

The background of the image is a composite of space imagery. The top half shows a dark blue/black sky with a large, detailed view of the Moon on the right side. The bottom half shows a curved horizon of the Earth with a bright blue atmosphere and white clouds. The text is overlaid on this background.

2014 Border Zone
UFO Conference

Starchild Skull

1
00:00:16,010 --> 00:00:03,290
you're listening to Ira the inception

2
00:00:19,640 --> 00:00:16,020
radio network Chicago Illinois you're

3
00:00:25,130 --> 00:00:19,650
listening to I RN 2014 orders of

4
00:00:27,980 --> 00:00:25,140
international UFO conference welcome to

5
00:00:30,800 --> 00:00:27,990
the Presidio I'm Brad Newton I'm the the

6
00:00:32,209 --> 00:00:30,810
man of many hats in presidio I let's see

7
00:00:34,370 --> 00:00:32,219
let's run down all the list of things

8
00:00:37,040 --> 00:00:34,380
that I do I have the deputy

9
00:00:38,810 --> 00:00:37,050
administrator I am the executive

10
00:00:43,100 --> 00:00:38,820
director of the Presidio municipal

11
00:00:47,420 --> 00:00:43,110
development district I am the director

12
00:00:50,779 --> 00:00:47,430
of tourism and and the landfill

13
00:00:53,569 --> 00:00:50,789

administrator but on a lighter note we

14

00:00:55,069 --> 00:00:53,579

we appreciate y'all coming to Presidio

15

00:00:56,750 --> 00:00:55,079

we started off with a really good

16

00:00:59,510 --> 00:00:56,760

program last night there's going to be

17

00:01:06,770 --> 00:00:59,520

more music over to do to the dead music

18

00:01:11,170 --> 00:01:06,780

festival if you go to eb g b eb e GE b e

19

00:01:15,170 --> 00:01:11,180

i put a little sample of the Mariachi

20

00:01:17,240 --> 00:01:15,180

mariachis santa cruz and the mayor is

21

00:01:21,080 --> 00:01:17,250

very musical and he has trained

22

00:01:23,420 --> 00:01:21,090

musicians here for about 20 or 30 years

23

00:01:24,800 --> 00:01:23,430

and they've all split off and made

24

00:01:27,080 --> 00:01:24,810

different bands and everything so you're

25

00:01:30,160 --> 00:01:27,090

going to get a real good example of all

26

00:01:33,050 --> 00:01:30,170

the different kinds of music but EBG be

27

00:01:35,890 --> 00:01:33,060

I'll friend you right quick on that he's

28

00:01:39,219 --> 00:01:35,900

uh he was out in the hall somewhere but

29

00:01:41,679 --> 00:01:39,229

he is our mascot for the city and

30

00:01:44,690 --> 00:01:41,689

without further ado let's get started

31

00:01:47,810 --> 00:01:44,700

mr. Dennis Balthazar it's going to be

32

00:01:51,080 --> 00:01:47,820

your MC today I'll come up and give you

33

00:01:53,300 --> 00:01:51,090

some words of wisdom along the way one

34

00:01:56,840 --> 00:01:53,310

last thing we have the t-shirts right

35

00:01:59,840 --> 00:01:56,850

back over here and we're wanting to

36

00:02:02,359 --> 00:01:59,850

build a replica of the UFO that was

37

00:02:04,999 --> 00:02:02,369

involved with the mexico's roswell

38

00:02:08,130 --> 00:02:05,009

incident put it on display down here so

39

00:02:12,530 --> 00:02:08,140
with a ten dollar donation or more

40

00:02:15,030 --> 00:02:12,540
we'll get you a t-shirt so as you know

41

00:02:17,340 --> 00:02:15,040
everything all the events here are free

42

00:02:18,930 --> 00:02:17,350
but this is one of our little sideline

43

00:02:20,610 --> 00:02:18,940
deals for we're actually want to get

44

00:02:23,340 --> 00:02:20,620
into your wallet so please be generous

45

00:02:26,699 --> 00:02:23,350
and we thank you very much Thank You

46

00:02:29,490 --> 00:02:26,709
Brett I also want to welcome to the

47

00:02:31,830 --> 00:02:29,500
third annual border zone UFO conference

48

00:02:36,150 --> 00:02:31,840
and particularly I want to thank the

49

00:02:39,600 --> 00:02:36,160
city of Presidio for hosting it and brat

50

00:02:42,210 --> 00:02:39,610
Newton and Noah tourists for gathering

51
00:02:47,640 --> 00:02:42,220
an outstanding group of speakers for you

52
00:02:49,290 --> 00:02:47,650
today my name is Dennis ball taser and

53
00:02:51,449 --> 00:02:49,300
I'll be your master of ceremonies for

54
00:02:53,970 --> 00:02:51,459
the day and I'm going to be introducing

55
00:02:56,130 --> 00:02:53,980
the speakers I'll try to keep everything

56
00:02:58,290 --> 00:02:56,140
pretty well on schedule we have about an

57
00:03:00,720 --> 00:02:58,300
hour and 15 minutes or each speech or

58
00:03:04,430 --> 00:03:00,730
speaker this morning we'll take a

59
00:03:06,810 --> 00:03:04,440
15-minute break between the speakers and

60
00:03:08,820 --> 00:03:06,820
before we get started I got a couple of

61
00:03:10,890 --> 00:03:08,830
housekeeping things to take care if you

62
00:03:15,630 --> 00:03:10,900
have a cell phone that ask that you turn

63
00:03:18,060 --> 00:03:15,640

it off or put it on vibrate also of

64

00:03:20,640 --> 00:03:18,070

importance probably or the location of

65

00:03:22,949 --> 00:03:20,650

the bathrooms those will be out the hall

66

00:03:24,750 --> 00:03:22,959

there ought the doors to your left so if

67

00:03:28,050 --> 00:03:24,760

you're looking for a bathroom that's the

68

00:03:32,670 --> 00:03:28,060

place to find it our first speaker this

69

00:03:34,410 --> 00:03:32,680

morning she will talk about a mystery

70

00:03:37,830 --> 00:03:34,420

that is more astonishing than any

71

00:03:40,530 --> 00:03:37,840

Indiana Jones movie a strange skull

72

00:03:43,319 --> 00:03:40,540

found in a cave another New Mexico many

73

00:03:45,870 --> 00:03:43,329

years ago and it doesn't look human at

74

00:03:48,720 --> 00:03:45,880

all nor does it look like any other

75

00:03:50,520 --> 00:03:48,730

creature native to the earth could this

76
00:03:52,940 --> 00:03:50,530
be proof that our planet has been

77
00:03:55,770 --> 00:03:52,950
visited by extraterrestrials in the past

78
00:03:57,300 --> 00:03:55,780
is this a smoking gun that UFO

79
00:04:00,870 --> 00:03:57,310
researchers have been seeking for

80
00:04:03,120 --> 00:04:00,880
decades over time the skull came into

81
00:04:06,090 --> 00:04:03,130
the possession of El Paso neonatal nurse

82
00:04:08,840 --> 00:04:06,100
Melanie young who has been studying it

83
00:04:10,890 --> 00:04:08,850
for years and is our first presenter

84
00:04:13,020 --> 00:04:10,900
melanie has appeared on the History

85
00:04:16,349 --> 00:04:13,030
Channel's ancient astronauts and speaks

86
00:04:18,759 --> 00:04:16,359
frequently at UFO conferences get ready

87
00:04:20,830 --> 00:04:18,769
to hear an amazing tale of adventure and

88
00:04:23,529 --> 00:04:20,840

spence that a certainly stranger than

89

00:04:35,020 --> 00:04:23,539

fiction the mystery of the Starchild

90

00:04:36,730 --> 00:04:35,030

skull please welcome Melanie young thank

91

00:04:40,029 --> 00:04:36,740

you for coming out so early this morning

92

