

# FADE TO BLACK

with **JIMMY CHURCH**  
**PRESENTS**

# BREAKING NEWS

Mon June 19, 2023 **LIVE**

1  
00:00:40,690 --> 00:00:27,160

[Music]

2  
00:00:48,069 --> 00:00:44,389

good afternoon Fade to Black breaking

3  
00:00:52,130 --> 00:00:48,079

news for this Monday June 19th

4  
00:00:54,830 --> 00:00:52,140

2023 this is all of the news that you

5  
00:00:56,930 --> 00:00:54,840

need I am Jimmy Church

6  
00:00:59,930 --> 00:00:56,940

I'm going to start off with this it was

7  
00:01:02,209 --> 00:00:59,940

a crazy weekend uh installed a new

8  
00:01:04,670 --> 00:01:02,219

computer system here I started Thursday

9  
00:01:05,950 --> 00:01:04,680

night after the show worked for three

10  
00:01:10,969 --> 00:01:05,960

days

11  
00:01:13,550 --> 00:01:10,979

and here we are hopefully everything is

12  
00:01:15,950 --> 00:01:13,560

fine kind of fine tune everything and

13  
00:01:19,190 --> 00:01:15,960

and and and and and get it right but we

14

00:01:23,050 --> 00:01:19,200

will so with that

15

00:01:27,490 --> 00:01:23,060

let's get to this day in history

16

00:01:30,410 --> 00:01:27,500

1963. Soviet Cosmonaut Valentina

17

00:01:32,810 --> 00:01:30,420

Tereshkova the first woman to travel in

18

00:01:36,969 --> 00:01:32,820

space returned to Earth in the

19

00:01:40,090 --> 00:01:36,979

spacecraft vostok six on this day in

20

00:01:43,910 --> 00:01:40,100

1963. here's your fader fact

21

00:01:48,890 --> 00:01:43,920

the Netherlands is so safe

22

00:01:52,310 --> 00:01:48,900

it Imports criminals to fill jails

23

00:01:54,289 --> 00:01:52,320

and that is your fader fact let's get to

24

00:01:57,050 --> 00:01:54,299

the breaking news this started yesterday

25

00:01:59,469 --> 00:01:57,060

the U.S Coast Guard is is searching for

26  
00:02:03,469 --> 00:01:59,479  
five people aboard a missing submersible

27  
00:02:05,030 --> 00:02:03,479  
near the Titanic wreckage the Coast

28  
00:02:07,130 --> 00:02:05,040  
Guard received the first phone call

29  
00:02:09,469 --> 00:02:07,140  
about the missing submersible on Sunday

30  
00:02:11,930 --> 00:02:09,479  
yesterday the U.S Coast Guard Boston

31  
00:02:14,530 --> 00:02:11,940  
public affairs officer Lieutenant

32  
00:02:17,510 --> 00:02:14,540  
Samantha Cochran announced yesterday

33  
00:02:22,010 --> 00:02:17,520  
according to the website run by the tour

34  
00:02:24,470 --> 00:02:22,020  
operator Ocean Gate Expeditions the

35  
00:02:28,430 --> 00:02:24,480  
submersible holds up to five people a

36  
00:02:31,190 --> 00:02:28,440  
pilot a Content expert and three paying

37  
00:02:34,130 --> 00:02:31,200  
passengers there are two aircraft and a

38  
00:02:37,030 --> 00:02:34,140

ship on the scene right now searching

39

00:02:39,710 --> 00:02:37,040

I'll keep you posted

40

00:02:43,009 --> 00:02:39,720

researchers in Korea

41

00:02:46,550 --> 00:02:43,019

say the removal of groundwater around

42

00:02:49,430 --> 00:02:46,560

the world for drinking and irrigation is

43

00:02:53,630 --> 00:02:49,440

altering the Earth's mass and in turn

44

00:02:56,690 --> 00:02:53,640

making its axis wobble according to the

45

00:03:00,229 --> 00:02:56,700

team we've shifted a large mass of water

46

00:03:06,589 --> 00:03:00,239

that the Earth tilted 31 inches East

47

00:03:08,570 --> 00:03:06,599

between 1993 and 2010 alone changing the

48

00:03:10,430 --> 00:03:08,580

position of the axis can potentially

49

00:03:12,649 --> 00:03:10,440

increase the amount of sunlight the

50

00:03:15,649 --> 00:03:12,659

poles are getting which can increase the

51  
