

Inception Radio Network

UFO Headline News Thursday May 25th,
2017

1
00:00:08,240 --> 00:00:05,630
hello it's Thursday May 25th 2017 you

2
00:00:11,209 --> 00:00:08,250
are listening to inception Radio Network

3
00:00:14,589 --> 00:00:11,219
voice of the fringe majority this is

4
00:00:17,630 --> 00:00:14,599
Carol call if you echo headline news and

5
00:00:20,599 --> 00:00:17,640
here's earth sky dot org with sky

6
00:00:24,470 --> 00:00:20,609
watching news they explain why we won't

7
00:00:28,490 --> 00:00:24,480
see the new super moon that new moon of

8
00:00:32,179 --> 00:00:28,500
May 25th 2017 is a super moon in fact

9
00:00:34,940 --> 00:00:32,189
its 2017 s closest and largest super

10
00:00:38,389 --> 00:00:34,950
moon this is the first time since 2009

11
00:00:41,080 --> 00:00:38,399
that a new moon not a full moon is the

12
00:00:43,790 --> 00:00:41,090
closest and largest moon of the year and

13
00:00:46,520 --> 00:00:43,800

paradoxically we can't see this very

14

00:00:50,060 --> 00:00:46,530

large moon although Earth's oceans will

15

00:00:52,790 --> 00:00:50,070

feel it so what's a super moon well

16

00:00:55,639 --> 00:00:52,800

here's the timing on the super moon

17

00:00:58,580 --> 00:00:55,649

we're having now the new moon moan

18

00:01:03,770 --> 00:00:58,590

almost nearly between Earth and Sun well

19

00:01:06,830 --> 00:01:03,780

that's today May 25th 2017 at 1944 UTC

20

00:01:08,899 --> 00:01:06,840

to be precise then the lunar perigee

21

00:01:13,310 --> 00:01:08,909

that's when the moon is closest to Earth

22

00:01:17,570 --> 00:01:13,320

is May 26th tomorrow by the clock at 123

23

00:01:20,450 --> 00:01:17,580

UTC see new moon and lunar perigee are

24

00:01:23,120 --> 00:01:20,460

separated by only about six hours says

25

00:01:25,280 --> 00:01:23,130

Bruce McClure who writes this in recent

26
00:01:29,030 --> 00:01:25,290
years this coincidence in time has given

27
00:01:31,910 --> 00:01:29,040
rise to the word super moon and it's one

28
00:01:33,770 --> 00:01:31,920
word when it's a full super moon the

29
00:01:35,960 --> 00:01:33,780
moon really is slightly larger than

30
00:01:39,020 --> 00:01:35,970
usual in our sky and it's definitely

31
00:01:42,889 --> 00:01:39,030
brighter so full super moons are much

32
00:01:44,569 --> 00:01:42,899
watched events but the new super moon we

33
00:01:46,969 --> 00:01:44,579
won't see it because the light at half

34
00:01:49,730 --> 00:01:46,979
of today's new moon faces entirely away

35
00:01:52,370 --> 00:01:49,740
from us and because like all new moons

36
00:01:55,039 --> 00:01:52,380
this one crosses the sky with the Sun

37
00:01:56,810 --> 00:01:55,049
during the day a new moon is too close

38
00:01:59,660 --> 00:01:56,820

to the sun's glare to be visible with

39

00:02:03,289 --> 00:01:59,670

the eye and yet although we won't see it

40

00:02:04,940 --> 00:02:03,299

the May 25th 2017 new moon will be the

41

00:02:08,119 --> 00:02:04,950

largest moon of the year

42

00:02:10,460 --> 00:02:08,129

does that sound paradoxical it is but

43

00:02:12,710 --> 00:02:10,470

it's also true here's one way to think

44

00:02:13,730 --> 00:02:12,720

about it if there were a total eclipse

45

00:02:16,520 --> 00:02:13,740

of the Sun on

46

00:02:19,130 --> 00:02:16,530

may 25th which there isn't by the way an

47

00:02:21,440 --> 00:02:19,140

event where the body of the moon passes

48

00:02:24,890 --> 00:02:21,450

in front of the Sun that would be a

49

00:02:26,600 --> 00:02:24,900

particularly long eclipse that's because

50

00:02:29,420 --> 00:02:26,610

the moon will be so close to us on that

51
00:02:33,020 --> 00:02:29,430
day and hence although we won't see it

52
00:02:35,450 --> 00:02:33,030
so large in our sky this year we're

53
00:02:37,760 --> 00:02:35,460
going to have 13 lunar perigee

54
00:02:41,030 --> 00:02:37,770
sometimes the year's closest perigee is

55
00:02:43,160 --> 00:02:41,040
called a proxy G in any given year

56
00:02:45,230 --> 00:02:43,170
it's either the new moon or the full

57
00:02:48,800 --> 00:02:45,240
moon that aligns with that closest

58
00:02:51,890 --> 00:02:48,810
perigee called proxy G so watch out for

59
00:02:54,500 --> 00:02:51,900
any proxy Gian knew or full moon because

60
00:02:57,710 --> 00:02:54,510
that's when the large perigee and spring

61
00:03:00,200 --> 00:02:57,720
tides or if you prefer proxy G and

