

1

00:00:00,000 --> 00:00:16,985

This series presents information based in part on theory and conjecture.

2

00:00:16,985 --> 00:00:21,508

The producer's purpose is to suggest some possible explanations, but not necessarily

3

00:00:21,508 --> 00:00:31,833

the only ones to the mysteries we will examine.

4

00:00:31,833 --> 00:00:37,836

It seems impossible that an empty desert could hide one of the world's greatest secrets.

5

00:00:37,836 --> 00:00:53,725

Yet in this wasteland stands a wondrous enigma, the great pyramids of ancient Egypt.

6

00:00:53,725 --> 00:00:58,727

Some call them tombs, others say they were beacons to ancient space men.

7

00:00:58,727 --> 00:01:02,369

Still others believe they are generators of energy.

8

00:01:02,369 --> 00:01:06,852

The secret of the pyramids has eluded men for thousands of years.

9

00:01:06,852 --> 00:01:17,377

If they were merely tombs for the pharaohs, why has no mummy ever been found in one?

10

00:01:17,377 --> 00:01:21,619

We do know that the ancients built great temples to the forces they believed ruled

11

00:01:21,619 --> 00:01:24,861

their lives after death.

12

00:01:24,861 --> 00:01:31,064

In sacred places near the pyramids, Egyptians prepared the most important of their citizens

13

00:01:31,064 --> 00:01:34,906

for a journey into life everlasting.

14

00:01:34,906 --> 00:01:40,990

No other ancient civilization lavished as much genius on defeating time, on defeating

15

00:01:40,990 --> 00:01:42,911

death.

16

00:01:42,911 --> 00:01:53,436

Is it possible the Egyptians succeeded?

17

00:01:53,436 --> 00:01:56,918

Cairo is often called the intellectual capital of the Arab world.

18

00:01:56,918 --> 00:02:02,441

It is a reputation founded in antiquity.

19

00:02:02,441 --> 00:02:07,844

Despite the crowding, poverty and conflicts of the present, Cairo is irrevocably linked

20

00:02:07,844 --> 00:02:10,045

to its brilliant past.

21

00:02:10,045 --> 00:02:18,489

On the outskirts of the city are the reminders of an incredible dream.

22

00:02:18,489 --> 00:02:24,212

From the summit of the great pyramid of chaos, it is still possible, after 4,000 years, to

23

00:02:24,212 --> 00:02:30,616

see ruined temples nestled at the foot of its ageless companion, the pyramid of Kefirn.

24

00:02:30,616 --> 00:02:35,458

Long ago, a staggering number of people and immense amounts of material were needed to

25

00:02:35,458 --> 00:02:37,540

construct the monoliths.

26

00:02:37,540 --> 00:02:42,302

The Egyptians must have had a very good reason for sacrificing so much.

27

00:02:42,302 --> 00:02:44,063

What was it?

28

00:02:44,063 --> 00:02:48,385

In its finished form, the great pyramid was gleaming white and was capped with a block

29

00:02:48,385 --> 00:02:50,426

of some special material.

30

00:02:50,426 --> 00:02:54,388

The cap may have been polished granite or even gold.

31

00:02:54,388 --> 00:02:59,071

Higher than a 40-story building, the great pyramid was an awesome monument to some higher

32

00:02:59,071 --> 00:03:02,353

order in an untamed desert world.

33

00:03:02,353 --> 00:03:09,356

It is awesome still, more than 40 centuries later.

34

00:03:09,356 --> 00:03:13,799

Through the ages, the mystery of the pyramid has inspired many theories.

35

00:03:13,799 --> 00:03:18,961

Among them, the idea that the pyramid is Earth-based One, remnant of the colonization of Earth

36

00:03:18,961 --> 00:03:25,445

by extraterrestrials.

37

00:03:25,445 --> 00:03:29,687

Researchers liken the pyramid to a mammoth radio beacon or a collector of some secret

38

00:03:29,687 --> 00:03:39,452

energy source.

39

00:03:39,452 --> 00:03:44,975

Whatever it was 4,000 years ago, it is today the single most perplexing monument in the

40

00:03:44,975 --> 00:03:46,656

world.

41

00:03:46,656 --> 00:03:51,178

What must the builders have been like?

42

00:03:51,178 --> 00:03:55,301

There is ample evidence that the ancients were fascinated with time and the rhythm of

43

00:03:55,301 --> 00:03:57,622

life along the Nile.

