# Nancy Talbott

1  
00:00:04,220 --> 00:00:02,210  
hi everybody I'm bill burns yeah nancy

2  
00:00:07,369 --> 00:00:04,230  
burns here at work in future theater and

3  
00:00:12,230 --> 00:00:07,379  
you know we like to listen to mmm radio

4  
00:00:14,810 --> 00:00:12,240  
on sunday nights at 9pm and 9pm whatever

5  
00:00:17,810 --> 00:00:14,820  
oh oh the best network on the whole

6  
00:00:20,000 --> 00:00:17,820  
entire internet inception radio network

7  
00:00:49,760 --> 00:00:20,010  
you're locked into inception radio

8  
00:01:18,260 --> 00:00:52,160  
you

9  
00:01:23,460 --> 00:01:20,730  
welcome welcome welcome planet earth to

10  
00:01:26,760 --> 00:01:23,470  
paying radio tonight is Sunday November

11  
00:01:28,740 --> 00:01:26,770  
23rd 2014 and welcome to paying radio

12  
00:01:31,410 --> 00:01:28,750  
tonight we got a great show for you

13  
00:01:34,770 --> 00:01:31,420

tonight we have Nancy Talbot she

14

00:01:36,960 --> 00:01:34,780

actually had a mergency last week so she

15

00:01:38,730 --> 00:01:36,970

was trying to get a hold of us but we

16

00:01:41,400 --> 00:01:38,740

have her this week and part two will

17

00:01:43,260 --> 00:01:41,410

actually be the first sunday in december

18

00:01:45,630 --> 00:01:43,270

so we'll have her two weeks on here the

19

00:01:48,180 --> 00:01:45,640

first week we'll be covering scientific

20

00:01:50,430 --> 00:01:48,190

the scientific side of crop circles and

21

00:01:52,410 --> 00:01:50,440

then the second week more of the

22

00:01:54,870 --> 00:01:52,420

metaphysical side of it so welcome to

23

00:01:56,790 --> 00:01:54,880

the show can how are you hey I am fine

24

00:01:59,880 --> 00:01:56,800

and I'm looking forward to the night

25

00:02:02,370 --> 00:01:59,890

show like I said I've got quite a few

26  
00:02:04,290 --> 00:02:02,380  
questions for Nancy I want to learn more

27  
00:02:05,760 --> 00:02:04,300  
about crop circles I know we had a kind

28  
00:02:08,430 --> 00:02:05,770  
of a general discussion last week

29  
00:02:10,530 --> 00:02:08,440  
because of the emergency that Nancy had

30  
00:02:13,290 --> 00:02:10,540  
to deal with but I'm looking forward to

31  
00:02:16,140 --> 00:02:13,300  
the night show and Ill m2 it's going to

32  
00:02:17,699 --> 00:02:16,150  
be some in-depth research on crop

33  
00:02:20,670 --> 00:02:17,709  
circles and a lot of proof that her

34  
00:02:23,280 --> 00:02:20,680  
research team has come up with ken got

35  
00:02:25,260 --> 00:02:23,290  
any shoutouts I do I want to have a

36  
00:02:26,940 --> 00:02:25,270  
shout out to Lorna hunter up there in

37  
00:02:29,729 --> 00:02:26,950  
Wisconsin I know she's stalling out a

38  
00:02:32,880 --> 00:02:29,739

little bit but I just want to say Lorna

39

00:02:35,340 --> 00:02:32,890

appreciate your support and and thanks

40

00:02:37,259 --> 00:02:35,350

for all that you do for us and paying

41

00:02:38,520 --> 00:02:37,269

radio and stuff and lining up some of

42

00:02:41,160 --> 00:02:38,530

our guests and everything so thanks

43

00:02:43,979 --> 00:02:41,170

again learner and good work with LePage

44

00:02:45,330 --> 00:02:43,989

they do a good job I'm supposed to tell

45

00:02:49,140 --> 00:02:45,340

you you're supposed to do a shout out to

46

00:02:53,280 --> 00:02:49,150

somebody in Yukon Okla Homa you can

47

00:02:56,520 --> 00:02:53,290

Oklahoma well Yukon would be a Marilyn

48

00:02:59,490 --> 00:02:56,530

and deck that could be there you go yeah

49

00:03:01,620 --> 00:02:59,500

of the Oklahoma UFO paranormal team and

50

00:03:03,810 --> 00:03:01,630

some of the excellent research that

51  
00:03:05,640 --> 00:03:03,820  
they've done they're going to be having

52  
00:03:09,330 --> 00:03:05,650  
some more information on the paraca

53  
00:03:12,479 --> 00:03:09,340  
skulls and and some other stuff that

54  
00:03:14,280 --> 00:03:12,489  
they've been working on with the their

55  
00:03:16,740 --> 00:03:14,290  
website everything so looking forward to

56  
00:03:18,479 --> 00:03:16,750  
that absolutely oh we can get once again

57  
00:03:20,580 --> 00:03:18,489  
thanks Maryland dick we could definitely

58  
00:03:22,800 --> 00:03:20,590  
have them on for even a half hour our

59  
00:03:25,650 --> 00:03:22,810  
segment talking about that anytime oh

60  
00:03:28,110 --> 00:03:25,660  
absolutely yep absolutely i got to do a

61  
00:03:29,580 --> 00:03:28,120  
shuttle to a listener Antonio Vasquez

62  
00:03:31,320 --> 00:03:29,590  
listening to us from two

63  
00:03:33,990 --> 00:03:31,330

on Arizona and of course one of our

64

00:03:35,850 --> 00:03:34,000

favorite listeners and fans debra

65

00:03:37,830 --> 00:03:35,860

anderson in duluth minnesota Deborah has

66

00:03:40,830 --> 00:03:37,840

a few questions already for me through

67

00:03:42,150 --> 00:03:40,840

facebook so if you want to throw a

68

00:03:43,619 --> 00:03:42,160

question at us and you're not in the

69

00:03:46,380 --> 00:03:43,629

chat you have me as a facebook friend

70

00:03:47,850 --> 00:03:46,390

search Mike MJ Lucas and you can add me

71

00:03:50,850 --> 00:03:47,860

as a friend if you're an IR n listener

72

00:03:52,050 --> 00:03:50,860

and we can you can post your question

73

00:03:53,490 --> 00:03:52,060

through facebook if you can't get into

74

00:03:56,400 --> 00:03:53,500

the chat so that's that's another way we

75

00:03:59,210 --> 00:03:56,410

can get some questions to our guests to

76

00:04:01,830 --> 00:03:59,220

again that's an excellent idea and

77

00:04:03,330 --> 00:04:01,840

absolutely and at a what we had some

78

00:04:06,720 --> 00:04:03,340

we've had some really good questions

79

00:04:08,400 --> 00:04:06,730

from our listeners so guys gals keep it

80

00:04:10,530 --> 00:04:08,410

up appreciate it yeah we definitely

81

00:04:12,390 --> 00:04:10,540

appreciate it there are many different

82

00:04:14,400 --> 00:04:12,400

ways to listen to inception radio

83

00:04:18,300 --> 00:04:14,410

network you can listen via our apps on

84

00:04:20,460 --> 00:04:18,310

the android and I i tunes market blam

85

00:04:22,230 --> 00:04:20,470

i'm slipping i work in this industry and

86

00:04:23,610 --> 00:04:22,240

i can't even hey you just washed up

87

00:04:25,890 --> 00:04:23,620

slips can't do a thing with them you

88

00:04:27,570 --> 00:04:25,900

know right right exactly and you can

89

00:04:31,230 --> 00:04:27,580

also listen to i RN on our call and

90

00:04:34,080 --> 00:04:31,240

listen on its 40 128 367 00 press one

91

00:04:37,500 --> 00:04:34,090

for the regular irn feed press two to

92

00:04:39,900 --> 00:04:37,510

listen to i RN + + 0 to talk to the host

93

00:04:41,370 --> 00:04:39,910

and asks you know Colin and ask a

94

00:04:43,820 --> 00:04:41,380

question to the guests and there's many

95

00:04:46,140 --> 00:04:43,830

other platforms to like live 365

96

00:04:50,580 --> 00:04:46,150

stitcher radio we're pretty much

97

00:04:53,159 --> 00:04:50,590

anywhere and you are definitely can

98

00:04:54,779 --> 00:04:53,169

listen to anywhere I am here absolutely

99

00:04:57,659 --> 00:04:54,789

per minute there you guys kind of faded

100

00:05:00,000 --> 00:04:57,669

out on me but I'm back I don't know what

101  
00:05:03,120 --> 00:05:00,010  
happened but um ear okay very cool very

102  
00:05:04,620 --> 00:05:03,130  
cool okay now let me see here why don't

103  
00:05:06,150 --> 00:05:04,630  
we bring let's bring her in a little

104  
00:05:10,740 --> 00:05:06,160  
early here so we're gonna do it the

105  
00:05:12,510 --> 00:05:10,750  
rahway and bring her in here one second

106  
00:05:14,460 --> 00:05:12,520  
here this is always fun doing it on the

107  
00:05:16,680 --> 00:05:14,470  
air but Nancy's ready tonight for us and

108  
00:05:19,440 --> 00:05:16,690  
I definitely want a final we know where

109  
00:05:21,600 --> 00:05:19,450  
her interest started in crop circles i

110  
00:05:25,260 --> 00:05:21,610  
mean i did and i had several people

111  
00:05:27,510 --> 00:05:25,270  
email me that there have been the crop

112  
00:05:30,390 --> 00:05:27,520  
circles discovered in snow fields i

113  
00:05:34,170 --> 00:05:30,400

guess in Russia or Siberia there was a

114

00:05:37,290 --> 00:05:34,180

number of intricate patterns that were

115

00:05:40,469 --> 00:05:37,300

in the snow i know we we asked that last

116

00:05:42,330 --> 00:05:40,479

week i just wanted to you know i got

117

00:05:43,320 --> 00:05:42,340

some information on that that it i guess

118

00:05:46,710 --> 00:05:43,330

they really did find

119

00:05:51,689 --> 00:05:46,720

some crop circles and snow I leave there

120

00:05:54,510 --> 00:05:51,699

we go there we go hello good evening

121

00:05:56,749 --> 00:05:54,520

Nancy this is MJ and Ken Storch with

122

00:05:59,879 --> 00:05:56,759

paying radio welcome to the show tonight

123

00:06:03,059 --> 00:05:59,889

though hey thanks for coming on Nancy

124

00:06:05,429 --> 00:06:03,069

looking forward to it oh good very good

125

00:06:07,529 --> 00:06:05,439

are talking about the science tonight

126

00:06:11,219 --> 00:06:07,539

because I wasn't able to do it last week

127

00:06:13,140 --> 00:06:11,229

right correct exactly correct no Nancy

128

00:06:15,029 --> 00:06:13,150

yeah I have a question what where did

129

00:06:18,480 --> 00:06:15,039

your interest start with crop circles

130

00:06:20,999 --> 00:06:18,490

are we on already yes we're on right now

131

00:06:23,129 --> 00:06:21,009

we're live all right there you go

132

00:06:27,089 --> 00:06:23,139

usually they put me on hold for a while

133

00:06:29,159 --> 00:06:27,099

oh I'm sorry what was the question again

134

00:06:33,149 --> 00:06:29,169

yeah what what got you interested in

135

00:06:36,499 --> 00:06:33,159

crop circle research a photograph in a

136

00:06:38,700 --> 00:06:36,509

magazine at the kiosk and Harvard Square

137

00:06:42,029 --> 00:06:38,710