00:04:42,189 --> 00:04:40,039

you're in for a treat this is the

93

00:04:45,580 --> 00:04:42,199

Starchild skull that you can see here

94

00:04:50,110 --> 00:04:45,590

Starchild skull is going to be on this

95

00:04:52,870 --> 00:04:50,120

side the normal skulls over there right

96

00:04:54,309 --> 00:04:52,880

from left not a good idea for me so the

97

00:04:59,460 --> 00:04:54,319

starchild skull came into my possession

98

00:05:01,930 --> 00:04:59,470

and probably about 1998 through

99

00:05:04,270 --> 00:05:01,940

secondhand the woman that found it

100

00:05:06,850 --> 00:05:04,280

passed away gave it to a friend of mine

101
00:05:10,180 --> 00:05:06,860
who gave it to me instead here run with

102
00:05:16,689 --> 00:05:10,190
it so what you see right here is what I

103
00:05:20,279 --> 00:05:16,699
found in a box in 1998 so where did it

104
00:05:23,320 --> 00:05:20,289
come from came from northern New Mexico

105
00:05:27,550 --> 00:05:23,330
the story I was told came from the

106
00:05:30,159 --> 00:05:27,560
Chihuahua the state of Chihuahua around

107
00:05:33,370 --> 00:05:30,169
the city of delicious which at the time

108
00:05:37,659 --> 00:05:33,380
was just a village and I think that's in

109
00:05:41,559 --> 00:05:37,669
the Copper Canyon region how was it

110
00:05:45,249 --> 00:05:41,569
found well this young girl from El Paso

111
00:05:47,860 --> 00:05:45,259
and her family went down too delicious

112
00:05:50,760 --> 00:05:47,870
to seed the rest of the family as isn't

113
00:05:53,559 --> 00:05:50,770

commonly done around here and of course

114

00:05:55,870 --> 00:05:53,569

the mine caves in the Copper Canyon

115

00:06:00,309 --> 00:05:55,880

region are not the safest place to be

116

00:06:03,159 --> 00:06:00,319

for a young teenage girl so what they

117

00:06:04,659 --> 00:06:03,169

told the kids please don't go out into

118

00:06:08,649 --> 00:06:04,669

the mine caves because they're not real

119

00:06:10,480 --> 00:06:08,659

safe how many of you have teenagers okay

120

00:06:13,180 --> 00:06:10,490

so you tell him not to do something what

121

00:06:14,740 --> 00:06:13,190

do they do they go right to it so she

122

00:06:17,589 --> 00:06:14,750

got away from everybody and she ran into

123

00:06:22,360 --> 00:06:17,599

this cave or walked into it exploring

124

00:06:24,580 --> 00:06:22,370

and she found this this is literally

125

00:06:28,420 --> 00:06:24,590

what she found lying on top of the

126
00:06:29,719 --> 00:06:28,430
ground was a skeleton of a human totally

127
00:06:32,989 --> 00:06:29,729
normal

128
00:06:34,519 --> 00:06:32,999
shocking in and of itself because you

129
00:06:40,309 --> 00:06:34,529
know who lays down on the ground and

130
00:06:41,749 --> 00:06:40,319
dies laying flat you know so she started

131
00:06:43,339 --> 00:06:41,759
looking at a little bit more carefully

132
00:06:46,309 --> 00:06:43,349
and she noticed coming out of the ground

133
00:06:49,489 --> 00:06:46,319
was this hand and it was wrapped around

134
00:06:53,140 --> 00:06:49,499
the arm of the other skeleton and she

135
00:06:56,209 --> 00:06:53,150
noticed that it was extremely deformed

136
00:06:59,450 --> 00:06:56,219
so she's not supposed to be there this

137
00:07:01,399 --> 00:06:59,460
is really cool crap for 14 year old 13

138
00:07:03,589 --> 00:07:01,409

year old at the time what did you do

139

00:07:05,809 --> 00:07:03,599

you've got to find out where that hand

140

00:07:07,489 --> 00:07:05,819

comes from so she dug it up the ground

141

00:07:10,159 --> 00:07:07,499

was very soft it hadn't been touched

142

00:07:12,860 --> 00:07:10,169

it's in a mineshaft so all of this has

143

00:07:15,980 --> 00:07:12,870

been really preserved by human Nate by

144

00:07:19,700 --> 00:07:15,990

mother nature she digs up the entire

145

00:07:22,279 --> 00:07:19,710

skeleton and notices that it is very

146

00:07:27,489 --> 00:07:22,289

small in stature but it is totally

147

00:07:31,249 --> 00:07:27,499

deformed in every way and so what is any

148

00:07:34,760 --> 00:07:31,259

curious teenager do she gathers it all

149

00:07:38,199 --> 00:07:34,770

up both skeletons the complete skeletons

150

00:07:41,209 --> 00:07:38,209

puts him in a basket and takes him home

151
00:07:43,249 --> 00:07:41,219
so she's not supposed to be there who's

152
00:07:44,809 --> 00:07:43,259
supposed to have skeletons she can't

153
00:07:46,610 --> 00:07:44,819
take it into the house she can't tell

154
00:07:50,809 --> 00:07:46,620
mom and dad or anybody that she has it

155
00:07:55,429 --> 00:07:50,819
so she hides it underneath a tree out by

156
00:07:57,050 --> 00:07:55,439
the outside and they're going to go home

157
00:07:59,239 --> 00:07:57,060
the next day sheesh you think it'll be

158
00:08:02,209 --> 00:07:59,249
safe here and somehow I'll put it in the

159
00:08:03,860 --> 00:08:02,219
car and nobody will notice like any

160
00:08:06,619 --> 00:08:03,870
teenagers really thinking through these

161
00:08:12,409 --> 00:08:06,629
things but there's a torrential down

162
00:08:16,189 --> 00:08:12,419
fall it floods around here Oh Royals it

163
00:08:19,100 --> 00:08:16,199

gets washed away the next morning when

164

00:08:23,570 --> 00:08:19,110

she goes to retrieve it all she can find

165

00:08:26,829 --> 00:08:23,580

oh there's a misshapen head all she can

166

00:08:30,350 --> 00:08:26,839

find is the two skulls down the ravine

167

00:08:33,350 --> 00:08:30,360

now some of them is broken apart so as

168

00:08:38,059 --> 00:08:33,360

all we have today is the Starchild skull

169

00:08:41,300 --> 00:08:38,069

with a little bit of the top teeth the

170

00:08:42,759 --> 00:08:41,310

normal skull it's so heavy articles are

171

00:08:46,090 --> 00:08:42,769

so heavy so durable

172

00:08:48,939 --> 00:08:46,100

it's lasted now you may be wondering why

173

00:08:51,989 --> 00:08:48,949

there are no bottom teeth our bottom

174

00:08:56,290 --> 00:08:51,999

teeth and the maxilla the jaw is not

175

00:08:58,179 --> 00:08:56,300

connected to our skull it's connected by

176
00:09:02,069 --> 00:08:58,189
muscles and ligaments and that allows us

177
00:09:08,710 --> 00:09:02,079
to chew so those are rarely ever found

178
00:09:10,720 --> 00:09:08,720
with an ancient skull like this okay so

179
00:09:14,439 --> 00:09:10,730
my first question is what do I do with

180
00:09:17,169 --> 00:09:14,449
this they gave it to me because i am a

181
00:09:20,079 --> 00:09:17,179
neonatal nurse i worked at the county

182
00:09:26,079 --> 00:09:20,089
hospital teaching hospital on the border

183
00:09:29,859 --> 00:09:26,089
I have seen almost every deformity every

184
00:09:31,449 --> 00:09:29,869
genetic disorder that is out there if I

185
00:09:33,609 --> 00:09:31,459
haven't seen it I've seen it in the

186
00:09:36,789 --> 00:09:33,619
