

# THE SECRET OF SKINWALKER RANCH

**REVIEW**  
Season 4  
Episode 9

1  
00:00:10,820 --> 00:00:16,070

thank you

2  
00:00:22,429 --> 00:00:19,070

Jimmy this was a really great episode of

3  
00:00:24,769 --> 00:00:22,439

Season 4 Episode 9. this was one that I

4  
00:00:29,330 --> 00:00:24,779

was like they brought in some Goods

5  
00:00:30,950 --> 00:00:29,340

today in one word describe this episode

6  
00:00:33,410 --> 00:00:30,960

best

7  
00:00:36,410 --> 00:00:33,420

wow that's putting it up there pretty

8  
00:00:39,650 --> 00:00:36,420

high yeah yeah yeah best I I just

9  
00:00:43,490 --> 00:00:39,660

tweeted that out this may be

10  
00:00:46,790 --> 00:00:43,500

the best episode yet and there are a lot

11  
00:00:48,889 --> 00:00:46,800

of reasons for it how did you like it

12  
00:00:51,650 --> 00:00:48,899

I thoroughly enjoy enjoyed this episode

13  
00:00:53,389 --> 00:00:51,660

and there was one particular scene that

14

00:00:56,029 --> 00:00:53,399

was my all-time favorite that I love

15

00:00:57,770 --> 00:00:56,039

seeing when we can get that certain

16

00:00:59,569 --> 00:00:57,780

aspect and we're gonna get into it you

17

00:01:01,850 --> 00:00:59,579

might know what I'm referring to those

18

00:01:03,590 --> 00:01:01,860

that are listening and watching this but

19

00:01:05,570 --> 00:01:03,600

there's just there's one little piece

20

00:01:07,969 --> 00:01:05,580

when they bring in a certain person in

21

00:01:09,770 --> 00:01:07,979

and they tell their story that's what I

22

00:01:11,810 --> 00:01:09,780

love the most of course I do love the

23

00:01:13,550 --> 00:01:11,820

science aspects and there was a lot of

24

00:01:17,149 --> 00:01:13,560

Science in today's episode a lot of

25

00:01:19,130 --> 00:01:17,159

experiments which was a big plus overall

26

00:01:22,010 --> 00:01:19,140

I gotta say it was really really good

27

00:01:23,749 --> 00:01:22,020

and Jose Sanchez thank you for becoming

28

00:01:25,249 --> 00:01:23,759

a YouTube member thank you thank you so

29

00:01:26,810 --> 00:01:25,259

much and I'm referring to yesterday's

30

00:01:28,910 --> 00:01:26,820

episode I know I'm saying today because

31

00:01:30,830 --> 00:01:28,920

we're reviewing the episode today but it

32

00:01:33,730 --> 00:01:30,840

came out yesterday it throws me off

33

00:01:37,090 --> 00:01:33,740

especially this episode dealt with time

34

00:01:39,950 --> 00:01:37,100

and so yeah yeah

35

00:01:41,749 --> 00:01:39,960

and okay we'll we'll get that that was

36

00:01:44,630 --> 00:01:41,759

at the end of the year we'll we'll save

37

00:01:49,910 --> 00:01:44,640

uh that uh for a while there was a lot

38

00:01:52,670 --> 00:01:49,920

going on here oh yeah now oh uh

39

00:01:55,249 --> 00:01:52,680

uh and then okay

40

00:01:57,289 --> 00:01:55,259

I'm gonna I'm gonna be a little I just

41

00:01:58,730 --> 00:01:57,299

said it was the best episode yet okay

42

00:02:01,910 --> 00:01:58,740

people are agreeing with you in the live

43

00:02:03,230 --> 00:02:01,920

chat too are they okay they are that

44

00:02:05,090 --> 00:02:03,240

means this is on

45

00:02:09,290 --> 00:02:05,100

this thing's working this thing's

46

00:02:10,850 --> 00:02:09,300

working best and so but but it wasn't

47

00:02:13,190 --> 00:02:10,860

perfect

48

00:02:14,690 --> 00:02:13,200

okay so let me just say this they

49

00:02:17,210 --> 00:02:14,700

started off

50

00:02:22,010 --> 00:02:17,220

right out of the episode the drilling

51  
00:02:23,869 --> 00:02:22,020  
I'm like oh okay it's arrived we're

52  
00:02:25,430 --> 00:02:23,879  
going we're going

53  
00:02:30,350 --> 00:02:25,440  
nope

54  
00:02:32,650 --> 00:02:30,360  
gotta wait on the drilling we gotta we

55  
00:02:36,110 --> 00:02:32,660  
gotta wait on the Dr I was

56  
00:02:38,390 --> 00:02:36,120  
now not to say

57  
00:02:41,809 --> 00:02:38,400  
that because the episode was so great

58  
00:02:45,190 --> 00:02:41,819  
right one thing after another they did

59  
00:02:47,570 --> 00:02:45,200  
the drilling uh teaser in the beginning

60  
00:02:49,610 --> 00:02:47,580  
and I completely forgot about the

61  
00:02:52,610 --> 00:02:49,620  
drilling I mean the the episode had me

62  
00:02:54,530 --> 00:02:52,620  
on the edge of my seat throughout the

63  
00:02:56,089 --> 00:02:54,540

entire episode I get to the end I was

64

00:02:59,930 --> 00:02:56,099

like ah

65

00:03:01,190 --> 00:02:59,940

the drilling they did it again they did

66

00:03:02,750 --> 00:03:01,200

it again so we're gonna have to wait

67

00:03:06,589 --> 00:03:02,760

we're gonna have to wait on the drilling

68

00:03:09,410 --> 00:03:06,599

so folks if you're like me uh waiting

69

00:03:12,229 --> 00:03:09,420

for these results to come back from uh

70

00:03:14,030 --> 00:03:12,239

the drilling uh

71

00:03:18,530 --> 00:03:14,040

you're gonna have to wait there you go

72

00:03:20,809 --> 00:03:18,540

spoiler number one uh well this show is

73

00:03:22,610 --> 00:03:20,819

filled with spoilers today I'm gonna do

74

00:03:26,449 --> 00:03:22,620

this in real time

75

00:03:28,309 --> 00:03:26,459

this is uh the owner of contact in the

76

00:03:30,530 --> 00:03:28,319

desert

77

00:03:34,729 --> 00:03:30,540

Hey Ron I'm live on the air with

78

00:03:37,570 --> 00:03:34,739

Christina Gomez say say hi to Christina

79

00:03:41,690 --> 00:03:37,580

hey Christina hi there

80

00:03:44,869 --> 00:03:41,700

Hey Ron uh we're doing a live review of

81

00:03:47,229 --> 00:03:44,879

skin walker Ranch live stream uh can I

82

00:03:48,789 --> 00:03:47,239

can I call you back in like 45 minutes

83

00:03:51,170 --> 00:03:48,799

yeah

84

00:03:56,350 --> 00:03:51,180

