

THE HIGHERSIDE CHATS

CONSPIRACY, MYSTERY, AND COMEDY. BOOM.

The Starchild Skull w/ Amy Vickers

1
00:00:14,780 --> 00:00:09,400
these are you and they in your chips

2
00:00:18,320 --> 00:00:14,790
America is asking you to call dr you who

3
00:00:21,320 --> 00:00:18,330
the USA America's the greatest land of

4
00:00:25,130 --> 00:00:21,330
all on a highway or a rolled along a

5
00:00:29,540 --> 00:00:25,140
levy performances leader nothing

6
00:01:26,800 --> 00:00:29,550
consider life is completed or in go make

7
00:01:32,840 --> 00:01:29,600
alright listen up people 80 years ago

8
00:01:36,109 --> 00:01:32,850
deep in a mine in Copper Canyon Mexico a

9
00:01:38,990 --> 00:01:36,119
900 year old human-like skull was found

10
00:01:40,760 --> 00:01:39,000
now known as the Starchild skull what's

11
00:01:42,620 --> 00:01:40,770
interesting about this skull is the

12
00:01:45,109 --> 00:01:42,630
numerous differences between it and a

13
00:01:46,430 --> 00:01:45,119

typical human skull some consider the

14

00:01:48,190 --> 00:01:46,440

skull to be the smoking gun evidence

15

00:01:50,719 --> 00:01:48,200

that we've been visited by

16

00:01:52,280 --> 00:01:50,729

extraterrestrials and today I'm excited

17

00:01:54,800 --> 00:01:52,290

to have a chat with the chief operating

18

00:01:57,110 --> 00:01:54,810

officer of the Starchild project Amy

19

00:01:59,960 --> 00:01:57,120

Vickers here to talk about what the hell

20

00:02:01,910 --> 00:01:59,970

this thing is Amy how are you doing I'm

21

00:02:04,340 --> 00:02:01,920

doing great thanks so much for having me

22

00:02:06,680 --> 00:02:04,350

on my pleasure I'm glad that you are

23

00:02:08,440 --> 00:02:06,690

willing to do this I've been fascinated

24

00:02:11,360 --> 00:02:08,450

with the mystery surrounding the skull

25

00:02:13,820 --> 00:02:11,370

since I first seen it pop up on I think

26

00:02:16,370 --> 00:02:13,830

it was UFO hunters I've also seen it on

27

00:02:18,259 --> 00:02:16,380

coast to coast am and I'm I'm psyched to

28

00:02:20,150 --> 00:02:18,269

hear the latest from the Starchild

29

00:02:22,699 --> 00:02:20,160

project but first can you paint a

30

00:02:25,840 --> 00:02:22,709

picture for us of the details under

31

00:02:28,940 --> 00:02:25,850

which the Starchild skull was discovered

32

00:02:31,250 --> 00:02:28,950

sure thing it was actually found by an

33

00:02:35,300 --> 00:02:31,260

American tourist in Mexico as you said

34

00:02:39,350 --> 00:02:35,310

in the 1930s she basically found it in a

35

00:02:42,530 --> 00:02:39,360

mine tunnel it's a little macaw but she

36

00:02:44,720 --> 00:02:42,540

just found it along with another full

37

00:02:46,940 --> 00:02:44,730

skeleton she was only able to recover

38

00:02:48,800 --> 00:02:46,950

the two skulls one of them is the

39

00:02:50,660 --> 00:02:48,810

Starchild one of them's a normal skull

40

00:02:52,789 --> 00:02:50,670

oh she brought them back with her to the

41

00:02:55,820 --> 00:02:52,799

states and basically kept them as a

42

00:02:57,590 --> 00:02:55,830

souvenir her entire life just thinking

43

00:02:59,330 --> 00:02:57,600

well this is a really unusual skull and

44

00:03:02,229 --> 00:02:59,340

this is a normal skull and this is from

45

00:03:04,430 --> 00:03:02,239

my holiday in Mexico and when she was

46

00:03:06,260 --> 00:03:04,440

getting on in life and

47

00:03:09,200 --> 00:03:06,270

knew that she would be dying soon she

48

00:03:10,760 --> 00:03:09,210

passed them on to friends to pass them

49

00:03:12,590 --> 00:03:10,770

on to friends and then they pass them on

50

00:03:14,720 --> 00:03:12,600

to Ray and Melanie young the current

51
00:03:16,670 --> 00:03:14,730
owners of the skull melanie was a

52
00:03:19,400 --> 00:03:16,680
neonatal nurse so she took an immediate

53
00:03:21,020 --> 00:03:19,410
interest wanting to know what kind of

54
00:03:22,640 --> 00:03:21,030
deformity it was if it even was a

55
00:03:25,160 --> 00:03:22,650
deformity because she'd never seen

56
00:03:27,820 --> 00:03:25,170
anything nearly as unusual as this skull

57
00:03:30,230 --> 00:03:27,830
and so Melanie and her husband Ray

58
00:03:32,300 --> 00:03:30,240
started asking around trying to find

59
00:03:34,640 --> 00:03:32,310
someone that would take a serious look

60
00:03:37,100 --> 00:03:34,650
at it and they ended up settling on

61
00:03:39,290 --> 00:03:37,110
lloyd pye and together they founded the

62
00:03:41,990 --> 00:03:39,300
Starchild project in early nineteen

63
00:03:44,330 --> 00:03:42,000

ninety nine and the Starchild project is

64

00:03:46,460 --> 00:03:44,340

just an informal organization of people

65

00:03:48,140 --> 00:03:46,470

who arranged to have the skull tested by

66

00:03:50,240 --> 00:03:48,150

different independent facilities and

67

00:03:53,480 --> 00:03:50,250

that's what's been going on with it for

68

00:03:55,690 --> 00:03:53,490

about 12 years now since 99 just test

69

00:03:58,070 --> 00:03:55,700

after test to test every time that

70

00:04:00,170 --> 00:03:58,080

funding permits and every time it makes

71

00:04:02,810 --> 00:04:00,180

sense we've just throw in the kitchen

72

00:04:04,820 --> 00:04:02,820

sink at it yeah I've actually heard that

73

00:04:06,410 --> 00:04:04,830

through the various interviews that

74

00:04:08,570 --> 00:04:06,420

you've done in Lloyds done that there's

75

00:04:10,430 --> 00:04:08,580

I hear different numbers between ten and

76
00:04:13,760 --> 00:04:10,440
twenty five major differences between

77
00:04:16,340 --> 00:04:13,770
the Starchild and a human skull there's

78
00:04:18,530 --> 00:04:16,350
absolutely 25 major differences

79
00:04:21,320 --> 00:04:18,540
everything from the bone being at least

80
00:04:24,409 --> 00:04:21,330
as half as thick and at least twice as

81
00:04:25,970 --> 00:04:24,419
durable as normal human bone to the

82
00:04:28,130 --> 00:04:25,980
shape of the skull being radically

83
00:04:29,720 --> 00:04:28,140
different the position of the neck on

84
00:04:32,120 --> 00:04:29,730
the sky I'll being basically impossible

85
00:04:34,760 --> 00:04:32,130
for you or me or any other normal kind

86
00:04:37,790 --> 00:04:34,770
of human two things that we found inside

87
00:04:40,159 --> 00:04:37,800
the bone of the skull microscopic fibers

88
00:04:42,350 --> 00:04:40,169

woven through the matrix of the bone of

89

00:04:46,220 --> 00:04:42,360

the skull like steel bar rebar

90

00:04:48,290 --> 00:04:46,230

reinforcing concrete and also not not

91

00:04:50,360 --> 00:04:48,300

necessarily microscopic but very very

92

00:04:52,700 --> 00:04:50,370

hard to see with the naked eye we found

93

00:04:55,100 --> 00:04:52,710

a reddish residue inside the cancellous

94

00:04:57,020 --> 00:04:55,110

holes of the skull now the cancellous

95

00:04:58,909 --> 00:04:57,030

holes is where your bone marrow usually

96

00:05:01,010 --> 00:04:58,919

is so you would think well it's red

97

00:05:03,260 --> 00:05:01,020

residue it must just be desiccated bone

98

00:05:05,360 --> 00:05:03,270

marrow well after nine hundred years

99

00:05:07,730 --> 00:05:05,370

there should be nothing left in those

100

00:05:10,190 --> 00:05:07,740

cancellous holes and even if it was

101
00:05:12,050 --> 00:05:10,200
blood or bone marrow there's no way it

102
00:05:13,610 --> 00:05:12,060
would still be read it would be black so

103
00:05:15,770 --> 00:05:13,620
we've had different mycologists and

104
00:05:17,820 --> 00:05:15,780
other experts look at it to try and

105
00:05:20,490 --> 00:05:17,830
figure out whether it's some kind of fun

106
00:05:22,530 --> 00:05:20,500
or mold or or what it could be and

107
00:05:24,630 --> 00:05:22,540
they're all absolutely baffled by it

108
00:05:26,850 --> 00:05:24,640
there there should be nothing left

109
00:05:28,590 --> 00:05:26,860
inside the bone after nine hundred years

110
00:05:30,960 --> 00:05:28,600
the natural bacteria should have eaten

111
00:05:34,970 --> 00:05:30,970
all of it so we have something here that

112
00:05:37,680 --> 00:05:34,980
seems to be immune to natural biological

113
00:05:39,660 --> 00:05:37,690

decomposition on this planet so I mean

114

00:05:41,340 --> 00:05:39,670

that that just on its own is enormous

115

00:05:43,440 --> 00:05:41,350

but then when you combine it with the

116

00:05:45,780 --> 00:05:43,450

fibers that no one has ever seen in any

117

00:05:47,910 --> 00:05:45,790

bone anywhere before you combine that

118

00:05:49,440 --> 00:05:47,920

with the unusual shape of the skull that

119

00:05:51,990 --> 00:05:49,450

the qualities of the strength and

120

00:05:53,820 --> 00:05:52,000

thinness and lightness of the bone it's

121

00:05:56,490 --> 00:05:53,830

just off the charts there is no

122

00:06:00,000 --> 00:05:56,500

combination of deformities that you can

123

00:06:01,890 --> 00:06:00,010

come up with that would make a human be

124

00:06:04,410 --> 00:06:01,900

born with a skull like this and somehow

125

00:06:06,390 --> 00:06:04,420

survive not just long enough to grow

126

00:06:08,280 --> 00:06:06,400

teeth but long enough to grind its teeth

127

00:06:10,470 --> 00:06:08,290

down with use which is the case with the

128