62
00:03:04,220 --> 00:03:00,210
spring tides are most likely to occur

63
00:03:06,140 --> 00:03:04,230

and for the first time since 2009 the

64

00:03:10,970 --> 00:03:06,150

Centers of the earth and moon will not

65

00:03:12,860 --> 00:03:10,980

come any closer than 220 1830 miles

66

00:03:15,640 --> 00:03:12,870

that's three hundred fifty-seven

67

00:03:18,830 --> 00:03:15,650

thousand kilometers in the year 2017

68

00:03:20,720 --> 00:03:18,840

although it's the proxy Gino moon that

69

00:03:23,600 --> 00:03:20,730

brings the moon closest to Earth for the

70

00:03:27,020 --> 00:03:23,610

year on May 25th it's actually the

71

00:03:30,020 --> 00:03:27,030

absence of a proxy G full moon this year

72

00:03:32,780 --> 00:03:30,030

that enables the proxy G new moon to lay

73

00:03:36,860 --> 00:03:32,790

claim to that closest super moon crown

74

00:03:39,200 --> 00:03:36,870

in 2017 the full moon loses out to the

75

00:03:42,650 --> 00:03:39,210

new moon this year because proxy G full

76
00:03:45,770 --> 00:03:42,660
moons recur in periods of fourteen lunar

77
00:03:48,560 --> 00:03:45,780
or sonata k-- months that's 14 returns

78
00:03:51,320 --> 00:03:48,570
to full moon status this fourteen month

79
00:03:54,080 --> 00:03:51,330
lunar cycle is appreciably longer than a

80
00:03:56,710 --> 00:03:54,090
calendar year obviously it represents a

81
00:03:59,630 --> 00:03:56,720
duration of about one year and 48 days

82
00:04:02,510 --> 00:03:59,640
since the last proxy G full moon came

83
00:04:05,210 --> 00:04:02,520
late in the year in 2016 the following

84
00:04:09,860 --> 00:04:05,220
proxy G full moon won't come till after

85
00:04:12,080 --> 00:04:09,870
2017 is past early 2018 looks likely the

86
00:04:15,020 --> 00:04:12,090
most recent proxy G full moon took place

87
00:04:18,860 --> 00:04:15,030
November 14 2016 and the next one is

88
00:04:20,930 --> 00:04:18,870

coming up January 2nd 2018 for those of

89

00:04:23,090 --> 00:04:20,940

you more technically inclined there are

90

00:04:25,070 --> 00:04:23,100

wonderful breakdowns charts and graphs

91

00:04:27,110 --> 00:04:25,080

that accompany this article from Earth

92

00:04:29,659 --> 00:04:27,120

Sky org head on over

93

00:04:32,960 --> 00:04:29,669

- UFO headline news dot-com later and

94

00:04:36,770 --> 00:04:32,970

check it out but here's the bottom line

95

00:04:39,290 --> 00:04:36,780

for the first time since 2009 the new

96

00:04:41,840 --> 00:04:39,300

moon instead of the full moon will

97

00:04:44,540 --> 00:04:41,850

coincide with the years closest perigee

98

00:04:47,540 --> 00:04:44,550

proxy G and also for the first time

99

00:04:51,170 --> 00:04:47,550

since 2009 the years closest perigee

100

00:04:53,510 --> 00:04:51,180

proxy G will not come closer than three

101
00:04:56,000 --> 00:04:53,520
hundred fifty seven thousand kilometers

102
00:04:58,969 --> 00:04:56,010
or two hundred and twenty one thousand

103
00:05:01,129 --> 00:04:58,979
eight hundred and thirty miles are you

104
00:05:03,650 --> 00:05:01,139
hungry for some more information about

105
00:05:04,490 --> 00:05:03,660
Tab E star well we can serve that up

106
00:05:07,760 --> 00:05:04,500
right now

107
00:05:11,719 --> 00:05:07,770
headline is stars mysterious flickering

108
00:05:13,670 --> 00:05:11,729
sign of an alien mega-structure only

109
00:05:16,939 --> 00:05:13,680
krishnan for International Business

110
00:05:19,189 --> 00:05:16,949
Times is the author here are their

111
00:05:21,680 --> 00:05:19,199
civilizations in the universe's far away

112
00:05:24,640 --> 00:05:21,690
corners that have built mega structures

113
00:05:26,990 --> 00:05:24,650

around their stars to harness energy

114

00:05:30,110 --> 00:05:27,000

interest in that so-called alien

115

00:05:32,839 --> 00:05:30,120

mega-structure is rising again thanks to

116

00:05:37,100 --> 00:05:32,849

some highly unusual behavior by Boyajian

117

00:05:39,350 --> 00:05:37,110

star about 1300 light-years away named

118

00:05:44,210 --> 00:05:39,360

after United States astronomer Tabitha s

119

00:05:47,390 --> 00:05:44,220

Boyajian the star kic 8 4 6 - 8 5 - is

120

00:05:50,300 --> 00:05:47,400

in the Cygnus constellation and it just

121

00:05:53,029 --> 00:05:50,310

did it again it just dimmed about 22%

122

00:05:55,490 --> 00:05:53,039

more than 1/5 and that since Friday

123

