980

there were shark nets all over you know

1147

00:48:03,530 --> 00:47:59,460

on the beaches and signs and stuff

1148

00:48:05,510 --> 00:48:03,540

um but uh we would see them all the time

1149

00:48:08,990 --> 00:48:05,520

um uh yeah you're right though uh didn't

1150

00:48:11,750 --> 00:48:09,000

get bit but I got I was so busy swimming

1151  
00:48:14,329 --> 00:48:11,760  
and I got bumped into so many times that

1152  
00:48:16,609 --> 00:48:14,339  
I just started to ignore it

1153  
00:48:18,370 --> 00:48:16,619  
um it wasn't until I got to Shore that I

1154  
00:48:22,190 --> 00:48:18,380  
saw I mean it was up and down my legs

1155  
00:48:24,170 --> 00:48:22,200  
that's randomly lucky incredibly lucky I

1156  
00:48:26,870 --> 00:48:24,180  
mean you were put you were chumming and

1157  
00:48:29,690 --> 00:48:26,880  
you know and thrashing bleeding I mean

1158  
00:48:32,770 --> 00:48:29,700  
that's like an eat it Joe sign was

1159  
00:48:36,050 --> 00:48:32,780  
hanging on your rear end I know right

1160  
00:48:39,950 --> 00:48:36,060  
oh man okay so uh back to the

1161  
00:48:45,770 --> 00:48:42,650  
the uh I I keep going back to the point

1162  
00:48:50,030 --> 00:48:45,780  
so let's uh kind of pick up where I left

1163  
00:48:53,210 --> 00:48:50,040

off whatever bit did the the the giant

1164

00:48:55,970 --> 00:48:53,220

by that that is something that is alive

1165

00:48:58,609 --> 00:48:55,980

this isn't this isn't science fiction

1166

00:49:00,410 --> 00:48:58,619

and this isn't you know this was less

1167

00:49:02,809 --> 00:49:00,420

than a year ago 10 months ago or

1168

00:49:05,870 --> 00:49:02,819

something like that okay by the way I

1169

00:49:08,390 --> 00:49:05,880

would be remiss if I didn't let you and

1170

00:49:09,710 --> 00:49:08,400

your and your audience know

1171

00:49:11,150 --> 00:49:09,720

um since they're very nice and I feel

1172

00:49:12,050 --> 00:49:11,160

bad if I don't

1173

00:49:15,109 --> 00:49:12,060

um so

1174

00:49:16,069 --> 00:49:15,119

in honor of your people and for your

1175

00:49:19,069 --> 00:49:16,079

show

1176

00:49:21,650 --> 00:49:19,079

my guys they didn't get it done quite in

1177

00:49:24,290 --> 00:49:21,660

time like I wanted but starting midnight

1178

00:49:26,450 --> 00:49:24,300

tonight Pacific Time right okay so

1179

00:49:27,770 --> 00:49:26,460

midnight I think it's your time and for

1180

00:49:29,690 --> 00:49:27,780

two days running

1181

00:49:31,670 --> 00:49:29,700

okay so it's going to be all Friday and

1182

00:49:34,250 --> 00:49:31,680

all Saturday Pacific Time ends midnight

1183

00:49:38,329 --> 00:49:34,260

Pacific time it's been set up so that my

1184

00:49:39,770 --> 00:49:38,339

Novella Cronus Rising Diablo is free the

1185

00:49:43,250 --> 00:49:39,780

ebook version for any of your people

1186

00:49:45,010 --> 00:49:43,260

that want it on Amazon read it on any

1187

00:49:48,170 --> 00:49:45,020

device

1188

00:49:49,370 --> 00:49:48,180

just no just click on go for the Kindle

1189

00:49:51,910 --> 00:49:49,380

you can read it on your phone or

1190

00:49:56,089 --> 00:49:51,920

anything you want it has been called

1191

00:49:57,650 --> 00:49:56,099

gosh uh Jurassic Park meets Pompeii so

1192

00:49:59,710 --> 00:49:57,660

that kind of gives you an idea and this

1193

00:50:03,410 --> 00:49:59,720

is the whole basis of the Cronus Rising

1194

00:50:05,750 --> 00:50:03,420

Series this prehistoric Island Caldera

1195

00:50:07,849 --> 00:50:05,760

off the coast of Cuba filled with all

1196

00:50:09,829 --> 00:50:07,859

sorts of giant Prius organ nasties Etc

1197

00:50:12,589 --> 00:50:09,839

but it's on the house for your guys

1198

00:50:14,089 --> 00:50:12,599

anybody can get it and I I think they're

1199

00:50:16,550 --> 00:50:14,099

gonna like it actually you know what

1200

00:50:19,609 --> 00:50:16,560

authors DB put it as one of 2016's top

1201  
00:50:21,890 --> 00:50:19,619  
10 books so I was able to finagle itself

1202  
00:50:23,450 --> 00:50:21,900  
for two days and two days only anybody

1203  
00:50:26,630 --> 00:50:23,460  
who wants it just goes on Amazon and

1204  
00:50:29,690 --> 00:50:26,640  
it's theirs okay so you said it's a

1205  
00:50:32,270 --> 00:50:29,700  
volume three no it's Cronus Rising

1206  
00:50:34,849 --> 00:50:32,280  
Diablo the one with the very scary eyes

1207  
00:50:37,250 --> 00:50:34,859  
and the volcano burning behind it or

1208  
00:50:41,390 --> 00:50:37,260  
under it or something surprising I want

1209  
00:50:43,970 --> 00:50:41,400  
to get the right link up right now

1210  
00:50:47,870 --> 00:50:43,980  
um and uh for oh I see it right here

1211  
00:50:51,349 --> 00:50:47,880  
Chronos Rising Diablo uh Bill do you

1212  
00:50:55,069 --> 00:50:51,359  
have it pop it up in the chat for us if

1213  
00:50:58,730 --> 00:50:55,079

you could and uh it's Chronos Rising

1214

00:51:00,349 --> 00:50:58,740

Diablo right there got it and uh thank

1215

00:51:03,589 --> 00:51:00,359

you for that that's really really cool

1216

00:51:06,470 --> 00:51:03,599

so for midnight tonight until midnight

1217

00:51:08,390 --> 00:51:06,480

Sunday yeah Pacific time that's that's

1218

00:51:10,190 --> 00:51:08,400

per Amazon's terms I have no control

1219

00:51:12,410 --> 00:51:10,200

with that I wanted it to be able to be

1220

00:51:14,329 --> 00:51:12,420

live right now but they didn't get it

1221

00:51:15,530 --> 00:51:14,339

done in time you know it was like only a

1222

00:51:16,970 --> 00:51:15,540

couple hours whatever they were saying

1223

00:51:18,950 --> 00:51:16,980

and stuff like that I was like all right

1224

00:51:21,589 --> 00:51:18,960

whatever but you know for those two days

1225

00:51:24,170 --> 00:51:21,599

anybody wants it it's on me God bless

1226

00:51:25,970 --> 00:51:24,180

enjoy I hope you like it okay there you

1227

00:51:28,370 --> 00:51:25,980

go and thank you for that bill Bill's

1228

00:51:29,870 --> 00:51:28,380

got it up I just copied it and got it up

1229

00:51:31,870 --> 00:51:29,880

there too thank you for that it's real

1230

00:51:34,190 --> 00:51:31,880

cool

1231

00:51:37,130 --> 00:51:34,200

things go back to the shark and it being

1232

00:51:38,329 --> 00:51:37,140

still out there yeah because they got to

1233

00:51:40,430 --> 00:51:38,339

have family

1234

00:51:43,430 --> 00:51:40,440

right you gotta have brothers and

1235

00:51:44,950 --> 00:51:43,440

sisters I don't know what a shark pot is

1236

00:51:47,030 --> 00:51:44,960

called but

1237

00:51:48,530 --> 00:51:47,040

there's there's got to be more that's

1238

00:51:51,230 --> 00:51:48,540

not just one

1239

00:51:53,450 --> 00:51:51,240

so so I guess what we're asking is is

1240

00:51:55,730 --> 00:51:53,460

what kind of species of shark do we

1241

00:51:58,130 --> 00:51:55,740

think this was was it megalon was it not

1242

00:52:00,130 --> 00:51:58,140

you know if not what is it are there

1243

00:52:02,569 --> 00:52:00,140

more of them and all that jazz right

1244

00:52:04,430 --> 00:52:02,579

okay so let's start from the beginning

1245

00:52:07,069 --> 00:52:04,440

then so

1246

00:52:08,870 --> 00:52:07,079

um the whale carcass has some short

1247

00:52:11,569 --> 00:52:08,880

tooth marks on it you can kind of see

1248

00:52:13,370 --> 00:52:11,579

they're pretty triangular

1249

00:52:16,370 --> 00:52:13,380

um what was more telling was the wounds

1250

00:52:18,829 --> 00:52:16,380

on the Galapagos Giant and again thank

1251  
00:52:20,290 --> 00:52:18,839  
you Dr Simon Pierce

1252  
00:52:23,210 --> 00:52:20,300  
um sent me

1253  
00:52:25,849 --> 00:52:23,220  
massive photos I mean like so high

1254  
00:52:28,730 --> 00:52:25,859  
definition I can practically printed up

1255  
00:52:30,109 --> 00:52:28,740  
the whale shark full size okay and

1256  
00:52:32,329 --> 00:52:30,119  
there's one shot where you can see the

1257  
00:52:35,450 --> 00:52:32,339  
bite up close and you can see these

1258  
00:52:38,270 --> 00:52:35,460  
lashes from the teeth like that and so

1259  
00:52:39,890 --> 00:52:38,280  
the thing is is that they're very

1260  
00:52:42,410 --> 00:52:39,900  
pointy

1261  
00:52:43,730 --> 00:52:42,420  
okay so if I brought out like I have a

1262  
00:52:45,829 --> 00:52:43,740  
three inch white shark tooth in the

1263  
00:52:48,829 --> 00:52:45,839

display case and you look at that it's

1264

00:52:51,710 --> 00:52:48,839

like a perfect triangle okay if you look

1265

00:52:54,230 --> 00:52:51,720

at the chub utensil tooth it's very

1266

00:52:56,450 --> 00:52:54,240

triangular okay now this is a couple of

1267

00:52:58,730 --> 00:52:56,460

teeth off center but still you can see

1268

00:53:02,450 --> 00:52:58,740

how it's shaped there but if I put this

1269

00:53:06,230 --> 00:53:02,460

Megalodon tooth beside it you see how

1270

00:53:08,150 --> 00:53:06,240

round it is by comparison so truth

1271

00:53:11,390 --> 00:53:08,160

gouges from this

1272

00:53:13,130 --> 00:53:11,400

would be more like like Scoops you know

1273

00:53:15,410 --> 00:53:13,140

what I mean like an ice cream scoop sure

1274

00:53:19,790 --> 00:53:15,420

and they don't they don't match

1275

00:53:22,370 --> 00:53:19,800

unfortunately okay which means that it

1276  
00:53:24,710 --> 00:53:22,380  
suggests that it's not a Megalodon then

1277  
00:53:26,089 --> 00:53:24,720  
the other problem that we run into if we

1278  
00:53:28,190 --> 00:53:26,099  
were trying to say that the shark is

1279  
00:53:29,930 --> 00:53:28,200  
still alive and we could say oh well the

1280  
00:53:31,309 --> 00:53:29,940  
smaller sharks you know this is not a

1281  
00:53:32,870 --> 00:53:31,319  
full grown one maybe the teeth are not

1282  
00:53:35,150 --> 00:53:32,880  
as pointy or something like that or

1283  
00:53:37,250 --> 00:53:35,160  
maybe it's positioning it more with the

1284  
00:53:40,970 --> 00:53:37,260  
lower teeth which are more pointy the

1285  
00:53:44,690 --> 00:53:40,980  
problem is is that in order to have a

1286  
00:53:47,690 --> 00:53:44,700  
an animal to maintain itself to not go

1287  
00:53:51,049 --> 00:53:50,270  
hi Audrey you are welcome

1288  
00:53:52,609 --> 00:53:51,059

um

1289

00:53:54,170 --> 00:53:52,619

you need a breeding population of at

1290

00:53:59,329 --> 00:53:54,180

least 500 animals

1291

00:54:01,309 --> 00:53:59,339

okay 500 adults if there were 540 to 50

1292

00:54:03,710 --> 00:54:01,319

foot megalon sharks swimming around out

1293

00:54:06,950 --> 00:54:03,720

there pretty sure people will be seeing

1294

00:54:09,650 --> 00:54:06,960

four foot five foot shark fins all over

1295

00:54:10,790 --> 00:54:09,660

the place you know there'd be attacks on

1296

00:54:15,230 --> 00:54:10,800

boats

1297

00:54:16,910 --> 00:54:15,240

more whale carcasses showing up all this

1298

00:54:18,650 --> 00:54:16,920

other stuff like that but we don't get

1299

00:54:20,870 --> 00:54:18,660

any of that we get these occasional

1300

00:54:24,069 --> 00:54:20,880

carcasses with these this feeding damage

1301

00:54:26,690 --> 00:54:24,079

on and stuff like that and that to me

1302

00:54:28,730 --> 00:54:26,700

means that what I believe is the case

1303

00:54:30,349 --> 00:54:28,740

and this was on Discovery

1304

00:54:32,089 --> 00:54:30,359

um I'm not sure if it was the same one

1305

00:54:34,609 --> 00:54:32,099

or not I think it was the same special

1306

00:54:36,349 --> 00:54:34,619

that they had it was called uh something

1307

00:54:37,630 --> 00:54:36,359

in the Kill Zone super predator in the

1308

00:54:39,530 --> 00:54:37,640

Kill Zone or something like that but uh

1309

00:54:41,210 --> 00:54:39,540

is that

1310

00:54:43,609 --> 00:54:41,220

marine biologists some of them believe

1311

00:54:45,589 --> 00:54:43,619

that great whites occasionally suffer

1312

00:54:48,170 --> 00:54:45,599

from what's called gigantism

1313

00:54:49,970 --> 00:54:48,180

and I I documented this in in Monsters

1314

00:54:51,650 --> 00:54:49,980

and mystery so if anybody's out there

1315

00:54:53,990 --> 00:54:51,660

has a chance to get the book I recommend

1316

00:54:55,910 --> 00:54:54,000

the Kindle version it has all the links

1317

00:54:57,950 --> 00:54:55,920

to everything all the scientific

1318

00:54:59,390 --> 00:54:57,960

references Etc so you've been go

1319

00:55:01,490 --> 00:54:59,400

wherever you want much easier than

1320

00:55:02,630 --> 00:55:01,500

trying to hand you know things stuff and

1321

00:55:04,790 --> 00:55:02,640

if you have Kindle unlimited I think you

1322

00:55:07,250 --> 00:55:04,800

can even read it for free but anyway

1323

00:55:09,589 --> 00:55:07,260

um the uh

1324

00:55:11,510 --> 00:55:09,599

they believe that gigantism occasionally

1325

00:55:13,130 --> 00:55:11,520

affects white sharks and it doesn't

1326

00:55:15,710 --> 00:55:13,140

affect just white sharks or other

1327

00:55:17,930 --> 00:55:15,720

species out there that

1328

00:55:19,609 --> 00:55:17,940

um it does affect for example there's a

1329

00:55:20,809 --> 00:55:19,619

in here we have an animal called the

1330

00:55:23,030 --> 00:55:20,819

American toad

1331

00:55:24,710 --> 00:55:23,040

I have one it's on my Facebook page my

1332

00:55:27,290 --> 00:55:24,720

daughter has a it lives outside of her

1333

00:55:28,849 --> 00:55:27,300

house and it's like our pet now okay and

1334

00:55:31,010 --> 00:55:28,859

the American toad gets to be maybe four

