

## Inception Radio Network

UFO Headline News Tuesday May 30th,  
2017

1  
00:00:07,490 --> 00:00:05,180  
hello it's Tuesday May 30th 2017 you are

2  
00:00:10,430 --> 00:00:07,500  
listening to inception Radio Network

3  
00:00:15,499 --> 00:00:10,440  
voice of the fringe majority this is

4  
00:00:17,930 --> 00:00:15,509  
Carol Karl with us at nine News we pause

5  
00:00:22,099 --> 00:00:17,940  
we ponder look up and ask the heavens

6  
00:00:25,400 --> 00:00:22,109  
what's up well specifically Planet wise

7  
00:00:28,670 --> 00:00:25,410  
and star wise the moon and Regulus are

8  
00:00:31,669 --> 00:00:28,680  
up this is according to earth sky org

9  
00:00:34,580 --> 00:00:31,679  
our constant steady North Star of

10  
00:00:37,970 --> 00:00:34,590  
information tonight the waxing crescent

11  
00:00:40,670 --> 00:00:37,980  
moon is approaching the star Regulus the

12  
00:00:44,299 --> 00:00:40,680  
brightest star in the constellation Leo

13  
00:00:46,610 --> 00:00:44,309

the Lion nearly everybody worldwide can

14

00:00:48,799 --> 00:00:46,620

use the moon to find the star Regulus

15

00:00:51,350 --> 00:00:48,809

tonight just look for the moon in the

16

00:00:54,350 --> 00:00:51,360

evening sky that bright star nearby

17

00:00:56,090 --> 00:00:54,360

well--that's Regulus there's little

18

00:00:58,670 --> 00:00:56,100

chance of mistaking another star for

19

00:01:01,069 --> 00:00:58,680

Regulus because it's the only bright

20

00:01:04,880 --> 00:01:01,079

object within a stone's throw of the May

21

00:01:07,370 --> 00:01:04,890

30th moon the much brighter star a long

22

00:01:10,460 --> 00:01:07,380

hop to the east well not a star at all

23

00:01:13,399 --> 00:01:10,470

it's that giant planet King Jupiter

24

00:01:15,590 --> 00:01:13,409

you'll easily see Jupiter it's the most

25

00:01:18,920 --> 00:01:15,600

brilliant star like object in the may

26  
00:01:21,590 --> 00:01:18,930  
evening sky indeed this broadcaster said

27  
00:01:23,330 --> 00:01:21,600  
to herself these binoculars just aren't

28  
00:01:25,340 --> 00:01:23,340  
cutting it maybe it's high time we

29  
00:01:28,370 --> 00:01:25,350  
learned to use that Meade telescope

30  
00:01:31,130 --> 00:01:28,380  
we've had at our disposal but just been

31  
00:01:32,990 --> 00:01:31,140  
too undisciplined to pursue hmm we're

32  
00:01:35,450 --> 00:01:33,000  
betting that rings a bell with at least

33  
00:01:36,050 --> 00:01:35,460  
one of you gentle listeners but it's

34  
00:01:38,480 --> 00:01:36,060  
summer

35  
00:01:40,700 --> 00:01:38,490  
mostly moderate temperatures at least in

36  
00:01:42,380 --> 00:01:40,710  
the northern hemisphere perhaps it's

37  
00:01:44,240 --> 00:01:42,390  
time if you've got something at your

38  
00:01:46,819 --> 00:01:44,250

disposal give it a whirl

39

00:01:49,210 --> 00:01:46,829

King planet Jupiter is up there in all

40

00:01:51,410 --> 00:01:49,220

its brilliance at the moment and

41

00:01:53,810 --> 00:01:51,420

according to the folks at earth Sky

42

00:01:57,289 --> 00:01:53,820

dot-org the moon is going to meet up

43

00:01:59,870 --> 00:01:57,299

with Jupiter on June 3rd as viewed from

44

00:02:02,270 --> 00:01:59,880

North America the moon on the night of

45

00:02:05,209 --> 00:02:02,280

May 30th will be to the west or to the

46

00:02:07,210 --> 00:02:05,219

right of reckless and on May 31st and

47

00:02:09,369 --> 00:02:07,220

June 1st will be in that same position

48

00:02:13,020 --> 00:02:09,379

from the world's eastern hemisphere

49

00:02:15,059 --> 00:02:13,030

Europe Africa Asia Australia and new

50

00:02:17,640 --> 00:02:15,069

and you guys are going to see the moon's

51  
00:02:20,340 --> 00:02:17,650  
position somewhat offset toward those

52  
00:02:22,890 --> 00:02:20,350  
previous dates in fact if you're living

53  
00:02:24,090 --> 00:02:22,900  
in Madagascar or along the southeast

54  
00:02:27,150 --> 00:02:24,100  
coast of Africa

55  
00:02:27,690 --> 00:02:27,160  
you can watch the moon a cult or cover

56  
00:02:30,960 --> 00:02:27,700  
up

57  
00:02:33,120 --> 00:02:30,970  
Regulus on the evening of May 31st the

58  
00:02:35,850 --> 00:02:33,130  
star will slip behind the moon's dark

59  
00:02:38,850 --> 00:02:35,860  
side and then reappear on its

60  
00:02:41,070 --> 00:02:38,860  
illuminated side if you are living in

61  