00:05:58,159 --> 00:05:55,500

morning that's a massive change in

124

00:06:01,370 --> 00:05:58,169

brightness for a star the phenomenon is

125

00:06:03,290 --> 00:06:01,380

not seen in any of the other 150,000

126
00:06:05,750 --> 00:06:03,300
stars that Kepler space telescope has

127
00:06:07,790 --> 00:06:05,760
observed and it's not the first time

128
00:06:10,879 --> 00:06:07,800
tapi star so-called

129
00:06:13,279 --> 00:06:10,889
in honor of Tabitha s Boyajian has lost

130
00:06:16,730 --> 00:06:13,289
its brightness and then regained it the

131
00:06:19,129 --> 00:06:16,740
flux lasting between 5 and 80 days this

132
00:06:21,260 --> 00:06:19,139
dimming has baffled scientists even more

133
00:06:23,050 --> 00:06:21,270
because it hasn't happened at anything

134
00:06:25,250 --> 00:06:23,060
like a regular interval

135
00:06:28,580 --> 00:06:25,260
Kepler's been tracking the brightness of

136
00:06:30,680 --> 00:06:28,590
stars since 2009 looking for minor dips

137
00:06:33,920 --> 00:06:30,690
in their light which could be a telltale

138
00:06:35,570 --> 00:06:33,930

sign of an orbiting exoplanet data from

139

00:06:38,690 --> 00:06:35,580

Kepler was made available to the public

140

00:06:40,550 --> 00:06:38,700

in order to allow citizen scientists to

141

00:06:42,560 --> 00:06:40,560

join the hunt for such planets

142

00:06:45,550 --> 00:06:42,570

a group of volunteers noticed that

143

00:06:47,930 --> 00:06:45,560

strange flickering again in 2011 now

144

00:06:49,810 --> 00:06:47,940

scientists have come up with a raft of

145

00:06:54,490 --> 00:06:49,820

explanations for the strange behavior

146

00:06:56,300 --> 00:06:54,500

exhibited by KIC 8 4 6 - 8 5 -

147

00:06:58,580 --> 00:06:56,310

speculating about everything from

148

00:07:00,980 --> 00:06:58,590

passing comets shielding the view from

149

00:07:03,140 --> 00:07:00,990

Earth of the star to fragments of a

150

00:07:05,750 --> 00:07:03,150

planet that's broken up obstructing that

151
00:07:08,570 --> 00:07:05,760
view and since tabby star is not a young

152
00:07:10,700 --> 00:07:08,580
star going by cosmic timescales they

153
00:07:12,920 --> 00:07:10,710
ruled out clouds or discs of dust

154
00:07:16,219 --> 00:07:12,930
hanging around it or even nearby

155
00:07:19,580 --> 00:07:16,229
asteroids but the explanation that has

156
00:07:21,710 --> 00:07:19,590
everyone fascinated is this an orbiting

157
00:07:25,190 --> 00:07:21,720
alien mega-structure is causing that

158
00:07:29,060 --> 00:07:25,200
strange flickering observed in kic 8 4 6

159
00:07:32,210 --> 00:07:29,070
- 8 5 - by periodically blocking out

160
00:07:34,700 --> 00:07:32,220
visible light from the star why would an

161
00:07:37,400 --> 00:07:34,710
alien civilization need such a mega

162
00:07:39,440 --> 00:07:37,410
structure well the concept of such

163
00:07:43,310 --> 00:07:39,450

structures was popularized by Freeman

164

00:07:45,650 --> 00:07:43,320

Dyson a physicist back in 1960 he argued

165

00:07:47,719 --> 00:07:45,660

that advanced civilizations with the

166

00:07:50,000 --> 00:07:47,729

ability to build such mega structures

167

00:07:52,760 --> 00:07:50,010

around stars would need them to fill

168

00:07:55,700 --> 00:07:52,770

their energy needs and consequently to

169

00:07:58,340 --> 00:07:55,710

enable their long-term survival in other

170

00:08:00,770 --> 00:07:58,350

words depending on resources from a home

171

00:08:02,510 --> 00:08:00,780

planet alone to address the escalating

172

00:08:04,370 --> 00:08:02,520

energy needs of a technological

173

00:08:06,800 --> 00:08:04,380

civilization isn't a very viable

174

00:08:09,230 --> 00:08:06,810

approach it would be logical for

175

00:08:12,080 --> 00:08:09,240

advanced civilizations to start directly

176

00:08:15,320 --> 00:08:12,090

tapping into the energy emitted by their

177

00:08:17,750 --> 00:08:15,330

stars physicist Freeman Dyson reasoned

178

00:08:20,629 --> 00:08:17,760

that humankind will arrive at a point

179

00:08:24,170 --> 00:08:20,639

where it will demand the total energy

180

00:08:26,120 --> 00:08:24,180

output of the Sun considering how our

181

00:08:27,830 --> 00:08:26,130

civilization is struggling to address

182

00:08:30,770 --> 00:08:27,840

our energy needs without aggravating

183

00:08:33,440 --> 00:08:30,780

climate change Freeman Dyson argument

184

