

Inception Radio Network

UFO Headline News Weekend of
Saturday June 3rd/Sunday June 4th,
2017

1
00:00:06,349 --> 00:00:03,710
hello it's the weekend Saturday June 3rd

2
00:00:09,110 --> 00:00:06,359
and Sunday June 4th you are listening to

3
00:00:11,870 --> 00:00:09,120
inception Radio Network voice of the

4
00:00:14,259 --> 00:00:11,880
fringe majority this is Carol Carl the

5
00:00:17,060 --> 00:00:14,269
UFO had 9 news

6
00:00:18,800 --> 00:00:17,070
yes it's weekend number 2 for our

7
00:00:21,740 --> 00:00:18,810
special feature for the weekends

8
00:00:24,230 --> 00:00:21,750
entitled off the beaten path where we go

9
00:00:26,509 --> 00:00:24,240
just a little outside the box of what we

10
00:00:28,460 --> 00:00:26,519
normally do in our broadcasts during the

11
00:00:31,099 --> 00:00:28,470
week but we're going to start with this

12
00:00:34,790 --> 00:00:31,109
same old tried and true the information

13
00:00:37,760 --> 00:00:34,800

from earth sky org here we go moon and

14

00:00:39,650 --> 00:00:37,770

Jupiter on June 3rd and we're going to

15

00:00:41,869 --> 00:00:39,660

guess it's probably going to be somewhat

16

00:00:44,930 --> 00:00:41,879

the same for June 4th but beginning

17

00:00:47,260 --> 00:00:44,940

tonight that waning gibbous moon passes

18

00:00:50,000 --> 00:00:47,270

2 degrees north of the planet Jupiter

19

00:00:53,299 --> 00:00:50,010

Jupiter's that bright star like object

20

00:00:55,580 --> 00:00:53,309

in our evening sky what a sight the moon

21

00:00:58,040 --> 00:00:55,590

and Jupiter pop out first thing at dusk

22

00:01:01,279 --> 00:00:58,050

and they'll be fun to spot as the sky

23

00:01:03,529 --> 00:01:01,289

darkens a bright star nearby speaka in

24

00:01:05,899 --> 00:01:03,539

the constellation virgo the maiden is

25

00:01:06,830 --> 00:01:05,909

going to come in and Jupiter as the

26

00:01:09,200 --> 00:01:06,840

night deepens

27

00:01:10,850 --> 00:01:09,210

there's no way to mistake speaka for

28

00:01:13,700 --> 00:01:10,860

Jupiter or vice versa

29

00:01:16,130 --> 00:01:13,710

Jupiter is by far the brighter object

30

00:01:17,899 --> 00:01:16,140

there isn't any way to mistake speaka

31

00:01:20,480 --> 00:01:17,909

for Jupiter or vice-versa

32

00:01:22,730 --> 00:01:20,490

Jupiter is by far the brighter object

33

00:01:24,950 --> 00:01:22,740

that's not to say Jupiter's the more

34

00:01:27,890 --> 00:01:24,960

luminous of these 2 celestial lights

35

00:01:30,380 --> 00:01:27,900

it isn't Jupiter being a relatively

36

00:01:33,499 --> 00:01:30,390

close planet shines because it reflects

37

00:01:36,380 --> 00:01:33,509

the light of the Sun speaka is a distant

38

00:01:39,080 --> 00:01:36,390

star or it's actually two stars in one

39

00:01:41,539 --> 00:01:39,090

really speaker which shines by its own

40

00:01:43,940 --> 00:01:41,549

light is vastly more intrinsically

41

00:01:45,139 --> 00:01:43,950

luminous than Jupiter it's just much

42

00:01:47,690 --> 00:01:45,149

much farther away

43

00:01:50,690 --> 00:01:47,700

if speaker were at the sun's distance

44

00:01:54,319 --> 00:01:50,700

from Earth it would visually be 1900

45

00:01:57,050 --> 00:01:54,329

times brighter than our Sun or to put it

46

00:02:00,350 --> 00:01:57,060

another way the Sun at speakers distance

47

00:02:05,600 --> 00:02:00,360

of 250 light years would appear hold on

48

00:02:11,390 --> 00:02:05,610

it's a wonky fraction it's 1 1900 as

49

00:02:13,580 --> 00:02:11,400

bright as speaker 1 1900 as bright you

50

00:02:15,860 --> 00:02:13,590

definitely need an optical aid to see

51
00:02:18,140 --> 00:02:15,870
our son this far away by Sunday night

52
00:02:21,170 --> 00:02:18,150
June 4th you'll see the moon has moved

53
00:02:23,330 --> 00:02:21,180
closer to speaker on the skies dome this

54
00:02:25,580 --> 00:02:23,340
motion of the moon in our sky is due to

55
00:02:28,130 --> 00:02:25,590
the moon's actual motion in orbit around

56
00:02:29,990 --> 00:02:28,140
Earth moving in its orbit the moon

57
00:02:32,030 --> 00:02:30,000
travels in front of all the

58
00:02:34,550 --> 00:02:32,040
constellations of the zodiac that takes

59
00:02:36,740 --> 00:02:34,560
about four weeks as seen from Earth the

60
00:02:38,630 --> 00:02:36,750
moon moves much more quickly relative to

61
00:02:41,660 --> 00:02:38,640
that backdrop of stars of the zodiac

62
00:02:43,850 --> 00:02:41,670
then does any other solar system object

63
00:02:46,130 --> 00:02:43,860

that's because it's so close to us

64

00:02:48,620 --> 00:02:46,140

for instance the moon will move past

65

00:02:50,330 --> 00:02:48,630

Jupiter leaving the constellation Virgo

66

00:02:52,490 --> 00:02:50,340

the maiden and entering the

67

00:02:55,309 --> 00:02:52,500

constellation Libra after just a few

68

00:02:58,580 --> 00:02:55,319

more days and king planet Jupiter won't

69

00:03:00,740 --> 00:02:58,590

enter Libra until mid-november 2017

70

00:03:03,680 --> 00:03:00,750

we'll follow that and keep you posted

71

00:03:05,539 --> 00:03:03,690

the bottom line wait for the moon and

72

00:03:07,970 --> 00:03:05,549

the planet Jupiter to light up the

73

00:03:11,479 --> 00:03:07,980

constellation Virgo the maiden just as

74

00:03:13,729 --> 00:03:11,489

soon as darkness falls on June 3rd 2017

75

00:03:16,970 --> 00:03:13,739

and we're going to guess that on June

76
00:03:19,610 --> 00:03:16,980
4th 2017 Sunday it's not going to be all

77
00:03:21,710 --> 00:03:19,620
that different slight shift in where the

78
00:03:25,430 --> 00:03:21,720