00:02:43,199 --> 00:02:41,080  
and hearing this broadcast from this

62  
00:02:46,370 --> 00:02:43,209  
following City we apologize for the

63  
00:02:51,270 --> 00:02:46,380

attempt at pronouncing it it's

64

00:02:54,600 --> 00:02:51,280

antananarivo spelled a and ta na na RI

65

00:02:57,690 --> 00:02:54,610

vo it's in Madagascar that occultation

66

00:03:02,070 --> 00:02:57,700

will start at precisely 8:15 p.m. and

67

00:03:04,680 --> 00:03:02,080

end at 9:26 p.m. local time but no

68

00:03:07,380 --> 00:03:04,690

matter where you live worldwide the moon

69

00:03:09,420 --> 00:03:07,390

always moves eastward relative to the

70

00:03:12,300 --> 00:03:09,430

backdrop of stars and planets of the

71

00:03:15,059 --> 00:03:12,310

zodiac that eastward motion in our sky

72

00:03:18,420 --> 00:03:15,069

is a translation of the moon's eastward

73

00:03:20,340 --> 00:03:18,430

motion in orbit around Earth starting

74

00:03:22,680 --> 00:03:20,350

tonight and over the next several days

75

00:03:25,259 --> 00:03:22,690

you can notice that orbital motion of

76

00:03:28,860 --> 00:03:25,269

the moon as it sweeps by the star

77

00:03:31,860 --> 00:03:28,870

regulus bottom line tonight may 30th

78

00:03:33,900 --> 00:03:31,870

2017 the waxing crescent moon is

79

00:03:36,420 --> 00:03:33,910

approaching the star Regulus the

80

00:03:39,810 --> 00:03:36,430

brightest star in the constellation Leo

81

00:03:43,050 --> 00:03:39,820

the Lion our particular orbit took us

82

00:03:46,140 --> 00:03:43,060

past the earth sky dot-org Earth section

83

00:03:49,560 --> 00:03:46,150

a wonderful part of that site for this

84

00:03:52,170 --> 00:03:49,570

headline weekend Aurora's at the South

85

00:03:53,640 --> 00:03:52,180

Pole it's really little more than a

86

00:03:58,020 --> 00:03:53,650

soundbite but here we go

87

00:04:02,520 --> 00:03:58,030

on Saturday May 27th 2017 a coronal mass

88

00:04:05,670 --> 00:04:02,530

ejection or CME arrived at Earth from

89

00:04:08,550 --> 00:04:05,680

the Sun sparking a strong g3 class

90

00:04:11,490 --> 00:04:08,560

geomagnetic storm that peaked on May

91

00:04:14,699 --> 00:04:11,500

28th according to the site space weather

92

00:04:17,340 --> 00:04:14,709

calm Aurora's were cited in more than 20

93

00:04:18,840 --> 00:04:17,350

United States states and no doubt at

94

00:04:21,509 --> 00:04:18,850

similar latitudes in the northern

95

00:04:23,790 --> 00:04:21,519

hemisphere but they also occurred over

96

00:04:26,790 --> 00:04:23,800

the less populous south hemisphere and

97

00:04:28,920 --> 00:04:26,800

over Earth's South Pole

98

00:04:31,469 --> 00:04:28,930

are we weren't able to find any striking

99

00:04:33,659 --> 00:04:31,479

significance of an effect here on earth

100

00:04:35,700 --> 00:04:33,669

as far as communications we're concerned

101  
00:04:38,879 --> 00:04:35,710  
with wait and see and keep you posted

102  
00:04:41,820 --> 00:04:38,889  
meanwhile if you are so inclined there's

103  
00:04:44,969 --> 00:04:41,830  
a striking photograph that is over at

104  
00:04:48,360 --> 00:04:44,979  
earth sky org we'll post a link later at

105  
00:04:51,480 --> 00:04:48,370  
UFO headline news calm it's a photo of

106  
00:04:53,850 --> 00:04:51,490  
Aurora's taken over a relay station at

107  
00:04:57,390 --> 00:04:53,860  
the South Pole and coincidentally the

108  
00:05:01,709 --> 00:04:57,400  
shot captures an Iridium flare what a

109  
00:05:04,020 --> 00:05:01,719  
combo here's a combo an agency of the

110  
00:05:06,689 --> 00:05:04,030  
United States government and a place in

111  
00:05:09,330 --> 00:05:06,699  
space well we never thought we would be

112  
00:05:12,119 --> 00:05:09,340  
reading this headline NASA to make

113  
00:05:15,360 --> 00:05:12,129

announcement about first mission to

114

00:05:17,490 --> 00:05:15,370

touch Sun no we can assure you this

115

00:05:20,369 --> 00:05:17,500

isn't fake news and it isn't April

116

00:05:21,240 --> 00:05:20,379

Fool's Day this comes from the nasa.gov

117

00:05:24,719 --> 00:05:21,250

slash

118

00:05:28,050 --> 00:05:24,729

press release and it goes like this

119

00:05:31,499 --> 00:05:28,060

it's actually an announcement about an

120

00:05:33,870 --> 00:05:31,509

upcoming announcement NASA will make an

121

00:05:36,930 --> 00:05:33,880

announcement about the agency's first

122

