

**HIDDEN TRUTH SHOW
WITH JIM BRESLO**

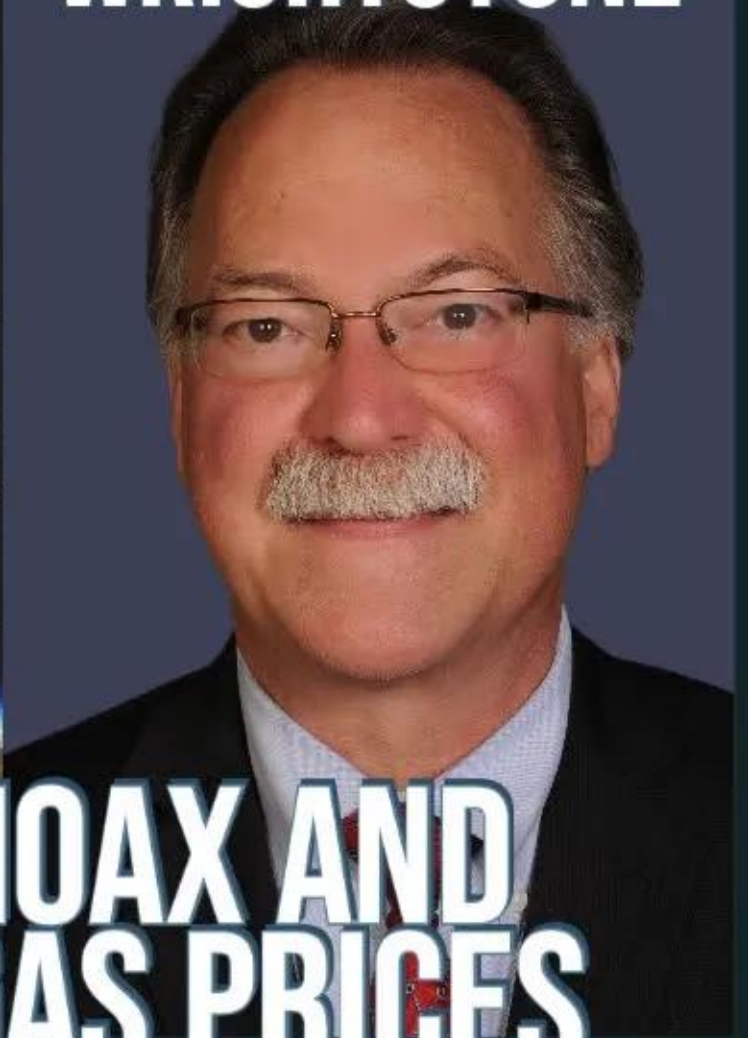

INCONVENIENT

Facts

The science that Al Gore doesn't
want you to know

**GREGORY
WRIGHTSTONE**

**THE CLIMATE CHANGE HOAX AND
WHY BIDEN LIKES HIGH GAS PRICES**

1
00:00:05,630 --> 00:00:02,750
here is our interview with Gregory

2
00:00:07,490 --> 00:00:05,640
wrightstone I want to take you what I

3
00:00:10,190 --> 00:00:07,500
see is the logical progression through

4
00:00:13,310 --> 00:00:10,200
the whole climate change question

5
00:00:15,709 --> 00:00:13,320
um but before we do do you are you able

6
00:00:19,070 --> 00:00:15,719
to comment just a bit on what's going on

7
00:00:21,230 --> 00:00:19,080
with Russia and Ukraine and and um and

8
00:00:23,390 --> 00:00:21,240
our energy production for instance

9
00:00:26,089 --> 00:00:23,400
you know just just today Biden came out

10
00:00:28,370 --> 00:00:26,099
I'm sure you heard and and is Banning

11
00:00:30,470 --> 00:00:28,380
Russian oil and there seems to be some

12
00:00:31,849 --> 00:00:30,480
dispute regarding some of the facts for

13
00:00:34,430 --> 00:00:31,859

instance the Biden Administration is

14

00:00:36,530 --> 00:00:34,440

saying that we produce more oil today

15

00:00:38,510 --> 00:00:36,540

than ever so this whole idea that Biden

16

00:00:41,990 --> 00:00:38,520

has done anything to limit

17

00:00:44,990 --> 00:00:42,000

oil production in America is just wrong

18

00:00:46,010 --> 00:00:45,000

can you address that oh sure

19

00:00:49,069 --> 00:00:46,020

um

20

00:00:52,010 --> 00:00:49,079

yeah what they've stated as fact is is

21

00:00:54,290 --> 00:00:52,020

easily proven uh it peaked in in late 20

22

00:00:56,510 --> 00:00:54,300

oil production the United States peaked

23

00:00:58,189 --> 00:00:56,520

in late 2019 and if we look and they're

24

00:00:58,790 --> 00:00:58,199

also blaming

25

00:01:01,010 --> 00:00:58,800

um

26
00:01:03,709 --> 00:01:01,020
they're saying well the reason gasoline

27
00:01:06,350 --> 00:01:03,719
prices were so low is because of this

28
00:01:09,710 --> 00:01:06,360
pandemic well I'm going to use my cheat

29
00:01:13,090 --> 00:01:09,720
sheet here in December of 2019. that's

30
00:01:16,370 --> 00:01:13,100
pre-coveted the economy is booming and

31
00:01:17,570 --> 00:01:16,380
gasoline prices were two dollars and 54

32
00:01:20,630 --> 00:01:17,580
cents

33
00:01:24,289 --> 00:01:20,640
when he took over they were two dollars

34
00:01:25,730 --> 00:01:24,299
and 38 cents slightly lower than than

35
00:01:27,590 --> 00:01:25,740
the pre-covered at the end of the

36
00:01:29,749 --> 00:01:27,600
pre-covered when he pulled out of

37
00:01:32,450 --> 00:01:29,759
Afghanistan there's three dollars and 15

38
00:01:34,850 --> 00:01:32,460

cents and today what is it 450 and

39

00:01:38,270 --> 00:01:34,860

Rising uh

40

00:01:41,390 --> 00:01:38,280

and we were before what when he took

41

00:01:44,450 --> 00:01:41,400

office that we could he was inaugurated

42

00:01:46,730 --> 00:01:44,460

uh it was the first week since 1985 that

43

00:01:49,249 --> 00:01:46,740

the United States had not imported one

44

00:01:51,830 --> 00:01:49,259