00:06:12,090 --> 00:06:10,480

Starchild skull now a lot of the

129

00:06:13,890 --> 00:06:12,100

interviews I see about the Starchild

130

00:06:15,720 --> 00:06:13,900

skull they waste a lot of time trying to

131

00:06:17,850 --> 00:06:15,730

explain it away with various human

132

00:06:20,310 --> 00:06:17,860

conditions whether it be cradle boarding

133

00:06:23,460 --> 00:06:20,320

or water on the brain or something other

134

00:06:25,800 --> 00:06:23,470

kind of deformity but these fibers and

135

00:06:27,360 --> 00:06:25,810

the thickness of the skull alone not to

136

00:06:31,670 --> 00:06:27,370

mention that that thing looks like a

137

00:06:34,470 --> 00:06:31,680

goddamn alien these things are are to me

138

00:06:36,510 --> 00:06:34,480

pretty impressive facts that go well

139

00:06:39,510 --> 00:06:36,520

beyond just the general shape of the

140

00:06:40,860 --> 00:06:39,520

skull which is weird looking enough but

141

00:06:42,360 --> 00:06:40,870

I've heard some kind of weird things

142

00:06:45,030 --> 00:06:42,370

happen when the skull was tested for

143

00:06:46,830 --> 00:06:45,040

durability and cut for samples for

144

00:06:50,870 --> 00:06:46,840

testing can you tell us what those

145

00:06:53,790 --> 00:06:50,880

things might have been absolutely now

146

00:06:55,590 --> 00:06:53,800

you mentioned seeing UFO hunters there's

147

00:06:58,170 --> 00:06:55,600

actually been a number of documentaries

148

00:07:00,240 --> 00:06:58,180

that the skull has been on and recently

149

00:07:03,090 --> 00:07:00,250

they tried to actually do a hardness

150

00:07:05,190 --> 00:07:03,100

test on television they got a hardness

151
00:07:07,470 --> 00:07:05,200
meter which is basically a device where

152
00:07:09,420 --> 00:07:07,480
you punch a hole through something and

153
00:07:11,580 --> 00:07:09,430
it tells you how much force was required

154
00:07:14,760 --> 00:07:11,590
to punch a hole through it well that

155
00:07:17,070 --> 00:07:14,770
that's testing compression strength the

156
00:07:19,140 --> 00:07:17,080
strength of the Starchild skull while it

157
00:07:22,740 --> 00:07:19,150
did measure higher than normal bone on

158
00:07:25,230 --> 00:07:22,750
that compression test the strength that

159
00:07:27,000 --> 00:07:25,240
we have is not so much just strength how

160
00:07:29,280 --> 00:07:27,010
much it takes to crush it it's

161
00:07:31,679 --> 00:07:29,290
durability I mean your bones aren't

162
00:07:34,379 --> 00:07:31,689
there to stop you from being

163
00:07:36,329 --> 00:07:34,389

they're there to not break under tensile

164

00:07:38,879 --> 00:07:36,339

pressure when they get bent the

165

00:07:41,719 --> 00:07:38,889

Starchild skull bone has those fibers

166

00:07:44,129 --> 00:07:41,729

going through it that give it or we

167

00:07:47,009 --> 00:07:44,139

theorize that they give it strength and

168

00:07:49,529 --> 00:07:47,019

flexibility as well so even though that

169

00:07:51,749 --> 00:07:49,539

puncture test that they tried to do only

170

00:07:53,969 --> 00:07:51,759

registered at being somewhat higher than

171

00:07:55,679 --> 00:07:53,979

normal human bone when they went to cut

172

00:07:58,169 --> 00:07:55,689

the bone samples out of the skull for

173

00:08:00,119 --> 00:07:58,179

the first time they use a small rotary

174

00:08:02,189 --> 00:08:00,129

cutting sorts a little electric saw with

175

00:08:05,100 --> 00:08:02,199

a circular blade that's made of tungsten

176

00:08:07,109 --> 00:08:05,110

carbide which is the same kind of metal

177

00:08:10,439 --> 00:08:07,119

that your dentist's drill bits are made

178

00:08:12,419 --> 00:08:10,449

out of so they cut that again we have

179

00:08:14,159 --> 00:08:12,429

two skulls found in the same mine tunnel

180

00:08:17,579 --> 00:08:14,169

they're the same age nine hundred years

181

00:08:20,009 --> 00:08:17,589

old so we usually use that normal skull

182

00:08:21,600 --> 00:08:20,019

as a control against the Starchild skull

183

00:08:24,059 --> 00:08:21,610

just in case there's any kind of

184

00:08:25,859 --> 00:08:24,069

degradation they use that blood aid to

185

00:08:27,239 --> 00:08:25,869

cut through the normal skull and it just

186

00:08:28,889 --> 00:08:27,249

cut it like butter that's what it's

187

00:08:30,569 --> 00:08:28,899

there for it just cut right through it

188

00:08:32,309 --> 00:08:30,579

like it was nothing they got a clean

189

00:08:35,429 --> 00:08:32,319

blade of the same kind and went to cut

190

00:08:38,549 --> 00:08:35,439

the Starchild skull it literally bounced

191

00:08:41,100 --> 00:08:38,559

off the bone they could not get it to

192

00:08:43,139 --> 00:08:41,110

cut with any degree of ease in in the

193

00:08:45,210 --> 00:08:43,149

end they did manage to get it to Cardin

194

00:08:48,540 --> 00:08:45,220

we ended up switching to a diamond

195

00:08:50,210 --> 00:08:48,550

coated blade but it this isn't normal

196

00:08:52,799 --> 00:08:50,220

kind of strength this is something

197

00:08:54,600 --> 00:08:52,809

unbelievable in this bone that's giving

198

00:08:57,569 --> 00:08:54,610

it properties that are very hard to

199

00:08:59,220 --> 00:08:57,579

explain that's that's to me one of the

200

00:09:02,400 --> 00:08:59,230

most interesting things as far as the

201
00:09:03,960 --> 00:09:02,410
fibers are concerned do we know what the

202
00:09:06,329 --> 00:09:03,970
fibers are made of like I mean they're

203
00:09:08,400 --> 00:09:06,339
apparently there are anomalous to this

204
00:09:10,920 --> 00:09:08,410
this planet like no one there's no

205
00:09:13,290 --> 00:09:10,930
fibers than any other bone as far as

206
00:09:16,319 --> 00:09:13,300
I've heard from other various interviews

207
00:09:19,910 --> 00:09:16,329
correct you're absolutely correct there

208
00:09:22,799 --> 00:09:19,920
is a condition called Morgellons that is

209
00:09:24,389 --> 00:09:22,809
it's medically unclassified the Medical

210
00:09:26,579 --> 00:09:24,399
Association's haven't said it's an

211
00:09:30,480 --> 00:09:26,589
official disease yet it does cause

212
00:09:32,639 --> 00:09:30,490
fibers in the skin and they're about 10

213
00:09:34,910 --> 00:09:32,649

times larger than the fibers of it found

214

00:09:38,249 --> 00:09:34,920

inside the Starchild skull bone but

215

00:09:40,559 --> 00:09:38,259

nothing in the actual bone Morgellons

216

00:09:43,230 --> 00:09:40,569

doesn't give you fibers inside the bone

217

00:09:44,639 --> 00:09:43,240

no condition gives you fibers inside the

218

00:09:45,430 --> 00:09:44,649

bone like we have in the case of the

219

00:09:48,270 --> 00:09:45,440

Starchild's

220

00:09:50,830 --> 00:09:48,280

this is so far out there this is so

221

00:09:53,110 --> 00:09:50,840

dissimilar from anything that's ever

222

00:09:55,810 --> 00:09:53,120

been seen before we can't tell you what

223

00:09:58,270 --> 00:09:55,820

those fibers are we have to invent a

224

00:10:00,400 --> 00:09:58,280

protocol to be able to pull those fibers

225

00:10:01,840 --> 00:10:00,410

out of the bone and then we can test

226

00:10:03,640 --> 00:10:01,850

them and find out what they are but

227

00:10:06,070 --> 00:10:03,650

there isn't even a test invented yet

228

00:10:08,020 --> 00:10:06,080

there isn't some method some system to

229

00:10:09,760 --> 00:10:08,030

get those fibers out of the bone because

230

00:10:11,560 --> 00:10:09,770

nothing like this has ever been seen

231

00:10:13,930 --> 00:10:11,570

before there's never been a call for it

232

00:10:16,090 --> 00:10:13,940

so we really have something that's not

233

00:10:19,810 --> 00:10:16,100

just really interesting it's really

234

00:10:23,760 --> 00:10:19,820

unique right and and this you said

235

00:10:28,300 --> 00:10:23,770

before the skull was found with another

236

00:10:31,510 --> 00:10:28,310

skeleton of a woman I've heard at least

237

00:10:33,340 --> 00:10:31,520

two related or do we have any idea like

238

00:10:35,410 --> 00:10:33,350

the why they were you know found

239

00:10:39,700 --> 00:10:35,420

together why they were together was is

240

00:10:41,560 --> 00:10:39,710

the Starchild skull a child we aren't

241

00:10:43,810 --> 00:10:41,570

sure if it's a child we have conflicting

242

00:10:46,600 --> 00:10:43,820

evidence on that at some aspects of the

243

00:10:49,030 --> 00:10:46,610

skull point to a child of five or six

244

00:10:50,890 --> 00:10:49,040

other aspects point to someone that's

245

00:10:54,550 --> 00:10:50,900

older you know somewhere around the age

246

00:10:56,320 --> 00:10:54,560

of 21 to 25 other aspects point to

247

00:10:59,740 --> 00:10:56,330

someone much older so we're really at

248

00:11:01,930 --> 00:10:59,750

kind of an impasse a number of our

249

00:11:03,400 --> 00:11:01,940

experts are just sure it's a child and

250

00:11:05,200 --> 00:11:03,410

then we have others that are positive

251

00:11:08,710 --> 00:11:05,210

it's an adult so that's up in the air

252

00:11:11,800 --> 00:11:08,720

but it was named the Starchild when the

253

00:11:13,440 --> 00:11:11,810

only test that had been done on it where

254

00:11:15,910 --> 00:11:13,450