00:05:39,990 --> 00:05:36,940

mission to fly directly into our sun's

123

00:05:41,490 --> 00:05:40,000

atmosphere there will be an event at 11

124

00:05:44,519 --> 00:05:41,500

a.m. Eastern Daylight Time

125

00:05:46,890 --> 00:05:44,529

Wednesday May 31st it'll be broadcast

126  
00:05:50,040 --> 00:05:46,900  
from the University of Chicago's William

127  
00:05:51,899 --> 00:05:50,050  
Eckert Research Center auditorium as one

128  
00:05:54,600 --> 00:05:51,909  
might expect that event is going to be

129  
00:05:58,890 --> 00:05:54,610  
broadcast live we'll put up a link from

130  
00:06:01,050 --> 00:05:58,900  
nasa.gov slash NASA TV but if you're

131  
00:06:03,689 --> 00:06:01,060  
just not able to wait you can sleuth

132  
00:06:07,080 --> 00:06:03,699  
around and find out on your own the

133  
00:06:10,230 --> 00:06:07,090  
mission Solar Probe plus is scheduled to

134  
00:06:13,050 --> 00:06:10,240  
launch in the summer of 2018 placed in

135  
00:06:15,330 --> 00:06:13,060  
orbit within four million miles of the

136  
00:06:17,999 --> 00:06:15,340  
sun's surface and facing heat and

137  
00:06:20,760 --> 00:06:18,009  
radiation unlike any spacecraft in

138  
00:06:23,550 --> 00:06:20,770

history the spacecraft will explore the

139

00:06:24,990 --> 00:06:23,560

sun's outer atmosphere and make critical

140

00:06:27,959 --> 00:06:25,000

observations that will answer

141

00:06:31,680 --> 00:06:27,969

decades-old questions about the physics

142

00:06:33,659 --> 00:06:31,690

of how stars work the resulting data

143

00:06:35,939 --> 00:06:33,669

will improve forecasts of major space

144

00:06:38,519 --> 00:06:35,949

weather events that impact life on Earth

145

00:06:40,230 --> 00:06:38,529

as well as satellites and the lives of

146

00:06:42,420 --> 00:06:40,240

astronauts in space

147

00:06:45,540 --> 00:06:42,430

in case you're interested here are the

148

00:06:47,760 --> 00:06:45,550

including participants Thomas Zubrin

149

00:06:49,650 --> 00:06:47,770

associate administrator of NASA's

150

00:06:52,650 --> 00:06:49,660

science Mission Directorate out of

151  
00:06:54,180 --> 00:06:52,660  
Washington DC mission project scientist

152  
00:06:56,189 --> 00:06:54,190  
out of the Johns Hopkins University

153  
00:06:59,879 --> 00:06:56,199  
Applied Physics Laboratory in Laurel

154  
00:07:02,450 --> 00:06:59,889  
Maryland Nicola Foxx then there's Eugene

155  
00:07:04,290 --> 00:07:02,460  
Parker and s Chandra Sekhar

156  
00:07:06,300 --> 00:07:04,300  
distinguished service professors

157  
00:07:09,330 --> 00:07:06,310  
emeritus at the University of Chicago

158  
00:07:10,800 --> 00:07:09,340  
add to that team Eric Isaac's he's

159  
00:07:13,890 --> 00:07:10,810  
executive vice president for research

160  
00:07:16,439 --> 00:07:13,900  
innovation and national laboratories at

161  
00:07:18,570 --> 00:07:16,449  
the University of Chicago and the Dean

162  
00:07:20,520 --> 00:07:18,580  
of the division of the physical sciences

163  
00:07:24,210 --> 00:07:20,530

at the University of Chicago

164

00:07:26,550 --> 00:07:24,220

rocky Kolb as usual with anything from

165

00:07:29,100 --> 00:07:26,560

NASA you can find links to other things

166

00:07:31,620 --> 00:07:29,110

about this mission and agency's solar

167

00:07:34,379 --> 00:07:31,630

related activities and you can find that

168

00:07:37,740 --> 00:07:34,389

link later at UF o headline news comm

169

00:07:41,010 --> 00:07:37,750

and if you're hungry for still more NASA

170

00:07:43,320 --> 00:07:41,020

news here's this headline NASA - air

171

00:07:47,070 --> 00:07:43,330

launch of next International Space

172

00:07:50,040 --> 00:07:47,080

Station resupply mission yep NASA TV

173

00:07:53,460 --> 00:07:50,050

once again NASA commercial cargo

174

00:07:55,890 --> 00:07:53,470

providers SpaceX is targeting its 11th

175

00:07:58,200 --> 00:07:55,900

commercial resupply services mission to

176

00:08:02,339 --> 00:07:58,210

the International Space Station the

177

00:08:05,399 --> 00:08:02,349

launch date is set for 5:55 p.m. Eastern

178

00:08:07,260 --> 00:08:05,409

Daylight Time Thursday June 1st the

179

00:08:09,510 --> 00:08:07,270

coverage of course will be carried on

180

00:08:12,320 --> 00:08:09,520

NASA television and the agency's web

181

00:08:15,659 --> 00:08:12,330

sites that's going to start at 5:15 p.m.