barrel of oil from Saudi Arabia the very

45

00:01:53,690 --> 00:01:51,840

first so we had finally after decades

46

00:01:55,910 --> 00:01:53,700

and Decades of working at it Trump

47

00:01:58,789 --> 00:01:55,920

freeing up the entrepreneurs in the oil

48

00:02:01,609 --> 00:01:58,799

patch to go get it we finally became

49

00:02:04,010 --> 00:02:01,619

nearly or possibly completely energy

50

00:02:06,170 --> 00:02:04,020

independent so say that again about

51
00:02:08,990 --> 00:02:06,180
Saudi Arabia that we were not buying

52
00:02:10,490 --> 00:02:09,000
from them that was the first week since

53
00:02:12,650 --> 00:02:10,500
1985

54
00:02:15,290 --> 00:02:12,660
that we had not bought one barrel of oil

55
00:02:17,750 --> 00:02:15,300
from Saudi Arabia the week he took over

56
00:02:19,369 --> 00:02:17,760
and it was inaugurated were we buying it

57
00:02:23,630 --> 00:02:19,379
from Russia

58
00:02:27,410 --> 00:02:23,640
yeah okay yeah I mean but but the Saudis

59
00:02:29,690 --> 00:02:27,420
were used to be one of our largest uh

60
00:02:31,970 --> 00:02:29,700
importers so we are producing so much in

61
00:02:34,970 --> 00:02:31,980
the U.S that we didn't need to buy from

62
00:02:37,309 --> 00:02:34,980
Saudi Arabia anymore right and then uh

63
00:02:39,890 --> 00:02:37,319

Biden takes over so let's talk about

64

00:02:43,670 --> 00:02:39,900

what are the factors driving up gas

65

00:02:45,650 --> 00:02:43,680

prices before the Ukraine war

66

00:02:48,229 --> 00:02:45,660

yeah we had

67

00:02:50,570 --> 00:02:48,239

we had problems with uh well number one

68

00:02:52,550 --> 00:02:50,580

we had with with covet it did drive oil

69

00:02:54,530 --> 00:02:52,560

prices down substantially because of

70

00:02:57,350 --> 00:02:54,540

demand component which slowed down

71

00:02:59,630 --> 00:02:57,360

drilling which then slowed down the new

72

00:03:01,009 --> 00:02:59,640

oil coming online uh that was probably

73

00:03:03,710 --> 00:03:01,019

the first thing but whenever he took

74

00:03:05,750 --> 00:03:03,720

office he made a series of decisions on

75

00:03:07,490 --> 00:03:05,760

his first day in office he did three

76

00:03:10,130 --> 00:03:07,500

things that were very impactful in oil

77

00:03:12,589 --> 00:03:10,140

prices uh one as everyone knows is the

78

00:03:13,869 --> 00:03:12,599

killing of the XL Pipeline which would

79

00:03:17,630 --> 00:03:13,879

have brought

80

00:03:19,550 --> 00:03:17,640

Canadian tar Sands oil 830 000 barrels

81

00:03:21,530 --> 00:03:19,560

into the United States

82

00:03:25,009 --> 00:03:21,540

um a fair portion of that still getting

83

00:03:26,589 --> 00:03:25,019

down via tanker trucks or tanker cars on

84

00:03:29,570 --> 00:03:26,599

rail

85

00:03:31,009 --> 00:03:29,580

but not nearly as much and as fast as

86

00:03:33,470 --> 00:03:31,019

what it would with the pipeline and that

87

00:03:36,890 --> 00:03:33,480

pipeline that he killed is the safest

88

00:03:38,809 --> 00:03:36,900

method of transportation by far of any

89

00:03:40,850 --> 00:03:38,819

way to move oil well also if you don't

90

00:03:43,369 --> 00:03:40,860