00:08:36,050 --> 00:08:33,450

has merit such megastructures are known

185

00:08:38,390 --> 00:08:36,060

as Dyson spheres and they've been

186

00:08:40,990 --> 00:08:38,400

postulated to have apart from energy

187

00:08:44,060 --> 00:08:41,000

harnessing elements habitation and

188

00:08:47,000 --> 00:08:44,070

industrial elements a russian physicist

189

00:08:50,030 --> 00:08:47,010

Nikolai Kardashev offered that depending

190

00:08:51,829 --> 00:08:50,040

on how advanced a civilization was they

191

00:08:54,079 --> 00:08:51,839

would build such mega structures around

192

00:08:57,230 --> 00:08:54,089

their planet solar system and

193

00:08:59,960 --> 00:08:57,240

galaxies outside of science fiction and

194

00:09:02,150 --> 00:08:59,970

the high voltage intellectual jostling

195

00:09:04,579 --> 00:09:02,160

among scientists such megastructures

196

00:09:07,579 --> 00:09:04,589

have also been talked about in Atlantean

197

00:09:10,220 --> 00:09:07,589

lore enthusiasts of Atlantean culture

198

00:09:12,170 --> 00:09:10,230

which by unproven accounts was a highly

199

00:09:13,939 --> 00:09:12,180

evolved civilization inhabiting the

200

00:09:16,699 --> 00:09:13,949

earth before our current one took its

201
00:09:19,249 --> 00:09:16,709
fledgling steps have speculated that the

202
00:09:21,400 --> 00:09:19,259
civilization used orbiting space

203
00:09:24,980 --> 00:09:21,410
structures to harness and transmit

204
00:09:27,410 --> 00:09:24,990
energy and one of the theories is that

205
00:09:30,139 --> 00:09:27,420
the cataclysmic earth changes that wiped

206
00:09:34,009 --> 00:09:30,149
out Atlantis occurred due to the failure

207
00:09:36,499 --> 00:09:34,019
of an orbital mega structure humankind

208
00:09:38,299 --> 00:09:36,509
is still very far from the point when it

209
00:09:41,269 --> 00:09:38,309
would need the total energy output of

210
00:09:43,850 --> 00:09:41,279
the Sun and Dyson spheres are still

211
00:09:46,610 --> 00:09:43,860
beyond our engineering capabilities but

212
00:09:48,410 --> 00:09:46,620
we can look at ourselves as having taken

213
00:09:50,540 --> 00:09:48,420

some baby steps in that direction

214

00:09:52,850 --> 00:09:50,550

already without even consciously

215

00:09:54,949 --> 00:09:52,860

thinking on those lines the

216

00:09:57,199 --> 00:09:54,959

International Space Station and solar

217

00:09:59,569 --> 00:09:57,209

sails can be thought of as elements

218

00:10:02,239 --> 00:09:59,579

however rudimentary of a Dyson swarm

219

00:10:05,239 --> 00:10:02,249

that would be a dense collection of such

220

00:10:07,639 --> 00:10:05,249

structures orbiting a star coming back

221

00:10:10,040 --> 00:10:07,649

to tabby star scientists want to rule

222

00:10:11,929 --> 00:10:10,050

out all natural reasons that could cause

223

00:10:15,139 --> 00:10:11,939

it to flicker before looking for a

224

00:10:18,079 --> 00:10:15,149

miracle cause from photographs made as

225

00:10:20,540 --> 00:10:18,089

early as 1890 astronomers have found

226

00:10:23,329 --> 00:10:20,550

that tabby star is flickering on short

227

00:10:25,249 --> 00:10:23,339

timescales even as it's been dimming

228

00:10:28,009 --> 00:10:25,259

over the course of more than a century

229

00:10:30,619 --> 00:10:28,019

the same phenomenon could be causing

230

00:10:32,809 --> 00:10:30,629

both the possible and a more prosaic

231

00:10:34,509 --> 00:10:32,819

explanation was offered earlier this

232

00:10:36,559 --> 00:10:34,519

year by researchers from Columbia

233

00:10:38,869 --> 00:10:36,569

University and the University of

234

00:10:41,960 --> 00:10:38,879

California Berkeley here's what they

235

00:10:44,540 --> 00:10:41,970

said the star might have eaten up a

236

00:10:46,340 --> 00:10:44,550

planet causing a big outburst of

237

00:10:48,499 --> 00:10:46,350

brightness from which it is now

238

00:10:51,739 --> 00:10:48,509

recovering and the planetary debris

239

00:10:54,249 --> 00:10:51,749

could still be orbiting the star causing

240

00:10:56,809 --> 00:10:54,259

that periodic dimming and brightening

241

00:10:59,869 --> 00:10:56,819

compared to the wilder theories out

242

00:11:03,259 --> 00:10:59,879

there this drab explanation might be

243

00:11:05,569 --> 00:11:03,269

closer to the truth and as we all know

244

00:11:07,730 --> 00:11:05,579

gentle listeners the truth is out there