182

00:08:18,600 --> 00:08:15,669

followed by of course a post launch news

183

00:08:21,270 --> 00:08:18,610

analysis the SpaceX Dragon spacecraft

184

00:08:24,870 --> 00:08:21,280

will liftoff on the company's Falcon 9

185

00:08:27,570 --> 00:08:24,880

rocket from launch complex 39a at NASA's

186

00:08:30,570 --> 00:08:27,580

Kennedy Space Center in Florida it's

187

00:08:32,969 --> 00:08:30,580

going to be carrying almost 6,000 pounds

188

00:08:36,000 --> 00:08:32,979

of science research crew supplies and

189

00:08:38,519 --> 00:08:36,010

hardware to the orbiting laboratory it's

190

00:08:42,659 --> 00:08:38,529

going to be supporting expedition 52 and

191

00:08:44,940 --> 00:08:42,669

53 crew members the unpressurized trunk

192

00:08:48,510 --> 00:08:44,950

of the spacecraft also will transport

193

00:08:52,040 --> 00:08:48,520

solar panels tools for earth observation

194

00:08:53,550 --> 00:08:52,050

and equipment to study neutron stars

195

00:08:55,470 --> 00:08:53,560

about 10min

196

00:08:57,900 --> 00:08:55,480

after launch dragon will reach its

197

00:09:00,540 --> 00:08:57,910

preliminary orbit it's then going to

198

00:09:02,730 --> 00:09:00,550

deploy its solar arrays and begin a

199

00:09:05,250 --> 00:09:02,740

carefully choreographed series of

200

00:09:08,640 --> 00:09:05,260

thruster firings to reach the space

201  
00:09:10,950 --> 00:09:08,650  
station when it arrives expedition 52

202  
00:09:13,019 --> 00:09:10,960  
flight engineers Jack Fischer and Peggy

203  
00:09:13,590 --> 00:09:13,029  
Whitson she's commander currently of

204  
00:09:16,170 --> 00:09:13,600  
NASA

205  
00:09:18,540 --> 00:09:16,180  
we'll be grappling with the dragon if

206  
00:09:20,870 --> 00:09:18,550  
you want to see that well there's live

207  
00:09:24,750 --> 00:09:20,880  
coverage of that rendezvous and capture

208  
00:09:28,110 --> 00:09:24,760  
starting at 8:30 a.m. Sunday June 4th on

209  
00:09:31,410 --> 00:09:28,120  
NASA TV with installation coverage set

210  
00:09:33,870 --> 00:09:31,420  
to begin later at 11:30 a.m. if that

211  
00:09:37,200 --> 00:09:33,880  
launch doesn't occur June 1st the next

212  
00:09:40,410 --> 00:09:37,210  
launch window will be 507 p.m. Saturday

213  
00:09:43,170 --> 00:09:40,420

June 3rd and then that TV coverage won't

214

00:09:45,390 --> 00:09:43,180

start till 4:30 p.m. if you didn't get a

215

00:09:48,540 --> 00:09:45,400

chance to write that all down don't

216

00:09:51,390 --> 00:09:48,550

worry there will be links later at UFO

217

00:09:53,460 --> 00:09:51,400

headline news calm the Dragon spacecraft

218

00:09:56,790 --> 00:09:53,470

is going to remain at the space station

219

00:09:59,190 --> 00:09:56,800

until approximately July 2nd when it's

220

00:10:01,829 --> 00:09:59,200

scheduled to splashdown with that

221

00:10:04,160 --> 00:10:01,839

research and return cargo in the Pacific

222

00:10:06,810 --> 00:10:04,170

Ocean off the coast of Baja California

223

00:10:08,670 --> 00:10:06,820

media at Kennedy Center will have the

224

00:10:11,340 --> 00:10:08,680

opportunity to participate in special

225

00:10:14,280 --> 00:10:11,350

tours and briefings the 31st of May and

226

00:10:16,829 --> 00:10:14,290

June 1st and view the launch this is

227

00:10:19,710 --> 00:10:16,839

going to be the 100th launch the 6th

228

00:10:22,440 --> 00:10:19,720

SpaceX launch from this pad previous

229

00:10:25,190 --> 00:10:22,450

launches include 11 Apollo flights the

230

00:10:30,270 --> 00:10:25,200

launch of an unmanned Skylab back in

231

00:10:33,390 --> 00:10:30,280

1973 82 shuttle flights and 5 SpaceX

232

00:10:36,449 --> 00:10:33,400

launches speaking of launches well let's

233

00:10:39,000 --> 00:10:36,459

just launch this the source is so

234

00:10:40,590 --> 00:10:39,010

credible all of the players are credible

235

00:10:43,590 --> 00:10:40,600

it goes like this

236

00:10:47,040 --> 00:10:43,600

Bigelow Aerospace founder says

237

00:10:49,440 --> 00:10:47,050

commercial world will lead in space nope

238

00:10:51,930 --> 00:10:49,450

that's not the real gold nugget a take

239

00:10:54,390 --> 00:10:51,940

away here that's very farther in the

240

00:10:57,329 --> 00:10:54,400

article and the article is written in

241

00:11:00,240 --> 00:10:57,339

the form of a two-person interview so if

242

00:11:03,570 --> 00:11:00,250

you will indulge this is an interview

243

00:11:06,880 --> 00:11:03,580

that happened actually for CBS TV 60

244

00:11:09,370 --> 00:11:06,890

minutes but first to set the stage

245

00:11:11,140 --> 00:11:09,380

there's a new space race and it's not

246

00:11:14,140 --> 00:11:11,150

between the United States and Russia

247

00:11:15,940 --> 00:11:14,150

it's between private companies and it's

248

00:11:16,930 --> 00:11:15,950

attracted multimillionaires and

249

00:11:20,200 --> 00:11:16,940

billionaires

250

00:11:22,750 --> 00:11:20,210

like Elon Musk and Jeff Bezos a less

251  
00:11:26,170 --> 00:11:22,760  
likely player is Las Vegas real estate

252  
00:11:28,900 --> 00:11:26,180  
tycoon Robert Bigelow who at 73 is

253  
00:11:31,840 --> 00:11:28,910  
making the biggest gamble of his life

254  
00:11:34,810 --> 00:11:31,850  
not on rockets but on expandable

255  
00:11:37,750 --> 00:11:34,820  
spacecraft large lightweight structures

256  
00:11:39,820 --> 00:11:37,760  
that inflate in space a technology that

257  
00:11:43,120 --> 00:11:39,830  
could dramatically change how humans

258  
00:11:45,250 --> 00:11:43,130  
live and work in zero-gravity nASA has

259  
00:11:46,990 --> 00:11:45,260  
partnered with Robert Bigelow who's an

260  
00:11:49,720 --> 00:11:47,000  
unconventional figure in the aerospace

261  
00:11:52,870 --> 00:11:49,730  
world he's more at home on the Vegas

262  
00:11:56,640 --> 00:11:52,880  
strip than at America's Space Agency and

263  