have trucks bringing it down then that

91

00:03:45,229 --> 00:03:43,379

would be fewer emissions wouldn't it

92

00:03:49,149 --> 00:03:45,239

it would in the trains that bring most

93

00:03:51,770 --> 00:03:49,159

of it also emit quite a bit but

94

00:03:54,949 --> 00:03:51,780

I'm okay with a big carbon footprint

95

00:03:56,869 --> 00:03:54,959

because if you'll learn really bullish

96

00:03:58,729 --> 00:03:56,879

on the many many benefits of carbon

97

00:04:02,270 --> 00:03:58,739

dioxide but the other two things he did

98

00:04:04,729 --> 00:04:02,280

that's very same day he killed XL he

99

00:04:09,130 --> 00:04:04,739

banned leasing in federal lands which is

100

00:04:11,869 --> 00:04:09,140

primarily uh Gulf of Mexico and Alaska

101
00:04:12,770 --> 00:04:11,879
that's just and just real quick is that

102
00:04:14,929 --> 00:04:12,780
a big deal or not because the

103
00:04:16,670 --> 00:04:14,939
administration is saying oh only only 10

104
00:04:19,969 --> 00:04:16,680
percent of U.S drilling comes on Federal

105
00:04:22,670 --> 00:04:19,979
Land yeah 10 is a lot that's a lot

106
00:04:24,650 --> 00:04:22,680
that's that's two million barrels a day

107
00:04:27,950 --> 00:04:24,660
come out of the Gulf Coast out of the

108
00:04:30,170 --> 00:04:27,960
gulf so yeah to say that 10 million

109
00:04:32,390 --> 00:04:30,180
barrels a day is not a lot of oil is

110
00:04:34,490 --> 00:04:32,400
again just being disingenuous now was he

111
00:04:38,270 --> 00:04:34,500
was that stopping new

112
00:04:39,650 --> 00:04:38,280
Wells or new so whatever's being

113
00:04:42,830 --> 00:04:39,660

produced right now continues to get

114

00:04:45,650 --> 00:04:42,840

produced okay right but you need to keep

115

00:04:46,909 --> 00:04:45,660

replenishing you're I'm probably telling

116

00:04:49,490 --> 00:04:46,919

you what you already know but with an

117

00:04:51,710 --> 00:04:49,500

oil well or a natural gas well your Peak

118

00:04:53,689 --> 00:04:51,720

production comes very early and then you

119

00:04:57,170 --> 00:04:53,699

have this kind of a hyper we have a

120

00:04:59,150 --> 00:04:57,180

hyperbolic decline where the decline is

121

00:05:01,189 --> 00:04:59,160

greatest at the beginning and then

122

00:05:03,469 --> 00:05:01,199

diminishes and flattens out but it keeps

123

00:05:05,990 --> 00:05:03,479

declining so it's that new the new wells

124

00:05:09,350 --> 00:05:06,000

coming online that produce the highest

125

00:05:11,510 --> 00:05:09,360

volumes of oil but but later he also

126

00:05:13,850 --> 00:05:11,520

banned Drilling in the Arctic National

127

00:05:16,730 --> 00:05:13,860

Wildlife Refuge thought to be the

128

00:05:19,010 --> 00:05:16,740

largest undeveloped uh oil accumulation

129

00:05:21,950 --> 00:05:19,020

in North America

130

00:05:24,830 --> 00:05:21,960

um and he also uh

131

00:05:26,330 --> 00:05:24,840

the band and I'm struggling here to

132

00:05:28,490 --> 00:05:26,340

think what the third thing was but it

133

00:05:30,409 --> 00:05:28,500

was oh uh yeah the band well it was it

134

00:05:32,629 --> 00:05:30,419

was that Arctic National Wildlife Refuge

135