1335

00:55:33,530 --> 00:55:31,020

inches in body length it's a good sized

1336

00:55:35,210 --> 00:55:33,540

toad but sometimes they find females

1337

00:55:37,910 --> 00:55:35,220

that are eight inches long

1338

00:55:40,790 --> 00:55:37,920

which is ridiculously big and this toad

1339

00:55:43,370 --> 00:55:40,800

is suffered from gigantism so sharks

1340

00:55:45,650 --> 00:55:43,380

also have indeterminate growth as do

1341

00:55:48,230 --> 00:55:45,660

snakes and things like that I personally

1342

00:55:50,329 --> 00:55:48,240

when I was like a I don't know 10 or 11

1343

00:55:51,589 --> 00:55:50,339

I caught a predatory species of beetle

1344

00:55:53,510 --> 00:55:51,599

and it's in the book I remember them the

1345

00:55:54,829 --> 00:55:53,520

species right now and normally they only

1346

00:55:56,809 --> 00:55:54,839

get to be like an inch long and I got

1347

00:55:59,030 --> 00:55:56,819

one that was like three inches long I

1348

00:56:01,250 --> 00:55:59,040

mean Alive and Kicking get the [h\_\_\h] out

1349

00:56:04,130 --> 00:56:01,260

of me and whatever and stuff okay but uh

1350

00:56:06,710 --> 00:56:04,140

so gigantism is out there so

1351  
00:56:08,450 --> 00:56:06,720  
if it makes sense I mean the teeth The

1352  
00:56:10,910 --> 00:56:08,460  
Rake marks or the teeth match a great

1353  
00:56:13,250 --> 00:56:10,920  
white more number one the other thing is

1354  
00:56:15,349 --> 00:56:13,260  
the bite shape matches a great white

1355  
00:56:17,390 --> 00:56:15,359  
but most importantly if you have a great

1356  
00:56:18,829 --> 00:56:17,400  
white that doesn't stop growing it

1357  
00:56:20,270 --> 00:56:18,839  
doesn't slow down and it has this

1358  
00:56:23,690 --> 00:56:20,280  
gigantism thing

1359  
00:56:26,329 --> 00:56:23,700  
it turns into a monster see and unlike

1360  
00:56:28,010 --> 00:56:26,339  
human beings like I'm sure you know like

1361  
00:56:30,170 --> 00:56:28,020  
about have you ever heard of a man named

1362  
00:56:32,750 --> 00:56:30,180  
Robert Wadlow who is the tallest

1363  
00:56:35,210 --> 00:56:32,760

documented human being in history he was

1364

00:56:36,530 --> 00:56:35,220

like a millimeter shy of nine feet or

1365

00:56:38,569 --> 00:56:36,540

something like that

1366

00:56:40,069 --> 00:56:38,579

but he was suffering from this growth

1367

00:56:41,630 --> 00:56:40,079

through you know messed him up and he

1368

00:56:43,250 --> 00:56:41,640

had acromegalia and if you walk with a

1369

00:56:46,069 --> 00:56:43,260

cane eventually he was crippled then he

1370

00:56:48,109 --> 00:56:46,079

died so our bodies don't respond well to

1371

00:56:51,410 --> 00:56:48,119

being eight or nine feet tall

1372

00:56:52,730 --> 00:56:51,420

but sharks can survive at Large Size we

1373

00:56:56,049 --> 00:56:52,740

know because we know we have 50 foot

1374

00:57:03,109 --> 00:56:58,670

the body weight is supported by the

1375

00:57:06,910 --> 00:57:03,119

water uh humans we get we have to deal

1376

00:57:10,490 --> 00:57:06,920

with the thing called gravity right so

1377

00:57:13,190 --> 00:57:10,500

we're always being pulled down and the

1378

00:57:16,730 --> 00:57:13,200

the gravity with our blood and

1379

00:57:19,010 --> 00:57:16,740

circulation system all of our organs uh

1380

00:57:21,349 --> 00:57:19,020

are completely stressed out when you get

1381

00:57:23,990 --> 00:57:21,359

over that's why we're just six feet tall

1382

00:57:27,370 --> 00:57:24,000

and we're not 10 feet tall gravity is

1383

00:57:32,630 --> 00:57:27,380

pulling us down but if you're a shark

1384

00:57:36,230 --> 00:57:32,640

and right and if you are a shark and

1385

00:57:38,630 --> 00:57:36,240

technically you never stop growing and

1386

00:57:42,170 --> 00:57:38,640

you're not dealing with gravity and and

1387

00:57:44,510 --> 00:57:42,180

you put in uh the giant effect on top of

1388

00:57:47,390 --> 00:57:44,520

that we're talking about a a huge huge

1389

00:57:49,069 --> 00:57:47,400

fish yes we'll see now indeterminate

1390

00:57:50,569 --> 00:57:49,079

growth means that the thing never stops

1391

00:57:53,030 --> 00:57:50,579

growing this is common for fish for

1392

00:57:55,309 --> 00:57:53,040

reptiles things like that but normally

1393

00:57:57,710 --> 00:57:55,319

in the wild the they grow to a certain

1394

00:58:00,410 --> 00:57:57,720

size and then they continue to grow but

1395

00:58:02,329 --> 00:58:00,420

the growth slows down so instead of

1396

00:58:04,130 --> 00:58:02,339

growing a foot a year they might grow

1397

00:58:06,349 --> 00:58:04,140

two inches a year or something like that

1398

00:58:08,569 --> 00:58:06,359

you see they keep growing like low long

1399

00:58:09,829 --> 00:58:08,579

the crocodile you know he reaches a

1400

00:58:12,829 --> 00:58:09,839

certain size and then he slowed down

1401

00:58:14,930 --> 00:58:12,839

okay so the thing is old age eventually

1402

00:58:17,450 --> 00:58:14,940

puts a stop to that but if you have

1403

00:58:18,650 --> 00:58:17,460

something where it doesn't slow down now

1404

00:58:20,809 --> 00:58:18,660

you get these great whites with

1405

00:58:23,030 --> 00:58:20,819

gigantism and that can explain the Beast

1406

00:58:24,349 --> 00:58:23,040

of Briar Island the Galapagos Giant and

1407

00:58:27,049 --> 00:58:24,359

whatever the heck we're going to name is

1408

00:58:29,690 --> 00:58:27,059

this prior Island Behemoth there's the

1409

00:58:32,630 --> 00:58:29,700

name right there okay this new one but

1410

00:58:34,790 --> 00:58:32,640

and the thing is is though now if we

1411

00:58:37,789 --> 00:58:34,800

wanted a mega shark population out there

1412

00:58:40,730 --> 00:58:37,799

we'd pray for these sharks to be mating

1413

00:58:42,829 --> 00:58:40,740

and you know making passing on that Gene

1414

00:58:44,569 --> 00:58:42,839

for gigantism so that they'd be all over

1415

00:58:46,730 --> 00:58:44,579

the place and then we'd have 30 40 foot

1416

00:58:49,069 --> 00:58:46,740

great whites you know they wouldn't be

1417

00:58:52,069 --> 00:58:49,079

megalons but they'd be impressive as all

1418

00:58:53,930 --> 00:58:52,079

hell okay but the problem is that it's

1419

00:58:55,970 --> 00:58:53,940

probably like one in a few thousand or

1420

00:58:59,270 --> 00:58:55,980

one ten thousand animals they're very

1421

00:59:01,609 --> 00:58:59,280

rare and they don't breed because

1422

00:59:03,950 --> 00:59:01,619

like well I don't know if do you know

1423

00:59:06,190 --> 00:59:03,960

how like white sharks mate

1424

00:59:11,270 --> 00:59:06,200

I I no

1425

00:59:13,970 --> 00:59:11,280

it's it's very violent okay so basically

1426  
00:59:16,849 --> 00:59:13,980  
okay so when a lion mates for example

1427  
00:59:19,130 --> 00:59:16,859  
the male comes up he grabs the female by

1428  
00:59:22,250 --> 00:59:19,140  
the nape with his teeth and he pulls up

1429  
00:59:24,170 --> 00:59:22,260  
on her neck like that okay and that

1430  
00:59:26,150 --> 00:59:24,180  
basically instills a reaction like when

1431  
00:59:27,890 --> 00:59:26,160  
she's a kitten and the mother carries

1432  
00:59:35,109 --> 00:59:27,900  
them by the neck and they go limp are

1433  
00:59:39,650 --> 00:59:37,430  
so that's how the male is able to

1434  
00:59:43,609 --> 00:59:39,660  
convince the female lioness the Lioness

1435  
00:59:45,890 --> 00:59:43,619  
told still okay so they can procreate so

1436  
00:59:47,990 --> 00:59:45,900  
they can copulate okay we're gonna be

1437  
00:59:49,910 --> 00:59:48,000  
very scientific here all right so that's

1438  
00:59:53,030 --> 00:59:49,920

what happens white sharks do something

1439

00:59:56,089 --> 00:59:53,040

similar the male comes up and he grabs

1440

00:59:58,309 --> 00:59:56,099

her by the gills like that and he bites

1441

01:00:00,349 --> 00:59:58,319

but it's not a soft bite this ain't a

1442

01:00:02,150 --> 01:00:00,359

gentle bite yeah I mean you just look it

1443

01:00:03,890 --> 01:00:02,160

up you'll see wounds where the gills are

1444

01:00:06,950 --> 01:00:03,900

exposed and these it looks like it

1445

01:00:09,170 --> 01:00:06,960

should be dead okay and that but they do

1446

01:00:10,970 --> 01:00:09,180

regenerate and within a year that wound

1447

01:00:13,309 --> 01:00:10,980

is completely gone apparently a little

1448

01:00:15,170 --> 01:00:13,319

few scars or whatever stuff but so his

1449

01:00:18,770 --> 01:00:15,180

job is he bites her on the neck and he

1450

01:00:21,670 --> 01:00:18,780

pins her down to the seabed okay and uh

1451

01:00:24,170 --> 01:00:21,680

you know does his thing

1452

01:00:27,470 --> 01:00:24,180

yeah okay and then you have little

1453

01:00:29,030 --> 01:00:27,480

sharks okay so and the males tend to be

1454

01:00:30,890 --> 01:00:29,040

a little smaller than the female so if

1455

01:00:33,170 --> 01:00:30,900

the female is like like um deep blue if

1456

01:00:36,289 --> 01:00:33,180

she's 20 feet long like they say a huge

1457

01:00:37,430 --> 01:00:36,299

male might be 17 or 18 feet so there's a

1458

01:00:40,130 --> 01:00:37,440

little bit of size difference the female

1459

01:00:43,069 --> 01:00:40,140

tends to be larger okay

1460

01:00:44,210 --> 01:00:43,079

um so now think about this if you're a

1461

01:00:47,089 --> 01:00:44,220

uh

1462

01:00:49,549 --> 01:00:47,099

an 18-foot male in his prime and you

1463

01:00:51,170 --> 01:00:49,559

approach a 42 foot female

1464

01:00:52,670 --> 01:00:51,180

do you think you're gonna grab her by

1465

01:00:53,630 --> 01:00:52,680

the neck and wrestle her down to the

1466

01:00:55,789 --> 01:00:53,640

seabed

1467

01:00:58,730 --> 01:00:55,799

or are you going to get eaten I've seen

1468

01:01:00,470 --> 01:00:58,740

that movie yeah that's right right right

1469

01:01:02,089 --> 01:01:00,480

yeah I mean seriously that's what's

1470

01:01:04,730 --> 01:01:02,099

gonna happen and if it was the opposite

1471

01:01:06,349 --> 01:01:04,740

if it was a 36 foot or a 32 foot male

1472

01:01:08,450 --> 01:01:06,359

and he started approaching a female

1473

01:01:10,309 --> 01:01:08,460

she's going to run for her life

1474

01:01:12,589 --> 01:01:10,319

she doesn't want those jaws crunching

1475

01:01:14,329 --> 01:01:12,599

down on her and she'd get eaten see so

1476  
01:01:16,370 --> 01:01:14,339  
unless you had two of them that were in

1477  
01:01:18,470 --> 01:01:16,380  
a similar size range the odds of that

1478  
01:01:20,750 --> 01:01:18,480  
happening on this whole planet and

1479  
01:01:22,549 --> 01:01:20,760  
millions of cubic miles of ocean you

1480  
01:01:24,770 --> 01:01:22,559  
know what I mean is very very unlikely

1481  
01:01:26,270 --> 01:01:24,780  
Could Happen given enough time but I

1482  
01:01:27,109 --> 01:01:26,280  
don't see it happening in my lifetime or

1483  
01:01:29,809 --> 01:01:27,119  
anything like

1484  
01:01:31,910 --> 01:01:29,819  
so all right so what you're suggesting

1485  
01:01:34,130 --> 01:01:31,920  
and uh we've got to break to a

1486  
01:01:36,950 --> 01:01:34,140  
commercial but so what you're suggesting

1487  
01:01:39,170 --> 01:01:36,960  
is the one that did this attack by the

1488  
01:01:41,750 --> 01:01:39,180

way uh this was this was in the

1489

01:01:46,089 --> 01:01:41,760

Northeast this is near Maine

1490

01:01:49,130 --> 01:01:46,099

which one uh the the

1491

01:01:52,210 --> 01:01:49,140

documentary yeah prior Island yeah it's

1492

01:01:55,970 --> 01:01:52,220

right up there a little past there uh

1493

01:01:57,890 --> 01:01:55,980

yeah where they film Jaws so

1494

01:02:00,589 --> 01:01:57,900

um I don't know what it is about that

1495

01:02:03,950 --> 01:02:00,599

area but uh you're you're suggesting

1496

01:02:05,210 --> 01:02:03,960

that this may be a one-off shark that

1497

01:02:07,910 --> 01:02:05,220

there isn't

1498

01:02:09,950 --> 01:02:07,920

it you know five I think the Bay of

1499

01:02:12,109 --> 01:02:09,960

Fundy seems to be a hot spot for Mega

1500

01:02:14,210 --> 01:02:12,119

Sharks because both the Visa Briar

1501  
01:02:15,710 --> 01:02:14,220  
Island and this one for the the evidence

1502  
01:02:17,809 --> 01:02:15,720  
of them they were feeding in the same

1503  
01:02:19,970 --> 01:02:17,819  
area so it looks like there's and it's

1504  
01:02:22,430 --> 01:02:19,980  
not the same animal because it was only

1505  
01:02:24,650 --> 01:02:22,440  
filmed a year or two earlier a 26 footer

1506  
01:02:25,730 --> 01:02:24,660  
is not turning into a 32-footer in a

1507  
01:02:28,549 --> 01:02:25,740  
year or two

1508  
01:02:30,589 --> 01:02:28,559  
understand it's got to be two two big

1509  
01:02:33,430 --> 01:02:30,599  
big big sharks the same space and yes

1510  
01:02:36,349 --> 01:02:33,440  
the sea floor does Creak especially when

1511  
01:02:38,210 --> 01:02:36,359  
my fat butt you know it was walking

1512  
01:02:39,349 --> 01:02:38,220  
around on I've heard it Creak it's it's

1513  
01:02:41,930 --> 01:02:39,359

scary

1514

01:02:44,089 --> 01:02:41,940

how many uh check this out I'm just

1515

01:02:45,890 --> 01:02:44,099

gonna pop this up there's somebody that

1516

01:02:48,770 --> 01:02:45,900

just said they're in Maine here's

1517

01:02:51,950 --> 01:02:48,780

somebody else I'm in me how many of you

1518

01:02:54,170 --> 01:02:51,960

are in Maine and knew about what we are

1519

01:02:56,630 --> 01:02:54,180