really just that little picture he got

138

00:06:44,399 --> 00:06:42,039

your interest going that's neat one look

139

00:06:49,339 --> 00:06:44,409

at that thing and I've never heard of

140

00:06:51,540 --> 00:06:49,349

crop circles but something about it

141

00:06:56,339 --> 00:06:51,550

really kind of captured my imagination

142

00:06:58,800 --> 00:06:56,349

and I was oh I was recovering from an

143

00:07:02,519 --> 00:06:58,810

illness at the time and when I saw the

144

00:07:05,730 --> 00:07:02,529

thing I I don't know I just had this

145

00:07:09,300 --> 00:07:05,740

instinct to follow up as soon as I could

146

00:07:13,200 --> 00:07:09,310

and as soon as I was able I went to

147

00:07:15,089 --> 00:07:13,210

England and met with George Wingfield

148

00:07:18,059 --> 00:07:15,099

who was one of the early British

149

00:07:20,459 --> 00:07:18,069

researchers and very literate it was his

150

00:07:24,420 --> 00:07:20,469

article that I'd written I'd read in

151

00:07:26,879 --> 00:07:24,430

this magazine and he took me all over

152

00:07:28,529 --> 00:07:26,889

the place and met you know introduced me

153

00:07:31,680 --> 00:07:28,539

to everybody and I got down on my hands

154

00:07:34,050 --> 00:07:31,690

and knees in the circles and right away

155

00:07:35,999 --> 00:07:34,060

realized that there were some changes in

156

00:07:38,309 --> 00:07:36,009

the plants I mean I saw some things that

157

00:07:42,180 --> 00:07:38,319

I thought were interesting and while I

158

00:07:45,930 --> 00:07:42,190

was over there I also learned that there

159

00:07:47,730 --> 00:07:45,940

was an American biophysicist who had

160

00:07:51,360 --> 00:07:47,740

already begun had gotten in touch with

161

00:07:54,870 --> 00:07:51,370

Pat Delgado years a year before and had

162

00:07:57,090 --> 00:07:54,880

already started to look at plants which

163

00:08:00,120 --> 00:07:57,100

kind of blew me away that there was a

164

00:08:03,210 --> 00:08:00,130

an actual scientists particularly in the

165

00:08:05,820 --> 00:08:03,220

states you know paying any attention to

166

00:08:08,070 --> 00:08:05,830

this and so as soon as I got home from

167

00:08:12,900 --> 00:08:08,080

England I went trotting off to Michigan

168

00:08:15,270 --> 00:08:12,910

to me Wayne Levensgood and just walked up

169

00:08:20,130 --> 00:08:15,280

to the door knock on door hi my name is

170

00:08:22,380 --> 00:08:20,140

Nancy and I was wanting to find out you

171

00:08:24,240 --> 00:08:22,390

know what he was doing I want to do I'd

172

00:08:26,190 --> 00:08:24,250

worked as a research analyst for a

173

00:08:28,770 --> 00:08:26,200

number of years at Harvard and at the

174

00:08:31,710 --> 00:08:28,780

University of Maryland and I had some

175

00:08:34,980 --> 00:08:31,720

familiarity with the basic scientific

176

00:08:38,070 --> 00:08:34,990

protocols and procedures and I wanted to

177

00:08:41,159 --> 00:08:38,080

see what he was doing and I guess really

178

00:08:42,330 --> 00:08:41,169

I wanted to ascertain for myself that it

179

00:08:47,520 --> 00:08:42,340

looked like he was doing something

180

00:08:49,080 --> 00:08:47,530

sensible you know and he was it was very

181

00:08:51,390 --> 00:08:49,090

straightforward it wasn't rocket science

182

00:08:53,610 --> 00:08:51,400

but he explained exactly what he was

183

00:08:54,810 --> 00:08:53,620

doing and in fact i was able to do a

184

00:08:58,320 --> 00:08:54,820

little bit of it under the microscope

185

00:09:01,760 --> 00:08:58,330

with him and I understood we anomaly

186

00:09:04,320 --> 00:09:01,770

what he was doing but how he was driving

187

00:09:06,180 --> 00:09:04,330

these facts that he was starting to

188

00:09:10,410 --> 00:09:06,190

produce these physical abnormalities

189

00:09:12,660 --> 00:09:10,420

that he was documenting in the samples

190

00:09:15,120 --> 00:09:12,670

that had been sent from England you know

191

00:09:18,870 --> 00:09:15,130

in his lab and that's where it all

192

00:09:20,940 --> 00:09:18,880

started can you have a question yeah

193

00:09:23,640 --> 00:09:20,950

Nancy how long have you been doing this

194

00:09:28,020 --> 00:09:23,650

how long have you been involved in what

195

00:09:29,640 --> 00:09:28,030

was it called serology I we don't I

196

00:09:33,870 --> 00:09:29,650

don't call it anything reads the study

197

00:09:37,140 --> 00:09:33,880

of crop circles and we how loving good i

198

00:09:43,830 --> 00:09:37,150

think probably got those first samples

199

00:09:46,920 --> 00:09:43,840

in 89 or 90 and I John Burke and I both

200

00:09:49,860 --> 00:09:46,930

found out about him independently John

201  
00:09:52,710 --> 00:09:49,870  
Burke was the be in BLT lovingood of

202  
00:09:55,560 --> 00:09:52,720  
course with the L and I'm the t and i

203  
00:09:58,080 --> 00:09:55,570  
think at burke and i totally

204  
00:10:01,590 --> 00:09:58,090  
independently found that out about 11

205  
00:10:03,440 --> 00:10:01,600  
goods early work at the same time until

206  
00:10:06,650 --> 00:10:03,450  
we met him at about the same time

207  
00:10:11,070 --> 00:10:06,660  
although independently of each other and

208  
00:10:12,720 --> 00:10:11,080  
the three of us were sincere

209  
00:10:15,690 --> 00:10:12,730  
interested in trying to figure out what

210  
00:10:21,510 --> 00:10:15,700  
was going on and that's you know how Bo

211  
00:10:22,830 --> 00:10:21,520  
he started so so going back how many

212  
00:10:24,630 --> 00:10:22,840  
years when when we're caught crop

213  
00:10:25,740 --> 00:10:24,640

circles first reported if you want to

214

00:10:29,160 --> 00:10:25,750

tell their listeners I mean through your

215

00:10:32,310 --> 00:10:29,170

research what have you found we started

216

00:10:34,940 --> 00:10:32,320

in like I say 89 with nine eleven

217

00:10:38,160 --> 00:10:34,950

hundred ninety and then John and I 1992

218

00:10:43,760 --> 00:10:38,170

but the circles themselves this current

219

00:10:47,160 --> 00:10:43,770

flap if you will was I think first

220

00:10:50,880 --> 00:10:47,170

reported or observed occasionally

221

00:10:55,890 --> 00:10:50,890

occurring in the mid to late 70s in the

222

00:10:59,760 --> 00:10:55,900

UK Oh escalating during the 80s both in

223

00:11:03,360 --> 00:10:59,770

numbers and complexity of design and by

224

00:11:06,600 --> 00:11:03,370

the end of the 80s into the 90s these

225

00:11:09,590 --> 00:11:06,610

long pictograms had just begun and those

226

00:11:13,110 --> 00:11:09,600

really galvanized world attention

227

00:11:15,600 --> 00:11:13,120

because they were much more elaborate

228

00:11:17,550 --> 00:11:15,610

much more dramatic and suddenly

229

00:11:20,610 --> 00:11:17,560

everybody you know was paying attention

230

00:11:23,100 --> 00:11:20,620

it turns out that there were circles

231

00:11:25,740 --> 00:11:23,110

occurring not just circles but crop

232

00:11:28,770 --> 00:11:25,750

formations occurring all over the world

233

00:11:31,560 --> 00:11:28,780

at the same time but nowhere near so

234

00:11:33,870 --> 00:11:31,570

many as we're being found this little

235

00:11:36,810 --> 00:11:33,880

area in southern England is quite small

236

00:11:39,030 --> 00:11:36,820

and easy to drive around in a day you

237

00:11:41,400 --> 00:11:39,040

can cover all of the areas where they

238

00:11:44,430 --> 00:11:41,410

generally are found there so it's a very

239

00:11:46,590 --> 00:11:44,440

condensed place very easy to stay on top

240

00:11:48,870 --> 00:11:46,600

of them whereas when they occur in

241

00:11:52,320 --> 00:11:48,880

Washington state or South Carolina or

242

00:11:55,320 --> 00:11:52,330

North Dakota or you know the Yukon or

243

00:11:56,820 --> 00:11:55,330

all these other places they occur there

244

00:12:00,540 --> 00:11:56,830

a little bit harder you got a lot more

245

00:12:03,210 --> 00:12:00,550

distance to cover to find out when they

246

00:12:04,980 --> 00:12:03,220

occur and where but it appears that they

247

00:12:08,100 --> 00:12:04,990

have been occurring all over the world

248

00:12:12,120 --> 00:12:08,110

and this includes Africa and South

249

00:12:16,230 --> 00:12:12,130

America China Russia the Middle East

250

00:12:20,310 --> 00:12:16,240

Israel Australia as well as via North

251

00:12:24,420 --> 00:12:20,320

American Canada off and on for probably

252

00:12:25,199 --> 00:12:24,430

about the same time period hmm interest

253

00:12:28,980 --> 00:12:25,209

you just don't

254

00:12:31,400 --> 00:12:28,990

hear about them or nowadays you may hear

255

00:12:34,290 --> 00:12:31,410

occasionally but in those early days

256

00:12:36,299 --> 00:12:34,300

nobody knew what they were the term I

257

00:12:39,299 --> 00:12:36,309

don't think crop circle had even you

258

00:12:40,859 --> 00:12:39,309

know occurred yet and the farmers would

259

00:12:44,249 --> 00:12:40,869

find them and didn't have the faintest

260

00:12:46,829 --> 00:12:44,259

idea who to tell you know much less what

261

00:12:49,439 --> 00:12:46,839

to do about them in the early days once

262

00:12:52,379 --> 00:12:49,449

we'd started in the 90s and I started

263

00:12:55,319 --> 00:12:52,389

interviewing all the farmers when they

264

00:12:58,230 --> 00:12:55,329

were reported part of my work was to run

265

00:13:01,319 --> 00:12:58,240

a standard interview past the farmers

266

00:13:03,689 --> 00:13:01,329

the landowners and I heard over and over

267

00:13:06,470 --> 00:13:03,699

again as did the people in England as

268

00:13:08,759 --> 00:13:06,480

did the people in Poland or Israel er

269

00:13:12,210 --> 00:13:08,769

Norway or wherever they were occurring

270

00:13:14,069 --> 00:13:12,220

that the farmers though parents if

271

00:13:17,090 --> 00:13:14,079

they'd been on the land if the land had

272

00:13:20,009 --> 00:13:17,100

been historically owned by the family of

273

00:13:22,710 --> 00:13:20,019