x rays and they showed that it had

255

00:11:18,400 --> 00:11:15,920

somewhat childlike teeth and so that's

256

00:11:20,050 --> 00:11:18,410

what we based it off of so it may have

257

00:11:21,970 --> 00:11:20,060

been a child the woman you're absolutely

258

00:11:24,910 --> 00:11:21,980

correct she was a woman found with the

259

00:11:26,710 --> 00:11:24,920

skull is not genetically related to it

260

00:11:28,720 --> 00:11:26,720

at all it's not to say she couldn't be

261

00:11:31,750 --> 00:11:28,730

an adoptive mother but they aren't

262

00:11:33,430 --> 00:11:31,760

genetically related in any way and the

263

00:11:34,990 --> 00:11:33,440

fact that they were found together does

264

00:11:38,079 --> 00:11:35,000

make us think that there is some kind of

265

00:11:40,120 --> 00:11:38,089

emotional connection between the two but

266

00:11:42,130 --> 00:11:40,130

we we just don't know what that is at

267

00:11:44,920 --> 00:11:42,140

this point but we are so happy to have a

268

00:11:46,930 --> 00:11:44,930

control skull because early on in the

269

00:11:49,060 --> 00:11:46,940

process I mentioned the bone is

270

00:11:51,370 --> 00:11:49,070

literally half as thick and weighs half

271

00:11:54,250 --> 00:11:51,380

as much as normal human bone well as

272

00:11:56,260 --> 00:11:54,260

bone ages over hundreds of years it does

273

00:11:58,450 --> 00:11:56,270

get a tiny little bit thicker ice are a

274

00:11:59,140 --> 00:11:58,460

tiny little bit thinner I looked at the

275

00:12:01,720 --> 00:11:59,150

target

276

00:12:04,180 --> 00:12:01,730

little thinner over time so one of the

277

00:12:06,460 --> 00:12:04,190

early excuses that people throw up is to

278

00:12:08,080 --> 00:12:06,470

say well that's just post-mortem

279

00:12:09,850 --> 00:12:08,090

contraction of the bone that's just

280

00:12:11,860 --> 00:12:09,860

gotten thinner because it's it's older

281

00:12:13,390 --> 00:12:11,870

we had this other skull that's been in

282

00:12:15,040 --> 00:12:13,400

the exact same conditions that we could

283

00:12:18,280 --> 00:12:15,050

pull out and say no this is what

284

00:12:20,800 --> 00:12:18,290

posthumous bone contraction looks like

285

00:12:23,560 --> 00:12:20,810

and so it's been a wonderful comparison

286

00:12:27,120 --> 00:12:23,570

for us at every step of the way and are

287

00:12:29,650 --> 00:12:27,130

there any clues to their relationship

288

00:12:32,890 --> 00:12:29,660

based on how they were found or anything

289

00:12:35,680 --> 00:12:32,900

like that without actually found in a

290

00:12:37,810 --> 00:12:35,690

very unusual situation the entire

291

00:12:40,390 --> 00:12:37,820

skeleton of the Starchild skull was

292

00:12:43,240 --> 00:12:40,400

buried in a shallow grave the entire

293

00:12:45,670 --> 00:12:43,250

skeleton of the human female skull was

294

00:12:48,310 --> 00:12:45,680

found above the ground next to it and

295

00:12:50,470 --> 00:12:48,320

sticking up out of that shallow grave

296

00:12:53,110 --> 00:12:50,480

was the hand and forearm of the

297

00:12:56,080 --> 00:12:53,120

starchild skull wrapped around her upper

298

00:12:58,690 --> 00:12:56,090

arm bone so the only conclusion that we

299

00:13:01,120 --> 00:12:58,700

were able to draw from that is that she

300

00:13:03,970 --> 00:13:01,130

must have brought the Starchild being

301
00:13:05,950 --> 00:13:03,980
there buried it laid down next to it

302
00:13:08,230 --> 00:13:05,960
wrapped the hand around her arm and died

303
00:13:09,550 --> 00:13:08,240
herself because if someone had brought

304
00:13:11,260 --> 00:13:09,560
them there and buried them then she

305
00:13:13,210 --> 00:13:11,270
would have been buried as well if they

306
00:13:14,770 --> 00:13:13,220
had both crawled up there and died

307
00:13:17,650 --> 00:13:14,780
together then she wouldn't have been

308
00:13:20,070 --> 00:13:17,660
able to bury it the only story that fits

309
00:13:22,900 --> 00:13:20,080
the fact is that if she buried the

310
00:13:25,270 --> 00:13:22,910
Starchild being and then somehow died

311
00:13:27,280 --> 00:13:25,280
herself next to it but felt such a

312
00:13:29,560 --> 00:13:27,290
strong attachment that she wanted to

313
00:13:33,700 --> 00:13:29,570

hold its hand or have it holding her arm

314

00:13:37,270 --> 00:13:33,710

for all eternity are there any clues to

315

00:13:40,960 --> 00:13:37,280

how she died we don't know unfortunately

316

00:13:44,260 --> 00:13:40,970

with with only having the skulls we

317

00:13:46,960 --> 00:13:44,270

don't have any obvious head injuries

318

00:13:49,570 --> 00:13:46,970

there is a healed concussion a healed

319

00:13:51,610 --> 00:13:49,580

fracture on the skull of the human

320

00:13:52,960 --> 00:13:51,620

female so she could have been just stark

321

00:13:55,840 --> 00:13:52,970

raving mad we have no way of knowing

322

00:13:57,730 --> 00:13:55,850

this but it was healed she did not die

323

00:14:00,450 --> 00:13:57,740

from that injury they died from

324

00:14:05,269 --> 00:14:00,460

something else we just don't know what

325

00:14:07,309 --> 00:14:05,279

and that is just so crazy um

326

00:14:09,559 --> 00:14:07,319

I've heard from numerous interviews the

327

00:14:12,980 --> 00:14:09,569

skull has been DNA tested which seems to

328

00:14:15,410 --> 00:14:12,990

be obviously the most reliable way to

329

00:14:17,119 --> 00:14:15,420

figure out what is going on here and

330

00:14:19,970 --> 00:14:17,129

I've but I've heard that the mother was

331

00:14:22,519 --> 00:14:19,980

human and then the father was a mystery

332

00:14:24,739 --> 00:14:22,529

and now I've heard from a more recent

333

00:14:26,420 --> 00:14:24,749

interview on coast-to-coast that I

334

00:14:29,900 --> 00:14:26,430

understand that both parents are in

335

00:14:31,519 --> 00:14:29,910

question what's the deal there well we

336

00:14:34,489 --> 00:14:31,529

have a policy at the Starchild project

337

00:14:36,980 --> 00:14:34,499

of putting out information as soon as we

338

00:14:39,350 --> 00:14:36,990

have it and so sometimes the result of

339

00:14:41,179 --> 00:14:39,360

that is we put things out before we have

340

00:14:43,759 --> 00:14:41,189

all of the facts and we have to

341

00:14:45,739 --> 00:14:43,769

backtrack a little bit when we did the

342

00:14:48,379 --> 00:14:45,749

first round of DNA testing was all the

343

00:14:50,780 --> 00:14:48,389

way back in nineteen ninety nine that

344

00:14:53,569 --> 00:14:50,790

test was just a disaster it was a

345

00:14:55,280 --> 00:14:53,579

complete contamination the result that

346

00:14:58,579 --> 00:14:55,290

they got was that it was a one hundred

347

00:15:01,100 --> 00:14:58,589

percent human male and we we released

348

00:15:04,040 --> 00:15:01,110

that information and then in 2003 we

349

00:15:06,319 --> 00:15:04,050

found out that that test was was

350

00:15:08,179 --> 00:15:06,329

contaminated it was just wrong because

351

00:15:10,699 --> 00:15:08,189

we did another test at a much more

352

00:15:13,670 --> 00:15:10,709

sophisticated lab that was designed for

353

00:15:16,579 --> 00:15:13,680

testing ancient DNA and that test was

354

00:15:19,610 --> 00:15:16,589

able to recover maternal DNA DNA from

355

00:15:21,829 --> 00:15:19,620

its mother but no DNA from the father we

356

00:15:24,559 --> 00:15:21,839

knew there was DNA there it's just

357

00:15:27,019 --> 00:15:24,569

looking for human DNA from the father we

358

00:15:28,819 --> 00:15:27,029

weren't able to find any and so the

359

00:15:30,319 --> 00:15:28,829

theory then became well it must have a

360

00:15:33,470 --> 00:15:30,329

human mother since we found a small

361

00:15:35,720 --> 00:15:33,480

amount of human maternal DNA and maybe

362

00:15:39,350 --> 00:15:35,730

it has an alien father because we cannot

363

00:15:42,139 --> 00:15:39,360

find any paternal human DNA and that's

364

00:15:44,420 --> 00:15:42,149

been our story since since then that's

365

00:15:47,210 --> 00:15:44,430

what the evidence that we had up until

366

00:15:49,429 --> 00:15:47,220

very recently told us this latest round

367

00:15:52,040 --> 00:15:49,439

of DNA testing that we've done is even

368

00:15:54,019 --> 00:15:52,050

more sophisticated it's I mean DNA

369

00:15:55,819 --> 00:15:54,029

testing has just gone by leaps and

370

00:15:58,519 --> 00:15:55,829

bounds in the in the last few years

371

00:16:00,590 --> 00:15:58,529

we've gone from the stone ages right up

372

00:16:02,269 --> 00:16:00,600

to the latest cutting-edge technology

373

00:16:06,319 --> 00:16:02,279

and what we're doing now and these

374

00:16:10,189 --> 00:16:06,329

latest DNA tests recovered more of the

375

00:16:14,509 --> 00:16:10,199

maternal DNA and that maternal DNA that

376

00:16:16,549 --> 00:16:14,519

was found in 2003 was indeed human or or

377

00:16:18,940 --> 00:16:16,559

at least close enough to human that we

378

00:16:21,160 --> 00:16:18,950

could identify it as being

379

00:16:25,210 --> 00:16:21,170

human but now that we know that we have

380

00:16:27,220 --> 00:16:25,220

much more of the mother's DNA we can see

381