talking about tonight our guest tonight

1520

01:03:00,289 --> 01:02:56,640

Max Hawthorne we are talking about mega

1521

01:03:02,089 --> 01:03:00,299

sharks or Megalodon all of that and much

1522

01:03:04,789 --> 01:03:02,099

more when we come back after this short

1523

01:03:07,130 --> 01:03:04,799

break stay with us

1524

01:03:09,470 --> 01:03:07,140

this is Jimmy Church of Fade to Black

1525

01:03:11,690 --> 01:03:09,480

please visit all of our sponsors we're

1526

01:03:13,430 --> 01:03:11,700

taking a quick break here all of the

1527

01:03:15,829 --> 01:03:13,440

links are below

1528

01:03:19,970 --> 01:03:15,839

and we'll be right back

1529

01:03:22,490 --> 01:03:19,980

join us November 10th 11th and 12th 2023

1530

01:03:25,190 --> 01:03:22,500

as disclosure Fest foundation and Fade

1531

01:03:27,710 --> 01:03:25,200

to Black radio presents Stairway To the

1532

01:03:30,289 --> 01:03:27,720

Stars a human Origins Science and

1533

01:03:33,289 --> 01:03:30,299

Technology Expo live at the Luxor Hotel

1534

01:03:35,569 --> 01:03:33,299

and Casino and the Las Vegas Strip with

1535

01:03:37,490 --> 01:03:35,579

live talks and lectures and workshops by

1536

01:03:39,650 --> 01:03:37,500

World Acclaim researchers and authors

1537

01:03:42,230 --> 01:03:39,660

this is Jimmy Church by the way and I'll

1538

01:03:44,510 --> 01:03:42,240

be your host all weekend long featuring

1539

01:03:46,670 --> 01:03:44,520

topics like human Origins ancient

1540

01:03:49,549 --> 01:03:46,680

Technologies indigenous teachings

1541

01:03:51,950 --> 01:03:49,559

workshops of mass meditation yoga and

1542

01:03:54,650 --> 01:03:51,960

sound healing music and so much more

1543

01:03:57,530 --> 01:03:54,660

don't miss our intimate sky watch and

1544

01:04:00,410 --> 01:03:57,540

meteor shower over the infamous Area 51

1545

01:04:02,150 --> 01:04:00,420

airspace in Rachel Nevada with special

1546

01:04:04,430 --> 01:04:02,160

surprise celebrity host guiding us

1547

01:04:08,329 --> 01:04:04,440

through the night also introducing our

1548

01:04:10,549 --> 01:04:08,339

disclosure Fest VR Starship area with

1549

01:04:13,309 --> 01:04:10,559

dozens of rides you've gotta check it

1550

01:04:14,870 --> 01:04:13,319

out this event will sell out for more

1551

01:04:17,809 --> 01:04:14,880

information and tickets Please visit

1552

01:04:20,030 --> 01:04:17,819

disclosure Fest dot org this is Jimmy

1553

01:04:23,750 --> 01:04:20,040

church and I want to introduce you to

1554

01:04:26,089 --> 01:04:23,760

lifewaves x39 Stem Cell Activation patch

1555

01:04:29,569 --> 01:04:26,099

which has totally transformed my health

1556

01:04:32,510 --> 01:04:29,579

my sleep brain and my eyes I no longer

1557

01:04:34,549 --> 01:04:32,520

need reading glasses x39 is a true

1558

01:04:38,750 --> 01:04:34,559

breakthrough in regenerative science

1559

01:04:41,390 --> 01:04:38,760

using light x-39's patented age reversal

1560

01:04:43,309 --> 01:04:41,400

Technologies clinically proven to Signal

1561

01:04:45,589 --> 01:04:43,319

the activation of younger stem cells

1562

01:04:48,829 --> 01:04:45,599

accelerating the body's natural healing

1563

01:04:51,170 --> 01:04:48,839

process x39 promotes restoration and

1564

01:04:53,569 --> 01:04:51,180

Rejuvenation bringing the life-changing

1565

01:04:55,849 --> 01:04:53,579

benefits that I've experienced by

1566

01:04:59,030 --> 01:04:55,859

naturally elevating a master signaling

1567

01:05:01,789 --> 01:04:59,040

peptide in the body x-39 boost Vitality

1568

01:05:04,670 --> 01:05:01,799

health and wellness and resets 4 000

1569

01:05:07,309 --> 01:05:04,680

genes to a younger healthier State it's

1570

01:05:11,049 --> 01:05:07,319

one patch once a day and you can turn

1571

01:05:14,450 --> 01:05:11,059

back time with x-39 just go to

1572

01:05:18,349 --> 01:05:14,460

healingworksnow.com that's works with an

1573

01:05:20,510 --> 01:05:18,359

X healing work Works now.com hey

1574

01:05:22,970 --> 01:05:20,520

everybody it's Billy Carson also known

1575

01:05:24,770 --> 01:05:22,980

as Forbidden Knowledge I want to talk to

1576

01:05:28,430 --> 01:05:24,780

you about a very special event coming up

1577

01:05:30,470 --> 01:05:28,440

July 30th 2023 The Forbidden conscious

1578

01:05:32,089 --> 01:05:30,480

Awards we're going to honor people who

1579

01:05:34,370 --> 01:05:32,099

have been contributing to the conscious

1580

01:05:35,809 --> 01:05:34,380

Community for decades people that you

1581

01:05:37,309 --> 01:05:35,819

know and love that have helped you get

1582

01:05:39,289 --> 01:05:37,319

to higher levels of thought and

1583

01:05:41,569 --> 01:05:39,299

Consciousness and awareness it's going

1584

01:05:42,890 --> 01:05:41,579

to be alive in-person event but seats

1585

01:05:44,690 --> 01:05:42,900

are going to sell out very fast you want

1586

01:05:46,309 --> 01:05:44,700

to make sure you're there in person and

1587

01:05:48,130 --> 01:05:46,319

guess what you can help vote for the

1588

01:05:50,150 --> 01:05:48,140

winners voting is available on

1589

01:05:51,770 --> 01:05:50,160

forbiddenknowledge.com and the

1590

01:05:54,890 --> 01:05:51,780

categories are going to be social media

1591

01:05:56,770 --> 01:05:54,900

influencer podcast slash radio host TV

1592

01:05:58,549 --> 01:05:56,780

host actor director producer

1593

01:05:59,990 --> 01:05:58,559

entrepreneurs health and wellness

1594

01:06:02,450 --> 01:06:00,000

philanthropists authors field

1595

01:06:04,250 --> 01:06:02,460

researchers archaeologists space anomaly

1596

01:06:07,069 --> 01:06:04,260

hunters and of course a Lifetime

1597

01:06:08,930 --> 01:06:07,079

Achievement Award I'll be your key note

1598

01:06:10,910 --> 01:06:08,940

speaker that night at The Forbidden

1599

01:06:13,250 --> 01:06:10,920

conscious Awards we have celebrity

1600

01:06:14,809 --> 01:06:13,260

guests performing we'll have a halftime

1601

01:06:16,549 --> 01:06:14,819

show where we're actually going to

1602

01:06:19,130 --> 01:06:16,559

perform music for you and don't forget

1603

01:06:21,049 --> 01:06:19,140

about the pre-event mixer where if you

1604

01:06:23,030 --> 01:06:21,059

buy a box seat you'll be in the VIP

1605

01:06:25,670 --> 01:06:23,040

section and you also have private access

1606

01:06:28,789 --> 01:06:25,680

to a VIP mixer with celebrity guests

1607

01:06:30,470 --> 01:06:28,799

shake hands break bread Network and then

1608

01:06:32,450 --> 01:06:30,480

walk the red carpet with us and take

1609

01:06:33,710 --> 01:06:32,460

amazing photos it's going to be a night

1610

01:06:35,870 --> 01:06:33,720

to remember you don't want to forget

1611

01:06:37,549 --> 01:06:35,880

this make sure you hurry up and get your

1612

01:06:40,010 --> 01:06:37,559

tickets because you're selling out very

1613

01:06:41,860 --> 01:06:40,020

fast I want to see you there forbidden

1614

01:06:45,410 --> 01:06:41,870

conscious Awards 2023

1615

01:06:51,650 --> 01:06:48,829

River Moon coffee makers of the Fade to

1616

01:06:53,470 --> 01:06:51,660

Black blend truly the best coffee on

1617

01:06:55,730 --> 01:06:53,480

planet Earth just visit

1618

01:06:57,589 --> 01:06:55,740

rivermoonwellness.com or their Amazon

1619

01:06:59,029 --> 01:06:57,599

store it's all simple to do you can

1620

01:07:01,130 --> 01:06:59,039

check out the Fade to Black blend the

1621

01:07:03,770 --> 01:07:01,140

game changer Blend or any of their black

1622

01:07:07,490 --> 01:07:03,780

moon wellness products it's the only

1623

01:07:12,289 --> 01:07:07,500

coffee I drink it is the best and it's

1624

01:07:19,670 --> 01:07:16,730

that's right River Moon coffee

1625

01:07:22,190 --> 01:07:19,680

and links are below this portion of the

1626

01:07:26,270 --> 01:07:22,200

show is brought to you by accidental

1627

01:07:28,609 --> 01:07:26,280

truth the new documentary directed by

1628

01:07:31,370 --> 01:07:28,619

Ron James it is on all streaming

1629

01:07:32,990 --> 01:07:31,380

platforms and you can go and check it

1630

01:07:35,510 --> 01:07:33,000

out right now and I'm gonna say it again

1631

01:07:38,870 --> 01:07:35,520

my eight seconds seven seconds in this

1632

01:07:42,650 --> 01:07:38,880

film it makes the entire movie go check

1633

01:07:44,990 --> 01:07:42,660

out accidental truth today and also uh

1634

01:07:47,089 --> 01:07:45,000

brought to you by x39 there it is I keep

1635

01:07:49,910 --> 01:07:47,099

it right here in the studio I'm wearing

1636

01:07:52,930 --> 01:07:49,920

the patch right now and it's the reason

1637

01:07:56,930 --> 01:07:52,940

why I don't wear my glasses anymore

1638

01:07:59,109 --> 01:07:56,940

x39 by lifewave and the links are up and

1639

01:08:02,750 --> 01:07:59,119

they're also over on our social media

1640

01:08:06,770 --> 01:08:02,760

and uh over on our website our guest

1641

01:08:10,309 --> 01:08:06,780

tonight is Max Hawthorne and

1642

01:08:13,130 --> 01:08:10,319

um a couple of things uh really quick as

1643

01:08:17,329 --> 01:08:13,140

uh we get things started again

1644

01:08:22,849 --> 01:08:17,339

um when we are talking about the size is

1645

01:08:25,430 --> 01:08:22,859

of of some of these mega sharks uh Max I

1646

01:08:28,430 --> 01:08:25,440

don't think I don't think you know I I I

1647

01:08:33,610 --> 01:08:28,440

don't think we fully understand we talk

1648

01:08:39,110 --> 01:08:33,620

about uh the Galapagos giant right 40 to

1649

01:08:43,010 --> 01:08:39,120

42 feet long and that's that's that's a

1650

01:08:45,470 --> 01:08:43,020

that's a really big fish and I I I I

1651

01:08:48,110 --> 01:08:45,480

look at it like this and I don't want to

1652

01:08:50,390 --> 01:08:48,120

freak you out but it almost feels like

1653

01:08:54,110 --> 01:08:50,400

we're talking about Bigfoot

1654

01:08:58,090 --> 01:08:54,120

and and there are similarities here

1655

01:09:02,930 --> 01:09:00,829

wait wait a minute hold on now I gotta

1656

01:09:06,050 --> 01:09:02,940

start taking notes what are you doing to

1657

01:09:08,030 --> 01:09:06,060

me I gotta Circle back to Bigfoot okay

1658

01:09:10,729 --> 01:09:08,040

you just you brought it up I'm just

1659

01:09:13,910 --> 01:09:10,739

telling you like you know I I have seen

1660

01:09:18,550 --> 01:09:13,920

a Bigfoot oh okay hold on hold on hold

1661

01:09:21,829 --> 01:09:18,560

on okay baby boy

1662

01:09:26,090 --> 01:09:21,839

so and the reason is

1663

01:09:29,390 --> 01:09:26,100

if if we if we've only you know uh

1664

01:09:32,390 --> 01:09:29,400

checked out five percent of our ocean uh

1665

01:09:35,950 --> 01:09:32,400

oceans there's a lot of places for for

1666

01:09:39,470 --> 01:09:35,960

things to live and and Bigfoot

1667

01:09:41,450 --> 01:09:39,480

especially in the Pacific Northwest when

1668

01:09:44,689 --> 01:09:41,460

you drive around or fly around there and

1669

01:09:48,050 --> 01:09:44,699

you look out the window you know no

1670

01:09:50,090 --> 01:09:48,060

human has ever set foot in those forests

1671

01:09:52,910 --> 01:09:50,100

right and there's just so much of it

1672

01:09:55,790 --> 01:09:52,920

that is unexplored and if you want to

1673

01:09:58,610 --> 01:09:55,800

hide you can hide if you want to just

1674

01:10:01,550 --> 01:09:58,620

live your life you can you can do it in

1675

01:10:05,630 --> 01:10:01,560

solitude it may be the same thing with

1676

01:10:10,070 --> 01:10:08,870

that is 100 true and Phil that was a

1677

01:10:13,010 --> 01:10:10,080

lake in Connecticut it was actually

1678

01:10:14,270 --> 01:10:13,020

swimming and Diving for crayfish

1679

01:10:16,250 --> 01:10:14,280

but anyway

1680

01:10:19,070 --> 01:10:16,260

um so yeah the uh I mean the the

1681

01:10:21,470 --> 01:10:19,080

evidence there's other stuff out there I

1682

01:10:24,229 --> 01:10:21,480

mean uh I had another person approach me

1683

01:10:26,570 --> 01:10:24,239

back gosh like a year or two ago and he

1684

01:10:29,450 --> 01:10:26,580

had photographed a like an 11 foot white

1685

01:10:30,830 --> 01:10:29,460

shark that he called um seabatch

1686

01:10:33,729 --> 01:10:30,840

and he's a professional on the water

1687

01:10:37,729 --> 01:10:33,739

photographer really nice guy and um

1688

01:10:40,370 --> 01:10:37,739

seabatch had a uh a bite on her scar

1689

01:10:41,810 --> 01:10:40,380

with two grooves healed that's like 30

1690

01:10:44,149 --> 01:10:41,820

inches across

1691

01:10:48,130 --> 01:10:44,159

so again you're talking a monstrous fish

1692

01:10:51,649 --> 01:10:48,140

that one was maybe I don't know uh

1693

01:10:53,870 --> 01:10:51,659

28 feet something like that I I was the

1694

01:10:55,669 --> 01:10:53,880

calculation but that's a now that could

1695

01:10:56,810 --> 01:10:55,679

be one of these other fish

1696

01:10:58,729 --> 01:10:56,820

you know that could have been like the

1697

01:11:01,250 --> 01:10:58,739

Beast of Briar Island grew a little bit

1698

01:11:03,830 --> 01:11:01,260

you know but still if it's not there's

1699

01:11:05,570 --> 01:11:03,840

another one out there again so I mean

1700

01:11:07,490 --> 01:11:05,580

you know I I if you're wondering why I

1701

01:11:09,709 --> 01:11:07,500

keep leaning over here Olaf one of our

1702

01:11:11,050 --> 01:11:09,719

Siberian Forest cats is on my desk right

1703

01:11:12,310 --> 01:11:11,060

now

1704

01:11:17,390 --> 01:11:12,320

[Music]

