

1  
00:00:03,949 --> 00:00:02,210  
real quick I'll wait a minute the

2  
00:00:08,480 --> 00:00:03,959  
[h\_\_\h] who are giving us all our

3  
00:00:11,299 --> 00:00:08,490  
information on space well hold on it's

4  
00:00:13,810 --> 00:00:11,309  
[h\_\_\h] NASA the same guys that fake six

5  
00:00:17,090 --> 00:00:13,820  
moon missions the greatest human

6  
00:00:20,420 --> 00:00:17,100  
achievement of all of all mankind they

7  
00:00:22,010 --> 00:00:20,430  
take six of them and this is for I

8  
00:00:23,900 --> 00:00:22,020  
thought we read like scientists just

9  
00:00:25,189 --> 00:00:23,910  
[h\_\_\h] oh there's all these scientists

10  
00:00:26,900 --> 00:00:25,199  
with their telescopes and they're

11  
00:00:29,210 --> 00:00:26,910  
looking and that's what I thought about

12  
00:00:31,700 --> 00:00:29,220  
all the science all the scientists are

13  
00:00:33,110 --> 00:00:31,710

the scientists all these scientists

14

00:00:33,860 --> 00:00:33,120

they're looking at telescopes that's

15

00:00:35,389 --> 00:00:33,870

what I thought

16

00:00:36,680 --> 00:00:35,399

they're all looking at Oh scoffs all

17

00:00:38,270 --> 00:00:36,690

these scientists they're looking at

18

00:00:40,130 --> 00:00:38,280

telescopes and then you find out they're

19

00:00:41,180 --> 00:00:40,140

not [h\_\_\h] looking at how many [h\_\_\h]

20

00:00:48,110 --> 00:00:41,190

scientists you think I look in

21

00:00:50,569 --> 00:00:48,120

telescopes and [h\_\_\h] with that [h\_\_\h]