textbooks and I've taught doctors how to

187
00:09:38,889 --> 00:09:36,799
deal with these things trust me doctors

188
00:09:41,979 --> 00:09:38,899

coming out of med school really don't

189

00:09:44,199 --> 00:09:41,989

know how to take care of things nurses

190

00:09:47,289 --> 00:09:44,209

teach them and we don't get paid for it

191

00:09:48,819 --> 00:09:47,299

but that's another story okay so my

192

00:09:51,069 --> 00:09:48,829

first question is do I leave it in a box

193

00:09:53,439 --> 00:09:51,079

for the next 30 years for my kids to

194

00:09:57,059 --> 00:09:53,449

figure out what to do with it and trust

195

00:10:00,429 --> 00:09:57,069

me they wouldn't have a clue either or

196

00:10:03,789 --> 00:10:00,439

what else am I thinking is this a

197

00:10:05,970 --> 00:10:03,799

deformity if this is a real genetic

198

00:10:08,019 --> 00:10:05,980

deformity of some sort it's still

199

00:10:10,989 --> 00:10:08,029

significant because it's not in the

200

00:10:13,929 --> 00:10:10,999

textbooks so we need to do more research

201
00:10:15,999 --> 00:10:13,939
on it what did what why did this thing

202
00:10:21,910 --> 00:10:16,009
live as long as it did with as many

203
00:10:25,539 --> 00:10:21,920
deformities as it had or could it be a

204
00:10:27,939 --> 00:10:25,549
human-alien hybrid that was all that is

205
00:10:30,129 --> 00:10:27,949
all of the rage we're all listening to

206
00:10:32,429 --> 00:10:30,139
all these abductees saying oh they taken

207
00:10:36,059 --> 00:10:32,439
my sperm Oh they've taken my eggs and

208
00:10:40,479 --> 00:10:36,069
they're genetically manipulating our DNA

209
00:10:43,600 --> 00:10:40,489
if that's the case then we need it's

210
00:10:45,090 --> 00:10:43,610
again major historical value and it's

211
00:10:47,710 --> 00:10:45,100
going to require some more research

212
00:10:49,299 --> 00:10:47,720
let's nail it in the coffin lets you

213
00:10:53,610 --> 00:10:49,309

know stick it to the man if you will

214

00:10:57,420 --> 00:10:53,620

it's really happening or

215

00:11:01,380 --> 00:10:57,430

is this a completely new species alien

216

00:11:04,260 --> 00:11:01,390

or not it's a new species again major

217

00:11:11,190 --> 00:11:04,270

historical value and it requires a lot

218

00:11:14,460 --> 00:11:11,200

more research the research it is now I

219

00:11:20,400 --> 00:11:14,470

don't know how to do the research who to

220

00:11:22,829 --> 00:11:20,410

do it when to do it or where to do it so

221

00:11:26,610 --> 00:11:22,839

what do i do I start with going to our

222

00:11:30,600 --> 00:11:26,620

local MUFON community they turned me on

223

00:11:34,079 --> 00:11:30,610

to lloyd pye like pi just happened to be

224

00:11:36,950 --> 00:11:34,089

coming through el paso if you don't know

225

00:11:40,519 --> 00:11:36,960

his work he's the one that wrote

226

00:11:45,240 --> 00:11:40,529

everything you know is wrong his main

227

00:11:50,760 --> 00:11:45,250

study at that time was a human hominoids

228

00:11:53,280 --> 00:11:50,770

which is Sasquatch Yeti and human

229

00:11:56,370 --> 00:11:53,290

origins is where he was is was his

230

00:11:59,280 --> 00:11:56,380

expertise when I met him we met him at

231

00:12:00,900 --> 00:11:59,290

the Holiday Inn in El Paso he was just

232

00:12:05,040 --> 00:12:00,910

happened to be coming through doing the

233

00:12:07,829 --> 00:12:05,050

lecture there and we set up my local

234

00:12:10,170 --> 00:12:07,839

moving community set me up to have a

235

00:12:13,410 --> 00:12:10,180

visit with him we walked into the

236

00:12:17,160 --> 00:12:13,420

holiday and sat down in the comfort in

237

00:12:18,930 --> 00:12:17,170

the lobby and I hand him in a box and in

238

00:12:23,790 --> 00:12:18,940

the box were the two skulls he opens the

239

00:12:25,710 --> 00:12:23,800

lid of the box and his jaw just drops he

240

00:12:27,510 --> 00:12:25,720

takes a few minutes to collect himself

241

00:12:30,240 --> 00:12:27,520

and he takes this thing out of the box

242

00:12:32,670 --> 00:12:30,250

and he says what is this I said I don't

243

00:12:34,440 --> 00:12:32,680

know you tell me so we've started

244

00:12:36,150 --> 00:12:34,450

talking about his research and he does

245

00:12:40,560 --> 00:12:36,160

he told me what he was going to do if he

246

00:12:43,110 --> 00:12:40,570

ever found a sasquatch and he wanted to

247

00:12:47,340 --> 00:12:43,120

always prove it beyond a reasonable

248

00:12:50,610 --> 00:12:47,350

doubt prove it scientifically and put it

249

00:12:52,890 --> 00:12:50,620

in the history books he had a plan that

250

00:12:56,640 --> 00:12:52,900

plan fit very well with where I wanted

251
00:12:59,940 --> 00:12:56,650
to go with this he was the man that I

252
00:13:01,860 --> 00:12:59,950
sent it with within 20 minutes I had

253
00:13:03,210 --> 00:13:01,870
made my decision this was the guy that I

254
00:13:04,660 --> 00:13:03,220
was going to go with as my lead

255
00:13:07,350 --> 00:13:04,670
researcher I

256
00:13:10,510 --> 00:13:07,360
ended this girl off to him in 20 minutes

257
00:13:12,160 --> 00:13:10,520
he immediately was on his way up to

258
00:13:15,100 --> 00:13:12,170
laughlin to the international UFO

259
00:13:17,620 --> 00:13:15,110
community commit a conference and we

260
00:13:21,310 --> 00:13:17,630
introduced it at that conference that

261
00:13:25,260 --> 00:13:21,320
very next week so what makes this skull

262
00:13:28,600 --> 00:13:25,270
so unusual besides just looking at it

263
00:13:30,820 --> 00:13:28,610

the external shape the top you're seeing

264

00:13:33,790 --> 00:13:30,830

is that the normal human skull that was

265

00:13:41,160 --> 00:13:33,800

found with it and another bottom is the

266

00:13:48,310 --> 00:13:45,520

actually there are 24 differences in

267

00:13:51,640 --> 00:13:48,320

just the external structure the

268

00:13:56,460 --> 00:13:51,650

biochemical differences there's fiber

269

00:14:01,510 --> 00:13:56,470

it's got a richer collagen in there it's

270

00:14:04,840 --> 00:14:01,520

uniformly half as thick as the normal

271

00:14:08,470 --> 00:14:04,850

skull that was found next to it okay it

272

00:14:12,790 --> 00:14:08,480

weighs half as much however it's twice

273

00:14:15,690 --> 00:14:12,800

as strong or stronger the surface of our

274

00:14:17,890 --> 00:14:15,700

bones is covered with these little holes

275

00:14:19,840 --> 00:14:17,900

that I'm not even going to try to

276

00:14:21,460 --> 00:14:19,850

pronounce that but the Starchild doesn't

277

00:14:26,050 --> 00:14:21,470

have any those little holes are where

278

00:14:29,730 --> 00:14:26,060

the bone cells as we make new bone

279

00:14:32,710 --> 00:14:29,740

that's where the bone comes out at them

280

00:14:35,680 --> 00:14:32,720

there's a word for it I've lost it but