objects are get out there

79
00:03:27,500 --> 00:03:25,440
look up and enjoy we grabbed an update

80
00:03:28,610 --> 00:03:27,510
on those crew members coming back to

81
00:03:31,220 --> 00:03:28,620
Earth from the International Space

82
00:03:34,370 --> 00:03:31,230
Station we found something at blogs dot

83
00:03:37,460 --> 00:03:34,380
nasa.gov straight from the horse's mouth

84
00:03:41,479 --> 00:03:37,470
shall we say Marc Garcia gets the byline

85
00:03:45,949 --> 00:03:41,489
here headline expedition 51 crew back on

86
00:03:49,789 --> 00:03:45,959
earth after 196 days after spending

87
00:03:52,370 --> 00:03:49,799
those 196 days in space expedition 51

88
00:03:53,720 --> 00:03:52,380

crew members oleg novitskiy of Roscosmos

89

00:03:56,120 --> 00:03:53,730

and thomas pesquet

90

00:03:59,050 --> 00:03:56,130

of the european space agency landed

91

00:04:02,300 --> 00:03:59,060

their soyuz ms0 three spacecraft in

92

00:04:03,589 --> 00:04:02,310

kazakhstan at approximately 10 10 a.m.

93

00:04:05,650 --> 00:04:03,599

Eastern Daylight Time

94

00:04:08,150 --> 00:04:05,660

that's just what they were aiming for

95

00:04:10,670 --> 00:04:08,160

Russian recovery teams helped the crew

96

00:04:12,949 --> 00:04:10,680

exit the Soyuz vehicle and adjust to

97

00:04:15,289 --> 00:04:12,959

gravity after their stay in space

98

00:04:18,440 --> 00:04:15,299

the duo arrived at the International

99

00:04:19,849 --> 00:04:18,450

Space Station on November 19 2016 along

100

00:04:21,649 --> 00:04:19,859

with NASA's Peggy Whitson

101
00:04:24,020 --> 00:04:21,659
who will remain on the space station

102
00:04:27,410 --> 00:04:24,030
she's returning home with NASA's Jack

103
00:04:29,990 --> 00:04:27,420
Fisher and Rose cosmos Fyodor yurchikhin

104
00:04:33,440 --> 00:04:30,000
landings targeted for September at the

105
00:04:35,750 --> 00:04:33,450
time of the undocking expedition 52 was

106
00:04:37,850 --> 00:04:35,760
beginning aboard the station under your

107
00:04:40,220 --> 00:04:37,860
chickens command along with Peggy

108
00:04:42,200 --> 00:04:40,230
Whitson and Jack Fisher of NASA the

109
00:04:44,210 --> 00:04:42,210
three-person crew will operate the

110
00:04:46,850 --> 00:04:44,220
station until the arrival of three new

111
00:04:50,210 --> 00:04:46,860
crew members those members will be Randy

112
00:04:50,870 --> 00:04:50,220
Bresnik of NASA Sergey ryazanskiy of

113
00:04:53,690 --> 00:04:50,880

Roskosmos

114

00:04:56,240 --> 00:04:53,700

and Italian astronaut Paolo Nespoli of

115

00:04:58,850 --> 00:04:56,250

the ESA the European Space Agency

116

00:05:01,790 --> 00:04:58,860

they're scheduled to launch July 28th

117

00:05:03,620 --> 00:05:01,800

from Baikonur Kazakhstan there's more

118

00:05:06,140 --> 00:05:03,630

information and there will be a link

119

00:05:09,140 --> 00:05:06,150

later gentle listeners at UFO headline

120

00:05:11,630 --> 00:05:09,150

news comm and of course not that you

121

00:05:14,480 --> 00:05:11,640

need this reminding but one can follow

122

00:05:17,840 --> 00:05:14,490

the crews activities in space on social

123

00:05:20,270 --> 00:05:17,850

media yep all the usual suspects and

124

00:05:23,240 --> 00:05:20,280

playing catch-up here there's one more

125

00:05:26,660 --> 00:05:23,250

update we can't forget about it's from C

126
00:05:30,230 --> 00:05:26,670
and et with a byline for Amanda coozer

127
00:05:32,380 --> 00:05:30,240
headline SpaceX launches a recycled

128
00:05:33,920 --> 00:05:32,390
Dragon spacecraft to the International

129
00:05:36,650 --> 00:05:33,930
Space Station

130
00:05:39,110 --> 00:05:36,660
yep NASA is still working on it the

131
00:05:41,090 --> 00:05:39,120
weather was not about to cooperate so

132
00:05:43,460 --> 00:05:41,100
the launch is now set for Saturday

133
00:05:46,670 --> 00:05:43,470
here's the story and hey Saturday's

134
00:05:48,580 --> 00:05:46,680
today so at time of broadcast this is

135
00:05:51,740 --> 00:05:48,590
what we could find for you

136
00:05:54,980 --> 00:05:51,750
SpaceX's Falcon 9 rocket was all loaded

137
00:05:57,290 --> 00:05:54,990
up and ready to fly Thursday for the CRS

138
00:05:59,930 --> 00:05:57,300

11 cargo resupply mission to the

139

00:06:03,080 --> 00:05:59,940

International Space Station but weather

140

00:06:05,480 --> 00:06:03,090

got in the way the next launch window is

141

00:06:08,210 --> 00:06:05,490

this afternoon Saturday it's going to

142

00:06:10,700 --> 00:06:08,220

mark SpaceX's 11th cargo flight to the

143

00:06:12,860 --> 00:06:10,710

International Space Station but here's

144

00:06:15,710 --> 00:06:12,870

what's remarkable it's the first flight

145

00:06:18,020 --> 00:06:15,720

using a previously flown dragon capsule

146

00:06:20,270 --> 00:06:18,030

this dragon visited the space station

147

00:06:23,750 --> 00:06:20,280

for a resupply mission back in September

148

00:06:25,240 --> 00:06:23,760

of 2014 you can see that launch webcast

149

00:06:28,310 --> 00:06:25,250

by the way on YouTube

150

00:06:31,730 --> 00:06:28,320

CRS 11 was scheduled to take flight at

151
00:06:34,250 --> 00:06:31,740
2:55 p.m. Pacific time Thursday from the

152
00:06:36,110 --> 00:06:34,260
Kennedy Space Center in Florida but

153
00:06:38,900 --> 00:06:36,120
about 20 minutes before the launch

154
00:06:40,850 --> 00:06:38,910
spacex tweeted it was quote standing

155
00:06:44,179 --> 00:06:40,860
down due to light

156
00:06:47,089 --> 00:06:44,189
ening and quotes wise the next attempt

157
00:06:48,409 --> 00:06:47,099
will be Saturday today at 207 p.m.