44

00:03:57,622 --> 00:04:07,387

Each year, their farmland would be renewed by rich deposits from the flooding river.

45

00:04:07,387 --> 00:04:13,110

If the soil could be revived, why not the spirit and body of man?

46

00:04:13,110 --> 00:04:17,592

The pyramids may have played a central part in a quest for immortality.

47

00:04:17,592 --> 00:04:23,516

Under their function, never has history seen such a total commitment of manpower and resources

48

00:04:23,516 --> 00:04:30,799

to a single task for so long a time.

49

00:04:30,799 --> 00:04:35,722

For each worker in the stone quarries or at the building site, several more would be needed

50

00:04:35,722 --> 00:04:42,966

to provide the food and other services required by so vast an enterprise.

51

00:04:42,966 --> 00:04:49,089

Unless the ancients had another way.

52

00:04:49,089 --> 00:04:52,451

Other great civilizations build artificial mountains.

53

00:04:52,451 --> 00:04:59,455

They reach above the jungle canopy of Yucatan and Central America.

54

00:04:59,455 --> 00:05:05,418

Steps to the stars.

55

00:05:05,418 --> 00:05:13,622

Man, however, has inspired the intense curiosity that the pyramids of Egypt have.

56

00:05:13,622 --> 00:05:18,625

Part of the Egyptian secret may be that theirs was the only civilization to perfect the true

57

00:05:18,625 --> 00:05:20,346

pyramid.

58

00:05:20,346 --> 00:05:25,268

That burst of genius apparently occurred in the third millennium before Christ at a place

59

00:05:25,268 --> 00:05:28,870

called Sakara, west of modern Cairo.

60

00:05:28,870 --> 00:05:33,272

A pharaoh named Zoser commissioned the first known Egyptian pyramid.

61

00:05:33,272 --> 00:05:38,515

If Zoser's pyramid was intended to be a tomb, it was an unusual one.

62

00:05:38,515 --> 00:05:42,277

Tombs had previously been simple structures of mud brick.

63

00:05:42,277 --> 00:05:47,560

Never had they been translated to stone and stacked one atop the other.

64

00:05:47,560 --> 00:05:52,362

The next step in the evolution of the true pyramid was to create a smooth facing on a

65

00:05:52,362 --> 00:05:54,243

stepped pyramid.

66

00:05:54,243 --> 00:05:57,565

The attempt failed and the pyramid collapsed.

67

00:05:57,565 --> 00:06:00,127

Only the central core was left standing.

68

00:06:00,127 --> 00:06:04,449

The disaster occurred as work was advancing on another pyramid.

69

00:06:04,449 --> 00:06:09,572

Mindful of the lesson, the architect obviously switched to a shallower angle, creating the

70

00:06:09,572 --> 00:06:17,456

so-called bent pyramid.

71

00:06:17,456 --> 00:06:22,378

The neighboring pyramid is newer and constructed at the same shallow angle as the upper portion

72

00:06:22,378 --> 00:06:25,180

of the bent pyramid.

73

00:06:25,180 --> 00:06:27,981

This continued for perhaps a thousand years.

74

00:06:27,981 --> 00:06:35,265

Incredibly, 80 structures survive, providing vivid examples of pyramid evolution.

75

00:06:35,265 --> 00:06:41,268

The glory days of the pyramid age came around 2500 BC, when the pharaoh Chaops ordered a

76

00:06:41,268 --> 00:06:43,950

pyramid built at Giza.

77

00:06:43,950 --> 00:06:50,953

The angles were steep and the scale gargantuan.

78

00:06:50,953 --> 00:06:54,555

Chaops' successor, Kephren, built another pyramid nearby.

79

00:06:54,555 --> 00:07:01,799

It is slightly smaller, but no less perfect in symmetry or design.

80

00:07:01,799 --> 00:07:06,642

The orthodox view is that the pyramids were constructed using large ramps of brick and

81

00:07:06,642 --> 00:07:07,882

earth.

82

00:07:07,882 --> 00:07:12,405

These ramps would be constructed at gentle angles, so that huge gangs of workers could

83

00:07:12,405 --> 00:07:15,706

push the big building blocks upwards.

84

00:07:15,706 --> 00:07:20,449

This traditional view holds that once the interior core of the pyramid was finished,

85

00:07:20,449 --> 00:07:25,051

the job of surfacing the pyramid would begin at the top and work down.