281

00:14:37,450 --> 00:14:35,690

that's how bone sales are coming to the

282

00:14:43,740 --> 00:14:37,460

surface and making things stronger as

283

00:14:47,160 --> 00:14:43,750

they die off they come up then we have

284

00:14:49,720 --> 00:14:47,170

microscopic fibers in the skull itself

285

00:14:52,120 --> 00:14:49,730

there's red residue that we don't know

286

00:14:56,170 --> 00:14:52,130

what it is the lower face is much

287

00:14:59,320 --> 00:14:56,180

smaller the there are no brow ridges

288

00:15:01,330 --> 00:14:59,330

which is where our eyelids go into which

289

00:15:05,080 --> 00:15:01,340

is what causes us to be able to see in

290

00:15:07,420 --> 00:15:05,090

bright sunlight there are none these

291

00:15:09,070 --> 00:15:07,430

sockets the eye sockets are totally

292

00:15:13,660 --> 00:15:09,080

different they're short they're they're

293

00:15:16,450 --> 00:15:13,670

thinner the holes where the that where

294

00:15:18,559 --> 00:15:16,460

the nerves come out are in a different

295

00:15:21,530 --> 00:15:18,569

location

296

00:15:25,019 --> 00:15:21,540

the optic nerves come out miss shapen

297

00:15:28,739 --> 00:15:25,029

definitely different the roof of the

298

00:15:31,799 --> 00:15:28,749

mouth is flat ours is not that allows us

299

00:15:36,299 --> 00:15:31,809

to talk differently the chewing muscles

300

00:15:42,499 --> 00:15:36,309

are half the size of ours the ears are

301
00:15:45,599 --> 00:15:42,509
much lower on the on the on the skull

302
00:15:49,979 --> 00:15:45,609
let's see what else we have the inner

303
00:15:52,229 --> 00:15:49,989
ear is twice as big then twice as large

304
00:15:54,629 --> 00:15:52,239
as ours it's hearing is going to be

305
00:15:58,229 --> 00:15:54,639
different the neck muscles half the size

306
00:16:01,409 --> 00:15:58,239
but it holds up a bigger head there's no

307
00:16:03,749 --> 00:16:01,419
external occipital protuberance now

308
00:16:04,889 --> 00:16:03,759
that's that's a big word in it if you'll

309
00:16:07,409 --> 00:16:04,899
fill the back of your head there's a

310
00:16:10,159 --> 00:16:07,419
knot that's where all your neck muscles

311
00:16:12,840 --> 00:16:10,169
attached to there is none on this thing

312
00:16:14,849 --> 00:16:12,850
you have one on the inside of your brain

313
00:16:16,789 --> 00:16:14,859

that's what holds the brain up the

314

00:16:20,759 --> 00:16:16,799

Starchild has one but it's much smaller

315

00:16:28,259 --> 00:16:20,769

how does that fit with the brain brains

316

00:16:31,909 --> 00:16:28,269

much bigger okay it's got this wide flat

317

00:16:34,650 --> 00:16:31,919

back of the head it's not cradle boarded

318

00:16:38,129 --> 00:16:34,660

okay there's a crease in the front of

319

00:16:41,059 --> 00:16:38,139

the head so it's kind of a heart shaped

320

00:16:44,609 --> 00:16:41,069

head anybody got a heart shaped head

321

00:16:47,309 --> 00:16:44,619

it's not found in normally in US the

322

00:16:50,939 --> 00:16:47,319

brain capacity Starchild's got sixteen

323

00:16:55,460 --> 00:16:50,949

hundred CCS a normal adult has fourteen

324

00:16:57,809 --> 00:16:55,470

hundred CCS a normal child has 1,200 CCS

325

00:17:00,210 --> 00:16:57,819

normally when you've got a 200cc

326

00:17:04,799 --> 00:17:00,220

difference in brain capacity it's a

327

00:17:09,000 --> 00:17:04,809

totally different species okay there are

328

00:17:12,240 --> 00:17:09,010

two rows of teeth in the Starchild that

329

00:17:14,329 --> 00:17:12,250

are there two rows up and there's teeth

330

00:17:17,819 --> 00:17:14,339

on the bottom these teeth are worn

331

00:17:19,889 --> 00:17:17,829

they've eaten he's eaten long enough to

332

00:17:23,730 --> 00:17:19,899

have worn down the enamel on the teeth

333

00:17:26,100 --> 00:17:23,740

and they're just as worn as this as the

334

00:17:26,530 --> 00:17:26,110

skull that it was found with so it had

335

00:17:29,800 --> 00:17:26,540

to

336

00:17:33,460 --> 00:17:29,810

been eating solid food on this planet

337

00:17:36,850 --> 00:17:33,470

for a very long time so that tells us

338

00:17:45,340 --> 00:17:36,860

that it's really not a child it's got to

339

00:17:49,290 --> 00:17:45,350

be at least a teenager or older okay the

340

00:17:54,610 --> 00:17:49,300

brain size the Starchild is on that side

341

00:17:58,780 --> 00:17:54,620

ok this is the MRI we put these things

342

00:18:01,570 --> 00:17:58,790

to it see how much bigger the whole list

343

00:18:05,710 --> 00:18:01,580

we're all that air would be see how

344

00:18:09,580 --> 00:18:05,720

smaller the human skull is it thinks

345

00:18:12,430 --> 00:18:09,590

differently it hears differently it sees

346

00:18:16,810 --> 00:18:12,440

differently totally different than what

347

00:18:20,140 --> 00:18:16,820

we have but the one thing that we

348

00:18:23,110 --> 00:18:20,150

thought we had was a slam dunk on this

349

00:18:25,870 --> 00:18:23,120

was there are no sinuses the Starchild

350

00:18:29,080 --> 00:18:25,880

doesn't have that cauliflower look of

351
00:18:32,830 --> 00:18:29,090
the sinuses the sinuses are what makes

352
00:18:35,680 --> 00:18:32,840
our head our skulls light enough that we

353
00:18:39,190 --> 00:18:35,690
can hold it up also gives us our tone

354
00:18:41,440 --> 00:18:39,200
our way of speaking so if we didn't have

355
00:18:43,360 --> 00:18:41,450
sentences we'd had that nasal twang like

356
00:18:46,030 --> 00:18:43,370
you have when you're you've got a sinus

357
00:18:49,450 --> 00:18:46,040
infection everything spooling up so it

358
00:18:51,270 --> 00:18:49,460
doesn't have those sinuses now you can

359
00:18:54,220 --> 00:18:51,280
see the research if you really do it

360
00:18:58,840 --> 00:18:54,230
there are people born with very very

361
00:19:01,060 --> 00:18:58,850
small minut sinuses and it's about maybe

362
00:19:04,750 --> 00:19:01,070
one two one two five percent of the

363
00:19:08,260 --> 00:19:04,760

population but this is no sinuses

364

00:19:15,620 --> 00:19:08,270

there's no sign of sinuses if you will

365

00:19:25,680 --> 00:19:21,690

the bonus dinner we cut this the normal

366

00:19:30,530 --> 00:19:25,690

skull is on this side the Starchild's on

367

00:19:33,720 --> 00:19:30,540

that side and you can see how difference

368

00:19:36,900 --> 00:19:33,730

you're going to quite for the wait and

369

00:19:38,970 --> 00:19:36,910

if you look closely in the Starchild you

370

00:19:42,500 --> 00:19:38,980

can see that you can see the bones and

371

00:19:45,840 --> 00:19:42,510

the way you can actually see the veins

372

00:19:49,410 --> 00:19:45,850

impression on the inside of the skull we

373

00:19:51,840 --> 00:19:49,420

have that too but we can actually see

374

00:19:54,630 --> 00:19:51,850

that there was blood supply of some sort