00:11:59,260 --> 00:11:56,650

he's obsessed with aliens and UFOs

264

00:12:02,140 --> 00:11:59,270

yes gentle listeners it says that right

265

00:12:04,240 --> 00:12:02,150

here in the spring of last year he and

266

00:12:06,400 --> 00:12:04,250

NASA carried out an historic test to

267

00:12:10,030 --> 00:12:06,410

prove his high flying technology is

268

00:12:12,220 --> 00:12:10,040

ready to support humans in space what we

269

00:12:15,820 --> 00:12:12,230

playfully refer to as that inflatable

270

00:12:17,770 --> 00:12:15,830

space bounce house and when Ilan Musk's

271

00:12:19,870 --> 00:12:17,780

SpaceX rocket soared into the skies

272

00:12:23,380 --> 00:12:19,880

above Cape Canaveral it was on a mission

273

00:12:25,180 --> 00:12:23,390

for NASA carrying nearly 7,000 pounds of

274

00:12:28,830 --> 00:12:25,190

cargo to the International Space Station

275

00:12:32,110 --> 00:12:28,840

food supplies and Robert Bigelow's

276

00:12:34,860 --> 00:12:32,120

expandable spacecraft let's start that

277

00:12:37,480 --> 00:12:34,870

two-person interview right about here

278

00:12:39,370 --> 00:12:37,490

Robert Bigelow flying to the

279

00:12:41,590 --> 00:12:39,380

International Space Station is a really

280

00:12:44,890 --> 00:12:41,600

big deal it's an experimental spacecraft

281

00:12:47,350 --> 00:12:44,900

which is a big deal we don't know how

282

00:12:50,200 --> 00:12:47,360

it's going to behave for sure Laura

283

00:12:52,540 --> 00:12:50,210

Logan does that make you nervous Robert

284

00:12:54,430 --> 00:12:52,550

Bigelow I'm nervous because I'm a

285

00:12:57,610 --> 00:12:54,440

nervous person I think and I don't

286

00:13:00,460 --> 00:12:57,620

necessarily always expect things to go

287

00:13:02,380 --> 00:13:00,470

right at this point during the CBS 60

288

00:13:04,870 --> 00:13:02,390

minutes interview they inserted

289

00:13:08,920 --> 00:13:04,880

time-lapse video you can see that bounce

290

00:13:11,950 --> 00:13:08,930

house expanding in seconds close to 300

291

00:13:15,310 --> 00:13:11,960

million dollars and 16 years to get it

292

00:13:17,230 --> 00:13:15,320

there Laura Logan is there anything this

293

00:13:20,410 --> 00:13:17,240

big that astronauts are working in today

294

00:13:23,350 --> 00:13:20,420

Robert Bigelow no nothing even

295

00:13:25,449 --> 00:13:23,360

close I can turn this process into

296

00:13:28,000 --> 00:13:25,459

anything a client wants a first ever

297

00:13:31,240 --> 00:13:28,010

orbiting hotel a hospital or an

298

00:13:33,370 --> 00:13:31,250

inflatable research facility the B

299

00:13:36,939 --> 00:13:33,380

three-30 is smaller than the original

300

00:13:39,819 --> 00:13:36,949

the olympus Lara Logan this can function

301  
00:13:42,759 --> 00:13:39,829  
on its own Bigelow well it can function

302  
00:13:44,590 --> 00:13:42,769  
as a standalone destination because it

303  
00:13:46,930 --> 00:13:44,600  
has all the facilities that it would

304  
00:13:48,519 --> 00:13:46,940  
take to keep people alive or four

305  
00:13:50,980 --> 00:13:48,529  
countries hoping to make their mark in

306  
00:13:54,069 --> 00:13:50,990  
space Bigelow said this offers an

307  
00:13:56,230 --> 00:13:54,079  
affordable way in Lara Logan then says

308  
00:13:58,990 --> 00:13:56,240  
what about the idea of national pride

309  
00:14:01,750 --> 00:13:59,000  
and what we do as nations Neil Armstrong

310  
00:14:04,120 --> 00:14:01,760  
walking on the moon he didn't do that

311  
00:14:05,889 --> 00:14:04,130  
for a private company he did that for

312  
00:14:08,680 --> 00:14:05,899  
the United States of America and it

313  
00:14:11,740 --> 00:14:08,690

meant something to which Robert Bigelow

314

00:14:14,019 --> 00:14:11,750

replies you bet it did and that created

315

00:14:17,050 --> 00:14:14,029

a period of inspiration that hasn't been

316

00:14:20,110 --> 00:14:17,060

matched ever since so now we're looking

317

00:14:22,750 --> 00:14:20,120

for a new era that says alright now how

318

00:14:25,269 --> 00:14:22,760

can we now shape this to where it's more

319

00:14:27,639 --> 00:14:25,279

accessible for a lot more folks at a lot

320

00:14:30,610 --> 00:14:27,649

less cost and still have safety and

321

00:14:33,009 --> 00:14:30,620

reliability at the same time apparently

322

00:14:35,650 --> 00:14:33,019

while watching Neil Armstrong take his

323

00:14:38,639 --> 00:14:35,660

first steps on the moon that moment in

324

00:14:41,590 --> 00:14:38,649

history inspired him and still does

325

00:14:43,470 --> 00:14:41,600

Robert Bigelow says the approach however

326

00:14:46,180 --> 00:14:43,480

wasn't lightning-fast

327

00:14:49,210 --> 00:14:46,190

but now here's where Laura Logan writes

328

00:14:52,060 --> 00:14:49,220

that on a canyon road just outside Las

329

00:14:55,350 --> 00:14:52,070

Vegas Robert Bigelow story takes a turn

330

00:14:59,139 --> 00:14:55,360

that some may find to put it lightly

331

00:15:01,660 --> 00:14:59,149

improbable he told Laura Logan this is

332

00:15:06,189 --> 00:15:01,670

where his grandparents had a close

333

00:15:09,880 --> 00:15:06,199

encounter with a UFO here it is Robert

334

00:15:12,430 --> 00:15:09,890

Bigelow it really sped up and came right

335

00:15:15,009 --> 00:15:12,440

into their faces and filled up the

336

00:15:17,199 --> 00:15:15,019

entire windshield of their car and it

337

00:15:20,019 --> 00:15:17,209

took off at a right angle and shot off

338

00:15:21,910 --> 00:15:20,029

into the distance this anecdote

339

00:15:24,189 --> 00:15:21,920

apparently sparked Robert Bigelow's

340

00:15:25,990 --> 00:15:24,199

obsession and it might explain that

341

00:15:29,590 --> 00:15:26,000

alien looking out from the side of

342

00:15:31,090 --> 00:15:29,600

Bigelow's aerospace sign and it made for

343

00:15:33,410 --> 00:15:31,100