00:03:18,530 --> 00:03:15,659  
melting of polar ice and in a vicious

52  
00:03:20,809 --> 00:03:18,540  
cycle melting ice and resulting sea

53  
00:03:24,350 --> 00:03:20,819  
level rises can alter Earth's mass

54  
00:03:27,770 --> 00:03:24,360  
distribution even further past research

55  
00:03:32,830 --> 00:03:27,780  
has shown that is absolutely incredible

56  
00:03:37,670 --> 00:03:32,840  
so scientists have made a link between

57  
00:03:41,210 --> 00:03:37,680  
Cosmic radiation and earthquakes For the

58  
00:03:44,030 --> 00:03:41,220  
First Time The Credo project initiated

59  
00:03:46,610 --> 00:03:44,040  
in 2016 by The Institute of nuclear

60  
00:03:49,789 --> 00:03:46,620  
physics of the Polish Academy of

61  
00:03:53,210 --> 00:03:49,799  
Sciences and Krakow Poland is working to

62  
00:03:57,589 --> 00:03:53,220  
analyze how earthquakes can be predicted

63  
00:04:00,229 --> 00:03:57,599

by measuring Cosmic radiation when Credo

64

00:04:02,330 --> 00:04:00,239

scientists analyze Cosmic radiation data

65

00:04:05,449 --> 00:04:02,340

from the neutron monitor database

66

00:04:08,089 --> 00:04:05,459

project collected over the last 50 years

67

00:04:12,229 --> 00:04:08,099

and the Pierre Auger Observatory

68

00:04:14,509 --> 00:04:12,239

collected since 2005 a clear correlation

69

00:04:17,930 --> 00:04:14,519

was found between earthquakes of

70

00:04:22,370 --> 00:04:17,940

magnitude 4 or larger and the intensity

71

00:04:25,249 --> 00:04:22,380

of secondary Cosmic radiation but this

72

00:04:29,270 --> 00:04:25,259

correlation is only evident when cosmic

73

00:04:32,749 --> 00:04:29,280

ray data shifts 15 days relative to

74

00:04:34,810 --> 00:04:32,759

seismic data this suggests it could give

75

00:04:38,450 --> 00:04:34,820

scientists information on earthquakes

76

00:04:40,730 --> 00:04:38,460

well in advance but it is still not

77

00:04:43,969 --> 00:04:40,740

clear whether it will be possible to

78

00:04:46,610 --> 00:04:43,979

determine the location of these

79

00:04:50,090 --> 00:04:46,620

earthquakes and that is some of the

80

00:04:54,290 --> 00:04:50,100

craziest news I've heard in a long time

81

00:04:56,990 --> 00:04:54,300

and Chili's Atacama Desert High in the

82

00:04:59,810 --> 00:04:57,000

mountains the world's largest optical

83

00:05:02,870 --> 00:04:59,820

telescope is taking shape construction

84

00:05:06,890 --> 00:05:02,880

of the extremely large telescope called

85

00:05:09,710 --> 00:05:06,900

the elt is going well as the steel frame

86

00:05:12,890 --> 00:05:09,720

of the telescope's Dome is pieced

87

00:05:17,030 --> 00:05:12,900

together bit by bit when finished the

88

00:05:19,909 --> 00:05:17,040

entire Dome will weigh 6 100 tons and

89

00:05:24,469 --> 00:05:19,919

will house the primary mirror made them

90

00:05:27,650 --> 00:05:24,479

up of almost 800 individual segments the

91

00:05:31,189 --> 00:05:27,660

elt will be capable of collecting more

92

00:05:34,450 --> 00:05:31,199

light than all the existing 8 to 10

93

00:05:36,110 --> 00:05:34,460

meter telescopes on the planet

94

00:05:37,730 --> 00:05:36,120

combined

95

00:05:42,590 --> 00:05:37,740

wow

96

00:05:45,590 --> 00:05:42,600

the esa Jackson beppy Colombo mission is

97

00:05:48,529 --> 00:05:45,600

gearing up for its next close flyby of

98

00:05:51,350 --> 00:05:48,539

mercury later tonight when it will pass

99

00:05:52,090 --> 00:05:51,360

the planet's surface at an altitude of

100

00:05:56,689 --> 00:05:52,100

about

101  
00:06:00,170 --> 00:05:56,699  
236 kilometers and that is close this is