generations back they had had their

274

00:13:26,369 --> 00:13:22,720

parents grandparents report finding

275

00:13:29,189 --> 00:13:26,379

things like this from time to time so it

276

00:13:31,850 --> 00:13:29,199

was not a brand new thing it was simply

277

00:13:33,869 --> 00:13:31,860

at I guess it had been so occasional and

278

00:13:35,429 --> 00:13:33,879

because we didn't have the internet we

279

00:13:38,970 --> 00:13:35,439

didn't have the kind of communication

280

00:13:42,150 --> 00:13:38,980

systems we had now oh it wasn't being

281

00:13:45,509 --> 00:13:42,160

reported or recorded and many of the

282

00:13:48,449 --> 00:13:45,519

farmers even today are absolutely

283

00:13:51,720 --> 00:13:48,459

convinced there's one guy I just dealt

284

00:13:54,359 --> 00:13:51,730

with in because it was Minnesota if you

285

00:13:58,470 --> 00:13:54,369

go to the blt website you'll see a

286

00:14:00,299 --> 00:13:58,480

listing for us a crop circles and I list

287

00:14:02,960 --> 00:14:00,309

them each year as they reported here in

288

00:14:05,460 --> 00:14:02,970

the states and the most recent one

289

00:14:08,189 --> 00:14:05,470

reported here in the United States this

290

00:14:10,499 --> 00:14:08,199

year was in Minnesota and that farmer

291

00:14:15,179 --> 00:14:10,509

was in corn in this particular case in

292

00:14:18,710 --> 00:14:15,189

maize full grown about 14 feet tall but

293

00:14:24,269 --> 00:14:18,720

he reported that he had them in his

294

00:14:27,090 --> 00:14:24,279

soybean and corn fields regularly for

295

00:14:28,949 --> 00:14:27,100

years and absolutely insisted these were

296

00:14:30,600 --> 00:14:28,959

not crop formations crop circles

297

00:14:34,049 --> 00:14:30,610

anything of the sort it was simply dear

298

00:14:36,480 --> 00:14:34,059

bedding down well when you look at the

299

00:14:38,700 --> 00:14:36,490

size of some of these senses does it

300

00:14:40,290 --> 00:14:38,710

have to be elephants bedding down

301  
00:14:42,000 --> 00:14:40,300  
and I don't think we've got wild

302  
00:14:46,140 --> 00:14:42,010  
elephants running around in Minnesota

303  
00:14:49,140 --> 00:14:46,150  
but no I'm not only admit to any way not

304  
00:14:51,570 --> 00:14:49,150  
that they admit to yes you know well and

305  
00:14:55,530 --> 00:14:51,580  
I thought he had a lot of them had these

306  
00:14:57,480 --> 00:14:55,540  
very strong opinions about what's going

307  
00:15:00,390 --> 00:14:57,490  
on in their land and I couldn't change

308  
00:15:02,040 --> 00:15:00,400  
that guy's mind and their people I run

309  
00:15:03,540 --> 00:15:02,050  
into farmers in the southern part of the

310  
00:15:06,720 --> 00:15:03,550  
United States the southeast in

311  
00:15:08,580 --> 00:15:06,730  
particular where circles have been

312  
00:15:10,470 --> 00:15:08,590  
reported and we have field workers all

313  
00:15:14,160 --> 00:15:10,480

over the place so you know we send

314

00:15:17,070 --> 00:15:14,170

people out to wherever they are and down

315

00:15:21,150 --> 00:15:17,080

the south or southeast where sometimes

316

00:15:24,120 --> 00:15:21,160

told I've actually been told by a mature

317

00:15:27,990 --> 00:15:24,130

adult farmer that it is the work of the

318

00:15:30,570 --> 00:15:28,000

devil and they all want yeah we're all I

319

00:15:32,940 --> 00:15:30,580

i I'm in the I'm in northeast Oklahoma

320

00:15:35,190 --> 00:15:32,950

and I'm in the bible belt and I can see

321

00:15:36,900 --> 00:15:35,200

that I get I get that all the time

322

00:15:39,740 --> 00:15:36,910

because of my research and a flying

323

00:15:44,340 --> 00:15:39,750

saucers denim that I'm doing adult

324

00:15:46,500 --> 00:15:44,350

fortunate that people the media I hold

325

00:15:49,530 --> 00:15:46,510

the media responsible for this but also

326

00:15:52,820 --> 00:15:49,540

some of the people who actually are

327

00:15:57,390 --> 00:15:52,830

involved in the research in these areas

328

00:16:00,390 --> 00:15:57,400

that this fear-based crap and pardon me

329

00:16:03,570 --> 00:16:00,400

I think it is crap this constant

330

00:16:06,060 --> 00:16:03,580

emphasis on if it is unknown we must be

331

00:16:08,760 --> 00:16:06,070

afraid of it if it is something we don't

332

00:16:11,340 --> 00:16:08,770

know about it must be bad it must be

333

00:16:14,340 --> 00:16:11,350

threatening it must be hostile well you

334

00:16:16,620 --> 00:16:14,350

know when I was at a pic you know yeah

335

00:16:19,530 --> 00:16:16,630

why agree Nancy and and the fact that

336

00:16:22,500 --> 00:16:19,540

somebody would think that deer were

337

00:16:25,200 --> 00:16:22,510

smashing down 10 foot corn stocks to lay

338

00:16:28,740 --> 00:16:25,210

down come on I hunt deer that and if

339

00:16:30,930 --> 00:16:28,750

they're afraid the exact name dear I've

340

00:16:33,450 --> 00:16:30,940

seen deer lay down in between the corn

341

00:16:35,490 --> 00:16:33,460

rolls but I've never seen them mash the

342

00:16:37,880 --> 00:16:35,500

stocks down play on that's not the point

343

00:16:40,830 --> 00:16:37,890

the point is that you have people

344

00:16:44,010 --> 00:16:40,840

responding the way they do because

345

00:16:47,400 --> 00:16:44,020

they're afraid and the thing then get to

346

00:16:50,070 --> 00:16:47,410

be okay why are they afraid one of the

347

00:16:51,870 --> 00:16:50,080

major reasons they're afraid I mean it's

348

00:16:52,590 --> 00:16:51,880

natural that some people are of course

349

00:16:55,050 --> 00:16:52,600

but

350

00:16:57,990 --> 00:16:55,060

a huge numbers of people are afraid of

351  
00:16:59,999 --> 00:16:58,000  
unknown things because they've been

352  
00:17:03,480 --> 00:17:00,009  
taught to be they've been told they

353  
00:17:04,590 --> 00:17:03,490  
should be by the media and also by some

354  
00:17:07,140 --> 00:17:04,600  
of the people who do these

355  
00:17:09,360 --> 00:17:07,150  
investigations they jump to the

356  
00:17:11,460 --> 00:17:09,370  
conclusion that it must be hostile it

357  
00:17:15,230 --> 00:17:11,470  
must be threatening may look at the

358  
00:17:18,809 --> 00:17:15,240  
history of the UFO investigations and

359  
00:17:21,840 --> 00:17:18,819  
it's absurd that the immediate response

360  
00:17:24,179 --> 00:17:21,850  
of a reasonably intelligent human being

361  
00:17:27,750 --> 00:17:24,189  
to something that they are brand new

362  
00:17:31,230 --> 00:17:27,760  
that it should immediately be fear and

363  
00:17:34,140 --> 00:17:31,240

it bothers me enormously that that is in

364

00:17:36,230 --> 00:17:34,150

fact the case well but that I think part

365

00:17:39,899 --> 00:17:36,240

of that is human nature Nancy I mean

366

00:17:42,570 --> 00:17:39,909

r.i.p fear of the unknown is you know it

367

00:17:45,330 --> 00:17:42,580

doesn't necessarily did and encouraged

368

00:17:48,870 --> 00:17:45,340

by people who talked about these things

369

00:17:50,880 --> 00:17:48,880

to sensationalize them to glamorize them

370

00:17:55,320 --> 00:17:50,890

to get attention because unfortunately

371

00:17:57,390 --> 00:17:55,330

people do like to be titillated but it i

372

00:18:00,720 --> 00:17:57,400

think it's you're responsible there

373

00:18:03,390 --> 00:18:00,730

unless one has actual proof any any sort

374

00:18:06,750 --> 00:18:03,400

of real truth obviously caution is

375

00:18:08,580 --> 00:18:06,760

advisable in unknown situations but this

376

00:18:10,980 --> 00:18:08,590

jumping to the conclusion that just

377

00:18:13,230 --> 00:18:10,990

because we don't know about it because

378

00:18:16,580 --> 00:18:13,240

we don't have a handle on whatever it is

379

00:18:20,370 --> 00:18:16,590

that we should approach it fearfully

380

00:18:23,840 --> 00:18:20,380

it's holding back I mean it holds us

381

00:18:27,090 --> 00:18:23,850

back from incredible advances you know

382

00:18:29,430 --> 00:18:27,100

sure don't yeah i think you know anytime

383

00:18:32,549 --> 00:18:29,440

you you throw that into the mixture it's

384

00:18:34,409 --> 00:18:32,559

going to inhibit your ability to do the

385

00:18:37,500 --> 00:18:34,419

proper proper research in order to

386

00:18:39,000 --> 00:18:37,510

answer some of the questions that you

387

00:18:41,010 --> 00:18:39,010

know you as a researcher would be

388

00:18:43,740 --> 00:18:41,020

seeking and which leads me when you're

389

00:18:46,770 --> 00:18:43,750

talking about proof what percentage do

390

00:18:48,930 --> 00:18:46,780

you think Nancy are legitimate crop

391

00:18:51,500 --> 00:18:48,940

circles or crop formations as you call

392

00:18:53,820 --> 00:18:51,510

them and those that are that are hoaxed

393

00:18:56,760 --> 00:18:53,830

nobody can make an intelligent response

394

00:18:59,669 --> 00:18:56,770

to that you would have to have that you

395

00:19:02,010 --> 00:18:59,679

have to have sampled every single circle

396

00:19:03,890 --> 00:19:02,020

at least for one given summer to even

397

00:19:06,080 --> 00:19:03,900

vaguely have

398

00:19:08,060 --> 00:19:06,090

an answer why don't you let me talk

399

00:19:10,910 --> 00:19:08,070

about some of the physical changes that

400

00:19:13,640 --> 00:19:10,920

we've discovered and what they are what

401  
00:19:16,940 --> 00:19:13,650  
the energies are that caused them and

402  
00:19:20,120 --> 00:19:16,950  
what sort of an energy system is then

403  
00:19:22,850 --> 00:19:20,130  
capable of producing those energy to

404  
00:19:25,010 --> 00:19:22,860  
give people some sort of an idea of the

405  
00:19:29,140 --> 00:19:25,020  
framework that we've been developing as

406  
00:19:32,300 --> 00:19:29,150  
to what may be at least a partial answer

407  
00:19:35,200 --> 00:19:32,310  
regarding the causation of the genuine

408  
00:19:38,600 --> 00:19:35,210  
formations let's do it Nancy let's do it

409  