22

00:00:52,549 --> 00:00:50,579

telescope that we had back then Galileo

23

00:00:54,740 --> 00:00:52,559

we figured it all out you start looking

24

00:00:56,540 --> 00:00:54,750

into goddamn it

25

00:00:58,459 --> 00:00:56,550

the same [h\_\_\h] who faked six

26  
00:01:00,380 --> 00:00:58,469  
moon missions these are the same guys

27  
00:01:02,779 --> 00:01:00,390  
that are giving us all our information

28  
00:01:04,340 --> 00:01:02,789  
on space right there I'm like oh I'm

29  
00:01:05,899 --> 00:01:04,350  
trying to debunk this [h\_\_h] and then

30  
00:01:08,030 --> 00:01:05,909  
really quick I'm like that because every

31  
00:01:09,410 --> 00:01:08,040  
conspiracy theorist not a flat earther

32  
00:01:11,179 --> 00:01:09,420  
but every just regular conspiracy

33  
00:01:13,130 --> 00:01:11,189  
theorist they will always say they're

34  
00:01:14,870 --> 00:01:13,140  
lying to us everything they're saying to

35  
00:01:15,289 --> 00:01:14,880  
us they're lying to us everything is a

36  
00:01:17,270 --> 00:01:15,299  
lie

37  
00:01:19,429 --> 00:01:17,280  
they're all saying but the information

38  
00:01:22,160 --> 00:01:19,439

about space no that's true I get that

39

00:01:23,539 --> 00:01:22,170

true no it's [h\_\_h] all [h\_\_h] well

40

00:01:25,190 --> 00:01:23,549

all you gotta do is look into it and

41

00:01:28,060 --> 00:01:25,200

you're gonna realize that it's all

42

00:01:30,950 --> 00:01:28,070

[h\_\_h] all the information on space

43

00:01:31,160 --> 00:01:30,960

[h\_\_h] all right let's hear Joey let's

44

00:01:32,569 --> 00:01:31,170

go

45

00:01:38,890 --> 00:01:32,579

I will say one thing and then I'll fall

46

00:01:43,370 --> 00:01:43,100

Studies on this guy's come on man you

47

00:01:45,920 --> 00:01:43,380

are

48

00:01:48,140 --> 00:01:45,930

can you name five scientists and dinner

49

00:02:15,610 --> 00:01:48,150

alive name finds five scientists that

50

00:02:17,810 --> 00:02:15,620

are alive scientists so roughly

51  
00:02:19,460 --> 00:02:17,820  
approximately how many hours have you

52  
00:02:26,000 --> 00:02:19,470  
spent looking through a telescope

53  
00:02:26,449 --> 00:02:26,010  
studying stars and I'm not a dope let's

54  
00:02:27,890 --> 00:02:26,459  
do it

55  
00:02:29,660 --> 00:02:27,900  
okay so this is where it gets really

56  
00:02:31,130 --> 00:02:29,670  
complicated because the way the science

57  
00:02:33,170 --> 00:02:31,140  
works is specialization and the way to

58  
00:02:34,430 --> 00:02:33,180  
get really good at something is to study

59  
00:02:36,560 --> 00:02:34,440  
in depth and you specialize in one

60  
00:02:37,880 --> 00:02:36,570  
particular area exactly areas is

61  
00:02:42,289 --> 00:02:37,890  
physical systems so I do

62  
00:02:46,009 --> 00:02:42,299  
fluvio systems water erosion but now

63  
00:02:47,690 --> 00:02:46,019

that you would work without gravity but

64

00:02:49,100 --> 00:02:47,700

I'm sorry typically literate so I

65

00:02:50,120 --> 00:02:49,110

understand other scientists when they

66

00:02:51,530 --> 00:02:50,130

tell me stuff and they can interpret

67

00:02:54,080 --> 00:02:51,540

software but the fact of the matter is

68

00:02:55,430 --> 00:02:54,090

that most most general people don't have

69

00:02:59,660 --> 00:02:55,440

the scientific literacy to understand

70

00:03:02,270 --> 00:02:59,670

the scientific did to me prove to me

71

00:03:05,030 --> 00:03:02,280

right now without saying that other

72

00:03:09,410 --> 00:03:05,040

scientists figured it out without listen

73

00:03:11,090 --> 00:03:09,420

without without saying that giving me

74

00:03:13,699 --> 00:03:11,100

some information that you can't prove

75

00:03:17,690 --> 00:03:13,709

how do you know that the world is a ball

76  
00:03:18,890 --> 00:03:17,700  
how do you know the the way that the way

77  
00:03:20,539 --> 00:03:18,900  
that the way that the songs of you

78  
00:03:22,160 --> 00:03:20,549  
daughter is interpreted and collided is

79  
00:03:23,600 --> 00:03:22,170  
to take it and to test it against all

80  
00:03:24,770 --> 00:03:23,610  
the scientists and scientists hired each

81  
00:03:28,970 --> 00:03:24,780  
other and they want to be smarter than

82  
00:03:31,100 --> 00:03:28,980  
other scientists but you have to answer

83  
00:03:33,050 --> 00:03:31,110  
his question that's not really answering

84  
00:03:38,390 --> 00:03:33,060  
what move did the world the actual

85  
00:03:41,090 --> 00:03:38,400  
answer what is that the world everything

86  
00:03:42,530 --> 00:03:41,100  
comes down we're now talking to you man

87  
00:03:43,849 --> 00:03:42,540  
it's all it's all boiled down to

88  