00:05:35,629 --> 00:05:32,639

Leasing and federal property and Excel

136

00:05:38,210 --> 00:05:35,639

Pipeline and then last week he's been

137

00:05:39,529 --> 00:05:38,220

doing series of these things last week

138

00:05:42,409 --> 00:05:39,539

um he said we're not going to issue any

139

00:05:44,450 --> 00:05:42,419

new pipeline permits ferc Federal Energy

140

00:05:47,450 --> 00:05:44,460

Regulatory Commission no more new

141

00:05:49,610 --> 00:05:47,460

pipeline uh permits well if you can't

142

00:05:51,350 --> 00:05:49,620

build a pipeline particularly for

143

00:05:54,770 --> 00:05:51,360

tonight it's really mainly natural gas

144

00:05:56,629 --> 00:05:54,780

if you can't build that pipeline uh you

145

00:05:59,090 --> 00:05:56,639

can't bring the product to Market why

146

00:06:00,890 --> 00:05:59,100

drill the wells uh and last week he

147

00:06:04,129 --> 00:06:00,900

banned Drilling in the National

148

00:06:06,529 --> 00:06:04,139

Petroleum Reserve in Alaska which is it

149

00:06:08,629 --> 00:06:06,539

that Piggies backs onto the other and

150

00:06:11,629 --> 00:06:08,639

were development that's not going to

151
00:06:13,550 --> 00:06:11,639
happen because prude obey was the was

152
00:06:16,249 --> 00:06:13,560
the huge oil field in Alaska that we

153
00:06:18,710 --> 00:06:16,259
built the big pipeline South well prude

154
00:06:20,990 --> 00:06:18,720
obey is a significant decline now it's

155
00:06:23,510 --> 00:06:21,000
the pipeline is nearing its economic

156
00:06:25,670 --> 00:06:23,520
limit and and as the production

157
00:06:28,010 --> 00:06:25,680
continues to decline out of prude obey

158
00:06:30,170 --> 00:06:28,020
we're not that far from that pipeline

159
00:06:32,710 --> 00:06:30,180
reaching its economic limit we have to

160
00:06:35,090 --> 00:06:32,720
be decommissioned and when that occurs

161
00:06:37,490 --> 00:06:35,100
those other two fields we talked about

162
00:06:40,550 --> 00:06:37,500
or were giant supergiants actually

163
00:06:42,290 --> 00:06:40,560

probably that oil would have flowed

164

00:06:43,969 --> 00:06:42,300

through the pipeline we've extended the

165

00:06:47,450 --> 00:06:43,979

life of that pipeline for many many

166

00:06:49,909 --> 00:06:47,460

decades if those don't occur that

167

00:06:51,650 --> 00:06:49,919

pipeline will be decommissioned and and

168

00:06:54,469 --> 00:06:51,660

that all the remaining oil will be

169

00:06:56,150 --> 00:06:54,479

stranded probably forever so these are

170

00:06:59,809 --> 00:06:56,160

the things that piggyback one on the

171

00:07:03,189 --> 00:06:59,819

other bad decisions now lead to horrific

172

00:07:06,890 --> 00:07:03,199

consequences 5 10 20 years in the future

173

00:07:09,350 --> 00:07:06,900

what what was his justification for

174

00:07:10,249 --> 00:07:09,360

canceling the Excel pipeline climate

175

00:07:12,529 --> 00:07:10,259

change

176

00:07:13,850 --> 00:07:12,539

uh we're all going to die in 10 years

177

00:07:16,610 --> 00:07:13,860

the plan is going to be destroyed

178

00:07:19,969 --> 00:07:16,620

because of carbon dioxide emissions and

179

00:07:23,749 --> 00:07:19,979