158
00:06:50,779 --> 00:06:48,419
Pacific time

159
00:06:53,089 --> 00:06:50,789
cross your fingers the dragon will

160
00:06:55,360 --> 00:06:53,099
separate from the Falcon 9 rocket 2nd

161
00:06:57,740 --> 00:06:55,370
stage about 10 minutes after liftoff

162
00:07:00,320 --> 00:06:57,750
SpaceX will attempt to land that first

163
00:07:02,990 --> 00:07:00,330

stage of the Falcon 9 back at Cape

164

00:07:05,170 --> 00:07:03,000

Canaveral Air Force Station Elon Musk's

165

00:07:07,939 --> 00:07:05,180

space company has already successfully

166

00:07:11,450 --> 00:07:07,949

recycled and relaunched a falcon 9

167

00:07:13,850 --> 00:07:11,460

rocket so if all goes as planned that

168

00:07:16,219 --> 00:07:13,860

refurbished dragon will dock with the

169

00:07:20,839 --> 00:07:16,229

station just a few days later delivering

170

00:07:23,629 --> 00:07:20,849

a 6,000 pound 2720 kilogram payload to

171

00:07:26,629 --> 00:07:23,639

those waiting astronauts the cargo this

172

00:07:28,689 --> 00:07:26,639

time includes materials for over 250

173

00:07:31,730 --> 00:07:28,699

science experiments and investigations

174

00:07:34,839 --> 00:07:31,740

covering topics as diverse as combustion

175

00:07:37,070 --> 00:07:34,849

in microgravity to seed cultivation

176

00:07:39,019 --> 00:07:37,080

dragon scheduled to hang out with the

177

00:07:40,670 --> 00:07:39,029

space station for a month then it's

178

00:07:42,769 --> 00:07:40,680

going to return to earth with an

179

00:07:46,010 --> 00:07:42,779

anticipated splashdown in the Pacific

180

00:07:48,619 --> 00:07:46,020

Ocean SpaceX is in the middle of a NASA

181

00:07:52,339 --> 00:07:48,629

contract which covers up to 20 missions

182

00:07:55,279 --> 00:07:52,349

to the ISS through 2024 this mission

183

00:07:58,760 --> 00:07:55,289

will mark the 100th launch from the

184

00:08:00,589 --> 00:07:58,770

historic LC - 39 a site that was

185

00:08:04,550 --> 00:08:00,599

previously used as a launch pad for

186

00:08:07,399 --> 00:08:04,560

Apollo missions go dragon well those

187

00:08:09,379 --> 00:08:07,409

NASA Mars spotters as we call them have

188

00:08:14,170 --> 00:08:09,389

found something else here's a headline

189

00:08:15,320 --> 00:08:14,180

NASA spots a curious deep pit on Mars

190

00:08:17,749 --> 00:08:15,330

sub-headline

191

00:08:21,170 --> 00:08:17,759

the Mars landscape offers up another

192

00:08:22,999 --> 00:08:21,180

exotic feature with a round indentation

193

00:08:25,909 --> 00:08:23,009

that could have a couple of different

194

00:08:31,100 --> 00:08:25,919

possible origin stories it's another

195

00:08:32,899 --> 00:08:31,110

Amanda Kooser byline 4cn ET it looks

196

00:08:35,659 --> 00:08:32,909

like something you wouldn't want to fall

197

00:08:38,319 --> 00:08:35,669

into NASA's Mars Reconnaissance Orbiter

198

00:08:41,300 --> 00:08:38,329

peered down and caught sight of an

199

00:08:44,060 --> 00:08:41,310

unusual formation in the region of the

200

00:08:46,939 --> 00:08:44,070

Red Planet South Pole it's summer there

201
00:08:50,510 --> 00:08:46,949
and as NASA notes the Sun quote causes

202
00:08:53,269 --> 00:08:50,520
subtle topography accentuated in orbital

203
00:08:54,440 --> 00:08:53,279
images and quotes the Space Agency

204
00:08:57,020 --> 00:08:54,450
refers to the pad

205
00:09:00,290 --> 00:08:57,030
created by carbon dioxide ice as quote

206
00:09:02,750 --> 00:09:00,300
Swiss cheese to rain end quotes this

207
00:09:04,850 --> 00:09:02,760
deep round formation is most likely

208
00:09:07,100 --> 00:09:04,860
something referred to as a collapse pit

209
00:09:10,250 --> 00:09:07,110
a depression often caused by the ground

210
00:09:13,100 --> 00:09:10,260
sinking into a void below but perhaps it

211
00:09:14,750 --> 00:09:13,110
could be an impact crater this isn't the

212
00:09:17,330 --> 00:09:14,760
first time NASA scientists have eyed

213
00:09:20,270 --> 00:09:17,340

weird formation on Mars and asked is

214

00:09:22,880 --> 00:09:20,280

that an impact crater there's another

215

00:09:25,040 --> 00:09:22,890

recent MRO Mars Reconnaissance Orbiter

216

00:09:28,100 --> 00:09:25,050

image that was released in April that

217

00:09:30,230 --> 00:09:28,110

image shows a scaly looking indentation

218

00:09:33,290 --> 00:09:30,240

which is also located at the planet

219

00:09:35,600 --> 00:09:33,300

South Pole area nASA released the pit

220

00:09:38,450 --> 00:09:35,610

image on Friday as just another

221

00:09:41,950 --> 00:09:38,460

spectacular reminder of how weird

222

00:09:44,720 --> 00:09:41,960

wonderful and mysterious Mars can be

223

00:09:47,030 --> 00:09:44,730

speaking of mysterious can we make this

224

00:09:49,400 --> 00:09:47,040

segue from a deep pit on Mars to the

225

00:09:52,820 --> 00:09:49,410

White House in the United States you bet

226

00:09:54,920 --> 00:09:52,830

we can and here we go headline mystery

227

00:09:58,400 --> 00:09:54,930

of the flickering red lights in the

228

00:10:01,250 --> 00:09:58,410

White House grips the internet we grab

229

00:10:02,900 --> 00:10:01,260

the Gizmodo version of this story there

230

00:10:06,230 --> 00:10:02,910

doesn't seem to be a byline but we're

231

00:10:08,480 --> 00:10:06,240

going to read it anyway internet fueled

232

00:10:10,250 --> 00:10:08,490

conspiracy theories have plagued United

233

00:10:12,560 --> 00:10:10,260

States politics over the last year and

234

00:10:15,350 --> 00:10:12,570

made voters on both sides of the aisle

235

00:10:17,930 --> 00:10:15,360

appear to be reactionary maniacs

236

00:10:21,470 --> 00:10:17,940

but conspiracy theories can also be fun

237

00:10:24,230 --> 00:10:21,480

and the entirely benign saga of red

238

00:10:25,730 --> 00:10:24,240

lights flashing in the windows of the

239

00:10:27,830 --> 00:10:25,740