00:16:30,460 --> 00:16:27,230

that parts of it are indeed human or

382

00:16:32,740 --> 00:16:30,470

very human-like but much bigger parts

383

00:16:37,090 --> 00:16:32,750

are not much bigger parts are very very

384

00:16:39,310 --> 00:16:37,100

very unusual there are two kinds of DNA

385

00:16:41,560 --> 00:16:39,320

in all of us we've got mitochondrial DNA

386

00:16:44,110 --> 00:16:41,570

that's only for my mother and nuclear

387

00:16:45,790 --> 00:16:44,120

DNA that's from both parents the nuclear

388

00:16:47,500 --> 00:16:45,800

DNA is what they talk about when they

389

00:16:49,330 --> 00:16:47,510

talk about the human genome it's the

390

00:16:52,060 --> 00:16:49,340

thing that that basically makes us

391

00:16:55,330 --> 00:16:52,070

individuals as we are the mitochondrial

392

00:16:57,250 --> 00:16:55,340

DNA is all about energy mitochondria at

393

00:16:59,470 --> 00:16:57,260

the powerhouse of ourselves you can't

394

00:17:02,290 --> 00:16:59,480

survive without them they have a very

395

00:17:05,350 --> 00:17:02,300

specialized task and they need much much

396

00:17:06,819 --> 00:17:05,360

much less DNA to do that task so we're

397

00:17:10,630 --> 00:17:06,829

just going to focus in on that

398

00:17:12,460 --> 00:17:10,640

mitochondrial DNA all of us all humans

399

00:17:15,130 --> 00:17:12,470

every race every person on the planet

400

00:17:17,980 --> 00:17:15,140

has within a hundred and twenty

401
00:17:19,390 --> 00:17:17,990
differences in that DNA of each other

402
00:17:21,040 --> 00:17:19,400
there are only a hundred and twenty

403
00:17:23,949 --> 00:17:21,050
collective differences amongst all

404
00:17:26,290 --> 00:17:23,959
humans from what we've recovered from

405
00:17:28,180 --> 00:17:26,300
the Starchild it's going to end up

406
00:17:31,480 --> 00:17:28,190
having between eight hundred and a

407
00:17:33,850 --> 00:17:31,490
thousand differences so 120 amongst all

408
00:17:36,490 --> 00:17:33,860
humans and eight hundred to a thousand

409
00:17:38,230 --> 00:17:36,500
differences in the Starchild it's just

410
00:17:41,110 --> 00:17:38,240
off the charts difference so even though

411
00:17:44,380 --> 00:17:41,120
there are elements of it that are human

412
00:17:46,180 --> 00:17:44,390
or human enough to be recognized there

413
00:17:48,130 --> 00:17:46,190

there's no way to say that it had a

414

00:17:50,280 --> 00:17:48,140

human mother so yes you're right both

415

00:17:53,350 --> 00:17:50,290

parents are definitely on the table now

416

00:17:57,880 --> 00:17:53,360

so I'm obviously not an expert in DNA

417

00:18:01,830 --> 00:17:57,890

testing but um it I how is it possible

418

00:18:05,200 --> 00:18:01,840

that there could be elements of human

419

00:18:07,300 --> 00:18:05,210

mitochondrial DNA which would give

420

00:18:10,210 --> 00:18:07,310

evidence to suggest the mother was human

421

00:18:14,550 --> 00:18:10,220

if it is you know the alternative which

422

00:18:17,620 --> 00:18:14,560

is completely foreign to this planet

423

00:18:19,090 --> 00:18:17,630

well think about it we humans shed

424

00:18:21,970 --> 00:18:19,100

genetic material with just about

425

00:18:23,740 --> 00:18:21,980

everything on this planet we're whatever

426

00:18:26,250 --> 00:18:23,750

it is ninety-five percent the same as a

427

00:18:29,980 --> 00:18:26,260

gorilla sixty percent the same as a rat

428

00:18:32,320 --> 00:18:29,990

to be alive on this planet requires your

429

00:18:32,740 --> 00:18:32,330

body to be able to synthesize a certain

430

00:18:34,540 --> 00:18:32,750

protein

431

00:18:37,480 --> 00:18:34,550

means to do certain things to deal with

432

00:18:39,700 --> 00:18:37,490

certain elements and minerals that exist

433

00:18:40,900 --> 00:18:39,710

on this planet it makes sense that if

434

00:18:43,060 --> 00:18:40,910

you have something that's going to be

435

00:18:45,070 --> 00:18:43,070

able to survive on this planet it's

436

00:18:48,070 --> 00:18:45,080

going to have some of those same

437

00:18:50,350 --> 00:18:48,080

characteristics now when when we're

438

00:18:53,320 --> 00:18:50,360

talking about this mitochondrial DNA

439

00:18:56,260 --> 00:18:53,330

your entire genome everything that makes

440

00:18:59,080 --> 00:18:56,270

you you is about three billion base

441

00:19:01,150 --> 00:18:59,090

pairs a base pair is every step in the

442

00:19:02,890 --> 00:19:01,160

ladder of DNA so if you picture that the

443

00:19:05,880 --> 00:19:02,900

double helix letter each step is a base

444

00:19:08,650 --> 00:19:05,890

pair just the mitochondrial DNA is

445

00:19:10,690 --> 00:19:08,660

sixteen thousand five hundred and sixty

446

00:19:13,090 --> 00:19:10,700

nine of those base pairs so basically

447

00:19:15,970 --> 00:19:13,100

sixteen and a half thousand verses three

448

00:19:20,230 --> 00:19:15,980

billion so it's a much smaller much more

449

00:19:22,300 --> 00:19:20,240

concentrated part of your DNA so if you

450

00:19:24,520 --> 00:19:22,310

that that's not to say that there

451
00:19:27,220 --> 00:19:24,530
couldn't be an alien species out there

452
00:19:29,500 --> 00:19:27,230
that is radically different from us not

453
00:19:31,600 --> 00:19:29,510
a single skerrick of their DNA anything

454
00:19:34,090 --> 00:19:31,610
like ours but the odds are it probably

455
00:19:36,280 --> 00:19:34,100
wouldn't be able to survive or do well

456
00:19:39,070 --> 00:19:36,290
on this planet at all it wouldn't have

457
00:19:41,440 --> 00:19:39,080
what it needs to be able to cope here so

458
00:19:43,270 --> 00:19:41,450
if you have an alien being living here

459
00:19:46,090 --> 00:19:43,280
that's managing that surviving that's

460
00:19:47,950 --> 00:19:46,100
eating that's going on then it's it

461
00:19:51,070 --> 00:19:47,960
seems pretty reasonable to us that it

462
00:19:52,870 --> 00:19:51,080
would have some elements of its DNA that

463
00:19:54,850 --> 00:19:52,880

are the same and when we're talking

464

00:19:58,240 --> 00:19:54,860

about some elements we're only talking

465

00:20:00,280 --> 00:19:58,250

about 30 to 50 of those base pairs of

466

00:20:02,560 --> 00:20:00,290

those steps in the ladder out of 16 and

467

00:20:06,010 --> 00:20:02,570

a half thousand that were recovered in

468

00:20:09,190 --> 00:20:06,020

2003 just small little segments of it

469

00:20:11,830 --> 00:20:09,200

that are very human or human-like and in

470

00:20:14,350 --> 00:20:11,840

between those segments that are human or

471

00:20:16,990 --> 00:20:14,360

human-like we have radical differences

472

00:20:19,270 --> 00:20:17,000

things that no human could survive if my

473

00:20:22,600 --> 00:20:19,280

DNA was like that I would be dead so

474

00:20:26,020 --> 00:20:22,610

fast we just cannot function cannot

475

00:20:28,000 --> 00:20:26,030

survive if our DNA was as different as

476

00:20:29,650 --> 00:20:28,010

the Starchild's DNA is already turning

477

00:20:32,410 --> 00:20:29,660

out to be we've only got about ten

478

00:20:34,960 --> 00:20:32,420

percent of that 16 and a half thousand

479

00:20:38,920 --> 00:20:34,970

but nonetheless it's it's enough that we

480

00:20:41,169 --> 00:20:38,930

can see already you me any normal human

481

00:20:42,760 --> 00:20:41,179

could not survive if it had the

482

00:20:46,360 --> 00:20:42,770

differences we've already found in the

483

00:20:46,990 --> 00:20:46,370

Starchild skulls DNA fair do you think

484

00:20:51,100 --> 00:20:47,000

there's a way

485

00:20:53,440 --> 00:20:51,110

2 plus assume the Starchild skull is as

486

00:20:58,260 --> 00:20:53,450

alien is there a way to map a new

487

00:21:01,810 --> 00:20:58,270

species genome from the Starchild oh

488

00:21:03,820 --> 00:21:01,820

absolutely that's actually our our goal

489

00:21:06,220 --> 00:21:03,830

the testing that we've done so far is

490

00:21:08,410 --> 00:21:06,230

very preliminary what we want to do is

491

00:21:10,330 --> 00:21:08,420

recover the entire genome which your

492

00:21:12,790 --> 00:21:10,340

call took years when they were doing it

493

00:21:14,950 --> 00:21:12,800

for humans but now that they've kind of

494

00:21:17,320 --> 00:21:14,960

worked the kinks out of that system it's

495

00:21:20,920 --> 00:21:17,330

really only a one to two-year process so

496

00:21:23,080 --> 00:21:20,930

that the next thing for us is to get the

497

00:21:26,170 --> 00:21:23,090

funding that we need to complete the

498

00:21:28,390 --> 00:21:26,180

entire genome recovery and see exactly

499

00:21:32,560 --> 00:21:28,400

how similar and how different it is from

500

00:21:34,690 --> 00:21:32,570

human it's already well off the charts

501
00:21:37,120 --> 00:21:34,700
it's already different enough that I

502
00:21:39,430 --> 00:21:37,130
think anyone would be confident calling

503
00:21:40,960 --> 00:21:39,440
it a different species remember every

504
00:21:43,120 --> 00:21:40,970
human has only a hundred and twenty

505
00:21:44,770 --> 00:21:43,130
differences we've only got ten percent

506
00:21:47,290 --> 00:21:44,780
of the Starchild's genome online and a

507
00:21:50,110 --> 00:21:47,300
half percent we've already found 93

508