you're the best brother I'll talk to you

85

00:04:02,509 --> 00:03:59,750

with the owner of citd calls

86

00:04:05,869 --> 00:04:02,519

you know what am I going to do hang up

87

00:04:09,170 --> 00:04:05,879

on them and and then and be rude no but

88

00:04:11,630 --> 00:04:09,180

at least he said hi to you

89

00:04:13,369 --> 00:04:11,640

so there you go okay so uh so no

90

00:04:16,009 --> 00:04:13,379

drilling

91

00:04:18,890 --> 00:04:16,019

um but then and you have the list of

92

00:04:20,629 --> 00:04:18,900

names you know everybody there right

93

00:04:25,070 --> 00:04:20,639

okay

94

00:04:27,290 --> 00:04:25,080

um this episode was so good that I I

95

00:04:29,450 --> 00:04:27,300

didn't I didn't take notes normally

96

00:04:31,730 --> 00:04:29,460

because you have laws in the action

97

00:04:34,670 --> 00:04:31,740

right so you're taking notes and you're

98

00:04:39,710 --> 00:04:34,680

doing not this one had me

99

00:04:44,330 --> 00:04:39,720

fixated uh the entire time and uh so

100

00:04:47,290 --> 00:04:44,340

next up they bring in and I need you can

101  
00:04:51,170 --> 00:04:47,300  
tell everybody who he was they bring in

102  
00:04:53,870 --> 00:04:51,180  
uh a ground penetrating topography

103  
00:04:56,870 --> 00:04:53,880  
expert

104  
00:05:00,409 --> 00:04:56,880  
um and and he talks about his gear who

105  
00:05:02,390 --> 00:05:00,419  
was he what's his company and and what

106  
00:05:06,530 --> 00:05:02,400  
what was the experiment

107  
00:05:09,650 --> 00:05:06,540  
so the company is called lunasound and

108  
00:05:12,050 --> 00:05:09,660  
it was run by Jeremiah Pate who is this

109  
00:05:13,670 --> 00:05:12,060  
guy right here and what they were

110  
00:05:15,770 --> 00:05:13,680  
looking at it was an area it was an

111  
00:05:17,450 --> 00:05:15,780  
aerial piece of technology to give

112  
00:05:20,570 --> 00:05:17,460  
answers about

113  
00:05:22,909 --> 00:05:20,580

things above the ground and things below

114

00:05:25,670 --> 00:05:22,919

the ground and it was launched right at

115

00:05:27,590 --> 00:05:25,680

the triangle and it was using low

116

00:05:30,529 --> 00:05:27,600

frequency radio waves on a weather

117

00:05:33,230 --> 00:05:30,539

balloon and it would go two times as

118

00:05:39,550 --> 00:05:33,240

high as a jetliner which is about 7 000

119

00:05:42,770 --> 00:05:39,560

feet above the ring 70 is 70. yeah

120

00:05:45,050 --> 00:05:42,780

above the ranch and several kilometers

121

00:05:47,090 --> 00:05:45,060

below the surface and that's what that

122

00:05:49,850 --> 00:05:47,100

was one thing that I found really odd he

123

00:05:51,650 --> 00:05:49,860

was using both metric systems going feet

124

00:05:53,990 --> 00:05:51,660

and kilometers and I'm just like whoa

125

00:05:56,029 --> 00:05:54,000

just pick one just pick one because it's

126

00:05:58,430 --> 00:05:56,039

kind of confusing for for the rest of

127

00:06:00,830 --> 00:05:58,440

the world but aside from that this piece

128

00:06:02,210 --> 00:06:00,840

of technology was really spectacular the

129

00:06:04,790 --> 00:06:02,220

data was interesting and we're going to

130

00:06:07,129 --> 00:06:04,800

get into that but one thing that I would

131

00:06:08,749 --> 00:06:07,139

like to touch on before we continue is

132

00:06:11,570 --> 00:06:08,759

going back to the drilling

133

00:06:14,510 --> 00:06:11,580

Joe Loeb had been drilling for two weeks

134

00:06:17,870 --> 00:06:14,520

on the Mesa and he had mentioned in last

135

00:06:19,790 --> 00:06:17,880

week's episode that it was one foot per

136

00:06:21,590 --> 00:06:19,800

hour and he's been drilling for two

137

00:06:23,570 --> 00:06:21,600

weeks and there's still no answers he's

138

00:06:25,309 --> 00:06:23,580

still continuing to drill hopefully we

139

00:06:26,870 --> 00:06:25,319

will get answers in the next week's

140

00:06:28,129 --> 00:06:26,880

episode

141

00:06:35,870 --> 00:06:28,139

but

142

00:06:41,150 --> 00:06:38,930

um so you have this what Jeremiah Pate

143

00:06:43,370 --> 00:06:41,160

bring in certain technology uh

144

00:06:45,830 --> 00:06:43,380

tomographic Imaging is what he referred

145

00:06:46,730 --> 00:06:45,840

it to and he was saying that you have

146

00:06:52,129 --> 00:06:46,740

the

147

00:06:53,809 --> 00:06:52,139

please forgive me I was getting

148

00:06:55,070 --> 00:06:53,819

kilometers and meters confused but in

149

00:06:56,870 --> 00:06:55,080

this case it is the same metric system

150

00:06:57,710 --> 00:06:56,880

with kilometers and feet so I know

151  
00:06:59,870 --> 00:06:57,720  
people are like what are you talking

152  
00:07:01,670 --> 00:06:59,880  
about Christina sorry about that but

153  
00:07:04,129 --> 00:07:01,680  
going back to this

154  
00:07:06,950 --> 00:07:04,139  
um what was interesting in this scene in

155  
00:07:08,990 --> 00:07:06,960  
particular was Thomas had mentioned this

156  
00:07:12,830 --> 00:07:09,000  
technology is going to be super cool

157  
00:07:15,590 --> 00:07:12,840  
because it might be able to solidify

158  
00:07:18,590 --> 00:07:15,600  
rumors or to push away rumors of there

159  
00:07:20,450 --> 00:07:18,600  
being underground bases and tunnels and

160  
00:07:22,010 --> 00:07:20,460  
I was like that was really cool for

161  
00:07:24,110 --> 00:07:22,020  
Thomas to even bring that up because

162  
00:07:25,850 --> 00:07:24,120  
those rumors have been spread around for

163  
00:07:27,710 --> 00:07:25,860

decades

164

00:07:29,400 --> 00:07:27,720

um did we get those answers no we did

165

00:07:31,330 --> 00:07:29,410

not however

166

00:07:33,790 --> 00:07:31,340

[Music]