00:03:45,259 --> 00:03:43,859

mathematics and it's all proved by

89

00:03:47,119 --> 00:03:45,269

mathematical models and the way the

90

00:03:48,949 --> 00:03:47,129

mathematical models are created is by

91

00:03:49,530 --> 00:03:48,959

interpreting data and reproducing that

92

00:03:50,899 --> 00:03:49,540

data to create

93

00:03:52,559 --> 00:03:50,909

a model that it accurately represents

94

00:03:54,569 --> 00:03:52,569

real-time data and real-time

95

00:03:56,280 --> 00:03:54,579

observations when you can't accurately

96

00:03:57,720 --> 00:03:56,290

represent that data and you create a

97

00:03:59,520 --> 00:03:57,730

model that is in accurate this is what

98

00:04:00,990 --> 00:03:59,530

is all the OP a say [h\_\_h] they do all

99

00:04:02,190 --> 00:04:01,000

these these projections and they said

100

00:04:03,569 --> 00:04:02,200

things are gonna be really really

101  
00:04:04,830 --> 00:04:03,579  
intense and think is gonna be crazy and

102  
00:04:07,380 --> 00:04:04,840  
then the Sailor was gonna go up and

103  
00:04:08,910 --> 00:04:07,390  
Madoff in in the next twenty years but

104  
00:04:10,500 --> 00:04:08,920  
that was the worst case scenario and

105  
00:04:12,179 --> 00:04:10,510  
that's what they tried to push because I

106  
00:04:13,080 --> 00:04:12,189  
wanted to get everybody worried to be on

107  
00:04:14,789 --> 00:04:13,090  
it because they're trying to push that

108  
00:04:16,740 --> 00:04:14,799  
agenda that's something we need to worry

109  
00:04:18,479 --> 00:04:16,750  
about but why making people think it's

110  
00:04:20,189 --> 00:04:18,489  
worse than it is that's where you end up

111  
00:04:21,900 --> 00:04:20,199  
causing all this you have people go oh

112  
00:04:22,950 --> 00:04:21,910  
you said things are gonna go two degrees

113  
00:04:25,050 --> 00:04:22,960

and it's an ego about point four eight

114

00:04:27,510 --> 00:04:25,060

degrees one degree is enough to really

115

00:04:32,070 --> 00:04:27,520

ruin okay stop that's fine that's fine

116

00:04:34,140 --> 00:04:32,080

stop stop I want to not these guys on

117

00:04:50,270 --> 00:04:34,150

stage how many people believe he

118

00:04:54,930 --> 00:04:53,520

you know you know that the whole ball

119

00:04:58,500 --> 00:04:54,940

theory

120

00:05:00,810 --> 00:04:58,510

the first rule the first proof this

121

00:05:03,450 --> 00:05:00,820

would set everything in motion that

122

00:05:06,600 --> 00:05:03,460

though we live on a ball is that when

123

00:05:08,850 --> 00:05:06,610

when ships sail off in the ocean the

124

00:05:11,550 --> 00:05:08,860

they disappear over the horizon

125

00:05:13,560 --> 00:05:11,560

two miles right whole first and then

126

00:05:16,200 --> 00:05:13,570

mast so it appears to be going over a

127

00:05:18,719 --> 00:05:16,210

curve right so if something goes over a

128

00:05:21,779 --> 00:05:18,729

curve and you can't see it anymore

129

00:05:25,080 --> 00:05:21,789

because of the curve would you be able

130

00:05:26,939 --> 00:05:25,090

to zoom in on it with with the zoom lens

131

00:05:28,680 --> 00:05:26,949

if it goes over the curve well I'm not a

132

00:05:39,810 --> 00:05:28,690

special no no no no no this is just

133

00:05:42,360 --> 00:05:39,820

basic science hold on hold on hold on

134

00:05:44,610 --> 00:05:42,370

hold on all I said I'm a really simple

135

00:05:47,820 --> 00:05:44,620

I'm not a scientist I'm not gonna get in

136

00:05:50,159 --> 00:05:47,830

a war with you with scientific terms but

137

00:05:52,740 --> 00:05:50,169

let me ask this a simple question a kid

138

00:05:55,830 --> 00:05:52,750

can understand this question we see a

139

00:05:58,890 --> 00:05:55,840

ship going away on the horizon right and

140

00:05:59,730 --> 00:05:58,900

then it starts disappearing hole first

141

00:06:02,700 --> 00:05:59,740

mass loss

142

00:06:03,330 --> 00:06:02,710

correct correct okay so then once it

143

00:06:05,360 --> 00:06:03,340

fully

144

00:06:13,530 --> 00:06:05,370

it's going over a curve Eddie correct

145

00:06:21,090 --> 00:06:16,830

there's no reason for interruption you

146

00:06:24,680 --> 00:06:21,100

see a ship you see a ship you see a ship

147

00:06:42,960 --> 00:06:24,690

going over hole first mass last right

148

00:06:47,490 --> 00:06:42,970

right Eddie Eddie

149

00:07:02,850 --> 00:06:47,500

stop stop it's a simple question

150

00:07:43,160 --> 00:07:02,860

I don't believe that question but if I

151  
00:07:46,620 --> 00:07:46,110  
I'm going to finish this one way or

152  
00:07:51,210 --> 00:07:46,630  
another

153  
00:07:53,760 --> 00:07:51,220  
[h\_\_\h] it's a simple [h\_\_\h] question it's