a kind of conversation you don't

344

00:15:38,260 --> 00:15:33,420

ordinarily have with an akan

345

00:15:42,500 --> 00:15:38,270

CEO Lara Logan do you believe in aliens

346

00:15:46,490 --> 00:15:42,510

Robert Bigelow I'm absolutely convinced

347

00:15:48,380 --> 00:15:46,500

that's all there is to it Lara Logan do

348

00:15:52,070 --> 00:15:48,390

you also believe that UFOs have come to

349

00:15:55,360 --> 00:15:52,080

earth Robert Bigelow there has been and

350

00:15:58,010 --> 00:15:55,370

is an existing presence an

351  
00:16:00,670 --> 00:15:58,020  
extraterrestrial presence and I spent

352  
00:16:03,440 --> 00:16:00,680  
millions and millions and millions I

353  
00:16:05,780 --> 00:16:03,450  
probably spent more as an individual

354  
00:16:09,170 --> 00:16:05,790  
than anybody else in the United States

355  
00:16:12,230 --> 00:16:09,180  
has ever spent on this subject Lara

356  
00:16:14,330 --> 00:16:12,240  
Logan is it risky for you to say in

357  
00:16:17,870 --> 00:16:14,340  
public that you believe in UFOs and

358  
00:16:21,530 --> 00:16:17,880  
aliens Robert Bigelow I don't give a

359  
00:16:23,300 --> 00:16:21,540  
damn I don't care Lara Logan you don't

360  
00:16:25,280 --> 00:16:23,310  
worry that some people will say did you

361  
00:16:28,310 --> 00:16:25,290  
hear that guy he sounds like he's crazy

362  
00:16:32,900 --> 00:16:28,320  
Robert Bigelow I don't care

363  
00:16:35,120 --> 00:16:32,910

Lara Logan why not Robert Bigelow it's

364

00:16:37,010 --> 00:16:35,130

not gonna make a difference it's not

365

00:16:41,329 --> 00:16:37,020

going to change the reality of what I

366

00:16:43,010 --> 00:16:41,339

know Lara Logan do you imagine that in

367

00:16:45,950 --> 00:16:43,020

our space travels we will encounter

368

00:16:48,610 --> 00:16:45,960

other forms of intelligent life Robert

369

00:16:53,030 --> 00:16:48,620

Bigelow you don't have to go anywhere

370

00:16:57,260 --> 00:16:53,040

Lara Logan you can find it here where

371

00:17:01,010 --> 00:16:57,270

exactly Robert Bigelow it's just like

372

00:17:04,610 --> 00:17:01,020

right under people's noses oh my gosh

373

00:17:07,220 --> 00:17:04,620

Wow and that's a direct quote Robert

374

00:17:10,699 --> 00:17:07,230

Bigelow it's just like right under

375

00:17:14,030 --> 00:17:10,709

people's noses oh my gosh Wow

376

00:17:17,660 --> 00:17:14,040

in other words extraterrestrial life is

377

00:17:19,490 --> 00:17:17,670

here according to Robert Bigelow the

378

00:17:22,309 --> 00:17:19,500

content of this article goes on to say

379

00:17:25,760 --> 00:17:22,319

that the FAA confirmed to Laura Logan

380

00:17:28,640 --> 00:17:25,770

that for years it did refer reports of

381

00:17:31,940 --> 00:17:28,650

UFOs and other unexplained phenomenon to

382

00:17:34,220 --> 00:17:31,950

accompany Bigelow owns he told us he's

383

00:17:37,700 --> 00:17:34,230

had his own Close Encounters but

384

00:17:40,670 --> 00:17:37,710

declined to go into detail a Lara Logan

385

00:17:42,800 --> 00:17:40,680

continues Robert Bigelow's quirky and he

386

00:17:45,830 --> 00:17:42,810

knows it but when you have as much money

387

00:17:46,580 --> 00:17:45,840

as he does no one not even NASA seems to

388

00:17:48,860 --> 00:17:46,590

care

389

00:17:51,619 --> 00:17:48,870

there's lots more to this article about

390

00:17:54,649 --> 00:17:51,629

that interview you can find the entire

391

00:17:58,460 --> 00:17:54,659

content later via a link at UFO headline

392

00:18:02,419 --> 00:17:58,470

news calm the country of Belgium known

393

00:18:05,539 --> 00:18:02,429

for chocolate lace and UFOs here's a

394

00:18:09,289 --> 00:18:05,549

sighting via UFO stalker comm from

395

00:18:11,989 --> 00:18:09,299

Bruges and they spell that be ru GES

396

00:18:14,810 --> 00:18:11,999

it's actually bruised Flanders Belgium

397

00:18:17,419 --> 00:18:14,820

it's the setting for move on sighting

398

00:18:19,369 --> 00:18:17,429

number eight three six one six this

399

00:18:21,830 --> 00:18:19,379

event took place on the 6th of May this

400

00:18:25,279 --> 00:18:21,840

year wasn't reported till May 10th

401  
00:18:28,279 --> 00:18:25,289  
the summary I took a picture of the

402  
00:18:30,710 --> 00:18:28,289  
cruise from inside a couch the object

403  
00:18:33,109 --> 00:18:30,720  
wasn't seen until I looked at picture

404  
00:18:36,080 --> 00:18:33,119  
later and you can look at that picture

405  
00:18:38,840 --> 00:18:36,090  
later by heading over to UFO headline

406  
00:18:41,899 --> 00:18:38,850  
news calm there is no accompanying

407  
00:18:45,019 --> 00:18:41,909  
report of weather with this item but

408  
00:18:46,940 --> 00:18:45,029  
here is the sighting itself I was on a

409  
00:18:49,659 --> 00:18:46,950  
cruise from Southampton in the United

410  
00:18:54,289 --> 00:18:49,669  
Kingdom to zeebrugge in Belgium on

411  
00:18:57,049 --> 00:18:54,299  
Saturday the 6th of May 2017 at 1345 I

412  
00:18:59,690 --> 00:18:57,059  
took a picture of the cruise ship from

413  
00:19:01,669 --> 00:18:59,700

inside the coach through the window at

414

00:19:04,639 --> 00:19:01,679

the time I took this picture I did not

415

00:19:06,889 --> 00:19:04,649

notice anything in the sky when we got

416

00:19:10,549 --> 00:19:06,899

back on the ship I was going through the

417

00:19:13,430 --> 00:19:10,559

pictures and I saw this object the

418

00:19:17,359 --> 00:19:13,440

picture was taken on a samsung s7 edge

419

00:19:19,639 --> 00:19:17,369

on the maximum resolution since we are

420

00:19:22,730 --> 00:19:19,649

roughly in that neck of the woods why

421

00:19:25,850 --> 00:19:22,740

don't we stop by Tyne estuary in the

422

00:19:28,279 --> 00:19:25,860

United Kingdom they spell that te IGN

423

00:19:31,940 --> 00:19:28,289

and that's where MUFON case number eight

424

00:19:35,119 --> 00:19:31,950