167

00:07:35,350 --> 00:07:33,800

oh man

168

00:07:38,570 --> 00:07:35,360

let's let's

169

00:07:42,409 --> 00:07:38,580

swing back to that okay all right let's

170

00:07:46,969 --> 00:07:42,419

let's I I know because it it ties into

171

00:07:48,770 --> 00:07:46,979

so many other things but so you can help

172

00:07:51,170 --> 00:07:48,780

but be reminded

173

00:07:55,670 --> 00:07:51,180

he says weather balloon

174

00:07:57,469 --> 00:07:55,680

data collection right 70 000 feet and

175

00:07:58,670 --> 00:07:57,479

that's what we've been shooting out of

176

00:08:00,950 --> 00:07:58,680

the sky

177

00:08:02,870 --> 00:08:00,960

right and I just thought about that I

178

00:08:06,230 --> 00:08:02,880

thought yeah the Chinese balloon we had

179

00:08:09,350 --> 00:08:06,240

the the the you know the the at that

180

00:08:12,110 --> 00:08:09,360

altitude 70 000 feet how are they going

181

00:08:15,110 --> 00:08:12,120

to control this how do you keep it

182

00:08:18,290 --> 00:08:15,120

directly above the ranch

183

00:08:22,189 --> 00:08:18,300

um 70 000 feet is high okay a commercial

184

00:08:24,290 --> 00:08:22,199

jetliner 35 000 feet 40 000 feet that's

185

00:08:27,770 --> 00:08:24,300

a commercial jetliner which at that

186

00:08:30,890 --> 00:08:27,780

altitude you can barely see so we're

187

00:08:34,550 --> 00:08:30,900

going up above that and at that height

188

00:08:37,969 --> 00:08:34,560

man I sounded like Travis Taylor and

189

00:08:42,350 --> 00:08:37,979

and to turn around and go kilometers

190

00:08:46,130 --> 00:08:42,360

below the Earth's surface and he said it

191

00:08:48,530 --> 00:08:46,140

is the most advanced detailed type of

192

00:08:51,550 --> 00:08:48,540

survey that you you can do in the world

193

00:08:54,470 --> 00:08:51,560

that this is the best equipment period

194

00:08:57,470 --> 00:08:54,480

that that right there just got my

195

00:09:00,949 --> 00:08:57,480

attention what is it now if if that's

196

00:09:03,710 --> 00:09:00,959

not playing around okay that's that is

197

00:09:07,009 --> 00:09:03,720

Brandon we're talking about bringing in

198

00:09:09,050 --> 00:09:07,019

the heavy the heavy artillery here so

199

00:09:10,670 --> 00:09:09,060

what's going to happen with that in the

200

00:09:14,329 --> 00:09:10,680

end

201  
00:09:15,889 --> 00:09:14,339  
um uh uh jumping when they showed the

202  
00:09:18,230 --> 00:09:15,899  
tracking

203  
00:09:20,810 --> 00:09:18,240  
this thing was right over the top of

204  
00:09:23,449 --> 00:09:20,820  
Skinwalker Ranch it went over the

205  
00:09:26,930 --> 00:09:23,459  
triangle right it went over the drill

206  
00:09:29,389 --> 00:09:26,940  
site it went right along the Mesa and

207  
00:09:32,150 --> 00:09:29,399  
did a little curlicue right it's up

208  
00:09:35,509 --> 00:09:32,160  
there in the wind and and then turn but

209  
00:09:38,509 --> 00:09:35,519  
they grabbed data directly above the

210  
00:09:40,730 --> 00:09:38,519  
ranch and it it tracked right there

211  
00:09:43,870 --> 00:09:40,740  
finally something

212  
00:09:48,050 --> 00:09:43,880  
um worked right right

213  
00:09:51,230 --> 00:09:48,060

and and here it is here uh now let's

214

00:09:52,990 --> 00:09:51,240

let's save the data collection uh for

215

00:09:55,250 --> 00:09:53,000

later let's Circle back to that because

216

00:09:58,250 --> 00:09:55,260

uh that happened at the end of the

217

00:10:00,310 --> 00:09:58,260

episode anyway so much happened in

218

00:10:03,370 --> 00:10:00,320

between Christina

219

00:10:05,750 --> 00:10:03,380

now I know that this is a family

220

00:10:09,530 --> 00:10:05,760

orientated show

221

00:10:13,009 --> 00:10:09,540

I'm I'm not suggesting bad language

222

00:10:14,930 --> 00:10:13,019

but I will say that what we're going to

223

00:10:17,630 --> 00:10:14,940

talk about next that I would like to

224

00:10:21,290 --> 00:10:17,640

talk about next uh was disturbing and

225

00:10:25,250 --> 00:10:21,300

they brought a sheriff who's there he is

226

00:10:27,710 --> 00:10:25,260

uh sheriff's name was Corey Reed Corey

227

00:10:33,829 --> 00:10:27,720

Reed Corey reads also a member of the

228

00:10:37,550 --> 00:10:33,839

local tribe okay and uh and he says he's

229

00:10:42,230 --> 00:10:37,560

got uh a story to share about a report

230

00:10:43,490 --> 00:10:42,240

that he filed uh with photographs uh

231

00:10:46,009 --> 00:10:43,500

what happened

232

00:10:48,530 --> 00:10:46,019

so he had mentioned first he took the

233

00:10:52,370 --> 00:10:48,540

team to the site where he had to go back

234

00:10:54,590 --> 00:10:52,380

in the early 2000s about a owner at the

235

00:10:57,170 --> 00:10:54,600

time that called in to mention that two

236

00:10:59,630 --> 00:10:57,180

horses were dead on his land

237

00:11:01,850 --> 00:10:59,640

and so when he takes a look at them he

238

00:11:04,190 --> 00:11:01,860

noticed that they at these two horses

239

00:11:07,750 --> 00:11:04,200

were cleaned out from the inside no

240

00:11:10,610 --> 00:11:07,760

tissue no organs or anything like that

241

00:11:12,710 --> 00:11:10,620

and then he also mentioned that there

242

00:11:16,610 --> 00:11:12,720

were some strange footprints around

243

00:11:18,949 --> 00:11:16,620

these horse carcasses it was it had

244

00:11:21,470 --> 00:11:18,959

three toes and it was about six inches

245

00:11:25,910 --> 00:11:21,480

in length is about the size of a hand

246

00:11:28,790 --> 00:11:25,920

and it had equal equal sized toes Dragon

247

00:11:31,430 --> 00:11:28,800

had mentioned that he didn't know of any

248

00:11:34,670 --> 00:11:31,440

creatures that could match that kind of

249

00:11:37,490 --> 00:11:34,680

description a three-toed footprint about

250

00:11:39,949 --> 00:11:37,500

being six inches in length and if

251  
00:11:42,610 --> 00:11:39,959  
anything it sounds kind of like a a type

252  
00:11:45,230 --> 00:11:42,620  
of reptile footage

253  
00:11:47,389 --> 00:11:45,240  
obviously dragon's never seen Jurassic

254  
00:11:50,170 --> 00:11:47,399  
Park but

255  
00:11:54,110 --> 00:11:50,180  
um but yeah three is six inches right

256  
00:11:57,829 --> 00:11:54,120  
and when you hear when you heard because

257  
00:12:00,850 --> 00:11:57,839  
this I mean the Visions right the

258  
00:12:05,269 --> 00:12:00,860  
pictures in your head he said the horses

259  
00:12:07,910 --> 00:12:05,279  
were cleaned out yeah which is wild

260  
00:12:09,949 --> 00:12:07,920  
because Jimmy we've done a whole show on

261  
00:12:13,250 --> 00:12:09,959  
uh cattle mutilations animal mutilations

262  
00:12:15,889 --> 00:12:13,260  
but we didn't cover any stories none

263  
00:12:17,810 --> 00:12:15,899

where everything was cleaned out the

264

00:12:19,730 --> 00:12:17,820

tissues and the organs and everything

265