154  
00:07:56,370 --> 00:07:53,770  
a simple question ship this is how the

155  
00:08:03,960 --> 00:07:56,380  
whole boat theory started because they

156  
00:08:07,200 --> 00:08:03,970  
see him ship Jesus you know I feel bad

157  
00:08:09,210 --> 00:08:07,210  
for a security right now whom I have to

158  
00:08:12,300 --> 00:08:09,220  
throw people out and like and I'm going

159  
00:08:13,650 --> 00:08:12,310  
out going to choke me out I'll train

160  
00:08:15,720 --> 00:08:13,660  
here yes

161  
00:08:17,820 --> 00:08:15,730  
you guys want to hear this question yeah

162  
00:08:21,420 --> 00:08:17,830  
that's real simple a child could

163  
00:08:23,430 --> 00:08:21,430

understand this this is the most basic

164

00:08:26,130 --> 00:08:23,440

this is first grade science it is a

165

00:08:31,260 --> 00:08:26,140

science question but it's first grade

166

00:08:33,720 --> 00:08:31,270

science right ship disappears over the

167

00:08:36,060 --> 00:08:33,730

horizon in the ocean it all started

168

00:08:39,240 --> 00:08:36,070

whole first mass class because it's

169

00:08:43,560 --> 00:08:39,250

going over a curve if that ship really

170

00:08:45,780 --> 00:08:43,570

went over a curve scientifically would

171

00:08:47,550 --> 00:08:45,790

you be able to zoom in on it if you

172

00:08:49,830 --> 00:08:47,560

would had a zoom lens and zoom that

173

00:08:59,220 --> 00:08:49,840

thing back in sorry typically the only

174

00:09:03,670 --> 00:08:59,230

problem is look it up okay okay come

175

00:09:07,940 --> 00:09:05,630

okay okay

176

00:09:09,530 --> 00:09:07,950

okay one more time let me just make the

177

00:09:13,790 --> 00:09:09,540

question nice and clear

178

00:09:17,720 --> 00:09:13,800

look a ship there's over a curve it

179

00:09:19,640 --> 00:09:17,730

disappears over the horizon you can't

180

00:09:21,650 --> 00:09:19,650

see it anymore because it went over and

181

00:09:33,950 --> 00:09:21,660

went into an angle that's a scientific

182

00:09:35,360 --> 00:09:33,960

and okay so the atmosphere is curved

183

00:09:37,670 --> 00:09:35,370

are you recording to the ball theory

184

00:09:40,190 --> 00:09:37,680

right the atmosphere is curved light

185

00:09:41,900 --> 00:09:40,200

will trap the atmosphere acts as a wet

186

00:09:44,260 --> 00:09:41,910

ball essentially right the cell fiber

187

00:09:47,930 --> 00:09:44,270

optics work right you can have a glass

188

00:09:49,760 --> 00:09:47,940

cable that bends light through curves

189

00:09:51,500 --> 00:09:49,770

you can take a fiber-optic cables go

190

00:09:53,780 --> 00:09:51,510

into your TV or HD audio and that

191

00:09:57,710 --> 00:09:53,790

transmits light right how does light

192

00:09:59,360 --> 00:09:57,720

come out of the box this way and and you

193

00:10:01,670 --> 00:09:59,370

know so light comes out of your cable

194

00:10:04,220 --> 00:10:01,680

box going this way it goes into your TV

195

00:10:07,010 --> 00:10:04,230

going this way it goes to a curve so the

196

00:10:09,380 --> 00:10:07,020

atmosphere acts as a curved lens that

197

00:10:12,170 --> 00:10:09,390

refracts that light back so as the ship

198

00:10:37,370 --> 00:10:12,180

gets further you people observe that the

199

00:10:39,079 --> 00:10:37,380

ship's actually flip and i zoom in on it

200

00:10:40,670 --> 00:10:39,089

are you telling me the refraction is

201  
00:10:43,690 --> 00:10:40,680  
going to make me be able to zoom in on

202  
00:10:47,840 --> 00:10:43,700  
the person who went around the corner oh

203  
00:10:56,840 --> 00:10:47,850  
my god oh my god listen there's plenty

204  
00:10:59,510 --> 00:10:56,850  
of videos listen and then with just a

205  
00:11:01,100 --> 00:10:59,520  
nikon 900 or whatever they soon and it

206  
00:11:05,300 --> 00:11:01,110  
comes back in you're telling me that's a

207  
00:11:07,940 --> 00:11:05,310  
mirage it's a reflection I am I come on

208  
00:11:30,460 --> 00:11:07,950  
man come on we are not gonna answer zoom

209  
00:11:30,470 --> 00:11:54,030  
[Music]

210  
00:12:00,700 --> 00:11:56,920  
let's move on there's other things in

211  
00:12:07,840 --> 00:12:00,710  
the world there we go that's the [h\_\_\h]

212  
00:12:10,570 --> 00:12:07,850  
show right there you guys try stopping a

213  
00:12:14,080 --> 00:12:10,580

guy who's had three glasses of red wine

214

00:12:16,510 --> 00:12:14,090

and as [h\_\_h] tap the gray see you try

215

00:12:19,320 --> 00:12:16,520

doing that it's not easy

216

00:12:23,860 --> 00:12:19,330

oh do you think you're being invited to