375

00:19:56,550 --> 00:19:54,640

that there was different lobes from

376

00:19:59,700 --> 00:19:56,560

looking at that so it's pretty

377

00:20:02,250 --> 00:19:59,710

interesting to actually for me as an

378

00:20:04,140 --> 00:20:02,260

Anatomy buff it was just really

379

00:20:07,320 --> 00:20:04,150

interesting to learn all of this stuff

380

00:20:11,790 --> 00:20:07,330

and see it firsthand we cut this these

381

00:20:13,170 --> 00:20:11,800

pieces out in our garage okay what else

382

00:20:16,680 --> 00:20:13,180

are you going to do nobody else is going

383

00:20:18,960 --> 00:20:16,690

to do it so the Starchild skull is so

384

00:20:23,100 --> 00:20:18,970

much stronger we had to go get a diamond

385

00:20:28,050 --> 00:20:23,110

drill bit the other one we didn't we

386

00:20:30,360 --> 00:20:28,060

used to separates saw blades to do this

387

00:20:32,670 --> 00:20:30,370

because we ended up doing testing on it

388

00:20:35,520 --> 00:20:32,680

so I want you to understand we did it as

389

00:20:37,320 --> 00:20:35,530

clearly as possible and I've had people

390

00:20:39,660 --> 00:20:37,330

ask me well why would you use just a

391

00:20:42,210 --> 00:20:39,670

regular saw blade well guess what when

392

00:20:45,990 --> 00:20:42,220

you go to surgery in a hospital we use

393

00:20:49,350 --> 00:20:46,000

black and decker tools okay we really do

394

00:20:52,170 --> 00:20:49,360

so it's not unusual to use black and

395

00:20:55,710 --> 00:20:52,180

decker tools in a medical laboratory

396

00:20:59,820 --> 00:20:55,720

environment so we're not off the scale

397

00:21:03,360 --> 00:20:59,830

here we just didn't sterilize it because

398

00:21:05,100 --> 00:21:03,370

i don't have an autoclave okay when we

399

00:21:09,120 --> 00:21:05,110

did looked at this under an electron

400

00:21:13,140 --> 00:21:09,130

microscope this is what we found these

401
00:21:16,590 --> 00:21:13,150
are very very unusual fibers we don't

402
00:21:19,600 --> 00:21:16,600
know what they're made of but that's not

403
00:21:23,190 --> 00:21:19,610
found in any other bone

404
00:21:26,520 --> 00:21:23,200
that has been looked at on this planet

405
00:21:29,320 --> 00:21:26,530
we don't have any of that in this and

406
00:21:31,990 --> 00:21:29,330
this is what's found uniformly

407
00:21:38,080 --> 00:21:32,000
throughout that entire piece that was

408
00:21:40,539 --> 00:21:38,090
cut strange residue if you look real

409
00:21:45,039 --> 00:21:40,549
closely into the holes of this you'll

410
00:21:47,590 --> 00:21:45,049
see these little bitty red specks we

411
00:21:51,520 --> 00:21:47,600
don't know what that is when you and I

412
00:21:54,370 --> 00:21:51,530
die are back here there's bacteria that

413
00:21:57,400 --> 00:21:54,380

eat out all of our bone marrow so that

414

00:22:00,940 --> 00:21:57,410

the bone is completely fresh and clean

415

00:22:03,669 --> 00:22:00,950

like you would see on TV okay it's not

416

00:22:06,340 --> 00:22:03,679

plastic like you see on TV but it is

417

00:22:09,120 --> 00:22:06,350

clean so there's bacteria that cleans

418

00:22:12,549 --> 00:22:09,130

all this out but why didn't it do this

419

00:22:14,530 --> 00:22:12,559

and understand that this is over 900

420

00:22:17,700 --> 00:22:14,540

years old the bacteria should have

421

00:22:21,580 --> 00:22:17,710

cleaned all of this out but so why not

422

00:22:25,299 --> 00:22:21,590

we don't know what that is okay we don't

423

00:22:28,450 --> 00:22:25,309

know the chemical composition we stuck

424

00:22:29,890 --> 00:22:28,460

this under what's called an SEM I don't

425

00:22:33,280 --> 00:22:29,900

remember what that all means but the

426
00:22:37,510 --> 00:22:33,290
human one is on that side Starchild's on

427
00:22:42,900 --> 00:22:37,520
this side but take a look starchild has

428
00:22:46,030 --> 00:22:42,910
aluminum in it it has more carbon in it

429
00:22:48,789 --> 00:22:46,040
all of these points if you notice or

430
00:22:52,390 --> 00:22:48,799
totally off the chart from what a normal

431
00:22:55,870 --> 00:22:52,400
bone is again we did this test on the

432
00:22:59,530 --> 00:22:55,880
skull that was found with it so this was

433
00:23:01,390 --> 00:22:59,540
test done on the same on the speed on

434
00:23:04,270 --> 00:23:01,400
the specimens that were found in the

435
00:23:08,890 --> 00:23:04,280
same place that are the same age in the

436
00:23:10,810 --> 00:23:08,900
same environment so this lens leads it

437
00:23:13,030 --> 00:23:10,820
to the question as what makes that

438
00:23:16,480 --> 00:23:13,040

different now I'm going to go back to

439

00:23:19,980 --> 00:23:16,490

the aluminum aluminum has been found to

440

00:23:23,299 --> 00:23:19,990

be a contributing factor in Alzheimer's

441

00:23:26,989 --> 00:23:23,309

that much aluminum in a bone

442

00:23:32,350 --> 00:23:26,999

would be lethal but yet this thing lived

443

00:23:39,230 --> 00:23:32,360

long enough to eat and we're down teeth

444

00:23:41,899 --> 00:23:39,240

very very interesting the eye sockets

445

00:23:45,019 --> 00:23:41,909

take a look at them our eye sockets are

446

00:23:50,899 --> 00:23:45,029

about two inches deep this is less than

447

00:23:53,269 --> 00:23:50,909

point seven inches and just a little

448

00:23:58,210 --> 00:23:53,279

different shape it's not so much square

449

00:24:00,859 --> 00:23:58,220

is not a cone shape okay and it's flat

450

00:24:04,180 --> 00:24:00,869

if you've run your finger around it it's

451

00:24:09,200 --> 00:24:04,190

flat ours has bumps and stuff in it to

452

00:24:11,690 --> 00:24:09,210

hold it there the eye sockets see the

453

00:24:14,299 --> 00:24:11,700

difference does holes with the blue

454

00:24:17,330 --> 00:24:14,309

thing that's where the nerves and the

455

00:24:19,100 --> 00:24:17,340

blood vessels come in at you know I

456

00:24:21,080 --> 00:24:19,110

don't know if you remember high school

457

00:24:24,259 --> 00:24:21,090

biology but we have what's cones that we

458

00:24:29,060 --> 00:24:24,269

see colors and stuff those are in the

459

00:24:31,940 --> 00:24:29,070

very back this is lower set it's totally

460

00:24:33,470 --> 00:24:31,950

miss shapen totally different you think

461

00:24:37,299 --> 00:24:33,480

that might have something to do with the

462

00:24:42,019 --> 00:24:37,309

way they might see in dark environment

463

00:24:44,299 --> 00:24:42,029

such as space the eyes going to have to

464

00:24:47,359 --> 00:24:44,309

be flat it can't be as big as ours

465

00:24:48,859 --> 00:24:47,369

because it'd be popping out with no brow

466

00:24:53,149 --> 00:24:48,869

ridges it wouldn't have an eyelid that

467

00:24:58,369 --> 00:24:53,159

could cover it so it's again something

468

00:25:00,289 --> 00:24:58,379