00:21:54,430 --> 00:21:50,120
differences in there so if we don't find

509
00:21:56,530 --> 00:21:54,440
a single other difference I mean I we're

510
00:21:59,410 --> 00:21:56,540
already well past the point of calling

511
00:22:01,750 --> 00:21:59,420
it a new species Neanderthals which are

512
00:22:04,720 --> 00:22:01,760
very clearly a different species they

513
00:22:06,250 --> 00:22:04,730

only have 200 differences from the

514

00:22:07,870 --> 00:22:06,260

baseline from which humans have a

515

00:22:09,820 --> 00:22:07,880

hundred and twenty differences so that

516

00:22:12,400 --> 00:22:09,830

80 is enough to core Neanderthals and

517

00:22:14,290 --> 00:22:12,410

new species we've got 93 already in the

518

00:22:16,450 --> 00:22:14,300

Starchild so if Neanderthals are

519

00:22:18,580 --> 00:22:16,460

different species the Starchild skulls

520

00:22:20,910 --> 00:22:18,590

are different species at the very least

521

00:22:24,670 --> 00:22:20,920

and we think much more likely a

522

00:22:28,780 --> 00:22:24,680

completely alien life-form well is there

523

00:22:31,840 --> 00:22:28,790

is the the chemistry that makes up the

524

00:22:34,180 --> 00:22:31,850

bone are there any differences between

525

00:22:37,390 --> 00:22:34,190

that and normal bone that we know of

526

00:22:40,390 --> 00:22:37,400

between you know humans or animal it's

527

00:22:43,930 --> 00:22:40,400

made of the same general stuff as human

528

00:22:46,780 --> 00:22:43,940

bones are made out of the the balance of

529

00:22:49,300 --> 00:22:46,790

the different minerals within the bone

530

00:22:53,080 --> 00:22:49,310

is is a little different it seems to

531

00:22:55,660 --> 00:22:53,090

have much more collagen just gram for

532

00:22:57,760 --> 00:22:55,670

gram than human bone would have in the

533

00:22:59,800 --> 00:22:57,770

order of two to three times as much now

534

00:23:00,669 --> 00:22:59,810

that's very interesting I don't know if

535

00:23:03,159 --> 00:23:00,679

you're aware of this but

536

00:23:05,139 --> 00:23:03,169

collagen is absolutely essential to the

537

00:23:07,600 --> 00:23:05,149

healing process so the fact that it has

538

00:23:10,210 --> 00:23:07,610

so much more collagen makes us one that

539

00:23:13,629 --> 00:23:10,220

maybe it had some extra kind of healing

540

00:23:15,909 --> 00:23:13,639

ability that perhaps we don't have in in

541

00:23:17,980 --> 00:23:15,919

terms of the biochemistry of the bone

542

00:23:21,070 --> 00:23:17,990

it's actually pretty similar to tooth

543

00:23:23,289 --> 00:23:21,080

enamel but somehow manages to be more

544

00:23:25,960 --> 00:23:23,299

flexible than tooth enamel so that's

545

00:23:28,799 --> 00:23:25,970

what makes us so very very interested in

546

00:23:31,600 --> 00:23:28,809

these fibers we're extremely excited

547

00:23:33,369 --> 00:23:31,610

about what we can do in the future

548

00:23:35,440 --> 00:23:33,379

medically with the information that

549

00:23:37,840 --> 00:23:35,450

we're going to get out of the Starchild

550

00:23:40,029 --> 00:23:37,850

skulls bone we like to think that one

551
00:23:42,970 --> 00:23:40,039
day we'll be able to really benefit

552
00:23:45,999 --> 00:23:42,980
humanity from what comes out of this

553
00:23:47,799 --> 00:23:46,009
skull that at this stage it's hard to

554
00:23:50,080 --> 00:23:47,809
know absolutely nothing could end up

555
00:23:52,499 --> 00:23:50,090
coming out of it but the the fact that

556
00:23:56,080 --> 00:23:52,509
this being was able to live and survive

557
00:23:58,389 --> 00:23:56,090
with such incredible differences really

558
00:24:00,340 --> 00:23:58,399
opens up the playing field for what can

559
00:24:03,430 --> 00:24:00,350
be done what can be accomplished and

560
00:24:05,379 --> 00:24:03,440
that we're very interested to see how

561
00:24:09,249 --> 00:24:05,389
that pans out out once we're able to get

562
00:24:11,259 --> 00:24:09,259
the genome recovered yeah now the mine

563
00:24:14,139 --> 00:24:11,269

that it was found in has it been

564

00:24:15,999 --> 00:24:14,149

completely explored for any type of

565

00:24:19,109 --> 00:24:16,009

other artifact or any type of other

566

00:24:21,909 --> 00:24:19,119

weird anomalous stuff down there

567

00:24:24,009 --> 00:24:21,919

actually no we have never mounted an

568

00:24:26,019 --> 00:24:24,019

expedition down there to try and find

569

00:24:28,659 --> 00:24:26,029

the mineshaft that the girl recovered

570

00:24:31,659 --> 00:24:28,669

the skulls from she claims that she took

571

00:24:33,999 --> 00:24:31,669

both full skeletons with her and lost

572

00:24:36,070 --> 00:24:34,009

the skeletons she was only able to hold

573

00:24:38,320 --> 00:24:36,080

on to the skulls there was a flood and

574

00:24:40,389 --> 00:24:38,330

she lost the other bones but she does

575

00:24:42,999 --> 00:24:40,399

she was able to recover the skull so

576
00:24:44,830 --> 00:24:43,009
there could be a ravine in Mexico

577
00:24:47,739 --> 00:24:44,840
somewhere with the entire rest of these

578
00:24:50,049 --> 00:24:47,749
skeletons in there or there could be

579
00:24:51,609 --> 00:24:50,059
dozens of others in that same mine

580
00:24:52,989 --> 00:24:51,619
tunnel we just don't know and

581
00:24:55,960 --> 00:24:52,999
unfortunately with the current

582
00:24:59,830 --> 00:24:55,970
instability in that area we're not

583
00:25:01,389 --> 00:24:59,840
really eager to go down there and it

584
00:25:02,769 --> 00:25:01,399
just seems a little dangerous for us at

585
00:25:05,139 --> 00:25:02,779
the moment but that's definitely

586
00:25:07,600 --> 00:25:05,149
something that we're very interested in

587
00:25:09,369 --> 00:25:07,610
doing in the future yeah I mean that's

588
00:25:10,960 --> 00:25:09,379

that's to me was one of the things I've

589

00:25:12,549 --> 00:25:10,970

never heard asked and I always wondered

590

00:25:13,860 --> 00:25:12,559

because it seems like you know here's

591

00:25:16,170 --> 00:25:13,870

here's a pinpoint

592

00:25:19,410 --> 00:25:16,180

wear something this crazy has been found

593

00:25:22,560 --> 00:25:19,420

and now that seems like the place to

594

00:25:25,680 --> 00:25:22,570

explore well it's a very large pinpoint

595

00:25:27,720 --> 00:25:25,690

we have a general area southwest of

596

00:25:29,460 --> 00:25:27,730

Chihuahua in the Copper Canyon region we

597

00:25:31,860 --> 00:25:29,470

don't know exactly what mine tunnel and

598

00:25:35,580 --> 00:25:31,870

there are thousands of them in that area

599

00:25:38,040 --> 00:25:35,590

so it would be a very arduous expedition

600

00:25:39,440 --> 00:25:38,050

to go and to find and explore each of

601
00:25:42,360 --> 00:25:39,450
these mine tunnels so it's a very

602
00:25:44,250 --> 00:25:42,370
substantial time commitment and

603
00:25:46,200 --> 00:25:44,260
financial commitment to be able to go

604
00:25:48,299 --> 00:25:46,210
and do it so right now we're just

605
00:25:50,010 --> 00:25:48,309
focusing on the one that we have in hand

606
00:25:52,500 --> 00:25:50,020
and we'll worry about trying to find the

607
00:25:54,980 --> 00:25:52,510
two in the bush down the road what are

608
00:25:58,320 --> 00:25:54,990
the other goals of the Starchild project

609
00:26:02,090 --> 00:25:58,330
besides obviously trying to map some

610
00:26:04,200 --> 00:26:02,100
type of Jeanette genome from this skull

611
00:26:06,630 --> 00:26:04,210
without that really is the

612
00:26:08,640 --> 00:26:06,640
all-encompassing goal right now we want

613
00:26:12,419 --> 00:26:08,650

to get the entire genome from the skull

614

00:26:14,940 --> 00:26:12,429

and tell everyone what we have we intend

615

00:26:17,580 --> 00:26:14,950

to actually make documentary films about

616

00:26:19,620 --> 00:26:17,590

the testing process about everything

617

00:26:22,020 --> 00:26:19,630

that's come out of the skull we really

618

00:26:25,919 --> 00:26:22,030

believe that this could be the first

619

00:26:28,680 --> 00:26:25,929

absolute undisputable solid tangible

620

00:26:31,830 --> 00:26:28,690

evidence of aliens visiting planet Earth

621

00:26:33,780 --> 00:26:31,840

now that's not to say that we operate at

622

00:26:37,799 --> 00:26:33,790

the exclusion of every other possibility

623

00:26:39,270 --> 00:26:37,809

but we as far as we can tell that is the

624

00:26:41,460 --> 00:26:39,280

direction that all of the facts are

625

00:26:43,650 --> 00:26:41,470

pointing and instead of ruling it out of

626

00:26:46,260 --> 00:26:43,660

hand because you do that's what crazy

627

00:26:48,299 --> 00:26:46,270

people wearing tinfoil hats think we're

628

00:26:51,000 --> 00:26:48,309

prepared to explore that possibility and

629

00:26:53,370 --> 00:26:51,010

if that's what it is everyone needs to

630

00:26:57,390 --> 00:26:53,380

know about this this is going to be so

631

00:27:00,510 --> 00:26:57,400

significant to everything to everyone on

632

00:27:02,640 --> 00:27:00,520

this planet that we want to give as many

633

00:27:05,460 --> 00:27:02,650

people as possible an opportunity to

634

00:27:08,160 --> 00:27:05,470

inform themselves to be aware of it to

635

00:27:10,860 --> 00:27:08,170