00:12:20,930 --> 00:12:19,740

like that as he had mentioned that's a

266

00:12:22,850 --> 00:12:20,940

quote

267

00:12:24,769 --> 00:12:22,860

um we we've only the cases that we've

268

00:12:27,230 --> 00:12:24,779

covered the more prevalent ones are when

269

00:12:30,230 --> 00:12:27,240

they removed certain organs the tongues

270

00:12:33,110 --> 00:12:30,240

things like this but in this case for uh

271

00:12:36,730 --> 00:12:33,120

Mr Reed here he says that everything was

272

00:12:41,269 --> 00:12:39,710

right thank you Olivia

273

00:12:43,670 --> 00:12:41,279

thank you for that and thank you so much

274

00:12:45,949 --> 00:12:43,680

Cindy as well I can't wait to see the

275

00:12:47,870 --> 00:12:45,959

rest of the data me neither I felt a

276

00:12:51,970 --> 00:12:47,880

little short-handed with the data that

277

00:12:56,509 --> 00:12:51,980

we received but we will be getting more

278

00:12:57,949 --> 00:12:56,519

okay so the the prom okay all right I I

279

00:13:00,829 --> 00:12:57,959

don't want to jump ahead I don't want to

280

00:13:04,250 --> 00:13:00,839

jump ahead but to the data no the data

281

00:13:07,790 --> 00:13:04,260

that was the preliminary data that has

282

00:13:10,269 --> 00:13:07,800

come in is Crazy Town stuff okay crazy

283

00:13:14,750 --> 00:13:10,279

town and it's not even the big news

284

00:13:17,269 --> 00:13:14,760

right so not no no this this was a great

285

00:13:20,030 --> 00:13:17,279

episode okay so but when you hear that

286

00:13:24,350 --> 00:13:20,040

right cleaned out from the inside what

287

00:13:26,329 --> 00:13:24,360

is he saying you know what what's what's

288

00:13:29,930 --> 00:13:26,339

cleaned out

289

00:13:32,090 --> 00:13:29,940

that's what does that in nature

290

00:13:34,490 --> 00:13:32,100

yeah it seems like we would hear about

291

00:13:37,790 --> 00:13:34,500

stuff like this all the time if that was

292

00:13:41,810 --> 00:13:37,800

the case right that certain Predators or

293

00:13:44,629 --> 00:13:41,820

insects or birds or whatever uh eat

294

00:13:47,090 --> 00:13:44,639

animals in this fashion right and we

295

00:13:48,350 --> 00:13:47,100

would hear and see I've never heard of

296

00:13:52,269 --> 00:13:48,360

this before

297

00:13:54,710 --> 00:13:52,279

totally cleaned out from the inside

298

00:13:56,690 --> 00:13:54,720

disturbing oh definitely and then

299

00:13:59,030 --> 00:13:56,700

another odd aspect about this particular

300

00:14:01,190 --> 00:13:59,040

Story by Mr Reed is that when he had

301  
00:14:03,410 --> 00:14:01,200  
filed the report he sent in the pictures

302  
00:14:06,230 --> 00:14:03,420  
he went to go check on that report a few

303  
00:14:09,410 --> 00:14:06,240  
months later and it had disappeared both

304  
00:14:11,509 --> 00:14:09,420  
Reed and Caleb bench had mentioned that

305  
00:14:14,269 --> 00:14:11,519  
because they both work for the police

306  
00:14:16,250 --> 00:14:14,279  
department they mentioned that they have

307  
00:14:18,710 --> 00:14:16,260  
heard stories very similar to the one

308  
00:14:20,750 --> 00:14:18,720  
that Reed had related to the team where

309  
00:14:23,569 --> 00:14:20,760  
when they encount when they speak to a

310  
00:14:26,269 --> 00:14:23,579  
higher up and relay their story that

311  
00:14:29,690 --> 00:14:26,279  
information vanishes and or they are

312  
00:14:32,389 --> 00:14:29,700  
told to erase that those pictures the

313  
00:14:33,290 --> 00:14:32,399

videos and to get rid of the report as

314

00:14:36,970 --> 00:14:33,300

well

315

00:14:40,069 --> 00:14:36,980

yeah yeah crazy crazy just just just

316

00:14:43,970 --> 00:14:40,079

nuts just nuts

317

00:14:46,550 --> 00:14:43,980

um and uh okay so uh I'm looking at the

318

00:14:48,889 --> 00:14:46,560

clock we've got so much to cover uh uh

319

00:14:52,069 --> 00:14:48,899

in this episode what's next for you

320

00:14:53,090 --> 00:14:52,079

well then they bring in David Mason on

321

00:14:55,910 --> 00:14:53,100

again

322

00:14:59,030 --> 00:14:55,920

to bring him bring in his thermal

323

00:15:01,850 --> 00:14:59,040

technology that he had created and to

324

00:15:03,769 --> 00:15:01,860

watch the skies while the rest of the

325

00:15:06,650 --> 00:15:03,779

team conducts experiments very

326

00:15:08,810 --> 00:15:06,660

specifically Travis and Caleb launch

327

00:15:11,509 --> 00:15:08,820

rockets and fireworks in this case he

328

00:15:12,949 --> 00:15:11,519

refers them to as mortar and to

329

00:15:15,230 --> 00:15:12,959

hopefully

330

00:15:18,110 --> 00:15:15,240

um stimulate another blob anomaly that

331

00:15:21,370 --> 00:15:18,120

they captured a few episodes ago or to

332

00:15:24,170 --> 00:15:21,380

simulate more UAP sightings

333

00:15:25,730 --> 00:15:24,180

when it was first of all it was still

334

00:15:27,530 --> 00:15:25,740

great to see David Mason on the show

335

00:15:29,990 --> 00:15:27,540

again and for him to just go into a

336

00:15:33,230 --> 00:15:30,000

little bit more detail on uh his his

337

00:15:35,329 --> 00:15:33,240

work in the sense of like his um his

338

00:15:37,009 --> 00:15:35,339

equipment right and his tests compared

339

00:15:41,269 --> 00:15:37,019

to the last time he was on so that was

340

00:15:43,370 --> 00:15:41,279

great but what we were looking at and to

341

00:15:46,310 --> 00:15:43,380

be clear David Mason was using special

342

00:15:48,590 --> 00:15:46,320

Fleur equipment but he is also an

343

00:15:51,410 --> 00:15:48,600

inventor and he customizes his equipment

344

00:15:52,970 --> 00:15:51,420

as well but they were they were looking

345

00:15:55,250 --> 00:15:52,980

at the skies to see if they would

346

00:15:57,710 --> 00:15:55,260

capture anything and during the time of

347

00:16:01,129 --> 00:15:57,720

the very first experiment when Travis

348

00:16:02,350 --> 00:16:01,139

and Caleb launched both the rocket and

349

00:16:05,509 --> 00:16:02,360

the mortar

350

00:16:07,670 --> 00:16:05,519

they crashed into each other and Eric

351

00:16:10,430 --> 00:16:07,680

mentioned that it was like shooting a

352

00:16:12,129 --> 00:16:10,440

bullet with a bullet the statistics are

353

00:16:15,769 --> 00:16:12,139

incredibly low

354

00:16:18,829 --> 00:16:15,779

completely now when they fired those off

355

00:16:22,430 --> 00:16:18,839

you're right the it's fireworks they

356

00:16:27,110 --> 00:16:22,440

they say mortar okay all right

357

00:16:29,530 --> 00:16:27,120

um but they fight and these things hit

358

00:16:33,710 --> 00:16:29,540

each other and

359

00:16:35,629 --> 00:16:33,720

it would be very similar I mean the

360

00:16:39,110 --> 00:16:35,639

concept of hitting a bullet with a

361

00:16:42,170 --> 00:16:39,120

bullet and the odds of that happening I

362

00:16:44,470 --> 00:16:42,180

it's astronomical now they're not going