to think about the teeth this is what we

469

00:25:04,340 --> 00:25:00,299

this was a piece that was found with it

470

00:25:06,440 --> 00:25:04,350

take a look the teeth or worn they've

471

00:25:09,109 --> 00:25:06,450

got bumps and ridges in them from where

472

00:25:12,710 --> 00:25:09,119

they've eaten corn with pebbles in it

473

00:25:15,710 --> 00:25:12,720

and things like that they've worn it had

474

00:25:22,820 --> 00:25:15,720

to have AT&T it had to have eaten normal

475

00:25:25,190 --> 00:25:22,830

food of the time how do we know it's not

476

00:25:27,159 --> 00:25:25,200

a deformity this is dr. Ted Robinson

477

00:25:29,210 --> 00:25:27,169

this is what it looked like back then I

478

00:25:31,820 --> 00:25:29,220

don't think he'll let us take a picture

479

00:25:36,310 --> 00:25:31,830

anymore he's gone green

480

00:25:40,130 --> 00:25:36,320

but he is a major in Canada a big facial

481

00:25:42,169 --> 00:25:40,140

surgeon facial reconstruction and he's

482

00:25:44,240 --> 00:25:42,179

seen almost everything that you can

483

00:25:46,490 --> 00:25:44,250

think of I'm not going to read this to

484

00:25:48,590 --> 00:25:46,500

you but basically he's saying this is

485

00:25:50,090 --> 00:25:48,600

nothing I've ever seen before he had it

486

00:25:52,669 --> 00:25:50,100

for two years he took it to his

487

00:25:55,159 --> 00:25:52,679

colleagues it's definitely of

488

00:25:57,769 --> 00:25:55,169

significant value requiring more

489

00:26:01,880 --> 00:25:57,779

research it is significant you can't

490

00:26:05,779 --> 00:26:01,890

just pass it off as no big deal which is

491

00:26:08,539 --> 00:26:05,789

what a lot of people have done is this

492

00:26:10,430 --> 00:26:08,549

real science this is all the people that

493

00:26:14,120 --> 00:26:10,440

we have sent it to that are willing to

494

00:26:17,299 --> 00:26:14,130

put their name on it notice it's gone

495

00:26:22,789 --> 00:26:17,309

all over the world the UK British

496

00:26:25,460 --> 00:26:22,799

Columbia Vancouver London the genetics

497

00:26:28,490 --> 00:26:25,470

lab here and in the states we've had to

498

00:26:29,899 --> 00:26:28,500

genetics lab one in Canada one here in

499

00:26:33,379 --> 00:26:29,909

the states and the one that we're

500

00:26:36,080 --> 00:26:33,389

working with presently it's real science

501
00:26:40,789 --> 00:26:36,090
this is not just what we think I'm

502
00:26:44,799 --> 00:26:40,799
showing you what we know DNA your basic

503
00:26:47,450 --> 00:26:44,809
DNA you get DNA from mom and dad right

504
00:26:49,460 --> 00:26:47,460
mitochondrial DNA is a DNA you get from

505
00:26:52,490 --> 00:26:49,470
your mother that's what's in the ovum

506
00:26:55,639 --> 00:26:52,500
the egg then you have your nuclear DNA

507
00:27:00,230 --> 00:26:55,649
which is what's combined of both we've

508
00:27:04,610 --> 00:27:00,240
been able to get both kinds out remember

509
00:27:08,120 --> 00:27:04,620
this is 900 years old carbon-dated gives

510
00:27:11,629 --> 00:27:08,130
us plus or minus and it's been double

511
00:27:14,299 --> 00:27:11,639
tested by two separate labs so we know

512
00:27:16,009 --> 00:27:14,309
that that's a reality of the fact to be

513
00:27:22,519 --> 00:27:16,019

able to get DNA out of something that

514

00:27:27,230 --> 00:27:22,529

old is a feat in and of itself your base

515

00:27:29,090 --> 00:27:27,240

pairs in us your base pairs are the

516

00:27:32,029 --> 00:27:29,100

little rings of the ladder the steps of

517

00:27:34,600 --> 00:27:32,039

the latter so there are four amino acids

518

00:27:38,360 --> 00:27:34,610

or proteins that make up your base pairs

519

00:27:39,560 --> 00:27:38,370

way above my head we won't go into all

520

00:27:45,070 --> 00:27:39,570

of that

521

00:27:49,370 --> 00:27:45,080

but just to say the least human DNA has

522

00:27:52,310 --> 00:27:49,380

16,000 569 base pairs those are

523

00:27:55,730 --> 00:27:52,320

specialized they don't very very much

524

00:28:00,020 --> 00:27:55,740

we're allowed a variation of 120

525

00:28:02,410 --> 00:28:00,030

variations in humans that's what gives

526
00:28:07,700 --> 00:28:02,420
us our eye color our teeth or height our

527
00:28:11,660 --> 00:28:07,710
hair colored that stuff 80 more

528
00:28:14,690 --> 00:28:11,670
variations in Neanderthals makes them a

529
00:28:18,490 --> 00:28:14,700
different species so far in the

530
00:28:22,270 --> 00:28:18,500
Starchild what we have found there are

531
00:28:24,170 --> 00:28:22,280
800 different variations from humans

532
00:28:27,080 --> 00:28:24,180
tells me that there's something

533
00:28:29,990 --> 00:28:27,090
significant don't you think it's got to

534
00:28:34,610 --> 00:28:30,000
be a different species got to be a

535
00:28:37,340 --> 00:28:34,620
different species so here's the

536
00:28:42,980 --> 00:28:37,350
differences humans we can have a hundred

537
00:28:45,980 --> 00:28:42,990
and twenty Neanderthals 200d diane's eva

538
00:28:47,360 --> 00:28:45,990

is 385 for those of you who haven't

539

00:28:51,770 --> 00:28:47,370

heard of that that's just another

540

00:28:53,690 --> 00:28:51,780

subhuman that's that predates humans the

541

00:28:58,850 --> 00:28:53,700

Starchild has over eight hundred to a

542

00:29:03,050 --> 00:28:58,860

thousand different base pairs mutations

543

00:29:10,730 --> 00:29:03,060

a chimpanzee has 1,500 so we've got a

544

00:29:13,690 --> 00:29:10,740

new species if by no other means that so

545

00:29:16,300 --> 00:29:13,700

in 2010 we've done DNA we found

546

00:29:20,960 --> 00:29:16,310

mitochondrial and we found nuclear DNA

547

00:29:28,160 --> 00:29:20,970

we sent that to the NIH which has the

548

00:29:30,590 --> 00:29:28,170

largest DNA base program that we can put

549

00:29:33,160 --> 00:29:30,600

it through that compares it to

550

00:29:37,640 --> 00:29:33,170

everything that they've got so far and

551
00:29:41,900 --> 00:29:37,650
in that the blast test here's what we

552
00:29:46,100 --> 00:29:41,910
saw if we set the parameters as lakhs as

553
00:29:48,950 --> 00:29:46,110
possible just let it run so that we

554
00:29:54,110 --> 00:29:48,960
could to see if it matched anything

555
00:29:57,200 --> 00:29:54,120
and we found that some of the code is

556
00:29:58,820 --> 00:29:57,210
similar but large amounts are not now

557
00:30:00,860 --> 00:29:58,830
why would it be similar well it lived

558
00:30:03,320 --> 00:30:00,870
here on earth so it had it ate the same

559
00:30:05,450 --> 00:30:03,330
things it was able to live here so it

560
00:30:06,769 --> 00:30:05,460
had to have something similar to us or

561
00:30:12,260 --> 00:30:06,779
it wouldn't have been able to survive at

562
00:30:14,269 --> 00:30:12,270
all so this is the actual test you can

563
00:30:18,799 --> 00:30:14,279

