00:00:40,690 --> 00:00:36,229
good afternoon fade the black breaking

4
00:00:43,430 --> 00:00:40,700
news for this Tuesday June 13th

5
00:00:47,090 --> 00:00:43,440
2023. this is all of the news that you

6
00:00:50,170 --> 00:00:47,100
need I'm Jimmy Church on this day in

7
00:00:56,170 --> 00:00:53,569
323 BC

8
00:01:01,910 --> 00:00:56,180
the king of Macedonia

9
00:01:06,530 --> 00:01:01,920
Alexander the Great died in Babylon on

10
00:01:09,590 --> 00:01:06,540
this day in 323 BC never found his tomb

11
00:01:12,770 --> 00:01:09,600
still looking for it here's your fader

12
00:01:18,490 --> 00:01:15,530
are you ready

13
00:01:22,609 --> 00:01:18,500

in a recent study

14

00:01:25,429 --> 00:01:22,619

four out of ten Canadians

15

00:01:27,710 --> 00:01:25,439

said they would choose bacon

16

00:01:29,690 --> 00:01:27,720

over sex

17

00:01:32,149 --> 00:01:29,700

and that

18

00:01:34,429 --> 00:01:32,159

is your fader fact

19

00:01:37,190 --> 00:01:34,439

let's get to the breaking news several

20

00:01:38,749 --> 00:01:37,200

large asteroids are set to pass by Earth

21

00:01:40,850 --> 00:01:38,759

this week

22

00:01:42,710 --> 00:01:40,860

there is no current danger of the

23

00:01:45,410 --> 00:01:42,720

asteroids hitting the Earth but one

24

00:01:48,830 --> 00:01:45,420

colossal asteroid has been labeled

25

00:01:54,010 --> 00:01:48,840

potentially hazardous that asteroid

26
00:01:57,230 --> 00:01:54,020
named 1994 XD measures approximately

27
00:02:00,649 --> 00:01:57,240
1500 feet making it comparable in size

28
00:02:03,109 --> 00:02:00,659
to a large Bridge or the U.S Capitol

29
00:02:05,870 --> 00:02:03,119
building it is set to reach the nearest

30
00:02:08,749 --> 00:02:05,880
distance to Earth tonight with multiple

31
00:02:13,430 --> 00:02:08,759
websites live streaming the celestial

32
00:02:15,729 --> 00:02:13,440
event when it's closest 1994 XD will

33
00:02:19,970 --> 00:02:15,739
stand will still be around

34
00:02:24,070 --> 00:02:19,980
1.9 million miles away as we already

35
00:02:29,050 --> 00:02:24,080
know the Moon is 238

36
00:02:32,210 --> 00:02:29,060
855 miles away at least today

37
00:02:34,970 --> 00:02:32,220
nearly 15 000 people have left their

38
00:02:37,550 --> 00:02:34,980

homes around a volcano spewing lava and

39

00:02:40,670 --> 00:02:37,560

noxious gases in the northeastern

40

00:02:43,910 --> 00:02:40,680

Philippines and May remain displaced for

41

00:02:47,210 --> 00:02:43,920

months lava was seen flowing today from

42

00:02:51,170 --> 00:02:47,220

the mouth of the 8 000 foot Mayan

43

00:02:54,410 --> 00:02:51,180

volcano in Albay province which is

44

00:02:57,550 --> 00:02:54,420

placed on high alert last week after

45

00:02:59,990 --> 00:02:57,560

Tremors and hundreds of Rock Falls

46

00:03:01,850 --> 00:03:00,000

authorities said people living farther

47

00:03:04,790 --> 00:03:01,860

away from the volcano should also be

48

00:03:07,930 --> 00:03:04,800

ready for possible evacuation as police

49

00:03:10,550 --> 00:03:07,940

set up checkpoints to prevent residents

50

00:03:12,830 --> 00:03:10,560

from returning

51

00:03:14,770 --> 00:03:12,840

yeah amazing footage

52

00:03:18,290 --> 00:03:14,780

humans

53

00:03:21,290 --> 00:03:18,300

originated in Africa allegedly right

54

00:03:25,130 --> 00:03:21,300

okay so let's let's just go there but

55

00:03:28,130 --> 00:03:25,140

when exactly our earliest ancestors left

56

00:03:31,149 --> 00:03:28,140

the continent and how they spread around

57

00:03:34,210 --> 00:03:31,159

the world has been intensely debated by

58

00:03:38,750 --> 00:03:34,220

archaeologists and this program

59

00:03:41,449 --> 00:03:38,760

now two fossils Unearthed in a cave in

60

00:03:45,289 --> 00:03:41,459

Northern Laos

61

00:03:48,289 --> 00:03:45,299

suggests that homo sapiens us modern our

62

00:03:51,830 --> 00:03:48,299

own species modern humans who's living

63

00:03:54,289 --> 00:03:51,840

in the region some 86