363

00:16:47,930 --> 00:16:44,480

at the speed of a but they're still fast

364

00:16:49,850 --> 00:16:47,940

and they're on their own uh trajectories

365

00:16:53,030 --> 00:16:49,860

and everything else but to have them hit

366

00:16:56,689 --> 00:16:53,040

at again that same altitude where

367

00:16:59,449 --> 00:16:56,699

everything else seems to go wonky

368

00:17:01,850 --> 00:16:59,459

right and that I thought that that was

369

00:17:05,470 --> 00:17:01,860

incredible so they launched and they

370

00:17:07,970 --> 00:17:05,480

literally go boom and and hit each other

371

00:17:10,370 --> 00:17:07,980

in mid-air

372

00:17:13,130 --> 00:17:10,380

um they did another launch uh a little

373

00:17:17,329 --> 00:17:13,140

bit later that they didn't launch them

374

00:17:19,490 --> 00:17:17,339

at the same time and uh so that would

375

00:17:21,710 --> 00:17:19,500

that was successful but the reason for

376

00:17:25,309 --> 00:17:21,720

the second one they were trying to

377

00:17:28,189 --> 00:17:25,319

they're trying to pinpoint this 1.6

378

00:17:29,510 --> 00:17:28,199

right and they're trying to triangulate

379

00:17:31,130 --> 00:17:29,520

on that and they're trying to get this

380

00:17:34,250 --> 00:17:31,140

reaction and they're trying to make this

381

00:17:38,450 --> 00:17:34,260

happen so while they're doing that

382

00:17:39,590 --> 00:17:38,460

um they detect and see a light off in

383

00:17:42,830 --> 00:17:39,600

the distance

384

00:17:43,730 --> 00:17:42,840

um the flear is showing this light here

385

00:17:46,730 --> 00:17:43,740

it is

386

00:17:48,770 --> 00:17:46,740

heating up and cooling down heating up

387

00:17:51,529 --> 00:17:48,780

and cooling down heating up and cooling

388

00:17:55,070 --> 00:17:51,539

down when they did so they did the

389

00:17:58,669 --> 00:17:55,080

second launch hoping to to continue this

390

00:18:01,850 --> 00:17:58,679

experiment they did this at the moment

391

00:18:04,789 --> 00:18:01,860

they launched it stopped

392

00:18:06,350 --> 00:18:04,799

now again it's just like well what is it

393

00:18:08,090 --> 00:18:06,360

you know it could be a coincidence it

394

00:18:12,470 --> 00:18:08,100

could be that it's you know it's it's

395

00:18:15,409 --> 00:18:12,480

just strange that's all if I was there

396

00:18:20,049 --> 00:18:15,419

I would be scratching my head just like

397

00:18:22,909 --> 00:18:20,059

everybody else's it it's just like uh

398

00:18:26,750 --> 00:18:22,919

it's become the normal

399

00:18:28,909 --> 00:18:26,760

right it's just become expected just

400

00:18:31,669 --> 00:18:28,919

weird stuff happening

401  
00:18:34,810 --> 00:18:31,679  
um all the time and in this case

402  
00:18:38,150 --> 00:18:34,820  
second launch the launch goes off fine

403  
00:18:41,390 --> 00:18:38,160  
the uh the mortar right all that

404  
00:18:43,250 --> 00:18:41,400  
launches and then the anomaly that was

405  
00:18:45,049 --> 00:18:43,260  
lighting up heating up and cooling down

406  
00:18:46,970 --> 00:18:45,059  
in the background it just stopped and

407  
00:18:51,230 --> 00:18:46,980  
they never located it and found its

408  
00:18:53,990 --> 00:18:51,240  
source no and going back to the first

409  
00:18:56,930 --> 00:18:54,000  
launch it was believed by Travis that

410  
00:18:59,570 --> 00:18:56,940  
the that when the two things hit it was

411  
00:19:01,610 --> 00:18:59,580  
about 30 feet off the ground and this is

412  
00:19:04,130 --> 00:19:01,620  
a consistent theme where when things

413  
00:19:06,110 --> 00:19:04,140

launch it just makes it to about 30 feet

414

00:19:08,090 --> 00:19:06,120

and then it crashes not the case for

415

00:19:11,090 --> 00:19:08,100

everything but the ones that have failed

416

00:19:14,150 --> 00:19:11,100

are kind of in that range now was that

417

00:19:16,070 --> 00:19:14,160

measured no it was not but that was what

418

00:19:18,590 --> 00:19:16,080

Travis saw with his own eyes and he

419

00:19:21,710 --> 00:19:18,600

thought to himself that was about 30

420

00:19:24,710 --> 00:19:21,720

feet off the ground yeah yeah crazy I'm

421

00:19:28,070 --> 00:19:24,720

just crazy crazy crazy I have an open

422

00:19:30,350 --> 00:19:28,080

mind and I and I do my best to remain

423

00:19:32,570 --> 00:19:30,360

objective and like stay in the middle

424

00:19:35,210 --> 00:19:32,580

and let's just collect the data and

425

00:19:37,850 --> 00:19:35,220

let's enjoy the strangeness and let's go

426

00:19:39,770 --> 00:19:37,860

this stuff you know and this is

427

00:19:41,750 --> 00:19:39,780

different than other TV shows and other

428

00:19:44,330 --> 00:19:41,760

things that are going on this is some

429

00:19:47,510 --> 00:19:44,340

pretty high-tech equipment

430

00:19:48,770 --> 00:19:47,520

um heavy funding going in behind what is

431

00:19:52,669 --> 00:19:48,780

happening here

432

00:19:55,549 --> 00:19:52,679

with crazy crazy crazy crazy data

433

00:19:59,690 --> 00:19:55,559

coming back and then Brilliant Minds as

434

00:20:02,750 --> 00:19:59,700

well yeah yeah yeah yeah yeah yeah I'm

435

00:20:05,930 --> 00:20:02,760

not there but see the thing is that now

436

00:20:10,250 --> 00:20:05,940

also we've got uh uh another aircraft

437

00:20:12,710 --> 00:20:10,260

that flew over uh during this testing uh

438

00:20:16,310 --> 00:20:12,720

that's not showing up in the flight

439

00:20:18,950 --> 00:20:16,320

tracking software uh again just

440

00:20:22,190 --> 00:20:18,960

absolutely uh strange

441

00:20:24,289 --> 00:20:22,200

that was an odd detail and then here's

442

00:20:26,510 --> 00:20:24,299

another anomaly that they saw here the

443

00:20:28,490 --> 00:20:26,520

little cows which is so cute and then

444

00:20:31,010 --> 00:20:28,500

they they find something very odd uh

445

00:20:33,650 --> 00:20:31,020

through the thermal imaging as well and

446

00:20:35,930 --> 00:20:33,660

then near the end of the episode they

447

00:20:38,150 --> 00:20:35,940

begin to dissect the data that was

448

00:20:40,190 --> 00:20:38,160

collected by Jeremiah Pate who is right

449

00:20:44,570 --> 00:20:40,200

here on the other side of the screen

450

00:20:46,730 --> 00:20:44,580

this guy and he mentioned that he hadn't

451  
00:20:49,310 --> 00:20:46,740  
seen anything like this before and that

452  
00:20:51,409 --> 00:20:49,320  
is something that we hear almost every

453  
00:20:53,690 --> 00:20:51,419  
single time an expert comes on the ranch

454  
00:20:55,789 --> 00:20:53,700  
they collect the data they analyze the

455  
00:20:58,270 --> 00:20:55,799  
data and they say I've never seen

456  
00:21:01,430 --> 00:20:58,280  
anything like this

457  
00:21:06,110 --> 00:21:01,440  
so okay so now

458  
00:21:09,529 --> 00:21:06,120  
um I was expecting uh I really enjoyed

459  
00:21:12,409 --> 00:21:09,539  