call NIH and you can get this study

564

00:30:26,860 --> 00:30:18,809

yourself and it found no significant

565

00:30:34,460 --> 00:30:30,590

what does that say it's a totally

566

00:30:39,169 --> 00:30:34,470

different species notice I'm not using

567

00:30:46,460 --> 00:30:39,179

the word alien I don't know it's just a

568

00:30:48,799 --> 00:30:46,470

different species so one of the really

569

00:30:53,389 --> 00:30:48,809

cool things that we noticed was the fox

570

00:30:58,279 --> 00:30:53,399

p2 the fox p2 gene is the gene that

571

00:31:01,639 --> 00:30:58,289

allows us to speak and hear there are no

572

00:31:09,549 --> 00:31:01,649

variations in the fox p2 in a human none

573

00:31:15,549 --> 00:31:09,559

you don't survive but what we found is

574

00:31:20,299 --> 00:31:15,559

the fox p2 has 56 different variations

575

00:31:23,029 --> 00:31:20,309

56 which makes it a totally different

576

00:31:29,980 --> 00:31:23,039

species and that's just 56 out of the

577

00:31:36,460 --> 00:31:32,920

now how can it be

578

00:31:39,040 --> 00:31:36,470

you've been like but yet not human it

579

00:31:41,470 --> 00:31:39,050

lived on the same planet it lived in the

580

00:31:43,780 --> 00:31:41,480

same things do we share DNA we've all

581

00:31:45,790 --> 00:31:43,790

heard that we share DNA with monkeys we

582

00:31:50,080 --> 00:31:45,800

share ninety percent with cats we have

583

00:31:52,990 --> 00:31:50,090

fruit flies we share with yeast so if

584

00:31:55,570 --> 00:31:53,000

you ask me if this is a hybrid well you

585

00:31:57,640 --> 00:31:55,580

could be but yeast could be also a

586

00:32:05,650 --> 00:31:57,650

hybrid so let's just leave it it it's

587

00:32:07,600 --> 00:32:05,660

different okay so it shared the same

588

00:32:09,430 --> 00:32:07,610

environment breathe the same air this is

589

00:32:13,450 --> 00:32:09,440

just telling us that that's why there

590

00:32:16,120 --> 00:32:13,460

are some commonalities there how do we

591

00:32:19,060 --> 00:32:16,130

know it's not a mutation well we can

592

00:32:22,990 --> 00:32:19,070

make anything in a lab but will it

593

00:32:25,620 --> 00:32:23,000

survive probably not this lived long

594

00:32:29,020 --> 00:32:25,630

enough for the teeth to wear and to grow

595

00:32:31,120 --> 00:32:29,030

but yet it's not that means it can't be

596

00:32:34,030 --> 00:32:31,130

just a human deformity I want to be real

597

00:32:35,860 --> 00:32:34,040

clear human deformities you can have one

598

00:32:39,190 --> 00:32:35,870

deformity and survive you can have two

599

00:32:41,980 --> 00:32:39,200

and survive you have three if you live

600

00:32:46,210 --> 00:32:41,990

22 years old you'll it's a miracle to

601
00:32:50,160 --> 00:32:46,220
have 24 and live long enough to eat and

602
00:32:58,720 --> 00:32:50,170
have your teeth warned that is a miracle

603
00:33:02,140 --> 00:32:58,730
okay we can make any combination in the

604
00:33:07,960 --> 00:33:02,150
lab does it is it going to live maybe

605
00:33:10,870 --> 00:33:07,970
not does this make it an alien well if

606
00:33:14,190 --> 00:33:10,880
you wanted to do some reconstruction

607
00:33:16,750 --> 00:33:14,200
stretches sketches or the clay stuff

608
00:33:19,500 --> 00:33:16,760
again remember that's up to human

609
00:33:21,940 --> 00:33:19,510
interpretation but it could look it

610
00:33:25,600 --> 00:33:21,950
could look very much like what people

611
00:33:27,580 --> 00:33:25,610
claim to have seen now when we did that

612
00:33:31,480 --> 00:33:27,590
we had the reconstruction on the clay

613
00:33:34,090 --> 00:33:31,490

they put the eyeball in we asked how did

614

00:33:37,960 --> 00:33:34,100

you get that I ball into that shallow I

615

00:33:40,960 --> 00:33:37,970

socket he literally said oh I just cut

616

00:33:43,660 --> 00:33:40,970

it in half so it would fit you don't

617

00:33:45,070 --> 00:33:43,670

they people don't have a perception that

618

00:33:48,850 --> 00:33:45,080

they can put through are you

619

00:33:53,290 --> 00:33:48,860

eyes to fit this they don't know how

620

00:33:56,590 --> 00:33:53,300

those eyes would look again the eye

621

00:33:58,510 --> 00:33:56,600

sockets are very flat scientifically

622

00:34:01,630 --> 00:33:58,520

speaking they have now found that

623

00:34:04,450 --> 00:34:01,640

astronauts I sockets flattened when

624

00:34:06,820 --> 00:34:04,460

they're in space if they're in space

625

00:34:09,040 --> 00:34:06,830

longer than two then six months they

626

00:34:11,920 --> 00:34:09,050

will notice that there I sockets their

627

00:34:14,410 --> 00:34:11,930

eyeballs flattened you've got gravity as

628

00:34:16,480 --> 00:34:14,420

a place you've got them looking into

629

00:34:18,760 --> 00:34:16,490

darkness it's going to affect it so that

630

00:34:20,440 --> 00:34:18,770

could have something to do with it but

631

00:34:23,560 --> 00:34:20,450

this was just recently found in the last

632

00:34:26,200 --> 00:34:23,570

five years their eye sockets will

633

00:34:29,440 --> 00:34:26,210

flatten so that's the only way we can

634

00:34:32,470 --> 00:34:29,450

think of why that happened in this

635

00:34:35,950 --> 00:34:32,480

specie in this instance is it had to

636

00:34:41,560 --> 00:34:35,960

have come from a zero gravity

637

00:34:43,750 --> 00:34:41,570

environment at one point bone marrow

638

00:34:45,910 --> 00:34:43,760

again we talked about that this could be

639

00:34:52,060 --> 00:34:45,920

bone marrow but why didn't it get eaten

640

00:34:53,680 --> 00:34:52,070

up like bacteria I don't know human bone

641

00:34:55,810 --> 00:34:53,690

marrow is completely consumed by

642

00:34:59,200 --> 00:34:55,820

bacteria how many of you have heard of

643

00:35:02,640 --> 00:34:59,210

us the main reason you probably haven't

644

00:35:05,620 --> 00:35:02,650

heard of us is you're not connected to d

645

00:35:08,080 --> 00:35:05,630

maybe not as intrigued as some we've

646

00:35:11,200 --> 00:35:08,090

been on national Geographics we've been

647

00:35:14,340 --> 00:35:11,210

on BBC Discovery Channel TLC CBS

648

00:35:17,920 --> 00:35:14,350

thoughts history channel animal planet

649

00:35:20,980 --> 00:35:17,930

we've been around but some people just

650

00:35:22,840 --> 00:35:20,990

blink and don't catch it I still have

651
00:35:24,640 --> 00:35:22,850
people coming up to me I saw you on TV

652
00:35:27,190 --> 00:35:24,650
last night well that was film ten years

653
00:35:30,970 --> 00:35:27,200
ago so it's getting rerun we're getting

654
00:35:34,300 --> 00:35:30,980
more and more recognition lloyd pye was

655
00:35:36,400 --> 00:35:34,310
my lead researcher last year at this

656
00:35:41,020 --> 00:35:36,410
conference was the very last time he

657
00:35:43,900 --> 00:35:41,030
spoke he died in December it's hit us