64

00:03:57,050 --> 00:03:54,299

000 years ago all of this according to a

65

00:03:59,990 --> 00:03:57,060

new study the finding challenges the

66

00:04:02,930 --> 00:04:00,000

prevailing idea that Humans path across

67

00:04:05,390 --> 00:04:02,940

the globe was linear and took place in a

68

00:04:07,030 --> 00:04:05,400

single wave about 50

69

00:04:09,890 --> 00:04:07,040

000 years ago

70

00:04:11,990 --> 00:04:09,900

DNA analysis of present-day human

71

00:04:15,289 --> 00:04:12,000

populations has supported this

72

00:04:17,990 --> 00:04:15,299

hypothesis that early modern humans left

73

00:04:21,650 --> 00:04:18,000

Africa around 50 000 years ago the two

74

00:04:24,350 --> 00:04:21,660

fossils found in Laos are estimated to

75

00:04:27,230 --> 00:04:24,360

be about 86

76
00:04:30,469 --> 00:04:27,240
000 years old with the leg bone fragment

77
00:04:32,749 --> 00:04:30,479
being the older fine the world's oldest

78
00:04:35,510 --> 00:04:32,759
figurative rock art has been found in

79
00:04:38,030 --> 00:04:35,520
the cave in Indonesia an extinct human

80
00:04:40,390 --> 00:04:38,040
species including the small homo

81
00:04:43,430 --> 00:04:40,400
floriensis and Homo

82
00:04:46,670 --> 00:04:43,440
losing finances has been found on

83
00:04:49,070 --> 00:04:46,680
islands in Indonesia and the Philippines

84
00:04:54,010 --> 00:04:49,080
so the question is

85
00:04:59,330 --> 00:04:54,020
how did modern humans travel from Africa

86
00:05:02,290 --> 00:04:59,340
to South East Asia 100

87
00:05:04,450 --> 00:05:02,300
000 years ago

88
00:05:08,510 --> 00:05:04,460

yeah

89

00:05:11,810 --> 00:05:08,520

SpaceX has recently hired the youngest

90

00:05:16,909 --> 00:05:11,820

employee in their spacecraft company his

91

00:05:20,210 --> 00:05:16,919

name Chiron quasi a 14 year old software

92

00:05:23,990 --> 00:05:20,220

engineer who was able to successfully

93

00:05:26,990 --> 00:05:24,000

clear their interview process announcing

94

00:05:30,490 --> 00:05:27,000

his new Journey with SpaceX quasi shared

95

00:05:33,110 --> 00:05:30,500

his job update on LinkedIn

96

00:05:35,570 --> 00:05:33,120

quasi said that he will be joining the

97

00:05:37,909 --> 00:05:35,580

starlink engineering team which he

98

00:05:42,170 --> 00:05:37,919

called the coolest company on the planet

99

00:05:44,810 --> 00:05:42,180

the 14 year old genius called SpaceX one

100

00:05:47,810 --> 00:05:44,820

of those rare companies that did not

101
00:05:51,290 --> 00:05:47,820
consider his age as a benchmark for

102
00:05:54,350 --> 00:05:51,300
determining ability and maturity

103
00:05:57,290 --> 00:05:54,360
starlink of course is the satellite

104
00:06:01,249 --> 00:05:57,300
internet service of SpaceX

105
00:06:02,689 --> 00:06:01,259
he's the now the most popular kid on the

106
00:06:07,010 --> 00:06:02,699
Block

107
00:06:12,050 --> 00:06:07,020
and finally I'll leave you with this

108
00:06:14,930 --> 00:06:12,060
Brad bitar returned a copy of the Bounty

109
00:06:19,969 --> 00:06:14,940
Trilogy by Charles nordoff and James

110
00:06:23,870 --> 00:06:19,979
Norman Hall published in 1932 to the

111
00:06:28,010 --> 00:06:23,880
Aberdeen Timberland Library last week

112
00:06:30,650 --> 00:06:28,020
it was 81 years past due

113
00:06:32,650 --> 00:06:30,660

it was originally due to be returned in

114

00:06:36,770 --> 00:06:32,660

March of

115

00:06:40,610 --> 00:06:36,780

1942 the overdue fees for the book uh

116

00:06:43,550 --> 00:06:40,620

were roughly 480 however the library

117

00:06:46,610 --> 00:06:43,560

stopped charging late fees back in 2020

118

00:06:48,830 --> 00:06:46,620

to remove Financial barriers that might

119

00:06:53,990 --> 00:06:48,840

discourage people from visiting and

120

00:06:55,969 --> 00:06:54,000

taking out books and so bitar owed

121

00:06:58,249 --> 00:06:55,979

nothing

122

00:07:00,409 --> 00:06:58,259

there you go there's your Fade to Black

123

00:07:04,730 --> 00:07:00,419