three nine five six happened on the 22nd

425

00:19:40,039 --> 00:19:35,129

of May 2017 it was reported two days

426  
00:19:44,840 --> 00:19:40,049  
later the summary rectangular UFO with

427  
00:19:47,060 --> 00:19:44,850  
strange contrails captured again well by

428  
00:19:50,810 --> 00:19:47,070  
captured undoubtedly they mean a

429  
00:19:52,639 --> 00:19:50,820  
photographic capture yes there is a copy

430  
00:19:56,600 --> 00:19:52,649  
of that photo and you can find it later

431  
00:19:58,669 --> 00:19:56,610  
at UFO headline news calm a sighting

432  
00:20:00,500 --> 00:19:58,679  
specifics list the viewing distance as

433  
00:20:03,250 --> 00:20:00,510  
unknown or not

434  
00:20:06,380 --> 00:20:03,260  
applicable the altitude was unknown

435  
00:20:10,010 --> 00:20:06,390  
sighting duration three minutes object

436  
00:20:13,250 --> 00:20:10,020  
features appendages the object flight

437  
00:20:16,160 --> 00:20:13,260  
path path with directional change and it

438  
00:20:18,860 --> 00:20:16,170

had a square or rectangular shape

439

00:20:22,130 --> 00:20:18,870

no weather to speak of and so we won't

440

00:20:24,140 --> 00:20:22,140

here is the first person account I was

441

00:20:27,380 --> 00:20:24,150

at the Tyne estuary taking photographs

442

00:20:30,010 --> 00:20:27,390

of passing planes when I spotted what at

443

00:20:33,620 --> 00:20:30,020

first I thought was a passenger plane I

444

00:20:38,300 --> 00:20:33,630

started to zoom in with my Nikon p900

445

00:20:41,120 --> 00:20:38,310

only to be shocked by what I saw it was

446

00:20:44,660 --> 00:20:41,130

no passenger plane it appeared to be two

447

00:20:47,120 --> 00:20:44,670

white rectangular sections that were

448

00:20:49,040 --> 00:20:47,130

somehow connected and from the middle

449

00:20:52,700 --> 00:20:49,050

section there were two protruding

450

00:20:55,760 --> 00:20:52,710

transparent square flaps there was one

451  
00:20:58,690 --> 00:20:55,770  
flap on the top and one flap on the

452  
00:21:01,460 --> 00:20:58,700  
bottom of these conjoined rectangles

453  
00:21:04,000 --> 00:21:01,470  
there were also two separate contrails

454  
00:21:08,210 --> 00:21:04,010  
that were left by this strange object

455  
00:21:10,100 --> 00:21:08,220  
this is totally bizarre what kind of

456  
00:21:12,440 --> 00:21:10,110  
aircraft would have this kind of

457  
00:21:15,290 --> 00:21:12,450  
configuration I would say I have never

458  
00:21:18,140 --> 00:21:15,300  
seen anything like it before but that

459  
00:21:20,570 --> 00:21:18,150  
would be a lie I photographed the same

460  
00:21:23,750 --> 00:21:20,580  
bizarre object over the same Tyne

461  
00:21:27,920 --> 00:21:23,760  
estuary site on the 10th of April 2017

462  
00:21:30,970 --> 00:21:27,930  
at 2:46 p.m. this object is very

463  
00:21:34,160 --> 00:21:30,980

unconventional what on earth could it be

464

00:21:38,930 --> 00:21:34,170

the photograph was taken on the 24th of

465

00:21:42,710 --> 00:21:38,940

May 2017 at 5:15 p.m. at tiny estuary

466

00:21:44,810 --> 00:21:42,720

Devon England and here's where we say

467

00:21:47,630 --> 00:21:44,820

gentle listeners if you never before

468

00:21:50,180 --> 00:21:47,640

have made your way over to UFO headline

469

00:21:53,270 --> 00:21:50,190

news calm it's pretty painless if you

470

00:21:55,070 --> 00:21:53,280

can link to that photo we just have to

471

00:21:56,990 --> 00:21:55,080

say that our assumption is this has to

472

00:22:00,260 --> 00:21:57,000

be something we are working on it is so

473

00:22:03,140 --> 00:22:00,270

blatantly there such a presence in the

474

00:22:05,630 --> 00:22:03,150

sky let's make our presence known back

475

00:22:08,720 --> 00:22:05,640

on the continental United States now in

476  
00:22:11,090 --> 00:22:08,730  
Colonial Heights Virginia let's move on

477  
00:22:14,540 --> 00:22:11,100  
case number eight four zero five zero

478  
00:22:18,590 --> 00:22:14,550  
this is an old sighting the date is nine

479  
00:22:20,900 --> 00:22:18,600  
team 61 the month of October the 1st of

480  
00:22:25,730 --> 00:22:20,910  
the month it wasn't reported till the

481  
00:22:28,430 --> 00:22:25,740  
29th of May 2017 for some reason here's

482  
00:22:31,970 --> 00:22:28,440  
the summary one bright light that became

483  
00:22:34,820 --> 00:22:31,980  
11 dimmer lights that came out of that

484  
00:22:38,570 --> 00:22:34,830  
bright light the bright light got dimmer

485  
00:22:41,570 --> 00:22:38,580  
when the others left the viewing

486  
00:22:44,650 --> 00:22:41,580  
distance here over one mile unknown the

487  
00:22:47,450 --> 00:22:44,660  
altitude over 500 feet no cloud cover

488  
00:22:49,910 --> 00:22:47,460

the sighting duration was 30 minutes

489

00:22:52,370 --> 00:22:49,920

which perhaps could account for the

490

00:22:55,400 --> 00:22:52,380

vivid quality in our witnesses memory

491

00:22:58,640 --> 00:22:55,410

the object features however are reported

492

00:23:01,370 --> 00:22:58,650

as none the flight path hovering and

493

00:23:04,340 --> 00:23:01,380

then path and this object had a star

494

00:23:05,750 --> 00:23:04,350

like shape some dedicated soul went back

495

00:23:09,470 --> 00:23:05,760

and collected the weather information

496

00:23:12,200 --> 00:23:09,480

for that date in 1961 the maximum

497

00:23:14,630 --> 00:23:12,210

temperature was 80 degrees Fahrenheit 27

498

00:23:17,690 --> 00:23:14,640

degrees Celsius minimum temperature of

499

00:23:21,130 --> 00:23:17,700

46 degrees Fahrenheit 8 degrees Celsius

500

00:23:24,110 --> 00:23:21,140

the maximum visibility was 15 miles 24

501  
00:23:26,870 --> 00:23:24,120  
kilometers and it was sort of downhill

502  
00:23:31,250 --> 00:23:26,880  
from there because it was raining and

503  
00:23:33,140 --> 00:23:31,260  
foggy here's the account this is an