658
00:35:47,920 --> 00:35:43,910
all very very hard I still have our time

659
00:35:49,570 --> 00:35:47,930
thinking so if it weren't for him you

660
00:35:54,740 --> 00:35:49,580
wouldn't be hearing this I just want you

661
00:35:59,250 --> 00:35:54,750
to realize that how important he has

662
00:36:01,020 --> 00:35:59,260
so where do we go from here we have to

663
00:36:04,020 --> 00:36:01,030

finish what we started there's no other

664

00:36:07,350 --> 00:36:04,030

way we have to finish the testing it's

665

00:36:09,450 --> 00:36:07,360

currently going on we had a lab that is

666

00:36:11,250 --> 00:36:09,460

willing to tilt let us put their name

667

00:36:14,490 --> 00:36:11,260

out there but we have to come up with a

668

00:36:16,260 --> 00:36:14,500

down payment they've seen the work they

669

00:36:18,980 --> 00:36:16,270

have been doing the DNA on the down low

670

00:36:21,270 --> 00:36:18,990

they've been giving that to us for free

671

00:36:23,940 --> 00:36:21,280

testing used to be when we started was

672

00:36:27,060 --> 00:36:23,950

going to be 127 million now we've gotten

673

00:36:30,570 --> 00:36:27,070

it down to 250,000 for the next two

674

00:36:33,900 --> 00:36:30,580

years okay that's all we need anybody

675

00:36:36,630 --> 00:36:33,910

got that I got a paypal i'll be glad to

676

00:36:38,660 --> 00:36:36,640

take that right now okay now why do you

677

00:36:41,400 --> 00:36:38,670

care I think you should care because

678

00:36:42,920 --> 00:36:41,410

it's not just about proving that aliens

679

00:36:46,590 --> 00:36:42,930

are real it's not just about proving

680

00:36:49,080 --> 00:36:46,600

that we've been visited but there's so

681

00:36:52,410 --> 00:36:49,090

much more what can this do for us as

682

00:36:55,050 --> 00:36:52,420

mankind this is why I'm involved in it

683

00:36:58,650 --> 00:36:55,060

how can this help us the fibers

684

00:37:00,240 --> 00:36:58,660

osteoporosis birth defects and we ought

685

00:37:02,100 --> 00:37:00,250

o immune disorders if we can figure out

686

00:37:05,130 --> 00:37:02,110

why that bone marrow still there we can

687

00:37:07,200 --> 00:37:05,140

fix that hearing eyesight the eyes are

688

00:37:10,350 --> 00:37:07,210

different the ears are different speech

689

00:37:12,990 --> 00:37:10,360

disorders the list goes on and on and on

690

00:37:15,440 --> 00:37:13,000

this research is going to help the rest

691

00:37:20,670 --> 00:37:15,450

of humanity if we can just get it done

692

00:37:25,830 --> 00:37:20,680

how can you help donate your time donate

693

00:37:29,100 --> 00:37:25,840

money donate your knowledge tell

694

00:37:32,160 --> 00:37:29,110

everyone about this it's important that

695

00:37:34,020 --> 00:37:32,170

people start demanding answers you know

696

00:37:36,570 --> 00:37:34,030

we all want answers about whether laws

697

00:37:38,670 --> 00:37:36,580

will happen you know we want the

698

00:37:40,920 --> 00:37:38,680

government to come out and all this but

699

00:37:43,050 --> 00:37:40,930

we need to know more demanding answers i

700

00:37:48,030 --> 00:37:43,060

think for Humanity for the health care

701
00:37:50,280 --> 00:37:48,040
for our safety and our health so we're

702
00:37:53,640 --> 00:37:50,290
looking for investors we need somebody

703
00:37:56,310 --> 00:37:53,650
to commit to an investment of 250,000

704
00:37:58,680 --> 00:37:56,320
for the next two to three years once we

705
00:38:01,650 --> 00:37:58,690
get that into escrow then we can start

706
00:38:02,710 --> 00:38:01,660
the DNA testing if you know somebody who

707
00:38:04,599 --> 00:38:02,720
can do that

708
00:38:08,140 --> 00:38:04,609
we're willing to give you 25 thousand

709
00:38:10,330 --> 00:38:08,150
dollars off the top today the minute we

710
00:38:15,240 --> 00:38:10,340
get that contract signed it's yours you

711
00:38:20,230 --> 00:38:15,250
can contact us at contact calm at

712
00:38:22,810 --> 00:38:20,240
Starchild project com okay we do have

713
00:38:25,060 --> 00:38:22,820

some products for sale we have the

714

00:38:28,570 --> 00:38:25,070

resident replicas over there 250

715

00:38:31,900 --> 00:38:28,580

thousand two hundred fifty thousand two

716

00:38:34,720 --> 00:38:31,910

hundred fifty we have the 3d laser cubes

717

00:38:36,940 --> 00:38:34,730

for 50 and the limited edition t-shirts

718

00:38:42,190 --> 00:38:36,950

for fifteen dollars a t-shirt will buy

719

00:38:44,830 --> 00:38:42,200

us a base pair okay simple as that keep

720

00:38:48,070 --> 00:38:44,840

up with the project Facebook Twitter

721

00:38:50,650 --> 00:38:48,080

Starchild project com you can contact me

722

00:38:53,010 --> 00:38:50,660

through contact or you can contact me

723

00:39:01,329 --> 00:38:53,020

through Melanie at Starchild project com

724

00:39:07,789 --> 00:39:04,969

yes I do if you will just email us at

725

00:39:11,209 --> 00:39:07,799

context Starchild that we will get that

726

00:39:14,569 --> 00:39:11,219

out to you okay I don't have it on me

727

00:39:20,420 --> 00:39:14,579

right now where we just came up with

728

00:39:38,420 --> 00:39:20,430

this within the last two weeks anybody

729

00:39:40,339 --> 00:39:38,430

else I guess you do you're asking well I

730

00:39:42,410 --> 00:39:40,349

mean it could be anything you're in zero

731

00:39:44,180 --> 00:39:42,420

gravity I can imagine that it's going to

732

00:39:45,890 --> 00:39:44,190

flatten out the eyeball you're going to

733

00:39:48,170 --> 00:39:45,900

have to change how you perceive color

734

00:39:51,349 --> 00:39:48,180

and light because there is no color it's

735

00:39:53,029 --> 00:39:51,359

black or white you know unless you're in

736

00:39:54,529 --> 00:39:53,039

the space castle I would think they have

737

00:39:56,359 --> 00:39:54,539

colors but you know if you're looking

738

00:40:06,900 --> 00:39:56,369

out into space it's going to be black or

739

00:40:12,850 --> 00:40:11,020

if they have redness on us I don't I

740

00:40:14,650 --> 00:40:12,860

don't think it would cause a retina

741

00:40:16,570 --> 00:40:14,660

detachment because of the way our bodies

742

00:40:21,250 --> 00:40:16,580

are built that's going to have to do

743

00:40:24,060 --> 00:40:21,260

with pressure more than anything but for

744

00:40:28,930 --> 00:40:24,070

them I'm not even sure they have retinas

745

00:40:30,160 --> 00:40:28,940

so anybody else real quick okay i'll be

746

00:40:31,660 --> 00:40:30,170

over there if you have any questions if

747

00:40:33,310 --> 00:40:31,670

you want to come touch and feel we

748

00:40:35,350 --> 00:40:33,320

actually have the stereo lithograph

749

00:40:37,390 --> 00:40:35,360

which is the exact same weight size and

750

00:40:43,620 --> 00:40:37,400

everything and you're welcome to touch