102  
00:06:02,810 --> 00:06:00,180  
the third of six gravity assist flybys

103  
00:06:05,930 --> 00:06:02,820  
have mercury that Esa spacecraft

104  
00:06:08,749 --> 00:06:05,940  
operation team is guiding Pepe Colombo

105  
00:06:11,290 --> 00:06:08,759  
through the flybys together with more

106  
00:06:14,029 --> 00:06:11,300  
than 15 thousand hours worth of

107  
00:06:16,430 --> 00:06:14,039  
challenging solar electric propulsion

108  
00:06:19,249 --> 00:06:16,440  
operations are needed to help the

109  
00:06:22,790 --> 00:06:19,259  
spacecraft flight against the enormous

110  
00:06:26,390 --> 00:06:22,800  
gravitational pull of our sun so that it

111  
00:06:31,249 --> 00:06:26,400  
can eventually lose enough energy to be

112  
00:06:34,010 --> 00:06:31,259  
captured into Mercury's orbit in 2025.

113  
00:06:37,249 --> 00:06:34,020

the closest approach of tonight's flyby

114

00:06:40,730 --> 00:06:37,259

will take place at around 6 34 PM

115

00:06:43,610 --> 00:06:40,740

Pacific time Pepe Colombo will approach

116

00:06:45,830 --> 00:06:43,620

on the night side of the planet meaning

117

00:06:48,650 --> 00:06:45,840

the most interesting views of mercury

118

00:06:52,189 --> 00:06:48,660

surface will be recorded by the

119

00:06:55,610 --> 00:06:52,199

spacecraft's monitoring cameras about 13

120

00:06:59,629 --> 00:06:55,620

minutes later the first images are

121

00:07:03,650 --> 00:06:59,639

expected to be released tomorrow

122

00:07:05,710 --> 00:07:03,660

and finally I'll leave you with this

123

00:07:08,450 --> 00:07:05,720

Fox News

124

00:07:12,350 --> 00:07:08,460

years-long streak of weekly rating

125

00:07:14,930 --> 00:07:12,360

dominance has ended with new data

126  
00:07:17,170 --> 00:07:14,940  
showing that it gave up the top spot to

127  
00:07:18,730 --> 00:07:17,180  
its rival Network

128  
00:07:21,650 --> 00:07:18,740  
MSNBC

129  
00:07:23,749 --> 00:07:21,660  
Nielsen data regarding the week ending

130  
00:07:27,230 --> 00:07:23,759  
this past Sunday was shared on Twitter

131  
00:07:30,529 --> 00:07:27,240  
and according to the data Fox's Prime

132  
00:07:34,629 --> 00:07:30,539  
Time 8 pm to 11 pm Eastern Time

133  
00:07:40,909 --> 00:07:37,969  
1.504429 million viewers the average

134  
00:07:43,510 --> 00:07:40,919  
viewership for MSNBC over the same time

135  
00:07:46,689 --> 00:07:43,520  
frame averaged

136  
00:07:51,650 --> 00:07:49,249  
857 narrowly beating out the

137  
00:07:54,430 --> 00:07:51,660  
conservative Network that has so long

138  
00:07:58,550 --> 00:07:54,440

been a leader in cable news viewership

139

00:07:59,409 --> 00:07:58,560

the data from last week marks the end of

140

00:08:08,870 --> 00:07:59,419

a

141

00:08:12,170 --> 00:08:08,880

Fox News continues to bleed viewership

142

00:08:14,749 --> 00:08:12,180

after the abrupt firing of host Tucker

143

00:08:17,689 --> 00:08:14,759

Carlson one of the biggest ratings draws

144

00:08:20,390 --> 00:08:17,699

in late April the network has yet to

145

00:08:24,369 --> 00:08:20,400

name a permanent replacement for its 8

146

00:08:27,770 --> 00:08:24,379

PM Eastern Time prime time slot

147

00:08:29,629 --> 00:08:27,780

wow and there you go that's all the Fade

148

00:08:32,990 --> 00:08:29,639

to Black breaking news that you need for

149

00:08:34,750 --> 00:08:33,000

this Thursday or this Thursday this

150

00:08:37,790 --> 00:08:34,760

Monday June 19

151

00:08:40,130 --> 00:08:37,800

2023 Theta black breaking news is

152

00:08:46,720 --> 00:08:40,140

produced by Renee Newman I'm Jimmy