1705

01:11:19,610 --> 01:11:17,400

a Siberian Forest cat yeah they're from

1706

01:11:21,070 --> 01:11:19,620

Russia they live in the they're a wild

1707

01:11:23,990 --> 01:11:21,080

species in Russia that's been

1708

01:11:25,430 --> 01:11:24,000

semi-domesticated and all that and uh

1709

01:11:27,649 --> 01:11:25,440

yeah we have two of them you didn't read

1710

01:11:28,750 --> 01:11:27,659

my bio you know those these guys are

1711

01:11:31,669 --> 01:11:28,760

famous

1712

01:11:36,370 --> 01:11:31,679

hold on let's see can you pick her up

1713

01:11:44,890 --> 01:11:39,430

so I get my exercise

1714

01:11:50,890 --> 01:11:44,900

come here baby boy oh gosh okay so this

1715

01:11:58,250 --> 01:11:53,470

it was so cute

1716

01:12:02,510 --> 01:11:58,260

so anyway oh what yes

1717

01:12:07,189 --> 01:12:02,520

and he sleeps on my desk as I write

1718

01:12:11,390 --> 01:12:09,590

it's like uh this is like one of the old

1719

01:12:12,890 --> 01:12:11,400

episodes of The Tonight Show with Johnny

1720

01:12:14,750 --> 01:12:12,900

Carson

1721

01:12:17,930 --> 01:12:14,760

he is the greatest they are the greatest

1722

01:12:19,970 --> 01:12:17,940

cats in the world this guy is such a

1723

01:12:22,189 --> 01:12:19,980

character let me tell you my wife was

1724

01:12:24,350 --> 01:12:22,199

coming in off the deck yesterday and he

1725

01:12:26,030 --> 01:12:24,360

wanted to get outside to go eat a

1726

01:12:28,850 --> 01:12:26,040

squirrel or who knows what you know

1727

01:12:30,770 --> 01:12:28,860

Terror that he is and he was like

1728

01:12:32,390 --> 01:12:30,780

sitting upright and like looking like

1729

01:12:34,490 --> 01:12:32,400

trying to get around her and she took

1730

01:12:35,750 --> 01:12:34,500

her foot and she pressed her toes gently

1731

01:12:37,790 --> 01:12:35,760

against this Jazz and she gave a little

1732

01:12:40,070 --> 01:12:37,800

nudge like no like that so what does he

1733

01:12:42,470 --> 01:12:40,080

do he falls down like he's been shot and

1734

01:12:45,590 --> 01:12:42,480

he's like lying there like uh like this

1735

01:12:47,149 --> 01:12:45,600

and everything drama queen okay I mean

1736

01:12:49,550 --> 01:12:47,159

like the stuff that they come up with

1737

01:12:51,530 --> 01:12:49,560

and do they're like dogs but smarter

1738

01:12:53,930 --> 01:12:51,540

they're conniving their characters

1739

01:12:57,590 --> 01:12:53,940

they're hilarious I mean like it's great

1740

01:13:00,169 --> 01:12:57,600

honestly it really is it took up the

1741

01:13:03,310 --> 01:13:00,179

entire camera

1742

01:13:05,810 --> 01:13:03,320

yeah he's a big boy yeah how many times

1743

01:13:09,169 --> 01:13:05,820

I don't I don't know I saw him the other

1744

01:13:11,570 --> 01:13:09,179

day on the scale and it said 25.6 but he

1745

01:13:13,610 --> 01:13:11,580

wasn't fully on the scale you know like

1746

01:13:15,890 --> 01:13:13,620

he was like one leg was off and I don't

1747

01:13:18,290 --> 01:13:15,900

think that was accurate but uh very

1748

01:13:21,649 --> 01:13:18,300

poofy he's got huge feet and Paws I mean

1749

01:13:24,250 --> 01:13:21,659

like and you get his teeth are sizable

1750

01:13:26,290 --> 01:13:24,260

too but but he's a big

1751

01:13:30,110 --> 01:13:26,300

mushy boy

1752

01:13:35,750 --> 01:13:30,120

okay oh man

1753

01:13:38,270 --> 01:13:35,760

um uh the how long do or what what's a

1754

01:13:40,970 --> 01:13:38,280

typical lifespan

1755

01:13:43,390 --> 01:13:40,980

um I remember there was I did a fader

1756

01:13:46,010 --> 01:13:43,400

fact a couple of years ago I do it every

1757

01:13:51,110 --> 01:13:46,020

every night on the show and one of them

1758

01:13:54,890 --> 01:13:51,120

there's this uh a piece of uh of

1759

01:13:59,030 --> 01:13:54,900

folklore that lobsters are immortal

1760

01:14:01,669 --> 01:13:59,040

right okay and there's reasons for that

1761

01:14:05,270 --> 01:14:01,679

and yes okay so that

1762

01:14:07,790 --> 01:14:05,280

um but uh how how uh you kind of hear

1763

01:14:10,490 --> 01:14:07,800

the same things about great white sharks

1764

01:14:13,189 --> 01:14:10,500

like they they live for do they live for

1765

01:14:15,410 --> 01:14:13,199

hundreds of years a hundred years no you

1766

01:14:17,689 --> 01:14:15,420

think that's the uh the Greenland shark

1767

01:14:20,450 --> 01:14:17,699

you're thinking of right on that kind of

1768

01:14:22,550 --> 01:14:20,460

like hundreds or even 350 or 500 years I

1769

01:14:24,470 --> 01:14:22,560

forget it's some crazy number

1770

01:14:26,689 --> 01:14:24,480

um white sharks if if memory serves

1771

01:14:29,810 --> 01:14:26,699

usually live can live from like

1772

01:14:32,570 --> 01:14:29,820

40 or 50 to 70 years something like that

1773

01:14:38,090 --> 01:14:32,580

which is still a long time as you know

1774

01:14:39,830 --> 01:14:38,100

as fish go right and to get to uh 42

1775

01:14:42,770 --> 01:14:39,840

feet

1776

01:14:46,550 --> 01:14:42,780

um again uh I I want to be clear here

1777

01:14:49,490 --> 01:14:46,560

like with the Galapagos giant what

1778

01:14:53,030 --> 01:14:49,500

species of shark do you do you think it

1779

01:14:56,870 --> 01:14:53,040

was or is I think it's another mutated

1780

01:14:59,630 --> 01:14:56,880

white shark uh great white shark and uh

1781

01:15:01,669 --> 01:14:59,640

so very great a great great white shark

1782

01:15:04,250 --> 01:15:01,679

or something like that and yes we do

1783

01:15:07,610 --> 01:15:04,260

have cats okay to borrow line a line

1784

01:15:10,790 --> 01:15:07,620

from uh you know a famous movie I'm cat

1785

01:15:12,470 --> 01:15:10,800

man okay so no I saw somebody when they

1786

01:15:15,050 --> 01:15:12,480

were saying we got cats and yes we do

1787

01:15:17,090 --> 01:15:15,060

only one right now yeah I'm sure Mace

1788

01:15:22,189 --> 01:15:17,100

will be in a little bit too

1789

01:15:25,790 --> 01:15:22,199

um so to get to 42 feet we're talking uh

1790

01:15:27,709 --> 01:15:25,800

you know with 50 60 70 year old shark

1791

01:15:31,250 --> 01:15:27,719

it could be or if it's growing super

1792

01:15:33,530 --> 01:15:31,260

fast it might only be 30 or 40 years old

1793

01:15:36,290 --> 01:15:33,540

you know I mean anything's possible

1794

01:15:40,490 --> 01:15:36,300

right I don't know how gigantism Works

1795

01:15:42,350 --> 01:15:40,500

in fish to be honest you know the um uh

1796

01:15:44,930 --> 01:15:42,360

what what is it about the Pacific

1797

01:15:48,410 --> 01:15:44,940

Northwest when it comes to these mega

1798

01:15:51,110 --> 01:15:48,420

sharks uh as opposed to say Australia

1799

01:15:53,689 --> 01:15:51,120

where we hear about things or up near

1800

01:15:56,630 --> 01:15:53,699

San Francisco you know we'd be here by

1801

01:15:58,669 --> 01:15:56,640

great white sharks uh prior Island ones

1802

01:15:59,930 --> 01:15:58,679

are on the Atlantic right actually not

1803

01:16:02,209 --> 01:15:59,940

the Pacific

1804

01:16:03,709 --> 01:16:02,219

um those two um Galapagos obviously it's

1805

01:16:04,910 --> 01:16:03,719

way out in the Pacific and stuff so I

1806

01:16:07,130 --> 01:16:04,920

mean there have been a lot of places

1807

01:16:09,709 --> 01:16:07,140

Australia was one of them you know so

1808

01:16:11,330 --> 01:16:09,719

there's a Cosmopolitan species I mean so

1809

01:16:12,950 --> 01:16:11,340

you're going to have them here there you

1810

01:16:15,470 --> 01:16:12,960

know wherever they are

1811

01:16:16,850 --> 01:16:15,480

it's it's such a fascinating subject to

1812

01:16:19,010 --> 01:16:16,860

me and

1813

01:16:22,790 --> 01:16:19,020

um would it surprise you

1814

01:16:26,270 --> 01:16:22,800

if uh a Megalodon did surface like

1815

01:16:29,450 --> 01:16:26,280

Bigfoot or Loch Ness or one of these uh

1816

01:16:34,130 --> 01:16:29,460

Cryptids uh these mythological creatures

1817

01:16:37,729 --> 01:16:34,140

uh would it surprise you to you know

1818

01:16:41,810 --> 01:16:37,739

the things I've seen

1819

01:16:45,110 --> 01:16:41,820

I mean like uh like nothing surprises me

1820

01:16:46,910 --> 01:16:45,120

anymore it's kind of like that uh that

1821

01:16:50,209 --> 01:16:46,920

scene from

1822

01:16:52,070 --> 01:16:50,219

and yes I watched the uh

1823

01:16:56,090 --> 01:16:52,080

Twilight movies

1824

01:16:58,070 --> 01:16:56,100

okay I I admit it and uh where there's

1825

01:16:59,630 --> 01:16:58,080

one of them where she uh discovers that

1826

01:17:01,790 --> 01:16:59,640

werewolves are real

1827

01:17:03,530 --> 01:17:01,800

and she's writing and sending an email

1828

01:17:04,910 --> 01:17:03,540

saying are all the Legends troops she

1829

01:17:06,229 --> 01:17:04,920

knew about vampires now they're a

1830

01:17:10,010 --> 01:17:06,239

werewolves you know this type of stuff

1831

01:17:12,590 --> 01:17:10,020

so it wouldn't surprise me I mean well I

1832

01:17:14,450 --> 01:17:12,600

wouldn't be like like astonished let's

1833

01:17:16,250 --> 01:17:14,460

put it that way but I I would be a

1834

01:17:17,750 --> 01:17:16,260

little surprised based on the fact that

1835

01:17:20,149 --> 01:17:17,760

nothing there's nothing out there

1836

01:17:21,950 --> 01:17:20,159

suggests that based on the morphology of

1837

01:17:23,090 --> 01:17:21,960

the fish the diet of the fish that type

1838

01:17:26,030 --> 01:17:23,100

of stuff

1839

01:17:28,250 --> 01:17:26,040

you know so I mean a white shark that's

1840

01:17:30,350 --> 01:17:28,260

that big is going to be fairly slow

1841

01:17:31,850 --> 01:17:30,360

moving it's probably going to be more

1842

01:17:33,649 --> 01:17:31,860

cautious it's probably going to learn

1843

01:17:35,510 --> 01:17:33,659

that ships are dangerous things like

1844

01:17:37,610 --> 01:17:35,520

that and it won't be lurking on the

1845

01:17:39,590 --> 01:17:37,620

surface as often and stuff like that if

1846

01:17:41,570 --> 01:17:39,600

you see the fin you might only see half

1847

01:17:43,430 --> 01:17:41,580

of it you don't see the whole animal or

1848

01:17:44,870 --> 01:17:43,440

people think you're a basking shark and

1849

01:17:46,910 --> 01:17:44,880

you just you're written off you know

1850

01:17:49,010 --> 01:17:46,920

that type of stuff but it's a rare

1851  
01:17:52,070 --> 01:17:49,020  
creature you know and it's more drawn to

1852  
01:17:55,669 --> 01:17:52,080  
carrying meaning dead carcasses easy

1853  
01:17:57,830 --> 01:17:55,679  
meals that type of stuff so but you know

1854  
01:17:59,689 --> 01:17:57,840  
if this isn't a megavon species was out

1855  
01:18:01,810 --> 01:17:59,699  
there I'd be happy to fish for them you

1856  
01:18:05,689 --> 01:18:01,820  
know I'll fish for anything

1857  
01:18:08,270 --> 01:18:05,699  
aside from the movie Jaws you know but

1858  
01:18:10,790 --> 01:18:08,280  
now we have you know Shark Week it's one

1859  
01:18:13,310 --> 01:18:10,800  
of the biggest events in in television

1860  
01:18:14,510 --> 01:18:13,320  
what what why the fascination with

1861  
01:18:16,850 --> 01:18:14,520  
sharks

1862  
01:18:19,250 --> 01:18:16,860  
well I think Jaws was responsible for a

1863  
01:18:21,350 --> 01:18:19,260

lot of that as you mentioned you know it

1864

01:18:23,209 --> 01:18:21,360

was a huge Blockbuster it was actually

1865

01:18:26,270 --> 01:18:23,219

set at the stage for all future summer

1866

01:18:29,149 --> 01:18:26,280

Blockbusters and it's a scary thing I

1867

01:18:32,689 --> 01:18:29,159

mean the water is being in the ocean

1868

01:18:34,970 --> 01:18:32,699

even in a lake is kind of creepy if you

1869

01:18:37,729 --> 01:18:34,980

look at people I mean

1870

01:18:40,250 --> 01:18:37,739

without our technology we're not really

1871

01:18:42,830 --> 01:18:40,260

the apex predator that we think we are

1872

01:18:45,709 --> 01:18:42,840

you know or small

1873

01:18:48,649 --> 01:18:45,719

we're slow on land or slugs in the water

1874

01:18:50,270 --> 01:18:48,659

we don't have talons we don't have sharp

1875

01:18:51,649 --> 01:18:50,280

teeth we don't have the strength of a

1876

01:18:54,530 --> 01:18:51,659

chimpanzee

1877

01:18:56,810 --> 01:18:54,540

what do we have honestly other than our

1878

01:18:58,850 --> 01:18:56,820

minds and technology so when you're in

1879

01:19:00,050 --> 01:18:58,860

the water if you're in the ocean like

1880

01:19:03,050 --> 01:19:00,060

you know with a light preserver on

1881

01:19:05,149 --> 01:19:03,060

bobbing around you're a

1882

01:19:07,850 --> 01:19:05,159

you're a topwater lure

1883

01:19:09,649 --> 01:19:07,860

your bait you know like one of those

1884

01:19:11,689 --> 01:19:09,659

like when you put out a minnow under a

1885

01:19:13,070 --> 01:19:11,699

bobber that's you basically and there's

1886

01:19:15,110 --> 01:19:13,080

many things out there the cannon will

1887

01:19:16,790 --> 01:19:15,120

eat you and the scariest part about it

1888

01:19:19,490 --> 01:19:16,800

and the reason why the Coronas Rising a

1889

01:19:21,830 --> 01:19:19,500

series is so successful is that being

1890

01:19:24,290 --> 01:19:21,840

consumed by something whether it's a

1891

01:19:26,990 --> 01:19:24,300

fish or a reptile or something like that

1892

01:19:28,550 --> 01:19:27,000

being eaten alive is one of the possibly

1893

01:19:29,870 --> 01:19:28,560

the most terrifying thing that could

1894

01:19:31,610 --> 01:19:29,880

happen to someone

1895

01:19:34,189 --> 01:19:31,620

you know that you're going to be ripped

1896

01:19:36,350 --> 01:19:34,199

apart chewed up swallowed down and then

1897

01:19:39,290 --> 01:19:36,360

it no longer exists because of this

1898

01:19:40,970 --> 01:19:39,300

giant predator and in the water you

1899

01:19:43,430 --> 01:19:40,980

can't even see it coming

1900

01:19:44,750 --> 01:19:43,440

you know you're on the surface looking

1901

01:19:47,510 --> 01:19:44,760

around remember the poor girl at the

1902

01:19:49,250 --> 01:19:47,520

beginning of Jaws nighttime skinny

1903

01:19:53,270 --> 01:19:49,260

dipping all sudden

1904

01:19:56,930 --> 01:19:53,280

you know it's terrifying well I told you

1905

01:20:00,350 --> 01:19:56,940

uh with my friend Jeff he said it came

1906

01:20:03,050 --> 01:20:00,360

out of the from from beneath him he

1907

01:20:05,510 --> 01:20:03,060

watched it come out of the black and and

1908

01:20:07,490 --> 01:20:05,520

just want to hit him yeah yes yeah yeah

1909

01:20:09,530 --> 01:20:07,500

it was in mid-charge it must have been

1910

01:20:13,610 --> 01:20:09,540

like here's my ticket you know and boom

1911

01:20:21,830 --> 01:20:16,870

um what uh

1912

01:20:23,390 --> 01:20:21,840

art we picture okay and dude this is

1913

01:20:27,649 --> 01:20:23,400

just like you were just saying with the

1914

01:20:31,070 --> 01:20:27,659

movie Just we picture uh great whites

1915

01:20:34,610 --> 01:20:31,080

tiger sharks and other sharks that um uh

1916

01:20:38,390 --> 01:20:34,620

are purely Predators they're just out

1917

01:20:42,590 --> 01:20:38,400

and looking for us and things that are

1918

01:20:46,250 --> 01:20:42,600

alive and and they get is that is that a

1919

01:20:49,010 --> 01:20:46,260

fair classification or are they out

1920

01:20:51,110 --> 01:20:49,020

eating license plates and and garbage on

1921

01:20:53,270 --> 01:20:51,120

the bottom of the ocean

1922

01:20:54,709 --> 01:20:53,280

garage I like the Star Wars reference

1923

01:20:57,590 --> 01:20:54,719

that was awesome

1924

01:20:59,689 --> 01:20:57,600

um well it's not like

1925

01:21:01,729 --> 01:20:59,699

sharks are out to get people

1926

01:21:04,010 --> 01:21:01,739

although to be honest with all the shark

1927

01:21:05,270 --> 01:21:04,020

Finning that goes on out there and the

1928

01:21:06,830 --> 01:21:05,280

millions of sharks that are slaughtered

1929

01:21:09,470 --> 01:21:06,840

every year for their fins I wouldn't

1930

01:21:10,669 --> 01:21:09,480

blame them right honestly and as a

1931

01:21:13,070 --> 01:21:10,679

conservationist I'm going to take a

1932

01:21:17,030 --> 01:21:13,080

moment and say hey people shark fin soup

1933

01:21:19,970 --> 01:21:17,040

does not work for that Viagra Cialis

1934

01:21:21,590 --> 01:21:19,980

okay leave the Sharks alone

1935

01:21:23,390 --> 01:21:21,600

but anyway

1936