245

00:11:09,770 --> 00:11:07,740

and right here we

246

00:11:12,230 --> 00:11:09,780

try to bring you the truth at UFO

247

00:11:15,530 --> 00:11:12,240

headline news in section radio network

248

00:11:18,110 --> 00:11:15,540

as the advert says morning noon and

249

00:11:20,450 --> 00:11:18,120

night and depending where you are on

250

00:11:21,110 --> 00:11:20,460

planet earth it's probably one of those

251
00:11:23,450 --> 00:11:21,120
times

252
00:11:25,670 --> 00:11:23,460
unless you're listening in archives well

253
00:11:28,310 --> 00:11:25,680
that's another story for another time

254
00:11:31,010 --> 00:11:28,320
here's a story speaking of truth

255
00:11:34,010 --> 00:11:31,020
Lulu Morris gets the byline here for

256
00:11:36,830 --> 00:11:34,020
National Geographic comm headline

257
00:11:40,520 --> 00:11:36,840
British government will release secret

258
00:11:44,960 --> 00:11:40,530
UFO FILES 18 secret documents will be

259
00:11:48,140 --> 00:11:44,970
available to the public by mid June 50

260
00:11:50,390 --> 00:11:48,150
years of collected UFO data and activity

261
00:11:52,880 --> 00:11:50,400
held by the British Ministry of Defense

262
00:11:55,850 --> 00:11:52,890
is being published after the June

263
00:11:58,430 --> 00:11:55,860

election next month the secret dossier

264

00:12:01,250 --> 00:11:58,440

will reveal 18 documents which were held

265

00:12:04,240 --> 00:12:01,260

back after the information needed to be

266

00:12:06,590 --> 00:12:04,250

re-examined by the Ministry of Defence

267

00:12:09,710 --> 00:12:06,600

withholding this classified information

268

00:12:13,280 --> 00:12:09,720

has reignited claims of a government

269

00:12:15,080 --> 00:12:13,290

cover-up of possible alien sightings the

270

00:12:16,880 --> 00:12:15,090

delay in releasing this information was

271

00:12:19,040 --> 00:12:16,890

due to the United Kingdom elections at

272

00:12:22,340 --> 00:12:19,050

the time forcing the information to be

273

00:12:24,320 --> 00:12:22,350

put off years at a time a letter sent

274

00:12:28,130 --> 00:12:24,330

from a spokesperson for the National

275

00:12:30,290 --> 00:12:28,140

Archive States quote due to the upcoming

276

00:12:32,060 --> 00:12:30,300

election here in the United Kingdom and

277

00:12:34,340 --> 00:12:32,070

the rules relating to government

278

00:12:36,920 --> 00:12:34,350

departments during the pre-election

279

00:12:39,560 --> 00:12:36,930

period these files will not be released

280

00:12:41,540 --> 00:12:39,570

until after the election we are working

281

00:12:44,360 --> 00:12:41,550

to ensure that the files are ready for

282

00:12:46,790 --> 00:12:44,370

release as soon after this period as is

283

00:12:50,360 --> 00:12:46,800

possible hopefully around the middle of

284

00:12:52,580 --> 00:12:50,370

June and quotes paranormal fanatics and

285

00:12:54,590 --> 00:12:52,590

conspiracy theorists are hoping to find

286

00:12:57,020 --> 00:12:54,600

proof of alien intervention and

287

00:12:58,880 --> 00:12:57,030

government conspiracy whether the

288

00:13:01,790 --> 00:12:58,890

documents will reveal this information

289

00:13:04,490 --> 00:13:01,800

is yet to be seen conspiracy and

290

00:13:06,980 --> 00:13:04,500

paranormal aside the documents which

291

00:13:09,980 --> 00:13:06,990

date back to the 1970s will offer some

292

00:13:12,620 --> 00:13:09,990

interesting information says Nick Pope

293

00:13:14,480 --> 00:13:12,630

quote there is no smoking gun in these

294

00:13:16,430 --> 00:13:14,490

files that will confirm the existence of

295

00:13:19,220 --> 00:13:16,440

aliens but there are plenty of

296

00:13:21,350 --> 00:13:19,230

fascinating UFO reports and Ministry of

297

00:13:24,079 --> 00:13:21,360

Defense policy documents

298

00:13:25,999 --> 00:13:24,089

so these really are the real-life

299

00:13:28,280 --> 00:13:26,009

x-files end quotes

300

00:13:30,979 --> 00:13:28,290

Nick Pope is the former Ministry of

301
00:13:33,699 --> 00:13:30,989
Defense investigator into UFO sightings

302
00:13:36,530 --> 00:13:33,709
that's his comment about the dossier

303
00:13:38,720 --> 00:13:36,540
he also said quote the delay has been a

304
00:13:41,150 --> 00:13:38,730
comedy of errors though I think it's

305
00:13:43,879 --> 00:13:41,160
more bureaucracy than conspiracy and

306
00:13:45,619 --> 00:13:43,889