00:19:40,370 --> 00:19:38,610  
okay thank you it's a lot easier than I

410  
00:19:42,800 --> 00:19:40,380  
don't like speculating about silly

411  
00:19:44,690 --> 00:19:42,810  
things that I can't you know I couldn't

412  
00:19:48,560 --> 00:19:44,700  
possibly make an intelligent comment

413  
00:19:50,450 --> 00:19:48,570

about the other okay the basic physical

414

00:19:53,150 --> 00:19:50,460

changes that matter and there are two

415

00:19:54,740 --> 00:19:53,160

that are visible to the human eye you

416

00:19:58,130 --> 00:19:54,750

don't need a laboratory you don't need a

417

00:20:01,730 --> 00:19:58,140

microscope the first is apical node

418

00:20:05,660 --> 00:20:01,740

elongation these are the top knows the

419

00:20:08,600 --> 00:20:05,670

first nodes beneath the seed head and if

420

00:20:12,710 --> 00:20:08,610

people go to the blt website which is

421

00:20:14,480 --> 00:20:12,720

BLT research calm and open up on the

422

00:20:17,150 --> 00:20:14,490

left you'll see a margin and it says

423

00:20:19,190 --> 00:20:17,160

plant abnormalities if people would like

424

00:20:22,040 --> 00:20:19,200

to see the photos of some of this they

425

00:20:26,330 --> 00:20:22,050

could follow along this top node the

426  
00:20:28,910 --> 00:20:26,340  
apical node is elongated as compared to

427  
00:20:32,180 --> 00:20:28,920  
the controls on than the rest of the

428  
00:20:35,210 --> 00:20:32,190  
field this is the best established most

429  
00:20:39,770 --> 00:20:35,220  
most thoroughly tested parameter that

430  
00:20:43,760 --> 00:20:39,780  
we've got so far now in some cases the

431  
00:20:47,360 --> 00:20:43,770  
node lengthening of this top node is is

432  
00:20:50,810 --> 00:20:47,370  
not excessive it's say 35 to 50 or

433  
00:20:54,200 --> 00:20:50,820  
seventy percent at that rate of change

434  
00:20:56,960 --> 00:20:54,210  
you can't always tell visually but in

435  
00:21:01,970 --> 00:20:56,970  
many cases the degree of lengthening

436  
00:21:04,400 --> 00:21:01,980  
will be at around the 90 to 100 150 even

437  
00:21:07,100 --> 00:21:04,410  
two hundred percent increase in node

438  
00:21:10,760 --> 00:21:07,110

length when it's up in those ranges it's

439

00:21:13,490 --> 00:21:10,770

clearly easily visible the one of things

440

00:21:17,240 --> 00:21:13,500

I do when I visit a new circle is I walk

441

00:21:17,970 --> 00:21:17,250

in from wherever the access road is get

442

00:21:19,710 --> 00:21:17,980

into the fee

443

00:21:22,350 --> 00:21:19,720

the little ways you never want to take

444

00:21:24,750 --> 00:21:22,360

your controls from the edge because the

445

00:21:27,000 --> 00:21:24,760

edge is the field the plants always grow

446

00:21:29,400 --> 00:21:27,010

slightly differently there to get into

447

00:21:31,650 --> 00:21:29,410

the field a little ways and I take a

448

00:21:34,890 --> 00:21:31,660

knife and cut off a handful se 1015

449

00:21:37,770 --> 00:21:34,900

stocks at the base and I carry them with

450

00:21:40,169 --> 00:21:37,780

me then into the actual crop formation

451  
00:21:42,120 --> 00:21:40,179  
when I get there and you can get down on

452  
00:21:45,270 --> 00:21:42,130  
your hands and knees and simply start

453  
00:21:47,850 --> 00:21:45,280  
comparing the node length these top

454  
00:21:50,460 --> 00:21:47,860  
apical node links on the flattened

455  
00:21:52,830 --> 00:21:50,470  
plants to the controls that you've just

456  
00:21:54,690 --> 00:21:52,840  
brought in with you and if you do this

457  
00:21:58,530 --> 00:21:54,700  
throughout the formation in various

458  
00:22:00,419 --> 00:21:58,540  
parts if in fact there is a considerable

459  
00:22:03,320 --> 00:22:00,429  
node length increase it'll be obvious

460  
00:22:06,030 --> 00:22:03,330  
you'll see it without any problem at all

461  
00:22:08,760 --> 00:22:06,040  
the reason that we take hundreds and

462  
00:22:11,789 --> 00:22:08,770  
sometimes thousands of plant samples and

463  
00:22:14,669 --> 00:22:11,799

controls is because sometimes the

464

00:22:17,190 --> 00:22:14,679

energies involved do not produce such a

465

00:22:19,080 --> 00:22:17,200

massive change they'll produce something

466

00:22:22,230 --> 00:22:19,090

more in the range of fifty sixty seventy

467

00:22:25,560 --> 00:22:22,240

eighty percent change which is not

468

00:22:29,159 --> 00:22:25,570

always clearly visible there's some

469

00:22:31,409 --> 00:22:29,169

variation in node length anyhow and you

470

00:22:33,900 --> 00:22:31,419

really can't evaluate it visually that

471

00:22:37,080 --> 00:22:33,910

way so we take all the samples and then

472

00:22:38,730 --> 00:22:37,090

do it in the lab so that's one visible

473

00:22:41,460 --> 00:22:38,740

change you're looking for is the top

474

00:22:44,460 --> 00:22:41,470

node to see whether it is longer whether

475

00:22:47,789 --> 00:22:44,470

they the flattened ones inside the crop

476  
00:22:49,350 --> 00:22:47,799  
circle are longer than the controls from

477  
00:22:52,830 --> 00:22:49,360  
out in the field of considerable

478  
00:22:54,539 --> 00:22:52,840  
distance away from the formation the

479  
00:22:58,680 --> 00:22:54,549  
second visible sign are what we call

480  
00:23:01,860 --> 00:22:58,690  
expulsion cavities these are holes blown

481  
00:23:04,289 --> 00:23:01,870  
out in the lower nodes of the stalks

482  
00:23:08,730 --> 00:23:04,299  
we're talking here about essentially we

483  
00:23:10,950 --> 00:23:08,740  
oats cereal plans rye barley stuff like

484  
00:23:14,340 --> 00:23:10,960  
that also it also happens in maize and

485  
00:23:18,150 --> 00:23:14,350  
in a number of other plants but these

486  
00:23:19,950 --> 00:23:18,160  
holes the stocks down then the lower

487  
00:23:22,710 --> 00:23:19,960  
part of the stocks are they're not

488  
00:23:27,510 --> 00:23:22,720

elastic at all they're very strong the

489

00:23:29,850 --> 00:23:27,520

external fibers and so the lower nodes

490

00:23:31,870 --> 00:23:29,860

are what usually will show these

491

00:23:34,700 --> 00:23:31,880

expulsion cavities their whole

492

00:23:36,650 --> 00:23:34,710

clearly blown out at these lower nodes

493

00:23:39,380 --> 00:23:36,660

you don't need a microscope at all

494

00:23:43,570 --> 00:23:39,390

they're completely clearly visible see

495

00:23:46,580 --> 00:23:43,580

if their present now both of those

496

00:23:50,630 --> 00:23:46,590

changes those visible clearly obvious

497

00:23:54,830 --> 00:23:50,640

changes are caused by the exposure of

498

00:23:59,270 --> 00:23:54,840

the plants to extremely intense but very

499

00:24:01,730 --> 00:23:59,280

brief bursts of a cleaning agency that

500

00:24:04,690 --> 00:24:01,740

we believe is almost certainly going to

501  
00:24:08,450 --> 00:24:04,700  
be found to be microwave radiation okay

502  
00:24:11,060 --> 00:24:08,460  
it acts exactly like it would in your

503  
00:24:13,880 --> 00:24:11,070  
oven you put an egg or whatever you know

504  
00:24:15,410 --> 00:24:13,890  
in your in your oven you crank it up if

505  
00:24:17,660 --> 00:24:15,420  
you let the egg sit in there too long

506  
00:24:19,490 --> 00:24:17,670  
what's going to happen is it's good the

507  
00:24:23,630 --> 00:24:19,500  
moisture turns to steam the steam

508  
00:24:25,970 --> 00:24:23,640  
expands and at the top of the stalks we

509  
00:24:28,370 --> 00:24:25,980  
have very that's the youngest part of

510  
00:24:32,110 --> 00:24:28,380  
the plan and the tissue is very elastic

511  
00:24:35,120 --> 00:24:32,120  
and so as the moisture turns to steam it

512  
00:24:38,380 --> 00:24:35,130  
stretches those fibers at the top and

513  
00:24:41,900 --> 00:24:38,390

seeks out leaving the elongated nodes

514

00:24:44,210 --> 00:24:41,910

farther down the plant stem the fibers

515

00:24:47,510 --> 00:24:44,220

don't stretch there not elastic at all

516

00:24:49,340 --> 00:24:47,520

and as the steam pressure builds up it

517

00:24:52,520 --> 00:24:49,350

does exactly what would happen in your

518

00:24:54,820 --> 00:24:52,530

microwave oven it simply explodes the

519

00:24:57,020 --> 00:24:54,830

sides of the cell walls of the nodes

520

00:25:01,580 --> 00:24:57,030

causing the holes and letting the steam

521

00:25:03,290 --> 00:25:01,590

out okay that makes sense to you so far

522

00:25:05,150 --> 00:25:03,300

oh yeah and I've been throwing a

523

00:25:07,880 --> 00:25:05,160

pitchers in chat to Nancy so people are

524

00:25:10,400 --> 00:25:07,890

following along with us too okay perfect

525

00:25:12,830 --> 00:25:10,410

it's working a lot or not doing rocket

526

00:25:15,260 --> 00:25:12,840

right right exactly yeah it makes sense

527

00:25:18,380 --> 00:25:15,270

well I hate Nancy I got a question for

528

00:25:22,160 --> 00:25:18,390

you these stalks that you're describing

529

00:25:24,200 --> 00:25:22,170

are all grains to do does this was

530

00:25:25,820 --> 00:25:24,210

talking about grain primarily because

531

00:25:29,360 --> 00:25:25,830

that's what we've worked on the most

532

00:25:32,890 --> 00:25:29,370

okay well and so my question is that do

533

00:25:37,250 --> 00:25:32,900

these crap do these crop formations

534

00:25:39,830 --> 00:25:37,260

appear in non green stalks occur and

535

00:25:43,100 --> 00:25:39,840

everything that I've heard of I mean

536

00:25:45,340 --> 00:25:43,110

I've had reports of them in every kind

537

00:25:49,390 --> 00:25:45,350

of vegetable I've ever heard of

538

00:25:52,930 --> 00:25:49,400

some I haven't they occur in reads they

539

00:25:56,380 --> 00:25:52,940

can occur in snow they can occur in sand

540

00:25:58,360 --> 00:25:56,390

I have heard a few reports of them in

541

00:26:00,400 --> 00:25:58,370

trees but I've never been able to follow

542

00:26:05,460 --> 00:26:00,410

it up enough to be certain of that I

543

00:26:09,460 --> 00:26:05,470

have seen some low bushes flattened so