86

00:07:25,051 --> 00:07:28,693

The ramps would be dismantled along the way.

87

00:07:28,693 --> 00:07:32,776

How many years of labor must it have taken to move those blocks?

88

00:07:32,776 --> 00:07:38,178

When the Greek historian Herodotus stood at the foot of the great pyramid in 450 BC, he

89

00:07:38,178 --> 00:07:44,422

was told that it was built in 30 years by a rotating workforce of 120,000 men.

90

00:07:44,422 --> 00:07:48,824

Kephren's pyramid must have required a similar effort.

91

00:07:48,824 --> 00:07:53,707

It should be remembered that the Egyptians accomplished other feats in their golden age.

92

00:07:53,707 --> 00:08:00,190

They developed surgery, plotted the movements of their stars, and worked with advanced mathematics.

93

00:08:00,190 --> 00:08:04,472

What the ancients accomplished, they apparently did without benefit of the pulley or block

94

00:08:04,472 --> 00:08:07,594

and tackle.

95

00:08:07,594 --> 00:08:12,036

It is clear, however, that the Egyptians had developed the powers of their minds to a high

96

00:08:12,036 --> 00:08:13,677

degree.

97

00:08:13,677 --> 00:08:20,000

This is only beginning to learn what those powers can mean.

98

00:08:20,000 --> 00:08:28,405

The simple and amazing fact is that the Egyptians consistently built on a colossal scale.

99

00:08:28,405 --> 00:08:33,207

If we had only their monuments and temples to judge them by, we would have to assume

100

00:08:33,207 --> 00:09:00,742

they were a race of giants.

101

00:09:04,224 --> 00:09:07,426

What mystery did the Sphinx guard?

102

00:09:07,426 --> 00:09:11,268

Was there something inside the pyramid?

103

00:09:11,268 --> 00:09:17,031

In the 9th century AD, an Arab prince named Mahmoud rode to the pyramids with no thought

104

00:09:17,031 --> 00:09:22,754

of their grandeur.

105

00:09:22,754 --> 00:09:30,958

It was treasure he was after.

106

00:09:30,958 --> 00:09:38,682

As men set to work with gunpowder and battering rams, when they had breached the outer defenses

107

00:09:38,682 --> 00:09:43,445

of the pyramid, they found only a labyrinth of passageways and chambers.

108

00:09:43,445 --> 00:09:45,045

They were empty.

109

00:09:45,045 --> 00:09:48,327

The secret had not yielded to force.

110

00:09:48,327 --> 00:09:52,249

The great pyramid is unique in the complexity of its interior.

111

00:09:52,249 --> 00:09:56,291

Slicing the pyramid from north to south, we get this view.

112

00:09:56,291 --> 00:09:59,933

Our scale is exaggerated for a better look at the design.

113

00:09:59,933 --> 00:10:05,056

The pyramid rests on a central mound of unclear earth, perhaps left as a base for constructing

114

00:10:05,056 --> 00:10:07,297

the first few levels of blocks.

115

00:10:07,297 --> 00:10:12,340

The entrance is in the north face, 55 feet above the ground.

116

00:10:12,340 --> 00:10:19,624

A corridor extends 60 feet down into the pyramid where it joins another corridor, 129 feet

117

00:10:19,624 --> 00:10:21,024

in length.

118

00:10:21,024 --> 00:10:26,707

This corridor leads by another passageway to the so-called Queen's Chamber and to a

119

00:10:26,707 --> 00:10:32,390

gallery 153 feet long and 28 feet high.

120

00:10:32,390 --> 00:10:38,674

Beyond this magnificent gallery is the King's Chamber, repository of one of mankind's most

121

00:10:38,674 --> 00:10:40,835

enduring mysteries.

122

00:10:40,835 --> 00:10:45,798

Today visitors can see the chamber just as it was when it was opened a thousand years

123

00:10:45,798 --> 00:10:47,158

ago.

124

00:10:47,158 --> 00:10:51,360

It may indeed have been intended as the final resting place for chaos.

125

00:10:51,360 --> 00:10:56,963

No body has been found, however, and the rough finish of the granite centerpiece may indicate

126

00:10:56,963 --> 00:10:59,645

that the builders changed their minds.

127

00:10:59,645 --> 00:11:07,009

But here question piles upon question.