and uh if we what what we're doing is

180

00:07:26,629 --> 00:07:23,759

enabling uh these dirty oil producers to

181

00:07:28,850 --> 00:07:26,639

produce more oil that'll lead to more

182

00:07:31,430 --> 00:07:28,860

carbon monoxide which will lead to more

183

00:07:33,830 --> 00:07:31,440

catastrophic warming and will perish

184

00:07:36,830 --> 00:07:33,840

quicker so that's that's the reasoning

185

00:07:39,830 --> 00:07:36,840

and it's false and let's let's State the

186

00:07:42,469 --> 00:07:39,840

obvious which is that for climate change

187

00:07:44,110 --> 00:07:42,479

activists which includes Joe Biden and

188

00:07:47,990 --> 00:07:44,120

Bernie's and his partner Bernie Sanders

189

00:07:51,469 --> 00:07:48,000

the higher the prices of gas are the

190

00:07:54,050 --> 00:07:51,479

better because suddenly wind and solar

191

00:07:56,629 --> 00:07:54,060

doesn't look as expensive as compared

192

00:07:58,670 --> 00:07:56,639

right yeah that's the Dirty Little

193

00:08:00,589 --> 00:07:58,680

Secret here this has been his plan all

194

00:08:03,950 --> 00:08:00,599

along this has been the you remember one

195

00:08:06,050 --> 00:08:03,960

of Obama said uh uh we're going to ban

196

00:08:07,730 --> 00:08:06,060

coal and we're going to ban oil and it's

197

00:08:10,730 --> 00:08:07,740

going to be it's going to lead to higher

198

00:08:13,249 --> 00:08:10,740

much much difficult and iron Danger you

199

00:08:14,809 --> 00:08:13,259

know higher costs for consumers he

200

00:08:16,670 --> 00:08:14,819

admitted that

201
00:08:19,010 --> 00:08:16,680
um and that's the Biden plan he stated

202
00:08:20,749 --> 00:08:19,020
it as a candidate and he stated it after

203
00:08:24,050 --> 00:08:20,759
he got elected and he started enacting

204
00:08:24,770 --> 00:08:24,060
it was we need to drive

205
00:08:28,249 --> 00:08:24,780
um

206
00:08:32,350 --> 00:08:28,259
all forms of energy from fossil fuel

207
00:08:34,909 --> 00:08:32,360
fossil fuels or fossil energy sources

208
00:08:36,350 --> 00:08:34,919
either if by creating from an

209
00:08:39,709 --> 00:08:36,360
electricity generation or for

210
00:08:42,230 --> 00:08:39,719
transportation we need in his his goal

211
00:08:45,110 --> 00:08:42,240
was to increase significantly the cost

212
00:08:47,750 --> 00:08:45,120
of oil and natural gas and any natural

213
00:08:51,170 --> 00:08:47,760

any electricity generator from it the

214

00:08:54,650 --> 00:08:51,180

plan was to do it using carbon taxation

215

00:08:57,110 --> 00:08:54,660

schemes carbon these faux conservatives

216

00:08:58,730 --> 00:08:57,120

uh like to call it carbon dividends

217

00:09:00,350 --> 00:08:58,740

because it sounds doesn't sound as bad

218

00:09:04,070 --> 00:09:00,360

but all of these things would have

219

00:09:06,070 --> 00:09:04,080

driven the costs of of oil gasoline

220

00:09:08,150 --> 00:09:06,080

natural gas

221

00:09:10,550 --> 00:09:08,160

significantly and what what this

222

00:09:13,120 --> 00:09:10,560

Ukrainian Invasion has done is just

223

00:09:14,449 --> 00:09:13,130

accelerated their timetable for

224

00:09:17,210 --> 00:09:14,459

[Applause]