this data by the way but I was expecting

460  
00:21:14,990 --> 00:21:12,419  
the third the thermal imaging the topic

461  
00:21:17,810 --> 00:21:15,000  
you know the he I think he called it

462  
00:21:22,549 --> 00:21:17,820  
what do you call it slows homographic no

463  
00:21:24,650 --> 00:21:22,559

slow speed radar or just it's it's

464

00:21:27,470 --> 00:21:24,660

anyway

465

00:21:31,190 --> 00:21:27,480

um I was expecting the Imaging right

466

00:21:34,490 --> 00:21:31,200

from Kilometers under the ground no he

467

00:21:36,970 --> 00:21:34,500

flashes up on the screen some charts

468

00:21:39,909 --> 00:21:36,980

there they are okay

469

00:21:43,970 --> 00:21:39,919

so uh

470

00:21:46,430 --> 00:21:43,980

go uh to the zoom in on the one on the

471

00:21:52,610 --> 00:21:51,350

okay so this is the electronic field

472

00:21:55,909 --> 00:21:52,620

data

473

00:21:59,510 --> 00:21:55,919

and you see these jumps and you see

474

00:22:02,330 --> 00:21:59,520

these dips in it okay very specific okay

475

00:22:07,010 --> 00:22:02,340

go to the image on the right

476

00:22:10,490 --> 00:22:07,020

and that's the magnetic field data and

477

00:22:14,630 --> 00:22:10,500

at the same moments during the same time

478

00:22:17,510 --> 00:22:14,640

period okay they are affecting each

479

00:22:19,909 --> 00:22:17,520

other in opposites which is a weird

480

00:22:22,490 --> 00:22:19,919

which is a weird

481

00:22:24,950 --> 00:22:22,500

you know at that same moment or you're

482

00:22:27,970 --> 00:22:24,960

seeing a the magnetic field or the

483

00:22:32,230 --> 00:22:27,980

electric field here it is here affecting

484

00:22:35,590 --> 00:22:32,240

apparently each other at the same time

485

00:22:38,630 --> 00:22:35,600

is one affecting the other and again

486

00:22:43,430 --> 00:22:38,640

this is something that

487

00:22:45,649 --> 00:22:43,440

um a scientist uh an engineer would go

488

00:22:48,590 --> 00:22:45,659

okay what's the correlation here what's

489

00:22:51,529 --> 00:22:48,600

the connection uh you you can see it

490

00:22:53,630 --> 00:22:51,539

happening but what is causing it this is

491

00:22:56,930 --> 00:22:53,640

very strange

492

00:23:00,590 --> 00:22:56,940

um a very technical information

493

00:23:05,990 --> 00:23:00,600

um but now back back out do you have the

494

00:23:08,870 --> 00:23:06,000

image of the location of the timing

495

00:23:13,730 --> 00:23:08,880

where he had the black lines coming down

496

00:23:15,169 --> 00:23:13,740

no okay okay so uh what's the owner of

497

00:23:19,730 --> 00:23:15,179

the company's name

498

00:23:25,130 --> 00:23:19,740

Jeremiah Pate okay so Jeremiah does this

499

00:23:27,909 --> 00:23:25,140

location thing so he's got uh a line on

500

00:23:30,169 --> 00:23:27,919

them on on a map of where the balloon is

501  
00:23:34,909 --> 00:23:30,179  
okay all right

502  
00:23:36,430 --> 00:23:34,919  
and then where the balloon is

503  
00:23:38,990 --> 00:23:36,440  
okay

504  
00:23:42,710 --> 00:23:39,000  
on the

505  
00:23:45,710 --> 00:23:42,720  
the discrepancies in the data okay and

506  
00:23:47,390 --> 00:23:45,720  
so when it's over the drill site

507  
00:23:55,850 --> 00:23:47,400  
you see it

508  
00:23:58,370 --> 00:23:55,860  
see these changes in the data that are

509  
00:24:01,610 --> 00:23:58,380  
directly above and that's where it's

510  
00:24:04,310 --> 00:24:01,620  
being picked up that is and the drill

511  
00:24:05,630 --> 00:24:04,320  
site and what's going on there you know

512  
00:24:06,230 --> 00:24:05,640  
now

513  
00:24:08,149 --> 00:24:06,240

um

514

00:24:12,409 --> 00:24:08,159

and we're not even getting to the crazy

515

00:24:15,350 --> 00:24:12,419

stuff but here here is what I thought

516

00:24:18,590 --> 00:24:15,360

yeah that's it that's the image okay so

517

00:24:20,270 --> 00:24:18,600

over on the left that's the drill site

518

00:24:22,610 --> 00:24:20,280

and you can see when it was over the

519

00:24:23,870 --> 00:24:22,620

drill site was happening there you can

520

00:24:28,970 --> 00:24:23,880

see

521

00:24:30,529 --> 00:24:28,980

triangle look at the triangle look what

522

00:24:32,149 --> 00:24:30,539

happens you know when it's over the

523

00:24:37,430 --> 00:24:32,159

triangle

524

00:24:39,190 --> 00:24:37,440

um and the uh uh but here is the the for

525

00:24:41,930 --> 00:24:39,200

me

526

00:24:45,409 --> 00:24:41,940

the the crazy part that is happening

527

00:24:49,130 --> 00:24:45,419

over the drill site could it be caused

528

00:24:51,169 --> 00:24:49,140

by the drill equipment

529

00:24:54,289 --> 00:24:51,179

okay all right all right all right now

530

00:24:58,370 --> 00:24:54,299

all I'm suggesting here is there is a

531

00:25:01,070 --> 00:24:58,380

lot of gear that is there or

532

00:25:03,470 --> 00:25:01,080

is the gear already gone are they done

533

00:25:05,810 --> 00:25:03,480

with the drilling right I I don't know

534

00:25:07,250 --> 00:25:05,820

I'm not there I'm not on location right

535

00:25:09,350 --> 00:25:07,260

right I don't know when the production

536

00:25:11,630 --> 00:25:09,360

equipment is there Christina when they

537

00:25:13,610 --> 00:25:11,640

are there filming have they already

538

00:25:15,590 --> 00:25:13,620

filmed you know did they complete the

539

00:25:18,049 --> 00:25:15,600

drill experiment so when they because

540

00:25:21,049 --> 00:25:18,059

all they said here was it that was the

541

00:25:23,210 --> 00:25:21,059

drill site now if it's the drill site

542

00:25:25,430 --> 00:25:23,220

with the drill and everything that is

543

00:25:28,250 --> 00:25:25,440

involved with that you have engines and

544

00:25:29,930 --> 00:25:28,260

magnets and electronics and and and

545

00:25:32,870 --> 00:25:29,940

stuff

546

00:25:34,909 --> 00:25:32,880

um that could maybe cause this is it the

547

00:25:38,870 --> 00:25:34,919

heavy equipment that's on the site or or

548

00:25:42,830 --> 00:25:38,880

not I don't know but it is strange that

549

00:25:45,769 --> 00:25:42,840

the timing of this is specific to

550

00:25:48,230 --> 00:25:45,779

location it's it's it's pretty strange

551

00:25:49,430 --> 00:25:48,240

it's it's an amazing set of data

552

00:25:52,490 --> 00:25:49,440

collection

553

00:25:54,830 --> 00:25:52,500

and what Jeremiah also mentioned is that

554

00:25:58,190 --> 00:25:54,840

they lost a quarter of a second of time

555

00:26:00,230 --> 00:25:58,200

bringing in the time anomaly aspect that

556

00:26:01,669 --> 00:26:00,240

Travis has a mentioned not only on the

557

00:26:04,610 --> 00:26:01,679

show but also in the panel discussion

558

00:26:07,370 --> 00:26:04,620

here on this channel as well and he

559

00:26:09,169 --> 00:26:07,380

Jeremiah mentioned that he had never

560

00:26:11,390 --> 00:26:09,179