01:21:25,070 --> 01:21:23,400

um I am sure there are instances when a

1937

01:21:27,169 --> 01:21:25,080

shark sees a person flailing in the

1938

01:21:29,209 --> 01:21:27,179

water says oh this is an easy meal and

1939

01:21:30,890 --> 01:21:29,219

it gives in to its instincts I'm sure

1940

01:21:32,750 --> 01:21:30,900

that a lot of the attacks on people are

1941

01:21:34,490 --> 01:21:32,760

accidental or maybe they're accidental

1942

01:21:36,110 --> 01:21:34,500

and the shark says oh I taste blood this

1943

01:21:38,450 --> 01:21:36,120

might be good to eat and they keep after

1944

01:21:40,490 --> 01:21:38,460

you okay but I don't think it's an

1945

01:21:42,169 --> 01:21:40,500

organized type of attack on sighting

1946

01:21:44,689 --> 01:21:42,179

because people are in the you know in

1947

01:21:46,070 --> 01:21:44,699

the beaches all the time and such and uh

1948

01:21:49,729 --> 01:21:46,080

you know there'd be many many more

1949

01:21:52,610 --> 01:21:49,739

attacks you know but um

1950

01:21:54,770 --> 01:21:52,620

so I digress from the rest of your

1951

01:21:56,209 --> 01:21:54,780

question yeah yeah oh license plates and

1952

01:21:57,770 --> 01:21:56,219

stuff like that yeah you're thinking of

1953

01:22:00,290 --> 01:21:57,780

tiger sharks and stuff like that will

1954

01:22:03,950 --> 01:22:00,300

mouth and eat just about anything

1955

01:22:06,350 --> 01:22:03,960

um but uh you know so I don't know I I I

1956

01:22:10,790 --> 01:22:06,360

kind of was all over the place with that

1957

01:22:13,370 --> 01:22:10,800

I'm sorry well I mean like I

1958

01:22:15,649 --> 01:22:13,380

I I'm trying to ease people's minds a

1959

01:22:18,950 --> 01:22:15,659

little bit you know

1960

01:22:21,470 --> 01:22:18,960

you know that uh that you know the

1961

01:22:25,430 --> 01:22:21,480

habits are the habits just to go out and

1962

01:22:28,370 --> 01:22:25,440

and and and and eat what is easy to eat

1963

01:22:30,290 --> 01:22:28,380

you know it's just out there just I I

1964

01:22:34,370 --> 01:22:30,300

don't want to use the word scavenger but

1965

01:22:36,470 --> 01:22:34,380

I kind of am uh as opposed to being this

1966

01:22:38,050 --> 01:22:36,480

you know Predator that is that is

1967

01:22:41,770 --> 01:22:38,060

looking for

1968

01:22:44,470 --> 01:22:41,780

humans that are sunbathing

1969

01:22:47,030 --> 01:22:44,480

yeah well I mean there are a lot of

1970

01:22:50,270 --> 01:22:47,040

Juicy delicious people out there I mean

1971

01:22:52,130 --> 01:22:50,280

my God you know except for the silicone

1972

01:22:53,330 --> 01:22:52,140

and all the other stuff like that you

1973

01:22:55,250 --> 01:22:53,340

know I mean so I don't know some people

1974

01:22:56,930 --> 01:22:55,260

are tastier than others I was at the ear

1975

01:23:00,649 --> 01:22:56,940

doctor today and my doctor he was like

1976

01:23:05,750 --> 01:23:00,659

you know you have really nice ears and I

1977

01:23:06,709 --> 01:23:05,760

was like uh no no no thank you no I was

1978

01:23:08,330 --> 01:23:06,719

like

1979

01:23:10,250 --> 01:23:08,340

I'm gonna start walking around now and

1980

01:23:12,470 --> 01:23:10,260

like showing them all like hey baby

1981

01:23:14,390 --> 01:23:12,480

check these out huh what do you think of

1982

01:23:15,110 --> 01:23:14,400

that there's another one over there but

1983

01:23:15,830 --> 01:23:15,120

anyway

1984

01:23:19,250 --> 01:23:15,840

um

1985

01:23:22,010 --> 01:23:19,260

so uh I actually had that happen to me

1986

01:23:24,950 --> 01:23:22,020

it was weird I swear I had that happen

1987

01:23:27,350 --> 01:23:24,960

to me I had this ear doctor

1988

01:23:32,229 --> 01:23:27,360

um this is years ago I'm a young

1989

01:23:37,370 --> 01:23:32,239

strapping lad right and he's he goes hey

1990

01:23:41,030 --> 01:23:37,380

you've do you surf and I go what

1991

01:23:44,270 --> 01:23:41,040

you've got Surfer ear you surf you work

1992

01:23:48,950 --> 01:23:44,280

out I said you know what man uh

1993

01:23:52,970 --> 01:23:48,960

gotta go I gotta go I don't even want to

1994

01:23:54,110 --> 01:23:52,980

know the next question uh I'm out of

1995

01:23:58,070 --> 01:23:54,120

here

1996

01:24:01,010 --> 01:23:58,080

um but what about okay what how did

1997

01:24:03,950 --> 01:24:01,020

we know 65 million years ago asteroid

1998

01:24:07,130 --> 01:24:03,960

hits the hits hits the planet whites out

1999

01:24:11,930 --> 01:24:07,140

the dinosaurs ah the sharks live through

2000

01:24:19,010 --> 01:24:15,050

um Okay so

2001

01:24:21,410 --> 01:24:19,020

a lot of people have this misconception

2002

01:24:23,689 --> 01:24:21,420

that megalodon or any of the mega two

2003

01:24:25,970 --> 01:24:23,699

sharks that are in that lineage were

2004

01:24:27,410 --> 01:24:25,980

alive at the time of the dinosaurs and

2005

01:24:31,610 --> 01:24:27,420

that is not the case

2006

01:24:34,610 --> 01:24:31,620

in fact there were no large predatory

2007

01:24:37,010 --> 01:24:34,620

sharks in the oceans at the end of the

2008

01:24:39,950 --> 01:24:37,020

Cretaceous Period they had all been

2009

01:24:42,470 --> 01:24:39,960

apparently consumed by mosasaurs and I'm

2010

01:24:44,810 --> 01:24:42,480

not kidding as a scientific fact

2011

01:24:47,149 --> 01:24:44,820

you have these 50 60 foot Marine monitor

2012

01:24:48,830 --> 01:24:47,159

lizards swimming around and sharks were

2013

01:24:52,130 --> 01:24:48,840

an ideal meal for them and they were

2014

01:24:55,010 --> 01:24:52,140

everywhere everywhere freshwater salt

2015

01:24:56,930 --> 01:24:55,020

water I mean like forget it so the only

2016

01:24:58,550 --> 01:24:56,940

sharks left like the biggest shark I

2017

01:25:00,770 --> 01:24:58,560

think that was still around was a thing

2018

01:25:02,810 --> 01:25:00,780

called Credo lamina which was only about

2019

01:25:04,370 --> 01:25:02,820

nine or ten feet long

2020

01:25:05,450 --> 01:25:04,380

that was the biggest predatory shark

2021

01:25:06,830 --> 01:25:05,460

that was left at the end of the

2022

01:25:09,169 --> 01:25:06,840

Cretaceous when the dinosaurs were still

2023

01:25:12,290 --> 01:25:09,179

there okay so now after the asteroid

2024

01:25:14,689 --> 01:25:12,300

impact Credo lamina and many other fish

2025

01:25:16,669 --> 01:25:14,699

survived you know different types of

2026

01:25:18,830 --> 01:25:16,679

fish prehistoric fish Etc different ones

2027

01:25:21,110 --> 01:25:18,840

went extinct different times without the

2028

01:25:24,350 --> 01:25:21,120

mosasaurs there as the apex predator

2029

01:25:26,209 --> 01:25:24,360

that Niche became available

2030

01:25:28,850 --> 01:25:26,219

and then what happened is Credo lamina

2031

01:25:30,410 --> 01:25:28,860

began to grow and grow and grow because

2032

01:25:33,110 --> 01:25:30,420

nothing was eating it

2033

01:25:37,850 --> 01:25:33,120

does that make sense you know sort of

2034

01:25:41,270 --> 01:25:37,860

sort of but uh I

2035

01:25:44,030 --> 01:25:41,280

um in my limited research uh when it

2036

01:25:46,550 --> 01:25:44,040

comes to this over the years

2037

01:25:50,149 --> 01:25:46,560

um I thought that the great white shark

2038

01:25:54,830 --> 01:25:50,159

as a species was 75 to 100 million years

2039

01:25:58,010 --> 01:25:54,840

old no and it it is not no and then and

2040

01:26:00,830 --> 01:25:58,020

I I I I thought that I had also read

2041

01:26:04,970 --> 01:26:00,840

that Megalodon didn't go extinct until

2042

01:26:07,970 --> 01:26:04,980

uh two to five million years ago 3.6

2043

01:26:12,290 --> 01:26:07,980

million years ago is the accepted Norm

2044

01:26:14,570 --> 01:26:12,300

right now for Megalodon uh let's see I

2045

01:26:16,370 --> 01:26:14,580

have some I mean I got so many shark

2046

01:26:20,450 --> 01:26:16,380

teeth over there but I'm gonna pull up

2047

01:26:23,030 --> 01:26:20,460

the numbers for you so that we have it

2048

01:26:25,189 --> 01:26:23,040

of course despite what my readers think

2049

01:26:26,510 --> 01:26:25,199

I am not omniscient and cannot remember

2050

01:26:27,950 --> 01:26:26,520

everything

2051

01:26:30,530 --> 01:26:27,960

so

2052

01:26:31,669 --> 01:26:30,540

yes I believe me I've tried it doesn't

2053

01:26:33,229 --> 01:26:31,679

work

2054

01:26:36,169 --> 01:26:33,239

um

2055

01:26:38,209 --> 01:26:36,179

so let's see we got here so there is a

2056

01:26:40,850 --> 01:26:38,219

one of the first or the maybe the first

2057

01:26:44,689 --> 01:26:40,860

well-known megatoo shark is

2058

01:26:48,350 --> 01:26:44,699

otodus obliqueus and this fish

2059

01:26:50,870 --> 01:26:48,360

live let's see here from the Paleo scene

2060

01:26:53,450 --> 01:26:50,880

so that would have been about 66 million

2061

01:26:57,590 --> 01:26:53,460

years ago okay so after the dinosaurs

2062

01:27:00,070 --> 01:26:57,600

were gone it evolved and until the

2063

01:27:03,709 --> 01:27:00,080

plyocene which was

2064

01:27:06,950 --> 01:27:03,719

5.33 million years ago now this fish was

2065

01:27:09,830 --> 01:27:06,960

around 30 feet long the size of a well a

2066

01:27:12,590 --> 01:27:09,840

monster great white let's say okay

2067

01:27:14,510 --> 01:27:12,600

so that one was one of that that's

2068

01:27:17,510 --> 01:27:14,520

considered to be an early ancestor of

2069

01:27:20,030 --> 01:27:17,520

Megalodon and I can go through all the

2070

01:27:22,970 --> 01:27:20,040

different species and stuff but you had

2071

01:27:26,990 --> 01:27:22,980

um so you had a totus obliqueus you had

2072

01:27:28,430 --> 01:27:27,000

gosh let me see a totus angosteidens you

2073

01:27:30,229 --> 01:27:28,440

had I mean there's a whole bunch of them

2074

01:27:32,450 --> 01:27:30,239

there's the shark changed and evolved

2075

01:27:34,610 --> 01:27:32,460

and grew bit by bit by bit over millions

2076

01:27:37,910 --> 01:27:34,620

and millions of years

2077

01:27:45,610 --> 01:27:41,870

live from 23 to 3.6 million years ago

2078

01:27:48,470 --> 01:27:45,620

so it didn't evolve until

2079

01:27:52,330 --> 01:27:48,480

43 million years after the dinosaurs

2080

01:27:56,570 --> 01:27:55,669

what would take out the the Megalodon

2081

01:27:58,790 --> 01:27:56,580

though

2082

01:28:01,850 --> 01:27:58,800

and I mean why did Megalodon go extinct

2083

01:28:04,129 --> 01:28:01,860

yeah how I'm just trying to understand

2084

01:28:07,550 --> 01:28:04,139

here and I'm sure everybody's thinking

2085

01:28:09,410 --> 01:28:07,560

the same thing did did the Great Whites

2086

01:28:13,129 --> 01:28:09,420

win this battle

2087

01:28:16,070 --> 01:28:13,139

well so I mean you see a lot of theories

2088

01:28:17,590 --> 01:28:16,080

that get put out there about stuff and

2089

01:28:20,209 --> 01:28:17,600

some in my opinion are a little more

2090

01:28:22,250 --> 01:28:20,219

sensationalized than others and what you

2091

01:28:23,209 --> 01:28:22,260

know why Megalodon died off I did an

2092

01:28:26,450 --> 01:28:23,219

interview

2093

01:28:27,709 --> 01:28:26,460

about this I think it was last year or

2094

01:28:29,450 --> 01:28:27,719

something like that I'm not really sure

2095

01:28:31,189 --> 01:28:29,460

but uh

2096

01:28:34,610 --> 01:28:31,199

you know the Megalodon is big business

2097

01:28:35,870 --> 01:28:34,620

so its Extinction is a Hot Topic and

2098

01:28:38,390 --> 01:28:35,880

there's been a lot of theories put out

2099

01:28:40,970 --> 01:28:38,400

there about it there was one a few years

2100

01:28:44,570 --> 01:28:40,980

back I I would say a very enthusiastic

2101  
01:28:46,010 --> 01:28:44,580  
one that energy from a supernova wiped

2102  
01:28:47,750 --> 01:28:46,020  
out the shark

2103  
01:28:50,570 --> 01:28:47,760  
you know people were like oh yeah I took

2104  
01:28:53,030 --> 01:28:50,580  
this cosmic energy explosion to kill off

2105  
01:28:54,950 --> 01:28:53,040  
this indestructible monster I think a

2106  
01:28:56,510 --> 01:28:54,960  
lot of people like that idea the problem

2107  
01:28:59,090 --> 01:28:56,520  
was is that when this Theory came out

2108  
01:29:01,669 --> 01:28:59,100  
everybody thought that the shark died

2109  
01:29:03,649 --> 01:29:01,679  
off 2.6 million years ago which was when

2110  
01:29:05,149 --> 01:29:03,659  
this cosmic explosion took place then

2111  
01:29:08,330 --> 01:29:05,159  
evidence came out that it actually died

2112  
01:29:10,310 --> 01:29:08,340  
around off 3.6 million years ago so they

2113  
01:29:11,930 --> 01:29:10,320

were off by a million years so obviously

2114

01:29:16,490 --> 01:29:11,940

that theory was not going to hold water

2115

01:29:21,229 --> 01:29:18,350

right so

2116

01:29:24,290 --> 01:29:21,239

my theory and I I try to base these

2117

01:29:26,750 --> 01:29:24,300

things on on logic if you have a

2118

01:29:29,990 --> 01:29:26,760

Cosmopolitan species that means a

2119

01:29:33,709 --> 01:29:30,000

species that's all over the world okay

2120

01:29:35,990 --> 01:29:33,719

it takes a lot for that animal for that

2121

01:29:37,790 --> 01:29:36,000

species to go extinct because there

2122

01:29:40,070 --> 01:29:37,800

could be populations that survive here

2123

01:29:41,750 --> 01:29:40,080

or there you know if the planet shifts

2124

01:29:43,430 --> 01:29:41,760

and the temperatures change and some

2125

01:29:44,810 --> 01:29:43,440

areas become warmer or cooler and stuff

2126

01:29:47,390 --> 01:29:44,820

like that like we're experiencing now

2127

01:29:49,490 --> 01:29:47,400

okay it doesn't matter they can move to

2128

01:29:51,770 --> 01:29:49,500

different parts if there was a you know

2129

01:29:54,229 --> 01:29:51,780

a food shortage in one spot you know

2130

01:29:55,970 --> 01:29:54,239

there's others you know populations that

2131

01:29:57,890 --> 01:29:55,980

are going to pick up the slack and stuff

2132

01:29:59,570 --> 01:29:57,900

like that you know or if the Isthmus of

2133

01:30:01,669 --> 01:29:59,580

Panama have you know closed off certain

2134

01:30:04,490 --> 01:30:01,679

corridors or whatever it might be you

2135

01:30:06,169 --> 01:30:04,500

know so these animals went through

2136

01:30:07,790 --> 01:30:06,179

different ice ages and things like that

2137

01:30:09,830 --> 01:30:07,800

temperature rises and Falls that they

2138

01:30:13,250 --> 01:30:09,840

were still there and then 3.6 million

2139

01:30:17,350 --> 01:30:15,830

I equate this to the plesiosaurs that I

2140

01:30:20,090 --> 01:30:17,360

write about micronus Horizon series

2141

01:30:22,370 --> 01:30:20,100

these giant sperm whale size marine

2142

01:30:24,290 --> 01:30:22,380

reptiles that had Jaws that could crush

2143

01:30:26,450 --> 01:30:24,300

a car and then all of a sudden they died

2144

01:30:28,970 --> 01:30:26,460

off around 90 million years ago

2145

01:30:30,890 --> 01:30:28,980

well interestingly they died off right

2146

01:30:32,450 --> 01:30:30,900

after the ichthyosaurus which means fish

2147

01:30:36,169 --> 01:30:32,460

lizards I don't know if you know what

2148

01:30:38,090 --> 01:30:36,179

the theosaur is I've seen pictures it

2149

01:30:40,490 --> 01:30:38,100

looks like a dolphin with a long face

2150

01:30:41,510 --> 01:30:40,500

and a lot of sharp teeth okay yep so

2151

01:30:44,750 --> 01:30:41,520

they look like literally look like

2152

01:30:46,310 --> 01:30:44,760

dolphins okay and if these words range

2153

01:30:48,530 --> 01:30:46,320

in size from a couple feet to like 30

2154

01:30:50,209 --> 01:30:48,540

even 40 feet long all different kinds

2155

01:30:52,970 --> 01:30:50,219

all over the place and they eat eight

2156

01:30:54,890 --> 01:30:52,980

fish so you have these fish stocks

2157

01:30:56,629 --> 01:30:54,900

crashing all these ichthyosaurs all of a

2158

01:30:58,189 --> 01:30:56,639

sudden went extinct and then the pliers

2159

01:31:00,530 --> 01:30:58,199

died off and that's because the

2160

01:31:03,590 --> 01:31:00,540

plyosaurs their main bread and butter

2161

01:31:06,649 --> 01:31:03,600

was ichthyosaurus that's what they ate

2162

01:31:08,689 --> 01:31:06,659

most of the time okay once in a while

2163

01:31:10,850 --> 01:31:08,699

they need to please yes or or small

2164

01:31:14,209 --> 01:31:10,860

plious or something like that or shark

2165

01:31:16,610 --> 01:31:14,219

or whatever but their main food was like