second-floor residence of the White

240

00:10:31,460 --> 00:10:27,840

House is just about as fun as these

241

00:10:33,890 --> 00:10:31,470

things get a live stream of the White

242

00:10:36,650 --> 00:10:33,900

House went viral last week in certain

243

00:10:38,600 --> 00:10:36,660

corners of the Internet when strange red

244

00:10:42,560 --> 00:10:38,610

lights were seen strobing in the windows

245

00:10:45,110 --> 00:10:42,570

for almost 17 minutes yes the windows of

246

00:10:47,420 --> 00:10:45,120

the White House White House spokespeople

247

00:10:49,420 --> 00:10:47,430

and the Secret Service offered no

248

00:10:52,040 --> 00:10:49,430

comment on the cause of the phenomenon

249

00:10:55,220 --> 00:10:52,050

so the internet did what it does and

250

00:10:57,200 --> 00:10:55,230

served up some wild speculation no one

251
00:10:58,940 --> 00:10:57,210
seemed to nail a really good joke about

252
00:11:01,580 --> 00:10:58,950
the situation but the general

253
00:11:03,980 --> 00:11:01,590
strangeness of the situation itself was

254
00:11:06,320 --> 00:11:03,990
more than enough the most ubiquitous

255
00:11:08,030 --> 00:11:06,330
theory was that it had something to do

256
00:11:10,519 --> 00:11:08,040
with Russia because of the color

257
00:11:13,009 --> 00:11:10,529
and others joke that Trump was blowing

258
00:11:15,410 --> 00:11:13,019
off some steam with a club night or

259
00:11:17,240 --> 00:11:15,420
maybe that red orb came from Saudi

260
00:11:19,579 --> 00:11:17,250
Arabia and was brought home by the

261
00:11:21,650 --> 00:11:19,589
administration and don't forget those

262
00:11:24,559 --> 00:11:21,660
dark occult rituals that's certainly a

263
00:11:27,230 --> 00:11:24,569

possibility in fact there's a movie it

264

00:11:29,509 --> 00:11:27,240

was filmed in 1977 it's called red light

265

00:11:32,269 --> 00:11:29,519

in the White House this journalist says

266

00:11:35,329 --> 00:11:32,279

could this offer any clues so this

267

00:11:38,930 --> 00:11:35,339

broadcaster made a trek over to the IMDB

268

00:11:40,400 --> 00:11:38,940

that internet movie database and found

269

00:11:42,800 --> 00:11:40,410

red light in the White House

270

00:11:44,420 --> 00:11:42,810

interestingly enough one of the people

271

00:11:48,590 --> 00:11:44,430

involved in that production is none

272

00:11:51,259 --> 00:11:48,600

other than me me leader led er she is

273

00:11:53,150 --> 00:11:51,269

definitely involved in strangeness one

274

00:11:55,730 --> 00:11:53,160

of the things she produces at the moment

275

00:11:58,400 --> 00:11:55,740

is a series called the leftovers

276

00:12:00,800 --> 00:11:58,410

available on cable definitely science

277

00:12:02,780 --> 00:12:00,810

fiction but that's a digression because

278

00:12:05,809 --> 00:12:02,790

there isn't any direct connection

279

00:12:08,329 --> 00:12:05,819

between that film and this event but

280

00:12:10,280 --> 00:12:08,339

then Infowars that website told

281

00:12:12,530 --> 00:12:10,290

everybody they were being unreasonable

282

00:12:15,800 --> 00:12:12,540

and called their reactions nut job

283

00:12:18,439 --> 00:12:15,810

reactions the favorite hypothesis of

284

00:12:21,139 --> 00:12:18,449

this journalist is by far that Trump was

285

00:12:23,840 --> 00:12:21,149

being treated with light therapy for his

286

00:12:26,629 --> 00:12:23,850

dementia but none of those scenarios are

287

00:12:29,059 --> 00:12:26,639

likely to be true the most reasonable

288

00:12:30,639 --> 00:12:29,069

explanation has been that we are simply

289

00:12:33,610 --> 00:12:30,649

seeing the reflection of a nearby

290

00:12:36,500 --> 00:12:33,620

emergency vehicles lights in the window

291

00:12:39,110 --> 00:12:36,510

somebody threw up some video evidence an

292

00:12:42,290 --> 00:12:39,120

ambulance in Washington DC the real

293

00:12:44,930 --> 00:12:42,300

thing and use that as comparison to suss

294

00:12:48,019 --> 00:12:44,940

out what this light was end of story

295

00:12:49,850 --> 00:12:48,029

but wait an emergency vehicle with

296

00:12:53,269 --> 00:12:49,860

flashing red lights parked in front of

297

00:12:56,420 --> 00:12:53,279

the White House for 17 minutes it with

298

00:12:58,730 --> 00:12:56,430

no explanation no word was it simply a

299

00:13:00,410 --> 00:12:58,740

sliced off finger in the kitchen it's

300

00:13:02,210 --> 00:13:00,420

interesting that this has gotten no

301
00:13:04,939 --> 00:13:02,220
comment so perhaps we're just going to

302
00:13:07,490 --> 00:13:04,949
have to say it's just us move along

303
00:13:10,040 --> 00:13:07,500
folks nothing to see here but there's

304
00:13:12,889 --> 00:13:10,050
something to see here from Fox News of

305
00:13:15,350 --> 00:13:12,899
all places calm with a byline for Kate

306
00:13:20,240 --> 00:13:15,360
Siemens here's a headline in an

307
00:13:21,860 --> 00:13:20,250
unexplored abyss faceless fish swim hmm

308
00:13:25,100 --> 00:13:21,870
from the White House to a

309
00:13:28,340 --> 00:13:25,110
unexplored abyss we can do that it was

310
00:13:31,100 --> 00:13:28,350
first dredged up this fish in the 1870s

311
00:13:32,960 --> 00:13:31,110
of Papua New Guinea and now scientists

312
00:13:37,360 --> 00:13:32,970
say they've hauled one up from the deep

313
00:13:39,680 --> 00:13:37,370

once again a so-called faceless fish

314

00:13:41,540 --> 00:13:39,690

reports on the scientific bounty were

315

00:13:43,579 --> 00:13:41,550

collected two weeks ago into a

316

00:13:45,980 --> 00:13:43,589

month-long expedition off the eastern

317

00:13:47,660 --> 00:13:45,990

side of Australia where researchers are

318

00:13:49,970 --> 00:13:47,670

exploring the Commonwealth marine

319

00:13:51,079 --> 00:13:49,980

reserves from northern Tasmania to

320

00:13:54,920 --> 00:13:51,089

central Queensland

321