witnessed that before with his equipment

561

00:26:13,850 --> 00:26:11,400

while conducting tests that was a new

562

00:26:16,610 --> 00:26:13,860

thing and Travis said it's like a

563

00:26:18,350 --> 00:26:16,620

wrinkle in space and time that something

564

00:26:20,630 --> 00:26:18,360

on the ranch is causing something

565

00:26:23,390 --> 00:26:20,640

something like this to happen and then

566

00:26:26,510 --> 00:26:23,400

Thomas sprinkled the idea asking if

567

00:26:28,190 --> 00:26:26,520

there's a portal and my ears got got so

568

00:26:31,430 --> 00:26:28,200

big in that moment and I said yes

569

00:26:33,710 --> 00:26:31,440

portals love portals but it is something

570

00:26:35,390 --> 00:26:33,720

that has been questioned for a long

571

00:26:38,210 --> 00:26:35,400

period of time and then near the end

572

00:26:40,250 --> 00:26:38,220

Travis brings the connection between the

573

00:26:42,649 --> 00:26:40,260

Native American legends of portals being

574

00:26:45,769 --> 00:26:42,659

on the ranch with the data collected

575

00:26:47,570 --> 00:26:45,779

from today and I thought

576  
00:26:49,789 --> 00:26:47,580  
that was a really interesting

577  
00:26:52,149 --> 00:26:49,799  
correlation that was made bringing in

578  
00:26:56,269 --> 00:26:52,159  
the past with the present

579  
00:26:58,430 --> 00:26:56,279  
okay a quarter of a second

580  
00:27:02,990 --> 00:26:58,440  
sounds short

581  
00:27:04,310 --> 00:27:03,000  
in science a quarter of a second is an

582  
00:27:08,029 --> 00:27:04,320  
eternity

583  
00:27:10,850 --> 00:27:08,039  
that is a big chunk of time and so

584  
00:27:13,690 --> 00:27:10,860  
Jeremiah and his team you know they're

585  
00:27:17,570 --> 00:27:13,700  
looking at the data and

586  
00:27:20,750 --> 00:27:17,580  
suddenly their clocks are off

587  
00:27:22,130 --> 00:27:20,760  
by a quarter of a second

588  
00:27:23,750 --> 00:27:22,140

now

589

00:27:26,990 --> 00:27:23,760

um remember

590

00:27:28,870 --> 00:27:27,000

um I just had Pete on the show uh and

591

00:27:32,090 --> 00:27:28,880

he's been talking about these GPS

592

00:27:35,330 --> 00:27:32,100

anomalies uh you know stuff showing up

593

00:27:38,510 --> 00:27:35,340

underground in the GPS and and and

594

00:27:41,450 --> 00:27:38,520

things just going crazy in the data

595

00:27:43,330 --> 00:27:41,460

collection and then when you hear

596

00:27:47,470 --> 00:27:43,340

something like this

597

00:27:51,890 --> 00:27:47,480

that you're equipped because I I again

598

00:27:56,510 --> 00:27:51,900

this needs to be understood

599

00:28:01,549 --> 00:27:56,520

if if there were places on this planet

600

00:28:04,909 --> 00:28:01,559

where GPS and sensor systems are off

601  
00:28:06,769 --> 00:28:04,919  
by things like a quarter of a second you

602  
00:28:08,390 --> 00:28:06,779  
wouldn't be able to drive cars you would

603  
00:28:10,850 --> 00:28:08,400  
need you wouldn't be able to have a

604  
00:28:13,669 --> 00:28:10,860  
train system a trucking system a

605  
00:28:17,269 --> 00:28:13,679  
logistics Network GPS a satellites

606  
00:28:20,390 --> 00:28:17,279  
location data airplanes everything would

607  
00:28:21,710 --> 00:28:20,400  
be off not by not that quarter second

608  
00:28:23,990 --> 00:28:21,720  
that we're talking about here we're

609  
00:28:26,690 --> 00:28:24,000  
talking about miles

610  
00:28:29,330 --> 00:28:26,700  
miles imagine you driving down the

611  
00:28:33,649 --> 00:28:29,340  
street and your GPS tells you to turn

612  
00:28:36,769 --> 00:28:33,659  
a three blocks short of where you're

613  
00:28:39,649 --> 00:28:36,779

supposed to turn it's like that okay

614

00:28:40,970 --> 00:28:39,659

it's a quarter of a second now does this

615

00:28:44,930 --> 00:28:40,980

suggest

616

00:28:46,970 --> 00:28:44,940

I have never heard I I personally and I

617

00:28:49,269 --> 00:28:46,980

do a lot of research in this I have

618

00:28:52,549 --> 00:28:49,279

never heard of this happening

619

00:28:54,049 --> 00:28:52,559

anywhere now we do atomic clock

620

00:28:58,930 --> 00:28:54,059

measurements

621

00:29:03,890 --> 00:28:58,940

we do this so we measure a watch a clock

622

00:29:06,350 --> 00:29:03,900

uh at at a certain altitude and then go

623

00:29:09,409 --> 00:29:06,360

up to Mount Everest and and measure and

624

00:29:11,710 --> 00:29:09,419

you come up with you know trillions of a

625

00:29:14,750 --> 00:29:11,720

second indifference because of gravity

626

00:29:16,549 --> 00:29:14,760

and and Newton knew this and others knew

627

00:29:19,070 --> 00:29:16,559

this and and when we put the GPS

628

00:29:22,130 --> 00:29:19,080

satellites up in space

629

00:29:23,750 --> 00:29:22,140

you have to understand their clocks are

630

00:29:26,090 --> 00:29:23,760

running different than the clocks down

631

00:29:29,269 --> 00:29:26,100

here on Earth so the software has to be

632

00:29:32,149 --> 00:29:29,279

written into those GPS satellites to

633

00:29:36,549 --> 00:29:32,159

compensate for the difference in time

634

00:29:38,930 --> 00:29:36,559

and how how time works and how it exists

635

00:29:41,269 --> 00:29:38,940

okay do you understand what I'm saying

636

00:29:43,549 --> 00:29:41,279

yeah and we're talking about Mill

637

00:29:47,389 --> 00:29:43,559

billions of a second

638

00:29:48,409 --> 00:29:47,399

and here at Skinwalker Ranch it's a

639

00:29:52,070 --> 00:29:48,419

quarter

640

00:29:53,570 --> 00:29:52,080

of a second not Millions

641

00:29:59,810 --> 00:29:53,580

a quarter

642

00:30:02,029 --> 00:29:59,820

doors to so many things and Travis when

643

00:30:04,370 --> 00:30:02,039

Travis went well you know wormholes and

644

00:30:06,830 --> 00:30:04,380

well you know what he's not wrong

645

00:30:08,529 --> 00:30:06,840

he's not wrong the The Vortex

646

00:30:12,590 --> 00:30:08,539

conversation

647

00:30:13,730 --> 00:30:12,600

is something that is really like for

648

00:30:16,310 --> 00:30:13,740

real now

649

00:30:18,710 --> 00:30:16,320

a quarter of a second now could it be

650

00:30:20,810 --> 00:30:18,720

something in in in the system could it

651  
00:30:21,830 --> 00:30:20,820  
be something in the software again I've

652  
00:30:27,409 --> 00:30:21,840  
never heard

653  
00:30:31,610 --> 00:30:27,419  
would be a disaster Christina if if

654  
00:30:35,090 --> 00:30:31,620  
suddenly the GPS and location software

655  
00:30:37,630 --> 00:30:35,100  
and clocks on this planet are running a

656  
00:30:42,409 --> 00:30:37,640  
quarter second off because of location

657  
00:30:43,909 --> 00:30:42,419  
it's a this is a big big deal I I that's

658  
00:30:46,850 --> 00:30:43,919  
why I think this was the best episode

659  
00:30:50,029 --> 00:30:46,860  
yet that little detail I wish it had

660  
00:30:51,649 --> 00:30:50,039  
more time that the show focused on