2166

01:31:18,290 --> 01:31:16,620

just like if a shark was eating tuna and

2167

01:31:20,030 --> 01:31:18,300

all the tuna were gone it had nothing to

2168

01:31:22,610 --> 01:31:20,040

eat that type of stuff so no

2169

01:31:24,830 --> 01:31:22,620

ichthyosaurs pliers die right on the

2170

01:31:26,629 --> 01:31:24,840

heels of that and they're gone off the

2171

01:31:34,270 --> 01:31:26,639

fossil record other pleases were still

2172

01:31:34,280 --> 01:31:39,830

except for Loch Ness but we'll see

2173

01:31:43,430 --> 01:31:42,470

full circle so but back to the megalon

2174

01:31:45,290 --> 01:31:43,440

thing so

2175

01:31:47,930 --> 01:31:45,300

I believe that Megalodon died off

2176

01:31:50,990 --> 01:31:47,940

because of its diet but not in the

2177

01:31:52,669 --> 01:31:51,000

traditional sense to me it was when I I

2178

01:31:54,830 --> 01:31:52,679

and I did a lot of research on this okay

2179

01:31:56,870 --> 01:31:54,840

I don't just like make stuff or pull it

2180

01:31:59,390 --> 01:31:56,880

out of my butt as my daughter would say

2181

01:32:00,770 --> 01:31:59,400

but it was like a triple whammy and it

2182

01:32:03,790 --> 01:32:00,780

was a combination of the schwarz's

2183

01:32:06,830 --> 01:32:03,800

excessive size it's over specialization

2184

01:32:09,350 --> 01:32:06,840

and its Reliance on a food pyramid that

2185

01:32:11,750 --> 01:32:09,360

in the end Came Crashing Down

2186

01:32:13,430 --> 01:32:11,760

now this may wrinkle some people but

2187

01:32:16,430 --> 01:32:13,440

there's fossil evidence in fact I'm

2188

01:32:18,590 --> 01:32:16,440

holding a piece of one right here okay

2189

01:32:20,629 --> 01:32:18,600

but there's fossil evidence in the form

2190

01:32:22,430 --> 01:32:20,639

of the the Megalodon's tooth morphology

2191

01:32:24,290 --> 01:32:22,440

as well as fragments of fossilized whale

2192

01:32:26,450 --> 01:32:24,300

bone that support a theory I had put out

2193

01:32:28,129 --> 01:32:26,460

years back that the adult sharks got

2194

01:32:30,110 --> 01:32:28,139

most of their food from rotting whale

2195

01:32:32,990 --> 01:32:30,120

carcasses they were too slow to hunt

2196

01:32:35,629 --> 01:32:33,000

citations to swam three times as fast it

2197

01:32:38,149 --> 01:32:35,639

just you know so point is that that

2198

01:32:40,490 --> 01:32:38,159

being a primary scavenger for the adults

2199

01:32:43,370 --> 01:32:40,500

wasn't a bad thing because the mega lens

2200

01:32:45,830 --> 01:32:43,380

hunting strategies were advantageous for

2201  
01:32:47,270 --> 01:32:45,840  
tens of millions of years as we now know

2202  
01:32:49,310 --> 01:32:47,280  
just like we just looked at the dates

2203  
01:32:52,430 --> 01:32:49,320  
okay so you want to think of this as an

2204  
01:32:54,350 --> 01:32:52,440  
inverted triangle okay like this and at

2205  
01:32:56,930 --> 01:32:54,360  
the top of that triangle you got the

2206  
01:32:59,390 --> 01:32:56,940  
younger megalon sharks they're maybe 15

2207  
01:33:01,790 --> 01:32:59,400  
or 25 feet long and these fish are

2208  
01:33:03,530 --> 01:33:01,800  
active Hunters they are quick quick

2209  
01:33:06,530 --> 01:33:03,540  
enough to catch and kill the bolina

2210  
01:33:08,870 --> 01:33:06,540  
tooth whales other day which were around

2211  
01:33:09,950 --> 01:33:08,880  
their size you didn't have any giant

2212  
01:33:12,110 --> 01:33:09,960  
whales

2213  
01:33:13,910 --> 01:33:12,120

Beyond 4.6 million years ago or

2214

01:33:15,770 --> 01:33:13,920

something like that okay there were

2215

01:33:18,350 --> 01:33:15,780

obviously a lot more of the smaller

2216

01:33:19,550 --> 01:33:18,360

sharks than there were the giant adults

2217

01:33:21,169 --> 01:33:19,560

which would have been at the bottom of

2218

01:33:22,970 --> 01:33:21,179

that food pyramid so you want to think

2219

01:33:25,370 --> 01:33:22,980

of it like great whites

2220

01:33:26,990 --> 01:33:25,380

there are thousands of fish I'm sure

2221

01:33:29,209 --> 01:33:27,000

you'll agree white sharks out that are

2222

01:33:32,030 --> 01:33:29,219

10 or 12 feet long right

2223

01:33:34,310 --> 01:33:32,040

and hundreds that are 16 feet or 14 or

2224

01:33:35,930 --> 01:33:34,320

50 or 16 right I mean you see them you

2225

01:33:37,910 --> 01:33:35,940

know shark cage videos and stuff like

2226

01:33:39,169 --> 01:33:37,920

that but how many of them that are 20

2227

01:33:41,330 --> 01:33:39,179

feet or more

2228

01:33:42,830 --> 01:33:41,340

I mean we see deep blue and we see the

2229

01:33:45,770 --> 01:33:42,840

evidence I've collected of sharks that

2230

01:33:47,510 --> 01:33:45,780

are bigger but how many do we see

2231

01:33:49,370 --> 01:33:47,520

you know what I mean so the same thing

2232

01:33:51,470 --> 01:33:49,380

would have applied to the Megalodon you

2233

01:33:54,410 --> 01:33:51,480

have these younger sharks making kills

2234

01:33:55,729 --> 01:33:54,420

and what's left after they eat their

2235

01:33:58,430 --> 01:33:55,739

kill which they're not going to eat all

2236

01:33:59,930 --> 01:33:58,440

of it's as big as them carcasses so the

2237

01:34:02,870 --> 01:33:59,940

younger fish were basically providing

2238

01:34:04,669 --> 01:34:02,880

food for the older sharks lots of food

2239

01:34:07,970 --> 01:34:04,679

because they outnumber the older sharks

2240

01:34:09,530 --> 01:34:07,980

50 100 to one maybe more you see and

2241

01:34:12,410 --> 01:34:09,540

that's why the Sharks develop these

2242

01:34:14,750 --> 01:34:12,420

upper maxillary teeth that are designed

2243

01:34:16,370 --> 01:34:14,760

to Crunch through rib cages on carcasses

2244

01:34:18,229 --> 01:34:16,380

which will often strip when they got

2245

01:34:21,530 --> 01:34:18,239

there so they could get access to the

2246

01:34:22,970 --> 01:34:21,540

heart and lungs of the dead whale which

2247

01:34:24,290 --> 01:34:22,980

the smaller sharks even the smaller

2248

01:34:26,570 --> 01:34:24,300

megalodons couldn't bite through those

2249

01:34:27,649 --> 01:34:26,580

giant ribs and I got ribs in there I

2250

01:34:30,770 --> 01:34:27,659

could show you with the bite march to

2251

01:34:33,950 --> 01:34:30,780

prove it okay so that's that's what what

2252

01:34:36,550 --> 01:34:33,960

the big sharks did okay so about a

2253

01:34:39,350 --> 01:34:36,560

million years before the Meg died off

2254

01:34:41,390 --> 01:34:39,360

whales started getting bigger

2255

01:34:43,430 --> 01:34:41,400

I believe that this was a result of

2256

01:34:45,470 --> 01:34:43,440

evolutionary pressure meaning the

2257

01:34:49,070 --> 01:34:45,480

biggest whales were less likely to be

2258

01:34:51,169 --> 01:34:49,080

attacked you know by a 20 25 foot Mega

2259

01:34:53,030 --> 01:34:51,179

knowledge say so these bigger whales

2260

01:34:55,129 --> 01:34:53,040

pass on their genes and future

2261

01:34:57,470 --> 01:34:55,139

Generations through larger and larger

2262

01:35:00,050 --> 01:34:57,480

and this is supported by a paper by I

2263

01:35:03,169 --> 01:35:00,060

think it's lamborgh people can look it

2264

01:35:05,810 --> 01:35:03,179

up so the shark actually caused whales

2265

01:35:07,850 --> 01:35:05,820

to grow by feeding on them

2266

01:35:09,830 --> 01:35:07,860

and this gradual increase in whale size

2267

01:35:12,470 --> 01:35:09,840

became problematic for the younger

2268

01:35:14,629 --> 01:35:12,480

megalodons as a 20-foot Predator cannot

2269

01:35:17,090 --> 01:35:14,639

exactly attack a 40-foot Leviathan

2270

01:35:19,550 --> 01:35:17,100

without getting hurt or killed you see

2271

01:35:21,890 --> 01:35:19,560

so this also became a problem for the

2272

01:35:24,290 --> 01:35:21,900

adult Megalodons which were physically

2273

01:35:26,030 --> 01:35:24,300

capable of killing whales that size 40

2274

01:35:27,530 --> 01:35:26,040

feet let's say but they weren't fast

2275

01:35:29,330 --> 01:35:27,540

enough to catch them

2276

01:35:31,490 --> 01:35:29,340

so the shark is faced with larger and

2277

01:35:33,470 --> 01:35:31,500

larger whales traveling in pods that are

2278

01:35:35,510 --> 01:35:33,480

no longer on the menu so this is the

2279

01:35:37,550 --> 01:35:35,520

first whammy or strike one if you want

2280

01:35:38,810 --> 01:35:37,560

to call it that towards megalon going

2281

01:35:42,050 --> 01:35:38,820

extinct

2282

01:35:43,970 --> 01:35:42,060

second whammy is also whale related and

2283

01:35:46,430 --> 01:35:43,980

that's at the end of the myocene and Roy

2284

01:35:48,050 --> 01:35:46,440

pliocene many of the smaller species of

2285

01:35:49,970 --> 01:35:48,060

whales that were megalons bread and

2286

01:35:52,370 --> 01:35:49,980

butter like the ichthyosaurus the

2287

01:35:55,010 --> 01:35:52,380

plyosaurs I mentioned okay these whales

2288

01:35:56,410 --> 01:35:55,020

began to die off there was one called

2289

01:36:00,830 --> 01:35:56,420

um

2290

01:36:02,229 --> 01:36:00,840

it was a 25 foot baleen whale and there

2291

01:36:04,550 --> 01:36:02,239

was another called

2292

01:36:06,890 --> 01:36:04,560

bohascaya which was a 20-foot Beluga

2293

01:36:09,890 --> 01:36:06,900

type whale tooth whale both of these

2294

01:36:12,530 --> 01:36:09,900

whales went extinct at the close of the

2295

01:36:14,930 --> 01:36:12,540

zancy in the early pliocene which is 3.6

2296

01:36:17,390 --> 01:36:14,940

million years ago and exactly the same

2297

01:36:19,689 --> 01:36:17,400

time megadon vanishes

2298

01:36:22,250 --> 01:36:19,699

so if there's no small whales around

2299

01:36:24,050 --> 01:36:22,260

okay there's no prey for the sub-adult

2300

01:36:26,390 --> 01:36:24,060

Sharks it means there's no carcasses

2301  
01:36:29,270 --> 01:36:26,400  
with a huge adult sharks which are the

2302  
01:36:30,350 --> 01:36:29,280  
species brood stock the Breeders you

2303  
01:36:32,209 --> 01:36:30,360  
know you don't have those you die

2304  
01:36:34,669 --> 01:36:32,219  
obviously okay so I mean think about

2305  
01:36:36,649 --> 01:36:34,679  
that 3.6 million years ago many of the

2306  
01:36:39,110 --> 01:36:36,659  
small whales are gone the giant Baleen

2307  
01:36:40,370 --> 01:36:39,120  
whales remain to this day but the mega

2308  
01:36:42,709 --> 01:36:40,380  
shark is gone

2309  
01:36:45,110 --> 01:36:42,719  
don't you find that interesting well it

2310  
01:36:47,050 --> 01:36:45,120  
it it it it's almost like catastrophic

2311  
01:36:50,090 --> 01:36:47,060  
right it was just like the perfect

2312  
01:36:53,390 --> 01:36:50,100  
situation at the no wait wait but wait

2313  
01:36:55,490 --> 01:36:53,400

there's more okay okay so the third and

2314

01:36:57,649 --> 01:36:55,500

final nail in Megalodon's enormous

2315

01:37:00,290 --> 01:36:57,659

coffin is something that could have

2316

01:37:03,950 --> 01:37:00,300

affects the most vulnerable of their

2317

01:37:05,629 --> 01:37:03,960

species their babies see and nobody

2318

01:37:07,010 --> 01:37:05,639

before me that I'm aware I've ever

2319

01:37:09,110 --> 01:37:07,020

focused on the fact that there was an

2320

01:37:11,330 --> 01:37:09,120

extinct species like serenian it's like

2321

01:37:15,110 --> 01:37:11,340

a dugong okay like it's really a manatee

2322

01:37:18,410 --> 01:37:15,120

called Nano siren Garcia I think it is

2323

01:37:21,530 --> 01:37:18,420

okay and Nano siren was a dwarf dugong

2324

01:37:23,209 --> 01:37:21,540

that inhabited this warm shallow Waters

2325

01:37:25,010 --> 01:37:23,219

of South America and the United States

2326

01:37:27,530 --> 01:37:25,020

it was small

2327

01:37:29,629 --> 01:37:27,540

like six or seven feet long maybe 300

2328

01:37:33,110 --> 01:37:29,639

something pounds and it was the perfect

2329

01:37:35,209 --> 01:37:33,120

yeah perfect prey item for neonate

2330

01:37:37,910 --> 01:37:35,219

megalodons and a neonate means a baby

2331

01:37:39,590 --> 01:37:37,920

okay which is that size so the baby

2332

01:37:42,050 --> 01:37:39,600

sharks would have feasted on these

2333

01:37:43,970 --> 01:37:42,060

blubber Rich High caloric meals which

2334

01:37:45,950 --> 01:37:43,980

would help them grow and they're also

2335

01:37:47,330 --> 01:37:45,960

hiding in the mangroves and the shallows

2336

01:37:49,070 --> 01:37:47,340

it's not going out to sea where they're

2337

01:37:51,229 --> 01:37:49,080

at risk from the adults and other and

2338

01:37:52,610 --> 01:37:51,239

great whites like you mentioned and and

2339

01:37:53,990 --> 01:37:52,620

chubby tenses and all these other

2340

01:37:55,129 --> 01:37:54,000

monsters are out there so they're

2341

01:37:58,490 --> 01:37:55,139

staying in the shallows and they're

2342

01:38:01,850 --> 01:37:58,500

eating these dwarf dugongs Nano siren

2343

01:38:04,129 --> 01:38:01,860

also died off around 3.6 million years

2344

01:38:06,470 --> 01:38:04,139

ago I find it hard to believe that's a

2345

01:38:08,689 --> 01:38:06,480

coincidence so Reliance on it for food

2346

01:38:10,970 --> 01:38:08,699

was in my opinion strike three for the

2347

01:38:12,550 --> 01:38:10,980

megalon no food for the babies means no

2348

01:38:15,229 --> 01:38:12,560

adults and the species could not

2349

01:38:17,570 --> 01:38:15,239

withstand this triple whammy hitting

2350

01:38:18,770 --> 01:38:17,580

them all at the same time food pyramid

2351

01:38:20,990 --> 01:38:18,780

collapses under its own weight

2352

01:38:23,270 --> 01:38:21,000

population goes with it and just like

2353

01:38:27,709 --> 01:38:23,280

that the world's largest carnivorous

2354

01:38:29,570 --> 01:38:27,719

fish was gone just like that I it it you

2355

01:38:32,689 --> 01:38:29,580

make it sound so simple but if there's

2356

01:38:34,189 --> 01:38:32,699

no food there's no food exactly I mean

2357

01:38:37,490 --> 01:38:34,199

what happens to people if there's no

2358

01:38:39,290 --> 01:38:37,500

food we don't happen exactly so and this

2359

01:38:41,270 --> 01:38:39,300

was but this was hitting them from every

2360

01:38:43,010 --> 01:38:41,280

angle I mean if you think about it it

2361

01:38:44,810 --> 01:38:43,020

was like coming at them from multiple it

2362

01:38:47,450 --> 01:38:44,820

was hurting a baby starving the babies

2363

01:38:49,430 --> 01:38:47,460

out okay some adults didn't have food

2364

01:38:51,050 --> 01:38:49,440

then the big adults didn't have food you

2365

01:38:53,629 --> 01:38:51,060

know I mean it was like like nobody had

2366

01:38:55,490 --> 01:38:53,639

anything to eat and I'm sure they tried

2367

01:38:57,290 --> 01:38:55,500

and tried and ate sea turtles and

2368

01:38:59,030 --> 01:38:57,300

everything else that they could you know

2369

01:39:01,370 --> 01:38:59,040

like workers do that sometimes they eat

2370

01:39:02,629 --> 01:39:01,380

sea otters when we've taken all their

2371

01:39:04,550 --> 01:39:02,639

salmon

2372

01:39:06,950 --> 01:39:04,560

and stuff like that you know but at the

2373

01:39:08,390 --> 01:39:06,960

end of the day you know they a lot of

2374

01:39:13,430 --> 01:39:08,400

them are starving well British Columbia

2375

01:39:16,129 --> 01:39:13,440

and stuff killer whales what uh I just

2376

01:39:18,950 --> 01:39:16,139

want to ask just a a a stupid question

2377

01:39:22,250 --> 01:39:18,960

for me I've we've all seen those videos

2378

01:39:24,229 --> 01:39:22,260

of the great whites eating the seals and

2379

01:39:26,030 --> 01:39:24,239

they you know fly out of the water where

2380

01:39:27,410 --> 01:39:26,040

is that at

2381

01:39:30,110 --> 01:39:27,420

I think that happens in a lot of places

2382

01:39:33,010 --> 01:39:30,120

to be honest I mean I've seen makos do

2383

01:39:38,450 --> 01:39:35,930

where the seals are trying to go from

2384

01:39:39,550 --> 01:39:38,460

Island to Island and and thinking of the

2385

01:39:42,850 --> 01:39:39,560

farallones

2386

01:39:45,770 --> 01:39:42,860

in California yeah okay

2387

01:39:48,950 --> 01:39:45,780

is that what it is and you would think

2388

01:39:51,410 --> 01:39:48,960

that the seals would just learn from

2389

01:39:54,830 --> 01:39:51,420

that like not go

2390

01:39:57,110 --> 01:39:54,840

well they know but unfortunately

2391

01:39:58,850 --> 01:39:57,120

you get careless and remember what I

2392

01:40:00,290 --> 01:39:58,860