00:13:58,100 --> 00:13:54,930

it's an abyss waters up to 2.5 miles

322

00:14:00,530 --> 00:13:58,110

deep that have never been surveyed lead

323

00:14:03,230 --> 00:14:00,540

scientist Tim O'Hara calls it quote the

324

00:14:06,230 --> 00:14:03,240

most unexplored environment on earth and

325

00:14:09,470 --> 00:14:06,240

quotes and what it has returned so far

326

00:14:12,950 --> 00:14:09,480

is everything from tripod fish to dinner

327

00:14:16,460 --> 00:14:12,960

plate sized sea spiders oh that's fodder

328

00:14:19,130 --> 00:14:16,470

for nightmares is it not and that 16

329

00:14:20,900 --> 00:14:19,140

inch faceless fish let's see if we can

330

00:14:23,690 --> 00:14:20,910

pronounce its proper name its Taif

331

00:14:26,240 --> 00:14:23,700

lowness Nasus and researchers are

332

00:14:29,120 --> 00:14:26,250

calling it just a faceless Cusk

333

00:14:31,699 --> 00:14:29,130

that spelled Cu SK one of the

334

00:14:35,329 --> 00:14:31,709

researchers Dee Bray told Australia's

335

00:14:37,100 --> 00:14:35,339

ABC News quote it's got eyes way under

336

00:14:40,370 --> 00:14:37,110

the surface but you really can't see any

337

00:14:42,320 --> 00:14:40,380

eyes and quotes and Tim O'Hara added

338

00:14:44,630 --> 00:14:42,330

quote it looks like two rear ends on a

339

00:14:47,120 --> 00:14:44,640

fish really and quotes adds Tim O'Hara

340

00:14:49,640 --> 00:14:47,130

he explains the creature lives in an

341

00:14:52,519 --> 00:14:49,650

unforgiving environment of crushing

342

00:14:55,250 --> 00:14:52,529

pressures and no light with temperatures

343

00:14:57,199 --> 00:14:55,260

around 34 degrees Fahrenheit the

344

00:14:58,850 --> 00:14:57,209

newspaper Guardian reports the

345

00:15:01,250 --> 00:14:58,860

expedition's finds have been collected

346

00:15:03,740 --> 00:15:01,260

through the use of a quote metal sled

347

00:15:05,900 --> 00:15:03,750

style device and quotes which is

348

00:15:09,740 --> 00:15:05,910

connected to the surface via five miles

349

00:15:12,230 --> 00:15:09,750

of wire and dragged along the bottom the

350

00:15:14,690 --> 00:15:12,240

sleds also collected plenty of trash but

351

00:15:17,210 --> 00:15:14,700

some of it dates back to centuries so

352

00:15:19,640 --> 00:15:17,220

one person's trash is another person's

353

00:15:21,829 --> 00:15:19,650

treasure oh yes and while most media

354

00:15:23,510 --> 00:15:21,839

reports suggest this is the first time

355

00:15:26,440 --> 00:15:23,520

the fish has been collected since the

356

00:15:30,319 --> 00:15:26,450

crew of the HMS challenger found one in

357

00:15:32,900 --> 00:15:30,329

1874 an expedition blogpost quote

358

00:15:34,940 --> 00:15:32,910

although rare it's quite widely

359

00:15:38,120 --> 00:15:34,950

distributed in 1950

360

00:15:41,090 --> 00:15:38,130

one one trawl in deep water off East

361

00:15:43,280 --> 00:15:41,100

Kalimantan Borneo collected five of

362

00:15:45,350 --> 00:15:43,290

these specimens and quotes this

363

00:15:48,710 --> 00:15:45,360

particular voyage and expedition will

364

00:15:50,720 --> 00:15:48,720

end June 16th and we'll keep you posted

365

00:15:52,640 --> 00:15:50,730

here come the hounds maybe they're

366

00:15:55,400 --> 00:15:52,650

attracted by those faceless fish

367

00:15:58,820 --> 00:15:55,410

headline earliest evidence for dog

368

00:16:01,850 --> 00:15:58,830

breeding found on remote Siberian island

369

00:16:05,090 --> 00:16:01,860

David Grimm with two M's writes this for

370

00:16:08,690 --> 00:16:05,100

science mag it goes something like this

371

00:16:14,080 --> 00:16:08,700

the hunter gatherers of zelkova island

372

00:16:17,450 --> 00:16:14,090

that spells eh ok hov were a hardy folk

373

00:16:19,730 --> 00:16:17,460

9,000 years ago they survived frigid

374

00:16:22,610 --> 00:16:19,740

year-round temperatures in animal skin

375

00:16:25,250 --> 00:16:22,620

tents some 500 kilometers north of

376

00:16:27,470 --> 00:16:25,260

what's now that Russian mainland and

377

00:16:29,510 --> 00:16:27,480

they were the only people ever known to

378

00:16:33,260 --> 00:16:29,520

hunt large numbers of polar bears

379

00:16:35,810 --> 00:16:33,270

without firearms now it appears these

380

00:16:38,230 --> 00:16:35,820

ancient Arctic dwellers had something

381

00:16:40,880 --> 00:16:38,240

even more remarkable and did something

382

00:16:43,460 --> 00:16:40,890

incredible they may have been among the

383

00:16:44,600 --> 00:16:43,470

first humans to breed dogs for a

384

00:16:47,650 --> 00:16:44,610

particular purpose

385

00:16:50,000 --> 00:16:47,660

an analysis of canine bones from Zhukov

386

00:16:52,220 --> 00:16:50,010

suggests the dogs there were bred to

387

00:16:55,340 --> 00:16:52,230

pull sleds making this the first

388

00:16:57,760 --> 00:16:55,350

evidence by thousands of years for dog

389

00:17:00,710 --> 00:16:57,770

breeding in the archaeological record

390

00:17:03,200 --> 00:17:00,720

quote it's pretty convincing and very

391

00:17:05,810 --> 00:17:03,210

exciting end quotes says Melinda's ed ur

392

00:17:08,449 --> 00:17:05,820

it's an interesting mix of disciplines

393

00:17:10,670 --> 00:17:08,459

she's an arc a zoologist at the

394

00:17:14,180 --> 00:17:10,680

Smithsonian Institution National Museum

395

00:17:16,329 --> 00:17:14,190

of Natural History in Washington DC the

396

00:17:19,340 --> 00:17:16,339

finding may help explain why people

397

00:17:22,520 --> 00:17:19,350

domesticated dogs in the first place to

398

00:17:24,920 --> 00:17:22,530

put them to work quote it fills a

399

00:17:26,960 --> 00:17:24,930

missing piece of the puzzle of early

400

00:17:29,150 --> 00:17:26,970

human dog relationships and even

401
00:17:31,610 --> 00:17:29,160
domestication itself end quote and

402
00:17:33,200 --> 00:17:31,620