quotes the information coming out

307
00:13:48,470 --> 00:13:45,629
mid-june should give a more accurate

308
00:13:50,419 --> 00:13:48,480
picture of lots of incidents and UFO

309
00:13:53,749 --> 00:13:50,429
sightings in the United Kingdom in

310
00:13:56,329 --> 00:13:53,759
general and we will keep our eyes in

311
00:13:58,309 --> 00:13:56,339
that area and keep you posted here's an

312
00:14:01,489 --> 00:13:58,319
update on some sightings we recently

313
00:14:05,059 --> 00:14:01,499

covered out over Lake Ontario this is

314

00:14:07,869 --> 00:14:05,069

from wgr Zee News it's written by James

315

00:14:10,400 --> 00:14:07,879

Goodman for the Democrat and chronicle

316

00:14:12,710 --> 00:14:10,410

were those lights that appeared over

317

00:14:16,299 --> 00:14:12,720

Lake Ontario Tuesday night a close

318

00:14:18,979 --> 00:14:16,309

encounter now the answer is more mundane

319

00:14:22,100 --> 00:14:18,989

what caused the sky to light up over

320

00:14:25,039 --> 00:14:22,110

Lake Ontario was Flair training it seems

321

00:14:27,679 --> 00:14:25,049

that the 424 transport and rescue

322

00:14:30,549 --> 00:14:27,689

squadron of the Royal Canadian Air Force

323

00:14:33,139 --> 00:14:30,559

based in Trenton 60 miles north of

324

00:14:36,559 --> 00:14:33,149

Rochester New York was out doing

325

00:14:38,600 --> 00:14:36,569

exercises quote it's routine for us and

326
00:14:40,999 --> 00:14:38,610
quote said Julie brunette spokeswoman

327
00:14:42,470 --> 00:14:41,009
for the squadron looking at photos

328
00:14:45,379 --> 00:14:42,480
posted at the Democrat and chronicle

329
00:14:48,139 --> 00:14:45,389
website Julie brunette had no doubts

330
00:14:51,199 --> 00:14:48,149
that the flares caused the illuminated

331
00:14:52,970 --> 00:14:51,209
sky Tuesday night's exercise was the 3rd

332
00:14:55,069 --> 00:14:52,980
of this month the next is slated for

333
00:14:57,559 --> 00:14:55,079
Monday or Tuesday depending on the

334
00:14:59,960 --> 00:14:57,569
weather these exercises will continue

335
00:15:01,999 --> 00:14:59,970
through June Julie brunette had no

336
00:15:05,239 --> 00:15:02,009
explanation for why previous flare

337
00:15:07,729 --> 00:15:05,249
exercises went unnoticed here she said

338
00:15:10,999 --> 00:15:07,739

quote that's a good question I won't be

339

00:15:13,429 --> 00:15:11,009

able to answer that end quote hmm as

340

00:15:16,069 --> 00:15:13,439

this broadcaster recalls it was flares

341

00:15:18,859 --> 00:15:16,079

in the Phoenix lights incident yep

342

00:15:22,129 --> 00:15:18,869

flares move along folks nothing to see

343

00:15:25,189 --> 00:15:22,139

here let's move along to Germany to

344

00:15:27,289 --> 00:15:25,199

students II Baden württemberg this is

345

00:15:30,679 --> 00:15:27,299

MUFON case number eight three nine five

346

00:15:33,230 --> 00:15:30,689

two it occurred on the 11th of May but

347

00:15:35,630 --> 00:15:33,240

it didn't get reported till the 24th of

348

00:15:39,500 --> 00:15:35,640

May this year summary

349

00:15:42,200 --> 00:15:39,510

an unknown object that hovered citing

350

00:15:45,710 --> 00:15:42,210

specifics here offer a very close

351

00:15:49,550 --> 00:15:45,720

initial viewing distance 21 to 100 feet

352

00:15:53,330 --> 00:15:49,560

eventually extending to 101 to 500 feet

353

00:15:55,220 --> 00:15:53,340

the altitude was 500 feet or less the

354

00:15:57,410 --> 00:15:55,230

sighting duration was 5 minutes

355

00:16:00,320 --> 00:15:57,420

but the object features are simply

356

00:16:02,750 --> 00:16:00,330

reported as unknown the flight path was

357

00:16:05,000 --> 00:16:02,760

stationary and this particular object

358

00:16:07,040 --> 00:16:05,010

was shaped like a cigar

359

00:16:09,050 --> 00:16:07,050

there isn't anything regarding the

360

00:16:10,010 --> 00:16:09,060

meteorology over studentsí

361

00:16:12,470 --> 00:16:10,020

baden-wuerttemberg

362

00:16:15,710 --> 00:16:12,480

but it says there was no abnormal

363

00:16:18,740 --> 00:16:15,720

weather prevalent here's the report very

364

00:16:21,650 --> 00:16:18,750

short we were on our way to a sport

365

00:16:24,260 --> 00:16:21,660

event we live in stuttgart we drove by

366

00:16:26,960 --> 00:16:24,270

car on the way from Frederick Stoll to

367

00:16:30,580 --> 00:16:26,970

Blanc and luck we saw an object which