544

00:26:11,380 --> 00:26:09,470

apparently the this causative mechanism

545

00:26:15,279 --> 00:26:11,390

which we've only just begun to describe

546

00:26:18,250 --> 00:26:15,289

here can affect almost anything on the

547

00:26:20,289 --> 00:26:18,260

surface of the earth that can should we

548

00:26:23,820 --> 00:26:20,299

react the mint wouldn't react I don't

549

00:26:26,260 --> 00:26:23,830

think right well and so then my other

550

00:26:29,110 --> 00:26:26,270

dovetail to the question is that this

551  
00:26:31,510 --> 00:26:29,120  
microwave energy this microwave beam if

552  
00:26:34,180 --> 00:26:31,520  
that's what it is it's also affecting my

553  
00:26:36,399 --> 00:26:34,190  
soil the anarchy complex it's only one

554  
00:26:38,950 --> 00:26:36,409  
of the energies involved oh there's more

555  
00:26:42,850 --> 00:26:38,960  
than one okay Wow but in its

556  
00:26:46,299 --> 00:26:42,860  
effectiveness or incontinence also the

557  
00:26:49,659 --> 00:26:46,309  
next energy that we discovered that was

558  
00:26:55,750 --> 00:26:49,669  
present was by accident as often happens

559  
00:26:57,760 --> 00:26:55,760  
in science oh we a bunch of samples had

560  
00:27:00,159 --> 00:26:57,770  
come in from I think with California in

561  
00:27:03,970 --> 00:27:00,169  
this case of a formation that had

562  
00:27:07,480 --> 00:27:03,980  
occurred up there and Levengood who did

563  
00:27:09,580 --> 00:27:07,490

all of this early lab work himself had

564

00:27:13,390 --> 00:27:09,590

done the examination of the plants and

565

00:27:15,970 --> 00:27:13,400

the samples and the controls we normally

566

00:27:18,220 --> 00:27:15,980

get in at that time you are getting in

567

00:27:20,710 --> 00:27:18,230

Oh a thousand fifteen hundred samples at

568

00:27:23,140 --> 00:27:20,720

least and about that same number of

569

00:27:24,940 --> 00:27:23,150

controls and it's a huge amount of work

570

00:27:26,500 --> 00:27:24,950

if you can imagine we're measuring all

571

00:27:29,350 --> 00:27:26,510

those nodes were counting all those

572

00:27:31,840 --> 00:27:29,360

expulsion cavities but we also do

573

00:27:34,120 --> 00:27:31,850

germination studies microscopic studies

574

00:27:35,770 --> 00:27:34,130

of a lot of other work that you can't do

575

00:27:39,250 --> 00:27:35,780

in the field I just told you about the

576  
00:27:41,919 --> 00:27:39,260  
things you can see visually first but in

577  
00:27:44,560 --> 00:27:41,929  
the lab one of the things that Levin was

578  
00:27:47,649 --> 00:27:44,570  
doing regularly with germination studies

579  
00:27:50,890 --> 00:27:47,659  
he take seeds from the affected crops

580  
00:27:52,630 --> 00:27:50,900  
and and from the controls and then

581  
00:27:55,330 --> 00:27:52,640  
germinate them in professional

582  
00:27:57,940 --> 00:27:55,340  
germination chambers to see if in fact

583  
00:27:58,720 --> 00:27:57,950  
there were any differences in the way

584  
00:28:01,200 --> 00:27:58,730  
the sea

585  
00:28:04,659 --> 00:28:01,210  
the affected seeds would germinate and

586  
00:28:07,630 --> 00:28:04,669  
what we found was that when circles

587  
00:28:10,780 --> 00:28:07,640  
occur early on in the season in the

588  
00:28:14,440 --> 00:28:10,790

growth season this would be end of May

589

00:28:17,530 --> 00:28:14,450

and June in the northern hemisphere how

590

00:28:20,110 --> 00:28:17,540

before the seeds are fully formed when

591

00:28:22,990 --> 00:28:20,120

they're still forming another to see the

592

00:28:26,049 --> 00:28:23,000

plant is not mature when crop circles

593

00:28:29,320 --> 00:28:26,059

occur at that time of the year the seeds

594

00:28:32,289 --> 00:28:29,330

become stunted they're dehydrated they

595

00:28:34,960 --> 00:28:32,299

weigh less and in many of the cases they

596

00:28:38,350 --> 00:28:34,970

are in fact sterilized they will not

597

00:28:40,120 --> 00:28:38,360

grow when germinated so you know

598

00:28:45,760 --> 00:28:40,130

effectively those plants are sterilized

599

00:28:49,750 --> 00:28:45,770

oh we found also that when crop circles

600

00:28:54,220 --> 00:28:49,760

occur in in organic non hybridized

601  
00:28:56,950 --> 00:28:54,230  
plants to unhybridized plants grow at a

602  
00:28:59,260 --> 00:28:56,960  
random rate of growth they don't all

603  
00:29:01,510 --> 00:28:59,270  
grow at exactly the same rate and this

604  
00:29:04,390 --> 00:29:01,520  
is one of the reasons why hybridized

605  
00:29:05,980 --> 00:29:04,400  
crop is used the farmers want the plants

606  
00:29:08,140 --> 00:29:05,990  
to all grow at exactly the same rate

607  
00:29:10,510 --> 00:29:08,150  
because it's easier to apply their

608  
00:29:13,480 --> 00:29:10,520  
pesticides do the harvesting blah blah

609  
00:29:15,580 --> 00:29:13,490  
but organic stuff doesn't do that it

610  
00:29:17,560 --> 00:29:15,590  
grows kind of variously and we

611  
00:29:21,400 --> 00:29:17,570  
discovered when we happen to get some

612  
00:29:24,480 --> 00:29:21,410  
samples in from an organic farm that

613  
00:29:27,490 --> 00:29:24,490

those samples those plants which grow

614

00:29:30,280 --> 00:29:27,500

variously normally at different rates of

615

00:29:33,100 --> 00:29:30,290

speed their growth rate became

616

00:29:36,880 --> 00:29:33,110

synchronized after the crop circle death

617

00:29:39,310 --> 00:29:36,890

highly unusual and very curious but

618

00:29:41,289 --> 00:29:39,320

perhaps the most interesting result it

619

00:29:44,200 --> 00:29:41,299

was the most productive result from the

620

00:29:46,840 --> 00:29:44,210

germination work was that we discovered

621

00:29:48,730 --> 00:29:46,850

by accident because there's a very

622

00:29:51,039 --> 00:29:48,740

formal way that you have to dispose of

623

00:29:53,530 --> 00:29:51,049

all these samples according to the

624

00:29:55,480 --> 00:29:53,540

Department of Agriculture as a special

625

00:29:56,680 --> 00:29:55,490

kind of furnace and you have to do you

626

00:29:58,930 --> 00:29:56,690

know to get rid of these things in a

627

00:30:01,630 --> 00:29:58,940

certain way and let him go to empty on

628

00:30:03,669 --> 00:30:01,640

his lab after doing a particular

629

00:30:06,880 --> 00:30:03,679

formation he thought he'd gotten all the

630

00:30:09,130 --> 00:30:06,890

boxes out but he'd forgotten one and a

631

00:30:11,230 --> 00:30:09,140

couple of weeks later he opened this be

632

00:30:12,700 --> 00:30:11,240

found the box and opened it up and

633

00:30:15,380 --> 00:30:12,710

inside

634

00:30:17,300 --> 00:30:15,390

were a couple of samples from this

635

00:30:20,180 --> 00:30:17,310

California formation and a couple of

636

00:30:23,840 --> 00:30:20,190

controls and he noticed immediately that

637

00:30:26,690 --> 00:30:23,850

the controls were dead as doornails and

638

00:30:29,960 --> 00:30:26,700

the samples which had had no water no

639

00:30:34,100 --> 00:30:29,970

sunlight nothing for weeks were growing

640

00:30:38,060 --> 00:30:34,110

vigorously what really this was a clue

641

00:30:41,300 --> 00:30:38,070

and Levengood being a biophysicist had

642

00:30:42,710 --> 00:30:41,310

some idea what it might mean and he and

643

00:30:45,440 --> 00:30:42,720

John Burke been spent a considerable

644

00:30:48,050 --> 00:30:45,450

amount of time and we began testing a

645

00:30:50,120 --> 00:30:48,060

number of other crop formations that

646

00:30:52,690 --> 00:30:50,130

occurred later on in the season this was

647

00:30:56,390 --> 00:30:52,700

one from late in the year and it was

648

00:30:58,610 --> 00:30:56,400

consistently then discovered that when

649

00:31:01,880 --> 00:30:58,620

the crop circles occur in the tour crop

650

00:31:05,630 --> 00:31:01,890

where the seed is fully formed when the

651  
00:31:07,640 --> 00:31:05,640  
formation occurs those seeds although

652  
00:31:09,470 --> 00:31:07,650  
they will be dehydrated they usually

653  
00:31:13,370 --> 00:31:09,480  
weigh less and they look kind of

654  
00:31:15,770 --> 00:31:13,380  
scrunched up they germinate and then

655  
00:31:19,610 --> 00:31:15,780  
grow at up to five times the rate of

656  
00:31:22,640 --> 00:31:19,620  
normal that's five times faster they do

657  
00:31:26,150 --> 00:31:22,650  
it without order or sunlight for long

658  
00:31:30,830 --> 00:31:26,160  
periods of time and they produce greater

659  
00:31:34,970 --> 00:31:30,840  
yield whoa now that is a stunning result

660  
00:31:37,310 --> 00:31:34,980  
if it could be figured out John and

661  
00:31:39,140 --> 00:31:37,320  
Levengood immediately realized that if

662  
00:31:42,410 --> 00:31:39,150  
they could figure out what the energies

663  
00:31:44,630 --> 00:31:42,420

were that were causing that change it

664

00:31:47,450 --> 00:31:44,640

would be a great interest to the farming

665

00:31:50,300 --> 00:31:47,460

community because it could number one

666

00:31:52,670 --> 00:31:50,310

protect you against so series of

667

00:31:54,830 --> 00:31:52,680

droughts for instance if you can figure

668

00:31:56,120 --> 00:31:54,840

out how to treat seeds this way then you

669

00:31:58,550 --> 00:31:56,130

don't don't worry so much if there's a

670

00:32:01,610 --> 00:31:58,560

drought or if there's a long spell about

671

00:32:03,410 --> 00:32:01,620

a lot of sunlight and they work for some

672

00:32:06,710 --> 00:32:03,420

time on this and eventually we're able

673

00:32:09,190 --> 00:32:06,720

to produce a piece of equipment that the

674

00:32:13,040 --> 00:32:09,200

liver is what Levensgood called ion

675

00:32:16,340 --> 00:32:13,050

avalanches essentially user very unusual

676  
00:32:18,440 --> 00:32:16,350  
electrical pulses and it took quite a

677  
00:32:21,020 --> 00:32:18,450  
long time to figure out the intensity

678  
00:32:24,380 --> 00:32:21,030  
level of the pulse the duration of

679  
00:32:26,570 --> 00:32:24,390  