that's a quote from Angela Perry from

403
00:17:36,200 --> 00:17:33,210
the Max Planck Institute for

404
00:17:39,530 --> 00:17:36,210
evolutionary anthropology in Leipzig

405
00:17:41,750 --> 00:17:39,540
Germany Zhukov wasn't always an island

406
00:17:44,780 --> 00:17:41,760
when stone age people live there and

407
00:17:47,600 --> 00:17:44,790
before the Seas rose it was connected to

408
00:17:48,740 --> 00:17:47,610
Siberia in addition to polar bears which

409
00:17:51,260 --> 00:17:48,750
were mostly hunted in

410
00:17:53,360 --> 00:17:51,270
winter the Xoco viens pursued reindeer

411
00:17:56,120 --> 00:17:53,370
hundreds of kilometres across vast

412
00:17:59,150 --> 00:17:56,130
plains quote they needed a means of

413
00:18:01,430 --> 00:17:59,160

transportation and quotes says Vladimir

414

00:18:03,470 --> 00:18:01,440

Putin Co an archaeologist at the Russian

415

00:18:07,880 --> 00:18:03,480

Academy of Sciences in st. Petersburg

416

00:18:09,860 --> 00:18:07,890

he's been excavating Xoco since 1989 he

417

00:18:11,960 --> 00:18:09,870

previously found dog bones and the

418

00:18:13,880 --> 00:18:11,970

remains of wooden sleds on the island

419

00:18:15,920 --> 00:18:13,890

but it was never clear whether the

420

00:18:19,190 --> 00:18:15,930

animals were actually bred for sledding

421

00:18:22,400 --> 00:18:19,200

and now vladimir patil co has evidence

422

00:18:25,670 --> 00:18:22,410

they were to confirm that canines were

423

00:18:27,650 --> 00:18:25,680

indeed dogs he and alexei caspere of an

424

00:18:30,170 --> 00:18:27,660

ark a zoologist at the same Academy

425

00:18:32,450 --> 00:18:30,180

compared the two most complete skulls

426

00:18:35,090 --> 00:18:32,460

with those of wolves and Siberian

427

00:18:37,670 --> 00:18:35,100

Huskies from the region they found that

428

00:18:39,920 --> 00:18:37,680

two key ratios snout height to skull

429

00:18:42,110 --> 00:18:39,930

length and cranium height to skull

430

00:18:45,110 --> 00:18:42,120

length could reliably distinguish the

431

00:18:47,930 --> 00:18:45,120

two by those measures their samples were

432

00:18:51,050 --> 00:18:47,940

truly dogs though one appeared to

433

00:18:52,790 --> 00:18:51,060

perhaps be a wolf dog hybrid to figure

434

00:18:55,400 --> 00:18:52,800

out what the so-called dogs looked like

435

00:18:59,150 --> 00:18:55,410

the team extrapolated their sizes from

436

00:19:01,190 --> 00:18:59,160

the fossil bones of 11 individuals 10 of

437

00:19:03,440 --> 00:19:01,200

the dogs weighed between 16 and 25

438

00:19:05,750 --> 00:19:03,450

kilograms and may have resembled

439

00:19:07,490 --> 00:19:05,760

Siberian Huskies the team's going to

440

00:19:10,280 --> 00:19:07,500

reveal next month in the journal of

441

00:19:11,210 --> 00:19:10,290

archaeological science reports all this

442

00:19:14,150 --> 00:19:11,220

information

443

00:19:17,240 --> 00:19:14,160

the remaining dog a putative wolf hybrid

444

00:19:20,150 --> 00:19:17,250

weighed about 29 kilograms and may have

445

00:19:22,280 --> 00:19:20,160

been similar to an alaskan malamute good

446

00:19:25,430 --> 00:19:22,290

sled dogs typically weigh between 20 and

447

00:19:27,860 --> 00:19:25,440

25 kilograms as pachuco as dogs of this

448

00:19:30,950 --> 00:19:27,870

size are big enough to pull sleds but

449

00:19:32,540 --> 00:19:30,960

they don't overheat like larger dogs he

450

00:19:35,030 --> 00:19:32,550

concludes that the inhabitants of

451
00:19:37,190 --> 00:19:35,040
zelkova probably bred the smaller dogs

452
00:19:38,630 --> 00:19:37,200
for sledding and may have bred the

453
00:19:41,030 --> 00:19:38,640
larger ones to hunt

454
00:19:43,460 --> 00:19:41,040
polar bears quote they were clearly

455
00:19:46,850 --> 00:19:43,470
shaping these animals to do something

456
00:19:48,800 --> 00:19:46,860
special and quotes Angela Perry says

457
00:19:50,540 --> 00:19:48,810
quote if this is indeed a breeding

458
00:19:52,910 --> 00:19:50,550
program it would be the earliest

459
00:19:56,120 --> 00:19:52,920
evidence of dog breeding for any purpose

460
00:19:58,430 --> 00:19:56,130
and quotes the next closest example she

461
00:20:00,070 --> 00:19:58,440
said would probably be herding dogs in

462
00:20:01,160 --> 00:20:00,080
the near East which were bred about

463
00:20:03,590 --> 00:20:01,170

7,000

464

00:20:05,720 --> 00:20:03,600
years ago but Angela Perry thinks the

465

00:20:08,150 --> 00:20:05,730
wide range of weights of the ancient

466

00:20:10,400 --> 00:20:08,160
dogs argues against strictly controlled

467

00:20:12,560 --> 00:20:10,410
breeding she said I think there were a

468

00:20:15,050 --> 00:20:12,570
lot of different kinds of dogs and maybe

469

00:20:17,420 --> 00:20:15,060
even some wolves mating with each other

470

00:20:20,240 --> 00:20:17,430
producing random litters of pups and

471

00:20:22,700 --> 00:20:20,250
then from those litters humans may have

472

00:20:24,650 --> 00:20:22,710
selected the best sled dogs which would

473

00:20:27,920 --> 00:20:24,660
still indicate some sort of focus on

474

00:20:29,630 --> 00:20:27,930
breed the find may shed light on why

475

00:20:32,240 --> 00:20:29,640
dogs were domesticated in the first

476

00:20:34,190 --> 00:20:32,250

place the scientists don't agree on when

477

00:20:37,930 --> 00:20:34,200

this happened recent research suggests

478

00:20:39,860 --> 00:20:37,940

it was at least 15,000 years ago

479

00:20:41,750 --> 00:20:39,870

significantly this was around the time

480

00:20:43,910 --> 00:20:41,760

when earth was beginning to warm and

481

00:20:46,370 --> 00:20:43,920

large species like mammoths were

482

00:20:48,470 --> 00:20:46,380

disappearing smaller migrating game like

483

00:20:51,080 --> 00:20:48,480

reindeer started to dominate the

484

00:20:53,000 --> 00:20:51,090

landscape dogs could help hunt down this