have happened whatever good can come out

636

00:27:13,230 --> 00:27:10,870

of this I mean there's obviously tons of

637

00:27:16,190 --> 00:27:13,240

stories of visitation a lot of people

638

00:27:21,120 --> 00:27:16,200

suggest that all religions were based on

639

00:27:23,520 --> 00:27:21,130

visitation beans coming from the sky but

640

00:27:26,610 --> 00:27:23,530

outside of the Starchild skull have you

641

00:27:27,310 --> 00:27:26,620

seen any other like what's the next most

642

00:27:28,720 --> 00:27:27,320

compelling

643

00:27:30,640 --> 00:27:28,730

evidence you've heard of a Valan

644

00:27:33,610 --> 00:27:30,650

visitation or obscene or is there any is

645

00:27:37,600 --> 00:27:33,620

there any other skull or our bones found

646

00:27:40,390 --> 00:27:37,610

anywhere well there is a lot of

647

00:27:43,390 --> 00:27:40,400

compelling anecdotal and film evidence

648

00:27:45,880 --> 00:27:43,400

but as far as bones go I would say the

649

00:27:48,400 --> 00:27:45,890

next likely candidate is the conehead

650

00:27:50,410 --> 00:27:48,410

skulls in Peru there are a number of

651
00:27:52,390 --> 00:27:50,420
schools that are clearly human that have

652
00:27:54,430 --> 00:27:52,400
just been artificially deformed they

653
00:27:56,980 --> 00:27:54,440
they wrap cloths around the skull and

654
00:27:59,980 --> 00:27:56,990
force them into kind of a conehead shape

655
00:28:03,160 --> 00:27:59,990
but then there are hundreds literally

656
00:28:05,620 --> 00:28:03,170
hundreds of other skulls where the bone

657
00:28:07,480 --> 00:28:05,630
is twice as thick as normal human bone

658
00:28:10,000 --> 00:28:07,490
the eye sockets are a little different

659
00:28:12,250 --> 00:28:10,010
the jaws are different and most

660
00:28:14,980 --> 00:28:12,260
significantly there is twice as much

661
00:28:17,800 --> 00:28:14,990
brain inside that skull and there are

662
00:28:19,390 --> 00:28:17,810
hundreds of these these are clearly not

663
00:28:21,550 --> 00:28:19,400

any kind of human as we currently

664

00:28:23,680 --> 00:28:21,560

understand that there's no evidence of

665

00:28:26,920 --> 00:28:23,690

artificial head binding on any of them

666

00:28:28,360 --> 00:28:26,930

they are just absolutely off the charts

667

00:28:31,390 --> 00:28:28,370

different so that would be the next

668

00:28:34,300 --> 00:28:31,400

thing that we would like to investigate

669

00:28:37,660 --> 00:28:34,310

and in fact my associate lloyd pye has

670

00:28:40,450 --> 00:28:37,670

already taken the steps of working with

671

00:28:43,510 --> 00:28:40,460

people inside peru with the scientific

672

00:28:47,800 --> 00:28:43,520

community there on moving forward with

673

00:28:49,950 --> 00:28:47,810

that testing process I mean I did the

674

00:28:54,340 --> 00:28:49,960

skull to me it does look like a typical

675

00:28:55,870 --> 00:28:54,350

like gray alien from you know what the

676
00:28:58,420 --> 00:28:55,880
composite that most people have put

677
00:29:01,210 --> 00:28:58,430
together you know through Hollywood and

678
00:29:03,190 --> 00:29:01,220
stuff and it really is fascinating i

679
00:29:04,720 --> 00:29:03,200
just i think the skull is so crazy and

680
00:29:06,460 --> 00:29:04,730
the fact that people try to dismiss it

681
00:29:08,650 --> 00:29:06,470
as you know this conditioner of that

682
00:29:11,500 --> 00:29:08,660
condition it's all kind of null and void

683
00:29:13,810 --> 00:29:11,510
when you look at the fibers apparently

684
00:29:16,450 --> 00:29:13,820
the brain capacity is larger the

685
00:29:18,160 --> 00:29:16,460
thickness of the skull those are all

686
00:29:22,450 --> 00:29:18,170
ways that those aren't related going to

687
00:29:24,460 --> 00:29:22,460
be related to any disease well there was

688
00:29:26,530 --> 00:29:24,470

actually a girl that we worked with the

689

00:29:28,660 --> 00:29:26,540

number of years ago who wanted to do her

690

00:29:31,900 --> 00:29:28,670

university thesis on the Starchild skull

691

00:29:34,210 --> 00:29:31,910

and she started out doing a very serious

692

00:29:36,000 --> 00:29:34,220

analysis of it and then she got the word

693

00:29:38,650 --> 00:29:36,010

from her professors that if you don't

694

00:29:40,630 --> 00:29:38,660

start discrediting this thing pretty

695

00:29:43,690 --> 00:29:40,640

quick we're going to fail you and

696

00:29:45,490 --> 00:29:43,700

so she from that it went and found I

697

00:29:48,190 --> 00:29:45,500

think she ended up with about two dozen

698

00:29:50,230 --> 00:29:48,200

different conditions that if somehow a

699

00:29:52,810 --> 00:29:50,240

person had all two dozen of these

700

00:29:55,870 --> 00:29:52,820

conditions they would be kind of like

701
00:29:58,240 --> 00:29:55,880
the Starchild skull unfortunately those

702
00:30:00,130 --> 00:29:58,250
conditions contraindicated each other so

703
00:30:02,530 --> 00:30:00,140
it would have been absolutely impossible

704
00:30:05,140 --> 00:30:02,540
but nonetheless that was the closest

705
00:30:07,930 --> 00:30:05,150
anyone's ever come to being able to

706
00:30:09,970 --> 00:30:07,940
explain it I guarantee you and your

707
00:30:12,880 --> 00:30:09,980
listeners that if this had an easy

708
00:30:15,040 --> 00:30:12,890
answer we would love to find it we have

709
00:30:16,630 --> 00:30:15,050
been looking for that for years but

710
00:30:18,880 --> 00:30:16,640
there just isn't anything out there that

711
00:30:21,490 --> 00:30:18,890
explains it if you say okay the skull is

712
00:30:23,260 --> 00:30:21,500
this shape and the the eye sockets are

713
00:30:26,050 --> 00:30:23,270

so shallow because it had pressure

714

00:30:28,420 --> 00:30:26,060

inside the skull well that would be

715

00:30:30,970 --> 00:30:28,430

great if there was any evidence of that

716

00:30:33,190 --> 00:30:30,980

whatsoever in fact we have evidence from

717

00:30:36,010 --> 00:30:33,200

cat-scans that there was no unusual

718

00:30:38,680 --> 00:30:36,020

pressure inside the skull anything that

719

00:30:42,100 --> 00:30:38,690

you can name there is a reason why it's

720

00:30:43,870 --> 00:30:42,110

absolutely impossible and they're still

721

00:30:45,970 --> 00:30:43,880

in a sales out there and that's fine

722

00:30:47,560 --> 00:30:45,980

they're they're welcome to keep

723

00:30:49,120 --> 00:30:47,570

believing that but people who really

724

00:30:51,700 --> 00:30:49,130

take the time to look at the evidence

725

00:30:53,620 --> 00:30:51,710

are always just amazed that's how we've

726

00:30:56,590 --> 00:30:53,630

managed to get such an incredibly

727

00:30:59,140 --> 00:30:56,600

reputable team on our side working on

728

00:31:01,560 --> 00:30:59,150

this even often to the mockery of their

729

00:31:05,080 --> 00:31:01,570

colleagues just because they can see how

730

00:31:07,060 --> 00:31:05,090

incredibly different how very important

731

00:31:10,450 --> 00:31:07,070

this skull is to the world of science

732

00:31:12,340 --> 00:31:10,460

and to the future of the human race well

733

00:31:14,530 --> 00:31:12,350

elaborate on that are you facing our

734

00:31:16,540 --> 00:31:14,540

resistance from the academic and

735

00:31:18,100 --> 00:31:16,550

scientific communities are there 0

736

00:31:21,910 --> 00:31:18,110

reluctance to look at this thing

737

00:31:24,310 --> 00:31:21,920

seriously Oh always it's it's been an

738

00:31:27,040 --> 00:31:24,320

enormous hurdle for us for every one

739

00:31:29,620 --> 00:31:27,050

person that really paid attention and

740

00:31:31,540 --> 00:31:29,630

looks at the evidence and says okay

741

00:31:33,310 --> 00:31:31,550

let's let's get some more information

742

00:31:35,220 --> 00:31:33,320

before I make a decision there are a

743

00:31:38,260 --> 00:31:35,230

hundred people who make a snap decision

744

00:31:40,630 --> 00:31:38,270

without even looking at it in many cases

745

00:31:42,460 --> 00:31:40,640

without doing any research without

746

00:31:44,200 --> 00:31:42,470

looking at any of the research that

747

00:31:46,360 --> 00:31:44,210

we've done and they'll just say

748

00:31:48,490 --> 00:31:46,370

offhandedly it's a deformity or it's

749

00:31:50,650 --> 00:31:48,500

this or it's that or nature can do

750

00:31:52,960 --> 00:31:50,660

anything and you're just backing up the

751
00:31:54,610 --> 00:31:52,970
wrong tree and that's what is so

752
00:31:57,190 --> 00:31:54,620
exciting to us about the day

753
00:31:59,590 --> 00:31:57,200
and a because you can't argue with DNA

754
00:32:01,920 --> 00:31:59,600
there is a lot we don't understand about

755
00:32:05,110 --> 00:32:01,930
nuclear DNA the 3 billion base pairs

756
00:32:07,060 --> 00:32:05,120
there is about ninety-five percent of

757
00:32:09,760 --> 00:32:07,070
that that we really don't know exactly

758
00:32:11,740 --> 00:32:09,770
what it does but the mitochondrial DNA

759
00:32:13,540 --> 00:32:11,750
the 16 and a half thousand that we

760
00:32:16,030 --> 00:32:13,550
already have nine and a half percent of

761
00:32:19,600 --> 00:32:16,040
that had the 93 differences in it

762
00:32:22,240 --> 00:32:19,610
already that doesn't have great swaths