told you you know the white shark they

2393

01:40:02,090 --> 01:40:00,300

don't just come charging at them like

2394

01:40:04,370 --> 01:40:02,100

here I am I'm gonna get you you know

2395

01:40:07,250 --> 01:40:04,380

they're on the bottom blending in

2396

01:40:08,990 --> 01:40:07,260

looking looking a young CEO who's not as

2397

01:40:10,970 --> 01:40:09,000

experienced somebody who's not paying

2398

01:40:13,550 --> 01:40:10,980

attention you know something like that

2399

01:40:16,990 --> 01:40:13,560

maybe he's checking his 401k on his cell

2400

01:40:21,530 --> 01:40:17,000

phone and then boom

2401  
01:40:25,669 --> 01:40:21,540  
somebody just said it's in South Africa

2402  
01:40:27,709 --> 01:40:25,679  
the Caroline Islands uh well what I'm

2403  
01:40:30,169 --> 01:40:27,719  
talking about with the

2404  
01:40:31,189 --> 01:40:30,179  
with the seals I think it's seals oh

2405  
01:40:32,810 --> 01:40:31,199  
it's probably where the guys are

2406  
01:40:34,250 --> 01:40:32,820  
actually doing that dragging the thing

2407  
01:40:35,870 --> 01:40:34,260  
behind the boat and getting on the

2408  
01:40:39,169 --> 01:40:35,880  
breach like air draws that type of thing

2409  
01:40:40,910 --> 01:40:39,179  
yeah but yeah what a white shark when

2410  
01:40:42,890 --> 01:40:40,920  
they breach it's usually when they come

2411  
01:40:44,930 --> 01:40:42,900  
up and they Rush at something and either

2412  
01:40:46,310 --> 01:40:44,940  
they miss or they hit it and they rubbed

2413  
01:40:48,050 --> 01:40:46,320

out of the water

2414

01:40:49,790 --> 01:40:48,060

there was actually a study that was very

2415

01:40:51,590 --> 01:40:49,800

useful for that documentary

2416

01:40:54,169 --> 01:40:51,600

um that I got to reference where they

2417

01:40:56,330 --> 01:40:54,179

put tags on basking sharks that were

2418

01:40:57,890 --> 01:40:56,340

breaching also and maybe the crunch

2419

01:40:59,930 --> 01:40:57,900

numbers and get their speeds and figure

2420

01:41:01,490 --> 01:40:59,940

out how fast like a white shark would be

2421

01:41:03,830 --> 01:41:01,500

the same size and stuff like that it was

2422

01:41:05,930 --> 01:41:03,840

fascinating stuff where did you see

2423

01:41:07,729 --> 01:41:05,940

Bigfoot

2424

01:41:09,290 --> 01:41:07,739

Danbury Connecticut

2425

01:41:13,129 --> 01:41:09,300

what happened

2426

01:41:16,629 --> 01:41:13,139

oh Danbury Connecticut yep where the

2427

01:41:19,189 --> 01:41:16,639

mint is the Danbury Mint

2428

01:41:21,649 --> 01:41:19,199

but my grandparents have built a house

2429

01:41:24,290 --> 01:41:21,659

on the lake Candlewood Lake there many

2430

01:41:25,970 --> 01:41:24,300

many and we're talking back in the 40s

2431

01:41:27,950 --> 01:41:25,980

or something like that it was in the

2432

01:41:29,570 --> 01:41:27,960

family for a long time I used to love

2433

01:41:31,970 --> 01:41:29,580

going up there in the summer fishing the

2434

01:41:33,950 --> 01:41:31,980

lake and stuff like that and uh

2435

01:41:36,290 --> 01:41:33,960

I mean the whole story is in the book

2436

01:41:38,330 --> 01:41:36,300

but what happened was um

2437

01:41:40,850 --> 01:41:38,340

gosh it was me and two of my brothers

2438

01:41:44,990 --> 01:41:40,860

we'll call them Cisco and Ebert

2439

01:41:46,850 --> 01:41:45,000

for privacy sake okay all right uh you

2440

01:41:48,530 --> 01:41:46,860

you know who you ever you know who you

2441

01:41:50,570 --> 01:41:48,540

are but anyway

2442

01:41:54,410 --> 01:41:50,580

um so I was around it was like like 30

2443

01:41:58,430 --> 01:41:54,420

years ago I was you know 28. yeah I'm an

2444

01:42:02,209 --> 01:41:58,440

old man the house you know I'm older

2445

01:42:04,070 --> 01:42:02,219

than you so we gonna go out and cash our

2446

01:42:07,310 --> 01:42:04,080

Social Security checks and try to pick

2447

01:42:08,570 --> 01:42:07,320

up some hot chicks home but anyway so

2448

01:42:10,129 --> 01:42:08,580

moving right along

2449

01:42:12,410 --> 01:42:10,139

um I didn't take my meds today so I'm

2450

01:42:15,109 --> 01:42:12,420

gonna apologize you know if I'm a little

2451  
01:42:17,510 --> 01:42:15,119  
out there you know you're not catching

2452  
01:42:19,390 --> 01:42:17,520  
me at my best so anyway it's Thursday

2453  
01:42:24,290 --> 01:42:19,400  
night man

2454  
01:42:26,750 --> 01:42:24,300  
yeah get crazy get get wild okay so

2455  
01:42:29,149 --> 01:42:26,760  
you're out with uh Siskel and Ebert okay

2456  
01:42:30,169 --> 01:42:29,159  
so so we uh at the time we didn't have a

2457  
01:42:31,609 --> 01:42:30,179  
boat

2458  
01:42:33,709 --> 01:42:31,619  
um and we were gonna do shore fishing

2459  
01:42:37,010 --> 01:42:33,719  
okay and

2460  
01:42:39,109 --> 01:42:37,020  
um there is this lake called squons Pond

2461  
01:42:40,669 --> 01:42:39,119  
which is part of like a state park which

2462  
01:42:42,950 --> 01:42:40,679  
of course I'm sure you know Bigfoot are

2463  
01:42:46,129 --> 01:42:42,960

often seen in state parks

2464

01:42:47,689 --> 01:42:46,139

you know seems to be a habit yeah

2465

01:42:50,050 --> 01:42:47,699

habitat

2466

01:42:52,609 --> 01:42:50,060

so what happened is um

2467

01:42:53,750 --> 01:42:52,619

swans Pond is not a small Lake it's like

2468

01:42:54,590 --> 01:42:53,760

a couple two miles long or something

2469

01:42:56,390 --> 01:42:54,600

like that

2470

01:42:58,729 --> 01:42:56,400

it was originally part of Candlewood

2471

01:43:00,649 --> 01:42:58,739

Lake and it was all one thing but it was

2472

01:43:02,570 --> 01:43:00,659

a narrow space between these two

2473

01:43:04,010 --> 01:43:02,580

sections and they built a Causeway there

2474

01:43:07,010 --> 01:43:04,020

you know the causeway is like an

2475

01:43:08,930 --> 01:43:07,020

artificial Road okay and they piled up

2476

01:43:10,850 --> 01:43:08,940

all this rock you know these small rocks

2477

01:43:12,410 --> 01:43:10,860

whatever and stuff like that and they

2478

01:43:14,330 --> 01:43:12,420

built the road on top of it it's a small

2479

01:43:16,010 --> 01:43:14,340

road I don't know if one or two cars can

2480

01:43:19,129 --> 01:43:16,020

go across this thing or whatever it is

2481

01:43:21,890 --> 01:43:19,139

so this Causeway if you look at it from

2482

01:43:23,870 --> 01:43:21,900

a side angle like a a cut out it's kind

2483

01:43:26,149 --> 01:43:23,880

of like slope like this with the rocks

2484

01:43:28,129 --> 01:43:26,159

on both sides so this side would be like

2485

01:43:29,810 --> 01:43:28,139

swans and this side would be Candlewood

2486

01:43:31,850 --> 01:43:29,820

let's say and then the roads on top of

2487

01:43:33,470 --> 01:43:31,860

that if you're going back and forth and

2488

01:43:34,970 --> 01:43:33,480

so that the water could flow back and

2489

01:43:36,649 --> 01:43:34,980

forth and the animals could travel back

2490

01:43:39,229 --> 01:43:36,659

and forth they built like I don't know

2491

01:43:41,629 --> 01:43:39,239

what you call it like a a dock that big

2492

01:43:43,490 --> 01:43:41,639

giant like concrete steel sewer pipe

2493

01:43:46,010 --> 01:43:43,500

whatever that connects them you know

2494

01:43:49,250 --> 01:43:46,020

underwater so that that can happen it

2495

01:43:52,370 --> 01:43:49,260

with me so far I'm looking at it okay

2496

01:43:53,990 --> 01:43:52,380

cool I'm literally looking at it that's

2497

01:43:56,149 --> 01:43:54,000

what I'm doing I'm right here I'm at

2498

01:43:58,790 --> 01:43:56,159

squats I thought I was getting boring

2499

01:44:01,550 --> 01:43:58,800

you know because you know I'm looking at

2500

01:44:03,350 --> 01:44:01,560

Candlewood Lake right here yeah so if

2501

01:44:05,810 --> 01:44:03,360

you see the causeway okay you'll see

2502

01:44:07,910 --> 01:44:05,820

exactly where where this happened so we

2503

01:44:09,830 --> 01:44:07,920

decided you know that we figured okay

2504

01:44:11,450 --> 01:44:09,840

there's got to be all sorts of bait like

2505

01:44:13,370 --> 01:44:11,460

crayfish and stuff in these rocks

2506

01:44:16,370 --> 01:44:13,380

because the Rocks go out for hundreds of

2507

01:44:19,490 --> 01:44:16,380

feet okay and we were going to get there

2508

01:44:21,649 --> 01:44:19,500

right before Dawn and we were gonna have

2509

01:44:23,629 --> 01:44:21,659

our Bobbers out our baits and these fish

2510

01:44:25,310 --> 01:44:23,639

in a bass small amount large one we're

2511

01:44:26,629 --> 01:44:25,320

gonna be coming in and we're gonna have

2512

01:44:27,970 --> 01:44:26,639

a field day we were going to slaughter

2513

01:44:30,649 --> 01:44:27,980

them okay that was our plan

2514

01:44:32,870 --> 01:44:30,659

unfortunately we didn't count on this

2515

01:44:34,550 --> 01:44:32,880

thing called weather okay and we didn't

2516

01:44:37,669 --> 01:44:34,560

pay attention to the fact that it rained

2517

01:44:40,729 --> 01:44:37,679

its buns off the entire night so when we

2518

01:44:44,090 --> 01:44:40,739

got there the water was the color of tea

2519

01:44:46,790 --> 01:44:44,100

and not tea with milk in it dark tea

2520

01:44:49,189 --> 01:44:46,800

okay it was horrible so we're sitting

2521

01:44:50,510 --> 01:44:49,199

there the dark or just the little Sun's

2522

01:44:54,109 --> 01:44:50,520

just starting to creep up a little bit

2523

01:44:57,950 --> 01:44:54,119

and stuff and on our buckets fishing the

2524

01:45:00,229 --> 01:44:57,960

Squan side nothing's happening flat calm

2525

01:45:03,229 --> 01:45:00,239

literally like the water was like glass

2526

01:45:04,370 --> 01:45:03,239

a little bit of mist and that was it so

2527

01:45:06,530 --> 01:45:04,380

we're sitting there we're sitting there

2528

01:45:07,790 --> 01:45:06,540

nothing nothing so then Cisco and Eber

2529

01:45:10,189 --> 01:45:07,800

decide you know what we're gonna go try

2530

01:45:12,229 --> 01:45:10,199

the The Candlewood side you coming I'm

2531

01:45:13,669 --> 01:45:12,239

like no no I'll stay here you know I

2532

01:45:14,930 --> 01:45:13,679

figured haha you guys are going to leave

2533

01:45:16,310 --> 01:45:14,940

the fish are going to turn on and I'm

2534

01:45:17,689 --> 01:45:16,320

gonna you know catch them and you're

2535

01:45:19,070 --> 01:45:17,699

whatever you know competition that's

2536

01:45:20,990 --> 01:45:19,080

correct that's right that's right that's

2537

01:45:22,850 --> 01:45:21,000

right so they go up the slope they cross

2538

01:45:24,229 --> 01:45:22,860

the the road and they go down the other

2539

01:45:25,669 --> 01:45:24,239

side of the slope so now they're setting

2540

01:45:27,050 --> 01:45:25,679

up shop on the other thing if I had

2541

01:45:29,030 --> 01:45:27,060

shouted real loud they could have heard

2542

01:45:30,890 --> 01:45:29,040

me there was no cell phones back then

2543

01:45:33,590 --> 01:45:30,900

obviously or anything like that if they

2544

01:45:36,530 --> 01:45:33,600

were they were it's only a thousand feet

2545

01:45:38,750 --> 01:45:36,540

uh at its widest right there between

2546

01:45:41,270 --> 01:45:38,760

squats and Candlewood

2547

01:45:43,129 --> 01:45:41,280

I'm looking at it on the map so yeah you

2548

01:45:44,090 --> 01:45:43,139

could you could have a conversation for

2549

01:45:46,430 --> 01:45:44,100

sure

2550

01:45:47,750 --> 01:45:46,440

so so I'm sitting there on my bucket you

2551  
01:45:50,149 --> 01:45:47,760  
know I got a bucket turn upside down or

2552  
01:45:51,530 --> 01:45:50,159  
whatever and stuff and watching I have

2553  
01:45:53,510 --> 01:45:51,540  
like one or two rods out there and

2554  
01:45:55,430 --> 01:45:53,520  
nothing's happening I'm miserable and

2555  
01:45:57,470 --> 01:45:55,440  
then I see this thing on the surface of

2556  
01:45:59,030 --> 01:45:57,480  
the water it breaks the surface it was I

2557  
01:46:01,129 --> 01:45:59,040  
don't know how far out I'd really have

2558  
01:46:02,990 --> 01:46:01,139  
to go back there and Eyeball it to get

2559  
01:46:04,970 --> 01:46:03,000  
exact numbers or stuff it might have

2560  
01:46:06,950 --> 01:46:04,980  
been 150 feet away or something like

2561  
01:46:08,750 --> 01:46:06,960  
that but I see this dark thing come to

2562  
01:46:10,250 --> 01:46:08,760  
the surface you know and then I went on

2563  
01:46:11,570 --> 01:46:10,260

there and I thought it was a fish at

2564

01:46:13,430 --> 01:46:11,580

first I was like oh there's a big one

2565

01:46:14,930 --> 01:46:13,440

you know and then it was gone and then

2566

01:46:17,390 --> 01:46:14,940

like a minute or two later it popped up

2567

01:46:18,950 --> 01:46:17,400

again it's only a bit closer you know

2568

01:46:21,350 --> 01:46:18,960

and then I started looking at them like

2569

01:46:24,169 --> 01:46:21,360

and I saw that it was like roundish and

2570

01:46:26,570 --> 01:46:24,179

it was furry had like this reddish brown

2571

01:46:29,270 --> 01:46:26,580

hair kind of like a uh like an Irish

2572

01:46:31,250 --> 01:46:29,280

Setter okay and I thought oh it's a

2573

01:46:32,750 --> 01:46:31,260

muskrat and then I got a tiny bit closer

2574

01:46:34,669 --> 01:46:32,760

I'm like nah that's too big to be a

2575

01:46:35,990 --> 01:46:34,679

muskrat I'm like that's a beaver yeah

2576

01:46:37,970 --> 01:46:36,000

that's a b Riverside shape like a

2577

01:46:40,070 --> 01:46:37,980

beaver's butt kind of maybe that kind of

2578

01:46:42,109 --> 01:46:40,080

stuff and I'm like no that's not a

2579

01:46:44,149 --> 01:46:42,119

beaver I'm like what the hell am I

2580

01:46:46,790 --> 01:46:44,159

looking at here you know and I couldn't

2581

01:46:48,950 --> 01:46:46,800

figure it out and it would go underwater

2582

01:46:50,870 --> 01:46:48,960

for maybe a minute two minutes or more

2583

01:46:53,270 --> 01:46:50,880

you know and then it would come back up

2584

01:46:55,430 --> 01:46:53,280

and in retrospect I know that it was

2585

01:46:56,990 --> 01:46:55,440

going down and Diving for crayfish and

2586

01:46:58,850 --> 01:46:57,000

coming up and eating them taking a

2587

01:47:01,129 --> 01:46:58,860

breath and going back down again okay

2588

01:47:03,350 --> 01:47:01,139

that's what was apparently happening in

2589

01:47:04,550 --> 01:47:03,360

retrospect but at the time I had no idea

2590

01:47:07,310 --> 01:47:04,560

about that I just thought it was some

2591

01:47:09,350 --> 01:47:07,320

weird animal so I'm like is that a deer

2592

01:47:11,689 --> 01:47:09,360

because I realized it was big you know

2593

01:47:13,430 --> 01:47:11,699

and I'm like no because deer they do the

2594

01:47:15,290 --> 01:47:13,440

Loch Ness thing with the you know swim

2595

01:47:17,209 --> 01:47:15,300

like that and you see them you know what

2596

01:47:20,090 --> 01:47:17,219

I mean you see them like in champ videos

2597

01:47:21,229 --> 01:47:20,100

oh that's champ no it's a deer okay but

2598

01:47:23,390 --> 01:47:21,239

anyway

2599

01:47:24,830 --> 01:47:23,400

um so you know it wasn't a deer and then

2600

01:47:26,450 --> 01:47:24,840

I literally thought it was an Irish

2601

01:47:27,830 --> 01:47:26,460

Setter like I said the color and

2602

01:47:29,330 --> 01:47:27,840

everything like that it must be an Irish

2603

01:47:31,910 --> 01:47:29,340

Setter you know because I started seeing

2604

01:47:33,290 --> 01:47:31,920

parts of it like behind it not just what

2605

01:47:35,689 --> 01:47:33,300

was the head coming up part of the head

2606

01:47:37,370 --> 01:47:35,699

but there was stuff behind that you know

2607

01:47:39,470 --> 01:47:37,380

and I'm like it's an Irish Setter you

2608

01:47:41,990 --> 01:47:39,480

know it's about that size maybe you know

2609

01:47:43,790 --> 01:47:42,000

it's still pretty far out I'm like nah

2610

01:47:45,890 --> 01:47:43,800

that head's not shaped like an Irish

2611

01:47:49,850 --> 01:47:45,900

Setter and why is it diving under water

2612

01:47:51,890 --> 01:47:49,860

it was it was quite the mystery okay and

2613

01:47:53,330 --> 01:47:51,900

at one point like I said like you were

2614

01:47:54,890 --> 01:47:53,340

seeing like this head come up and by the

2615

01:47:58,970 --> 01:47:54,900

way the head was not conical it was

2616

01:48:00,970 --> 01:47:58,980

rounded how old were you how old how old

2617

01:48:03,770 --> 01:48:00,980

28.