exposure that was required for each

680  
00:32:29,570 --> 00:32:26,580  
different type of plant

681  
00:32:34,250 --> 00:32:29,580  
but eventually they were able to figure

682  
00:32:37,630 --> 00:32:34,260  
out in cotton in carrots in tomatoes in

683  
00:32:41,240 --> 00:32:37,640  
wheat in corn a number of other

684  
00:32:44,509 --> 00:32:41,250  
varieties the exact intensity level

685  
00:32:47,060 --> 00:32:44,519  
required and the duration to which those

686  
00:32:50,630 --> 00:32:47,070  
normal seeds had to be exposed to

687  
00:32:52,669 --> 00:32:50,640  
produce exactly the same result that we

688  
00:32:55,549 --> 00:32:52,679

had found in the crop circles he'd

689

00:32:58,909 --> 00:32:55,559

Nansen so you know eventually they were

690

00:33:01,190 --> 00:32:58,919

able to create at will this increased

691

00:33:03,980 --> 00:33:01,200

growth rate up to five times the rate of

692

00:33:07,009 --> 00:33:03,990

normal growing without water or sunlight

693

00:33:11,450 --> 00:33:07,019

for long periods of time and producing

694

00:33:13,970 --> 00:33:11,460

greater yield you have you have you done

695

00:33:15,950 --> 00:33:13,980

any type of study on the insects inside

696

00:33:18,639 --> 00:33:15,960

the crop formations and how their effect

697

00:33:21,230 --> 00:33:18,649

on this is gone with what we have done

698

00:33:23,539 --> 00:33:21,240

that will get to what we have it okay

699

00:33:24,710 --> 00:33:23,549

okay well I I'm just writing questions

700

00:33:26,539 --> 00:33:24,720

as you're bringing as you're going down

701  
00:33:28,519 --> 00:33:26,549  
this list and I was thinking you know

702  
00:33:31,899 --> 00:33:28,529  
all the inflames is that with this

703  
00:33:35,810 --> 00:33:31,909  
increased growth rate they were able to

704  
00:33:37,430 --> 00:33:35,820  
patent this finding and then John Burke

705  
00:33:39,529 --> 00:33:37,440  
spent a considerable amount of time

706  
00:33:42,980 --> 00:33:39,539  
going around the world the various seed

707  
00:33:47,570 --> 00:33:42,990  
companies because this form of treatment

708  
00:33:49,730 --> 00:33:47,580  
of seeds so in no way changes the

709  
00:33:52,159 --> 00:33:49,740  
environment it doesn't cause any harmful

710  
00:33:55,879 --> 00:33:52,169  
effects there's no pesticide involved

711  
00:33:58,730 --> 00:33:55,889  
there's no residue the flora and fauna

712  
00:34:02,090 --> 00:33:58,740  
are not in any way affected and the

713  
00:34:04,690 --> 00:34:02,100

feeds you know it's very inexpensive to

714

00:34:07,220 --> 00:34:04,700

treat them with this condition

715

00:34:08,750 --> 00:34:07,230

unfortunately the seed companies like

716

00:34:11,659 --> 00:34:08,760

Monsanto and many of these other

717

00:34:14,720 --> 00:34:11,669

companies have invested millions if not

718

00:34:18,589 --> 00:34:14,730

billions of dollars now in this genetic

719

00:34:22,060 --> 00:34:18,599

stuff which is horribly if they nobody

720

00:34:23,990 --> 00:34:22,070

has any idea how safe this is and it

721

00:34:25,940 --> 00:34:24,000

unfortunately they make a great deal of

722

00:34:28,099 --> 00:34:25,950

their money because their seeds are

723

00:34:31,579 --> 00:34:28,109

engineered so that they of course need

724

00:34:33,409 --> 00:34:31,589

their roundup pesticide and then they

725

00:34:36,740 --> 00:34:33,419

need all these fertilizers that these

726

00:34:39,139 --> 00:34:36,750

companies produce and sell also where as

727

00:34:40,010 --> 00:34:39,149

well we discovered from the crop circles

728

00:34:45,020 --> 00:34:40,020

you

729

00:34:47,780 --> 00:34:45,030

need any pesticides at all because the

730

00:34:50,630 --> 00:34:47,790

plants are growing so much faster than

731

00:34:53,690 --> 00:34:50,640

the pests which have evolved to feed on

732

00:34:56,210 --> 00:34:53,700

those plants that by the time the pests

733

00:34:58,490 --> 00:34:56,220

have come out of their cocoons or

734

00:35:01,580 --> 00:34:58,500

whatever the plan is way past the stage

735

00:35:04,130 --> 00:35:01,590

where it's in trouble and yet nobody was

736

00:35:05,930 --> 00:35:04,140

interested in this discovery they

737

00:35:08,750 --> 00:35:05,940

replicated our work it was replicated

738

00:35:11,330 --> 00:35:08,760

all over the world in fields where we

739

00:35:15,470 --> 00:35:11,340

and it's the treated seed with we call

740

00:35:17,180 --> 00:35:15,480

it the MIR technique oh and we treated

741

00:35:18,860 --> 00:35:17,190

the seeds and then would send them off

742

00:35:20,360 --> 00:35:18,870

to these companies around the world and

743

00:35:23,240 --> 00:35:20,370

they would run the studies they would

744

00:35:24,860 --> 00:35:23,250

plant them and compare them to various

745

00:35:27,680 --> 00:35:24,870

other seeds that they were you know

746

00:35:29,930 --> 00:35:27,690

trying and consistently we saw

747

00:35:33,080 --> 00:35:29,940

twenty-five to thirty-five percent

748

00:35:34,760 --> 00:35:33,090

increase in yield where they reported

749

00:35:37,850 --> 00:35:34,770

this and we also found it in our own

750

00:35:40,250 --> 00:35:37,860

studies and yet in spite of that there

751

00:35:42,890 --> 00:35:40,260

was absolutely no interest in fact if

752

00:35:45,260 --> 00:35:42,900

anything the desire was to squash the

753

00:35:48,020 --> 00:35:45,270

information and keep it from getting out

754

00:35:50,990 --> 00:35:48,030

I think that's rather a sad commentary

755

00:35:52,730 --> 00:35:51,000

on the state of it's all for money you

756

00:35:55,640 --> 00:35:52,740

know make not permit you're not

757

00:35:57,710 --> 00:35:55,650

interested right right right I want to

758

00:35:59,630 --> 00:35:57,720

move on to the last energy that

759

00:36:02,060 --> 00:35:59,640

particular energy we're talking here

760

00:36:04,130 --> 00:36:02,070

about these unusual electrical pulses so

761

00:36:06,290 --> 00:36:04,140

we've discovered that there is something

762

00:36:08,870 --> 00:36:06,300

even microwaves are something that act

763

00:36:11,060 --> 00:36:08,880

just like them involved in creating crop

764

00:36:13,280 --> 00:36:11,070

circles there are also these unusual

765

00:36:18,260 --> 00:36:13,290

electrical pulses clearly they are also

766

00:36:22,850 --> 00:36:18,270

involved then in 1993 by accident again

767

00:36:25,190 --> 00:36:22,860

we found a crop formation in cherry hill

768

00:36:27,440 --> 00:36:25,200

in England that it happened during

769

00:36:31,970 --> 00:36:27,450

during the Perseid meteor shower in

770

00:36:34,330 --> 00:36:31,980

August and in the center of this video

771

00:36:38,360 --> 00:36:34,340

centers of this particular conformation

772

00:36:40,910 --> 00:36:38,370

there were there was sort of a glaze now

773

00:36:44,270 --> 00:36:40,920

this information is all in the magnetic

774

00:36:46,880 --> 00:36:44,280

material in the soils section and their

775

00:36:49,790 --> 00:36:46,890

photos there that show this metallic

776

00:36:52,130 --> 00:36:49,800

blaze that was found on the soils in

777

00:36:53,509 --> 00:36:52,140

that crop circle and then the plants

778

00:36:56,329 --> 00:36:53,519

themselves with centers

779

00:36:59,149 --> 00:36:56,339

of the flattened areas those plants were

780

00:37:01,299 --> 00:36:59,159

coverage in this sort of residue and we

781

00:37:05,329 --> 00:37:01,309

then discovered also these tiny little

782

00:37:08,859 --> 00:37:05,339

spherical particles again of this had

783

00:37:11,029 --> 00:37:08,869

what had been molten iron and

784

00:37:14,529 --> 00:37:11,039

theoretically what we thought was going

785

00:37:18,259 --> 00:37:14,539

on was that we know that meteoritic iron

786

00:37:20,809 --> 00:37:18,269

tiny little particles like microscopic

787

00:37:22,309 --> 00:37:20,819

particles of meteoritic iron are

788

00:37:24,169 --> 00:37:22,319

filtering down to earth through the

789

00:37:26,989 --> 00:37:24,179

atmosphere all the time and that's

790

00:37:30,289 --> 00:37:26,999

perfectly normal and during a meteor

791

00:37:33,259 --> 00:37:30,299

shower there's more of this stuff then

792

00:37:36,519 --> 00:37:33,269

there is normally coming down and so

793

00:37:40,339 --> 00:37:36,529

what we thought was going on was that a

794

00:37:44,179 --> 00:37:40,349

plasma of sass whirling plasma vortex

795

00:37:47,089 --> 00:37:44,189

system which we know because we knew

796

00:37:49,969 --> 00:37:47,099

that plasmas when they spiral emit

797

00:37:51,469 --> 00:37:49,979

microwaves we know that they also are

798

00:37:54,949 --> 00:37:51,479

associated with these highly unusual

799

00:37:58,669 --> 00:37:54,959

electrical pulses and so the concept

800

00:38:01,069 --> 00:37:58,679

developed that somehow in the ionosphere

801  
00:38:03,669 --> 00:38:01,079  
not local weather conditions we're

802  
00:38:07,249 --> 00:38:03,679  
talking way up in the upper atmosphere

803  
00:38:09,709 --> 00:38:07,259  
that turbulence of some sort originated

804  
00:38:12,889 --> 00:38:09,719  
created these plasma defending plasma

805  
00:38:16,519 --> 00:38:12,899  
systems which were spiraling around the

806  
00:38:18,319 --> 00:38:16,529  
Earth's magnetic currents right down to

807  
00:38:20,299 --> 00:38:18,329  
the Earth's surface and as they were

808  
00:38:22,669 --> 00:38:20,309  
doing this they were emitting microwaves

809  
00:38:24,769 --> 00:38:22,679  
emitting these unusual electrical pulses

810  
00:38:27,259 --> 00:38:24,779  
and of course as they spiraled they

811  
00:38:29,899 --> 00:38:27,269  
generated very strong magnetic fields

812  
00:38:32,839 --> 00:38:29,909  
those magnetic fields would be strong

813  
00:38:36,919 --> 00:38:32,849

enough to draw in these microscopic

814

00:38:39,349 --> 00:38:36,929

particles of meteoritic dust if in fact

815

00:38:40,789 --> 00:38:39,359