504  
00:23:37,220 --> 00:23:33,150  
account of what I believe was a sighting

505  
00:23:40,010 --> 00:23:37,230  
of a UFO in the early 1960s I was

506  
00:23:40,280 --> 00:23:40,020  
probably about 15 or 16 years old at the

507  
00:23:43,550 --> 00:23:40,290  
time

508  
00:23:45,830 --> 00:23:43,560  
I don't remember wearing a heavy winter

509  
00:23:48,410 --> 00:23:45,840  
coat so I believe this happened during

510  
00:23:49,040 --> 00:23:48,420  
the fair weather months probably in the

511  
00:23:51,860 --> 00:23:49,050  
autumn

512  
00:23:53,930 --> 00:23:51,870  
I lived on Richmond Avenue in Colonial

513  
00:23:56,960 --> 00:23:53,940

Heights Virginia about a half block east

514

00:23:59,240 --> 00:23:56,970

of the boulevard when I saw the object

515

00:24:01,640 --> 00:23:59,250

in the sky I called two neighbor kids

516

00:24:03,740 --> 00:24:01,650

out to watch with me the sighting was in

517

00:24:06,080 --> 00:24:03,750

early evening probably around 7 or 8

518

00:24:09,380 --> 00:24:06,090

o'clock in any event it wasn't long

519

00:24:11,890 --> 00:24:09,390

after dark the entire time period of

520

00:24:15,080 --> 00:24:11,900

this sighting was about 20 or 30 minutes

521

00:24:18,740 --> 00:24:15,090

this object appeared to be a very bright

522

00:24:20,960 --> 00:24:18,750

star approximately east northeast of the

523

00:24:23,750 --> 00:24:20,970

intersection of Richmond Avenue and the

524

00:24:26,000 --> 00:24:23,760

boulevard at that time I believe the

525

00:24:27,940 --> 00:24:26,010

bright light to be just over the Fort

526

00:24:29,800 --> 00:24:27,950

Lee airstrip

527

00:24:32,670 --> 00:24:29,810

however there was no way of knowing just

528

00:24:36,250 --> 00:24:32,680

how far or how near the object was and

529

00:24:39,600 --> 00:24:36,260

there was no sound coming from this

530

00:24:42,130 --> 00:24:39,610

object here's an account of what we saw

531

00:24:44,590 --> 00:24:42,140

there was a very bright light looking

532

00:24:48,190 --> 00:24:44,600

like a star in the sky as time passed

533

00:24:50,560 --> 00:24:48,200

the small light slowly left the bright

534

00:24:53,950 --> 00:24:50,570

light and appeared to come forward and

535

00:24:54,850 --> 00:24:53,960

to the right of that main light after a

536

00:24:57,880 --> 00:24:54,860

minute or two

537

00:25:00,490 --> 00:24:57,890

another small light slowly left the

538

00:25:04,330 --> 00:25:00,500

object and came forward and to the left

539

00:25:07,180 --> 00:25:04,340

side of the main object this process

540

00:25:11,230 --> 00:25:07,190

continued until there were about eleven

541

00:25:13,600 --> 00:25:11,240

objects in the sky when each light left

542

00:25:16,660 --> 00:25:13,610

the main light the main light would lose

543

00:25:18,310 --> 00:25:16,670

some of its brightness at the point

544

00:25:21,340 --> 00:25:18,320

where all the small lights were in the

545

00:25:24,550 --> 00:25:21,350

sky that main light was no brighter than

546

00:25:26,830 --> 00:25:24,560

the smaller individual objects after a

547

00:25:30,220 --> 00:25:26,840

minute or two those small lights slowly

548

00:25:32,680 --> 00:25:30,230

went back and joined the main object it

549

00:25:35,190 --> 00:25:32,690

was almost as if they went back exactly

550

00:25:38,740 --> 00:25:35,200

in the reverse of how they came away

551  
00:25:41,260 --> 00:25:38,750  
originally eventually all the small

552  
00:25:43,720 --> 00:25:41,270  
lights rejoined the main light and as

553  
00:25:46,960 --> 00:25:43,730  
each one rejoined that main light it

554  
00:25:50,980 --> 00:25:46,970  
became brighter until it was very bright

555  
00:25:53,590 --> 00:25:50,990  
once again then the object moved away in

556  
00:25:57,220 --> 00:25:53,600  
an easterly direction until it became so

557  
00:25:58,960 --> 00:25:57,230  
dim it disappeared from sight now the

558  
00:26:02,050 --> 00:25:58,970  
only way I can imagine anyone

559  
00:26:04,540 --> 00:26:02,060  
duplicating what we saw would be if they

560  
00:26:06,640 --> 00:26:04,550  
lined up 11 helicopters in a line east

561  
00:26:09,250 --> 00:26:06,650  
to west then turned on their

562  
00:26:11,950 --> 00:26:09,260  
searchlights then kept the front of each

563  
00:26:14,260 --> 00:26:11,960

helicopter facing west and left the line

564

00:26:17,650 --> 00:26:14,270

one at a time moving away from that line

565

00:26:20,530 --> 00:26:17,660

then hovering for a minute and then all

566

00:26:22,690 --> 00:26:20,540

of those helicopters moving into similar

567

00:26:24,970 --> 00:26:22,700

positions and back without turning

568

00:26:28,200 --> 00:26:24,980

around oh and then they backed away

569

00:26:33,070 --> 00:26:28,210

until they went out of sight likely I

570

00:26:36,070 --> 00:26:33,080

think not was this a UFO I don't know

571

00:26:39,280 --> 00:26:36,080

but I cannot explain what we saw in any

572

00:26:41,039 --> 00:26:39,290

logical way as far as I'm concerned it

573

00:26:43,680 --> 00:26:41,049

was a UFO and

574

00:26:46,200 --> 00:26:43,690

cause of this I find it easy to believe

575

00:26:51,299 --> 00:26:46,210

others when they say they have seen a

576

00:26:53,970 --> 00:26:51,309

UFO an oldie but a goodie a remarkable

577

00:26:56,430 --> 00:26:53,980

experience to have had no wonder our

578

00:26:59,399 --> 00:26:56,440

witness remembered it vividly here's

579

00:27:02,519 --> 00:26:59,409

something vivid the clock is crunching

580

00:27:05,729 --> 00:27:02,529

down upon us yet again we'll make like a

581

00:27:08,489 --> 00:27:05,739

UFO and vanish because that's a wrap

582

00:27:10,619 --> 00:27:08,499

thank you for listening to inception

583

00:27:14,279 --> 00:27:10,629

Radio Network follow today's broadcast

584

00:27:16,259 --> 00:27:14,289

that UFO headline news calm take care of