368

00:16:33,950 --> 00:16:30,590

did not move it just hovered in the air

369

00:16:36,740 --> 00:16:33,960

this object was quite black it was

370

00:16:39,340 --> 00:16:36,750

approximately as large as a plane but it

371

00:16:42,410 --> 00:16:39,350

was shaped like a cigar or a cigarette I

372

00:16:45,250 --> 00:16:42,420

thought it could be a tower but as we

373

00:16:47,600 --> 00:16:45,260

came closer we saw this was not the case

374

00:16:51,770 --> 00:16:47,610

we could see this object for five

375

00:16:55,670 --> 00:16:51,780

minutes until we were too far away hmm

376

00:16:58,040 --> 00:16:55,680

not a tower nope buckle up for this

377

00:17:00,650 --> 00:16:58,050

sighting it's not only very old but it's

378

00:17:04,040 --> 00:17:00,660

got well an incident of shall we say

379

00:17:06,350 --> 00:17:04,050

slightly questionable parenting well

380

00:17:09,410 --> 00:17:06,360

you'll see this is MUFON case number

381

00:17:12,110 --> 00:17:09,420

eight three nine four nine the sighting

382

00:17:17,090 --> 00:17:12,120

location is Kennewick Washington the

383

00:17:20,120 --> 00:17:17,100

date 1956 May 31st it wasn't reported

384

00:17:23,750 --> 00:17:20,130

till the 24th of May this year

385

00:17:26,449 --> 00:17:23,760

in summary hovering approximately 50

386

00:17:29,900 --> 00:17:26,459

feet above the highest point it was a

387

00:17:32,330 --> 00:17:29,910

sport model the sighting specifics here

388

00:17:35,470 --> 00:17:32,340

are a viewing distance of 501 feet to

389

00:17:38,360 --> 00:17:35,480

one mile the altitude 500 feet or less

390

00:17:42,050 --> 00:17:38,370

this sighting duration was 20 minutes

391

00:17:44,480 --> 00:17:42,060

long the object features dome object

392

00:17:47,540 --> 00:17:44,490

flight path does not apply and this

393

00:17:49,629 --> 00:17:47,550

object was shaped like a disc here's

394

00:17:53,210 --> 00:17:49,639

what was going on weather-wise in

395

00:17:55,970 --> 00:17:53,220

19:56 May 31st maximum temperature

396

00:17:59,210 --> 00:17:55,980

ninety degrees Fahrenheit 32 degrees

397

00:18:02,450 --> 00:17:59,220

Celsius dropping down to a minimum of 61

398

00:18:04,789 --> 00:18:02,460

degrees Fahrenheit 16 degrees Celsius no

399

00:18:06,889 --> 00:18:04,799

visibility factors are mentioned it does

400

00:18:10,129 --> 00:18:06,899

state that the conditions were nothing

401
00:18:13,940 --> 00:18:10,139
abnormal weather-wise so sit back take a

402
00:18:16,700 --> 00:18:13,950
breath and enjoy in 1956

403
00:18:19,039 --> 00:18:16,710
while living in Kennewick Washington the

404
00:18:21,769 --> 00:18:19,049
population noticed an object over the

405
00:18:24,799 --> 00:18:21,779
highest point between McNary Dam on the

406
00:18:27,320 --> 00:18:24,809
Columbia River and the Hanford Nuclear

407
00:18:31,549 --> 00:18:27,330
Reservation my father worked there for

408
00:18:33,320 --> 00:18:31,559
23 years the media reported an object as

409
00:18:36,440 --> 00:18:33,330
a weather balloon

410
00:18:38,509 --> 00:18:36,450
my dad had other ideas having observed

411
00:18:41,869 --> 00:18:38,519
Foo Fighters while he served in the Navy

412
00:18:44,360 --> 00:18:41,879
so he took me along I was three years

413
00:18:45,970 --> 00:18:44,370

old we went to a wheat field

414

00:18:48,289 --> 00:18:45,980

approximately a mile away

415

00:18:50,509 --> 00:18:48,299

he observed this object through

416

00:18:54,200 --> 00:18:50,519

binoculars and then handed the

417

00:18:58,279 --> 00:18:54,210

binoculars to me my dad told me I was

418

00:19:00,860 --> 00:18:58,289

looking at a Foo Fighter what I saw was

419

00:19:03,289 --> 00:19:00,870

a disc shaped object above the top of

420

00:19:05,749 --> 00:19:03,299

that geological point I was so excited

421

00:19:08,139 --> 00:19:05,759

that when we returned home he gave me

422

00:19:10,909 --> 00:19:08,149

half a shot of bourbon to calm me down

423

00:19:13,100 --> 00:19:10,919

well that's the questionable parenting

424

00:19:15,680 --> 00:19:13,110

point ok the second and third

425

00:19:19,279 --> 00:19:15,690

observation says our witness were to

426

00:19:20,480 --> 00:19:19,289

follow second sighting aged 11 while

427

00:19:23,299 --> 00:19:20,490

smoking a cigarette

428

00:19:26,539 --> 00:19:23,309

I observed five objects in a diamond

429