128

00:11:07,009 --> 00:11:13,452

Another puzzle is the existence of shafts extending from the King's Chamber and the grand gallery

129

00:11:13,452 --> 00:11:15,973

to the surface of the pyramid.

130

00:11:15,973 --> 00:11:20,496

They may have been designed simply for ventilation or they may have worth to align the pyramid

131

00:11:20,496 --> 00:11:26,219

with some planet or star which could be sighted through the shaft at regular intervals during

132

00:11:26,219 --> 00:11:30,541

the Earth's movement through the heavens.

133

00:11:30,541 --> 00:11:34,783

Surviving records of the pyramid age indicate that the Egyptians had an advanced knowledge

134

00:11:34,783 --> 00:11:36,304

of astronomy.

135

00:11:36,304 --> 00:11:41,187

This could explain how the faces of the pyramid are so precisely aligned with the cardinal

136

00:11:41,187 --> 00:11:42,868

points of the compass.

137

00:11:42,868 --> 00:11:48,791

It does not explain why it was so important for the pyramids to be perfectly tuned to

138

00:11:48,791 --> 00:11:53,753

the stars.

139

00:11:53,753 --> 00:11:58,716

The architectural patterns established so long ago by the best minds of Egypt are still

140

00:11:58,716 --> 00:12:00,677

in use today.

141

00:12:00,677 --> 00:12:05,320

Although no one knows anything for sure about the origin or purpose of the true pyramid,

142

00:12:05,320 --> 00:12:09,642

many believe they can tap its supposed powers.

143

00:12:09,642 --> 00:12:14,765

Belief in pyramid power has generated a multi-million dollar industry.

144

00:12:14,765 --> 00:12:18,927

Pyramid models are thought to be able to perform a variety of miracles from enhancing

145

00:12:18,927 --> 00:12:25,250

sexual potency to mummifying meat and sharpening razor blades.

146

00:12:25,250 --> 00:12:36,576

Others see in the dimensions of the Great Pyramid a detailed forecast of humanity's future.

147

00:12:36,576 --> 00:12:40,458

The future never seemed to be in doubt for the ancients.

148

00:12:40,458 --> 00:12:45,141

Others have labored for years over the hauntingly beautiful carvings that decorate the great

149

00:12:45,141 --> 00:12:52,344

monuments of Egypt.

150

00:12:52,344 --> 00:12:57,227

They tell us that the most important qualities of life were harmony with the gods and the

151

00:12:57,227 --> 00:13:00,549

permanence of the established order.

152

00:13:00,549 --> 00:13:05,791

In the panorama of Egypt's 27 centuries of unparalleled accomplishments, there was not

153

00:13:05,912 --> 00:13:10,674

the slightest indication that anyone thought it would ever come to an end.

154

00:13:10,674 --> 00:13:12,315

Yet it did.

155

00:13:12,315 --> 00:13:13,916

But why?

156

00:13:13,916 --> 00:13:18,518

Perhaps a clue lies in the belief that even the lifetime of the humblest peasant could

157

00:13:18,518 --> 00:13:20,639

extend beyond the grave.

158

00:13:20,639 --> 00:13:22,280

There was one condition.

159

00:13:22,280 --> 00:13:26,883

The body must remain preserved and undisturbed.

160

00:13:26,883 --> 00:13:33,966

The rites of death were performed in elaborate temples, waystations for the immortal soul.

161

00:13:33,966 --> 00:13:36,968

The body took 70 days.

162

00:13:36,968 --> 00:13:41,330

Internal organs were removed and the shell of the body treated with salts and exotic

163

00:13:41,330 --> 00:13:44,212

oils.

164

00:13:44,212 --> 00:13:48,414

Enough mummies have been found to testify to the skill of the ancient technicians of

165

00:13:48,414 --> 00:13:49,975

immortality.

166

00:13:49,975 --> 00:13:54,217

Is it possible the Egyptians dreamed of a day when techniques more advanced than their

167

00:13:54,217 --> 00:13:59,740

own could restore vigor to dry flesh?

168

00:13:59,740 --> 00:14:03,822

Egyptians are using modern techniques on the mummies, not to restore them to life, of

169

00:14:03,822 --> 00:14:09,785

course, but to learn something of the remarkable people who built pyramids and dreamed of life

170

00:14:09,785 --> 00:14:11,626

everlasting.

171

00:14:11,626 --> 00:14:16,789

X-rays reveal that the Egyptian of the period was small in stature and likely to fall victim

172

00:14:16,789 --> 00:14:21,031

to the same diseases which afflict mankind today.