225

00:09:19,550 --> 00:09:17,220

um for this great increase in prices

226

00:09:20,930 --> 00:09:19,560

this was their plan all along to get

227

00:09:23,329 --> 00:09:20,940

these prices where they are it's just

228

00:09:27,650 --> 00:09:23,339

been accelerated by a few years okay so

229

00:09:29,630 --> 00:09:27,660

then sorry how help explain then if

230

00:09:32,750 --> 00:09:29,640

Biden wants higher prices which I think

231

00:09:34,850 --> 00:09:32,760

you and I tend to agree on that why

232

00:09:37,430 --> 00:09:34,860

would did he hesitate for so long in

233

00:09:40,509 --> 00:09:37,440

Banning Russian gas he claims it's

234

00:09:43,070 --> 00:09:40,519

because I'm concerned about prices

235

00:09:45,110 --> 00:09:43,080

and uh I don't want to hurt the American

236

00:09:47,449 --> 00:09:45,120

people but it's that something doesn't

237

00:09:48,829 --> 00:09:47,459

make sense there let me just let me just

238

00:09:52,090 --> 00:09:48,839

correct you for a second there you said

239

00:09:55,370 --> 00:09:52,100

Russian gas it's really Russian oil okay

240

00:09:57,230 --> 00:09:55,380

so the Russian gas natural gas will be

241

00:09:59,509 --> 00:09:57,240

coming through the the pipeline that was

242

00:10:01,790 --> 00:09:59,519

constructed the Russian oils uh coming

243

00:10:06,829 --> 00:10:01,800

through various

244

00:10:12,009 --> 00:10:09,230

Banning Russian oil

245

00:10:16,750 --> 00:10:12,019

is likely not going to do a darn thing

246

00:10:19,430 --> 00:10:16,760

to decrease uh to to to affect our

247

00:10:21,350 --> 00:10:19,440

Global oil prices because oil is a

248

00:10:23,870 --> 00:10:21,360

fungible commodity and there are enough

249

00:10:26,750 --> 00:10:23,880

enough other countries that have already

250

00:10:28,430 --> 00:10:26,760

stated we'll buy all the oil Japan as

251
00:10:29,690 --> 00:10:28,440
just I think was yesterday said we're

252
00:10:31,670 --> 00:10:29,700
going to buy we're going to continue

253
00:10:34,310 --> 00:10:31,680
buying Russian oil and we may Step It Up

254
00:10:36,470 --> 00:10:34,320
China has has said they're going to buy

255
00:10:37,730 --> 00:10:36,480
Russian oil so

256
00:10:39,889 --> 00:10:37,740
um there are other people out there

257
00:10:42,949 --> 00:10:39,899
willing to buy it since it since oil is

258
00:10:46,009 --> 00:10:42,959
a fungible commodity uh it's in the

259
00:10:48,769 --> 00:10:46,019
worldwide stage a barrel of oil

260
00:10:50,930 --> 00:10:48,779
sold by Russia to Japan is really kind

261
00:10:53,569 --> 00:10:50,940
of the same as a barrel of oil so does

262
00:10:55,190 --> 00:10:53,579
at least for their for their purposes

263
00:10:58,250 --> 00:10:55,200

thank you again to Gregory wrightstone

264

00:11:00,170 --> 00:10:58,260

you can check out his book

265

00:11:02,150 --> 00:11:00,180

inconvenient facts the science that AI

266

00:11:04,190 --> 00:11:02,160

Gore doesn't want you to know wherever

267

00:11:06,889 --> 00:11:04,200

you get books also as I mentioned in the

268

00:11:09,590 --> 00:11:06,899

interview you can get it for free on

269

00:11:10,970 --> 00:11:09,600

Amazon as an audiobook thank you to our

270

00:11:12,710 --> 00:11:10,980

producer Michael Parker thank you all

271

00:11:22,930 --> 00:11:12,720

for listening we'll be back soon with

272

00:11:29,449 --> 00:11:26,990

you can find us at hiddentruthshow.com

273

00:11:30,490 --> 00:11:29,459

follow us on Facebook Twitter and

274

00:11:33,769 --> 00:11:30,500

Instagram

275

00:11:36,650 --> 00:11:33,779

show join us again next week for another