2618

01:48:06,050 --> 01:48:03,780

you're twenty yeah 28 or 29 yeah so

2619

01:48:08,629 --> 01:48:06,060

you're old enough to know better is is

2620

01:48:11,510 --> 01:48:08,639

where I'm going with this uh allegedly

2621

01:48:13,310 --> 01:48:11,520

okay continue so I hadn't now I had knew

2622

01:48:15,709 --> 01:48:13,320

nothing about Sasquatch back then just

2623

01:48:19,250 --> 01:48:15,719

as we're clear on that okay right and

2624

01:48:21,830 --> 01:48:19,260

then I I kind of I stood up you know and

2625

01:48:24,109 --> 01:48:21,840

I looked and I could see when it came up

2626

01:48:25,850 --> 01:48:24,119

that there was like a body right behind

2627

01:48:28,370 --> 01:48:25,860

the head but it was going away from me

2628

01:48:29,810 --> 01:48:28,380

so it was like you know tapered

2629

01:48:31,430 --> 01:48:29,820

and I mean like the head was closer so

2630

01:48:32,930 --> 01:48:31,440

it looks bigger you know like if I put

2631

01:48:34,729 --> 01:48:32,940

my hand out like this towards the camera

2632

01:48:35,810 --> 01:48:34,739

you see my my hand looks a lot bigger

2633

01:48:37,490 --> 01:48:35,820

than the rest of me that type of thing

2634

01:48:40,910 --> 01:48:37,500

Force perspective

2635

01:48:42,470 --> 01:48:40,920

um so but I could see its legs right

2636

01:48:45,169 --> 01:48:42,480

under the surface of the water

2637

01:48:48,229 --> 01:48:45,179

it had lakes in the back and the legs

2638

01:48:49,729 --> 01:48:48,239

they moved together when they swim

2639

01:48:52,490 --> 01:48:49,739

like a mermaid

2640

01:48:54,109 --> 01:48:52,500

like that so you mark my words when

2641

01:48:56,390 --> 01:48:54,119

proof of bigfoot comes around people see

2642

01:48:57,649 --> 01:48:56,400

them in the water and their legs are

2643

01:49:02,209 --> 01:48:57,659

moving together they're going to be like

2644

01:49:04,850 --> 01:49:02,219

the max was right okay so mer foot well

2645

01:49:08,030 --> 01:49:04,860

it was quite quite an Adept swimmer and

2646

01:49:10,189 --> 01:49:08,040

it had powerful lungs okay so at this

2647

01:49:12,109 --> 01:49:10,199

point I started to think that it was an

2648

01:49:13,850 --> 01:49:12,119

enormous orangutan

2649

01:49:15,169 --> 01:49:13,860

like that somebody like one of these

2650

01:49:17,689 --> 01:49:15,179

wealthy people on the other side of the

2651

01:49:20,390 --> 01:49:17,699

lake had a bed orangutan that somehow

2652

01:49:22,490 --> 01:49:20,400

was a master swimmer and was comfortable

2653

01:49:24,830 --> 01:49:22,500

in a lake and Diving underwater for God

2654

01:49:28,370 --> 01:49:24,840

knows what okay which made no sense but

2655

01:49:30,050 --> 01:49:28,380

I was like grasping at straws so then I

2656

01:49:31,850 --> 01:49:30,060

came up with this brilliant idea I was

2657

01:49:33,890 --> 01:49:31,860

like you know what I'm gonna do I wanted

2658

01:49:34,970 --> 01:49:33,900

to know what this thing was okay because

2659

01:49:39,050 --> 01:49:34,980

I've been watching it for like 15

2660

01:49:41,030 --> 01:49:39,060

minutes 15 minutes okay if I'd had like

2661

01:49:42,950 --> 01:49:41,040

something like like a the Polaroid was

2662

01:49:44,390 --> 01:49:42,960

with my brother but a good camera and I

2663

01:49:45,709 --> 01:49:44,400

could have zoomed in and taken pictures

2664

01:49:48,709 --> 01:49:45,719

whatever so like I'm sure it would have

2665

01:49:51,649 --> 01:49:48,719

been credible so I decided I'm gonna go

2666

01:49:53,090 --> 01:49:51,659

up the hill like back up the hill you

2667

01:49:55,070 --> 01:49:53,100

know and get high enough I'm looking

2668

01:49:56,689 --> 01:49:55,080

down at it because I was ground level so

2669

01:49:58,010 --> 01:49:56,699

I was kind of like even standing up I

2670

01:49:59,629 --> 01:49:58,020

couldn't see much of it you know I mean

2671

01:50:01,370 --> 01:49:59,639

I want to be able to get way up there

2672

01:50:02,990 --> 01:50:01,380

and look down on them like this and see

2673

01:50:05,149 --> 01:50:03,000

exactly what this thing was and solve

2674

01:50:05,990 --> 01:50:05,159

the mystery so I waited till it went

2675

01:50:07,850 --> 01:50:06,000

under

2676  
01:50:10,430 --> 01:50:07,860  
because I was sneaky you know and stuff

2677  
01:50:13,189 --> 01:50:10,440  
and I started backing up the hill and as

2678  
01:50:15,950 --> 01:50:13,199  
I got part way up the hill I

2679  
01:50:18,590 --> 01:50:15,960  
I like my heel like some of the gravel

2680  
01:50:19,850 --> 01:50:18,600  
those rocks like it it came loose or

2681  
01:50:21,649 --> 01:50:19,860  
whatever and stuff I stumbled a little

2682  
01:50:24,950 --> 01:50:21,659  
bit and this thing must have heard it

2683  
01:50:27,950 --> 01:50:24,960  
because it surfaced loudly and it wasn't

2684  
01:50:29,510 --> 01:50:27,960  
where I expected it at the surface I

2685  
01:50:31,070 --> 01:50:29,520  
expected to be in the path had been

2686  
01:50:33,290 --> 01:50:31,080  
coming when it serviced it was like off

2687  
01:50:34,129 --> 01:50:33,300  
to this side you know like I don't know

2688  
01:50:37,550 --> 01:50:34,139

like

2689

01:50:40,310 --> 01:50:37,560

20 yards 15 20 yards away from where I

2690

01:50:43,189 --> 01:50:40,320

expected it and I heard this like Splash

2691

01:50:44,450 --> 01:50:43,199

and I turned and looked and just as I

2692

01:50:48,770 --> 01:50:44,460

was turning it must have been like

2693

01:50:51,350 --> 01:50:48,780

diving them and I saw its shoulder and

2694

01:50:54,649 --> 01:50:51,360

its upper arm and its elbow and its form

2695

01:50:56,390 --> 01:50:54,659

like this okay all this broke the

2696

01:50:57,709 --> 01:50:56,400

surface of the water like that it was

2697

01:50:59,810 --> 01:50:57,719

very muscular

2698

01:51:02,450 --> 01:50:59,820

it had thick

2699

01:51:05,390 --> 01:51:02,460

Irish Setter like hair drenched hanging

2700

01:51:07,490 --> 01:51:05,400

down streaming and it went under and

2701  
01:51:09,530 --> 01:51:07,500  
then it started swimming not towards me

2702  
01:51:12,290 --> 01:51:09,540  
although close but it was looking for

2703  
01:51:13,790 --> 01:51:12,300  
that narrow Corridor that went under the

2704  
01:51:16,430 --> 01:51:13,800  
causeway and that's where it was headed

2705  
01:51:17,930 --> 01:51:16,440  
so I rushed over I don't know how far I

2706  
01:51:20,810 --> 01:51:17,940  
was maybe

2707  
01:51:23,149 --> 01:51:20,820  
30 feet I'm guessing to the edge of the

2708  
01:51:25,609 --> 01:51:23,159  
water where that little tunnel was so it

2709  
01:51:28,250 --> 01:51:25,619  
went like that you know and then it I

2710  
01:51:31,070 --> 01:51:28,260  
saw its shadowy form like go underwater

2711  
01:51:33,590 --> 01:51:31,080  
like this like that it was very fast

2712  
01:51:36,109 --> 01:51:33,600  
very fast swimmer and the water went

2713  
01:51:37,669 --> 01:51:36,119

like this like like that and I got to

2714

01:51:39,229 --> 01:51:37,679

tell you when it was out there I thought

2715

01:51:41,270 --> 01:51:39,239

it was only about five feet long but it

2716

01:51:43,010 --> 01:51:41,280

seemed a little bigger when it went when

2717

01:51:44,629 --> 01:51:43,020

it swam by to the point that I was like

2718

01:51:46,250 --> 01:51:44,639

whoa I took a step back like what the

2719

01:51:49,250 --> 01:51:46,260

heck is that you know this type of thing

2720

01:51:50,750 --> 01:51:49,260

so then I it went into the tunnel and I

2721

01:51:52,490 --> 01:51:50,760

ran up the hill

2722

01:51:55,430 --> 01:51:52,500

you almost got whipped by a car

2723

01:51:57,470 --> 01:51:55,440

literally I almost got killed okay and I

2724

01:51:58,910 --> 01:51:57,480

was like this and I ran across and I

2725

01:52:00,770 --> 01:51:58,920

told my brothers I was like guys guys

2726

01:52:02,870 --> 01:52:00,780

guys I was calling it The hairy red

2727

01:52:04,790 --> 01:52:02,880

thing okay there was a hairy red thing

2728

01:52:06,109 --> 01:52:04,800

this big thing it was swimming over

2729

01:52:07,910 --> 01:52:06,119

there I said it's gonna come through

2730

01:52:10,310 --> 01:52:07,920

right now right through here watch watch

2731

01:52:12,050 --> 01:52:10,320

watch watch watch like this well by the

2732

01:52:13,910 --> 01:52:12,060

time I got to the top of the hill not

2733

01:52:16,010 --> 01:52:13,920

even almost got creamed it had already

2734

01:52:18,290 --> 01:52:16,020

gone through I got this thing like I

2735

01:52:20,209 --> 01:52:18,300

told you this thing was fast and so

2736

01:52:22,910 --> 01:52:20,219

we're standing there and a minute passes

2737

01:52:26,450 --> 01:52:22,920

they're like you're a can I say the

2738

01:52:28,910 --> 01:52:26,460

d-i-c-k word on here uh sure they said

2739

01:52:30,229 --> 01:52:28,920

you're a dick stop wasting our time

2740

01:52:33,290 --> 01:52:30,239

whatever stuff like that I'm like I'm

2741

01:52:35,030 --> 01:52:33,300

I'm like and as I said that I don't know

2742

01:52:37,370 --> 01:52:35,040

how far to the left maybe 100 feet away

2743

01:52:39,890 --> 01:52:37,380

there were all these lily pads that came

2744

01:52:42,109 --> 01:52:39,900

out from the edge there you know like

2745

01:52:44,450 --> 01:52:42,119

Prime bass habitat stuff and something

2746

01:52:46,370 --> 01:52:44,460

serviced in the lily pads under them

2747

01:52:47,870 --> 01:52:46,380

like there was this crash like this you

2748

01:52:50,209 --> 01:52:47,880

know and I was like wait a minute and

2749

01:52:52,129 --> 01:52:50,219

like that's a fish and then like like I

2750

01:52:54,290 --> 01:52:52,139

don't know 30 sec years later it popped

2751

01:52:56,870 --> 01:52:54,300

up like like 30 feet further like crash

2752

01:52:59,209 --> 01:52:56,880

like that crash like that and it was in

2753

01:53:01,070 --> 01:52:59,219

there this thing using the lily pads to

2754

01:53:02,689 --> 01:53:01,080

cover itself and it was serviced under

2755

01:53:04,250 --> 01:53:02,699

the lily pads for air and then keep

2756

01:53:06,169 --> 01:53:04,260

moving and it did that it went around

2757

01:53:08,570 --> 01:53:06,179

the bend and then it was gone

2758

01:53:10,669 --> 01:53:08,580

okay and that's what happened so then I

2759

01:53:12,350 --> 01:53:10,679

forgot about this thing for like decades

2760

01:53:14,450 --> 01:53:12,360

you know I mean I got mocked for a few

2761

01:53:16,010 --> 01:53:14,460

times oh the hairy red thing oh and

2762

01:53:17,510 --> 01:53:16,020

stuff like that you know and it wasn't

2763

01:53:19,669 --> 01:53:17,520

until I was doing a lot of research I

2764

01:53:22,370 --> 01:53:19,679

was like wait a minute you know and then

2765

01:53:24,470 --> 01:53:22,380

like I was on a show talking about it

2766

01:53:26,330 --> 01:53:24,480

and you know I mean I looked it up there

2767

01:53:28,070 --> 01:53:26,340

was like many instances of stuff in

2768

01:53:29,870 --> 01:53:28,080

Connecticut and in that general area

2769

01:53:32,570 --> 01:53:29,880

sightings and stuff like that I had

2770

01:53:34,370 --> 01:53:32,580

found this one newspaper clipping

2771

01:53:36,890 --> 01:53:34,380

um I think it was from like I don't know

2772

01:53:39,609 --> 01:53:36,900

the early 1900s whatever and it was like

2773

01:53:43,729 --> 01:53:39,619

fishermen in the lake there reported

2774

01:53:46,609 --> 01:53:43,739

hairy wild child swimming in Lake okay

2775

01:53:47,750 --> 01:53:46,619

so like I was like well what is that and

2776

01:53:49,669 --> 01:53:47,760

then somebody was telling me well back

2777

01:53:51,109 --> 01:53:49,679

then you know in the 20s or 30s whatever

2778

01:53:52,609 --> 01:53:51,119

this was they didn't have the term

2779

01:53:53,930 --> 01:53:52,619

Bigfoot

2780

01:53:55,669 --> 01:53:53,940

or anything like that so that's what

2781

01:53:57,229 --> 01:53:55,679

they called it you know a hairy wild

2782

01:53:59,209 --> 01:53:57,239

child so I'm thinking you know a young

2783

01:54:01,189 --> 01:53:59,219

one of these things was out there you

2784

01:54:03,830 --> 01:54:01,199

know it probably like like crayfish like

2785

01:54:05,930 --> 01:54:03,840

like we like potato chips you know maybe

2786

01:54:08,750 --> 01:54:05,940

it wasn't supposed to be there and its

2787

01:54:11,149 --> 01:54:08,760

parents didn't know who knows what you

2788

01:54:14,810 --> 01:54:11,159

know adolescence it was not small though

2789

01:54:18,109 --> 01:54:14,820

it was easily as big as me okay before

2790

01:54:20,270 --> 01:54:18,119

that's that's you just read my mind uh

2791

01:54:23,330 --> 01:54:20,280

uh before we run completely out of time

2792

01:54:26,350 --> 01:54:23,340

we got about 60 seconds left you said

2793

01:54:29,570 --> 01:54:26,360

the arm right okay so

2794

01:54:33,590 --> 01:54:29,580

judging on that

2795

01:54:36,649 --> 01:54:33,600

um uh you know that type of anatomy that

2796

01:54:40,310 --> 01:54:36,659

that size are you thinking six foot

2797

01:54:42,530 --> 01:54:40,320

seven foot eight foot do you have uh I

2798

01:54:44,870 --> 01:54:42,540

like like the closest I could go by that

2799

01:54:47,209 --> 01:54:44,880

was the shadowy form that went past me

2800

01:54:50,390 --> 01:54:47,219

and like I said it was bigger than I

2801  
01:54:52,550 --> 01:54:50,400  
expected but it was also down you know

2802  
01:54:54,050 --> 01:54:52,560  
like like deep okay I don't have deep

2803  
01:54:55,910 --> 01:54:54,060  
that channel was right there maybe it

2804  
01:54:58,370 --> 01:54:55,920  
was 10 feet down but it was big enough

2805  
01:55:01,010 --> 01:54:58,380  
to make the water move like this only

2806  
01:55:03,709 --> 01:55:01,020  
Max Hawthorne has got a mer foot Story

2807  
01:55:06,229 --> 01:55:03,719  
how that what are the odds of that right

2808  
01:55:08,209 --> 01:55:06,239  
I don't know but you know like like I

2809  
01:55:09,830 --> 01:55:08,219  
said I didn't realize so my point was

2810  
01:55:13,310 --> 01:55:09,840  
though I was on the show this guy called

2811  
01:55:15,350 --> 01:55:13,320  
into the show or wrote in and he had

2812  
01:55:17,030 --> 01:55:15,360  
said he he knew the exact area he said

2813  
01:55:19,129 --> 01:55:17,040

they're 100 crayfish there we used to go

2814

01:55:21,109 --> 01:55:19,139

there Camp there catch them and fry them

2815

01:55:23,270 --> 01:55:21,119

all this other stuff they stopped going

2816

01:55:25,790 --> 01:55:23,280

in like the I think the late 70s or

2817

01:55:27,890 --> 01:55:25,800

early 80s because they came back to

2818

01:55:29,510 --> 01:55:27,900

their camp the camp was in the area by

2819

01:55:31,850 --> 01:55:29,520

the woods and it had been ripped to

2820

01:55:33,530 --> 01:55:31,860

pieces their entire Camp was destroyed I

2821

01:55:35,149 --> 01:55:33,540

mean destroyed ripped apart tents

2822

01:55:37,850 --> 01:55:35,159

everything scattered and they thought it

2823

01:55:39,530 --> 01:55:37,860

was quote drug crazed hippies okay

2824

01:55:41,149 --> 01:55:39,540

so they the following year their friends

2825

01:55:42,470 --> 01:55:41,159

were like you come in are like no watch

2826  
01:55:44,510 --> 01:55:42,480  
out for the hippies so their friends

2827  
01:55:46,910 --> 01:55:44,520  
went out on a canoe and they were on

2828  
01:55:49,669 --> 01:55:46,920  
squons on the side the state park side

2829  
01:55:51,530 --> 01:55:49,679  
and it's heavy wood stuff on a 10 feet

2830  
01:55:53,510 --> 01:55:51,540  
from Shore or something like that to

2831  
01:55:55,850 --> 01:55:53,520  
fish and then all of a sudden they hear

2832  
01:55:58,850 --> 01:55:55,860  
some crashing through the brush and this

2833  
01:56:00,649 --> 01:55:58,860  
huge Buck comes running out of a tiny

2834  
01:56:02,689 --> 01:56:00,659  
little clearing running for its life

2835  
01:56:04,910 --> 01:56:02,699  
terrified Dives in the water right in

2836  
01:56:07,790 --> 01:56:04,920  
front of their prowl swims past them

2837  
01:56:08,990 --> 01:56:07,800  
eyes wide in Terror and just swims where

2838  
01:56:10,729 --> 01:56:09,000

it's like to cross the lake which is

2839

01:56:12,649 --> 01:56:10,739

like a mile or something like that okay

2840

01:56:14,870 --> 01:56:12,659

but it didn't care and they heard

2841

01:56:17,330 --> 01:56:14,880

something chasing it crashing boom boom

2842

01:56:19,070 --> 01:56:17,340

behind it and it stopped just shy of

2843

01:56:20,629 --> 01:56:19,080

coming into the clearing

2844

01:56:22,370 --> 01:56:20,639

and they're like sitting there I thought

2845

01:56:25,310 --> 01:56:22,380

it was a hunter which was not a hunter

2846

01:56:27,290 --> 01:56:25,320

to be clear that mountain is so

2847

01:56:29,030 --> 01:56:27,300

treacherous you try running through

2848

01:56:30,950 --> 01:56:29,040

there you're gonna break your leg or

2849

01:56:32,990 --> 01:56:30,960

your neck I mean I put a photo of it

2850

01:56:35,570 --> 01:56:33,000

there to give an idea Boulders the size

2851  
01:56:38,270 --> 01:56:35,580  
of cottages slippery this that Hills

2852  
01:56:40,490 --> 01:56:38,280  
leaves I mean dead Falls whatever it's

2853  
01:56:43,070 --> 01:56:40,500  
it's nightmare fuel okay hiking through

2854  
01:56:45,229 --> 01:56:43,080  
there but anyway so whatever was stopped

2855  
01:56:49,850 --> 01:56:45,239  
and then it started throwing stuff at

2856  
01:56:51,830 --> 01:56:49,860  
them pine cones branches sticks rocks

2857  
01:56:53,810 --> 01:56:51,840  
every like so you know a few seconds

2858  
01:56:55,550 --> 01:56:53,820  
another thing crack would come down hit

2859  
01:56:57,890 --> 01:56:55,560  
the canoe or land in the water next to

2860  
01:57:00,109 --> 01:56:57,900  
them and stuff which as we all know is

2861  
01:57:01,729 --> 01:57:00,119  
primate behavior and is Bigfoot behavior

2862  
01:57:03,950 --> 01:57:01,739  
and then they were like hey you know

2863  
01:57:05,990 --> 01:57:03,960

we're in the canoe whatever and then it

2864

01:57:07,729 --> 01:57:06,000

stopped and then he heard about this

2865

01:57:09,229 --> 01:57:07,739

from these friends and he put it all

2866

01:57:12,649 --> 01:57:09,239

together and he thought you know that

2867

01:57:15,050 --> 01:57:12,659

makes sense now see so you know that's

2868

01:57:17,930 --> 01:57:15,060

you know more evidence to back up the

2869

01:57:19,189 --> 01:57:17,940

exact same Lake everything that I

2870

01:57:21,169 --> 01:57:19,199

thought with the crayfish and everything

2871

01:57:23,750 --> 01:57:21,179

like that it all makes sense it just

2872

01:57:25,490 --> 01:57:23,760

lined up you know I didn't expect this

2873

01:57:28,370 --> 01:57:25,500

but I'm gonna say it I'm gonna go on the

2874

01:57:30,770 --> 01:57:28,380

record Max best Bigfoot story I've ever

2875

01:57:35,149 --> 01:57:30,780

heard that's that right there

2876

01:57:38,450 --> 01:57:35,159

that's incredible I have never

2877

01:57:40,490 --> 01:57:38,460

um yeah yeah I've been many times when

2878

01:57:42,169 --> 01:57:40,500

we were there in that Park yeah where

2879

01:57:44,410 --> 01:57:42,179

you'd see not many but several times

2880

01:57:47,750 --> 01:57:44,420

where you'd see a police helicopter

2881

01:57:49,129 --> 01:57:47,760

searching you know over the trees in the

2882

01:57:51,890 --> 01:57:49,139

woods and stuff like that and people

2883

01:57:53,930 --> 01:57:51,900

disappeared Somebody went missing you

2884

01:57:56,089 --> 01:57:53,940

know stuff like that it was creepy you

2885

01:57:59,149 --> 01:57:56,099

know so I I don't know but you know

2886

01:58:00,830 --> 01:57:59,159

whatever I mean I I just joke like

2887

01:58:17,109 --> 01:58:00,840

imagine if I threw out a line and I

2888

01:58:20,750 --> 01:58:19,970

guys here's the hairy red thing see you

2889

01:58:23,689 --> 01:58:20,760

later

2890

01:58:27,370 --> 01:58:23,699

they were like whoa hey hey Max we've

2891

01:58:30,229 --> 01:58:27,380

got your links up uh foreign and and

2892

01:58:32,810 --> 01:58:30,239

Diablo so thank you for that where can

2893

01:58:34,910 --> 01:58:32,820

everybody find your stuff and and uh

2894

01:58:36,290 --> 01:58:34,920

where's the best place to reach out uh

2895

01:58:38,510 --> 01:58:36,300

to you

2896

01:58:40,970 --> 01:58:38,520

um Facebook or Twitter

2897

01:58:44,750 --> 01:58:40,980

um would be fine it's uh real max

2898

01:58:47,030 --> 01:58:44,760

Hawthorne on Facebook and YouTube and I

2899

01:58:48,649 --> 01:58:47,040

I'm not sure what the Twitter one is you

2900

01:58:50,209 --> 01:58:48,659

know they keep changing my stuff around

2901

01:58:51,410 --> 01:58:50,219

here let me see if I can tell you real

2902

01:58:53,390 --> 01:58:51,420

quick

2903

01:58:54,649 --> 01:58:53,400

um but I mean Facebook I have like a

2904

01:58:56,270 --> 01:58:54,659

personal page and then there's a group

2905

01:58:57,589 --> 01:58:56,280

on there called monsters and Marine

2906

01:58:59,689 --> 01:58:57,599

Mysteries which people are welcome to

2907

01:59:02,149 --> 01:58:59,699

join we post a lot of great stuff on

2908

01:59:05,270 --> 01:59:02,159

there uh it's a really friendly group so

2909

01:59:07,189 --> 01:59:05,280

I can't recommend that enough and no BS

2910

01:59:08,750 --> 01:59:07,199

we don't allow trolls we don't allow

2911

01:59:10,669 --> 01:59:08,760

bullying or anything like that somebody

2912

01:59:11,629 --> 01:59:10,679

steps that line they get stomped to us

2913

01:59:13,609 --> 01:59:11,639

whatever

2914

01:59:15,129 --> 01:59:13,619

um on Twitter it's the max Hawthorne for

2915

01:59:18,350 --> 01:59:15,139

some reason

2916

01:59:20,689 --> 01:59:18,360

I don't know why Bill and John inside

2917

01:59:23,450 --> 01:59:20,699

get everything up in the chat for Max

2918

01:59:25,850 --> 01:59:23,460

and uh we'll get everything out there in

2919

01:59:27,890 --> 01:59:25,860

social media for you Max I look forward

2920

01:59:30,229 --> 01:59:27,900

to the next time that you're on the show

2921

01:59:32,990 --> 01:59:30,239

man great it was my pleasure thank you

2922

01:59:35,689 --> 01:59:33,000

so much behave and be well and and enjoy

2923

01:59:40,010 --> 01:59:35,699

your weekend you too big guy thank you

2924

01:59:43,250 --> 01:59:40,020

Max Hawthorne and uh mer foot I didn't

2925

01:59:47,089 --> 01:59:43,260

expect that and uh go check out squant's

2926

01:59:49,490 --> 01:59:47,099

pond it's squons with a z and you can

2927

01:59:53,450 --> 01:59:49,500

see Candlewood Lake right there and and

2928

01:59:56,030 --> 01:59:53,460

look at look at that while Max is uh

2929

01:59:58,910 --> 01:59:56,040

telling the story and you'll get uh the

2930

02:00:02,629 --> 01:59:58,920

complete picture it's right there I want

2931

02:00:05,450 --> 02:00:02,639

everybody to enjoy and have a great safe

2932

02:00:08,870 --> 02:00:05,460

fun and amazing weekend

2933

02:00:10,729 --> 02:00:08,880