00:19:29,299 --> 00:19:26,549

pattern leaving the nuclear reservation

430

00:19:32,060 --> 00:19:29,309

they headed east and north and slowly

431

00:19:34,430 --> 00:19:32,070

moved upward coming together as a single

432

00:19:37,070 --> 00:19:34,440

object and they headed towards the North

433

00:19:39,110 --> 00:19:37,080

Star it would seem that our witness

434

00:19:41,269 --> 00:19:39,120

gentle listeners has had a rather rough

435

00:19:43,879 --> 00:19:41,279

life here's his 3rd sighting

436

00:19:47,259 --> 00:19:43,889

approximately 9:00 p.m. while sitting in

437

00:19:50,529 --> 00:19:47,269

a cell at high desert prison November 18

438

00:19:53,560 --> 00:19:50,539

1995 I observed a single object

439

00:19:56,330 --> 00:19:53,570

extremely bright yet it casts no shadow

440

00:19:59,419 --> 00:19:56,340

it was moving across the prison yard at

441

00:20:00,859 --> 00:19:59,429

an altitude of 200 feet this thing

442

00:20:03,260 --> 00:20:00,869

disappeared over the hill that lay

443

00:20:04,970 --> 00:20:03,270

before me approximately a month

444

00:20:07,420 --> 00:20:04,980

later there were cattle mutilations

445

00:20:10,370 --> 00:20:07,430

reported to have occurred at that date

446

00:20:13,100 --> 00:20:10,380

now hang on the story takes one more

447

00:20:15,260 --> 00:20:13,110

twist our witness writes another

448

00:20:19,010 --> 00:20:15,270

interesting fact that relates to all of

449

00:20:22,490 --> 00:20:19,020

this when I was about 12 or 13 my uncle

450

00:20:24,620 --> 00:20:22,500

had acquired a film this film came from

451
00:20:26,900 --> 00:20:24,630
a man my father knew who worked for

452
00:20:29,900 --> 00:20:26,910
Burlington Northern Railroad

453
00:20:32,840 --> 00:20:29,910
my uncle was very adamant that my father

454
00:20:35,900 --> 00:20:32,850
view this film the contents of that film

455
00:20:37,460 --> 00:20:35,910
are as follows I had kind of snuck down

456
00:20:40,610 --> 00:20:37,470
to the basement to watch they didn't

457
00:20:42,490 --> 00:20:40,620
know I was present that film turned out

458
00:20:44,960 --> 00:20:42,500
to be a Department of Defense film

459
00:20:47,540 --> 00:20:44,970
documenting the United States nuclear

460
00:20:50,270 --> 00:20:47,550
weapons tests from Trinity to the

461
00:20:53,690 --> 00:20:50,280
hydrogen test the above-ground test of

462
00:20:56,990 --> 00:20:53,700
bikini the last 45 seconds of the film

463
00:21:00,230 --> 00:20:57,000

were most interesting they show a runway

464

00:21:03,350 --> 00:21:00,240

at a desert area with a jet of the

465

00:21:07,250 --> 00:21:03,360

Korean era parked facing a disc-shaped

466

00:21:10,100 --> 00:21:07,260

object to half-tracks and two tanks were

467

00:21:13,520 --> 00:21:10,110

on either side of the runway standing in

468

00:21:17,210 --> 00:21:13,530

front of three small aliens what have

469

00:21:19,750 --> 00:21:17,220

now become known as greys there were two

470

00:21:22,130 --> 00:21:19,760

armed soldiers and President Eisenhower

471

00:21:25,310 --> 00:21:22,140

who had an object that appeared to be

472

00:21:28,730 --> 00:21:25,320

rolled-up papers he was handing those to

473

00:21:31,250 --> 00:21:28,740

the three aliens now if you connect all

474

00:21:34,580 --> 00:21:31,260

the dots this appears to be documented

475

00:21:37,760 --> 00:21:34,590

footage of the treaty between the aliens

476
00:21:41,390 --> 00:21:37,770
and the United States then our witness

477
00:21:44,240 --> 00:21:41,400
writes hmm this broadcaster is also

478
00:21:47,570 --> 00:21:44,250
saying hmm we covered Eisenhower and

479
00:21:51,050 --> 00:21:47,580
this purported event way back on the way

480
00:21:53,360 --> 00:21:51,060
back Wednesday show and this is just

481
00:21:56,690 --> 00:21:53,370
more information going toward that as

482
00:21:58,790 --> 00:21:56,700
having possibly been real we'll leave it

483
00:22:01,760 --> 00:21:58,800
for you to decide gentle listeners the

484
00:22:05,060 --> 00:22:01,770
clock has decided we gotta go because

485
00:22:07,610 --> 00:22:05,070
that's a wrap thank you for listening to

486
00:22:08,910 --> 00:22:07,620
inception radio network follow today's

487
00:22:11,580 --> 00:22:08,920
broadcast

488
00:22:13,320 --> 00:22:11,590

Oh headline news dot-com take care of

489

00:22:15,480 --> 00:22:13,330

each other we're all in this together