485

00:20:56,060 --> 00:20:53,010

smaller prey and even provide a means

486

00:20:58,490 --> 00:20:56,070

for people to follow them says pachuco

487

00:21:01,520 --> 00:20:58,500

quote before then there was no real

488

00:21:04,760 --> 00:21:01,530

reason to have a dog his paper is

489

00:21:07,700 --> 00:21:04,770

dedicated to Liverpool a 15 year old

490

00:21:09,860 --> 00:21:07,710

dachshund he calls a true friend he

491

00:21:13,160 --> 00:21:09,870

continues quote we turned to them when

492

00:21:15,500 --> 00:21:13,170

we really needed them and quotes the

493

00:21:17,720 --> 00:21:15,510

researchers all agree the work has shown

494

00:21:20,240 --> 00:21:17,730

that a variety of animals from foxes to

495

00:21:22,760 --> 00:21:20,250

badgers were hanging around early human

496

00:21:26,720 --> 00:21:22,770

camp sites and some might even have

497

00:21:29,450 --> 00:21:26,730

become tame said Zetter quote the reason

498

00:21:31,970 --> 00:21:29,460

we don't have pet foxes today is that we

499

00:21:32,780 --> 00:21:31,980

never found a use for them starting a

500

00:21:35,360 --> 00:21:32,790

two-way street

501
00:21:37,730 --> 00:21:35,370
with dogs and shaping them into animals

502
00:21:40,790 --> 00:21:37,740
we needed that was the real

503
00:21:42,950 --> 00:21:40,800
domestication end quote there's another

504
00:21:44,990 --> 00:21:42,960
study that was published last year it

505
00:21:47,300 --> 00:21:45,000
concluded that dogs may have been

506
00:21:49,640 --> 00:21:47,310
domesticated in both Europe and East

507
00:21:51,590 --> 00:21:49,650
Asia and this new work doesn't

508
00:21:54,110 --> 00:21:51,600
necessarily change or challenge that

509
00:21:56,030 --> 00:21:54,120
idea although it does suggest that early

510
00:21:59,390 --> 00:21:56,040
dogs may have played an important role

511
00:22:02,030 --> 00:21:59,400
in the Arctic as well dogs could have

512
00:22:05,150 --> 00:22:02,040
been domesticated independently in this

513
00:22:07,070 --> 00:22:05,160

region says Angela Perry quote the

514

00:22:09,650 --> 00:22:07,080

Arctic should be a bigger part of the

515

00:22:12,140 --> 00:22:09,660

domestication equation it's holding some

516

00:22:13,170 --> 00:22:12,150

secrets something interesting is going

517

00:22:16,650 --> 00:22:13,180

on there

518

00:22:19,530 --> 00:22:16,660

and quotes enter that we say release the

519

00:22:23,340 --> 00:22:19,540

hounds let's run with those dogs shall

520

00:22:25,860 --> 00:22:23,350

we to Peru to Nazca yes the home of the

521

00:22:28,350 --> 00:22:25,870

Nazca citing the Nazca plain those

522

00:22:31,380 --> 00:22:28,360

wonderful marks in the earth of ancient

523

00:22:34,950 --> 00:22:31,390

unknown origin it's in the region of eco

524

00:22:37,680 --> 00:22:34,960

spelled ICA and it's from UFO stalker

525

00:22:39,990 --> 00:22:37,690

calm it's got a move on case number

526

00:22:42,570 --> 00:22:40,000

eight four one one zero

527

00:22:45,980 --> 00:22:42,580

the summary doesn't say much simply says

528

00:22:48,540 --> 00:22:45,990

object in Nazca there are photos that

529

00:22:51,390 --> 00:22:48,550

accompany this we suggest you find your

530

00:22:54,330 --> 00:22:51,400

way to UFO headline news calm later and

531

00:22:56,430 --> 00:22:54,340

do your own photo analysis the sighting

532

00:23:00,150 --> 00:22:56,440

specifics give us a viewing distance

533

00:23:03,000 --> 00:23:00,160

unknown an altitude unknown the sighting

534

00:23:06,360 --> 00:23:03,010

duration three hours object features

535

00:23:08,580 --> 00:23:06,370

none the object flight path path with

536

00:23:09,870 --> 00:23:08,590

directional change and this thing was

537

00:23:12,510 --> 00:23:09,880

shaped like an egg

538

00:23:14,870 --> 00:23:12,520

there isn't any pertinent meteorology

539

00:23:18,420 --> 00:23:14,880

but here's the sighting first-person

540

00:23:22,110 --> 00:23:18,430

when I was in Nazca I saw for several

541

00:23:25,710 --> 00:23:22,120

days or weeks what seemed to be a planet

542

00:23:28,590 --> 00:23:25,720

it was a bit orange it was perhaps at 45

543

00:23:33,390 --> 00:23:28,600

degrees looking into the Nazca lines and

544

00:23:35,880 --> 00:23:33,400

the sea I believed it was a planet then

545

00:23:39,510 --> 00:23:35,890

suddenly one night after having seen

546

00:23:42,510 --> 00:23:39,520

this daily perhaps at 2030 hours or more

547

00:23:46,050 --> 00:23:42,520

it descended vertically and made a

548

00:23:49,260 --> 00:23:46,060

perfect 90-degree angle and then it went

549

00:23:51,750 --> 00:23:49,270

horizontally then to the left and then

550

00:23:54,630 --> 00:23:51,760

it made another 90-degree angle for a

551
00:23:57,390 --> 00:23:54,640
vertical descent until it disappeared

552
00:23:59,610 --> 00:23:57,400
from sight because of the trees this

553
00:24:04,650 --> 00:23:59,620
particular location was majora

554
00:24:06,930 --> 00:24:04,660
mahoto Nazca or the Nazca lines I saw

555
00:24:09,360 --> 00:24:06,940
this object doing this for two or three

556
00:24:11,970 --> 00:24:09,370
weeks this display would last

557
00:24:14,010 --> 00:24:11,980
approximately three hours the object

558
00:24:16,650 --> 00:24:14,020
would go without moving and then it

559
00:24:19,050 --> 00:24:16,660
would descend there are the original

560
00:24:21,390 --> 00:24:19,060
pics with more sky in the view and the

561
00:24:25,590 --> 00:24:21,400
other one is processed I just detailed

562
00:24:27,030 --> 00:24:25,600
the object quite exciting and given the

563
00:24:30,240 --> 00:24:27,040

geolocation then asked

564

00:24:32,490 --> 00:24:30,250

planes the mind reels our trajectory

565

00:24:35,880 --> 00:24:32,500

takes us now to Argentina

566

00:24:41,370 --> 00:24:35,890

courtesy of in expla cata that wonderful

567