173

00:14:21,031 --> 00:14:26,314

If the deceased was of noble blood, his funeral would include a symbolic boat.

174

00:14:26,314 --> 00:14:30,636

The boat would be borne by priests and the guys of the deities who would ensure that

175

00:14:30,636 --> 00:14:37,600

the spirit was ready for a voyage to the kingdom of the dead.

176

00:14:37,600 --> 00:14:42,282

There would be a preliminary voyage across the river Nile to the west bank where cities

177

00:14:42,282 --> 00:14:45,404

of the dead were traditionally built.

178

00:14:45,404 --> 00:14:52,408

After the pyramid age, the greatest of these was the Valley of the Kings in Upper Egypt.

179

00:14:57,330 --> 00:15:03,334

It was in the Valley of the Kings that Howard Carter discovered the undisturbed tomb of

180

00:15:04,094 --> 00:15:05,615

Tutankhamun.

181

00:15:05,615 --> 00:15:12,619

The discovery remains the richest in the history of Egyptian archaeology.

182

00:15:27,346 --> 00:15:34,350

Tutankhamun was a minor king who died young after a brief reign.

183

00:15:35,030 --> 00:15:39,553

K-ops reigned more than 20 years and had the wealth and the power to construct one of the

184

00:15:39,553 --> 00:15:41,554

wonders of the world.

185

00:15:41,554 --> 00:15:46,917

If the mortuary temple near the Great Pyramid is any indication, K-ops funeral must have

186

00:15:46,917 --> 00:15:49,838

been a far more lavish affair.

187

00:15:49,838 --> 00:15:55,481

If he was buried in the pyramid, he may be there still and with him, treasure beyond

188

00:15:55,481 --> 00:15:58,483

anything seen so far.

189

00:15:58,483 --> 00:16:04,486

Small wonder, K-ops took precautions.

190

00:16:04,486 --> 00:16:09,729

Once K-ops was entombed, the pyramid was sealed by workers inside.

191

00:16:09,729 --> 00:16:13,931

Starting with the ascending corridor, they would push or drop large blocks into each

192

00:16:13,931 --> 00:16:16,932

connection with another corridor.

193

00:16:16,932 --> 00:16:20,614

Did the workers then perish with their dead king?

194

00:16:20,614 --> 00:16:21,855

Probably not.

195

00:16:21,895 --> 00:16:27,258

A crude passageway has been found which starts deep beneath the pyramid and eventually leads

196

00:16:27,258 --> 00:16:29,779

back outside.

197

00:16:29,779 --> 00:16:35,782

The workers charged with protecting K-ops for all maternity apparently protected themselves

198

00:16:35,782 --> 00:16:40,425

with a hidden way out.

199

00:16:40,425 --> 00:16:47,429

It may be that the hidden way out provided looters with access to K-ops' tomb.

200

00:16:48,429 --> 00:16:55,433

It is just as likely that K-ops' secret is still safely locked inside the pyramid.

201

00:16:56,433 --> 00:17:02,437

At Stanford Research Laboratory in Menlo Park, California, a team directed by geophysicist

202

00:17:02,437 --> 00:17:08,440

Lambert Dolphin is preparing another assault on the secrets of the pyramid.

203

00:17:10,441 --> 00:17:15,443

The Great Pyramid is an example of a structure beautifully finished on the exterior originally.

204

00:17:15,443 --> 00:17:20,446

The casing stones were so perfect where you see them in place, they're beautifully accurately

205

00:17:20,446 --> 00:17:22,447

finished, but the interior stones are very rough.

206

00:17:22,447 --> 00:17:27,450

When you can crawl inside the interior passages, the tourist doesn't see.

207

00:17:27,450 --> 00:17:29,451

The interior construction is rough.

208

00:17:29,451 --> 00:17:35,454

That says to me that no astronauts from outer space using laser stone cutting tools built the pyramids.

209

00:17:35,454 --> 00:17:41,457

We've put razor blades inside the real pyramids and flowers and fruit.

210

00:17:41,457 --> 00:17:47,460

Our experience last time in the pyramid of K-ops was that the razor blades rusted, the flowers wilted,

211

00:17:47,460 --> 00:17:49,461

and rats ate the fruit.

212

00:17:49,461 --> 00:17:54,464

So first hand we have no evidence of pyramid power operating in the real pyramids.