763
00:32:24,040 --> 00:32:22,250

that we don't understand that is some of

764

00:32:27,730 --> 00:32:24,050

the most highly conserved genetic

765

00:32:30,430 --> 00:32:27,740

material that exists within the human

766

00:32:32,740 --> 00:32:30,440

body if very much goes wrong with and

767

00:32:36,840 --> 00:32:32,750

that part of your DNA you just can't

768

00:32:39,640 --> 00:32:36,850

survive it is so crucial and now we have

769

00:32:42,930 --> 00:32:39,650

very solid evidence that within that

770

00:32:47,110 --> 00:32:42,940

crucial can't be changed part of the DNA

771

00:32:49,510 --> 00:32:47,120

we have changes that no one has ever

772

00:32:51,970 --> 00:32:49,520

seen before we've really finally got the

773

00:32:53,919 --> 00:32:51,980

kind of evidence that we need to be able

774

00:32:58,299 --> 00:32:53,929

to put down the naysayers once and for

775

00:33:02,020 --> 00:32:58,309

all what is the Starchild skull up for

776

00:33:04,900 --> 00:33:02,030

display anywhere no one unfortunately

777

00:33:06,610 --> 00:33:04,910

it's not we have replicas that we take

778

00:33:11,620 --> 00:33:06,620

with us to conferences and events like

779

00:33:14,380 --> 00:33:11,630

that but the real skull has a number of

780

00:33:15,850 --> 00:33:14,390

large sections cut out of it for

781

00:33:19,000 --> 00:33:15,860

different testing that has been done

782

00:33:23,080 --> 00:33:19,010

over the course of the last 12 years and

783

00:33:26,110 --> 00:33:23,090

so we intend once all is said and done

784

00:33:28,960 --> 00:33:26,120

to get those large missing sections

785

00:33:31,000 --> 00:33:28,970

repaired and then hope to display it at

786

00:33:33,280 --> 00:33:31,010

a museum so I'm where but for the moment

787

00:33:35,020 --> 00:33:33,290

it's it's in such bad shape and we're

788

00:33:37,510 --> 00:33:35,030

returning to it so often to get new

789

00:33:40,810 --> 00:33:37,520

samples that there's no way to really

790

00:33:42,549 --> 00:33:40,820

display it effectively right because I

791

00:33:45,370 --> 00:33:42,559

would I would love to see I'm sure a lot

792

00:33:46,600 --> 00:33:45,380

of people would well Manette the next

793

00:33:52,450 --> 00:33:46,610

best thing is the Starchild project

794

00:33:54,010 --> 00:33:52,460

website wwlp.com there is a ton of free

795

00:33:56,350 --> 00:33:54,020

information there for anyone that's

796

00:33:57,730 --> 00:33:56,360

interested you'll find most of your

797

00:33:58,990 --> 00:33:57,740

questions are answered but if they're

798

00:34:01,630 --> 00:33:59,000

not we always love to hear from people

799

00:34:02,770 --> 00:34:01,640

yeah it's it's a great website I love

800

00:34:04,780 --> 00:34:02,780

the video that's right up in the front

801
00:34:05,940 --> 00:34:04,790
it outlines a lot of the differences

802
00:34:09,240 --> 00:34:05,950
between the skull

803
00:34:11,190 --> 00:34:09,250
normal human skulls I think it's awesome

804
00:34:14,669 --> 00:34:11,200
to hear that you know you guys are on

805
00:34:16,710 --> 00:34:14,679
your way to mapping some type of genome

806
00:34:18,659 --> 00:34:16,720
from this I'm sure obviously is going to

807
00:34:22,490 --> 00:34:18,669
take a long time how did you originally

808
00:34:25,069 --> 00:34:22,500
get involved with the project yourself

809
00:34:28,349 --> 00:34:25,079
well I've been with the project since

810
00:34:31,680 --> 00:34:28,359
2004 and I actually came on initially as

811
00:34:33,720 --> 00:34:31,690
the webmaster and have just stuck with

812
00:34:36,450 --> 00:34:33,730
that ever since doing whatever needed to

813
00:34:38,760 --> 00:34:36,460

be done and now I'm their chief of

814

00:34:43,349 --> 00:34:38,770

operation still pretty much just doing

815

00:34:47,369 --> 00:34:43,359

whatever needs to be done are you guys

816

00:34:48,569 --> 00:34:47,379

finding with the reluctance from the

817

00:34:51,359 --> 00:34:48,579

scientific community are you having a

818

00:34:53,909 --> 00:34:51,369

hard time getting the proper funding it

819

00:34:56,790 --> 00:34:53,919

is difficult yes part of the problem is

820

00:34:58,380 --> 00:34:56,800

that we aren't yet to the point of

821

00:35:01,650 --> 00:34:58,390

publishing anything in a peer-reviewed

822

00:35:04,290 --> 00:35:01,660

journal we've had a number of informal

823

00:35:06,480 --> 00:35:04,300

reports done but the process of going

824

00:35:10,170 --> 00:35:06,490

through and getting it published in one

825

00:35:13,410 --> 00:35:10,180

of those papers can literally take years

826

00:35:15,839 --> 00:35:13,420

it's very arduous you need to have

827

00:35:19,290 --> 00:35:15,849

things proven to a level of certainty

828

00:35:21,750 --> 00:35:19,300

that we will absolutely have once we

829

00:35:24,180 --> 00:35:21,760

complete the genome testing but at this

830

00:35:29,280 --> 00:35:24,190

point our findings are preliminary so

831

00:35:32,220 --> 00:35:29,290

it's difficult to publish a findings

832

00:35:34,170 --> 00:35:32,230

report when you don't have your

833

00:35:36,630 --> 00:35:34,180

completed findings that does make things

834

00:35:38,819 --> 00:35:36,640

difficult for us but what we've found

835

00:35:40,559 --> 00:35:38,829

under the reason we have that policy of

836

00:35:43,319 --> 00:35:40,569

disclosing information as soon as it's

837

00:35:45,690 --> 00:35:43,329

available to us is that most people out

838

00:35:48,839 --> 00:35:45,700

there really don't care about whether

839

00:35:50,910 --> 00:35:48,849

you've used enough big words or how many

840

00:35:52,829 --> 00:35:50,920

different phd's have looked at it

841

00:35:55,950 --> 00:35:52,839

they're they're perfectly happy with one

842

00:35:58,140 --> 00:35:55,960

PhD and just the fact just the

843

00:36:00,030 --> 00:35:58,150

information and so that's what we're

844

00:36:02,700 --> 00:36:00,040

doing right now we're just focusing on

845

00:36:06,329 --> 00:36:02,710

getting those facts out to people as

846

00:36:09,000 --> 00:36:06,339

easily and as quickly as we can that's

847

00:36:11,069 --> 00:36:09,010

fair and I hope that this interview

848

00:36:14,069 --> 00:36:11,079

helps that process along in its own

849

00:36:15,599 --> 00:36:14,079

little way and Amy before I let you go

850

00:36:17,170 --> 00:36:15,609

I've kind of got to challenge you a

851

00:36:19,450 --> 00:36:17,180

little bit because where I am

852

00:36:21,569 --> 00:36:19,460

pretty much accepting of anything that

853

00:36:24,040 --> 00:36:21,579

makes life a little more interesting

854

00:36:25,540 --> 00:36:24,050

friend of mine her mo and frequent

855

00:36:27,460 --> 00:36:25,550

guests the show takes a little more

856

00:36:29,980 --> 00:36:27,470

skeptical approach to these types of

857

00:36:32,770 --> 00:36:29,990

situations when I told him I was going

858

00:36:37,540 --> 00:36:32,780

to be having you on he researched the

859

00:36:39,250 --> 00:36:37,550

website and sent me his opinion on the

860

00:36:40,839 --> 00:36:39,260

situation which I'd like to read for you

861

00:36:43,620 --> 00:36:40,849

and give you a chance to respond if you

862

00:36:46,270 --> 00:36:43,630

don't object please save me some answers

863

00:36:47,740 --> 00:36:46,280

okay well great while he does admit the

864

00:36:50,410 --> 00:36:47,750

skull is strange and pretty

865

00:36:52,000 --> 00:36:50,420

unexplainable he adds this the main

866

00:36:53,950 --> 00:36:52,010

thing that I find really strange about

867

00:36:55,839 --> 00:36:53,960

the situation is that mr. Pye talks

868

00:36:57,280 --> 00:36:55,849

consistently about how the skull and the

869

00:36:59,140 --> 00:36:57,290

research surrounding it is being

870

00:37:01,569 --> 00:36:59,150

completely shunned by the academic

871

00:37:02,799 --> 00:37:01,579

science elite he chalks his ideas up is

872

00:37:04,720 --> 00:37:02,809

another one of those compelling

873

00:37:06,819 --> 00:37:04,730

paranormal finds that science ignores

874

00:37:09,250 --> 00:37:06,829

and that suggestion sounds absolutely

875

00:37:11,170 --> 00:37:09,260

preposterous to me there's a whole lot

876

00:37:12,910 --> 00:37:11,180

of scientists in this world who spend

877

00:37:14,170 --> 00:37:12,920

their entire adult lives digging in the

878

00:37:16,839 --> 00:37:14,180

ground hoping to find something

879

00:37:18,880 --> 00:37:16,849

interesting if this find is genuine it

880

00:37:20,710 --> 00:37:18,890

doesn't make any sense that scientists

881

00:37:22,599 --> 00:37:20,720

wouldn't be jumping over one another to

882

00:37:24,609 --> 00:37:22,609

study it for themselves if you had a

883

00:37:26,410 --> 00:37:24,619

strange really old-looking skull I

884

00:37:28,780 --> 00:37:26,420

guarantee you would walk into any

885

00:37:30,819 --> 00:37:28,790

properly outfitted University biology

886

00:37:32,680 --> 00:37:30,829

department in the country and say I want

887

00:37:34,960 --> 00:37:32,690

to know if this is human and you'd find

888

00:37:38,859 --> 00:37:34,970

an eager person who will run the PCR on

889

00:37:40,390 --> 00:37:38,869