00:24:44,850 --> 00:24:41,380

site will spell it I an exp Li cata the

568

00:24:47,400 --> 00:24:44,860

Journal of Hispanic ufology here's the

569

00:24:50,720 --> 00:24:47,410

headline Argentina three out of four

570

00:24:53,760 --> 00:24:50,730

people have witnessed UFOs in son Luis

571

00:24:56,340 --> 00:24:53,770

interesting numbers the province of San

572

00:24:59,010 --> 00:24:56,350

Luis is among Argentina's 10 top hot

573

00:25:01,200 --> 00:24:59,020

spots as far as UFO sightings are

574

00:25:03,870 --> 00:25:01,210

concerned according to a report by

575

00:25:06,270 --> 00:25:03,880

ufologists who visited the conching

576
00:25:08,610 --> 00:25:06,280
golnesa mountains and adjacent regions

577
00:25:11,730 --> 00:25:08,620
during the last days of april this year

578
00:25:15,330 --> 00:25:11,740
three out of four residents have

579
00:25:17,370 --> 00:25:15,340
witnessed UFOs in that area there was an

580
00:25:20,250 --> 00:25:17,380
initial phone survey conducted by

581
00:25:24,200 --> 00:25:20,260
apparently a radio station son Luis 24

582
00:25:28,650 --> 00:25:24,210
they did a sampling of 370 respondents

583
00:25:31,230 --> 00:25:28,660
73 percent or 270 people claimed to have

584
00:25:32,010 --> 00:25:31,240
seen an anomalous phenomenon at least

585
00:25:34,740 --> 00:25:32,020
once

586
00:25:36,900 --> 00:25:34,750
the remaining 103 believed the event

587
00:25:39,080 --> 00:25:36,910
could surely be explained by some kind

588
00:25:41,490 --> 00:25:39,090

of natural phenomenon or terrestrial

589

00:25:45,360 --> 00:25:41,500

technology that they were unable to

590

00:25:48,330 --> 00:25:45,370

identify the 167 remaining responses

591

00:25:50,610 --> 00:25:48,340

indicate no hesitation in explaining

592

00:25:53,390 --> 00:25:50,620

that anomalous event as the sighting of

593

00:25:56,340 --> 00:25:53,400

an alien spacecraft in that region after

594

00:25:58,140 --> 00:25:56,350

the initial stage experts are going to

595

00:26:00,420 --> 00:25:58,150

devote the coming months in this study

596

00:26:03,150 --> 00:26:00,430

to photographic evidence video

597

00:26:05,430 --> 00:26:03,160

information provided by local residents

598

00:26:08,220 --> 00:26:05,440

the province of san luis is among

599

00:26:11,130 --> 00:26:08,230

Argentina's top 10 spots for those

600

00:26:13,400 --> 00:26:11,140

phenomena we will certainly keep our

601
00:26:16,740 --> 00:26:13,410
eyes on the area of Argentina

602
00:26:18,960 --> 00:26:16,750
fascinating stuff here's another twist

603
00:26:21,060 --> 00:26:18,970
in trajectory we are now hovering over

604
00:26:24,090 --> 00:26:21,070
Radcliffe England in the United Kingdom

605
00:26:27,150 --> 00:26:24,100
that's the setting for MUFON sighting

606
00:26:30,600 --> 00:26:27,160
number eight four one three five date of

607
00:26:34,230 --> 00:26:30,610
the sighting six - 2017 it got a

608
00:26:37,410 --> 00:26:34,240
same-day report in summary our witness

609
00:26:40,860 --> 00:26:37,420
offers quote I could see green strobing

610
00:26:42,750 --> 00:26:40,870
lights in the sky and quotes sightings

611
00:26:45,360 --> 00:26:42,760
specifics simply offer a viewing

612
00:26:48,180 --> 00:26:45,370
distance as unknown or not applicable

613
00:26:50,700 --> 00:26:48,190

the altitude was unknown the sighting

614

00:26:54,090 --> 00:26:50,710

duration one-minute object features

615

00:26:56,490 --> 00:26:54,100

simply described as other the objects

616

00:26:59,970 --> 00:26:56,500

flight path was stationary and it had a

617

00:27:02,790 --> 00:26:59,980

cylindrical shape there's no weather but

618

00:27:05,790 --> 00:27:02,800

here is the report I was at home

619

00:27:09,060 --> 00:27:05,800

watching Netflix and I don't know how I

620

00:27:11,370 --> 00:27:09,070

noticed it I just saw green lights they

621

00:27:14,160 --> 00:27:11,380

were strobe like so I stood up and went

622

00:27:17,250 --> 00:27:14,170

to the window I thought about getting my

623

00:27:19,230 --> 00:27:17,260

phone but I just kept looking at these

624

00:27:21,690 --> 00:27:19,240

strobing green lights and then they

625

00:27:23,400 --> 00:27:21,700

vanished I thought at first it could

626

00:27:26,460 --> 00:27:23,410

have been lightning but these lights

627

00:27:29,100 --> 00:27:26,470

were green and they were strobing the

628

00:27:31,500 --> 00:27:29,110

lights were strobing and one glowed and

629

00:27:33,350 --> 00:27:31,510

then faded as the other glowed these

630

00:27:35,820 --> 00:27:33,360

things went from left to right I

631

00:27:39,240 --> 00:27:35,830

couldn't see anything but those lights I

632

00:27:41,210 --> 00:27:39,250

had no idea what they were I assumed

633

00:27:43,980 --> 00:27:41,220

they might be just behind the clouds

634

00:27:46,710 --> 00:27:43,990

during this sighting I must say I felt

635

00:27:49,710 --> 00:27:46,720

shocked I had no idea what this was and

636

00:27:50,520 --> 00:27:49,720

I still don't I've never seen anything

637

00:27:52,919 --> 00:27:50,530

like that before

638

00:27:55,580 --> 00:27:52,929

I just wanted to film it put it on

639

00:27:58,350 --> 00:27:55,590

snapchat ask is anyone else seeing this

640

00:28:01,110 --> 00:27:58,360

but by the time I actually thought gets

641

00:28:05,220 --> 00:28:01,120

your phone it disappeared the lights

642

00:28:07,799 --> 00:28:05,230

just disappeared out of nowhere hmm just

643

00:28:10,680 --> 00:28:07,809

like snapchat well it's just about time

644

00:28:12,870 --> 00:28:10,690

for us to disappear ooh as they say

645

00:28:14,880 --> 00:28:12,880

because that's a wrap

646

00:28:17,130 --> 00:28:14,890

thank you for going with us off the

647

00:28:20,070 --> 00:28:17,140

beaten path follow today's stories at

648

00:28:22,320 --> 00:28:20,080

UFO headline news calm we're all in this