213

00:17:54,464 --> 00:18:01,468

I personally am very skeptical about the power of the pyramids to influence human behavior or sharpen razor blades

214

00:18:01,468 --> 00:18:06,470

apart from the strong powers of human suggestion in a belief system.

215

00:18:06,470 --> 00:18:09,472

When people believe in something strongly, they can make it come true.

216

00:18:09,472 --> 00:18:14,475

And that's pyramidology and then that's a lot of other phenomenon as well.

217

00:18:14,475 --> 00:18:21,478

I'm skeptical also about lost golden tablets from Atlantis being buried in the area.

218

00:18:21,478 --> 00:18:27,481

I don't believe the Egyptians needed some kind of esoteric outer space technology to do what they did.

219

00:18:27,481 --> 00:18:29,483

What they did was very impressive.

220

00:18:29,483 --> 00:18:35,486

100,000 men working for 30 years is an awful lot of labor and effort to build one pyramid.

221

00:18:35,486 --> 00:18:38,487

And that kind of construction went on for 200-300 years.

222

00:18:38,487 --> 00:18:47,492

Dr. Dolphin is pioneering a new technology which may enable archeologists to peer through the pyramids electronically without destroying them.

223

00:18:51,494 --> 00:18:58,498

Our work in 1974 using radar was unsuccessful because radio signals do not penetrate the pyramids well.

224

00:18:58,498 --> 00:19:03,501

The sound, the radio waves are absorbed in the damp stone.

225

00:19:03,501 --> 00:19:11,505

We went back however last February with sound waves, acoustic sounding techniques, and found a number of anomalies.

226

00:19:11,505 --> 00:19:18,508

Places in the pyramids, around the pyramids where there appear to be either chambers, cracks, either man-made or natural.

227

00:19:18,508 --> 00:19:29,514

An example of an anomaly which we think needs to be checked further is an apparent cavity in between the king's chamber and the queen's chamber in the pyramid of chaos.

228

00:19:29,514 --> 00:19:33,516

Our sounder indicates something there where there ought to be solid rock.

229

00:19:36,518 --> 00:19:42,521

If there is a hidden chamber in the pyramid, will it contain unimaginable treasure?

230

00:19:42,521 --> 00:19:50,525

Or will it be just another cipher, leaving the long rest of chaos undisturbed and the secrets of the pyramids intact?

231

00:20:00,531 --> 00:20:08,535

As the treasures of Tutankhamun, two of the United States, it is clear that interest in Egyptology has never been greater.

232

00:20:08,535 --> 00:20:18,540

Perhaps people are responding to a dissatisfaction with the way modern thinkers view the world, a yearning to understand a more ancient and tranquil wisdom.

233

00:20:18,540 --> 00:20:28,545

I certainly believe that Western science has demythologized our contemporary society too much, that there really is mystery all around us.

234

00:20:28,545 --> 00:20:35,549

I'm dedicated to the rediscovery of the mystery in life, to the unknown, to the unusual, to the rare.

235

00:20:35,549 --> 00:20:42,553

I think that Egypt is a place where there are many exciting discoveries yet to be made. The pyramids still have their secrets.

236

00:20:42,553 --> 00:20:49,557

The discoveries to be made in the years to come are likely to be dramatic and sensational as man learns more about himself and his origins.

237

00:20:49,557 --> 00:20:55,560

And Cairo, its office is a city of mystery, and the east is an exotic place.

238

00:20:55,560 --> 00:21:04,564

It stirs the very best in man, and I think we've lost that kind of consciousness in the course of becoming Western-civilized man.

239

00:21:08,567 --> 00:21:19,572

Perhaps the ultimate accomplishment of the pyramid builders is yet to be realized. Their monuments may one day lead us to rediscover the greater wonder that is the mind of man.

240

00:21:20,573 --> 00:21:32,579

Coming up next, agents investigate the murder of Mine Workers Union candidate, Jacques Jablonski and his family on FBI, the Untold Stories.

241

00:21:32,579 --> 00:21:40,584

Then, history's crimes and trials chronicles the career of Peter Sutcliffe, the English brave digger they call the Yorkshire Ripper.

242

00:21:40,584 --> 00:21:45,586

Log on at veterans.com, a new website brought to you by the History Channel.

243

00:21:45,586 --> 00:21:54,591

Veterans.com, a place where veterans, their families and others can connect, share stories, and pass on the legacies of all American veterans.