the plasma occurred in a place where

816

00:38:44,029 --> 00:38:40,799

there was one of these meteor showers

817

00:38:46,370 --> 00:38:44,039

going on and then the meteoritic

818

00:38:49,549 --> 00:38:46,380

particles would be heated up by the

819

00:38:52,549 --> 00:38:49,559

microwaves being emitted by the spiral

820

00:38:55,159 --> 00:38:52,559

and what happens is the materials then

821

00:38:57,649 --> 00:38:55,169

it's turned into its molten it's

822

00:39:00,259 --> 00:38:57,659

literally liquid and it's just like in

823

00:39:02,989 --> 00:39:00,269

the Revolutionary War when we made shot

824

00:39:05,830 --> 00:39:02,999

we build huge shock towers and heated up

825

00:39:08,740 --> 00:39:05,840

the lead and dumped it off the end

826

00:39:10,720 --> 00:39:08,750

what happens is that in the molten state

827

00:39:13,690 --> 00:39:10,730

as it falls through the air it forms a

828

00:39:16,960 --> 00:39:13,700

sphere and that's exactly what we were

829

00:39:19,990 --> 00:39:16,970

finding from that time onward in the

830

00:39:23,160 --> 00:39:20,000

crop circle soils these tiny little 10

831

00:39:27,850 --> 00:39:23,170

to 50 micron diameter perfect spheres of

832

00:39:30,070 --> 00:39:27,860

highly magnetized iron and this was our

833

00:39:34,510 --> 00:39:30,080

understanding of where it had come from

834

00:39:36,460 --> 00:39:34,520

and how it got that way and what it ends

835

00:39:39,090 --> 00:39:36,470

up showing us is that we have now at

836

00:39:42,250 --> 00:39:39,100

least three different types of energy

837

00:39:44,770 --> 00:39:42,260

involved in the creation of crop circles

838

00:39:48,250 --> 00:39:44,780

and all three of them are known to be

839

00:39:49,750 --> 00:39:48,260

associated with spiraling plasmas on

840

00:39:51,730 --> 00:39:49,760

northern lights for instance is a

841

00:39:54,190 --> 00:39:51,740

spiraling plasma you'd be familiar with

842

00:39:57,700 --> 00:39:54,200

but it never comes down to the Earth's

843

00:39:59,950 --> 00:39:57,710

surface and it's also too high energy

844

00:40:02,710 --> 00:39:59,960

for what we're talking about another

845

00:40:04,990 --> 00:40:02,720

plasma system or discharge you of course

846

00:40:07,030 --> 00:40:05,000

knows a lightning strike that is the

847

00:40:09,880 --> 00:40:07,040

only one currently known to actually

848

00:40:11,740 --> 00:40:09,890

reach the Earth's surface but a

849

00:40:13,990 --> 00:40:11,750

lightning strike is much too intense

850

00:40:15,550 --> 00:40:14,000

that's much too much energy it's much

851

00:40:19,180 --> 00:40:15,560

greater than what's going on the crop

852

00:40:23,530 --> 00:40:19,190

circles and so Levengood proposed that

853

00:40:25,720 --> 00:40:23,540

an unknown plasma of some sort Mia's

854

00:40:28,990 --> 00:40:25,730

proposal was that there did exist

855

00:40:31,330 --> 00:40:29,000

perhaps a plasma not yet understood by

856

00:40:34,420 --> 00:40:31,340

science not yet documented by science

857

00:40:37,510 --> 00:40:34,430

there was much lower energy than either

858

00:40:39,940 --> 00:40:37,520

the northern lights or a lightning

859

00:40:42,010 --> 00:40:39,950

strike or sprites or blue Jets some of

860

00:40:45,100 --> 00:40:42,020

these other plasma discharges which have

861

00:40:46,930 --> 00:40:45,110

been discovered lately and add if in

862

00:40:49,840 --> 00:40:46,940

fact this particular one is actually

863

00:40:51,700 --> 00:40:49,850

reaching the Earth's surface drawn to

864

00:40:54,460 --> 00:40:51,710

certain places because of electrical

865

00:40:55,660 --> 00:40:54,470

charge in the Earth's surface and it

866

00:40:58,630 --> 00:40:55,670

also has something to do with

867

00:41:03,130 --> 00:40:58,640

underground aquifers creating the crop

868

00:41:04,840 --> 00:41:03,140

circles that is the basic idea so given

869

00:41:09,340 --> 00:41:04,850

that information are there questions

870

00:41:12,250 --> 00:41:09,350

based on about that ken do you have a

871

00:41:15,570 --> 00:41:12,260

question at all well I was taking notes

872

00:41:18,360 --> 00:41:15,580

on and trying to keep up and writing ivi

873

00:41:22,980 --> 00:41:18,370

what is it about England

874

00:41:25,290 --> 00:41:22,990

in that little small space of territory

875

00:41:27,690 --> 00:41:25,300

that would attract this type of energy

876

00:41:29,820 --> 00:41:27,700

that is it some kind of vortex or what

877

00:41:32,300 --> 00:41:29,830

have you come to any type of income I

878

00:41:34,710 --> 00:41:32,310

mean we can I can't answer you

879

00:41:38,070 --> 00:41:34,720

conclusively about that but I can give

880

00:41:41,580 --> 00:41:38,080

you a very good idea okay when we looked

881

00:41:43,290 --> 00:41:41,590

at the geology in southern England the

882

00:41:45,270 --> 00:41:43,300

first thing that became completely

883

00:41:46,980 --> 00:41:45,280

obvious when you go to southern England

884

00:41:48,750 --> 00:41:46,990

because you can see of all over the

885

00:41:50,670 --> 00:41:48,760

hillsides in these fourth child horses

886

00:41:55,380 --> 00:41:50,680

you know you see etched in Williams I

887

00:41:59,300 --> 00:41:55,390

view the entire sub strata is chalk now

888

00:42:02,910 --> 00:41:59,310

chalk is the most porous of the

889

00:42:04,910 --> 00:42:02,920

geological rocks limestone is a close

890

00:42:09,240 --> 00:42:04,920

second to chalky of the most porous as

891

00:42:11,970 --> 00:42:09,250

the surface water ring to Purple's down

892

00:42:15,840 --> 00:42:11,980

partying and percolates down through the

893

00:42:17,430 --> 00:42:15,850

chalk down to the aquifer the electrons

894

00:42:20,940 --> 00:42:17,440

get stripped off and you get a charge

895

00:42:24,930 --> 00:42:20,950

separation in this water oh it's slowly

896

00:42:28,470 --> 00:42:24,940

slowly over the summer as the rain

897

00:42:30,120 --> 00:42:28,480

percolates farther and farther down sets

898

00:42:32,850 --> 00:42:30,130

up a charge separation so that you have

899

00:42:35,580 --> 00:42:32,860

a slightly increased charge at the

900

00:42:38,970 --> 00:42:35,590

ground level in southern England over

901  
00:42:42,240 --> 00:42:38,980  
this chalk aquifer and this could very

902  
00:42:45,240 --> 00:42:42,250  
easily be functioning as the attractor

903  
00:42:48,450 --> 00:42:45,250  
why so many of them occur in that

904  
00:42:51,120 --> 00:42:48,460  
particular area we've noticed that in

905  
00:42:52,560 --> 00:42:51,130  
here in the United States in Germany and

906  
00:42:55,290 --> 00:42:52,570  
a number of the other countries that

907  
00:42:57,540 --> 00:42:55,300  
we've looked at the substrata in the

908  
00:43:00,750 --> 00:42:57,550  
area where the circles are occurring is

909  
00:43:03,750 --> 00:43:00,760  
primarily limestone and limestone is the

910  
00:43:06,240 --> 00:43:03,760  
next most porous rock now whether this

911  
00:43:08,580 --> 00:43:06,250  
ends up being the reason we're not

912  
00:43:11,100 --> 00:43:08,590  
geologists we haven't done enough work

913  
00:43:15,270 --> 00:43:11,110

to tell you that is the reason but it's

914

00:43:17,970 --> 00:43:15,280

so it's a strong contender for why they

915

00:43:22,490 --> 00:43:17,980

occur more prominently in some places

916

00:43:25,970 --> 00:43:22,500

than others very very good question can

917

00:43:31,020 --> 00:43:28,740

mancini's go ahead I'm sorry well I got

918

00:43:34,290 --> 00:43:31,030

a question from our friend Marilyn in

919

00:43:36,270 --> 00:43:34,300

Oklahoma here she wants a know if you

920

00:43:38,340 --> 00:43:36,280

measure any difference is an EMF between

921

00:43:43,890 --> 00:43:38,350

hoaxes and true crop formations do you

922

00:43:47,750 --> 00:43:43,900

do any EMF testing we did there wasn't

923

00:43:52,410 --> 00:43:47,760

really EMF testing but we did some elect

924

00:43:55,230 --> 00:43:52,420

electrostatic voltmeter work Oh now one

925

00:43:58,050 --> 00:43:55,240

thing that has tried differentiate here

926  
00:43:59,760 --> 00:43:58,060  
between man-made I don't call them

927  
00:44:02,220 --> 00:43:59,770  
hoaxes i call them mechanically

928  
00:44:04,790 --> 00:44:02,230  
flattened containing physically

929  
00:44:08,310 --> 00:44:04,800  
mechanically pushing down those plants

930  
00:44:10,680 --> 00:44:08,320  
when you do that with your feet with

931  
00:44:12,690 --> 00:44:10,690  
boards with planks with a cement roller

932  
00:44:15,120 --> 00:44:12,700  
it doesn't make any difference what you

933  
00:44:18,270 --> 00:44:15,130  
do it with as long as it's not

934  
00:44:23,490 --> 00:44:18,280  
electrified there is absolutely no

935  
00:44:25,940 --> 00:44:23,500  
change in the apical node length in the

936  
00:44:30,330 --> 00:44:25,950  
presence of expulsion cavities in the

937  
00:44:32,370 --> 00:44:30,340  
germination capabilities or in there's

938  
00:44:34,800 --> 00:44:32,380

no depositing of these magnetic

939

00:44:37,320 --> 00:44:34,810

particles in the soils man you can

940

00:44:38,940 --> 00:44:37,330

flatten of the whole field if you want

941

00:44:42,390 --> 00:44:38,950

to hear green in the face it's not going

942

00:44:44,310 --> 00:44:42,400

to change any of those things to listen

943

00:44:46,440 --> 00:44:44,320

to the rest of this interview please go

944

00:44:48,990 --> 00:44:46,450

to inception radio network calm and

945

00:44:51,180 --> 00:44:49,000

register for the insider's club what is

946

00:44:53,550 --> 00:44:51,190

the insider's club the insider's club is

947

00:44:56,040 --> 00:44:53,560

our premium content what you just listen

948

00:44:59,400 --> 00:44:56,050

to now what you just listen to is a

949

00:45:01,320 --> 00:44:59,410

preview of that premium content the

950

00:45:04,440 --> 00:45:01,330

insider's club is how we pay the bills

951  
00:45:07,560 --> 00:45:04,450  