the DNA for free yet mr. PI X like

890

00:37:42,640 --> 00:37:40,400

everyone is avoiding this skull because

891

00:37:44,770 --> 00:37:42,650

of some ingrained scientific bias and

892

00:37:47,410 --> 00:37:44,780

that he has to jump through hoops to get

893

00:37:49,270 --> 00:37:47,420

anyone to look at it and of course he

894

00:37:51,280 --> 00:37:49,280

needs people to donate to his site so we

895

00:37:53,530 --> 00:37:51,290

can pay to have the test run and that's

896

00:37:56,410 --> 00:37:53,540

why I don't like it that's obviously a

897

00:37:58,599 --> 00:37:56,420

very skeptical view but that was the

898

00:38:01,240 --> 00:37:58,609

most damning of what he had to say he

899

00:38:02,950 --> 00:38:01,250

did admit it is very odd and there is no

900

00:38:04,510 --> 00:38:02,960

answer and there you know with testing

901
00:38:08,980 --> 00:38:04,520
if it was human there should be an

902
00:38:11,049 --> 00:38:08,990
answer well no absolutely and I I fully

903
00:38:14,349 --> 00:38:11,059
respect everyone's right to their

904
00:38:16,420 --> 00:38:14,359
opinion and that's what I thought to my

905
00:38:19,210 --> 00:38:16,430
first contact with the project was

906
00:38:21,220 --> 00:38:19,220
writing mr. PI an email saying you've

907
00:38:23,710 --> 00:38:21,230
got to be joking if this was a real

908
00:38:26,079 --> 00:38:23,720
thing then I work in an archaeology

909
00:38:27,789 --> 00:38:26,089
department I'm sure that they would love

910
00:38:29,650 --> 00:38:27,799
to do this testing for you but this is

911
00:38:30,450 --> 00:38:29,660
obviously a hoax because you're asking

912
00:38:36,240 --> 00:38:30,460
for donations

913
00:38:37,440 --> 00:38:36,250

to maintain the site if anyone would

914

00:38:39,089 --> 00:38:37,450

like to donate a couple of million

915

00:38:42,480 --> 00:38:39,099

dollars will be more than happy to do

916

00:38:46,320 --> 00:38:42,490

the DNA testing but it's it's certainly

917

00:38:47,820 --> 00:38:46,330

not a a lap of luxury kind of thinking

918

00:38:51,270 --> 00:38:47,830

it would be a lot nicer for me if it was

919

00:38:53,640 --> 00:38:51,280

but we really do use the donations for

920

00:38:56,820 --> 00:38:53,650

testing for maintenance of the website

921

00:39:01,740 --> 00:38:56,830

for very legitimate things to do with

922

00:39:03,839 --> 00:39:01,750

the testing process I can understand the

923

00:39:06,839 --> 00:39:03,849

concerns but anyone who's ever actually

924

00:39:10,410 --> 00:39:06,849

tried to do this can tell you that's not

925

00:39:13,290 --> 00:39:10,420

how it works at all it is a very

926
00:39:15,030 --> 00:39:13,300
competitive environment there is only a

927
00:39:16,980 --> 00:39:15,040
certain amount of funding available for

928
00:39:19,050 --> 00:39:16,990
a certain amount of things and if you

929
00:39:21,000 --> 00:39:19,060
don't fit into whatever the flavor of

930
00:39:23,160 --> 00:39:21,010
the month happens to be you're going to

931
00:39:25,980 --> 00:39:23,170
have a really hard time getting that

932
00:39:28,740 --> 00:39:25,990
funding we have tried taking this in

933
00:39:31,620 --> 00:39:28,750
fact if for came on board with it mr.

934
00:39:34,260 --> 00:39:31,630
pie extensively tried to take this to

935
00:39:36,450 --> 00:39:34,270
various universities and other places to

936
00:39:38,099 --> 00:39:36,460
have it tested to have the work done we

937
00:39:40,680 --> 00:39:38,109
just so completely idiotic that there's

938
00:39:42,540 --> 00:39:40,690

an easy solution and we're just

939

00:39:46,140 --> 00:39:42,550

stumbling around for 12 years without

940

00:39:50,010 --> 00:39:46,150

trying it again I respect his right to

941

00:39:52,020 --> 00:39:50,020

his opinion but this is this is one of

942

00:39:55,740 --> 00:39:52,030

those things where it should be that

943

00:39:58,109 --> 00:39:55,750

easy science should be willing to tackle

944

00:40:01,530 --> 00:39:58,119

anything that it comes across and i'm

945

00:40:04,230 --> 00:40:01,540

not talking about individual people I'm

946

00:40:08,280 --> 00:40:04,240

talking about the establishment of

947

00:40:10,470 --> 00:40:08,290

mainstream science as almost a religion

948

00:40:14,010 --> 00:40:10,480

where certain things have to be adhered

949

00:40:16,530 --> 00:40:14,020

to certain steps have to be followed if

950

00:40:18,690 --> 00:40:16,540

you aren't willing to follow every one

951
00:40:21,870 --> 00:40:18,700
of those steps precisely because this

952
00:40:25,320 --> 00:40:21,880
was found by a tourist instead of being

953
00:40:28,740 --> 00:40:25,330
part of an archaeological dig because

954
00:40:30,150 --> 00:40:28,750
mr. Pye is indeed quite as token about

955
00:40:34,290 --> 00:40:30,160
this that there is a host of reasons

956
00:40:37,320 --> 00:40:34,300
that make it more attractive for people

957
00:40:40,770 --> 00:40:37,330
to shun it than to actually do any

958
00:40:43,920 --> 00:40:40,780
investigation into it and I I would love

959
00:40:46,720 --> 00:40:43,930
if if you're

960
00:40:51,220 --> 00:40:46,730
I'm sorry was it your friend there that

961
00:40:53,799 --> 00:40:51,230
rose in if they're able to show well sir

962
00:40:57,309 --> 00:40:53,809
I'm so glad that you do listen in and

963
00:41:00,519 --> 00:40:57,319

that you are listening in today but if

964

00:41:04,000 --> 00:41:00,529

you are able to find a university that

965

00:41:06,670 --> 00:41:04,010

is willing to do this is ancient DNA

966

00:41:09,220 --> 00:41:06,680

testing it's fairly complicated it's

967

00:41:12,029 --> 00:41:09,230

fairly expensive if you find us a lab

968

00:41:14,500 --> 00:41:12,039

willing to do it that would be fantastic

969

00:41:16,599 --> 00:41:14,510

please get in touch with us the contact

970

00:41:19,180 --> 00:41:16,609

information is on the website we would

971

00:41:22,809 --> 00:41:19,190

absolutely love to hear from you or any

972

00:41:24,970 --> 00:41:22,819

reputable institution that you have that

973

00:41:28,150 --> 00:41:24,980

is willing to undertake this testing

974

00:41:31,390 --> 00:41:28,160

well there you go her mo you know the

975

00:41:32,920 --> 00:41:31,400

challenge has been set it's not an

976

00:41:35,470 --> 00:41:32,930

opinion I agree with what I felt like if

977

00:41:37,510 --> 00:41:35,480

I didn't at least include it I would be

978

00:41:39,339 --> 00:41:37,520

doing them a disservice and I'm sure

979

00:41:40,960 --> 00:41:39,349

there are plenty of people thinking the

980

00:41:43,900 --> 00:41:40,970

same thing because I certainly did I

981

00:41:46,180 --> 00:41:43,910

couldn't believe that everyone wouldn't

982

00:41:48,460 --> 00:41:46,190

be jumping all over it and it's it's

983

00:41:51,789 --> 00:41:48,470

because in a lot of ways we went through

984

00:41:53,349 --> 00:41:51,799

the wrong channels to begin with and if

985

00:41:55,089 --> 00:41:53,359

it was easy to go through the right

986

00:41:58,870 --> 00:41:55,099

channels I'm sure that that's what they

987

00:42:00,789 --> 00:41:58,880

would have done but we have tried over

988

00:42:03,670 --> 00:42:00,799

more than a decade now just about

989

00:42:05,920 --> 00:42:03,680

everything you can think of and all I

990

00:42:07,390 --> 00:42:05,930

can say is if there's a way to get it

991

00:42:10,599 --> 00:42:07,400

done let us know we'll be more than

992

00:42:12,190 --> 00:42:10,609

happy to take on the suggestion well Amy

993

00:42:14,769 --> 00:42:12,200

I really appreciate you coming on the

994

00:42:16,120 --> 00:42:14,779

show I advise everyone to take a look at

995

00:42:18,970 --> 00:42:16,130

the skull I'm obviously going to have to

996

00:42:21,460 --> 00:42:18,980

include some pictures with it it is a

997

00:42:24,460 --> 00:42:21,470

really interesting fine and so far

998

00:42:27,130 --> 00:42:24,470

unexplainable and I wish you guys the

999

00:42:30,099 --> 00:42:27,140

best on your quest to blow this thing up

1000

00:42:31,870 --> 00:42:30,109

and get people talking about it back

1001

00:42:35,109 --> 00:42:31,880

thank you very much thanks for having me

1002

00:42:37,269 --> 00:42:35,119

on thanks for listening people check out

1003

00:42:38,859 --> 00:42:37,279

Lloyd named me at Starchild project calm

1004

00:42:41,289 --> 00:42:38,869

and keep up with me at the higher side

1005

00:42:43,690 --> 00:42:41,299

Jets calm and watch more episodes on the

1006

00:42:45,160 --> 00:42:43,700

THC youtube channel if you got the time

1007

00:42:47,190 --> 00:42:45,170

check out my new t-shirt line

1008

00:42:49,829 --> 00:42:47,200

conspiracies it can spirits

1009

00:42:51,480 --> 00:42:49,839

net into the coat higher side fifty

1010

00:42:56,359 --> 00:42:51,490

percent off and gets up a nice quick

1011

00:42:56,369 --> 00:43:28,000

brush clean

1012

00:43:28,010 --> 00:43:35,560

Oh

1013

00:43:35,570 --> 00:43:42,580

my problem is this and bring me the way

1014

00:43:42,590 --> 00:44:03,040

they truly exist

1015

00:44:03,050 --> 00:44:16,190

baby

1016

00:45:39,900 --> 00:45:21,940

you

1017

00:45:47,480 --> 00:45:41,809

by travelpod member

1018

00:45:47,490 --> 00:45:52,470

Oh