661  
00:30:53,269 --> 00:30:51,659  
because you're right and you bring up

662  
00:30:54,769 --> 00:30:53,279  
really great examples giving people a

663  
00:30:56,690 --> 00:30:54,779

great Foundation to get a better

664

00:30:59,450 --> 00:30:56,700

understanding of what that really means

665

00:31:01,370 --> 00:30:59,460

because it's incredibly significant and

666

00:31:03,289 --> 00:31:01,380

and Travis was shocked to hear that Eric

667

00:31:05,870 --> 00:31:03,299

was shocked to hear that they understood

668

00:31:08,690 --> 00:31:05,880

the significance but I'm not sure if the

669

00:31:11,090 --> 00:31:08,700

audience really understood how important

670

00:31:13,970 --> 00:31:11,100

just hearing that little that that one

671

00:31:16,310 --> 00:31:13,980

sentence how important that was but

672

00:31:18,470 --> 00:31:16,320

overall as you had mentioned it was a

673

00:31:20,630 --> 00:31:18,480

really great episode we got to see a lot

674

00:31:23,690 --> 00:31:20,640

of experiments we got to hear stories we

675

00:31:26,330 --> 00:31:23,700

got to see data as well and there's only

676

00:31:28,970 --> 00:31:26,340

more to come there was that teaser of

677

00:31:30,830 --> 00:31:28,980

the drilling with no answers and he uh

678

00:31:32,810 --> 00:31:30,840

Jeremiah did mention that he was going

679

00:31:35,389 --> 00:31:32,820

to keep the team in the loop when they

680

00:31:36,649 --> 00:31:35,399

continue and finish analyzing the rest

681

00:31:38,389 --> 00:31:36,659

of the data because I didn't they didn't

682

00:31:40,850 --> 00:31:38,399

do all of it from my understanding I

683

00:31:43,669 --> 00:31:40,860

could be wrong there but I would like to

684

00:31:47,450 --> 00:31:43,679

see more data that comes forward from

685

00:31:50,870 --> 00:31:47,460

that team in particular yeah exciting it

686

00:31:54,110 --> 00:31:50,880

just it's just exciting that quarter of

687

00:31:56,930 --> 00:31:54,120

a second is uh is is a really really

688

00:32:00,350 --> 00:31:56,940

really really big deal I was looking at

689

00:32:02,570 --> 00:32:00,360

zenzabel uh zanzibil zenzabel

690

00:32:06,830 --> 00:32:02,580

Senator Bill saying you know yeah there

691

00:32:09,529 --> 00:32:06,840

has been uh discrepancies and GPS data

692

00:32:14,029 --> 00:32:09,539

over the years uh and glitches of course

693

00:32:17,450 --> 00:32:14,039

yeah lots lots lots lots but uh but

694

00:32:19,610 --> 00:32:17,460

nothing uh like a quarter of a second no

695

00:32:22,310 --> 00:32:19,620

nothing like that and Cindy thank you so

696

00:32:24,769 --> 00:32:22,320

much I put a poll up Jimmy uh on the

697

00:32:27,769 --> 00:32:24,779

channel and there's uh on my channel on

698

00:32:30,169 --> 00:32:27,779

YouTube and it has 103 votes and I asked

699

00:32:32,750 --> 00:32:30,179

how did this episode rate for you in

700

00:32:37,430 --> 00:32:32,760

regards to experimentation and Science

701  
00:32:43,010 --> 00:32:37,440  
and 46 said 80 to 100 really satisfied

702  
00:32:46,090 --> 00:32:43,020  
29 said 60 to 80 satisfied 10 said 40 to

703  
00:32:49,730 --> 00:32:46,100  
60 percent average amount and then 16

704  
00:32:52,970 --> 00:32:49,740  
said zero to forty percent wished for

705  
00:32:56,230 --> 00:32:52,980  
more okay now hold on for a second and

706  
00:32:59,570 --> 00:32:56,240  
you get some feedback hold on hold on

707  
00:33:02,269 --> 00:32:59,580  
here okay I'm back

708  
00:33:04,310 --> 00:33:02,279  
um let me get to this okay let's see

709  
00:33:08,210 --> 00:33:04,320  
really satisfied satisfied average

710  
00:33:10,070 --> 00:33:08,220  
amount wish for more okay

711  
00:33:12,830 --> 00:33:10,080  
um well

712  
00:33:17,690 --> 00:33:12,840  
he should have been best best should

713  
00:33:22,009 --> 00:33:17,700

have been was this the anyway uh uh yeah

714

00:33:24,769 --> 00:33:22,019

okay I I obviously really satisfied

715

00:33:30,409 --> 00:33:24,779

um pretty good results right there 46 46

716

00:33:34,909 --> 00:33:30,419

30 10 15 wished for more yeah

717

00:33:37,850 --> 00:33:34,919

you got to do that now okay

718

00:33:40,330 --> 00:33:37,860

I want you to grasp hold of something

719

00:33:43,070 --> 00:33:40,340

for a second

720

00:33:44,649 --> 00:33:43,080

autonomous driving

721

00:33:47,389 --> 00:33:44,659

right

722

00:33:50,930 --> 00:33:47,399

autonomous driving

723

00:33:52,490 --> 00:33:50,940

taxi pulls up Uber no driver in it pulls

724

00:33:53,750 --> 00:33:52,500

up in front of your house you jump in

725

00:33:56,750 --> 00:33:53,760

the back seat and you head to the

726

00:33:58,669 --> 00:33:56,760

airport right you know that's the goal

727

00:34:00,230 --> 00:33:58,679

right we've seen it how many right

728

00:34:02,630 --> 00:34:00,240

that's the goal that's science fiction

729

00:34:05,090 --> 00:34:02,640

that's that's it right you get your new

730

00:34:06,830 --> 00:34:05,100

Tesla hands off the wheel you're talking

731

00:34:09,169 --> 00:34:06,840

to your friends in the back seat you're

732

00:34:12,349 --> 00:34:09,179

not even watching where you're going

733

00:34:14,510 --> 00:34:12,359

right autonomous driving

734

00:34:16,129 --> 00:34:14,520

imagine if that was off by a quarter of

735

00:34:19,430 --> 00:34:16,139

a second

736

00:34:20,810 --> 00:34:19,440

right because that's what we're talking

737

00:34:24,050 --> 00:34:20,820

about

738

00:34:26,690 --> 00:34:24,060

it's just a quarter of a second quarter

739

00:34:28,930 --> 00:34:26,700

of a second the entire planet would just

740

00:34:33,770 --> 00:34:28,940

be crashing into each other things

741

00:34:36,710 --> 00:34:33,780

everything it would be over so let's see

742

00:34:40,490 --> 00:34:36,720

if it's part of the data is it part of

743

00:34:42,589 --> 00:34:40,500

uh an anomaly is there a glitch in the

744

00:34:45,770 --> 00:34:42,599

system is it the software or the

745

00:34:47,510 --> 00:34:45,780

sensor's a little wonky don't know but a

746

00:34:48,409 --> 00:34:47,520

quarter of a second in the world of

747

00:34:51,470 --> 00:34:48,419

science

748

00:34:53,930 --> 00:34:51,480

is big and it's a big deal and if it

749

00:34:57,349 --> 00:34:53,940

turns out to be a quarter of a second

750

00:34:59,450 --> 00:34:57,359

off there at Skinwalker Ranch we founded

751

00:35:01,730 --> 00:34:59,460

something for real it was a great

752

00:35:03,710 --> 00:35:01,740

episode it was and if you enjoyed the

753

00:35:05,870 --> 00:35:03,720

review that Jimmy and I did hit the like

754

00:35:07,970 --> 00:35:05,880

button it lets us know that you enjoyed

755

00:35:10,370 --> 00:35:07,980

Today's Show and it also helps the

756

00:35:11,690 --> 00:35:10,380

YouTube algorithm as well Jimmy thank

757

00:35:13,490 --> 00:35:11,700

you so much for doing this review with