that's how you support higher and you

952  
00:45:09,960 --> 00:45:07,570  
joined forces with irn to get the truth

953  
00:45:11,880 --> 00:45:09,970  
out there now a lot of our content is

954  
00:45:16,260 --> 00:45:11,890  
free i mean most of our content industry

955  
00:45:18,450 --> 00:45:16,270  
all of our live shows are free if you go

956  
00:45:20,880 --> 00:45:18,460  
to our archives the vast majority of our

957  
00:45:23,790 --> 00:45:20,890  
archives are for free but to pay the

958  
00:45:26,520 --> 00:45:23,800  
bills to help make sure this network

959  
00:45:29,580 --> 00:45:26,530  
stays alive stays viable

960  
00:45:32,250 --> 00:45:29,590  
we offer those who really love our radio

961  
00:45:35,160 --> 00:45:32,260  
station or network and our shows an

962  
00:45:38,670 --> 00:45:35,170  
ability to support our network and

963  
00:45:41,340 --> 00:45:38,680

become a part of Eire n actually join

964

00:45:43,110 --> 00:45:41,350

forces and helping us get the truth out

965

00:45:46,560 --> 00:45:43,120

there now how do you do this again you

966

00:45:49,080 --> 00:45:46,570

go to inception radio network com and

967

00:45:51,570 --> 00:45:49,090

you subscribe for the insider's club and

968

00:45:53,820 --> 00:45:51,580

you would you'll have access to all of

969

00:45:55,890 --> 00:45:53,830

our archives including this show the

970

00:45:57,960 --> 00:45:55,900

rest of the show a faster way of getting

971

00:46:00,600 --> 00:45:57,970

there go to the description below this

972

00:46:02,790 --> 00:46:00,610

video and click on the link and like I

973

00:46:05,130 --> 00:46:02,800

said you'll be joining forces with irn

974

00:46:07,770 --> 00:46:05,140

you'll have availability of all of our

975

00:46:19,380 --> 00:46:07,780

content and we really appreciate your

976  
00:46:21,690 --> 00:46:19,390  
support thank you hello everyone Lori

977  
00:46:24,630 --> 00:46:21,700  
and fenton here hosted the California

978  
00:46:27,780 --> 00:46:24,640  
MUFON radio show asking if you'd like

979  
00:46:31,290 --> 00:46:27,790  
special access to exclusive and amazing

980  
00:46:34,440 --> 00:46:31,300  
information about UFOs the paranormal

981  
00:46:37,560 --> 00:46:34,450  
and all things unexplained if you're

982  
00:46:40,410 --> 00:46:37,570  
nodding yes then join I rn's insider

983  
00:46:42,630 --> 00:46:40,420  
club as an insider club member you'll

984  
00:46:45,510 --> 00:46:42,640  
get an all-access pass to premier

985  
00:46:47,670 --> 00:46:45,520  
inception radio network content for only

986  
00:46:50,940 --> 00:46:47,680  
four dollars and ninety-nine cents a

987  
00:46:53,430 --> 00:46:50,950  
month this includes live UFO and

988  
00:46:55,690 --> 00:46:53,440

paranormal conferences live streaming

989

00:46:58,569 --> 00:46:55,700

UFO sky watches

990

00:47:01,900 --> 00:46:58,579

elusive irn radio and TV productions and

991

00:47:04,660 --> 00:47:01,910

of course paying radio with MJ and Ken

992

00:47:07,569 --> 00:47:04,670

starch so don't wait any longer visit

993

00:47:11,260 --> 00:47:07,579

inception radio network com and click on

994

00:47:16,990 --> 00:47:11,270

member login to join I rn's insider club

995

00:47:18,910 --> 00:47:17,000

and get your VIP access today to listen

996

00:47:21,040 --> 00:47:18,920

to the rest of this interview please go

997

00:47:23,589 --> 00:47:21,050

to inception radio network com and

998

00:47:25,780 --> 00:47:23,599

register for the insider's club what is

999

00:47:27,520 --> 00:47:25,790

the insider's club the insider's club is

1000

00:47:30,069 --> 00:47:27,530

our premium content what you've just

1001  
00:47:34,000 --> 00:47:30,079  
listened to now what you just listen to

1002  
00:47:35,920 --> 00:47:34,010  
is a preview of that premium content the

1003  
00:47:39,040 --> 00:47:35,930  
insider's club is how we pay the bills

1004  
00:47:42,160 --> 00:47:39,050  
that's how you support ire and you

1005  
00:47:44,560 --> 00:47:42,170  
joined forces with irn to get the truth

1006  
00:47:46,480 --> 00:47:44,570  
out there now a lot of our content is

1007  
00:47:50,740 --> 00:47:46,490  
free i mean most of our content industry

1008  
00:47:52,870 --> 00:47:50,750  
all of our lives shows are free if you

1009  
00:47:55,480 --> 00:47:52,880  
go to our archives the vast majority of

1010  
00:47:58,390 --> 00:47:55,490  
our archives are for free but to pay the

1011  
00:48:02,380 --> 00:47:58,400  
bills to help make sure this network

1012  
00:48:04,809 --> 00:48:02,390  
stays alive stays viable we offer those

1013  
00:48:07,589 --> 00:48:04,819

who really love our radio station or

1014

00:48:11,109 --> 00:48:07,599

network and our shows an ability to

1015

00:48:14,319 --> 00:48:11,119

support our network and become a part of

1016

00:48:16,420 --> 00:48:14,329

Eire n actually joined forces and

1017

00:48:17,920 --> 00:48:16,430

helping us get the truth out there now

1018

00:48:21,339 --> 00:48:17,930

how do you do this again you go to

1019

00:48:23,859 --> 00:48:21,349

inception radio network com and you

1020

00:48:26,500 --> 00:48:23,869

subscribe for the insider's club and you

1021

00:48:28,809 --> 00:48:26,510

will you'll have access to all of our

1022

00:48:30,640 --> 00:48:28,819

archives including this show the rest of

1023

00:48:32,740 --> 00:48:30,650

the show a faster way of getting there

1024

00:48:35,230 --> 00:48:32,750

go to the description below this video

1025

00:48:37,780 --> 00:48:35,240

and click on the link and like I said

1026  
00:48:40,120 --> 00:48:37,790  
you'll be joining forces with irn you'll

1027  
00:48:42,430 --> 00:48:40,130  
have availability of all of our content

1028  
00:48:51,559 --> 00:48:42,440  
and we really appreciate your support

1029  
00:48:57,390 --> 00:48:54,960  
hello everyone Lori and Fenton here

1030  
00:49:00,720 --> 00:48:57,400  
hosted the California MUFON radio show

1031  
00:49:03,750 --> 00:49:00,730  
asking if you'd like special access to

1032  
00:49:07,079 --> 00:49:03,760  
exclusive and amazing information about

1033  
00:49:10,349 --> 00:49:07,089  
UFOs the paranormal and all things

1034  
00:49:13,980 --> 00:49:10,359  
unexplained if you're nodding yes then

00:49:55,620 --> 00:49:53,559

the rest of this interview please go to

1049

00:49:58,200 --> 00:49:55,630

inception radio network calm and

1050

00:50:00,359 --> 00:49:58,210

register for the insider's club what is

1051

00:50:02,130 --> 00:50:00,369

the insider's club the insider's club is

1052

00:50:04,650 --> 00:50:02,140

our premium content what you've just

1053

00:50:08,579 --> 00:50:04,660

listened to now what you just listen to

1054

00:50:10,500 --> 00:50:08,589

is a preview of that premium content the

1055

00:50:13,620 --> 00:50:10,510

insider's club is how we pay the bills

1056

00:50:16,740 --> 00:50:13,630

that's how you support ire and you

1057

00:50:19,170 --> 00:50:16,750

joined forces with irn to get the truth

1058

00:50:21,059 --> 00:50:19,180

out there now a lot of our content is

1059

00:50:25,319 --> 00:50:21,069

free i mean most of our content industry

1060

00:50:27,480 --> 00:50:25,329

all of our lives shows are free if you

1061

00:50:30,059 --> 00:50:27,490

go to our archives the vast majority of

1062

00:50:32,970 --> 00:50:30,069

our archives are for free but to pay the

1063

00:50:36,960 --> 00:50:32,980

bills to help make sure this network

1064

00:50:39,420 --> 00:50:36,970

stays alive stays viable we offer those

1065

00:50:42,329 --> 00:50:39,430

who really love our radio station or

1066

00:50:45,690 --> 00:50:42,339

network and our shows an ability to

1067

00:50:49,529 --> 00:50:45,700

support our network and become a part of

1068

00:50:51,240 --> 00:50:49,539

our n actually joined forces and helping

1069

00:50:53,069 --> 00:50:51,250

us get the truth out there now how do

1070

00:50:55,749 --> 00:50:53,079

you do this again you go to inception

1071

00:50:57,849 --> 00:50:55,759

radio network com

1072

00:51:00,099 --> 00:50:57,859

and you subscribe for the insider's club

1073

00:51:03,009 --> 00:51:00,109

and you would you'll have access to all

1074

00:51:05,079 --> 00:51:03,019

of our archives including the show the

1075

00:51:07,149 --> 00:51:05,089

rest of the show a faster way of getting

1076  
00:51:09,789 --> 00:51:07,159  
there go to the description below this

1077  
00:51:11,979 --> 00:51:09,799  
video and click on the link and like I

1078  
00:51:14,319 --> 00:51:11,989  
said you'll be joining forces with irn

1079  
00:51:16,959 --> 00:51:14,329  
you'll have availability of all of our

1080  
00:51:27,749 --> 00:51:16,969  
content and we really appreciate your

1081  
00:51:30,189 --> 00:51:27,759  
support thank you hello everyone

1082  
00:51:33,069 --> 00:51:30,199  
Laurieann fenton here hosted the

1083  
00:51:35,589 --> 00:51:33,079  
California MUFON radio show asking if

1084  
00:51:39,669 --> 00:51:35,599  
you'd like special access to exclusive

1085  
00:51:42,939 --> 00:51:39,679  
and amazing information about UFOs the

1086  
00:51:45,999 --> 00:51:42,949  
paranormal and all things unexplained if

1087  
00:51:49,329 --> 00:51:46,009  
you're nodding yes then join I rn's

1088  
00:51:51,789 --> 00:51:49,339

insider club as an insider club member

1089

00:51:54,699 --> 00:51:51,799

you'll get an all-access pass to premier

1090

00:51:56,829 --> 00:51:54,709

inception radio network content for only

1091

00:52:00,129 --> 00:51:56,839

four dollars and ninety-nine cents a

1092

00:52:02,620 --> 00:52:00,139

month this includes live UFO and

1093

00:52:04,859 --> 00:52:02,630

paranormal conferences live streaming

1094

00:52:07,739 --> 00:52:04,869

UFO sky watches x

1095

00:52:11,099 --> 00:52:07,749

elusive irn radio and TV productions and

1096

00:52:13,829 --> 00:52:11,109

of course paying radio with MJ and Ken

1097

00:52:16,769 --> 00:52:13,839

Storch so don't wait any longer visit

1098

00:52:20,099 --> 00:52:16,779
